

AMBIENT SURFACE WATER QUALITY  
STANDARDS DOCUMENTATION

CHEMICAL: Aryltriazoles

VALUE(S) ADDED 8-08-83

CAS NO.(s): NA

FACT SHEET REVISED 9-6-85

BASIS (Human/Aquatic): Human

VALUE(S) REMOVED \_\_\_\_\_

WATER CLASSIFICATION: AA; AA-s; A; A-s

STANDARD: 50 ug/l Note E

REMARKS:

SUMMARY INFORMATION:

A search of the scientific literature failed to reveal any studies upon which to calculate a guideline for aryltriazoles based on chronic toxicity or aesthetic characteristics. These compounds have not been adequately tested to determine oncogenic potential.

STANDARD DERIVATION:

Inadequate data base for these chemicals precludes the use of any derivation outlined in Section 701.3 through 701.7. Therefore, the general guideline of 50 ug/l is recommended as a standard.
