Guidance for Federal Land Management in the Chesapeake Bay Watershed

Table of Contents

Nonpoint Source Pollution
Office of Wetlands, Oceans, and Watersheds
U.S. Environmental Protection Agency

Contents

Chapter 1. Introduction	1-1
1 Background	1-1
2 Purpose of This Document.....	1-2
3 Scope	1-3
4 Relationship to Previous Documents	1-5
5 Some Topics Receive New or Special Emphasis	1-6
6 Some Topics are Addressed by Reference to Existing Documents.....	1-7
7 References.....	1-7
Chapter 2. Agriculture	2-1
1 Purpose and Overview	2-3
1.1 Need for an Agricultural Chapter.....	2-3
1.1.1 Purpose.....	2-3
1.1.2 Intended Audience	2-4
1.1.3 Water Quality Significance of Agricultural Runoff in the Chesapeake Bay Watershed.....	2-4
1.1.4 Managing Agricultural Runoff to Reduce Nutrient and Sediment Loss	2-6
1.2 Overview of the Agriculture Chapter	2-7
1.2.1 Management Practices and Management Practice Systems.....	2-8
1.2.2 Implementation Measures for Agriculture in the Chesapeake Bay Watershed to Control Nonpoint Source Nutrient and Sediment Pollution	2-12
2 Implementation Measures and Practices for Source Control and Avoidance	2-16
2.1 Cropland Agriculture.....	2-16
2.1.1 Nutrient Imbalance in the Chesapeake Bay Watershed	2-16
2.1.2 Nutrient Management.....	2-18
2.1.3 Alternative Crops.....	2-26
2.1.4 Land Retirement.....	2-27
2.1.5 Commercial Fertilizer Use.....	2-29
2.2 Animal Agriculture	2-31
2.2.1 Animal Feed Management.....	2-31
2.2.2 Manure Storage and Transport.....	2-35
2.2.3 Livestock Exclusion from Streams	2-38

2.2.4	Wastewater and Animal Wastes	2-41
3	Implementation Measures and Practices for Cropland In-Field Control.....	2-61
3.1	Field Nutrient Management.....	2-61
3.2	Sediment and Erosion Control	2-83
3.3	Cover Crops	2-92
3.4	Pasture Land Management	2-102
3.5	Drainage System Design.....	2-109
4	Implementation Measures and Practices for Cropland Edge-of-Field Trapping and Treatment.....	2-113
4.1	Buffers and Minimum Setbacks.....	2-113
4.2	Soil Amendment	2-122
4.3	Wetlands	2-123
4.4	Drainage Water Management	2-128
4.5	Animal Agriculture	2-140
5	References.....	2-147
Appendix 1: USDA National Conservation Practice Standards (Practice Codes).....		2-181
Appendix 2: Agricultural Tools in Support of Section 502 Technical Guidance		2-223
I.	Software and Models.....	2-226
II.	Calculators, Spreadsheets, and Graphical Tools	2-233
III.	Compilations of Tools	2-235
IV.	Guidance and Other Technical Resources	2-236
Chapter 3. Urban and Suburban		3-1
1	Introduction	3-5
1.1	Need for Urban and Suburban Runoff Guidance Update.....	3-5
1.1.1	Purpose.....	3-5
1.1.2	Intended Audience	3-12
1.1.3	Water Quality Significance of Urban Runoff in the Chesapeake Bay Watershed.....	3-12
1.1.4	Managing Urban Runoff to Reduce Nutrients and Sediment Loss	3-18
1.2	Overview of the Urban Runoff Chapter	3-28
1.2.1	Management Practices and Management Practice Scales.....	3-29
1.2.2	Implementation Measures for Urban Runoff in the Chesapeake Bay Watershed to Control Nonpoint Source Nutrient and Sediment Pollution	3-31
2	Implementation Measures for Reducing Urban Runoff Volume	3-38
2.1	Maximize Infiltration, Evapotranspiration, and Harvest and Use	3-41

