

More Samples, More Data. How Do You Manage Your Chromatography Data?

Heather Longden
Waters

The amount of data being produced by your chromatography data system increases every year. Being able to acquire, process and report your data efficiently and effectively can be a significant challenge. Being able to find the right information at the right time can make a huge difference to the cost effectiveness of your laboratory. Being able to trace and manage data consistently can be a strain of resources both human and financial.

This session will describe how workflow, traceability and data management tools in a modern Chromatography Data System (CDS) can add value by improving efficiency and confidence in your chromatography data.
