

FY13 Guidelines for Brownfields Revolving Loan Fund (RLF) Grants

OVERVIEW

AGENCY: ENVIRONMENTAL PROTECTION AGENCY (EPA)

TITLE: FY13 Guidelines for Brownfields Revolving Loan Fund Grants

ACTION: Request for Proposals

RFP NO: EPA-OSWER-OBLR-12-08

CATALOG OF FEDERAL DOMESTIC ASSISTANCE (CFDA) NO.: 66.818

DATES: Proposals may be sent through the U.S. Postal Service, commercial delivery service, or electronically through www.grants.gov. Only one method should be used for the submission of the original, complete proposal package. Proposals sent through the U.S. Postal Service or via a commercial delivery service must be postmarked by November 19, 2012. Proposals sent electronically to grants.gov must be received by www.grants.gov by 11:59 p.m. Eastern Time on November 19, 2012. Please refer to Section IV.B, *Due Date and Mailing Instructions*, for further instructions.

SUMMARY: The Small Business Liability Relief and Brownfields Revitalization Act (“Brownfields Law”, P.L. 107-118) requires the U.S. Environmental Protection Agency (EPA) to publish guidance to assist applicants in preparing proposals for grants to assess and clean up brownfield sites. EPA’s Brownfields Program provides funds to empower states, communities, tribes, and nonprofits to prevent, inventory, assess, clean up, and reuse brownfield sites. EPA provides brownfields funding for three types of grants.

1. Brownfields Assessment Grants – provides funds to inventory, characterize, assess, and conduct planning (including cleanup planning) and community involvement related to brownfield sites.
2. Brownfields Revolving Loan Fund (RLF) Grants – provides funding for a grant recipient to capitalize a revolving fund and to make loans and provide subgrants to carry out cleanup activities at brownfield sites.
3. Brownfields Cleanup Grants – provides funds to carry out cleanup activities at a specific brownfield site owned by the applicant.

For the purposes of these guidelines, the term “grant” refers to the cooperative agreement that EPA will award to a successful applicant. Please refer to Section II.C for a description of EPA’s anticipated substantial involvement in the financial assistance agreements awarded under these guidelines.

Under these guidelines, EPA is seeking proposals for **RLF Grants** only. If you are interested in requesting funding for Assessment and/or Cleanup Grants, please refer to announcements EPA-OSWER-OBLR-12-07 (Assessment Grant Guidelines) or EPA-OSWER-OBLR-12-09 (Cleanup Grant Guidelines), posted separately on www.grants.gov and www.epa.gov/brownfields.

EPA urges applicants to review the Frequently Asked Questions, which can be found at http://www.epa.gov/brownfields/proposal_guides/FY13_FAQs.pdf.

In addition, prior to naming a contractor or subawardee in your proposal please carefully review Section IV.E and F of these guidelines.

FUNDING/AWARDS: The total funding available under the national competitions for assessment, cleanup, and RLF grants is estimated at **\$60 million subject to the availability of funds and other applicable considerations**. EPA must expend 25 percent of the amount appropriated for brownfields grants on sites contaminated with petroleum. EPA anticipates awarding an estimated 219 grants among all three grant types. **Under this announcement, EPA anticipates awarding an estimated 13 RLF grants for a total of approximately \$10 million.**

SECTION I - FUNDING OPPORTUNITY DESCRIPTION

The Comprehensive Environmental Response, Compensation and Liability Act (CERCLA or the Superfund law) was amended by the Small Business Liability Relief and Brownfields Revitalization Act (Brownfields Law) to include section 104(k), which provides federal financial assistance for brownfields revitalization, including grants for assessment, cleanup, and RLF.

A **brownfield site is defined** as real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of hazardous substances, pollutants, contaminants, controlled substances, petroleum or petroleum products, or is mine-scarred land.

As described in Section V of this announcement, proposals will be evaluated based, among other factors, on the extent to which the applicant demonstrates: economic and environmental needs of the targeted communities; a vision for the reuse and redevelopment of brownfield sites and the capability to achieve that vision; reasonable and eligible tasks; partnerships and leveraged resources to complete the projects; livability and sustainability principles; and economic,

environmental, health, and social benefits associated with the reuse and redevelopment of brownfield sites.

A critical part of EPA's assessment and cleanup efforts is to ensure that residents living in communities historically affected by economic disinvestment, health disparities, and environmental contamination have an opportunity to reap the benefits from brownfields redevelopment. EPA's Brownfields Program has a rich history rooted in environmental justice and is committed to helping communities revitalize brownfield properties, mitigate potential health risks, and restore economic vitality.

I.A. Description of Grant

RLF grants provide funding for a grant recipient to capitalize a revolving loan fund from which to provide loans and subgrants to carry out cleanup activities at brownfield sites. An individual applicant can apply for up to \$1,000,000. Funds may be used to clean up sites contaminated with petroleum and/or hazardous substances. Sites where hazardous substances and petroleum contamination are distinguishable must meet eligibility requirements for both types of funding. If the petroleum and hazardous substances are not easily distinguishable, the site must meet eligibility requirements for the predominant contaminant. Sites eligible for hazardous substance funding are those properties with the presence of hazardous substances, pollutants, contaminants and sites that are contaminated with controlled substances or that are mine-scarred lands.

The proposal must indicate the dollar amount of funding requested for each type of contamination. The performance period is five years for RLF grants. For a list of certain grant and programmatic requirements refer to Section VI. For more information on brownfield sites eligible for cleanup under RLF grants please refer to Appendix 1.

Coalitions of eligible entities may submit proposals for an RLF grant. A coalition is a group of two or more eligible entities that submits one grant proposal under the name of one of the coalition participants. The lead coalition member may not be the recipient of an active RLF grant. Coalitions of eligible entities may apply together under one applicant for up to \$1,000,000 per eligible entity (see Section III.A for a list of entities eligible to apply for an RLF grant). The grant recipient must administer the grant, will be accountable to EPA for proper expenditure of the funds, and will be the point of contact for the other coalition members.

The Brownfields Law **requires applicants to provide a 20 percent cost share** for RLF grants. For example, a \$1,000,000 RLF grant will require a \$200,000 cost share. The cost share, which may be in the form of a contribution of money, labor, material, or services, must be for eligible and allowable costs under the grant and **cannot include administrative costs**, as described in the Brownfields Frequently Asked Questions (FAQ) at:http://www.epa.gov/brownfields/proposal_guides/FY13_FAQs.pdf. Applicants may request a waiver of the 20 percent cost share requirement based on hardship. EPA will consider hardship waiver requests on a case-by-case basis and will approve such requests on a limited basis. Refer to the cost share threshold criteria for RLF grants in Section III.B.5 for additional information.

Revolving loan funds generally are used to provide no-interest or low-interest loans for brownfields cleanups. An RLF grant recipient must use at least 50 percent of the awarded funds

to capitalize and implement a revolving loan fund. An RLF grant recipient may use no more than 50 percent of the awarded funds for subgrants and may not subgrant to itself. The RLF grant recipient may subgrant to other coalition members. While no more than 50% of the funding can be used for subgrants, recipients may request EPA (post-award) on a case-by-case basis to waive the subgrant limitation. Based on the justification for why additional subgrant capacity is needed, EPA will consider waivers of this requirement. RLF funds must be used by the recipient to provide loans or subgrants for the cleanup of eligible brownfields sites and for eligible programmatic costs for managing the RLF. Subgrants are limited to \$200,000 per site; however, after award, the recipient may request that EPA waive the \$200,000 limit on a case-by-case basis if such a waiver would facilitate effective cleanup and sustainable reuse of the site or further other goals specified in the terms of the RLF agreement or CERCLA 104(k). An RLF grant recipient also may use its funds to award cleanup subgrants to other eligible entities for brownfields cleanups on sites owned by the subgrantee. An RLF grant recipient **cannot make a loan or subgrant to a party potentially liable for the contamination** at the brownfield site under CERCLA §107, nor may the RLF grant recipient make a loan or subgrant to clean up a site that it is potentially liable for under CERCLA §107.

For more information on a range of brownfields topics, please refer to the Brownfields FAQ at:http://www.epa.gov/brownfields/proposal_guides/FY13_FAQs.pdf. If you do not have access to the Internet, you can contact your EPA Regional Coordinator listed in Section VII.

I.B. Uses of Grant Funds

In addition to direct costs associated with the cleanup of a brownfield site, grant funds also may be used for the following activities:

1. Grant funds may be used for direct costs associated with programmatic management of the grant, such as required performance reporting, construction oversight, environmental monitoring of cleanup work, and funds management.

All costs charged to RLF grants must be consistent with the applicable OMB Cost Circulars. The cost principles for universities and educational institutions are found at 2 CFR Part 220. The cost principles for governmental units are found at 2 CFR Part 225.

2. A **local government** (as defined in 40 CFR Part 31.3, *Local Government*) may use up to 10 percent of its grant funds for any of the following activities:
 - a. health monitoring of populations exposed to hazardous substances, pollutants, or contaminants from a brownfield site
 - b. monitoring and enforcement of any institutional control used to prevent human exposure to any hazardous substance, pollutant, or contaminant from a brownfield site and
 - c. other related program development and implementation activities (e.g., writing local brownfields-related ordinances) to effectively oversee assessments and cleanups described in an EPA-approved work plan

The term local government **does not include state or tribal governments** but may include, among others, public housing authorities, school districts, and councils of governments.

3. A portion of any brownfields grant or loan may be used to purchase insurance.

Grant funds cannot be used for the following activities:

1. Administrative costs, including but not limited to costs that are considered indirect costs, of grant administration with the exception of financial and performance reporting costs.
2. Proposal preparation costs.

See the Brownfields FAQ at: http://www.epa.gov/brownfields/proposal_guides/FY13_FAQs.pdf for additional information on ineligible grant activities and ineligible costs.

I.C. EPA Strategic Plan Linkage

EPA’s Strategic Plan defines goals, objectives and sub-objectives for protecting human health and the environment. All three brownfields grant types will support progress toward Goal 3 (Cleaning Up Communities and Advancing Sustainable Development), Objective 3.1 (Promote Sustainable and Livable Communities). Specifically, these grants will help sustain, clean up and restore communities and the ecological systems that support them by providing funds to assess and clean up brownfield sites. EPA will negotiate work plans with recipients to collect information about the hazardous substances, pollutants and petroleum contaminants addressed and the amount of land made safe for communities’ economic and ecological use.

(View EPA’s Strategic Plan on the Internet at <http://www.epa.gov/planandbudget/strategicplan.html> and view EPA’s Order 5700.7 at <http://www.epa.gov/ogd/grants/award/5700.7.pdf>)

I.D. Livability Principles

Link to the HUD-DOT-EPA Partnership for Sustainable Communities

EPA’s Brownfields Assessment, Revolving Loan, and Cleanup (ARC) Program is being carried out consistent with the principles for the Partnership for Sustainable Communities (PSC) among the U.S. Department of Housing and Urban Development (HUD), U.S. Department of Transportation (DOT), and EPA. The PSC was conceived to advance development patterns and infrastructure investment programs that achieve improved economic prosperity, healthy, environmentally sustainable, and opportunity-rich communities for all Americans, regardless of race or income. Recognizing the fundamental role that public investment plays in achieving these outcomes, the Administration charged three agencies whose programs impact the physical form of communities—HUD, DOT, and EPA—to coordinate and incorporate the Livability Principles into their policies and funding programs to the maximum degree possible. The Livability Principles can be found at www.sustainablecommunities.gov and include: (1) Provide more transportation choices, (2) Promote equitable, affordable housing, (3) Increase

economic competitiveness, (4) support existing communities, (5) Leverage federal investment, and (6) Value communities and neighborhoods.

Linking BF Assessment, Revolving Loan Fund, and Cleanup Approaches to Sustainable and Equitable Development Outcomes

Applicants should incorporate sustainable and equitable cleanup and reuse approaches into their proposed BF Assessment, Revolving Loan Fund, and Cleanup (BF ARC) project. The Agency may also consider how well an Applicant's proposed project is coordinated with HUD, DOT, EPA programs and programs available from other potential federal and non-federal partners. Sustainable and equitable approaches can ensure brownfields are cleaned up and reused in ways that:

- contribute to greener and healthier homes, buildings, and neighborhoods;
- mitigate environmental conditions through effective deconstruction and remediation strategies which address solid and hazardous waste, and improve air and water quality;
- improve access by residents to greenspace, recreational property, transit, schools, other nonprofit uses (e.g., libraries, health clinics, youth centers, etc.), and healthy and affordable food;
- improve employment and affordable housing opportunities for local residents;
- reduce toxicity, illegal dumping, and blighted vacant parcels; and
- retain residents who have historically lived within the area affected by brownfields.

Sustainable development practices facilitate environmentally-sensitive brownfields cleanup and redevelopment while also helping to make communities more attractive, economically stronger, and more socially diverse. While ensuring consistency with community-identified priorities, sustainable development approaches encourage brownfield site cleanup and reuse in ways that provide new jobs, commercial opportunities, open space amenities, and/or social services to an existing neighborhood. Brownfields site preparation strategies that prevent contaminant exposure through green building design, materials recycling, enable urban agricultural reuse, promote walkability to/around the site and contribute to community walkability, and on-site stormwater management through green infrastructure, among other approaches, can contribute to sustainable development outcomes.

Equitable development outcomes come about when intentional strategies are put in place to ensure that low-income and minority communities not only participate in, but benefit from, decisions that shape their neighborhoods and regions. There are many different approaches that promote equitable development, such as ensuring a mix of housing types across a range of incomes, access to fresh food, access to jobs, and access to local capital. Programs or policies can be put in place to help ensure creation or integration of affordable housing; local or first-source hiring; minority contracting; inclusionary zoning (where a percentage of new housing is designated as affordable housing); healthy food retailers in places where they do not exist (e.g. food deserts); co-operative ownership models where local residents come together to run a community-owned, jointly owned business enterprise; rent control or community land trusts (to help keep property affordable for residents); supportive local entrepreneurial activities, and adherence to equal lending opportunities.

