

Manufacturer: Locked4Kids BV  
Model: US-Locked4Kids Carton  
ASTM Type: XIIIIF

Description:

This is a semi-rigid blister reclosable package. This package consists of a polymer coated fibreboard outer carton containing an affixed plastic sliding tray with one or more affixed blister cards (Figure 1).

Figure 1

The front of the blister card covers each tablet with a clear semi-rigid plastic film and the back of the card is foil (Figure 2).

Figure 2

The package is opened by first pressing and holding the two pressing points, which are located at the sides of the outer carton (Figure 3A). Then the plastic tray is pulled out of the carton (Figure 3B). Once the blister card is exposed, a tablet is pushed out through the foil backing (Figure 4).

Figure 4

Figure 5

The manufacturer's instructions on the carton are a combination of written text and graphical illustrations (Figure 5). The instructions in Figure 5 have two orange arrows showing the pressing points diagonally across from each other and one orange arrow showing the direction for pulling out the sliding tray. There is an inset in white in Figure 5 showing the same information with the pressing points labelled 1 "1 Press and hold" and the direction for pulling out the sliding tray with a finger labelled "2 Pull tray".
