## Management Method Codes Used with the Hazardous Waste Report

## What is the Hazardous Waste Report?

Large quantity generators and TSDFs must report on their hazardous waste generation and management activities to EPA every other year, as specified in 40 CFR 262.41, 264.75, and 265.75. To assist generators and TSDFs, EPA publishes the *Hazardous Waste Report Instructions and Forms* (EPA Form 8700-13 A/B). **This booklet** includes instructions and forms for them to describe the type, source, form, and management of hazardous wastes that they generate and the type, quantities, and management of hazardous wastes that they receive from off site.

## What are Management Method Codes?

The *Hazardous Waste Report Instructions and Forms* includes a list of Management Method Codes to describe the type of hazardous waste management system used to treat, recover, or dispose of a hazardous waste. These codes are updated routinely and published in the instructions of the current edition of the booklet. For the convenience of readers, we present a list of Management Method Codes that were included in the *2003 Hazardous Waste Report Instructions and Forms*. Note, however, that these codes are subject to change over time, and manifest users are urged to refer to the most recent edition of the *Hazardous Waste Report Instructions and Forms* for the most current and accurate set of codes. The current booklet, as well as the list of Management Methods Codes, can be found at EPA's Web site: <a href="http://www.epa.gov/epaoswer/hazwaste/data/biennialreport/">http://www.epa.gov/epaoswer/hazwaste/data/biennialreport/</a>.

Code	Management Method Code Group	
Reclamation and Recovery		
H010	Metals recovery including retorting, smelting, chemical, etc.	
H020	Solvents recovery (distillation, extraction, etc)	
H039	Other recovery or reclamation for reuse including acid regeneration, organics recovery, etc.	
	(specify in comments)	
H050	Energy recovery at this site - used as fuel (includes on-site fuel blending before energy	
	recovery; report only this code)	
H061	Fuel blending prior to energy recovery at another site (waste generated either on site or	
	received from off site)	
Destruction or Treatment Prior to Disposal at Another Site		
H040	Incineration - thermal destruction other than use as a fuel (includes any preparation prior to	
	burning)	
H071	Chemical reduction with or without precipitation (includes any preparation or final processes	
	for consolidation of residuals)	
H073	Cyanide destruction with or without precipitation (includes any preparation or final processes	
	for consolidation of residuals)	
H075	Chemical oxidation (includes any preparation or final processes for consolidation of	
	residuals)	
H076	Wet air oxidation (includes any preparation or final processes for consolidation of residuals)	
H077	Other chemical precipitation with or without pre-treatment (includes processes for	
	consolidation of residuals)	

H081 I	Biological treatment with or without precipitation (includes any preparation or final
	biological treatment with or without precipitation (includes any preparation of final
l r	processes for consolidation of residuals)
H082 A	Adsorption (as the major component of treatment)
H083 A	Air or steam stripping (as the major component of treatment)
	Sludge treatment and/or dewatering (as the major component of treatment; not H071-H075, H077, or H082)
H103 A	Absorption (as the major component of treatment)
	Stabilization or chemical fixation prior to disposal at another site (as the major component of treatment; not H071-H075, H077, or H082)
H112 N	Macro-encapsulation prior to disposal at another site (as the major component of treatment; not reportable as H071-H075, H077, or H082)
H121 N	Neutralization only (no other treatment)
H122 H	Evaporation (as the major component of treatment; not reportable as H071-H083)
H123 S	Settling or clarification (as the major component of treatment; not reportable as H071-H083)
H124 F	Phase separation (as the major component of treatment; not reportable as H071-H083)
H129 (	Other treatment (specify in comments; not reportable as H071-H124)
Disposal	
H131 I	Land treatment or application (to include on-site treatment and/or stabilization)
	Landfill or surface impoundment that will be closed as landfill (to include prior treatment and/or stabilization)
h	Deepwell or underground injection (with or without treatment; this waste was counted as hazardous waste)
H135 I	Discharge to sewer/POTW or NPDES (with prior storage - with or without treatment)
Transfer Off Site	
	The site receiving this waste stored/bulked and transferred the waste with no treatment or recovery (H010-H129), fuel blending (H061), or disposal (H131-H135) at that receiving site.

## Where must Management Method Codes be entered on the manifest?

Management Method Codes must be entered by the designated TSDF in Item 19 of the manifest and in Item 36 of the continuation sheet. Refer to the manifest instructions for completion of these codes.
