-----

Note that no spreadsheets are included for the following articles:

- Marty et al. (2003), which contained no data summaries from pubertal assays.
- Trentacoste et al. (2001) and Yu et al. (2004), which contained no reported data summaries within text or tables, only in graphs.

In just a few instances, [Battelle has] made minor tweaks to a column heading to be more specific about what the article actually reports for a given organ if [Battelle thought] it may differ from the precise statement of the column heading. For example, if the article says "uterus with fluid" rather than "uterus, wet", then [Battelle] made that change to the heading.
