

Operating Permits Burden Reductions

Without the Tailoring Rule

6 million sources would have needed operating permits

78% of total national stationary source GHG emissions would be covered

\$21 billion annual cost to permitting authorities

With the Tailoring Rule

Only **15,550** sources will need operating permits

15,000 sources **already** have operating permits

Only **550 more** sources will be subject to operating permitting for GHGs alone – but not until more than a year from now.

67% of total national stationary source GHG emissions would be covered

\$69 million annual cost to permitting authorities

PSD Permitting Burden Reductions

Without the Tailoring Rule

82,000 permitting actions per year would need to address GHGs

78% of total national stationary source GHG emissions are associated with facilities where actions could have occurred

\$1.5 billion annual cost to permitting authorities

With the Tailoring Rule

Only 1,600 permitting actions per year will need to address GHG

700 permitting actions that would **already** occur will need to address GHGs

900 more permitting actions will occur to address GHGs - but not until more than a year from now

67% of total national stationary source GHG emissions are associated with facilities where actions could occur

\$36 million annual cost to permitting authorities
