

WHOLE EFFLUENT TOXICITY TRAINING VIDEO SERIES

Saltwater Series

EPA-833-C-09-001

Background

Whole effluent toxicity (WET) test and organism culturing videos are an important training tool for EPA Regions and States and others (i.e., laboratories). Due to the recognized ongoing need for WET training, USEPA revised the original videos to incorporate EPA's 2002 WET test methods technical updates and added new features to enhance the training benefits.

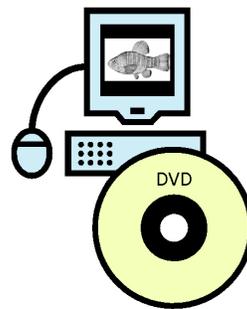

Enhancements to WET Saltwater Series

- ✓ Videos updated to be consistent with the 2002 USEPA WET test methods promulgated at 40 CFR Part 136
- ✓ Training materials transferred to **DVD** (training packet includes hard copies of the reports).
- ✓ Designed to promote training for individuals conducting, processing, or reviewing WET test data.
New training features added!

Saltwater Series Package

DVD Contains Training Videos for:

- *Mysid (Americamysis bahia)* Survival, Growth and Fecundity Toxicity Tests
- *Mysid (Americamysis bahia)* Culturing Mysids
- Sea Urchin Sperm Cell Toxicity Test (*Arbacia punctulata*)
- Red Algal (*Champia parvula*) Sexual Reproduction Toxicity Tests
- Sheepshead Minnow (*Cyprinodon variegatus*) & Inland Silverside (*Menidia beryllina*) Larval Survival and Growth Toxicity Tests

Distribution

The Office of Wastewater Management/Water Permits Division distributed the Whole Effluent Toxicity Test Method Training Videos – *Saltwater Series* packet to EPA Regions and States. Copies are available through the National Service Center for Environmental Publications (NSCEP) at (800)-490-9198 or nscep@bps-lmit.com.

Office of Wastewater Management
Water Permits Division, MC 4203M
