

**Learn About the *NEW* EPA Method 325b for Refinery Fence Line Monitoring and TO-17  
Extended for Soil Gas**

Tom Mancuso  
PerkinElmer

This talk will review new method and sorbent tube developments for these important air methods. Achieving recovery of difficult targets in one analysis and how to comply with the new EPA 325b will be a couple of the topics discussed during this session. In addition, methodology, performance and meeting EPA criteria will be reviewed.
