## Worksheet 2. Rural watershed potential flow-related sediment increase.

(1)	(2)	(3)	(4)	(5)	(6)
Location	Sub- watershed acres	Acres cleared/harvested (include roads and clearcuts)	% Cleared/harvested of total subwatershed [(3)/(2) x 100]	Stream type most susceptible to change or "weak link"	Risk rating (Figure 73)