2.2	Implement Policies to Preserve and Restore Predevelopment Hydrology	3-42
2.3	Land Use Planning and Development Techniques to Direct Development.....	3-47
2.3.1	Impacts of Land Use on Hydrology and Geomorphology	3-47
2.3.2	Appropriate Designs as Part of a Comprehensive Watershed Plan	3-49
2.3.3	New Development and Redevelopment Strategies to Minimize Impacts of Development	3-53
2.4	Use Conservation Design and LID Techniques	3-57
2.5	Evaluate Planning Manuals and Guides	3-60
2.6	Evaluate Transportation-Related Standards	3-62
2.7	Minimize Directly Connected Impervious Areas in New Development, Redevelopment, and Retrofit.....	3-66
2.8	Implement Restoration	3-67
2.8.1	Native Landscapes and Urban Tree Canopy	3-67
2.8.2	Streams, Floodways, and Riparian Areas.....	3-69
2.9	Reduce Impacts of Existing Urban Areas.....	3-72
2.9.1	Retrofits.....	3-72
2.9.2	Redevelopment.....	3-74
2.10	Costs of Green Infrastructure/LID Practices.....	3-75
2.10.1	Key factors in evaluating costs of Green Infrastructure/LID.....	3-76
2.10.2	Types of Cost Analysis that Can Support Decision Making	3-82
2.10.3	Costs of Individual Practices	3-93
3	Implementation Measures for Reducing Pollutant Concentrations with Source Controls and Treatment	3-103
3.1	Source Control/Pollution Prevention	3-105
3.1.1	Identify Pollutants of Concern	3-105
3.1.2	Implement Pollution-Prevention and Source-Reduction Policies	3-112
3.1.3	Implement Source Control Practices.....	3-114
3.1.4	Public Outreach.....	3-117
3.1.5	Disconnecting Directly Connected Impervious Areas, Such as Downspout Disconnection.....	3-119
3.1.6	Inspections of Commercial/Industrial Facilities	3-119
3.2	Runoff Treatment	3-121
3.2.1	Identify Pollutants of Concern	3-121
3.2.2	Select Treatment Practices Appropriate to the POC.....	3-121
4	Urban Runoff Management for the Redevelopment Sector	3-131
4.1	Establish Stormwater Performance Standards for the Redevelopment Sector Consistent with the Goal of Restoring Predevelopment Hydrology.....	3-136
4.2	Stormwater Management Practices for Redevelopment.....	3-136
4.2.1	Practice Integration and Assessment Tools.....	3-140

4.3	Site Evaluations.....	3-142
4.4	Planning Documents and Specification Review	3-142
4.5	Demonstration Projects	3-143
4.6	Incentives for Early Adopters	3-143
4.7	Maximize Urban Forest Canopy.....	3-143
4.8	Amend Compacted Urban Soils	3-143
5	Turf Management.....	3-144
5.1	Background	3-147
5.2	Turf-Related Impacts.....	3-152
5.2.1	Fertilizer Applications	3-152
5.2.2	Irrigation	3-153
5.2.3	Energy and Air Quality	3-153
5.3	Turf Management Strategies, Practices, Resources and Examples	3-154
5.3.1	Turf Landscape Planning and Design	3-154
5.3.2	General Turfgrass Best Cultural Practices	3-155
5.3.3	Fertilizer Management	3-157
5.3.4	Pesticide Management.....	3-162
5.3.5	Mowing.....	3-163
5.3.6	Soil Amendments	3-164
5.3.7	Water Management.....	3-167
5.3.8	Grass Species Selection	3-169
5.3.9	Turf Assessments	3-171
5.3.10	Turf Restrictions	3-176
5.3.11	Incentives for Landscape Conversion	3-176
5.3.12	Environmentally Friendly Landscape Requirements.....	3-178
5.3.13	Xeriscaping Requirements	3-179
6	References.....	3-181
	Appendix 1: BMP Fact Sheets	3-209
1.1	Introduction.....	3-209
1.1.1	Performance Estimate Summaries for Infiltration Practices	3-210
1.2	Rainwater Harvesting	3-214
1.3	Green Roofs	3-220
1.4	Blue Roofs.....	3-226
1.5	Bioretention/Biofiltration	3-231
1.6	Infiltration	3-246
1.7	Soil Restoration	3-252
1.8	Reforestation and Urban Forestry	3-258