EPA encourages applicants to provide specific examples of how the proposed Revolving Loan Fund project will work to remove economic, environmental and social barriers to make sustainable and equitable brownfields cleanup and reuse of the highest priority.

Under the Program Benefits ranking criterion in Section V, applicants will be evaluated on how their proposed BF ARC project will advance the livability principles discussed above. In addition, the project will be evaluated on the extent to which it will lead to sustainable and equitable development outcomes as discussed above.

I.E. Measuring Environmental Results: Anticipated Outputs/Outcomes

Pursuant to EPA Order 5700.7, “Environmental Results under EPA Assistance Agreements,” EPA requires that all grant applicants and recipients adequately address environmental outputs and outcomes.

EPA must report on the success of its Brownfields Program through measurable outputs and outcomes, such as the number of sites assessed, number of jobs created and amount of funding leveraged. Applicants are required to describe how funding will help EPA achieve environmental outputs and outcomes in their responses to the ranking criteria (Section V.B.2., *Project Description and Feasibility of Success*). **Outputs specific to each project will be identified as deliverables in the work plan negotiated after a grant is awarded.** Grantees will be expected to report progress toward the attainment of expected project outputs and outcomes during the project performance period.

Outputs and Outcomes are defined as follows:

1. **Outputs:** The term “outputs” refers to an environmental activity, effort and/or associated work products related to an environmental goal or objective that will be produced or provided over a period of time or by a specified date. Outputs may be quantitative or qualitative but must be measurable during the project period. The expected outputs for the grants awarded under these guidelines are the cleanup of brownfield sites and may include but are not limited to the number of brownfield sites cleaned up and/or the number of loans or subgrants awarded.
2. **Outcomes:** The term “outcomes” refers to the result, effect, or consequence that will occur from carrying out the activities under the grant. Outcomes may be environmental, behavioral, health-related, or programmatic; must be quantitative; and may not necessarily be achievable during the project period. Expected outcomes of brownfields grants include the number of jobs leveraged and other funding leveraged through the economic reuse of sites; the number of acres made ready for reuse or acres of greenspace created for communities; and whether the project will minimize exposure to hazardous substances.

SECTION II - AWARD INFORMATION

II.A. What is the amount of available funding?

The total estimated funding available under the national competitions for assessment, cleanup, and RLF grants is estimated at **\$60 million subject to the availability of funds and other applicable considerations**. Separate announcements are posted for the assessment and cleanup competitions. EPA must expend 25 percent of the amount appropriated for brownfields grants on sites contaminated with petroleum. EPA anticipates awarding an estimated **219** grants among all three grant types. **Under this announcement, EPA anticipates awarding an estimated 13 RLF grants for a total amount of approximately \$10 million in funding**. In addition, EPA reserves the right to award additional grants under this competition should additional funding become available. Any additional selections for awards will be made no later than six months from the date of the original selection decision. EPA reserves the right to reject all proposals and make no awards under this announcement or make fewer awards than anticipated.

In appropriate circumstances, EPA reserves the right to partially fund proposals by funding discrete portions or phases of proposed projects. To maintain the integrity of the competition and selection process, EPA, if it decides to partially fund a proposal, will do so in a manner that does not prejudice any applicants or affect the basis upon which the proposal, or portion thereof, was evaluated and selected for award.

II.B. What is the project period for awards resulting from this solicitation?

The project period for RLF grants is up to five years.

II.C. Substantial Involvement

The brownfield RLF grant will be awarded in the form of a cooperative agreement. Cooperative agreements permit the EPA Project Officer to be substantially involved in overseeing the work performed by the selected recipients. Although EPA will negotiate precise terms and conditions relating to substantial involvement as part of the award process, the anticipated substantial federal involvement for this project may include:

- close monitoring of the recipient's performance to verify the results
- collaborating during performance of the scope of work
- reviewing substantive terms of proposed contracts
- reviewing qualifications of key personnel (EPA will not select employees or contractors employed by the award recipient)
- reviewing and commenting on reports prepared under the cooperative agreement (the final decision on the content of reports rests with the recipient)
- reviewing sites as meeting applicable site eligibility criteria

SECTION III - APPLICANT ELIGIBILITY INFORMATION

III.A. Who Can Apply?

The following information indicates which entities are eligible to apply for an RLF grant. Nonprofit organizations are not eligible to apply for an RLF grant.

- General Purpose Unit of Local Government. (For purposes of the brownfields grant program, EPA defines general purpose unit of local government as a “local government” as defined under 40 CFR Part 31.)
- Land Clearance Authority or other quasi-governmental entity that operates under the supervision and control of, or as an agent of, a general purpose unit of local government.
- Government Entity Created by State Legislature.
- Regional Council or group of General Purpose Units of Local Government.
- Redevelopment Agency that is chartered or otherwise sanctioned by a state.
- State.
- Indian Tribe other than in Alaska. (The exclusion of Alaskan tribes from brownfields grant eligibility is statutory at CERCLA §104(k)(1). Intertribal Consortia, comprised of eligible Indian Tribes, are eligible for funding in accordance with EPA’s policy for funding intertribal consortia published in the *Federal Register* on November 4, 2002, at 67 Fed. Reg. 67181. This policy also may be obtained from your Regional Brownfields Coordinator listed in Section VII.)
- Alaska Native Regional Corporation, Alaska Native Village Corporation, and Metlakatla Indian Community (Alaska Native Regional Corporations and Alaska Native Village Corporations are defined in the Alaska Native Claims Settlement Act (43 U.S.C. 1601 and following). For more information, please refer to Brownfields FAQs at:http://www.epa.gov/brownfields/proposal_guides/FY13_FAQs.pdf.)

III.B. Threshold Criteria for RLF Grants

This section contains the threshold eligibility criteria that ensure applicants are eligible to receive RLF grants. Threshold criteria are pass/fail. Threshold criteria include applicant eligibility and site eligibility. The information you submit will be used by EPA solely to make site eligibility determinations for Brownfields grants and is not legally binding for other purposes including federal, state, or tribal enforcement actions. Only those proposals that pass all the threshold criteria will be evaluated against the ranking criteria in Section V of this announcement.

Applicants deemed ineligible for funding consideration as a result of the threshold eligibility review will be notified within 15 calendar days of the ineligibility determination. Applicants must respond to the items listed below to ensure that they are eligible for funding.

Your responses to these items are required and **must** be included as an attachment to your Narrative Proposal and transmittal letter you submit to EPA. See Section IV.C for a complete list of required proposal content.

For purposes of the threshold eligibility review, EPA, if necessary, may seek clarification of applicant information and/or consider information from other sources, including EPA files.

Proposals must substantially comply with the proposal submission instructions and requirements set forth in Section IV of this announcement **or they will be rejected**. Pages in excess of the page limits described in Section IV for the narrative proposal and transmittal letter, and attachments not specifically required, will not be reviewed.

Proposals must be postmarked, or received at www.grants.gov by **November 19, 2012**. Proposals postmarked or received at www.grants.gov after the proposal deadline will be considered late and will not be reviewed unless the applicant can clearly demonstrate that it was late due to EPA mishandling or because of technical problems associated with grants.gov. Applicants should confirm receipt of their proposal with the appropriate Regional Brownfields Coordinator listed in Section VII as soon as possible after the submission deadline—failure to do so may result in your proposal not being reviewed. **Facsimile delivery of proposals is not permitted and will not be considered.**

1. Applicant Eligibility

Applicants must demonstrate they are an eligible entity for an RLF grant. Refer to the description of applicant eligibility in Section III.A, *Who Can Apply*. For entities other than cities, counties, tribes, or states, please attach documentation of your eligibility (e.g., resolutions, statutes, etc.).

Coalitions applying for RLF grants must document how all coalition members are eligible entities. All coalition members must submit a letter to the grant applicant (lead coalition member) in which they agree to be part of the coalition. **These letters must be attached to your proposal.**

2. Description of Jurisdiction

For 2013, EPA will only award RLF grants on a community-wide and jurisdiction-wide basis. This allows for the use of grant funds throughout the jurisdiction, as defined by the applicant in its proposal. This does not preclude applicants from targeting specific communities or areas within the jurisdiction in their marketing, outreach, and cleanup activities. Applicants must provide a description of the boundaries of their jurisdiction (e.g., the city limits of The City of ABC).

3. Letter from the State or Tribal Environmental Authority

For an applicant other than a state or tribal environmental authority, attach a **current** letter from the appropriate state or tribal environmental authority acknowledging that the applicant plans to establish a revolving loan fund and conduct cleanup activities and is planning to apply for federal grant funds. Failure to submit this letter will result in the rejection of the proposal for further consideration. **Letters regarding proposals from prior years are not acceptable.** If you are applying for multiple types of grant program activities, you need to submit only one letter acknowledging the relevant grant activities. However, you must

provide a copy of this letter as an attachment to each proposal. Please note that general correspondence and documents evidencing state involvement with the project (i.e., state enforcement orders or state notice letters) are not acceptable. It is the applicant's responsibility to provide advance notice to the appropriate state or tribal environmental authority to allow adequate time for you to obtain the acknowledgement letter and attach it to your proposal.

4. Oversight Structure and Legal Authority to Manage a Revolving Loan Fund

Please note that **you will be required to comply with all applicable federal and state laws and ensure that the cleanup protects human health and the environment.**

- a. Describe how you will oversee cleanup at sites. Indicate whether you plan to require loan or subgrant recipients to enroll in a state or tribal response program. If you do not plan to require loan or subgrant recipients to enroll in a state or tribal response program, or an appropriate state or tribal response program is not available, you will be required to consult with U.S. EPA to ensure cleanups are protective of human health and the environment. Therefore, if you do not plan to require loan or subgrant recipients to enroll in a state or tribal response program, provide a description of the technical expertise you have to conduct, manage, and oversee the cleanup and/or whether you plan to acquire additional technical expertise. If you do plan to acquire additional technical expertise, discuss how, consistent with the competitive procurement provisions of 40 CFR 31.36, you will ensure that this technical expertise is in place prior to beginning cleanup activities.
- b. Provide a legal opinion from your counsel that demonstrates:
 - (1) you have legal authority to access and secure sites in the event of an emergency or default of a loan agreement or non-performance under a subgrant;
and
 - (2) you have legal authority to perform the actions necessary to manage a revolving loan fund. At a minimum, legal authority must include the ability to hold funds, make loans, enter into loan agreements, and collect repayments.

This opinion must cite the relevant state law(s) or local ordinance(s) that allow you access to sites and the authority to manage an RLF. **Attach your counsel's legal opinion.**

Note: For coalitions, the applicant must have the broader jurisdiction, authority, and program capacity to ensure adequate program performance of coalition members, borrowers, and/or subgrantees, if warranted.

5. Cost Share (See also Leveraging under IV.I)

a. Statutory Cost Share

RLF grant recipients are required by the Brownfields Law to provide a 20 percent cost share.¹ This cost share is calculated as 20 percent of the total federal RLF funds awarded. For example, if you are applying for \$600,000 of federal RLF funds, you must provide a cost share of an additional \$120,000. The cost share may be in the form of a contribution of money, labor, material, or services from a non-federal source. If the cost share is in the form of a contribution of labor, material, or other services, it must be incurred for an **eligible and allowable expense** under the grant and not for ineligible expenses, such as administrative costs (see Brownfields FAQ at: http://www.epa.gov/brownfields/proposal_guides/FY13_FAQs.pdf for a discussion of prohibited costs).

RLF grant applicants may petition EPA to waive the cost-share requirement if it would place an undue hardship on the applicant. EPA will consider hardship waiver requests on a case-by-case basis and will approve such requests on a limited basis. In considering such requests, EPA will look for indicators such as low per-capita income, unemployment rate significantly above the national average, or unemployment or economic adjustment problems resulting from severe short-term or long-term changes in economic conditions.

In your proposal:

- i) Demonstrate how you will meet the required cost share, including the sources of the funding or services, as required for this RLF grant.
- ii) If you are requesting a hardship waiver of the cost share, provide an explanation for the basis of your request as part of your proposal. **This explanation must be submitted on a separate page**, titled “Hardship Waiver Request.” Your explanation should include the following information: the unemployment rate; per capita income; data demonstrating substantial out-migration or population loss, if relevant; data demonstrating underemployment, that is, employment of workers at less than full-time or at less skilled tasks than their training or abilities permit, if relevant; information regarding military base closures or realignments, defense contractor reductions-in-force, or U.S. Department of Energy defense-related funding reductions, if relevant; local natural or other major disasters or emergencies, if relevant; information regarding extraordinary depletion of natural resources, if relevant; closure or restructuring of industrial firms and negative effects of changing trade patterns, if relevant; whether you are located in a

¹ Applicants for an RLF grant may use fees from borrowers, interest on loans, and other “program income” to meet the cost share requirement. However, if an RLF grant applicant plans to use anticipated program income for cost share, the applicant also must demonstrate how alternative sources for obtaining money, labor, material, or services can be used to meet its cost share requirement if program income is less than anticipated during the performance period of the grant. Recipients of RLF grants may not use repayments of loan principal to meet the cost share requirement.

President-Declared Disaster area (declared within 18 months of the submission date for your proposal); whether you have exhausted effective taxing (for governmental entities only) and borrowing capacity. Also, your explanation should include whether the proposed project could still proceed if the cost share waiver was not approved.

Where available, applicants must supply data derived from the most recent American Community Survey (ACS) published by the U.S. Census Bureau. In cases where such data are not available, applicants may provide data from other sources (including data available from the Census Bureau and the Bureaus of Economic Analysis, Labor Statistics, Indian Affairs, or other federal sources). In cases where no federal data are available, applicants may submit the most recent data available through their state, tribal, or local government.

