might be called the early bloom of the tea party movement. 50% of americans across the board now have an unfavorable view of the tea party, an 11 point jump up. i have david corn here. what's happened is the undecideds largely have moved over and said we don't like it. the ones who have independent said they don't like it. >> that's pretty natural. these are people who didn't know much about the tea party a few months ago. in recent months they've seen rand paul say he doesn't agree with the 1964 civil rights act. maybe they've heard about candidates running -- republican candidates, tea party support, who call for eliminating the **epa** or getting rid of the 17th amendment which gives **us** the right to directly elect senators. so this is -- when the tea party first starts it sounds kind of civil and patriotic and good and people maybe even agree with it on some of the issues. as they learn more and see some candidates they are saying wait a second, who are these people? >> you know, chris and david back to you, you know what's wrong with most political parties? you have to buy the blue-plate
