

STATE OF OKLAHOMA
OFFICE OF THE
SECRETARY OF ENVIRONMENT

February 14, 2002

Gregg A. Cooke, Regional Administrator (6RA)
U.S. Environmental Protection Agency – Region VI
1445 Ross Avenue, Suite 1200
Dallas, TX 75202-2733

Subject: Revisions to Oklahoma Air Quality Control Implementation Plan

Dear Mr. Cooke:

In his letter dated October 5, 1999, Governor Frank Keating appointed me as his designee for the purpose of submitting documents to the U.S. Environmental Protection Agency for approval and incorporation into the State Implementation Plan ("SIP") for Oklahoma.

The last revision to Oklahoma's SIP was submitted on May 16, 1994 and included the entirely recodified OAC 252:100 Air Pollution Control rules. It was not our intent to include all of these rules in our SIP, so Eddie Terrill, Director of DEQ's Air Quality Division, submitted a letter dated October 4, 1999 requesting certain rules be withdrawn from inclusion in the SIP. The EPA published in the Federal Register on August 2, 2000 its approval of this revision, excluding the withdrawn sections. However, it has come to my attention that while the withdrawn sections were not included in the SIP, they were not formerly withdrawn because the request did not come from Governor Keating or his designee. As designee, I request withdrawal of the following rules from the 1994 SIP submittal: OAC 252:100-7 (Permits), 8 (Operating Permits (Part 70)), 11 (Alternative Emissions Reductions Permits), 21 (Particulate Matter Emissions from Wood-Waste Burning Equipment), 41 (Control of Emission of Hazardous and Toxic Air Contaminants) and Appendix D (Particulate Matter Emission Limits for Wood-Waste Burning Equipment).

In addition, we submit for your review and approval under Section 110 of the federal Clean Air Act and 40 CFR Part 51 revisions to the Oklahoma Air Quality Control Implementation Plan and the associated evidence as required by 40 CFR 51, Appendix V, 2.1. All changes and additions to Oklahoma's plan were accomplished by adopting new or amended permanent rules of the Department of Environmental Quality. These rules were promulgated in substantial compliance with the Oklahoma's Administrative Procedures Act and published in the *Oklahoma Register*, the official state publication for

rule making actions. We have included five copies of the submittal as required by 40 CFR 51.103(a).

If you have questions, please contact Eddie Terrill, Director, Air Quality Division, Department of Environmental Quality at (405) 702-4154.

Sincerely,

A handwritten signature in black ink, appearing to read "Brian C. Griffin". The signature is fluid and cursive, with a large initial "B" and "G".

Brian C. Griffin
Secretary of Environment

Submitted to EPA
January 2002

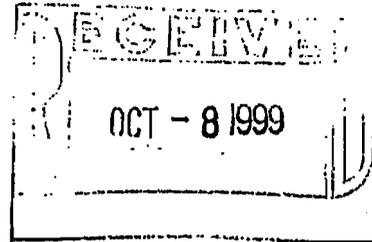

FOREWORD

OKLAHOMA STATE IMPLEMENTATION PLAN

SUBJECT: Oklahoma's 1994 SIP Submittal – Formal Withdrawal of Specific Rules

There is one remaining issue that we would like to resolve regarding Oklahoma's previous SIP submittal. The last revisions to Oklahoma's SIP were submitted on May 16, 1994 and included the entirely recodified OAC 252:100 Air Pollution Control rules. It was not our intent that all these rules be included in our SIP so Eddie Terrill, Director of DEQ's Air Quality Division, submitted a letter dated October 4, 1999, requesting certain rules be withdrawn from inclusion in the SIP. The EPA published in the Federal Register on August 2, 2000, its approval of these revisions, excluding the withdrawn sections. However, it has come to the DEQ's attention that while the withdrawn sections were not included in the SIP, they were not formerly withdrawn because the request did not come from Governor Keating or his designee. The cover letter for our new SIP submittal is signed by Brian Griffin, Secretary of the Environment and Governor Keating's designee, and includes a request for withdrawal of the following portions of the 1994 submittal:

- OAC 252:100-7 (Permits),
- OAC 252:100-8 (Operating Permits (Part 70)),
- OAC 252:100-11 (Alternative Emissions Reductions Permits),
- OAC 252:100-21 (Particulate Matter Emissions from Wood-Waste Burning Equipment),
- OAC 252:100-41 (Control of Emission of Hazardous and Toxic Air Contaminants), and
- OAC 252:100, Appendix D (Particulate Matter Emission Limits for Wood-Waste Burning Equipment).