SECTION IV - PROPOSAL SUBMISSION INFORMATION

IV.A. How to Obtain a Proposal Package

Electronic copies of these guidelines can be obtained from the EPA brownfields website (<http://www.epa.gov/brownfields/applicat.htm>) or through www.grants.gov. Hard copies may be requested by contacting your Regional Brownfields Coordinator listed in Section VII.

In order to maintain the integrity of the competition process, EPA staff cannot meet with individual applicants to discuss draft proposals, provide informal comments on draft proposals, or provide advice to applicants on how to respond to ranking criteria. EPA's limitations on staff involvement with grant applicants are described in EPA's Assistance Agreement Competition Policy (EPA Order 5700.5A1). However, EPA staff will respond to questions regarding threshold eligibility criteria, administrative issues related to the submission of the proposal, and requests for clarification about this announcement.

IV.B. Due Date and Mailing Instructions

Proposals are due November 19, 2012. Applicants may submit their proposals through the U.S. Postal Service, commercial delivery service, or electronically through www.grants.gov. Only one method should be used for the submission of the original, complete proposal package as described in IV.C below.

1. Hard Copy Submissions

Proposals sent through the U.S. Postal Service or a commercial delivery service must be postmarked by November 19, 2012. **Two copies of the complete proposal are required.**

Mail one complete, original proposal as described in Section IV.C below to:
Environmental Management Support, Inc.
Attn: Mr. Don West
8601 Georgia Avenue, Suite 500
Silver Spring, MD 20910
Phone 301-589-5318

(Note: Overnight mail must include Mr. West's phone number in the address.)

A second complete copy of the proposal must be mailed to the appropriate EPA Regional Brownfields Coordinator listed in Section VII.

Proposals postmarked by the USPS/commercial delivery service after November 19, 2012, will not be considered for funding.

2. Electronic Submissions

Proposals sent electronically through grants.gov must be received by grants.gov by 11:59 p.m. Eastern Time on November 19, 2012. **Proposals received after 11:59 p.m. Eastern Time on November 19, 2012, will not be considered for funding.** Refer to Appendix 2 for specific instructions on the use of grants.gov. In the event that an applicant experiences difficulties transmitting its proposal(s) through grants.gov, please refer to the procedures in Appendix 2. **Note: There is a registration process to complete for electronic submission via grants.gov, which may take a week or more to complete. Occasionally, technical and other issues arise when using grants.gov. EPA encourages applicants to submit their proposals early.**

In addition to electronic submission through www.grants.gov, a complete copy of the proposal should be mailed to the appropriate EPA Regional Brownfields Coordinator listed in Section VII.

If you have not received a confirmation of receipt from EPA within 30 days of the proposal deadline, please contact **Jeanette Mendes at 202-566-1887 or Mendes.Jeanette@epa.gov**. Failure to do so may result in your proposal not being reviewed.

IV.C. Content and Form of Proposal Submission

Refer to Section I.A for information on the types of RLF grants and amount of funding that may be requested.

Pages exceeding stated page limits for the Narrative Proposal and Transmittal Letter will not be copied or evaluated. The page limits indicated for the Transmittal Letter and Narrative Proposal do not include the required attachments described in item 1.c. in the Proposal Content below. There are no page limits for the attachments. Only required attachments are allowed – **no other attachments will be considered.**

Upon receipt, proposals will be reviewed for content and threshold eligibility issues and copied for distribution to evaluators. Do not include binders, spiral binding, or color printing. All proposal materials must be in English. The narrative proposal, transmittal letter and attachments must be typed, on letter-sized (8.5 x 11-inch) paper, and should use standard 12-point font and 1-inch margins. While these guidelines establish the minimum type size requirements, applicants are advised that readability is of paramount importance. Applicants are responsible for submitting a complete proposal, as described below, by the due date.

1. Proposal Content: Refer to the sections indicated below for detailed instructions on what to include in your proposal.
 - a. Transmittal Letter (2 single spaced page limit) – See No. 2 below
 - b. The Narrative Proposal, which includes the responses to all ranking criteria (15 single spaced page limit) – See No. 3 below
 - c. Attachments (**Only** the listed attachments will be accepted- all others will be removed from the proposal prior to review. There is no page limit for the attachments.)
 - i) Threshold Documentation including cost share documentation (see Section III.B)
 - ii) Letter from the state or tribal environmental authority (see Section III.B.3)
 - iii) Documentation of applicant eligibility if other than city, county, state, or tribe (see Section III.B.1)
 - iv) Legal opinion establishing that the applicant has authority to **(1)** access and secure sites in the event of an emergency or default of a loan agreement or non-performance under a subgrant; **and (2)** to make loans and accept payments of fees, interest, and principal. (see Section III.B.4)
 - v) Letters of support from all community-based organizations identified in the community engagement and partnerships ranking criteria (see Section V.B.3)
You must attach support letters to your proposal or EPA will not consider them.
 - vi) Documentation indicating leveraged funds are committed to the project (see Section V.B.2.b.iii)
 - vii) Justification for RLF cost-share waiver, if applicable (see Section III.B.5)
 - viii) Letters of commitment from coalition members, if applicable (see Section III.B.1)
 - ix) Special Considerations checklist (located at Appendix 3), if applicable (see Section IV.C.2.i)
 - d. For grants.gov submissions applicants must also submit the SF 424 and 424A forms. See Appendix 2.

2. Transmittal Letter: The transmittal letter shall identify the applicant and a contact for communication with EPA. **The transmittal letter, including the applicant identification information, shall not exceed two single spaced pages.** Any pages submitted over the page limit will not be considered. The transmittal letter must be written on the applicant’s official letterhead, and signed by an official with the authority to commit your organization to the proposed project. Applicants are to **submit separate transmittal letters for each proposal** they submit. EPA does not consider information in transmittal letters to be responses to the ranking criteria. Each transmittal letter must also include:
 - a. Applicant Identification: Provide the name and full address of the entity applying for funds. This is the agency or organization that will be receiving the grant and will be accountable to EPA for the proper expenditure of funds.
 - b. Applicant DUNS number [Refer to Section VI.G for more information if you do not have a DUNS number.]

- c. Funding Requested:
 - i) Grant type: Indicate RLF
 - ii) Federal Funds Requested: \$_____ and whether you are requesting a cost-share waiver (refer to funding limitations for RLF grants)
 - iii) Contamination: Hazardous Substances, Petroleum, or both
Note: if both, provide a breakdown of the amount of funding you are requesting by contaminant type (e.g., for an overall grant request of \$1,000,000, the breakdown might be \$750,000 hazardous substances and \$250,000 petroleum)
 - d. Location: City, county, and state or reservation, tribally owned lands, tribal fee lands, etc., of the brownfields community(ies) that you propose to serve. For RLF grant coalitions, list all jurisdictions covered under the proposal.
 - e. Contacts:
 - i) Project Director: Provide name, phone/fax numbers, email address, and mailing address of the Project Director assigned to this proposed project. This person should be the main point of contact for the project, and should be the person responsible for the project's day-to-day operations. The Project Director may be contacted if other information is needed.
 - ii) Chief Executive/Highest Ranking Elected Official: Provide the name, phone/fax numbers, email address, and mailing address of the applicant's Chief Executive or highest ranking elected official. For example, if your organization is a municipal form of government, provide this information for the Mayor or County Commissioner. Otherwise, provide this information for your organization's Executive Director or President. These individuals may be contacted if other information is needed.
 - f. Date Submitted: The date your proposal is submitted to EPA via U.S. Postal Service, commercial delivery service, or electronically to www.grants.gov.
 - g. Project Period: The project period must not exceed five years for RLF grants.
 - h. Population:
 - i) Provide the general population of your jurisdiction and the jurisdictions of any coalition partners, if applicable.
 - ii) If you are not a municipal form of government, provide the population of the target area addressed by this proposal. Tribes must provide the number of tribal/non-tribal members affected. Your jurisdiction's population can be found at: <http://www.census.gov>.
 - i. Please attach the "Special Considerations" Checklist in Appendix 3 to the transmittal letter identifying which, if any, of the items are applicable to your proposal. The "Special Considerations" Checklist does not count towards the two-page limit for this section.
3. Narrative Proposal: The narrative proposal includes responses to the ranking criteria (see Section V.B). **The narrative proposal shall not exceed 15 single spaced pages.** Any pages

submitted over the page limit will not be evaluated. The narrative proposal must be clear, concise, and specifically address all of the applicable ranking criteria. Responses to the criteria must include the criteria number and title but need not restate the entire text of the criteria. Proposals must provide sufficient detail to allow for an evaluation of the merits of the proposal. Factual information about your proposed program and community must be provided. Do not include discussions of broad principles that are not specific to the proposed work or project covered by your proposal.

4. Attachments – See List Above (IV.C.1)

IV.D. Intergovernmental Review

As appropriate for your state, applicants are encouraged to contact their State Intergovernmental Review Office early to start the required intergovernmental review process. The review process will be needed if you are selected to receive a grant. This effort is separate from the threshold criteria related to a state environmental letter attachment (see Section III.B.3). Contact your Regional Brownfields Coordinator listed in Section VII for assistance.

IV.E. Use of Funds to Make Subawards, Contract Services, or Fund Partnerships

EPA awards funds to one eligible applicant as the recipient even if other eligible applicants are named as partners or co-applicants or members of a coalition or consortium. The recipient is accountable to EPA for the proper expenditure of funds.

Funding may be used to provide subgrants or subawards of financial assistance, which includes using subawards or subgrants to fund partnerships, provided the recipient complies with applicable requirements for subawards or subgrants including those contained in 40 CFR Parts 30 or 31, as appropriate. Applicants must compete contracts for services and products, including consultant contracts, and conduct cost and price analyses to the extent required by the procurement provisions of the regulations at 40 CFR Parts 30 or 31, as appropriate. The regulations also contain limitations on consultant compensation. Applicants are not required to identify subawardees/subgrantees and/or contractors (including consultants) in their proposal/application. However, if they do, the fact that an applicant selected for award has named a specific subawardee/subgrantee, contractor, or consultant in the proposal/application EPA selects for funding does not relieve the applicant of its obligations to comply with subaward/subgrant and/or competitive procurement requirements as appropriate. Please note that applicants may not award sole source contracts to consulting, engineering, or other firms assisting applicants with the proposal solely based on the firm's role in preparing the proposal/application.

Successful applicants cannot use subgrants or subawards to avoid requirements in EPA grant regulations for competitive procurement by using these instruments to acquire commercial services or products from for-profit organizations to carry out its assistance agreement. The nature of the transaction between the recipient and the subawardee or subgrantee must be consistent with the standards for distinguishing between vendor transactions and subrecipient assistance under Subpart B Section .210 of [OMB Circular A-133](#), and the definitions of subaward at 40 CFR 30.2(ff) or subgrant at 40 CFR 31.3, as applicable. EPA will not be a party

to these transactions. Applicants acquiring commercial goods or services must comply with the competitive procurement standards in 40 CFR Part 30 or 40 CFR Part 31.36 and cannot use a subaward/subgrant as the funding mechanism.

IV.F. Evaluation of Subawardees and Contractors

Section V of this announcement describes the evaluation criteria and evaluation process that will be used by EPA to make selections under this announcement. During this evaluation, except for those criteria that relate to the applicant's own qualifications, past performance, and reporting history, the review panel will consider, if appropriate and relevant, the qualifications, expertise, and experience of the following:

(i) an applicant's named subawardees/subgrantees identified in the proposal if the applicant demonstrates in the proposal that if it receives an award that the subaward/subgrant will be properly awarded consistent with the applicable regulations in 40 CFR Parts 30 or 31. For example, applicants must not use subawards/subgrants to obtain commercial services or products from for-profit firms or individual consultants.

(ii) an applicant's named contractor(s), including consultants, identified in the proposal if the applicant demonstrates in its proposal that the contractor(s) was selected in compliance with the competitive Procurement Standards in 40 CFR Part 30 or 40 CFR 31.36 as appropriate. For example, an applicant must demonstrate that it selected the contractor(s) competitively or that a proper non-competitive sole-source award consistent with the regulations will be made to the contractor(s), that efforts were made to provide small and disadvantaged businesses with opportunities to compete, and that some form of cost or price analysis was conducted. EPA may not accept sole source justifications for contracts for services or products that are otherwise readily available in the commercial marketplace.

EPA will not consider the qualifications, experience, and expertise of named subawardees/subgrantees and/or named contractor(s) during the proposal evaluation process unless the applicant complies with these requirements.

IV.G. Confidential Information

EPA recommends that you do not include confidential business information ("CBI") in your proposal. However, if confidential business information is included, it will be treated in accordance with 40 CFR 2.203. Applicants must clearly indicate which portion(s) of their proposal they are claiming as CBI. EPA will evaluate such claims in accordance with 40 CFR Part 2. If no claim of confidentiality is made, EPA is not required to make the inquiry to the applicant otherwise required by 40 CFR 2.204(c)(2) prior to disclosure. The Agency protects competitive proposals from disclosure under applicable provisions of the Freedom of Information Act prior to the completion of the competitive selection process.

IV.H. Management Fees

When formulating budgets for proposals, applicants must not include management fees or similar charges in excess of the direct costs or at the rate provided for by the terms of the agreement negotiated with EPA. The term “management fees or similar charges” refers to expenses added to the direct costs in order to accumulate and reserve funds for ongoing business expenses, unforeseen liabilities, or for other similar costs that are not allowable under EPA assistance agreements. Management fees or similar charges may not be used to improve or expand the project funded under this agreement, except to the extent authorized as a direct cost of carrying out the scope of work.

