# Brownfields 2015 Grant Fact Sheet

## Bridgeport, CT

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grant

*\$200,000 for hazardous substances*

EPA has selected the City of Bridgeport for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former AGI Rubber site at 141 Stratford Avenue. The site consists of two buildings and was formerly used for various commercial and industrial uses, including a rubber manufacturing facility, tin shop, and fish market. The site is contaminated with PCBs, inorganic contaminants, and other hazardous substances. Grant funds also will be used for community outreach activities and cleanup planning.

# Brownfields 2015 Grant Fact Sheet

## East Hartford, CT

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grant

*\$200,000 for hazardous substances*

EPA has selected the Town of East Hartford for a brownfields assessment grant. Community-wide hazardous substances grant funds will be used to inventory sites and conduct five Phase I and three Phase II environmental site assessments. Grant funds also will be used to support community outreach activities.

# Brownfields 2015 Grant Fact Sheet

## Greater Bridgeport Regional Council, Bridgeport and Stratford, CT

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grants

*\$200,000 for hazardous substances*  
*\$200,000 for petroleum*

EPA has selected the Greater Bridgeport Regional Council for two brownfields assessment grants. Community-wide hazardous substances and petroleum grant funds will be used to complete seven Phase I and seven Phase II environmental site assessments. Grant funds also will be used to conduct community outreach activities and build Geographic Information System (GIS) capacity to expand the amount of brownfields information disseminated to the public via the Regional Council's GIS web-viewer. The focus of these grants will be the East Bridgeport Development Corridor and Downtown Stratford.

# Brownfields 2015 Grant Fact Sheet

## Meriden, CT

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grant

*\$200,000 for hazardous substances*

EPA has selected the City of Meriden for a brownfields assessment grant. Community-wide hazardous substances grant funds will be used to conduct up to five Phase I and five Phase II environmental site assessments. Grant funds also will be used to conduct community outreach activities and to develop an area-wide plan.

### Contacts

# Brownfields 2015 Grant Fact Sheet

## Attleboro Redevelopment Authority, MA

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grants

*\$600,000 for hazardous substances*

EPA has selected the Attleboro Redevelopment Authority for three brownfields cleanup grants. Hazardous substances grant funds will be used to clean up Areas 1, 2, and 3 of the former Reynolds & Markman property at 101 Olive Street. The property was formerly used primarily for the storage, repackaging, and distribution of chemicals, and also used for furniture making, jewelry manufacturing, and landfill operations. Area 1 is contaminated with trichloroethylene. Area 2 is contaminated with metals. Area 3, a former landfill site, is contaminated with metals and polycyclic aromatic hydrocarbons. Grant funds also will be used to conduct community outreach activities.

### Contacts

# Brownfields 2015 Grant Fact Sheet

## Chicopee, MA

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grant

*\$200,000 for petroleum*

EPA has selected the City of Chicopee for a brownfields cleanup grant. Petroleum grant funds will be used to clean up the former Racing Oil Service Station at 181 Center Street. The quarter-acre site was used as a gasoline service station beginning in 1920, and has been unused since 2004. Soil and groundwater at the site are contaminated with gasoline-related constituents, such as benzene, toluene, and volatile petroleum hydrocarbons. Grant funds also will be used to support post-cleanup monitoring activities for up to three years.

# Brownfields 2015 Grant Fact Sheet

## Elizabeth Stone House, Roxbury, MA

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grant

*\$200,000 for hazardous substances*

EPA has selected the Elizabeth Stone House for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former Industrial and Auto Repair Facility at 3012 Washington Street and 13 Westminster Avenue in the Roxbury neighborhood of Boston. The site originally was used as an automobile parking garage and later converted for mixed industrial, warehouse, and automotive repair uses. It has been vacant since 1996 and is contaminated with metals and volatile organic compounds. Grant funds also will be used for community outreach activities.

## Montachusett Regional Planning Commission, North-Central Massachusetts

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grants

*\$200,000 for hazardous substances*  
*\$200,000 for petroleum*

EPA has selected the Montachusett Regional Planning Commission for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to inventory and prioritize sites and to conduct six Phase I and six Phase II environmental site assessments. Grant funds also will be used to conduct community outreach activities and cleanup planning. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination.

## Berwick, ME

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grants

*\$600,000 for hazardous substances*

EPA has selected the Town of Berwick for three brownfields cleanup grants. Hazardous substances grant funds will be used to clean up Lots 4, 5, and 6 of the Prime Tanning Co., Inc., site at 20 Sullivan Street. The site was used for 100 years as a tannery and for other industrial uses, including shoe and carriage manufacturing. All three lots are contaminated with volatile organic compounds, polycyclic aromatic hydrocarbons, metals, and inorganic contaminants. Grant funds also will be used to conduct community involvement activities.