Frank Keating
Governor

October 5, 1999

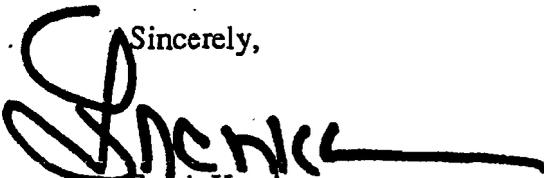

Gregg A. Cooke, Regional Administrator

Re: Appointing Brian C. Griffin as designee
for State Implementation Plan purposes

Dear Mr. Cooke:

As Governor of the State of Oklahoma, I hereby appoint Secretary of Environment, Brian C. Griffin, as my designee for the purpose of submitting documents to the EPA for approval and incorporation into the State Implementation Plan for Oklahoma pursuant to section 110 of the federal Clean Air Act and EPA's implementing regulations in 40 CFR Part 51. Secretary Griffin will be my designee until you receive further notification in writing from this office.

Sincerely,

Frank Keating
Governor

Mr. Mark S. Coleman, Executive Director, Department of Environmental Quality
Mr. Eddie Terrill, Director, DEQ Air Quality Division

INTRODUCTION

Oklahoma State Implementation Plan

SUBJECT: 2002 Revisions to Oklahoma State Implementation Plan (SIP)

Background. The DEQ implements most of the control measures and strategies in its portion of the SIP by promulgating permanent agency rules. The Oklahoma Administrative Procedures Act and state rules require that all notices of public hearings, agency rulemaking and rule adoption must be published in the *Oklahoma Register*, the official state publication. There are at least 7 major steps a rule must undergo to become a permanent rule.

1. The DEQ publishes notice of rulemaking intent in the Oklahoma Register at least 30 days before the Air Quality Council (AQC) hearing. The public comment period begins.
2. The Air Quality Council conducts the public hearing and votes to recommend that the Environmental Quality Board (EQB) adopt the rule. The public comment period is closed until the EQB hearing.
3. Notice of the EQB hearing is published in the Oklahoma Register at least 30 days before the hearing. This is usually included in the notice for the AQC hearing.
4. The EQB conducts the public hearing and votes to adopt the rule. Comments are accepted during the EQB hearing.
5. The Governor has 45 days to approve or disapprove the rule.
6. After the legislative session begins, the Oklahoma Legislature has 45 days to disapprove the rule and approves the rule through taking no action. (Note: The Oklahoma Legislature meets from February through May of each year.)
7. Notice of permanent rule adoption, including the preamble and rule, is published in the *Oklahoma Register*. The rule becomes effective 10 days after publication or at some specified date after those 10 days.

Rules affecting state air programs have undergone many changes in the last 7 years as the result of an agency, and later, statewide, initiative to simplify and clarify rules. Since we had not received a response to our 1994 submittal, we decided to reserve any additional revisions until EPA had approved or disapproved that submittal so EPA would not be attempting to review agency rules that were changing. In the interim, EPA was provided copies of any proposed rule changes that are included in the SIP revisions and had opportunities to comment before the rules were promulgated. We kept the groups in the EPA Regional office that are responsible for reviewing SIP revisions apprised of any proposed rule changes that could affect Oklahoma's SIP and actively solicited their comments.

All the proposed SIP revisions were implemented by promulgating new or amended permanent agency rules. These rules were considered by the Air Quality Council and the Environmental Quality Board and approved by the governor and state legislature. The public was provided opportunities to comment and participate in any of the public hearings held by the Air Quality Council and Environmental Quality Board. With the exception of the statement of legal

authority and the section on the Oklahoma administrative procedures, the submittal includes only documents from DEQ's permanent rule making records or summaries of these records.

Formal letter of submittal. In his letter dated October 5, 1999, Governor Keating appointed Brian Griffin, Oklahoma Secretary of the Environment, as his designee for the purpose of submitting documents to the U.S. Environmental Protection Agency (EPA) for the approval and incorporation into the State Implementation Plan (SIP). One original copy of the cover letter and 4 copies are provided. We enclosed copies of the original letter from Governor Keating designating Secretary Griffin.

Document organization. The body of the document contains 8,064 pages, excluding the table of contents and title page. Only odd pages are numbered. The numbers are in the lower right-hand corner of each page. The pages have been three-hole punched for easy insertion into binders. We have provided five copies of the entire SIP which have been packaged in labeled bankers boxes for easy transport. One complete set of the SIP revisions is contained in two boxes and will be labeled as Set 1, Box 1; Set 1 Box 2; etc.

Each complete document is divided into 3 major sections.

- **Section 1** contains evidence of legal authority, information on DEQ's rulemaking processes including the Oklahoma Administrative Procedures Act (APA), and the letter certifying that the public hearings were held in accordance with information in the public notices and the Oklahoma APA.
- **Section 2** contains copies of the official rules. The first complete Oklahoma Administrative Code (OAC) was published in 1996. The Office of Administrative Rules, the state office responsible for preparing the OAC, published supplements of rule changes in 1997, 1998 and 1999. Copies of the official rules and supplements provided to the DEQ by the OAR are in this section. The OAC does not include the dates of adoption or effective dates. These dates are available in Section 3 of this submittal. The OAR did not publish supplements in 2000 and 2001. The OAR provided copies of pages from the *Oklahoma Register* in lieu of the supplements for 2000 and 2001. Copies of pages of the official notices of permanent rule adoption published in the *Oklahoma Register* for 2000 and 2001 are included. The adoption and effective dates for rule changes during this time period will be found in the preambles published in the *Oklahoma Register*.
- **Section 3** contains the actual SIP revisions, the associated public notices of rulemaking intent and permanent adoption, hearing records, and compilations of public comments and our responses.