IV.I. Additional Voluntary Cost Share/Leveraging (See also cost-share requirement in Section III.B.5)

Voluntary cost sharing is when an applicant voluntarily proposes to provide costs/contributions to support the project when a cost share is not required or as is the case for this competition to provide costs/contributions above the required cost share (See III.B.5) When preparing proposals, applicants should remember that voluntary cost share is a form of leveraging and can be included in the response to the leveraging criteria. If an applicant proposes a voluntary cost share, the following apply: (1) A voluntary cost share is subject to the match provisions in the grant regulations (40 CFR 30.23 or 40 CFR 31.24, as applicable); (2) The recipient may not use other sources of federal funds to meet a voluntary cost share unless the federal statute authorizing the other federal funding provides that the federal funds may be used to meet a cost share requirement on a federal grant; and (3) A voluntary cost share may only be met with eligible and allowable costs. The recipient is legally obligated to meet any proposed voluntary cost share that is included in the approved project budget, should the applicant be selected for award.

SECTION V - PROPOSAL REVIEW INFORMATION

V.A. Review and Selection Process

Timely submitted proposals initially will be reviewed by the appropriate EPA Regional Office to determine compliance with the applicable threshold criteria for RLF grants (Section III.B). The threshold criteria review is pass/fail. Applicants deemed ineligible for funding consideration as a result of the threshold criteria review will be notified within 15 calendar days of the ineligibility determination. All proposals that pass the threshold criteria review will then be evaluated by national evaluation panels chosen for their expertise in the range of activities associated with the National Brownfields Program. The national evaluation panels will be composed of EPA staff and potentially other federal agency representatives. Eligible proposals will be evaluated based on the criteria below.

For evaluation and selection purposes, EPA’s Office of Brownfields and Land Revitalization (OBLR) will prepare two ranked lists of eligible RLF proposals. One list will be comprised of “new” applicants defined as those applicants who have never received an EPA brownfields RLF grant before with the exception of a pilot grant EPA awarded in 2002 or earlier. A second list will be comprised of “existing and former” applicants defined as those applicants who have a

current brownfields RLF grant or have had a grant that was awarded in 2003 or later. The Agency intends to use approximately 50% of the total amount of funding available under this announcement for grants to “new” applicants. This percentage is an estimate and is subject to change based on funding levels, the quality of proposals received and other applicable considerations.

Completed evaluations will then be referred to the Selection Official, who is responsible for further consideration of the proposals and final selection of grant recipients. Proposals will be selected for award by this Official based on their evaluated point scores, the availability of funds, and the consideration of the other factors described in Section V.C., as appropriate.

V.B. Ranking Criteria for Revolving Loan Fund Grants

Respond to the ranking criteria below in your narrative proposal. If your proposal passes the threshold criteria review (see Section III.B), your responses to the ranking criteria below will be evaluated and scored by national evaluation panels. Your proposal may be assigned up to 100 points based on the criteria below.

1. Community Need [15 points]

Under this criterion, proposals will be evaluated based on the quality and extent of the applicant’s description of the health, welfare, environmental, and financial needs of the targeted community as it is affected by the presence of brownfields, including a description of how the community is affected by environmental justice concerns such as the disproportionately high burden of environmental pollution that is often borne by low-income, minority, and other disadvantaged populations. Responses should clearly identify the sources of information used in this section.

a. Health, Welfare, and Environment [8 Points]

- i) Describe the effect brownfields currently have on your targeted community by providing information on the number and size of the brownfields and the health, welfare, and environmental impacts of these sites. In addition to brownfields, provide a summary of the various cumulative environmental issues and describe how they have resulted in a disproportionate impact on the targeted community (e.g., siting of industry, highways and other sources of air, water, and land pollution). Provide information describing the health and welfare of sensitive populations such as children, pregnant women, minority or low-income communities, or other sensitive populations in the targeted community.

b. Financial Need [7 Points]

- i) Use the table format below to provide demographic information about that community including the population, unemployment rate, poverty rate, percent minority, and per capita income. In addition to the table, describe the economic impact of brownfields on the targeted community. Provide other widely available demographic or other supporting information that puts the community’s economic need in context. This may include regional considerations such as a significant economic disruption (e.g. plant closures) or other signs of economic distress impacting the community. Describe factors such as fiscal condition or population size that limit your ability to draw on other sources of funding for the cleanup of

brownfield sites. If you already have a brownfields grant(s) from EPA, describe why you need additional funding.

Format for Demographic Information

	Target Community/Census Tract	County/City	State	National
Population:				308,745,538 ¹
Unemployment:				8.2% ²
Poverty Rate:				15.1% ³
Percent Minority:				26.7% ¹
Median Household Income:				\$49,445 ³
Other:				
¹ Data is from the 2010 U.S. Census data and is available at www.census.gov . ² Data is from the Bureau of Labor Statistics and is available at www.bls.gov . ³ Data is from the 2010 American Community Survey and is available at http://www.census.gov/newsroom/releases/archives/income_wealth/cb11-157.html				

For resources to gather demographic information, please go the FAQs at http://www.epa.gov/brownfields/proposal_guides/FY13_FAQs.pdf.

2. Program Description and Feasibility of Success [55 points]

Under this criterion, proposals will be evaluated on the extent and quality to which the applicant demonstrates a reasonable approach to supporting a loan program and demonstrates sufficient resources and a capability to implement the program in a timely manner. Successful management of an RLF program requires a dedicated program manager and staff; in many cases it can require significant staff time, particularly for the first several years. Refer to Section VI.E, *Brownfields Programmatic Requirements*, to read EPA expectations of projects funded with brownfields RLF grants. [Refer to section I.E.2 for an explanation of outcomes.]

- a. Program Description [20 Points] [Please Note: Responses to this criterion will be evaluated in conjunction with your staff description under the Programmatic Capability criterion.]
 - i) Describe your brownfields redevelopment program and how the requested RLF grant funding will be used to support that program. Describe how you intend to function as a sustainable source of environmental cleanup funds to support brownfields redevelopment and how you will use reasonable and prudent lending practices to further your redevelopment program. Include discussions of your loan administration program, the loan and subgrant products you will offer, how you will select borrowers/projects, how you will structure loans, and how you will leverage site funding packages to cover all brownfields redevelopment activities and costs. [10 Points]
 - ii) Include the types of applicants you envision utilizing the RLF, why you have determined this to be your primary target market, and your marketing strategy to reach these potential borrowers/subgrantees. [5 Points]

- iii) Describe how your team is structured to ensure sound financial and project management and ensure cleanups are conducted appropriately. Specifically describe how key program roles – such as that of the financial and/or program manager, Qualified Environmental Professional (QEP), and other team members will work together to successfully implement your program, as described in section 2.a.i. [5 Points]
- b. Budget for EPA Funding, Tracking and Measuring Progress, and Leveraging Other Resources [15 Points]
- i) Use the table format below to identify specific tasks for which EPA funding will be used. Show the costs (by budget category) associated with each task. **Applicants requesting hazardous substance and petroleum funding in the same proposal must provide either two separate budget tables, or two separate line items within one budget table**, that shows the planned petroleum and hazardous substance funded activities. In addition to the budget table, describe each task in detail, including the basis for the estimated cost as well as the projected outputs where possible (e.g., provide loans to two eligible entities at a cost of \$400,000 each for a total of \$800,000). (Refer to Section I.E for a definition and examples of “outputs.”)

Do not include tasks for activities or costs that are ineligible uses of funds under EPA’s RLF grant (e.g., land acquisition, building demolition that is not necessary to cleanup contamination at the site, building or site preparation, or administrative costs such as indirect costs). Please refer to the Brownfields FAQ at: http://www.epa.gov/brownfields/proposal_guides/FY13_FAQs.pdf for additional examples of ineligible uses of funds. For questions not covered by the FAQ, contact your Regional Brownfields Coordinator.

Reminder on additional use of grant funds described in Section I.B: A local government (does not include state or tribal governments) may use up to 10 percent of its grant funds for health monitoring of populations, monitoring and enforcement of institutional control(s), or other related program development and implementation activities. [5 Points]

NOTE: Even if applying via Grants.gov, please use the table format below.

Format for Budget

Budget Categories	Project Tasks for Loans (at least 50 percent of amount requested)				
	[Task 1]	[Task 2]	[Task 3]	[Task 4]	Total
(programmatic costs only)					
Personnel					
Fringe Benefits					
Travel ¹					

Equipment ²					
Supplies					
Contractual ³					
Loans					
Other (specify) _____					
Subtotal:					
Cost Share					
Budget Categories	Project Tasks for Subgrants (no more than 50 percent of amount requested)				
(programmatic costs only)	[Task 1]	[Task 2]	[Task 3]	[Task 4]	Total
Personnel					
Fringe Benefits					
Travel ¹					
Equipment ²					
Supplies					
Contractual ³					
Subgrants					
Other (specify) _____					
Subtotal:					
Cost Share⁴					
Total					
Total Cost Share					
¹ Travel to brownfield-related training conferences is an acceptable use of these grant funds. ² EPA defines equipment as items that cost \$5,000 or more with a useful life of more than one year. Items costing less than \$5,000 are considered supplies. Generally, equipment is not required for RLF grants. ³ Applicants must comply with the procurement procedures contained in 40 CFR 31.36, or 40 CFR 30.40 through 30.48, as appropriate. ⁴ Applicants must include the cost share in the budget even if applying for a cost share waiver. If the applicant is successful and the cost share waiver is approved, it will be removed in pre-award negotiations.					

- ii) Describe your plan for tracking and measuring your progress towards achieving the expected short-term and long-term project outcomes and outputs. See Section I.E. [5 Points].

- iii) **Leveraging.** *Under this criterion applicants who can demonstrate firm commitments for additional funds/resources for completion of the project may be evaluated more favorably.* Demonstrate how you will leverage additional funds/resources beyond the grant funds awarded (and the required cost share) to support the proposed project activities. Specifically, describe how these funds will be used to contribute to the performance and success of the proposed project. This includes, but is not limited to, funds and other resources leveraged from business, non-profit organizations, education and training providers, and/or Federal, state, tribal, and local governments. Describe the **amount(s)** and **type(s)** of leveraged resources to be provided, how you will obtain the leveraged resources, the likelihood the leveraging will materialize during the grant, the strength of the leveraging commitment and the specific role the leveraged resources will play to support the proposed activities. Attach letters or other documentation from sources, if applicable, indicating additional funds/resources are committed to the project. [5 Points]
- c. Programmatic Capability and Past Performance [20 Points]
- i) Programmatic Capability
Describe the management system you will have in place to direct activities under the grant. Include a description of your project manager and staff and a discussion of their expertise, qualifications, and experience. Discuss the means you will use to retain project leadership or recruit qualified staff should employee turnover occur. Describe the system(s) you have in place to acquire additional expertise and resources required to perform the proposed project. If you intend to contract for the necessary expertise, describe the system you have in place to acquire that expertise. Please note the conditions in Sections IV. E and F regarding contractors and subawards. [12 points]
- ii) Adverse Audits
Describe any adverse audit findings associated with a state or federal grant. If you have had problems with the administration of any grants (e.g., compliance reporting, expenditure of funds, etc.), please describe how you have corrected, or are correcting, the problems. Or, please affirm that you have not had any adverse audit findings. Respond to this criterion regardless of whether or not you have had a federal or non-federal assistance agreement. [2 points]
- iii) Past Performance
If you have ever received an EPA brownfields grant, please respond to item **1**. If you have never received an EPA brownfields grant but have received other federal or non-federal assistance agreements (an assistance agreement is a grant or cooperative agreement and not a contract), please respond to item **2**. If you have never received any type of federal or non-federal assistance agreements please indicate this in your proposal and you will receive a neutral score [3 Points] for this factor. [Failure to indicate anything in response may result in zero points for this factor.] In evaluating an applicant's response to this factor, in addition to the information provided by the applicant, EPA may consider relevant information from EPA files or from other

federal or non-federal grantors to verify or supplement information provided by the applicant. [6 points]

1. Currently or Has Ever Received an EPA Brownfields Grant

- Identify the EPA Brownfields grant(s) you currently have or have received in the past. Please provide information on no more than five of your most recent grants. Demonstrate how you successfully managed the grant(s), and successfully performed all phases of work under the previous or existing grant(s) including whether the desired outcomes of the project(s) were met by providing information on: [6 points]
 - Funds Expenditure: the balance of grant funds not drawn down (funds remaining).
 - Compliance with grant requirements: information regarding your compliance with the work plan, schedule, terms and conditions, timely reporting (e.g., quarterly reports, financial status reports, Assessment, Cleanup, Redevelopment Exchange System (ACRES), and any other required submittals), and reporting on whether you were making progress towards achieving the expected results under the grants and if not whether you explained why not.
 - Accomplishments: describe your success using EPA grant funds to assess, clean up, and redevelop brownfield sites, including whether you reported accomplishments to EPA in ACRES, or alternatively, via the Property Profile Form.

or

2. Has Not Received an EPA Brownfields Grant but has received other federal and/or non-federal assistance agreements

- Identify current and/or prior federally and non-federally funded assistance agreements received. Please provide information on no more than five of your most recent assistance agreements. Describe your history of successfully managing these agreements and performing the agreements including meeting and complying with reporting requirements, submitting final acceptable technical reports, and reporting on whether you were making progress towards achieving the results under those agreements and if not whether you explained why not. [6 points]

3. Community Engagement and Partnerships [15 Points]

Under this criterion, proposals will be evaluated on the extent to which: 1) the applicant's plan engages the targeted community in the project to be funded under this grant; 2) the applicant has identified and established relationships with the partners necessary to achieve the program's goals; and 3) the support letters provided by community-based organizations involved with the program demonstrate specific and valuable commitments to the program. [Refer to Section IV.E and IV.F for requirements related to financial transactions with community-based organizations.]

