# **KAYOLE SOWETO PROJECT**

Eng Lucy Njambi Informal Settlements Manager NAIROBI CITY WATER AND SEWERAGE COMPANY, KENYA. January 2013

# Introduction

- 3.3 million people in Nairobi City , 1.4 million live in informal settlements.
- Areas characterized by lack of basic services, lack of land tenure and semi-permanent housing.
- Kayole Soweto is a settlement situated at Embakasi Division in Nairobi's Eastlands area. It was formed by the transfer of poor people from city Centre to the outskirts. average monthly income of Kes12,000 - \$150
- The area has land tenure in the form of **Allotment Letters**.
- Estimated population of 89,600 distributed in 22,400 households. Most landlords are present

### **Infrastructural Development**

The Partners are

- (NCWSC) 15km of water-pipelines and community outreach programmes
- Water and Sanitation Services Improvement Program (WASSIP) – World Bank – financing, socio- support and subsidy
- AWSB Consultancy services as well as client
- K-Rep Bank financing connections
- The community labor, security and ownership

### Outcomes

- NCWSC has developed a Social Connection Policy to ensure improved access to clean and safe water to households in Nairobi's informal settlements and in low income areas by subsidizing first-time connections.
- 14.6 km of water network within the 9 zones.
- Sewer reticulations and connection to follow early this year
- Cost of water has reduced
- Replicable system to be duplicated to serve about 300,000 persons in the informal settlements with water and sanitation services in the short term. More in the long term.

# **Socio Component of the Project**

- The NCWSC has made a lot of contribution in Socio Work to support the project. A sociologist, an Engineer and a Community based Assistant were almost fulltime on the job since inception. Several meetings have been held with the community. Labour was exclusively sourced from the community.
- The community is upbeat about the project and really excited. The ownership is high.

#### Challenges

- It is imperative that the accounts are billed timely
- Ensure a constant supply of water
- Continued community outreach programmes to mitigate arising issues.
- Support of the project by other departments of the company

## Thank you