Section 3 is divided into 20 parts labeled according to rule. Each part contains the:

- **SIP revisions portion**, which is the actual text of the revisions to be made to the SIP.
- **Oklahoma Register portion**, which includes copies of the official notices of rulemaking intent and permanent adoption published in the *Oklahoma Register*.

- **Air Quality Council portion**, which includes agendas, text of the proposed rules, attendance records, meeting minutes, and associated information.
- **Environmental Quality Board portion**, which includes an agenda, the text of the proposed rules, and attendance records.
- **Additional comments portion**, which includes the hearing transcripts, written comments received by DEQ, and summaries of public comments and DEQ's responses. The summary of comments and responses is part of the Executive Summary document provided to the EQB.

SIP Revisions portion. There is only one version of the actual rule text submitted for inclusion in the SIP, except for two rule subchapters - OAC 252:100-5 and OAC 252:100-7. In the case of these two subchapters, the rules underwent more than one major rulemaking process so intermediate versions of these rules are included. Appendices to Chapter 100 rules are grouped with the rules that reference them.

We marked rule text for exclusion from the SIP revisions. The citation for the location of affected sections and the page number(s) where they are found is as follows:

- | | |
|--|--|
| 1. OAC 252:4-7-13 (c), (f)(1), (f)(2) and (f)(3) | pg. 707 |
| 2. OAC 252:4-7-32(c) | pg. 710 |
| 3. OAC 252:4-9-54 | pg. 718 |
| 4. OAC 252:100-5-1.1 | pg. 1721 |
| 5. OAC 252:100-7-1.1 & -2(b)(4) | pg. 3399, 3865, 3867 & 4059 |
| 6. OAC 252:100-7, Part 2 | pg. 3401, 3403, 3405, 3407, 3409,
3867 & 3869 |
| 7. OAC 252:100-7-60(b)(2) | pg. 3875 |
| 8. Appendix H | pg. 3465 |
| 9. OAC 252:100-8, Part 3 | pg. 4112 |
| 10. OAC 252:100-8-2 | pg. 4114 |
| 11. Appendix I | pg. 4159 |
| 12. Appendix J | pg. 4163 & 4164 |
| 13. OAC 252:100-9-2 | pg. 5045 |
| 14. OAC 252:100-23-3(b)(2) | pg. 5855 |
| 15. OAC 252:100-24-3(b)(2) | pg. 5975 |

Special rules worth mentioning.

OAC 252:4. Rules of Practice and Procedures and Appendices A, B, C & D

This Chapter sets out DEQ's administrative procedures for permit issuance, public notice, and administrative proceeding. The agency originally promulgated these procedures as two separate chapters – OAC 252:2 and 3. The provisions of the original chapters were combined to form the new Chapter 4, and OAC 252:2 and 3 were revoked.

OAC 252:100-8. Permits for Part 70 Sources and Appendices I & J

We are aware that this submission includes rules that are also part of our approved Title V program. Subchapter 8 contains the provisions for our new source review and construction permit programs for Part 70 sources. It would be difficult to separate these rules into Title V and SIP rules without omitting essential requirements, so we have not done so.

OAC 252:100-19 & 27 Control of Emissions of Particulate Matter and Appendices C & D

The current version of Subchapter 19 resulted from combining Subchapter 19, 21 and 27 into one Subchapter. While Subchapter 27 is part of our approved SIP, Subchapter 21 was never added to our SIP.

OAC 252:100-24 Particulate Matter Emissions from Grain, Feed and Seed Operation and Appendix L

Additional background information on rule development is provided in the Additional Comments portion.

Future submissions. The DEQ has permanent rules pending that should become effective by June 2002. We intend to submit another SIP revision this fall and annually thereafter, as necessary. The Fall 2002 submission will only include the rules adopted during the last year.

If you have questions regarding our submission or future submissions, please contact me, Cheryl Bradley or Pat Sullivan. Here are the telephone numbers and e-mail addresses to do so.