- a. Discuss your plan for involving the affected community (e.g., neighborhood organizations, citizens' groups, borrowers, developers, and other stakeholders) in site selection, cleanup decisions, or reuse planning, including activities that have already occurred. Describe your plan for communicating the progress of your program to citizens, including plans for communicating in languages commonly used in the community. *Note: Applicants may address this criterion by various means that show meaningful public engagement where information is shared and views and input are actively solicited, including public meetings, webinars, use of media, and internet forums. Applicants must demonstrate how they will engage the targeted community in meaningful ways to ensure success of the proposed project.* [5 Points]

- b. Describe your current efforts and/or plans to develop partnerships with the following entities including a description of the role they would play to ensure your brownfields project is successful: i) your local/state/tribal environmental and health agencies; ii) other relevant federal and state governmental agencies; and iii) any local environmental job training program, which may include a brownfields job training grantee. If there are no environmental job training programs in your immediate local area, describe any efforts you plan to link members of the community to potential employment opportunities in brownfields assessment, cleanup, or redevelopment related to your proposed projects. [5 Points]

- c. Provide a **description of, and role of, the key** community-based organizations involved in your program. These organizations may include, but are not limited to, local citizen or business groups, environmental or civic organizations, educational institutions, and local labor organizations. [Note: Community-based organizations do **not** include local government departments, the local planning department/district/office, local contractors, the mayor's office, or other elected officials.] If Community-based organizations do not exist in your area, please provide background information affirming the lack of such organizations. Then, demonstrate how the community is engaged and involved in your project (can be demonstrated by resident support letters, letters to the editor, attendance at public meetings, etc.). Attach letters from all community-based organizations mentioned that describe their roles and affirm any referenced commitments. If you intend to fund a community based organization with a subaward, please review Section IV.F carefully. Please refer to the FAQs for a definition of Community Based Organizations at http://www.epa.gov/brownfields/proposal_guides/FY13_FAQs.pdf. [5 Points]

Note: EPA may conduct reference checks to ensure that organizations identified are supportive and involved with the brownfields project.

4. Program Benefits [15 points]

Under this criterion, proposals will be evaluated on the extent to which the program's anticipated outcomes promote the general welfare through the improvement of the public health and safety, economy, and environment of the targeted community and how these outcomes will contribute to your overall community "vision" for the revitalization of brownfield sites. Applicants must demonstrate how the proposed project considers and

addresses identified health, economic, and environmental needs of concern to the community. Applicants should also identify outcomes as part of their project. Consideration will be given to how public health issues are addressed during the program, the anticipated benefits of redevelopment, and the degree to which the project incorporates sustainability, equitable development outcomes, and livability principles as described in Section I.D.

a. Welfare and/or Public Health

Describe the environmental, social, and/or public health benefits anticipated from the redevelopment of sites cleaned up under this grant. Describe how nearby and sensitive populations in your targeted community will be protected from contaminants during cleanup work conducted on brownfield sites under this grant. Describe the efforts you have taken to integrate equitable development outcomes and principles into the reuse of the site and not displace residents historically affected by brownfields. [5 Points]

b. Economic Benefits and/or Greenspace

Explain how the grant will produce:

- i) Economic benefits, such as increased employment and expanded tax base, through the redevelopment of sites cleaned up under this grant. Provide quantitative estimates where feasible; **and/or**
- ii) Other non-economic benefits associated with sites to be reused for greenspace or other not-for-profit activities. Greenspace includes areas redeveloped for uses such as parks, recreation areas, greenways, or environmental buffers. Other not-for-profit activities include the work of governmental or charitable organizations.

c. Environmental Benefits from Infrastructure Reuse/Sustainable Reuse [5 Points]

Describe any anticipated environmental benefits, beyond the remediation of contaminants, expected to result from the project, and how the project addresses the **sustainable redevelopment and livability principles described in Section I.D.** Sustainable redevelopment includes the use of existing infrastructure, such as utilities and equitable access to public transit. Sustainable redevelopment also includes green buildings, energy efficiency, water management, green remediation, construction and demolition materials recycling, diesel emissions reductions, and renewable energy on brownfields. [Refer to Brownfields FAQ at http://www.epa.gov/brownfields/proposal_guides/FY13_FAQs.pdf for a description of these and other EPA initiatives.] [5 Points]

V.C. Other Factors

In making final selection recommendations from among the highest ranked applicants on each list, EPA's Selection Official may consider the following factors if, and as, appropriate. In their proposals, applicants should provide a summary on whether and how any of these applicable special considerations apply:

- Fair distribution of funds between urban and non-urban areas including an equitable distribution to "micro" communities (those communities with populations of 10,000 or

less). EPA strongly encourages non-urban communities, including “micro” communities to apply;

- A balanced distribution of funds among EPA’s ten Regions and among the states and territories;
- Compliance with the 25 percent statutory petroleum funding allocation;
- Whether the applicant is a federally recognized Indian tribe or United States territory or is assisting a Tribe or territory;
- The need to provide funding to address specific types of contamination identified in the Brownfields law such as whether a site is mine-scarred or contaminated with controlled substances;
- The needs of communities adversely affected by natural disasters (2005 or later);
- The applicant’s score under the leveraging criterion in Section V, including the extent to which they have demonstrated firm leveraging commitments to facilitate project completion by identifying amounts and contributors in the proposal;
- Communities experiencing plant closures (or other significant economic disruptions) that occurred in 2007 or later, including communities experiencing auto plant closures due to bankruptcy;
- Whether the applicant is a recipient or a core partner of a HUD-DOT-EPA Partnership for Sustainable Communities (PSC) grant that is directly tied to the project area, and can demonstrate that funding from a PSC grant has or will benefit the project area. To be considered, the **applicant must attach documentation** which demonstrates this connection to a HUD-DOT-EPA PSC grant;
- Whether the applicant is a recipient of an EPA Brownfields Area-Wide Planning grant; and
- Communities implementing green remediation plans.

V.D. Proposal Checklist for RLF Grants

Before you submit your proposal for an RLF grant, please ensure the following documents are included in your package submitted to EPA and EPA’s contractor.

<input checked="" type="checkbox"/> Transmittal Letter (2-page limit)	
<input checked="" type="checkbox"/> The Narrative Proposal, which includes the responses to ranking criteria (15-page limit)	
<input checked="" type="checkbox"/> Documentation of all applicable threshold criteria (see Section III. B)	
<input checked="" type="checkbox"/> Letter from the state or tribal environmental authority (see Section III.B.3)	
<input checked="" type="checkbox"/> Documentation of applicant eligibility if other than city, county, state, or tribe (see Section III.B.1)	
<input checked="" type="checkbox"/> Legal opinion establishing that the applicant has authority to (1) access and secure sites in the event of an emergency or default of a loan agreement or non-performance under a subgrant; and (2) to make loans and accept payments of fees, interest, and principal (see Section III.B.4)	
<input checked="" type="checkbox"/> Documentation indicating committed leveraged resources, if applicable (see Section V.B.2.b.iii)	
<input checked="" type="checkbox"/> Letters of support from all community-based organizations identified in the community engagement and partnerships ranking criteria (see Section V.B.3)	
<input checked="" type="checkbox"/> Justification for RLF cost-share waiver, if applicable (see Section III.B.5)	
<input checked="" type="checkbox"/> Letters of commitment from coalition members, if applicable (see Section III.B.1)	
<input checked="" type="checkbox"/> Special Considerations (located in Appendix 3), if applicable (see Section IV.C.2.i)	

SECTION VI - AWARD ADMINISTRATION INFORMATION

VI.A. Award Notices

EPA Regions will notify applicants who fail threshold eligibility requirements within 15 calendar days of the Agency’s determination of ineligibility. EPA will notify applicants who have not been selected for award based on the ranking criteria and other factors within 15 calendar days of EPA’s final decision on selections for this competition.

EPA anticipates notification to successful applicants will be made via telephone or electronic or postal mail by Spring 2013. The notification will be sent to the original signer of the proposal or the project contact listed in the proposal. This notification, which informs the applicant that its proposal has been selected and is being recommended for award, is not an authorization to begin work. For example, if statutory funding or other issues are discovered during the award process that may affect the ability of EPA to make an award to an applicant. The successful applicant must also prepare a work plan and submit application forms, which must be approved by EPA, before the grant can officially be awarded. The award notice, signed by an EPA grants officer, is the authorizing document and will be provided through postal mail. The time between notification of selection and award of a grant can take up to 90 days or longer.

VI.B. Administrative and National Policy Requirements

1. Funding will be awarded as a cooperative agreement. The applicants whose proposals are selected will be asked to submit a cooperative agreement application package to their EPA Regional Office. This package will include the application (Standard Form 424), a proposed work plan, a proposed budget, and other required forms. An EPA Project Officer will work with you to finalize the budget and work plan. It is EPA's expectation that the selected applicants will complete the award process within six months of the announcement.
2. Approved cooperative agreements will include terms and conditions (including any applicable Davis Bacon requirements) that will be binding on the grant recipient. Terms and conditions specify what grantees must do to ensure that grant-related and Brownfields Program-related requirements are met. Applicants also will be required to submit progress reports in accordance with grant regulations found in 40 CFR 30.51 or 40 CFR 31.40. A listing and description of general EPA regulations applicable to the award of assistance agreements may be viewed at http://www.epa.gov/ogd/AppKit/applicable_epa_regulations_and_description.htm

VI.C. Reporting Requirements

During the life of the cooperative agreement, recipients are required to submit progress reports to the EPA Project Officer within 30 days after each reporting period. The reporting period (i.e., quarterly, annually) is set forth in the terms and conditions of the cooperative agreement. These reports shall cover work status, work progress, difficulties encountered, an accounting of financial expenditures, preliminary data results, anticipated activities, and any changes of key personnel involved with the project.

Grant recipients will be required to report site-specific accomplishments on Property Profile Forms and preferably submit them electronically to EPA's ACRES reporting system. Failure to comply with the reporting requirements may result in an early termination of the grant and return of grant funds.

At the end of the cooperative agreement, a final project report also is required. The final report will summarize accomplishments, expenditures, outcomes, outputs, lessons learned, and any other resources leveraged during the project and how they were used.

VI.D. Disputes

Disputes related to this competition will be resolved in accordance with the dispute resolution procedures published in 70 FR (*Federal Register*) 3629, 3630 (January 26, 2005), which can be found at <http://www.epa.gov/ogd/competition/resolution.htm>. Copies of these procedures also may be requested by contacting your EPA Regional Brownfields Coordinator identified in Section VII of this announcement.

VI.E. Brownfields Programmatic Requirements

Brownfields grantees must comply with all applicable federal and state laws to ensure that the assessment and cleanup protects human health and the environment. Brownfields grantees also must comply with the program's technical requirements, which may include, but are not limited to, the following:

1. Quality Assurance (QA) Requirements

When environmental samples are collected as part of any brownfields cooperative agreement (e.g., assessment and site characterization, cleanup verification sampling, post-cleanup confirmation sampling), recipients shall submit to EPA for approval a **Quality Assurance Project Plan (QAPP)** prior to the collection of environmental samples. The QAPP must document quality assurance practices sufficient to produce data adequate to meet project objectives and minimize data loss. Compliance with the Quality Assurance requirements is an eligible use of funds for all three grant types.

2. Historic Properties or Threatened and Endangered Species

If historic properties or threatened or endangered (T&E) species may be impacted by the assessment or cleanup of a site, the requirements of the National Historic Preservation Act (NHPA) or the Endangered Species Act (ESA) may apply, respectively. Grantees are required to consult with EPA prior to conducting any on-site activity (such as invasive sampling or cleanup) that may affect historic properties or T&E species to ensure that the requirements of Section 106 of NHPA and Section 7(a)(2) of the ESA are met. RLF grantees should plan for these consultation requirements.

3. Environmental Cleanup Responsibilities

Cleanup and RLF grant recipients must complete the following mandatory activities in connection with cleanups conducted with brownfields funding. These activities are all eligible costs.

While the following information includes specific terms, EPA anticipates that the majority of the cleanups will be performed through state voluntary cleanup programs (VCPs) that may use different terms. As such, the state programs may call these documents by different names. It is EPA's intent that documents generated to meet the state's VCP requirements can serve to meet the mandatory requirements listed below as long as they cover the same elements and include the necessary information.

a. Analysis of Brownfield Cleanup Alternatives (ABCA)

Prepare an **analysis of brownfield cleanup alternatives**, considering site characteristics, surrounding environment, land-use restrictions, potential future uses, and cleanup goals. The ABCA must be signed by an authorized representative of the recipient and the ABCA must include:

- i) Information about the site and contamination issues (e.g., exposure pathways, identification of contaminant sources, etc.), cleanup standards, applicable laws, alternatives considered, and the proposed cleanup.
 - ii) Effectiveness, implementability, and the cost of the proposed cleanup.
 - iii) An analysis of reasonable alternatives including no action. For cleanup of brownfield petroleum-only sites, an analysis of cleanup alternatives must include considering a range of proven cleanup methods, including identification of contaminant sources, exposure pathways, and an evaluation of corrective measures. The cleanup method chosen must be based on this analysis. The alternatives may consider the degree to which they reduce greenhouse gas discharges, reduce energy use or employ alternative energy sources, reduce volume of wastewater generated/disposed, reduce volume of materials taken to landfills, and recycle and re-use materials generated during the cleanup process to the maximum extent practicable.
- b. Community Relations and Public Involvement in Cleanup Activities

Recipients must prepare a **site-specific community relations plan** describing how the recipient plans to satisfy the public involvement requirements below. The plan must be submitted to EPA before providing notice to the general community regarding the ABCA. At a minimum, public involvement for cleanup activities requires:

- i) **Notice of the ABCA's** or its equivalent's **availability** to the general community and the opportunity for the public to provide comments (written or oral) on the ABCA.
 - ii) Preparation of **written responses** to significant and appropriate **comments**, and documentation of any changes to the cleanup plan.
 - iii) Preparation of an **administrative record** and **notification** to the public of its **availability** for inspection at a location convenient to the targeted population and general public. The administrative record must contain the documents that form the basis for the selection and implementation of a cleanup plan. Documents in the administrative record shall include the ABCA, site investigation reports, the cleanup plan, cleanup standards used, responses to public comments, and verification that shows that cleanups are complete.
- c. Implementation and Completion of Cleanup Activities

Recipients **shall ensure the adequacy of each cleanup** in protecting human health and the environment as it is implemented. Regarding occupational safety and health, brownfields cleanups must comply with either all applicable General Industry standards (29 CFR. Part 1910) or all applicable Construction standards (29 CFR. Part 1926), depending on work operations at the site. In addition, if a site is determined to be a "hazardous waste site," that site must comply with the Hazardous Waste Operations and Emergency Response (HAZWOPER) standard 29 CFR §1910.120.

