Re: Human Health Risk Assessment for the Upland Soil, Operable Unit Three (OU 3):  
LCP Chemicals Superfund Site, Brunswick, Glynn County, Georgia

Dear Mr. Gupta:

The purpose of this letter is to notify Honeywell International, Inc. (Honeywell) that the U.S. Environmental Protection Agency is approving its January 2012 draft of the Human Health Risk Assessment for the Uplands Soils, Operable Three (OU 3), of the LCP Chemicals Site Superfund (Site). In addition, the EPA is now directing Honeywell to submit the draft remedial investigation report for OU3, described in detail in the Scope of Work (SOW) incorporated into the Administrative Order by Consent for Remedial Investigation/Feasibility Study, EPA Docket No. 95-17-C (AOC). Please submit the draft remedial investigation report for OU3 to the EPA for review and approval within 60 calendar days of receipt of this letter.

Note that the evaluation of vadose zone soil leaching to groundwater has been deferred until the feasibility study. In addition, the former Cell Building Area's surface and subsurface soil was not evaluated in the referenced Risk Assessment.

If you have any questions regarding the approval of the Human Health Risk Assessment for OU3 of the LCP Chemicals Site or the instructions for next steps in this letter, please contact me at (404) 562-8937.

Sincerely,

Galo Jackson, P.G.  
Remedial Project Manager  
Superfund Remedial Branch