MARK COLEMAN
Executive Director

OKLAHOMA DEPARTMENT OF ENVIRONMENTAL QUALITY

FRANK KEATING
Governor

March 4, 2002

Mr. Gregg Cooke, Regional Administrator (6RA)
U. S. Environmental Protection Agency, Region VI
1445 Ross Avenue, Suite 1200
Dallas, TX 75202-2733

Subject: Revisions to the Oklahoma Air Quality Control Implementation Plan

Dear Mr. Cooke:

The proposed revisions to the Oklahoma Air Quality Control Implementation Plan were all promulgated as new or revised Department of Environmental Quality (DEQ) rules. We certify that these rules were adopted in substantial compliance with the requirements of the Oklahoma Administrative Procedures Act, 75 O.S. §§ 250.1 through 323 and 40 CFR § 51.102 and submit this certification to satisfy the evidence requirements for state implementation plans in 40 CFR 51, Appendix V, 2.1(f). The rules to be added or amended in Oklahoma's plan and the dates of the public rulemaking hearings held by the DEQ's Air Quality Council and Environmental Quality Board are listed in the tables below:

All notices of DEQ's intent to adopt new or amended rules were published in the *Oklahoma Register*. The *Oklahoma Register* is semi-monthly publication prescribed by the Oklahoma Administrative Procedures Act in which all rulemaking actions and the associated documents must be published. Notices of rulemaking intent include the date, time and location of public hearings and information on how the public may submit written or oral comments on proposed rules. The public comment period for all Air Quality Council meetings begins on the date of publication of the notice and ends on the date of the public hearing. The Environmental Quality Board (EQB) accepts comments on the date of the EQB hearing.

If you have questions or require additional information, please contact Scott Thomas, Environmental Programs Manager, at (405) 702-4100.

Sincerely,

Eddie Terrill, Director
Air Quality Division

OAC 252:4 SIP Revision

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 4. RULES OF PRACTICE AND PROCEDURE
SUBCHAPTER 1. GENERAL PROVISIONS

252:4-1-1. Purpose and authority

- (a) **Purpose.** This Chapter describes the practices and procedures of the Environmental Quality Board, Advisory Councils, and the Department of Environmental Quality.
- (b) **Authority.** This Chapter is authorized by the Administrative Procedures Act, 75 O.S. § 302, and the Environmental Quality Code, 27A O.S. § 2-2-101.

252:4-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Administratively complete" means an application that contains the information specified in the application form and rules in sufficient detail to allow the DEQ to begin technical review.

"Administrative hearing" is defined at 27A O.S. § 2-1-102 and is synonymous with "individual proceeding" as that term is defined in the Administrative Procedures Act, 75 O.S. § 250.1 et seq.

"Administrative Law Judge" is synonymous with "hearing examiner" as that term is defined in the Administrative Procedures Act.

"Advisory Councils or Council" means any of the following Councils: the Air Quality Advisory Council, the Hazardous Waste Management Advisory Council, the Laboratory Services Advisory Council, the Radiation Management Advisory Council, the Solid Waste Management Advisory Council, the Water Quality Management Advisory Council, and the Waterworks and Wastewater Works Operator Certification Advisory Council.

"APA" means the Oklahoma Administrative Procedures Act, 75 O.S. § 250.1 et seq.

"Application" means "a document or set of documents, filed with the [DEQ], for the purpose of receiving a permit or the modification, amendment or renewal thereof from the [DEQ]... any subsequent additions, revisions or modifications submitted to the [DEQ] which supplement, correct or amend a pending application." [27A O.S. § 2-14-103(1)]

"Board" means the Environmental Quality Board.

"Code" means the Oklahoma Environmental Quality Code, 27A O.S. § 2-1-101 et seq.

"Complaint" means any written or oral information submitted to DEQ alleging site-specific environmental pollution except information gained from facility inspections, or self-reported incidents.

"Department or DEQ" means the Department of Environmental Quality.

"Enforcement action" means:

- (A) a written communication from the DEQ to an alleged violator that identifies the alleged violations and directs or orders that the violations be corrected and/or their effect remedied;
- (B) an administrative action to revoke or suspend a permit or license;
- (C) a consent order or proposed consent order;
- (D) a civil petition, a complaint in municipal court, or a complaint in federal district court;
- (E) a referral by the DEQ to the Oklahoma Attorney General's office, a state District Attorney's office, a U.S. Attorney's office, or a state or federal law enforcement agency for investigation.

"Executive Director" means the Executive Director of the Department of Environmental

Quality.

"False complaint" means any written or oral information submitted to DEQ alleging site-specific environmental pollution by a person who knowingly and willfully gives false information or misrepresents material information.

"Individual proceeding" is defined in the APA [75 O.S. § 250.3(7)]. It includes an administrative evidentiary hearing to resolve issues of law or fact between parties, resulting in an order.

"Mediation" means a voluntary negotiating process in which parties to a dispute agree to use a mediator to assist them in jointly exploring and settling their differences, with a goal of resolving their differences by a formal agreement created by the parties.

"Notice of deficiencies" means a written notice to an applicant, describing with reasonable specificity the deficiencies in a permit application and requesting supplemental information.

"Off-site", as used in hazardous waste, solid waste and Underground Injection Control (UIC) tier classifications, means a facility which receives waste from various sources for treatment, storage, processing, or disposal.

"On-site", as used in hazardous waste, solid waste and UIC tier classifications, means a facility owned and operated by an industry for the treatment, storage, processing, or disposal of its own waste exclusively.

"Program" means a regulatory section or division of the DEQ.

"Respondent" means a person or legal entity against whom relief is sought.

"Submittal" means a document or group of documents provided as part of an application.