In the event of an incomplete cleanup, the recipient shall ensure that the site is secure and notify the appropriate state agency and the U.S. EPA to ensure an orderly transition should additional activities become necessary.

Recipients shall ensure that the **successful completion** of the cleanup is properly **documented**. This must be done through a final report or letter from a qualified environmental professional, or other documentation provided by a state or tribe that shows the cleanup is complete. This documentation needs to be included as part of the administrative record.

4. Sufficient Progress

EPA will evaluate whether the recipient has made sufficient progress 2 years from the date of award. For the purposes of the RLF grants, “sufficient progress in implementing a cooperative agreement” means that the grantee has made loan(s) and/or subgrant(s). Alternatively, sufficient progress may also be demonstrated by a combination of all the following: hiring of all key personnel, the establishment and advertisement of the RLF, and the development of one or more potential loans/subgrants. If EPA determines that the recipient has not made sufficient progress, the recipient must implement a corrective action plan approved by EPA. Failure to comply with the reporting requirements may result in an early termination of the grant and return of grant funds to the EPA.

5. Collection of Post-Grant Information

Under the Government Performance and Results Act, EPA reports on the many benefits of brownfields funding. One such measure provides information on additional resources leveraged as a result of the use of brownfields grant funds. These leveraged non-EPA funds may include additional cleanup funds or redevelopment funding from other federal agencies, state, tribal, and local governments, or private organizations. As many of these activities occur beyond the grant period, please note that EPA may contact you well after the grant period of performance to collect this information.

6. Protection of nearby and sensitive populations

Grantees are required to protect all nearby populations, including sensitive populations in the targeted community, from contaminants during cleanup work conducted on brownfield sites under this grant. Activities include implementing procedures necessary to mitigate any potential exposure from the contamination

VI.F. Subaward and Executive Compensation Reporting

Applicants must ensure that they have the necessary processes and systems in place to comply with the subaward and executive total compensation reporting requirements established under OMB guidance at 2 CFR Part 170, unless they qualify for an exception from the requirements, should they be selected for funding.

VI.G. Central Contractor Registration (CCR)/System for Award Management (SAM) and Data Universal Numbering System (DUNS) Requirements

Unless exempt from these requirements under OMB guidance at [2 CFR Part 25](#) (e.g., individuals), applicants must:

1. Be registered in the CCR prior to submitting an application or proposal under this announcement. CCR/SAM information can be found at <https://www.sam.gov/portal/public/SAM/>.
2. Maintain an active CCR registration with current information at all times during which it has an active Federal award or an application or proposal under consideration by an agency, and
3. Provide its DUNS number in each application or proposal it submits to the agency. Applicants can receive a DUNS number, at no cost, by calling the dedicated toll-free DUNS Number request line at 1-866-705-5711, or visiting the D&B website at: <http://www.dnb.com>.

If an applicant fails to comply with these requirements, it will, should it be selected for award, affect their ability to receive the award.

Please note that the CCR has been replaced by the System for Award Management (SAM). To learn more about SAM, go to [SAM.gov](#) or <https://www.sam.gov/portal/public/SAM/>.

VI.H. Website References in Solicitations

Any non-federal websites or website links included in this solicitation are provided for proposal preparation and/or informational purposes only. U.S. EPA does not endorse any of these entities or their services. In addition, EPA does not guarantee that any linked, external websites referenced in this solicitation comply with Section 508 (Accessibility Requirements) of the Rehabilitation Act.

VI.I. Unfair Competitive Advantage

EPA personnel will take appropriate actions in situations where it is determined that an applicant may have an unfair competitive advantage, or the appearance of such, in competing for awards under this announcement. Affected applicants will be provided an opportunity to respond before any final action is taken.

VI.J. Use of Funds

An applicant that receives an award under this announcement is expected to manage assistance agreement funds efficiently and effectively and make sufficient progress towards completing the project activities described in the work-plan in a timely manner. The assistance agreement will include terms/conditions implementing this requirement.

SECTION VII – AGENCY CONTACTS

Regional Brownfields Coordinators

REGION & STATES		ADDRESS/PHONE NUMBER
EPA Region 1 Diane Kelley Kelley.Diane@epa.gov	CT, ME, MA, NH, RI, VT	5 Post Office Square Suite 100, Mail code: OSRR7-2 Boston, MA 02109-3912 Phone (617) 918-1424 Fax (617) 918-1291
EPA Region 2 Lya Theodoratos Theodoratos.Lya@epa.gov	NJ, NY, PR, VI	290 Broadway 18th Floor New York, NY 10007 Phone (212) 637-3260 Fax (212) 637-4360
EPA Region 3 Tom Stolle Stolle.Tom@epa.gov	DE, DC, MD, PA, VA, WV	1650 Arch Street Mail Code 3HS51 Philadelphia, PA 19103 Phone (215) 814-3129 Fax (215) 814-5518
EPA Region 4 Philip Vorsatz Vorsatz.Philip@epa.gov	AL, FL, GA, KY, MS, NC, SC, TN	Atlanta Federal Center 61 Forsyth Street, S.W. 10 th Floor Atlanta, GA 30303-8960 Phone (404) 562-8789 Fax (404)562-8689
EPA Region 5 Deborah Orr Orr.Deborah@epa.gov	IL, IN, MI, MN, OH, WI	77 West Jackson Boulevard Mail Code SE-4J Chicago, IL 60604-3507 Phone (312) 886-7576 Fax (312) 886-7190
EPA Region 6 Mary Kemp Kemp.Mary@epa.gov	AR, LA, NM, OK, TX	1445 Ross Avenue, Suite 1200 (6SF-VB) Dallas, TX 75202-2733 Phone (214) 665-8358 Fax (214) 665-6660
EPA Region 7 Susan Klein Klein.Susan@epa.gov	IA, KS, MO, NE	901 N. 5th Street Kansas City, KS 66101 Phone (913) 551-7786 Fax (913) 551-9786
EPA Region 8 Dan Heffernan Heffernan.Daniel@epa.gov	CO, MT, ND, SD, UT, WY	1595 Wynkoop Street (EPR-B) Denver, CO 80202-1129 Phone (303) 312-7074 Fax (303) 312-6065

Appendix 1

Information on Sites Eligible for Brownfields Funding Under CERCLA §104(k)

1.1 Introduction

The information provided in this Appendix will be used by EPA in determining the eligibility of any property for brownfields grant funding. The Agency is providing this information to assist you in developing your proposals for funding under CERCLA §104(k) and to apprise you of information that EPA will use in determining the eligibility of any property for brownfields grant funding.

This information is used by EPA solely to make applicant and site eligibility determinations for Brownfields grants and is not legally binding for other purposes including federal, state, or tribal enforcement actions.

1.2 General Definition of Brownfield Site

The Brownfields Law defines a “Brownfield Site” as:
“...real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant.”
Brownfield sites include all “real property,” including residential, as well as commercial and industrial properties.

1.3 Additional Areas Specifically Eligible for Funding

The Brownfields Law also identifies three additional types of properties that are specifically eligible for funding:

1. Sites contaminated by **controlled substances**.
2. Sites contaminated by **petroleum or a petroleum product**.
3. **Mine-scarred lands**.

See below for guidance on determining the scope of each of these three types of sites. Applicants should identify properties included within their funding proposals that fall within the scope of any of the following three areas.

1.3.1 Contamination by Controlled Substance

Sites eligible for funding include real property, including residential property, that is contaminated by a controlled substance. A “controlled substance” is defined under the Controlled Substances Act as “a drug or other substance, or immediate precursor, included in schedule I, II, III, IV, or V of part B of this title (21 USC Section 812). The term does not include distilled spirits, wine, malt beverages, or tobacco...” For example, sites eligible for brownfields funding may include private residences formerly used for the manufacture and/or

distribution of methamphetamines or other illegal drugs where there is a presence or potential presence of controlled substances or pollutants, contaminants, or hazardous substances (e.g., red phosphorous, kerosene, acids).

1.3.2 Contamination by Petroleum or Petroleum Product

Petroleum-contaminated sites must meet certain requirements to be eligible for brownfields funding. Petroleum is defined under CERCLA as “crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under that section.”

For a petroleum-contaminated site(s) that otherwise meets the definition of a brownfield site to be eligible for funding, EPA or the state must determine:

1. The site is of “relatively low risk” compared with other “petroleum-only” sites in the state; and
2. There is no viable responsible party.
3. The site will not be assessed, investigated, or cleaned up by a person that is potentially liable for cleaning up the site.
4. The site must not be subject to a corrective action order under the Resource Conservation and Recovery Act (RCRA) §9003(h).

Site-specific assessment or cleanup grant proposals for petroleum-contaminated sites must provide information in their proposal indicating whether the site meets each of the criteria listed above. If EPA awards an applicant a revolving loan fund grant, the state or EPA must make the same determinations for site(s) that will be cleaned up under a loan or subgrant. These criteria are explained below.

Please note that states may, but are not required to, use this guidance to determine whether sites contaminated by petroleum or petroleum products are eligible for brownfields grant funding. States may apply their own laws and regulations, if applicable, to eligibility determinations under this section.

Note: A petroleum eligibility determination by the EPA or a state under CERCLA section 101(39)(D) for the purpose of brownfields funding does not release any party from obligations under any federal or state law or regulation, or under common law, and does not impact or limit EPA or state enforcement authorities against any party.

“Relatively Low Risk”

Applicants whose brownfield site(s) include properties or portions of properties contaminated with petroleum or petroleum products must provide information in their proposal indicating that the property represents a relatively low risk (compared to other petroleum-only sites). EPA’s view is that the following types of petroleum-contaminated sites are high-risk sites, or are not of “relatively low risk:”

1. “High risk” sites currently being cleaned up using LUST trust fund monies.
2. Any petroleum-contaminated site that currently is subject to a response under the Oil Pollution Act (OPA).

Note: Any site that does not fall under any of the provisions listed above would be considered to be of relatively low risk for purposes of determining eligibility for a brownfields grant.

“A Site for Which There is No Viable Responsible Party”

EPA or the state is required to determine that there is no viable responsible party that can address the petroleum contamination at the site. If EPA, or the state, identifies a party that is responsible for the activities contemplated by the grant proposal, and that party is financially viable, then the site is not eligible for funding and EPA cannot award the grant. This analysis is twofold – EPA or the state must first determine whether a responsible party exists and, if a responsible party is identified, then determine whether that party is viable for the activities identified in the grant proposal. Applicants are responsible for providing information in their proposal that demonstrates that the activities for which they seek funding have no viable responsible party.

A petroleum-contaminated site may be determined to have no responsible party if the site was last acquired (regardless of whether the site is owned by the applicant) through tax foreclosure, abandonment, or equivalent government proceedings, and that the site meets the criteria in (1) below. Any petroleum-contaminated site not acquired by a method listed above will be determined to have a responsible party if the site fails to meet the criteria in both (1) and (2) below.

1. No responsible party has been identified for the site through:
 - a. An unresolved judgment rendered in a court of law or an administrative order that would require any party (including the applicant) to conduct the activities (including assessment, investigation or cleanup) contemplated by the grant proposal.
 - b. An unresolved enforcement action by federal or state authorities that would require any party (including the applicant) to conduct the activities (including assessment, investigation or cleanup) contemplated by the grant proposal.
 - c. An unresolved citizen suit, contribution action, or other third party claim brought against the current or immediate past owner for the site that would, if successful, require the activities (including assessment, investigation or cleanup) contemplated by the grant proposal to be conducted.

2. The current and immediate past owner did not dispense or dispose of, or own the subject property during the dispensing or disposal of, any contamination at the site, did not exacerbate the contamination at the site, and took reasonable steps with regard to the contamination at the site.¹

If no responsible party is identified above, then the petroleum-contaminated site may be eligible for funding. If a responsible party is identified above, EPA or the state must next determine

¹ For purposes of determining petroleum brownfield grant eligibility, “reasonable steps with regard to contamination at the site” includes, as appropriate: stopping continuing releases, preventing threatened future releases, and preventing or limiting human, environmental, or natural resource exposure to earlier petroleum or petroleum product releases. Reasonable steps are discussed in more detail on pages 9-12 of EPA’s March 6, 2003, “*Common Elements*” guidance.

whether that party is viable. If any such party is determined to be viable, then the petroleum-contaminated site is not eligible for funding.

If there is a responsible party for the site, the applicant should explain in its application what steps it took to determine a responsible party's financial status, and why the information presented indicates that the responsible party is not viable. A state making the "viable responsible party" determination for the applicant may use the standards contained in this Appendix or its own standard. If a state is not making the determination or a tribe is the applicant, EPA will follow the standard set forth in this Appendix. Note that any viability determination made by EPA is for purposes of the CERCLA Section 104(k) grant program only.

EPA will consider a party to be viable if the party is financially capable of conducting the activity (i.e., assessment, investigation, or cleanup) identified in the grant proposal.

