

Manufacturer: Berry Plastics Corporation
Model: FTCT19000
ASTM Type: III E (3)

Description:

This is a one-piece plastic snap closure with a captive hinge (Figure 1).

Figure 1

The FTCT 19000 snap closure has a lift and peel induction liner over the orifice for tamper evidence (see package on left Figure 2). The FTCT19000 closure is opened by squeezing two arrows 180° apart on the back and front of the closure skirt (Figure 1), which causes the top part of the closure to flip open (Figure 2).

Figure 2

The FTCR19000 permanently snaps onto the container using three ridges on the closure (Figure 3).

Figure 3

In the closed position the top part of the closure has a small tab (upper aqua arrow in Figure 4) that locks into a lip above the arrow on the bottom part of the closure at the front (see aqua arrow on the bottom part of the closure in Figure 4).

Figure 4

The manufacturer's instructions on the package are (Figure 5):

SQUEEZE ARROWS
