

Nonroad Engines and Eligible Nonroad Engines and Equipment Model Years Please refer to the FY13 DERA RFP, Section III.D.10, for additional information

For the purposes of the FY13 DERA RFP, EPA determined remaining useful life (defined as the length of time from the current year to the point at which the engine or equipment should be retired according to EPA's NONROAD Model) for the following types of nonroad engines and equipment. The following tables display the eligible model years for each type of nonroad engine and equipment for three ranges of horsepower. The model years represented by the cells shaded in green have seven or more years of useful life remaining, as defined by this program, and are eligible for the FY13 DERA RFP. The model years represented by the cells shaded in grey are not eligible.
