

Fact Sheet Date: March 12, 1998

**NEW YORK STATE
- HUMAN HEALTH FACT SHEET -**

**Ambient Water Quality Value for
Protection of Sources of Potable Water**

SUBSTANCE: 4-Isopropyltoluene

CAS REGISTRY NUMBER: 99-87-6

AMBIENT WATER QUALITY VALUE: 5 ug/L

BASIS: Surface Water: Principal Organic Contaminant Classes
Groundwater: Former Reference to 10 NYCRR Subpart 5-1 Principal Organic Contaminant (POC) General Maximum Contaminant Level (MCL)

I INTRODUCTION

This value applies to the water column and is designed to protect humans from the effects of contaminants in sources of drinking water; it is referred to as a Health (Water Source) or H(WS) value.

Regulations (6 NYCRR 702.2) require that the water quality value be based on the procedures in sections 702.3 through 702.7. Available information on 4-isopropyltoluene was examined as described in "Scope of Review," below. Potential water quality values are derived below, and the value of 5 ug/L selected as described under "Selection of Value."

II PRINCIPAL ORGANIC CONTAMINANT CLASSES AND SPECIFIC MCL (702.3)

A. Discussion

4-Isopropyltoluene does not have a Specific MCL as defined in 700.1. However, it is in principal organic contaminant class iv as defined in 700.1.

The U.S. Environmental Protection Agency has not established a maximum contaminant level goal (MCLG) or MCL for drinking water for 4-isopropyltoluene.

Under the State Sanitary Code (10 NYCRR Part 5, Public Water Supplies), the New York State Department of Health has established a general maximum contaminant level of 5 ug/L for principal organic contaminants such as 4-isopropyltoluene in drinking water.

B. Derivation of Value

Because 4-isopropyltoluene is in a principal organic contaminant class and has no Specific MCL, regulations require that the water quality value not exceed 5 ug/L.

III ONCOGENIC EFFECTS (702.4)

No information was found on the oncogenicity of 4-isopropyltoluene. A value based on oncogenic effects cannot be derived for 4-isopropyltoluene due to the lack of data.

IV NON-ONCOGENIC EFFECTS (702.5)

No information on the non-oncogenic effects of 4-isopropyltoluene that was appropriate for the derivation of a water quality value was found.

V CHEMICAL CORRELATION (702.7)

No information was found upon which to derive a water quality value based on chemical correlation.

VI SELECTION OF VALUE

The H(WS) value is designed to protect humans from oncogenic and non-oncogenic effects from contaminants in sources of drinking water. To protect for these effects, regulations (6 NYCRR 702.2(b)) require that the value be the most stringent of the values derived using the procedures found in sections 702.3 through 702.7. The principal organic contaminant class value of 5 ug/L (702.3(b)) is the most stringent value derived by these procedures and is the ambient water quality value for 4-isopropyltoluene.

It should be noted that the principal organic contaminant (POC) value of 5 ug/L became a standard for groundwater (6 NYCRR 703.5) effective on January 9, 1989 by reference to 10 NYCRR Subpart 5-1 standards. The basis and derivation of this

POC standard are described in a separate fact sheet.

VIII SCOPE OF REVIEW

Several of the widely-recognized sources listed below can provide a comprehensive review and often a quantitative assessment of the toxicity of a substance. These sources were searched for information on 4-isopropyltoluene; where none was found it is so noted.

- IRIS (U.S. EPA's Integrated Risk Information System). On-line database (substance not on IRIS).
- RTECS (Registry of Toxic Effects of Chemical Substances). On-line database.
- CCRIS (Chemical Carcinogenesis Research Information System). On-line database (substance not on CCRIS).
- ATSDR (Agency for Toxic Substances and Disease Registry) toxicological profile (document not found).
- U.S. EPA ambient water quality criteria document (document not found).
- U.S. EPA health advisory (document not found).
- U.S. EPA drinking water criteria document (document not found).
- IARC (International Agency for Research on Cancer) Monographs Supplement 7 (substance not listed).

No comprehensive review document was found for 4-isopropyltoluene. Therefore, an on-line search of the literature was conducted by the New York State Library from 1992 back to the 1960's on the databases listed below.
