

Recommended Study Design for a Survey to Evaluate the Effectiveness of Mississippi Delta Fish Advisories

Final Report

June 29, 2007

Prepared for

**The Office of Water, Office of Science and Technology
U.S. Environmental Protection Agency
1200 Pennsylvania Avenue, NW
Washington, DC 20460**

Contents

Section	Page
Acknowledgments	vii
1 Introduction	1-1
1.1 Background	1-1
1.2 Purpose and Objectives	1-4
2 Methodology Used to Develop the Survey Instrument	2-1
2.1 Survey Instrument Design	2-1
2.2 Cognitive Interviews	2-5
3 Recommended Survey Methodology	3-1
3.1 Survey Mode	3-1
3.2 Survey Universe	3-2
3.3 Sample Design	3-5
3.3.1 On-the-Bank Survey	3-5
3.3.2 Household Survey	3-5
3.4 Survey Procedures	3-9
3.4.1 Selection and Training of Interviewers	3-9
3.4.2 Selection of Individuals to Interview	3-10
3.4.3 Use of Incentives	3-11
3.4.4 Time Period for Field Data Collection	3-11
3.4.5 Other Survey Procedures	3-11
4 References	4-1

Appendixes

A:	Final Survey Instrument.....	A-1
B:	Summary of Literature Review	B-1
C:	Materials Used in Cognitive Interviews	C-1
D:	Maps of the Counties Selected for the Survey.....	D-1

Figures

Number	Page
1-1 Areas Affected by the Mississippi Delta Fish Consumption Advisory.....	1-3
1-2 Sign Used in the Mississippi Delta Fish Consumption Advisory.....	1-4
2-1 Methodology Used to Develop the Survey Instrument	2-3
3-1 Location of the Four Counties within the Advisory Area	3-3

Tables

Number		Page
2-1	Description of Workgroup Members	2-2
2-2	Types of Information Collected in the Survey	2-4
3-1	Advantages and Disadvantages of Alternative Survey Modes	3-2
3-2	Characteristics of the Four Counties for the Survey	3-4
3-3	Recommended Sample Allocation for the On-the-Bank and Household Surveys	3-6
3-4	Recommended Water Bodies for the On-the-Bank Survey	3-6
3-5	Corresponding 95% CIs for Varying Sample Sizes for a Proportion Estimate of 0.50, Assuming a Design Effect of 2	3-7

Acknowledgments

The U.S. Environmental Protection Agency (EPA) Work Assignment Manager for this project was Jeffrey Bigler, who provided general oversight for the project and served as co-chair of the study workgroup.

Henry Folmer, Advisory Program Manager from the Mississippi Department of Environmental Quality (MDEQ) also served as co-chair of the workgroup.

Other workgroup members included Steve Goff, MDEQ, who arranged the Indianola meeting and assisted with the recruitment of local fishers for the cognitive interviews; Steven Bradbard of the U.S. Food and Drug Administration, who led the cognitive interview testing of the draft instrument; and the following members who assisted with the design of the survey instrument and survey methodology: William Gross, EPA; Pat Cunningham, RTI; Joanne Burger, Rutgers State University; Joan Wesley, Jackson State University; Ralph Brown, Brigham Young University; Barbara Brooks, Mayor of Leland, Mississippi; Gary Lucas, Mississippi Department of Wildlife and Fisheries; and Glen Donald, County Supervisor. Additionally, we thank the nine individuals from the Mississippi Delta who participated in the cognitive pretest interviews.