"Supplement" means a response to a request for additional information following completeness and technical reviews, and information submitted voluntarily by the applicant.

"Technical review" means the evaluation of an application for compliance with applicable program rules.

252:4-1-3. Organization

(a) Environmental Quality Board. The Environmental Quality Board consists of thirteen (13) members, appointed by the Governor with the advice and consent of the Senate, selected from the environmental profession, general industry, hazardous waste industry, solid waste industry, water usage, petroleum industries, agriculture industries, conservation districts, local city or town governments, rural water districts, and statewide nonprofit environmental organizations. (See further 27A O.S. § 22-201.)

(b) Advisory Councils. There are seven advisory councils, each consisting of nine (9) members appointed by the Speaker of the House of Representatives, the President Pro Tempore of the Senate or the Governor. (See further 27A O.S. § 22-201 and 59 O.S. § 1101 et seq.)

(c) DEQ. The DEQ consists of the following divisions: Administrative Services, Air Quality, Land Protection, Water Quality, Environmental Complaints and Local Services, Customer Services and the State Environmental Laboratory.

252:4-1-4. Office location and hours; communications

(a) Office location and hours. The principal office of the DEQ is 707 N. Robinson, Oklahoma City, Oklahoma 73102. The mailing address is P.O. Box 1677, Oklahoma City, Oklahoma 73101-1677. Office hours are from 8:00 a.m. to 4:30 p.m., Monday through Friday except state holidays.

(b) Communications. Unless a person is working with a particular person or departmental area, written communication to the DEQ shall be addressed to the Executive Director.

- (1) Board. Communications to the Board may be made through the Executive Director.
- (2) Council. Communications to a Council may be made through the Division Director of the program with which the Council works.

252:4-1-5. Availability of a record

(a) Availability. Records of the Board, Advisory Councils, and DEQ, not otherwise confidential or privileged from disclosure by law, shall be available to the public for inspection and copying at the DEQ's principal office during normal business hours. Information, data or materials required to be submitted to the DEQ in a permit application process shall be made available to the public in accordance with the Oklahoma Uniform Environmental Permitting Act (27A O.S. § 24-101 et seq.) and the rules in this Chapter. The DEQ may take reasonable precautions in order to ensure the safety and integrity of records under its care.

(b) Removal. A record may be removed from the DEQ's offices or storage areas only with permission of the record's custodian.

(c) Reproduction.

(1) By DEQ. The DEQ may limit the number of copies made and the time and personnel available for reproduction of records requested by a member of the public.

(2) Commercial reproduction. With advance notice to the DEQ, a person may arrange for the pick-up, reproduction and return of records by a commercial copying service at his/her own expense.

(3) Other. With prior DEQ approval, a person may bring in and use his/her own copy machine.

(d) Confidentiality. Any person asserting a claim of confidentiality for any document submitted to the Board, Council or DEQ must substantiate the claim upon submission. The DEQ will make a determination on the claim and notify the person asserting the claim within a reasonable time. Each program may have more specific requirements, as required by state law or federal rule. [See 27A O.S. § 25-105(18) and 40 CFR § 2 Subpart B, particularly § 2.301 (Clean Air Act) § 2.302 (Clean Water Act), § 2.304 (Safe Drinking Water Act) § 2.305 (Solid Waste Disposal Act), as amended by the Resource Conservation and Recovery Act), and § 2.310 (Comprehensive Environmental Response, Compensation, and Liability Act, as amended by Superfund Amendments and Reauthorization Act)].

(e) Certification. Copies of official records of the Board, Advisory Councils or DEQ may be certified by the Executive Director or his/her designees.

(f) Charge. The DEQ's administrative fee schedule applies to in-house copying or reproduction of records for or by members of the public.

252:4-1-6. Administrative fees

(a) Photocopying. The fee for copying letter or legal sized paper is \$0.25 per page.

(b) Certified copy. The fee for a certified copy of a document is \$1.00 per document.

(c) Search fee. When the request is solely for commercial purpose or clearly would cause excessive disruption of the DEQ's essential functions, the document search fee is as follows:

(1) 0 - 15 minutes, no charge;

(2) 16 - 30 minutes, \$5.00;

(3) every subsequent 30-minute increment or portion thereof, \$5.00.

252:4-1-7. Fee credits for regulatory fees

(a) The Executive Director may authorize Divisions of the DEQ which have programs that collect recurring fees to apply a credit towards certain future invoices for those fees. The credit must be applied only within the program from which the carryover fees are derived. Only the amount that is projected to exceed three months of funding beyond the upcoming budget year for that program can be credited. A summary of any credit applied shall be reported to the Environmental Quality Board. For a credit to be applied:

- (1) there must be a projected balance in the fee account carried over from the previous year;
- (2) the credit must be distributable pro rata among the fee payers;
- (3) the credit must be large enough to justify its administrative cost; and
- (4) the Division must be unaware of a longer-range need, such as match for a superfund clean-up project.

(b) The DEQ shall explain on the invoices that a carryover exists and that an identified one-time credit is being applied.