Generally, EPA will consider ongoing businesses or companies (corporations, LLCs, partnerships, etc.) and government entities to be viable. EPA will generally deem a defunct or insolvent company and an individual responsible party to be not viable. EPA will apply these assumptions to its petroleum grant viability determinations, unless there is information suggesting that the assumption is not appropriate in a particular case (e.g., if there is information that an individual has adequate financial resources to address contamination at a site, or if there is information indicating an ongoing business is not, in fact, viable). An applicant should indicate if one of the above assumptions applies and provide support for the assertion. In circumstances not covered by one of the above assumptions, the applicant should explain why the responsible party is not viable.

An applicant seeking to determine the financial status (i.e., the viability) of a responsible party should consider consulting the following resources and any other resources it may deem to be useful to make this determination:

1. **Responsible Party:** Ask the responsible party for its financial information (tax returns, bank statements, financial statements, insurance policies designed to address environmental liabilities, etc.), especially if the responsible party is still associated with the site or is the applicant, and, therefore, will receive the benefit of the grant. An applicant that is a responsible party and claiming it is not viable should provide conclusive information, such as an INDIPAY or MUNIPAY analysis, on its inability to pay for the assessment or cleanup.
2. **Federal, State, and Local Records:** Federal, state, and local (i.e., county and city) records often provide information on the status of a business. An applicant that is a state or local government should at the very least search its own records for information on a responsible party. Examples of such resources include regulatory records (e.g., state hazardous waste records), Secretary of State databases, and property/land records.
3. **Public and Commercial Financial Databases:** Applicants also may obtain financial data from publicly available and commercial sources. Listed below are examples of sources for financial data that applicants may consider. Please note that some commercial

sources may charge fees. EPA does not endorse the use of any specific sources, and EPA will accept reliable data from other sources as part of a proposal for funding.

Examples of sources: Lexis/Nexus, Dun & Bradstreet reports, Hoover's Business Information, Edgar Database of Corporate Information, Thomas Register of American Manufacturers, The Public Register, Corporate Annual Reports, Internet search engines (Google, Ask).

“Cleaned Up by a Person Not Potentially Liable”

Brownfields funding may be awarded for the assessment and cleanup of petroleum-contaminated sites provided:

1. The applicant has not dispensed or disposed of or owned the property during the dispensing or disposal of petroleum or petroleum product at the site.
2. The applicant did not exacerbate the contamination at the site and took reasonable steps with regard to the contamination at the site.

“Is not subject to any order issued under §9003(h) of the Resource Conservation and Recovery Act (RCRA)”

Proposals that include requests for an assessment or direct cleanup grant to address petroleum-contaminated sites must not be subject to a corrective action order under RCRA §9003(h). If EPA awards an applicant a RLF grant, the state or EPA must make the same determination for site(s) that will be cleaned up under a loan or subgrant.

1.3.3 Mine-Scarred Lands

Mine-scarred lands are eligible for brownfields funding. EPA's view is that “mine-scarred lands” are those lands, associated waters, and surrounding watersheds where extraction, beneficiation, or processing of ores and minerals (including coal) has occurred. For the purposes of this section, the definition of extraction, beneficiation, and processing is the definition found at 40 CFR 261.4(b)(7).

Mine-scarred lands include abandoned coal mines and lands scarred by strip mining.

Examples of coal mine-scarred lands may include, but are not limited to:

- Abandoned surface coal mine areas
- Abandoned deep coal mines
- Abandoned coal processing areas
- Abandoned coal refuse areas
- Acid or alkaline mine drainage
- Associated waters affected by abandoned coal mine (or acid mine) drainage or runoff, including stream beds and adjacent watersheds

Examples of non-coal hard rock mine-scarred lands may include, but are not limited to:

- Abandoned surface and deep mines

- Abandoned waste rock or spent ore piles
- Abandoned roads constructed wholly or partially of waste rock or spent ore
- Abandoned tailings, disposal ponds, or piles
- Abandoned ore concentration mills
- Abandoned smelters
- Abandoned cyanide heap leach piles
- Abandoned dams constructed wholly or partially of waste rock, tailings, or spent ore
- Abandoned dumps or dump areas used for the disposal of waste rock or spent ore
- Acid or alkaline rock drainage
- Waters affected by abandoned metal mine drainage or runoff, including stream beds and adjacent watersheds

1.4 Sites Not Eligible for Brownfields Funding

The following three types of properties are not eligible for brownfields funding under the Brownfields Law, even on a property-specific basis. Applicants should not include these types of sites in the funding proposals.

- (1) Facilities listed or proposed for listing on the National Priorities List (NPL).
- (2) Facilities subject to unilateral administrative orders, court orders, administrative orders on consent, or judicial consent decrees issued to or entered into by parties under CERCLA.
- (3) Facilities that are subject to the jurisdiction, custody, or control of the U.S. government. Facilities owned by, or under the custody or control of, the federal government are not eligible for brownfields funding. EPA's view is that this exclusion may not extend to:
 - a. Privately-owned, Formerly Used Defense Sites (FUDS);
 - b. Privately-owned, Formerly Utilized Sites Remedial Action Program (FUSRAP) properties; and
 - c. Other former federal properties that have been disposed of by the U.S. government.

Note that land held in trust by the U.S. government for an Indian tribe is not excluded from funding eligibility. In addition, eligibility for brownfields funding does not alter a private owner's ability to cost recover from the federal government in cases where the previous federal government owner remains liable for environmental damages.

1.5 Particular Classes of Sites Eligible for Brownfields Funding Only With Property-Specific Determinations

The following special classes of property are generally ineligible brownfield sites unless EPA makes a "Property-Specific Determination":

- Properties subject to planned or ongoing removal actions under CERCLA.
- Properties with facilities that have been issued or entered into a unilateral administrative order, a court order, an administrative order on consent, or judicial consent decree or to which a permit has been issued by the United States or an authorized state under RCRA, FWPCA, TSCA, or SDWA.

- Properties with facilities subject to RCRA corrective action (§3004(u) or §3008(h)) to which a corrective action permit or order has been issued or modified to require the implementation of corrective measures.
- Properties that are land disposal units that have submitted a RCRA closure notification or that are subject to closure requirements specified in a closure plan or permit.
- Properties where there has been a release of PCBs and all or part of the property is subject to TSCA remediation.
- Properties that include facilities receiving monies for cleanup from the LUST trust fund.

EPA's approval of Property-Specific Determinations will be based on whether or not awarding a grant will protect human health and the environment and either promote economic development or enable the property to be used for parks, greenways, and similar recreational or nonprofit purposes. Property-Specific Determination requests should be attached to your proposal and do not count in the 15-page limit. See the Brownfields FAQ at: http://www.epa.gov/brownfields/proposal_guides/FY13_FAQs.pdf for more information on how to prepare and submit a Property-Specific Determination.

1.5.1 Facilities Subject to CERCLA Removal Actions

Properties (including parcels of properties) where there are removal actions may not receive funding, unless EPA makes a property-specific determination of funding eligibility.

EPA's view is that a removal may be identified by the occurrence of one of the following events, whichever occurs first in time: EPA issues an action memo; EPA issues an Engineering Evaluation/Cost Analysis approval memo; EPA mobilizes onsite; EPA issues a notice of federal interest to one or more potentially responsible parties (PRPs), which in emergencies may be made verbally; or EPA takes other actions that are consistent with a removal.

Once a removal action is complete, a property is eligible for brownfields funding without having to obtain a property-specific funding determination. EPA's view is that, solely for the purposes of eligibility to receive brownfields funding, a removal is complete when the actions specified in the action memorandum are met, or when the contractor has demobilized and left the site (as documented in the "pollution report" or POLREP). Applicants applying for brownfields funding for sites at which removal actions are complete must include documentation of the action being complete with their funding proposal.

Parcels of facilities not affected by removal action at the same property may apply for brownfields funding and may be eligible for brownfields funding on a property-specific basis. Property-specific funding decisions will be made in coordination with the on-scene coordinator (OSC) to ensure that all removals and cleanup activities at the property are conducted in safe and protective manners and to ensure that the OSC retains the ability to address all risks and contamination.

Please note that if a federal brownfields-funded site assessment results in identifying the need for a new removal action, the grantee may continue to expend assessment grant funds on additional assessment activities. However, any additional expenditure of federal brownfields funds and any

additional site assessment activities should be conducted in coordination with the OSC for the site.

1.5.2 Facilities to which a permit has been issued by the United States or an authorized state under the Resource Conservation and Recovery Act (RCRA), the Federal Water Pollution Control Act, the Toxic Substances Control Act, or the Safe Drinking Water Act

Generally, in cases where a property or a portion of a property is permitted under the Resource Conservation and Recovery Act, Section §1321 of the Clean Water Act, the Safe Drinking Water Act, and/or the Toxic Substances and Control Act, the property, or portion of the property, may not receive funding without a property-specific determination. Therefore, applicants should review the following guidance regarding which types of permitted facilities may not receive funding unless EPA makes a property-specific determination to provide funding. Applicants should note that the exclusion for permitted facilities does not extend to facilities with National Pollutant Discharge Elimination System (NPDES) permits issued under the authorities of the Federal Water Pollution Control Act, but is limited to facilities issued permits under the authorities of the Oil Pollution Act (i.e., §1321 of FWPCA).

In cases where one or more portions of a property are not eligible for funding, the applicant should identify the specific permit and situation that causes the property to be excluded. In addition, the applicant must include, within the proposal, documentation that federal brownfields funding for the assessment or clean up of the property will further the goals established for property-specific funding determinations as described in the Brownfields FAQ at:http://www.epa.gov/brownfields/proposal_guides/FY13_FAQs.pdf.

In some cases, a facility may not have a permit or order because it is not in compliance with federal or state environmental laws requiring that it obtain a permit or the facility has failed to notify EPA of its regulatory status. Such facilities are not eligible for brownfields funding. For example, a RCRA treatment unit operator is required to obtain a permit and/or notify EPA of its operation. An operator that fails to fulfill those obligations will likely not have a permit or order as EPA will be unaware of its existence. Therefore, it is EPA's view that such facilities are ineligible to receive brownfields funds as a result of their failure to comply with a basic regulatory requirement. Additional guidance on the eligibility of RCRA-permitted facilities, including facilities under administrative or court orders, including corrective action orders, is provided in the Brownfields FAQ at:http://www.epa.gov/brownfields/proposal_guides/FY13_FAQs.pdf.

1.5.3 RCRA Sites

RCRA Facilities that are Eligible for Funding

EPA's view is that the following types of RCRA facilities are eligible for brownfields funding and do not require Property-Specific Determinations:

- a. RCRA interim status facilities that are not subject to any administrative or judicial order or consent decree.
- b. RCRA interim status facilities that are subject to administrative or judicial orders that do **not** include corrective action requirements or any other cleanup provisions (e.g., RCRA

§3008(a) orders without provisions requiring the owner/operator to address contamination).

- c. Parcels of RCRA facilities that are not under the scope of a RCRA permit or administrative or judicial order.

RCRA Facilities that Require Property-Specific Determinations

EPA's view is that the following types of RCRA facilities may not receive funding without a property-specific determination:

- a. RCRA-permitted facilities.
- b. RCRA interim status facilities with administrative orders requiring the facility to conduct corrective action or otherwise address contamination, including facilities with orders issued under the authorities of RCRA §3008(a), §3008(h), §3013, and §7003.
- c. Facilities under court order or under an administrative order on consent or judicial consent decree under RCRA or CERCLA that require the facility to conduct corrective action or otherwise address contamination at the facility.
- d. Land disposal units that have notified EPA or an authorized state of their intent to close and have closure requirements specified in closure plans or permits.

1.5.4 Land disposal units that have filed a closure notification under Subtitle C of RCRA and to which closure requirements have been specified in a closure plan or permit

RCRA hazardous waste landfills that have submitted closure notifications, as required under 40 CFR 264.112(d) or 265.112(d), generally will not be funded. This may include permitted facilities that have filed notification of closure and for which EPA and/or an authorized state is proceeding with final closure requirements for the facility. For interim status facilities, this is done through approval of a closure plan submitted with closure notification. For permitted facilities, this is routinely done as a modification to the permit, requested by the facility at the time of closure notification.

Please note that RCRA hazardous waste landfills that have submitted closure notifications may be eligible for brownfields funding with a Property-Specific Determination.

1.5.5 Sites Contaminated with PCBs

The Brownfields Law excludes from funding eligibility portions of facilities where there has been a release of PCBs that are subject to remediation under TSCA.

EPA's view is that all portions of properties **are eligible** for brownfields site assessment grants, except where EPA has initiated an involuntary action with any person to address PCB contamination. Also, it is EPA's view that all portions of properties **are eligible** for cleanup and RLF grants, except where EPA has an ongoing action against a disposer to address PCB contamination. However, any portion of a property where EPA has initiated an involuntary action with any person to address PCB contamination and portions of properties where EPA has an ongoing action against a disposer to address PCB contamination will require a Property-Specific Determination to be eligible for brownfields funding, including:

- There is a release (or disposal) of any waste meeting the definition of “PCB remediation waste” at 40 CFR 761.3; **and**
- At which EPA has initiated an involuntary action with any person to address the PCB contamination. Such involuntary actions could include:
 - Enforcement action for illegal disposal;
 - Regional Administrator’s order to characterize or remediate a spill or old disposal (40 CFR 761.50(b)(3));
 - Penalty for violation of TSCA remediation requirements;
 - Superfund removal action; or
 - Remediation required under RCRA §3004(u) or §3004(v).

