What is your age?

What is your ethnicity?

Survey Results and Analysis

**The survey was made up of 20 participants and 10 questions.*

- According to participants, “going green” to them means creating an all-natural environment by reducing the amount of toxins and non-recyclable goods.
- A sustainable community is a team of people that encourage and educate each other about using more recyclable goods to create a greener environment.
- The top three ways participants feel that sustainably is being promoted is through educating, recycling, and community gardens.
- Participants would like to see more recycling options and enforce citations against those who do litter in their communities.
- Every participant said they would like to learn more about greener recycling.
- More jobs can be created from environment issues or hazards by educating and training employees.
- Currently, participants are recycling, educating others about recycling, growing their own gardens, or using other energy efficient saving methods.

Green Workforce

- Green infrastructure technicians
- Solar panel installer
- Energy auditor
- Environmental hazards risk assessors
- Inspectors
- Farmers
- Horticulturists
- Green Builders
- Green microbusiness
- Environmental hazards technician
- Deconstruction
- Water Conservationist
- Recycle Worker