252:4-1-8. Board and Councils

(a) **Officers.** A chair of the Board shall not serve as chair for more than three (3) consecutive years. Officers of a Council may succeed themselves as officers at the discretion of a Council.

(b) **Committees.** Ad hoc committees may be appointed to assist the Board or a Council for any lawful purpose.

252:4-1-9. Severability

The provisions of OAC 252 are severable, and if any part or provision hereof shall be held void, the decision of the court so holding shall not affect or impair any of the remaining parts or provisions of OAC 252.

SUBCHAPTER 3. MEETINGS AND PUBLIC FORUMS

252:4-3-1. Meetings

(a) **Board.** The Board shall hold quarterly meetings and may hold other meetings as it deems necessary.

(b) **Council.** Each council shall hold at least one regularly scheduled meeting per calendar year, except the Air Quality Advisory Council which shall hold at least two regularly scheduled meetings.

(c) **Location.** The Board or a Council may meet at any location convenient and open to the public in this state to encourage public participation in the environmental rulemaking process.

(d) **Agenda.** The proposed agenda of a meeting may be developed with the advice of members and modified by the Chair. Time permitting, a copy of the proposed agenda shall be sent to each Board or Council member at least ten (10) calendar days before a regularly scheduled meeting. The Board or Council may, by majority vote during a meeting, continue an agenda item to or specify a new agenda item for another meeting or forum.

(e) **Public comment.** The agenda shall reserve time during the meeting for public comment on agenda action items. The DEQ shall provide sign-in sheets at each meeting for persons who wish to present written or oral comment on an agenda action item. The Chair reserves the right to rearrange the agenda items during the meeting to accommodate public comment. The Chair may set reasonable time limits on oral comment and may accept written submittals on behalf of the Council or the Board.

252:4-3-2. Public forums

- (a) Generally.** A public forum for receiving public comments and dissemination of information may be held in conjunction with a Council or Board meeting but shall be a separate meeting.
- (b) Location.** Each forum may be held at a different location in the state.
- (c) Format.** The forum shall be conducted by the Chair or the Chair's designee.
- (d) Public comment.** The DEQ shall provide sign-in sheets at each meeting for persons who wish to present written or oral comments. The Chair may set reasonable time limits on oral comment and may accept written submittals on behalf of the Council or the Board.

SUBCHAPTER 5. RULEMAKING

252:4-5-1. Adoption and revocation

The Board has the authority to adopt new or amended emergency or permanent rules and revoke existing rules within its jurisdiction.

252:4-5-2. Rule development

- (a) DEQ.** The DEQ may begin the development of rules at the request of or on behalf of the Board or a Council or upon petition by an interested person. The DEQ may appoint committees to assist in the development of rules.
- (b) Public.** Any person may informally discuss proposed rules with the DEQ or may suggest proposed rules during a council meeting. Also, any person may file a petition with the DEQ formally requesting the adoption, amendment, or revocation of one or more rules.

252:4-5-3. Petitions for Rulemaking

- (a) Form and content of petition.** Rulemaking petitions shall be in writing and filed with the DEQ. The petition shall include the information and follow the format in Appendix A of this Chapter. The DEQ shall provide a copy of the filed petition to the Board.
- (b) Referral.** The DEQ shall refer a filed petition to the appropriate Council or, if none, to the appropriate DEQ program for review. A petition referred to a Council shall be set on the agenda of the next available Council meeting for action.
- (c) Status.** The DEQ shall advise the Board of the status of rulemaking petitions.

252:4-5-4. Notice of permanent rulemaking

The DEQ shall submit notices of proposed permanent rulemaking to the Office of Administrative Rules for publication in accordance with the APA and the Administrative Rules on Rulemaking (OAC 655:10).

252:4-5-5. Rulemaking hearings

- (a) Hearing.** Hearings before a Council or the Board shall be conducted by the Chair or the Chair's designee.
- (b) Public comments.** The public may make comments orally at the hearing or submit comments in writing by the end of the specified public comment period, or both. Persons wishing to comment orally may be required to fill out a written request form. The person conducting the hearing may set reasonable time limits on oral presentations, may exclude repetitive or irrelevant comments and

may require that oral presentations be submitted in writing.

(c) **Public comment period.** The comment period shall end at the conclusion of the hearing if the agenda indicates that the Council intends to make a final recommendation on the rules or that the Board intends to take a final action on the rules. Otherwise, the comment period may be extended by the person conducting such hearing for no more than thirty (30) calendar days after the hearing or until the close of the hearing, if continued.

(d) **Summary of comments.** The DEQ shall maintain a summary of comments received on proposed rules during written comment periods. The summary shall be provided to the Council or Board prior to taking final action on the rule.

(e) **Hearing continuation.** A Council or the Board may continue the hearing by majority vote. Notice of the continuation shall be announced at the hearing and shall not require publication.

