Charge to the Board - Science:

- Was the research reported in the Antimicrobial Exposure Assessment Task Force II (AEATF) completed study report faithful to the design and objectives of the protocol and governing documents of AEATF?
- Has EPA adequately characterized, from a scientific perspective, the limitations on these data that should be considered when using the data in estimating the exposure of professional janitorial workers who pour liquid antimicrobial pesticide products from conventional or reduced-splash containers into different sizes and types of source containers?

Charge to the Board - Ethics:

- Does available information support a determination that the study was conducted in substantial compliance with subparts K and L of 40 CFR Part 26?