1.9 Street Sweeping	3-267
1.10 Constructed Wetlands	3-272
Appendix 2: Methods and Tools for Controlling Stormwater Runoff (Quantity and Quality).....	3-281
2.1 Methods and Manuals	3-281
2.2 Complex, LID-capable Models	3-283
2.3 Simpler Models.....	3-287
Appendix 3: Procedures and Case Studies from the Section 438 Guidance	3-291
Chapter 4. Forestry	4-1
1 Nonpoint Source Pollution and the Chesapeake Bay: Forests in Perspective.....	4-2
2 Forestry Practices for Water Quality Protection	4-8
2.1 Introduction.....	4-8
2.2 Preharvest Planning	4-11
2.3 Streamside Management Areas (SMAs).....	4-17
2.4 Forest Road Construction/Reconstruction and Forest Road Management.....	4-22
2.5 Timber Harvesting	4-29
2.6 Site Preparation.....	4-31
2.7 Fire Management	4-32
2.8 Revegetation of Disturbed Areas	4-34
2.9 Forest Chemical Management	4-35
2.10 Wetlands Forest Management	4-35
3 References.....	4-37
Chapter 5. Riparian Area Management	5-1
1 Introduction	5-3
1.1 What is a Riparian Area?	5-3
1.2 Why Riparian Buffers?	5-4
1.3 Who is This Chapter For?	5-5
1.4 What Does This Chapter Cover?	5-5
2 Benefits of Natural Riparian Areas	5-6
2.1 Water Quality Benefits.....	5-7
2.1.1 Filtering Sediment Pollution	5-7
2.1.2 Filtering Nutrient Pollution	5-7
2.1.3 Estimated Pollutant Removal	5-8
2.2 Floodplains and Streambanks.....	5-10
2.3 Maintaining Aquatic Habitat.....	5-11
2.4 Aesthetic Value	5-12

2.5 Forested versus Grassed Buffers: Increased Focus on the Buffer/Stream Interface	5-12
3 Restoring and Reestablishing Riparian Forest Buffers	5-13
3.1 Introduction.....	5-13
3.1.1 Organization of This Section	5-13
3.2 Selecting and Prioritizing Areas for Restoration.....	5-14
3.2.1 Stream Order	5-14
3.2.2 GIS Tools for Buffer Placement	5-16
3.3 Analyzing Existing Conditions and Identifying Potential Problems.....	5-17
3.3.1 Hydrology	5-17
3.3.2 Soils	5-17
3.3.3 Riparian Vegetation.....	5-18
3.3.4 Special Characteristics and Potential Problems Associated with a Previous Land Use	5-19
3.4 Buffer Width and Connectivity	5-21
3.5 Establishing Riparian Vegetation	5-24
3.5.1 Natural Regeneration	5-24
3.5.2 Planting Trees	5-25
3.5.3 Protecting Seedlings	5-26
3.5.4 Reinforcement Planting.....	5-28
3.6 Cost.....	5-28
4 Protection and Maintenance of Riparian Areas.....	5-29
4.1 Background	5-29
4.2 Long-Term Maintenance	5-30
4.2.1 Watershed-Scale Evaluation.....	5-30
4.2.2 Evaluation of Buffer Quality.....	5-31
4.2.3 Managing Plants	5-33
4.3 Protection	5-36
4.3.1 Acquisition.....	5-37
4.3.2 Zoning and Protective Ordinances.....	5-37
4.3.3 Water Quality Standards	5-40
4.3.4 Regulation and Enforcement.....	5-40
4.3.5 Education and Training	5-41
5 References.....	5-42
Chapter 6. Decentralized Wastewater Treatment Systems.....	6-1
1 Nitrogen-Reduction Implementation Measures	6-3
2 Introduction and Background	6-6