# Brownfields 2015 Grant Fact Sheet

## Lubec, ME

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grants

*\$400,000 for hazardous substances*

EPA has selected the Town of Lubec for two brownfields cleanup grants. Hazardous substances grant funds will be used to clean up the Columbian Factory, Lot 19, and the Columbian Store, Lot 20, both at 135 Main Street. The half-acre Columbian Factory site was used as a cannery from 1908 to 1960, and has been vacant since then. It is contaminated with metals, polynuclear aromatic hydrocarbons, and inorganic contaminants. The six-acre Columbian Store site was formerly a cannery store and is now storage and exhibit space for the Lubec Historical Society. It is contaminated with heavy metals, chlorinated solvents, and organic contaminants. Grant funds at both sites also will be used to conduct community involvement activities.

# Brownfields 2015 Grant Fact Sheet

## Penobscot Indian Nation, Penobscot County, ME

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grant

*\$200,000 for hazardous substances*

EPA has selected the Penobscot Indian Nation for a brownfields assessment grant. Community-wide hazardous substances grant funds will be used to update an inventory of brownfield sites and conduct up to six Phase I and three Phase II environmental site assessments. Grant funds also will be used to develop three cleanup plans and conduct community engagement activities.

# Brownfields 2015 Grant Fact Sheet

## Portland Harbor Commission, Portland, ME

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grant

*\$350,000 for hazardous substances*

EPA has selected the Portland Harbor Commission for a brownfields assessment grant. Site-specific hazardous substances grant funds will be used to conduct Phase I and Phase II environmental site assessments of the sediment floor of Portland Harbor's Federal Channel, which is adjacent to the city's wharves. Grant funds also will be used to conduct community engagement activities.

Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grant

*\$200,000 for hazardous substances*

EPA has selected the City of Central Falls for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Central Falls Landing site at 1420 Broad Street. The site was used for a variety of manufacturing and commercial uses. Since around 1875, it has been home to a manufacturing plant, an automotive repair facility, a sporting goods store, a theater company, and various other commercial establishments. The site has been vacant since 2008 and is contaminated with arsenic and polycyclic aromatic hydrocarbons. Grant funds also will be used to support community outreach activities.

## I-195 Redevelopment Commission, Providence, RI

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grant

*\$200,000 for hazardous substances*

EPA has selected the I-195 Redevelopment Commission for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up Parcel 30 of the I-195 Redevelopment District, also known as "The Link," in Providence. The site was occupied by residences, stores, and a jewelry manufacturer prior to the construction of Interstate 195 in the 1950s. The site is contaminated with volatile organic compounds. Grant funds also will be used for community outreach activities.

## Pawtucket Central Falls Development Corporation, RI

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grants

*\$600,000 for hazardous substances*

EPA has selected the Pawtucket Central Falls Development Corporation for three brownfields cleanup grants. Hazardous substances grant funds will be used to clean up 24 Branch Street, Plat A, Lot 49; 10 East Street, Plat 6A, Lot 647; and 18 Branch Street, Plat 6A, Lot 50. All three properties were historically used for residential purposes from the 1800s to the 1970s, and are now vacant. They are contaminated with metals and polycyclic aromatic hydrocarbons. Grant funds also will be used to conduct community outreach activities.

# Brownfields 2015 Grant Fact Sheet

## Camden Redevelopment Agency, NJ

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grant

*\$344,710 for hazardous substances*

EPA has selected the Camden Redevelopment Agency for a brownfields assessment grant. Site-specific hazardous substances grant funds will be used to perform assessment activities at the Camden Laboratories property at 1667 Davis Street. Since approximately two-thirds of the site is covered by asphalt-paved parking areas and one- and two-story vacant buildings, assessment activities will include selective demolition to remove strategic areas of remnant pavement and concrete or masonry structures to access underlying areas of the site. Grant funds also will be used for community outreach activities.

### Cleanup Grants

*\$600,000 for hazardous substances*

EPA has selected the Camden Redevelopment Agency for three brownfields cleanup grants. Hazardous substances grant funds will be used to clean up the APM site at East State Street and River Avenue; Harrison Avenue Landfill Lot 18 at East State Street and Harrison Avenue; and Building 8 at 100 Cooper Street. The APM site was formerly used as a warehouse, experimental laboratory, and toy assembly plant, and is contaminated with arsenic, metals, and polynuclear aromatic hydrocarbons. The Harrison Avenue Landfill site is now vacant, but was formerly used as a city dump and is contaminated with chlorinated volatile organic compounds and dieldrin. Building 8 is now vacant, but was formerly used for radio manufacturing and office space and is contaminated with PCBs, chlorinated volatile organic compounds, dioxin, and inorganic contaminants. Grant funds also will be used for community engagement activities at all three sites, and for building demolition and establishing institutional controls at the APM site.

