Students as Citizen Scientists

Water Quality Monitoring Program

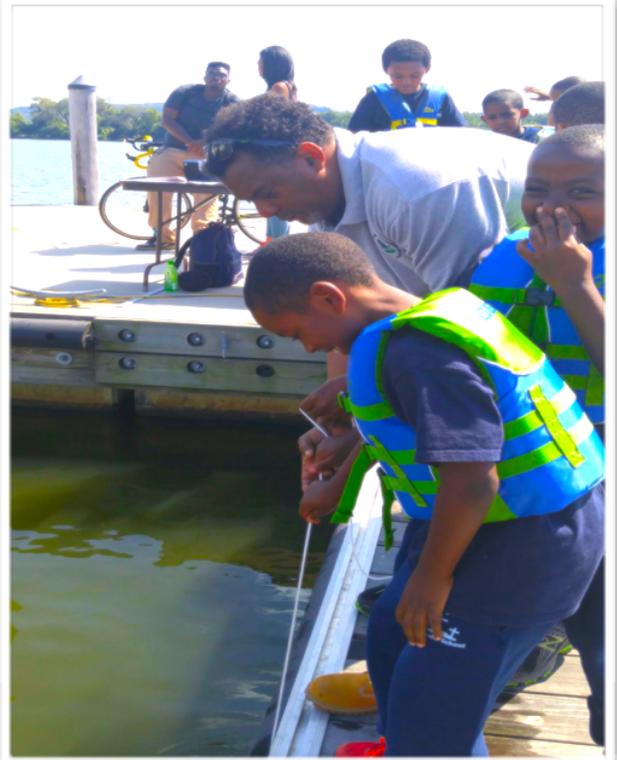

Student Workshop

Earth Conservation Corps (ECC) collaborates with U.S. federal environmental partners to present an interactive water pollution workshop, and hands-on scientific water sample collection and analysis. The program offers students an intimate look into how everyday pollution affects our local environment, and features simple solutions to curbing complicated pollution problems.

ECC Curriculum Overview

- ▶ The Science of Water
- ▶ Introduction to the Clean Water Act
- ▶ Anacostia Watershed Overview
- ▶ How Individuals Can Help With Pollution
- ▶ Hands-on Water Collection & Water Quality Testing
- ▶ National FieldScope Water Data Entry
