Re: Review of the U. S. Army Corps of Engineers
(Corps) February 21, 2012 Federal Register Notice
announcing the reissuance of the Corps' CWA §404
Nationwide Permits (NWP)

Dear Colonel Leady:

The Environmental Protection Agency (EPA) Region 8 has the responsibility under §401 of the Clean Water Act (CWA) to evaluate and certify water quality protections for federal permits or licenses issued for work on most tribal lands within Region 8. The EPA has reviewed the U. S. Army Corps of Engineers (Corps) February 21, 2012 Federal Register Notice announcing the reissuance of the Corps' CWA §404 Nationwide Permits (NWP), and the EPA is transmitting the programmatic water quality certification (certification) for these NWP. The enclosed conditions become binding requirements of any NWP issued for work on tribal lands within Region 8 for tribes without Treatment in a Manner Similar to States for water quality standards programs. The EPA requests that the Corps provide this certification letter to applicants for NWP within Region 8 as well as post this certification letter on the appropriate Corps web sites to assure that applicants are aware of the conditions for certification.

In summary the EPA is waiving certification for 22 of the 50 NWP, certifying or conditionally certifying 14 NWP with general conditions, and denying certification for 14 NWP. The EPA believes these conditions will help protect water quality and help ensure that the NWP program will have no more than minimal adverse impacts on the aquatic environment on tribal lands. In general, the EPA is denying certification for any activities described in the Federal Register notice which require either a Preconstruction Notification (PCN) or a waiver from the District Engineer. The EPA believes these activities which require additional review by the Corps merit additional scrutiny from the EPA.

Projects which qualify for the use of a NWP for which certifications have been denied must contact the EPA for individual project certification. Projects which do not require individual certification must notify the EPA in accordance with the general conditions of this certification, but may proceed without further written verification from the EPA. For projects for which a certification has been denied and project specific certification is required, the certification may be considered waived if the EPA fails to contact the applicant within 30 days of the EPA's receipt of the request for certification.

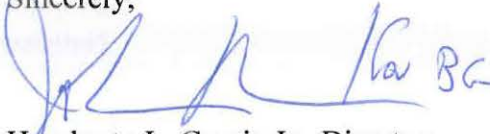

Because Region 9 is the lead Region for the Goshute Tribe in the State of Utah, please ensure applicants on these Tribal lands are made aware of the Region 9 certification conditions.

Please send all correspondence to:

United States Environmental Protection Agency, Region 8
Attn: Wetlands and Tribal Unit, EPR-EP 401 Certification
1595 Wynkoop St.
Denver, Colorado 80202-1129

Thank you for your ongoing partnership in the implementation of the regulatory programs of the CWA. If you have questions about this certification, the most knowledgeable person on my staff is Brent Truskowski and he may be reached at 303-312-6235, or email at truskowski.brent@epa.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read 'H. Garcia Jr.', is written over a faint, circular official stamp.

Humberto L. Garcia Jr., Director
Ecosystems Protection Program

General Conditions

For all NWP:

1. A copy of the certification documentation must be on-site.
2. This programmatic certification does not authorize construction of on-site septic systems in waters of the US.
3. Certification is denied for all activities affecting fens and springs.
4. All equipment must be inspected for fluid leaks prior to use on a project. All fluid leaks shall be repaired and cleaned prior to use or when discovered, or if the fluid leak can't be repaired, the equipment shall not be used on site.
5. Notification of the use of all NWPs shall be sent to EPA prior to the commencement of the project. This notification will include the information required in GC 31(b), and a summary of contacts with the affected tribe's water quality staff regarding the project.

For NWPs for which certification has been denied, the Applicant must provide:

1. The information required in GC 31(b).
2. A summary of contacts with the affected tribe's water quality staff regarding the project.
3. A summary of tribally identified water quality concerns, if any.
4. If the affected water body is continuous off the tribal lands, a summary of state identified water quality standards for the affected water body.
5. A description of how the project will utilize construction best management practices to reduce or eliminate water quality degradation as a result of the project.

If the EPA does not respond to a request for certification within 30 days, the cert is considered waived.

Waive

- 1 Aids to Navigation
- 2 Structures in Artificial Canals
- 4 Fish and Wildlife Harvesting, Enhancement, and Attraction Devices and Activities
- 5 Scientific Measurement Devices
- 8 Oil and Gas Structures on the Outer Continental Shelf
- 9 Structures in Fleeting and Anchorage Areas.
