

South Platte Geomapping Platform

- Requested by partnership at first meeting
- Based on USGS Anacostia tool
- Funded by EPA through contract with SAIC
- 6 webinars with partners
- Presentation by SAIC at last partnership meeting
- Partners filled out spreadsheet on data layers
- Top data layers to be selected soon
- Several months to collect data from partner
- Creation of geomapping tool by May?

Revised Project Categories

- water access, trails, recreation, parks, open space
- education, outreach, training, green jobs
- research and monitoring
- water quality improvements
- forest restoration/protection
- river/stream/wetlands restoration/conservation/flood protection
- green infrastructure/low impact development for stormwater
- trash cleanup and invasive species removal
- other projects

I Commit.....

- To provide projects and events data via the data entry interface as well as directly to SAIC to input on my behalf on a regular basis – every two months over the course of the next two years.
- To participate in the Bulletin Board as needed but to include it as a means of collaboration in addition to my traditional means of collaborating.
- To collaborate in meetings during the next two years to suggest improvements to the tool.

Systems Mapping

- Systems mapping also requested by partnership at first meeting
- UW systems mapping project not funded
- SAIC does not have systems mapping expertise
- EPA Sustainability Coordinator, Cynthia Cody, has agreed to facilitate a systems mapping process for the partnership
