

Known Application Issues

(Last updated 11/19/14 (5:30 PM EDT))

Tab/Section	Page	Issue
FIM	N/A	The Facility Information Management (FIM) module will not be included in UAT 1. If accessed, the FIM module will display an alert message.
Welcome	TRI-MEweb Enhancements	Needs to be updated with RY 14 enhancements.
Prepare	Section 8 Source Reduction and Recycling: Introduction	The 'click here to view facility's Pollution Prevention (P2) report' link displays a 'There is no frsID entered' pop up when clicked on, as TEST environment does not have any real facilities. This link should work as designed after the release is in production.
Prepare	Section 8.9 Production Ratio or Activity Ratio	<ul style="list-style-type: none"> - "Production or Activity Variable(s)" comment box is not displaying the correct variable type when weighted average is used. - 'More' link below the Production Ratio or Activity Ratio metric types is not directed to the correct user guide page. The link times out or displays 'page not found'.
Prepare	Section 8.11 & 9.1	Section 8.11 and 9.1 character counters are not updating in questionnaire mode.
Prepare	Section 8.11/Copy of Record	For the "Other Optional Pollution Prevention Information" text box, the default text appears on the stylesheet unless it is replaced with a comment. This issue also exists on the copy of record.
Certify	Stylesheet	When accessed from the "Pending Submission" or "Confirm Selected Submission" pages, the stylesheet improperly displays section 5.3 reach codes.
Certify	Copy of Record	The copy of record improperly displays reach codes and states for non-us POTWs.
