---

Jacob,

In response to your application to revise the LK-6 construction permits, EPA Region 10 has prepared pre-draft minor NSR and PSD permits for your review along with accompanying support documents. The documents are attached. Please review the attached material for technical accuracy and representativeness, and share your comments with us by July 31. If you'd like to meet and discuss the documents, I'm available to join you on a call and answer any questions you may have. Note that I'll be unavailable July 27 through 30, but Doug Hardesty will be around in my absence.