252:4-5-6. Council actions

(a) **Contents of recommendation.** On behalf of a Council, the DEQ shall prepare a recommendation submittal on proposed permanent rules, which shall include the text of the proposed rules, a summary of pertinent minutes of Council meetings, and a summary of comments received. Recommendations may also be made for rules with a finding of emergency. The Council may recommend that any proposed rule be adopted by the Board on a permanent and emergency basis simultaneously.

(b) **On remand.** The Council shall reconsider any rulemaking recommendation remanded by the Board.

252:4-5-7. Presentation to Board

(a) **Compliance with APA.** When proposed rules are presented to the Board, the DEQ shall indicate the rulemaking procedures which have been followed.

(b) **Board packets.** The DEQ shall prepare a board packet consisting of the text of proposed rules, an executive summary, a rule impact statement, an economic impact/environmental benefit statement (if applicable), a summary of comments received on proposed rules at rulemaking hearings and during written comment periods, the Council's recommendations and a summary of pertinent Council meeting minutes (if applicable). The Board packets shall be sent to members with the proposed agenda of the Board meeting at which rules are to be considered. Board packets for emergency rules may vary.

252:4-5-8. Board actions

(a) **Referral.** The Board may refer any rulemaking matter to the DEQ or an appropriate Council for review, comment or recommendation.

(b) **Proposed permanent rules.** The Board will not consider proposed permanent rules for adoption without the appropriate Council's recommendation except those rules for which no council has jurisdiction.

(c) **Proposed emergency rules.** The Board may adopt emergency rules without the advice of a Council in accordance with 27A O.S. § 22-101.

(d) **Final language of rules.** The rules adopted or repealed by the Board may vary from the Council recommendation except for rules recommended by the Air Quality Council. (See further, Oklahoma Clean Air Act at 27A O.S. § 25-106.)

(e) **Remand.** The Board may remand a Council's rulemaking recommendation for reconsideration.

(f) **Notice to Council.** The DEQ shall provide each Council with copies of emergency rules

adopted by the Board without the Council's recommendation and of any rules adopted by the Board which vary from that Council's recommendation.

252:4-5-9. Rulemaking record

The DEQ shall maintain a rulemaking record on all rules adopted or revoked by the Board.

SUBCHAPTER 7. ENVIRONMENTAL PERMIT PROCESS

PART 1. THE PROCESS

252:4-7-1. Authority

The rules in this Subchapter implement the Oklahoma Uniform Environmental Permitting Act, 27A O.S. § 24-101 et seq., and apply to applicants for and holders of DEQ permits and other authorizations.

252:4-7-2. Preamble

The Uniform Environmental Permitting Act requires that DEQ licenses, permits, certificates, approvals and registrations fit into an application category, or Tier, established under the uniform environmental permitting rules. Tier I is the category for those things that are basically administrative decisions which can be made by a technical supervisor with no public participation except for the landowner. Tier II is the category for those permit applications that have some public participation (notice to the public, the opportunity for a public meeting and public comment), and the administrative decision is made by the Division Director. Tier III is the category for those permit applications that have extensive public participation (notice to the public, the opportunity for a public meeting and public comment, and the opportunity for an administrative evidentiary hearing), and the administrative decision is made by the Executive Director.

252:4-7-3. Compliance

Applicants and permittees are subject to the laws and rules of the DEQ as they exist on the date of filing an application and afterwards as changed.

252:4-7-4. Filing an application

(a) Tier I. The applicant shall file (2) copies of a Tier I application unless the application form or instructions specifies that only one (1) copy is needed. Applicants seeking permits for alternative individual on-site sewage disposal systems and alternative small public on-site sewage disposal systems (OAC 252:641) shall file one copy with the local DEQ office for the county in which the real property is located.

(b) Tier II & III. The applicant shall file three (3) copies of Tier II and Tier III applications with the DEQ and place one (1) copy for public review in the county in which the site, facility or activity is located.

252:4-7-5. Fees

Fees shall be submitted with the application and, except as herein provided, will not be refunded.

252:4-7-6. Receipt of applications

When an application and appropriate fee are received, each program shall:

- (1) file stamp the application with the date of receipt, the Division and/or program name and an identification number;
- (2) assign the application to a permit reviewer; and
- (3) enter this information in a database or log book.

252:4-7-7. Administrative completeness review

The reviewer shall have 60 calendar days from the file-stamped date of filing to determine if the application is administratively complete.

- (1) Not complete. If the reviewer decides that the application is not complete, he/she shall immediately notify the applicant by mail, describing with reasonable specificity the deficiencies and requesting supplemental information. The reviewer may continue to ask for specific information until the application is administratively complete. If the reviewer does not notify the applicant of deficiencies, the period for technical review shall begin at the close of the administrative completeness review period.
- (2) Complete. When the application is administratively complete, the reviewer shall enter the date in the database or log book and immediately notify the applicant by mail. The period for technical review begins.

