Subject: PotlatchDeltic November 8, 2019 Notice of Deviation - Minor NSR Permit R10TNSR01801
Date: Friday, November 08, 2019 5:09:00 PM
Attachments: image002.png

Jacob,

This email confirms that EPA Region 10 received your voicemail message from earlier this afternoon regarding your new kiln's deviation from compliance with 9.52 lb/day PM2.5 emission limit as required in Permit Condition 3.6 of tribal minor NSR permit R10TNSR01801 available online at
https://www.epa.gov/caa-permitting/potlatchdeltic-land-and-lumber-llc-tribal-minor-new-source-review-nsr-air-permit
I have forwarded your voicemail message to Katie McClintock in our enforcement group.

Excerpt from minor NSR permit

3.6 Emissions shall not exceed the daily emission limits in Table 3-1. Unless otherwise required in this permit, compliance with these limits is determined by multiplying each emission factor in Table 3-1 (pounds per unit of operation) by the daily operation specified in Table 3-1, except as required in Condition 3.9.

Table 3-1 – Daily PM2.5 Emission Limits, pounds per day

Emission Unit	Emission Limit	Emission Factor, units	Operation
LK-6	9.52	0.0510 lb/mbf lumber	Condition 4.3.5

Excerpt from Attachment D to the minor NSR permit analysis

Permit Allowable Emissions (Daily)					
Daily Emissions (lb/day)	Average Dry Kiln Capacity (bf/charge)	Volume Unit Conversion Factor (Mbf/bf)	Drying Time[2] (hr/charge)	Highest NAAQS-Compliant Emission Factor (lb/Mbf)	Operating Hours Per Day (hr/day)
9.5200	280,000	0.001	36	0.0510	24