# Brownfields 2015 Grant Fact Sheet

## Neptune, NJ

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grants

*\$200,000 for hazardous substances*

*\$200,000 for petroleum*

EPA has selected the Township of Neptune for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to conduct five Phase I and five Phase II environmental site assessments, and cleanup planning at three sites. Community-wide petroleum grant funds will be used to conduct 10 Phase I and five Phase II environmental site assessments, and cleanup planning at two sites. Grant funds of both types also will be used to conduct community outreach activities.

Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grants

*\$400,000 for hazardous substances*

EPA has selected the Earth Conservancy for two brownfields cleanup grants. Hazardous substances grant funds will be used to clean up the Bliss Bank Phase II Parcel C and Parcel D sites located off Middle Road in Nanticoke and Hanover Township in Luzerne County. The adjacent parcels were used as repositories for coal mine waste called "culm" and have been dormant since the 1970s. Degraded landscape and unstable culm banks from historic mining practices are the primary environmental concerns at the site. Grant funds also will be used to plant native grasses and trees, create a stormwater management facility, and conduct community outreach activities.

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grants

*\$200,000 for hazardous substances*

*\$200,000 for petroleum*

EPA has selected the City of Martinsville for two brownfields assessment grants. Community-wide hazardous substances and petroleum grant funds will be used to conduct seven Phase I and three Phase II environmental site assessments. Grant funds also will be used for cleanup planning for approximately three sites and community outreach activities.

# Brownfields 2015 Grant Fact Sheet

## Business Development Corporation of the Northern Panhandle, Chester and Wellsburg, WV

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grants

*\$600,000 for hazardous substances*

EPA has selected the Business Development Corporation of the Northern Panhandle for three brownfields cleanup grants. Hazardous substances grant funds will be used to clean up the former Wheeling Corrugated site at 2481 River Road in Wellsburg; the TS&T Riverbank site at 8th and Plutus Streets in Chester; and the former Brooke Glass site at 130 6th Street in Wellsburg. The 33-acre Wheeling Corrugated site was a steel manufacturing plant from 1910 to 2012, and is contaminated with metals and inorganic contaminants. The 0.75-acre TS&T Riverbank site was used as a pottery manufacturing facility from 1900 to 1982 and is contaminated with metals. The two-acre Brooke Glass site formerly housed glass-making and painting operations, and has been vacant since 2005. It is contaminated with arsenic, cadmium, and inorganic contaminants. Grant funds at all three sites also will be used to conduct community involvement activities and redevelopment planning.

# Brownfields 2015 Grant Fact Sheet Cumberland Valley Area Development District, Southeastern Kentucky

## EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

## Assessment Grants

*\$200,000 for hazardous substances*  
*\$200,000 for petroleum*

EPA has selected the Cumberland Valley Area Development District for two brownfields assessment grants. Community-wide hazardous substances and petroleum grant funds will be used to conduct an inventory of brownfield sites and perform approximately 17 Phase I and nine Phase II environmental site assessments. Grant funds also will be used to prepare up to eight cleanup plans and conduct community outreach activities.

## Lexington-Fayette Urban County Government, KY

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grant

*\$200,000 for hazardous substances*

EPA has selected the Lexington-Fayette Urban County Government for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former Fayette County Courthouse at 215 West Main Street. The building was constructed in 1898 and operated as the community's judicial center until 2002. From 2002 until 2012, the building was used to provide museum space and to assist with Lexington Farmers' Market operations. Contaminants at the site include metals, inorganic materials, mold, and guano.

## Vanceburg, KY

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grant

*\$200,000 for hazardous substances*

EPA has selected the City of Vanceburg for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Old Shoe Factory at 185 Rowley Avenue. The site's historical land uses include a tannery in the late 1800s, a shoe factory in the early 1900s, a war surplus building, and general hardware store. The site is contaminated with heavy metals and inorganic contaminants. The current condition of the building located on the site makes it unusable. Grants funds also will be used to conduct community outreach activities and to implement a health monitoring program.

Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grants

\$140,000 for hazardous substances

\$139,000 for petroleum

EPA has selected the Town of Williamston for two brownfields cleanup grants. Hazardous substances grant funds will be used to clean up the former Royster-Clark site at 722 River Road. Petroleum grant funds will be used to clean up the former Windsor Oil site at 738 River Road. The Royster-Clark site was formerly used as a storage and distribution facility for fertilizer, and is contaminated with volatile and semi-volatile organic compounds. The Windsor Oil site was formerly used for the bulk storage and distribution of petroleum products, and is contaminated with benzene, naphthalene, and other petroleum products. Grant funds at both sites also will be used for community outreach activities.

## Columbus, IN

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grants

*\$200,000 for hazardous substances*

*\$200,000 for petroleum*

EPA has selected the City of Columbus for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to update the city's brownfields inventory, prioritize sites for assessment, and conduct between seven and 10 Phase I and between four and six Phase II environmental site assessments. Grant funds also will be used to conduct community outreach and health monitoring activities. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination.

Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grant

*\$200,000 for hazardous substances*

EPA has selected the Genesee County Land Bank Authority for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former Ramada Hotel and Banquet Center at 4300 West Pierson Road in Mt. Morris Township. The hotel building was originally constructed in 1968 with conference and banquet rooms added at a later date. In 2006, the site was abandoned following two fires to the structure. The site is contaminated with inorganic contaminants, abandoned chemicals, and other hazardous materials banned from landfill disposal. The site also is likely to be contaminated with methamphetamine. Grant funds also will be used to develop a community relations plan and conduct community outreach activities.

\$400,000 for hazardous substances

\$100,000 for petroleum

EPA has selected the City of Lansing for a brownfields assessment coalition grant. Community-wide hazardous substances grant funds will be used to perform up to six Phase I and up to five Phase II environmental site assessments. Grant funds also will be used for community outreach activities and cleanup planning. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination. Coalition partners are the City of East Lansing, Clinton County, Eaton County, and Ingham County.

# Brownfields 2015 Grant Fact Sheet

## Muskegon Brownfield Redevelopment Authority, MI

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grants

*\$200,000 for hazardous substances*  
*\$200,000 for petroleum*

EPA has selected the City of Muskegon Brownfield Redevelopment Authority for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to conduct eight Phase I and eight Phase II environmental site assessments. Grant funds also will be used for cleanup planning and community outreach activities. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination.

# Brownfields 2015 Grant Fact Sheet

## Hastings Economic Development and Redevelopment Authority, MN

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grants

\$400,000 for hazardous substances  
*\$200,000 for petroleum*

EPA has selected the Hastings Economic Development and Redevelopment Authority for three brownfields cleanup grants. Hazardous substances grant funds will be used to clean up the Riverfront Dump site and the Office and Warehouse site, both at 200 West 2nd Street. Petroleum grant funds will be used to clean up the Petroleum Release site at 200 West 2nd Street. The Riverfront Dump site was formerly used as a blacksmith shop, saw mill, and dumping area, and is contaminated with arsenic, trichloroethylene, and metals. The Office and Warehouse site was formerly used as a grain warehouse, painting shop, and manufacturing facility, and is contaminated with arsenic, chlorinated volatile organic compounds, and metals. The Petroleum Release site was formerly used as a lumber storage area, blacksmith shop, and manufacturing facility, and is contaminated with petroleum. Grant funds also will be used for community outreach activities at all three sites.

## City of Baton Rouge and Parish of East Baton Rouge, LA

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grants

*\$200,000 for hazardous substances*  
*\$200,000 for petroleum*

EPA has selected the City of Baton Rouge and Parish of East Baton Rouge for two brownfields assessment grants. Community-wide hazardous substances and petroleum grant funds will be used to maintain a site inventory, prioritize sites, and conduct approximately 20 Phase I and six Phase II environmental site assessments and two multi-site reviews to identify, prioritize, and characterize brownfields. Grant funds also will be used for developing cleanup plans and conducting community outreach activities.

# Brownfields 2015 Grant Fact Sheet

## Oklahoma City, OK

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grants

\$600,000 for hazardous substances

EPA has selected the City of Oklahoma City for three brownfields cleanup grants. Hazardous substances grant funds will be used to clean up MAPS 3 Northern Park Zone 1 at SW 3rd and 5th Streets, and Robinson and Hudson Avenues; MAPS 3 Northern Park Zone 2 at SW 5th and 7th Streets, and Harvey and Hudson Avenues; and MAPS 3 Northern Park Zone 3 at SW 5th and 7th Streets, and Robinson and Harvey Avenues. The Zone 1 site was formerly used for residential purposes and is contaminated with arsenic, volatile organic compounds, and metals. The Zone 2 site formerly housed offices and apartments, a restaurant, a health clinic, and automotive facilities, and is contaminated with polycyclic aromatic hydrocarbons, vinyl chloride, and other chlorinated solvents. The Zone 3 site was formerly used for a variety of industrial uses, including an auto repair shop, transit warehouse, and printing facility. It is contaminated with arsenic, volatile organic compounds, and heavy metals. Grant funds at all three sites also will be used for community involvement activities.

Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grant

*\$350,000 for hazardous substances*

*\$150,000 for petroleum*

EPA has selected the City of Kansas City for a brownfields assessment coalition grant. Community-wide hazardous substances grant funds will be used to conduct up to seven Phase I and six Phase II environmental site assessments, and up to five area-wide Phase I environmental site assessments in target neighborhoods. Community-wide petroleum grant funds will be used to conduct five Phase I and three Phase II environmental site assessments, and one area-wide Phase I environmental site assessment in a commercial corridor. Grant funds of both types also will be used to produce an inventory of an estimated 18,000 vacant properties and conduct community outreach. Coalition partners are Jackson County and the Land Clearance for Redevelopment Authority of Kansas City. This grant will focus on brownfields in Kansas City and throughout Jackson County.

A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grant

\$145,833 for hazardous substances

EPA has selected the Cut Bank Area Chamber of Commerce for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Public Drug Building at 4 West Main Street. The building, which was constructed in 1911, has housed many businesses during the last century, including a general store, bank, newspaper offices, a drug store, and a grocery store. It has been vacant, with the exception of a few small businesses, since 1994. The building is contaminated with metals, inorganic contaminants, PCBs, and mercury. Grant funds also will be used to conduct community outreach activities.

# Brownfields 2015 Grant Fact Sheet

## Solano County Water Agency, CA

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grant

\$467,378 for hazardous substances

EPA has selected the Solano County Water Agency for a brownfields assessment coalition grant. Hazardous substances grant funds will be used to update the existing brownfields inventory, prioritize sites, and conduct six Phase I and two Phase II environmental site assessments. Grant funds also will be used to evaluate institutional controls, conduct cleanup planning and area-wide planning, and for community outreach activities. Assessments will focus on abandoned mine sites in rural areas in Lake, Napa, Solano, and Yolo Counties. Coalition partners are the County of Yolo, Lake County Watershed Protection District, and Napa County Flood Control and Water Conservation District.

## Clark County, NV

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grant

\$300,125 for hazardous substances

\$199,875 for petroleum

EPA has selected Clark County for a brownfields assessment coalition grant. Community-wide hazardous substances grant funds will be used to conduct up to 40 Phase I and six Phase II environmental site assessments. Community-wide petroleum grant funds will be used to conduct up to 14 Phase I and four Phase II environmental site assessments. Grant funds of both types also will be used to update the county's site inventory, prioritize sites for assessment, update the ACRES database, develop cleanup plans, and conduct public involvement activities. Coalition partners are the City of Las Vegas and the Regional Transportation Commission of Southern Nevada.

## Coos Bay, OR

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grants

*\$200,000 for hazardous substances*

*\$200,000 for petroleum*

EPA has selected the City of Coos Bay for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to create an inventory of brownfield sites throughout the city and conduct eight Phase I and three Phase II environmental site assessments at high-priority sites. Grant funds also will be used to develop up to two area-wide plans and conduct community outreach activities. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination.

## Klamath Falls, OR

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Assessment Grant

\$300,000 for hazardous substances  
*\$200,000 for petroleum*

EPA has selected the City of Klamath Falls for a brownfields assessment coalition grant. Community-wide hazardous substances grant funds will be used to create an inventory of brownfield sites throughout the city and conduct up to 12 Phase I, four Phase II, and two supplemental Phase II environmental site assessments at high-priority sites. Grant funds also will be used to develop up to two area-wide plans and conduct community outreach activities. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination. Coalition partners are Klamath County and the South Central Oregon Economic Development District.

# Brownfields 2015 Grant Fact Sheet

## Northwest Zen Sangha, Inc., Portland, OR

### EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### Cleanup Grant

*\$200,000 for hazardous substances*

EPA has selected Northwest Zen Sangha, Inc., (also known as the Dharma Rain Zen Center) for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the H.G. LaVelle Landfill at 8500 NW Siskiyou in Portland. Prior to 1972, the site was used as a gravel quarry and farmland. From 1972 to 1982, the site was converted into a disposal area for construction debris from the construction of two major highways in the area. Aside from a brief tenure as a driving range, the site was then unused until Northwest Zen Sangha, Inc., purchased the site for conversion into its main temple building and native and cultivated greenspace. Soil contaminants include heavy metals and inorganic contaminants. Methane off-gassing from the site is also a concern. Grant funds also will be used for methane mitigation and stormwater management.
