

	Recovery Potential Screening Steps Checklist	Notes
	<u>Step 1: Define the Project Scope</u>	
	<i>Define geographic area of interest</i>	
	<i>Define the targeted units</i>	
	<i>Identify screening purpose</i>	
	<i>Identify participants and roles</i>	
	<i>Identify desired findings and products</i>	
	<u>Step 2: Design the Project Approach</u>	
	<i>Establish IDs</i>	
	<i>Select and compile candidate indicators</i>	
	<i>Review and refine preferred indicators</i>	
	<u>Step 3: Prepare Your RPS Tool for Screening</u>	
	<i>Verify geographic area of project</i>	
	<i>Verify watershed scale(s) of analysis</i>	
	<i>Make sure watershed units match</i>	
	<i>Confirm all indicators are available</i>	
	<i>Define watershed subsets of interest</i>	
	<i>QA/QC your customized RPS tool</i>	
	<u>Step 4: Run a Screening and Review Results</u>	
	<i>Rename the Tool file for each screening</i>	
	<i>Choose watersheds</i>	
	<i>Select indicators</i>	
	<i>Assign indicator weights</i>	
	<i>Run the screening</i>	
	<i>Review screening results</i>	
	<i>Perform a QA/QC check</i>	
	<u>Step 5: Compare Your Watersheds</u>	
	<i>Rank-ordering</i>	
	<i>Bubble plotting</i>	
	<i>Mapping</i>	
	<u>Step 6: Refine Your Assessment</u>	
	<i>Revisit screening purpose and products</i>	
	<i>Consolidate screening runs</i>	
	<i>Match screening selections to specific actions</i>	
	<i>QA/QC your assessment results</i>	
	<u>Step 7: Use Your Screening Results (write in plans)</u>
