To Whom It May Concern,

I am writing to request that you re-examine the issuing of the K-Ply operating permit in Port Angeles. My family and neighbors still have serious concerns about this. I have made numerous calls to the Clean Air Now and OAPCA hotline phone numbers and have never received a response from OAPCA. Likewise, there does not seem to be an account of our calls to OAPCA.

There are problems with opacity and odor nuisances, as have been reported. The particulate fallout in our neighborhood is significant and these problems should be monitored WHERE they are occurring, not below the level of the stack where they are lessened. Contrary to what OAPCA has said, our neighborhood has never received information about phenol and formaldehyde emissions on neighboring properties. If this information is available I would like to know how to get it.

Thank you for addressing these issues. Please feel free to contact me if I can be of any assistance.

Sincerely,

Bonnie Rathod
