Re: Update of Petition of Sunoco, Inc. Toledo Refinery (ORIS 50965) to Exempt the Sunoco Toledo Refinery CO Boilers (B046 and B047) from Monitoring and Recordkeeping Requirements of the Ohio NOx Budget Rule

Dear Ms. Moore:

The U.S. Environmental Protection Agency (EPA) has reviewed your June 10, 2004, request to extend the deadline for compliance by the carbon monoxide (CO) boiler at the Sunoco, Inc, Toledo Refinery (Facility ID (ORISPL) 50965) with the monitoring, recordkeeping, and reporting requirements of the Ohio NOx Budget Trading Program. Based on your request and EPA's original extension of the deadline granted November 25, 2003, EPA approves an additional extension of the deadline for compliance by the CO boiler with such monitoring, recordkeeping and reporting requirements until the earlier of May 1, 2005 (the start of the next ozone season) or the effective date of EPA's approval of the State Implementation Plan (SIP) revision excluding the CO boiler from the Ohio NOx Budget Trading Program.

If, contrary to current expectations, the CO boiler remains subject to the Ohio NOx Budget Trading Program for the 2004 ozone season, substitute data under the Ohio NOx Budget Trading Program and 40 CFR Part 75 will have to be used for any hour of operation during the 2004 ozone season for which certified CEMS data are not available.

EPA's determination in this letter relies on the accuracy and completeness of the information provided by Sunoco, Inc. in its June 10, 2004 petition, and is appealable under 40

CFR Part 78. If you have any questions about this determination, please contact Mary Shellabarger at (202) 564-9188.

Sincerely,

A handwritten signature in black ink, appearing to read "Sam Napolitano", with a stylized flourish at the end.

Sam Napolitano, Director
Clean Air Markets Division
