Subject: Cape Wind Farm

This is a devastating plan for developing energy. We would be destroying one absolutely irreplaceable natural resource/wonder/beauty in order to achieve green energy. Quite a contradiction, almost an oxymoron. (Moron is the key word ...)

Everyone I talk to on the Cape is opposed to this plan, and I mix with those who love this very special place. I am very concerned about clean energy, having voted the Democratic ticket (for the first time in my life) for the social values it offered. When Mr. Salazar announced the approval of the plan, I was shocked beyond words, a unique situation for me.

Please examine very carefully the effects of this development would be (thinking of 'drill, baby' drill in our Southern shores) with its ecological and moral implications.

Thank you.  
Sincerely,  
Joanne P. Q. El-Fayoumy
