

Manufacturer: Berry Plastics Corporation  
Model: FTCT19100  
ASTM Type: III E (3)

Description:

This is a one-piece plastic snap closure with a captive hinge (Figure 1). The flip open closure top covers a dispensing spout on the bottom part of the closure that has a heat induction foil seal to the orifice. (See the opened closure with the dispensing spout in Figure 2).

Figure 1

Figure 2

The dispensing spout is available in an orifice size of 0.125" (Figures 3 left) or 0.250" (Figure 3 right).

Figure 3

The closure has a snap-on finish and is permanently snapped onto the container. The closure is opened by squeezing two dots 180° apart on the back and front of the closure skirt (see black dot at front of closure in Figure 1) which causes the top part of the closure to flip open (Figure 2). In the closed position the top part of the closure has a small tab (see upper aqua arrow in Figure 4) that locks into a lip above the dot on the bottom part of the closure at the front (see arrow on the bottom part of the closure in Figure 4).

Figure 4

The manufacturer's instructions on the closure are (Figure 5):
