

U.S. Department of Justice

Washington, D.C. 20530

August 21, 2006

The Honorable Stephen L. Johnson  
Administrator  
U.S. Environmental Protection Agency  
1200 Pennsylvania Avenue, NW MC0001  
Washington, DC 20460-0001

Dear Mr. Johnson:

The Department of Justice (DOJ) is pleased to submit the enclosed Underground Storage Tank Report as required by the Underground Storage Tank Compliance Act of 2005, Section 9007(b)(1) of Subtitle I. The report lists specific information regarding each tank as required in the Act.

A copy of this letter and report has also been sent to the Committee on Environment and Public Works and the Committee on Energy and Commerce. Should you have any questions, you can contact Ron Deacon, Director, Facilities and Administrative Services Staff. Mr. Deacon can be reached on (202) 616-2995.

Sincerely,

*for* Lee J. Lofthus  
Acting Assistant Attorney General  
for Administration

						<p>1. LAC 33:XL.509.B The facility did not provide any release detection (monthly monitoring) records for the past 11 months. The facility provided the monthly monitoring records for June 2005, all results passed. Corrective Action: We have used a bound record book to maintain the monthly tank tightness test entries. Now that we have become aware of the DEQ requirements, a copy of the Reeder Root test print out is being maintained in a 3 ring binder log in compliance with the requirements of LAC33:XL.509.B. 2. LAC 33:XL.303.A.3.a.ii The facility does not have any overfill protection for the two (2) 8,000 gallon fuel tanks. Corrective Action: The two (2) 8,000 gallon fuel tanks have overfill protection devices in them. These tanks are deeper than most standard tanks and the devices are manufactured by EMCO-Wheater and the model number is an A1100. This information was obtained when Tank Testers, Inc. conducted the tank tightness and line test performed on August 9, 2005.</p>

20						<p>1. LAC 33:XL.303.A.2.c The facility has not installed or enacted any type of corrosion protection for the underground piping related to the two (2) 2,000 gallon diesel tanks and the one (1) 300 gallon diesel tank. Corrective Action: In 1998, Petron, Inc. installed sacrificial anodes to the metal piping of the tanks in question. We have obtained a cost estimate and in the process of having the corrosion protection tested on the lines of the two (2) 2,000 gallon, 300 gallon emergency generator tanks and two (2) 8,000 gallon fuel tanks. We will continue to have this test done with the requirements of LAC 33:XL.303A.2.e</p>

18	General Operating Requirements (Subpart C),Release Detection (Subpart D)		<p>did not provide any release detection (monthly monitoring) records for the past 11 months. The facility provided the monthly monitoring records for June 2005, all results passed. Corrective Action: We have used a bound record book to maintain the monthly tank tightness test entries. Now that we have become aware of the DEQ requirements, a copy of the Reeder Root test print out is being maintained in a 3 ring binder log in compliance with the requirements of LAC33:XL.509.B. 2. LAC 33:XL.303.A.3.a.ii The facility does not have any overfill protection for the two (2) 8,000 gallon fuel tanks. Corrective Action: The two (2) 8,000 gallon fuel tanks have overfill protection devices in them. These tanks are deeper than most standard tanks and the devices are manufactured by EMCO-Wheater and the model number is an A1100. This information was obtained when Tank Testers, Inc. conducted the tank tightness and line test</p>	<p>A Deficiency Clear Letter from LA DEQ was received in reference to Agency Interest#41501, Tempo Activity Number: INS20050001, determining that the areas of concern have been identified in the Notice of Deficiency dated July 28, 2005, and have been adequately addressed.</p>

20	General Operating Requirements (Subpart C)		<p>1. LAC 33:XL.303.A.2.c The facility has not installed or enacted any type of corrosion protection for the underground piping related to the two (2) 2,000 gallon diesel tanks and the one (1) 300 gallon diesel tank. Corrective Action: In 1998, Petron, Inc. installed sacrificial anodes to the metal piping of the tanks in question. We have obtained a cost estimate and in the process of having the corrosion protection tested on the lines of the two (2) 2,000 gallon, 300 gallon emergency generator tanks and two (2) 8,00 gallon fuel tanks. We will continue to have this test done with the requirements of LAC 33:XL.303A.2.e</p>	<p>A Deficiency Clear Letter from LA DEQ was received in reference to Agency Interest#41501, Tempo Activity Number: INS20050001, determining that the areas of concern have been identified in the Notice of Deficiency dated July 28, 2005, and have been adequately addressed.</p>
