Ms. Shaja Joyner, PM-20
Office of Pesticide Programs (7504P)
U.S. Environmental Protection Agency
2777 Crystal Drive, R. S-4900
Arlington, VA 22202

Ms. Joyner:

Subject: Petition for Extension of the Period of Exclusive Data Use for the Active Ingredient: Forchlorfenuron KT-30 Technical (EPA Reg. No. 71049-2) and CPPU Plant Growth Regulator (EPA Reg. No. 71049-4)

KIM BLUE (CPPU) Plant Growth Regulator is a valuable tool for blueberry growers because it enables growers to delay fresh blueberry harvest so that growers can better manage available labor and so that they can market their fruit into more attractive market windows. We support KIM-C's request that you grant an additional year of exclusive use of the data supporting the CPPU registration.

Regards,

Nathan S. Goodman
Eastside Farm Manager
Townsend Farms, Inc.
