

# CCR*i*Writer

*The CCR*i*Writer is a new internet-based tool that will help water systems create their annual Consumer Confidence Report (CCR) by answering required questions and filling in blanks.*

	The CCR <i>i</i> Writer is a web-based program that allows water system operators or designated personnel to enter data and generate a CCR.
<b>How does it work?</b>	After logging in, you will see a series of questions about your system's source water and detected contaminants. After you finish answering the questions, you may print or download the completed report.
<b>Where can I get one?</b>	CCR <i>i</i> Writer is a free service for water systems available at: <a href="http://www.ccriwriter.com">www.ccriwriter.com</a>
<b>How quick is it?</b>	CCR <i>i</i> Writer takes a short time to fill out if you have your contaminant monitoring results handy. Required information, such as definitions, are already included to save you time.
<b>Is my information secure?</b>	Yes. You will designate a user name and password which ensures you and only personnel you authorize are able to access or change a system's information.
<b>What about new rules that are finalized?</b>	CCR <i>i</i> Writer will add all new Federal requirements needed to prepare CCR reports, as needed, so you do not have to worry about new changes.
<b>What if I need to make changes to the report?</b>	The website allows you to edit information you entered or download the report to make changes as necessary (i.e., if your State has additional requirements).
<b>What will I need to create my CCR?</b>	Because the CCR <i>i</i> Writer is internet driven, you will need access to the internet and the monitoring results you report in your annual CCR.
<b>What if I operate more than one water system?</b>	You may use the CCR <i>i</i> Writer to create separate CCRs for as many systems as you need; there is no limit.
<b>Can I use it year after year?</b>	Yes! You can save reports under different names. Each report is stored and accessible by the user name and password you designate.