3	Nutrient-Reduction Processes for the Decentralized Wastewater Sector	6-9
3.1	Nitrogen.....	6-9
3.2	Nitrogen Pretreatment	6-9
3.3	Phosphorus	6-10
3.4	Permeable Reactive Barriers	6-11
3.5	System Configuration	6-12
4	Treatment Technologies and Costs	6-13
4.1	Conventional Systems.....	6-15
4.2	Land/Vegetative Treatment Systems	6-15
4.3	Suspended Growth Systems	6-15
4.4	Attached Growth Aerobic Systems.....	6-16
4.5	Add-On Anoxic Filters with a Carbon Source	6-17
4.6	Composting Toilet Systems.....	6-18
4.7	Cluster Treatment Systems	6-19
4.8	Soil Dispersal Systems.....	6-19
4.9	Effluent Reuse.....	6-20
5	Wastewater Planning and Treatment System Management	6-23
5.1	Public Education and Involvement	6-23
5.2	Planning	6-24
5.3	Performance Requirements	6-24
5.4	Recordkeeping, Inventories, and Reporting	6-25
5.5	Financial Assistance and Funding	6-25
5.6	Site Evaluation	6-25
5.7	System Design	6-26
5.8	Construction/Installation	6-26
5.9	Operation and Maintenance	6-27
5.10	Residuals Management.....	6-27
5.11	Training and Certification/Licensing	6-27
5.12	Inspections and Monitoring	6-28
5.13	Corrective Actions and Enforcement.....	6-28
6	References	6-30
Chapter 7. Hydromodification.....		7-1
1	Overview	7-3
1.1	Sources	7-4
1.1.1	Streambank and Shoreline Erosion	7-4
1.1.2	Channelization	7-4

1.1.3 Dams and In-Stream Structures.....	7-5
1.2 Contribution to Nonpoint Source Pollution in Chesapeake Bay	7-6
2 Chesapeake Bay Hydromodification Implementation Measures.....	7-8
2.1 General Principles and Goals.....	7-8
2.2 Implementation Measures	7-9
2.2.1 Implementation Measure H-1: Protect Streambanks and Shorelines from Erosion.....	7-10
2.2.2 Implementation Measure H-2: Control Upland Sources of Sediment and Nutrients at Dams	7-12
2.2.3 Implementation Measure H-3: Restore In-Stream and Riparian Habitat Function	7-14
2.2.4 Implementation Measure H-4: Reduce Pollutant Sources through Operational and Design Management	7-15
2.2.5 Implementation Measure H-5: Restore Stream and Shoreline Physical Characteristics	7-17
3 Chesapeake Bay Hydromodification Practices	7-20
3.1 Existing Practices	7-20
3.2 Updated and Next Generation Practices.....	7-21
3.2.1 Advanced Hydroelectric Turbines	7-22
3.2.2 Bank Shaping and Planting.....	7-23
3.2.3 Brush Mattressing	7-24
3.2.4 Cross Vanes.....	7-26
3.2.5 Establish and Protect Stream Buffers	7-28
3.2.6 Flow Augmentation	7-32
3.2.7 Joint Planting.....	7-35
3.2.8 Legacy Effects of Dams and Dam Removal	7-37
3.2.9 Live Crib Walls	7-41
3.2.10 Live Fascines	7-43
3.2.11 Live Staking.....	7-46
3.2.12 Log and Rock Check Dams	7-49
3.2.13 Marsh Creation and Restoration	7-51
3.2.14 Multi-Cell Culvert.....	7-53
3.2.15 Natural Channel Design and Restoration.....	7-55
3.2.16 Non-Eroding Roadways	7-60
3.2.17 Revetments	7-64
3.2.18 Riparian Improvements	7-66
3.2.19 Riprap.....	7-68
3.2.20 Rock and Log Vanes.....	7-69

3.2.21	Selective Withdrawal.....	7-71
3.2.22	Shoreline Sensitivity Assessment	7-72
3.2.23	Step Pools.....	7-73
3.2.24	Streambank Dewatering.....	7-75
3.2.25	Toe Protection.....	7-77
3.2.26	Turbine Operation	7-78
3.2.27	Turbine Venting.....	7-79
3.2.28	Vegetated Buffers	7-80
3.2.29	Vegetated Filter Strips.....	7-82
3.2.30	Vegetated Gabions	7-84
3.2.31	Vegetated Geogrids	7-85
3.2.32	Vegetated Reinforced Soil Slope (VRSS).....	7-86
3.2.33	Weirs	7-87
3.2.34	Wing Deflectors.....	7-89
4	References.....	7-92