PCBs may be remediated under any one of the following provisions under TSCA:

- a. Section 761.50(b)(3), the directed characterization, remediation, or disposal action.
- b. Section 761.61(a), the self-implementing provision.
- c. An approval issued under §761.61(c), the risk-based provision.
- d. Section 761.61(b) to the level of PCB quantification (i.e., 1 ppm in soil).
- e. An approval issued under §761.77, the coordinated approval provision.
- f. Section 761.79, the decontamination provision.
- g. An existing EPA PCB Spill Cleanup Policy.
- h. Any future policy or guidance addressing PCB spill clean up or remediation specifically addressing the remediation of PCBs at brownfield sites.

1.5.6 LUST Trust Fund Sites

The Brownfields Law requires a Property-Specific Determination for funding at those sites (or portions of properties) for which assistance for response activity has been obtained under Subtitle I of RCRA from the LUST trust fund. EPA’s view is that this provision may exclude UST sites where money is being spent on actual assessment and/or cleanup of UST/petroleum contamination.

However, in cases where the state agency has used LUST trust fund money for state program oversight activities on an UST site, but has not expended LUST trust funds for specific assessment and/or cleanup activities at the site, the site would be eligible for brownfields funding and does not need a Property-Specific Determination. Such sites may receive brownfields funding on a property-specific basis, if it is determined that brownfields funding will protect human health and the environment and the funding will promote economic development or enable the creation of, preservation of, or addition to greenspace (see guidance on documenting eligibility for property-specific funding determinations provided in the Brownfields FAQ at:http://www.epa.gov/brownfields/proposal_guides/FY13_FAQs.pdf).

Examples of sites receiving LUST trust fund monies that EPA would consider to be good candidates to receive brownfields grants or loans:

- a. All USTfields pilots (50 pilots).
- b. Sites (or portions of properties) where an assessment was completed using LUST trust fund monies and the state has determined that the site is a low-priority UST site, and

therefore additional LUST trust fund money cannot be provided for the cleanup of petroleum contamination, but the site still needs some cleanup and otherwise is a good candidate for economic revitalization.

- c. Sites (or portions of properties) where LUST trust fund money was spent for emergency activities, but then the site was determined to be ineligible for further expenditures of LUST trust funds, yet the site needs additional funding for continued assessment and/or cleanup that will contribute to economic revitalization of the site.

1.6 Eligible Response Sites/Enforcement Issues

The Brownfields Law limits EPA's enforcement and cost recovery authorities at "eligible response sites" where a response action is conducted in compliance with a state response program. Section 101(40) of CERCLA defines an "eligible response site" by referencing the general definition of a "brownfield site" in §101(39)(A) and incorporating the exclusions at §101(39)(B). The law places further limitations on the types of properties included within the definition of an eligible response site, but grants EPA the authority to include within the definition of eligible response site, and on a property-specific basis, some properties that are otherwise excluded from the definition. Such property-specific determinations must be based upon a finding that limits on enforcement will be appropriate, after consultation with state authorities, and will protect human health and the environment and promote economic development or facilitate the creation of, preservation, or addition to a park, a greenway, undeveloped property, recreational property, or other property used for nonprofit purposes. While the criteria appear similar to those for determining eligibility for funding on a property-specific basis, the determinations are distinct, will be made through a separate process, and may not be based on the same information requested in this document for property-specific funding determinations.

Also, please note that in providing funding for brownfield sites, and given that a limited amount of funding is available for brownfields grants, EPA's goal is to not provide brownfields funding to sites where EPA has a planned or ongoing enforcement action. While EPA does not intend that the existence of a planned or ongoing enforcement action will necessarily disqualify a site from receipt of brownfields funding, EPA does believe it is necessary that EPA be aware of the existence of any such action in making funding decisions. As a result, EPA will conduct an investigation to evaluate whether a site is, or will be, subject to an enforcement action under CERCLA or other federal environmental statutes. EPA is requesting that applicants identify ongoing or anticipated environmental enforcement actions related to the brownfield site for which funding is sought.

Appendix 2 Grants.gov Proposal Submission Instructions

General Proposal Instructions

The electronic submission of your proposal must be made by an official representative of your institution who is registered with Grants.gov and who is authorized to sign applications for federal assistance. For more information, go to <http://www.grants.gov> and click on “Get Registered” on the left side of the page. **Note that the registration process may take a week or longer to complete.** If your organization is not currently registered with Grants.gov, please encourage your office to designate an AOR and ask that individual to begin the registration process as soon as possible.

To begin the proposal process under this grant announcement, go to <http://www.grants.gov> and click on the “Apply for Grants” tab on the left side of the page. Then click on “Apply Step 1: Download a Grant Application Package” to download the compatible Adobe viewer and obtain the application package. **To apply through grants.gov you must use Adobe Reader applications and download the compatible Adobe Reader version (Adobe Reader applications are available to [download for free on the Grants.gov website](#).** For more information on Adobe Reader please visit the [Help section](#) on grants.gov at <http://www.grants.gov/help/help.jsp> or http://www.grants.gov/aboutgrants/program_status.jsp).

Once you have downloaded the viewer, you may retrieve the proposal package by entering the Funding Opportunity Number, EPA-OSWER-OBLR-12-08, or the CFDA number that applies to this announcement (66.818), in the appropriate field. Then complete and submit the proposal package as indicated. **You may also be able to access the proposal package by clicking on the “Application” button at the top right of the synopsis page for this announcement on <http://www.grants.gov> (to find the synopsis page, go to <http://www.grants.gov> and click on the “Find Grant Opportunities” button on the left side of the page and then go to Search Opportunities and use the “Browse by Agency” feature to find EPA opportunities).**

Proposal Submission Deadline. Your organization’s AOR must submit your complete proposal package electronically to EPA through Grants.gov (<http://www.grants.gov>) no later than November 19, 2012, 11:59 p.m. EDT. **Please submit all proposal materials described below.**

Proposal Materials

The following forms and documents are required to be submitted under this announcement:

- I. Application for Federal Assistance (SF-424)
- II. Budget Information for Non-Construction Programs (SF-424A)
- III. Narrative Proposal including transmittal letter. See Section IV.C of the announcement for details on the content of the narrative proposal and transmittal letter and the associated page limits.

IV. Required Attachments. See Section IV.C of this announcement.

The proposal package **must** include all of the following materials:

I. Application for Federal Assistance, Standard Form (SF-424). Complete the form. There are no attachments. Please be sure to include organization fax number and email address in Block 5 of the Standard Form SF-424. Please note that the organizational Dun and Bradstreet (D&B) Data Universal Numbering System (DUNS) number must be included on the SF-424. Organizations may obtain a DUNS number at no cost by calling the toll-free DUNS number request line at 1-866-705-5711.

II. Standard Form SF 424A – Budget Information. Complete the form. There are no attachments. The total amount of federal funding requested for the project period should be shown on line 5(e) and on line 6(k) of SF-424A. If indirect costs are included, the amount of indirect costs should be entered on line 6(j). The indirect cost rate (i.e., a percentage), the base (e.g., personnel costs and fringe benefits), and the amount should also be indicated on line 22.

III. Narrative Proposal and Transmittal Letter (also referenced as “Project Narrative Attachment Form” on <http://www.grants.gov>). The documents should be readable in PDF, MS Word, or Word Perfect and consolidated into a single file. See Section IV.C of this Announcement (EPA-OSWER-OBLR-12-08) for details on the content of the narrative proposal and transmittal letter.

IV. Other Attachments Form – For Required Attachments. Use the “Other Attachments Form” to attach a copy of required attachments. (See Section IV.C of this Announcement (EPA-OSWER-OBLR-12-08) for more details of the required attachments.)

Proposal Preparation and Submission Instructions.

Document I through IV, listed under Proposal Materials above, should appear in the “Mandatory Documents” box on the <http://www.grants.gov> “Grant Application Package” page.

For Documents I and II, click on the appropriate form and then click “Open Form” below the box. The fields that must be completed will be highlighted in yellow. Optional fields and completed fields will be displayed in white. If you enter an invalid response or incomplete information in a field, you will receive an error message. When you have finished filling out each form, click “Save.” When you return to the electronic “Grant Application Package” page, click on the form you just completed, and then click on the box that says, “Move Form to Submission List.” This action will move the document over to the box that says, “Mandatory Completed Documents for Submission.”

For Document III, you will need to attach electronic files. Prepare your narrative proposal (including transmittal letter) as described in Section IV.C of this announcement (EPA-OSWER-OBLR-12-08) and save the document to your computer as an MS Word, PDF, or WordPerfect file. When you are ready to attach them to the application package, click on “Project Narrative Attachment Form,” and open the form. Click “Add Mandatory Project Narrative File,” and

attach them (previously saved to your computer) using the browse window that appears. You may then click “View Mandatory Project Narrative File” to view it. Enter a brief descriptive title of your project in the space beside “Mandatory Project Narrative File Filename;” the filename should be no more than 40 characters long. If there are other attachments that you would like to submit to accompany your proposal, you may click “Add Optional Project Narrative File” and proceed as before to attach the attachments. When you have finished attaching the necessary documents, click “Close Form.” When you return to the “Grant Application Package” page, select the “Project Narrative Attachment Form” and click “Move Form to Submission List.” The form should now appear in the box that says, “Mandatory Completed Documents for Submission.”

To attach the required attachments (Document IV), use the “Other Attachments Form.” After attaching the documents, please remember to highlight the “Other Attachments Form” and click “Move Form to Submission List.”

Please note that applicants are limited to using the following characters in all attachment file names. Valid file names may only include the following UTF-8 characters:

A-Z, a-z, 0-9, underscore (_), hyphen (-), space, period.

If applicants use any other characters when naming their attachment files their applications will be rejected by grants.gov.

Once you have finished filling out all of the forms/attachments and they appear in one of the “Completed Documents for Submission” boxes, click the “Save” button that appears at the top of the Web page. It is suggested that you save the document a second time, using a different name, since this will make it easier to submit an amended package later if necessary. Please use the following format when saving your file: “Applicant Name – FY13 - Assoc Prog Supp - 1st Submission” or “Applicant Name - FY 13 Assoc Prog Supp Back-up Submission.” If it becomes necessary to submit an amended package at a later date, then the name of the 2nd submission should be changed to “Applicant Name – FY13 Assoc Prog Supp - 2nd Submission.”

Once your proposal package has been completed and saved, send it to your AOR for submission to U.S. EPA through Grants.gov. Please advise your AOR to close all other software programs before attempting to submit the application package through <http://www.grants.gov>.

In the “Application Filing Name” box, your AOR should enter your organization’s name (abbreviate where possible), the fiscal year (e.g., FY13, and the grant category (e.g., Assoc Prog Supp). The filing name should not exceed 40 characters. From the “Grant Application Package” page, your AOR may submit the application package by clicking the “Submit” button that appears at the top of the page. The AOR will then be asked to verify the agency and funding opportunity number for which the application package is being submitted. If problems are encountered during the submission process, the AOR should reboot his/her computer before trying to submit the application package again. [It may be necessary to turn off the computer (not just restart it) before attempting to submit the package again.] If the AOR continues to

experience submission problems, he/she may contact <http://www.grants.gov> for assistance by phone at 1-800-518-4726, or email at <http://www.grants.gov/help/help.jsp> or contact Jeanette Mendes at Mendes.Jeanette@epa.gov.

Proposal materials submitted through <http://www.grants.gov> will be time/date stamped electronically.

TRANSMISSION DIFFICULTIES

If transmission difficulties that result in a late transmission, no transmission, or rejection of the transmitted proposal are experienced, follow the guidance below. EPA may decide to review the proposal if it is clearly demonstrated that these transmission difficulties were due solely as a result of problems associated with the transfer to Grants.gov. The decision regarding acceptance of the proposal for review will be made by EPA and provided to the applicant within ten working days of the request. All e-mails, as described below, are to be sent to Mendes.Jeanette@epa.gov with the Applicant Name in the Subject Line.

- (1) Late transfer or no transmission due to electronic submission problems: Should electronic submission problems result in the proposal being transferred to Grants.gov after 11:59 p.m. Eastern Time on the solicitation closing date, send an e-mail documenting the problem, include the Grants.gov “case number” and attach the entire proposal.
- (2) Grants.gov rejection of proposal: If a notification is received from Grants.gov stating that the proposal has been rejected **for reasons other than late submittal**, immediately send an email that includes the notice provided by Grants.gov documenting rejection and attach the entire proposal.

If you have not received a confirmation of receipt from EPA (not from grants.gov) within 30 days of the proposal deadline, please contact **Jeanette Mendes** at Mendes.Jeanette@epa.gov. Failure to do so may result in your proposal not being reviewed.

Appendix 3 Special Considerations Checklist

Please identify (with an **X**) if any of the below items apply to your community or your project as described in your proposal. EPA will verify these disclosures prior to selection and may consider this information during the evaluation process.

- Community population is 10,000 or less
- Federally recognized Indian tribe
- United States territory
- Applicant assisting a Tribe or territory
- Targeted brownfield sites are impacted by mine-scarred land
- Targeted brownfield sites are contaminated with controlled substances
- Community is impacted by recent natural disaster(s) (2005 or later). To be considered, applicant must identify here the timeframe and type of natural disaster.
- Applicant demonstrates firm leveraging commitments for facilitating brownfield project completion by identifying amounts and contributors of funding in the proposal and have included documentation
- Community experiencing plant closures (or other significant economic disruptions) (2007 or later), including communities experiencing auto plant closures due to bankruptcy or economic disruptions. To be considered, applicant must identify here the timeframe and name of the plant recently closed and jobs lost, or reason for other significant economic disruption.
- Applicant is a recipient or a core partner of a HUD-DOT-EPA Partnership for Sustainable Communities (PSC) grant that is directly tied to the project area, and can demonstrate that funding from a PSC grant has or will benefit the project area. To be considered, **applicant must attach documentation** which demonstrates this connection to a HUD-DOT-EPA PSC grant.
- Applicant is a recipient of an EPA Brownfields Area-Wide Planning grant
- Community is implementing green remediation plans
