Tab/Section	Page	Issue
Welcome	TRI-MEweb Enhancements	Needs to be updated with RY 14 enhancements.
Welcome	Welcome to TRI-MEweb!!	Clicking on the 'Not Reporting?' link from the Forms Summary table of the Welcome page gives an error.
Prepare	Select a Form	Clicking on the **Edit** button from the verify address pop up for the "Facility not reporting? Provide information to EPA why your facility is not reporting (optional)" gives an error.
Prepare	Section 8 Source Reduction and Recycling: Introduction	The 'click here to view facility's Pollution Prevention (P2) report' link displays a 'There is no frsID entered' pop up when clicked on, as TEST environment does not have any real facilities. This link should work as designed after the release is in production.
Prepare	Section 8.11/Copy of Record	For the "Other Optional Pollution Prevention Information" text box, the default text appears on the style sheet unless it is replaced with a comment. This issue also exists on the copy of record.
Validate	Validation Step 1 of 2: Facility Information	The 'Fix' links on the facility validation page does not work. Facility level errors can be corrected using the Form Mode after selecting a form for a reporting year.