252:4-7-8. Technical review

(a) Each program shall have the time period specified in Parts 3 through 5 of this Subchapter to review each application for technical compliance with the relevant rules and to reach a final determination. If the data in the application does not technically comply with the relevant rules or law, the reviewer may notify the applicant by mail, describing with reasonable specificity the deficiencies and requesting supplemental information.

(b) Any environmental permit that is not described in this Subchapter shall be reviewed with all due and reasonable speed.

252:4-7-9. When review times stop

The time period for review stops during:

- (1) litigation;
- (2) public review and participation, including waiting periods, comment periods, public meetings, administrative hearings, DEQ preparation of response to comments and/or review by state or federal agencies;
- (3) requests for supplemental information; and
- (4) the time in which an applicant amends his/her application of his/her own accord.

252:4-7-10. Supplemental time

The Notice of Deficiencies and request for supplemental information may state that up to 30 additional calendar days may be added to the application processing time. Requests for supplemental information may also state that additional days for technical review equal to the number of days the applicant used to respond may be added to the review time.

252:4-7-11. Extensions

Extensions to the time lines of this Subchapter shall only be made by agreement or when the Executive Director certifies that circumstances outside the DEQ's control, including acts of God, a

substantial and unexpected increase in the number of applications filed, or additional review duties imposed on the DEQ from an outside source, prevent the reviewer from meeting the time periods.

252:4-7-12. Failure to meet deadline

Where failure to meet a deadline is imminent, then:

- (1) At least thirty (30) calendar days prior to the deadline the DEQ shall reassign staff and/or retain outside consultants to meet such deadline; or
- (2) The applicant may agree to an extension of time for a specific purpose and period of time with refund of the entire application fee, unless a refund is prohibited by law.

252:4-7-13. Notices

(a) **Statutory requirements for notice.** The Uniform Environmental Permitting Act requires an applicant to give notice in accordance with 27A O.S. § 2-14-301.

(b) **Notice to landowner.** Applicants shall certify by affidavit that they own the real property, have a current lease or easement which is given to accomplish the permitted purpose or have provided legal notice to the landowner.

(c) **Notice content.** The applicant shall provide DEQ with a draft notice for approval prior to publication. All published legal notice(s) shall contain the:

- (1) Name and address of the applicant;
- (2) Name, address and legal description of the site, facility and/or activity;
- (3) Purpose of notice;
- (4) Type of permit or permit action being sought;
- (5) Description of activities to be regulated;
- (6) Locations where the application may be reviewed;
- (7) Names, addresses and telephone numbers of contact persons for the DEQ and for the applicant;
- (8) Description of public participation opportunities and time period for comment and requests; and
- (9) Any other information required by DEQ rules.

(d) **Proof of publication.** Within twenty (20) days after the date of publication, an applicant shall provide the DEQ with a written affidavit of publication for each notice published. In case of a mistake in a published notice, the DEQ shall require a legal notice of correction or republication of the entire notice, whichever is appropriate. Inconsequential errors in spelling, grammar or punctuation shall not be cause for correction or republication.

~~(e) **Exception to notice requirement.** Applicants for solid waste transfer station permits may be exempt from public meeting requirements under 27A O.S. § 2-10-307.~~

(f) **Additional notice.**

~~(1) Applicants for a NPDES, RCRA or UIC permit are subject to additional notice provisions of federal requirements adopted by reference as DEQ rules.~~

~~(2) Applicants for a proposed wastewater discharge permit that may affect the water quality of a neighboring state or a Part 70 permit that may affect the air quality of a neighboring state must give written notice to the environmental regulatory agency of that state. [27A O.S. § 2-5-112(E)]~~

~~(3) Applicants for a landfill permit shall provide notice by certified mail, return receipt requested, to owners of mineral interests and to adjacent landowners whose property may be substantially affected by installation of a landfill site. See DuLaney v. OSDH, 868 P.2d 676 (~~

~~Ok. 1993).~~

252:4-7-14. Withdrawing applications

(a) By applicant. An applicant may withdraw an application at any time with written notice to the DEQ and forfeiture of fees.

(b) By DEQ. Except for good cause shown, when an applicant fails to supplement an application within 180 days after the mailing date of a Notice of Deficiencies, or by an agreed date, the DEQ shall void the application. The DEQ shall notify the applicant of an opportunity to show cause why this should not occur.

252:4-7-15. Permit issuance or denial

(a) Compliance required. A new, modified or renewed permit or other authorization sought by the applicant shall not be issued until the DEQ has determined the application is in substantial compliance with applicable requirements of the Code and DEQ rules.

(b) Conditions for issuance. The Department may not issue a new, modified or renewed permit or other authorization sought by the applicant if:

(1) The applicant has not paid all monies owed to the DEQ or is not in substantial compliance with the Code, DEQ rules and the terms of any existing DEQ permits and orders. The DEQ may impose special conditions on the applicant to assure compliance and/or a separate schedule which the DEQ considers necessary to achieve required compliance; or

(2) Material facts were misrepresented or omitted from the application and the applicant knew or should have known of such misrepresentation or omission.

252:4-7-16. Tier II and III modifications

For Tier II and III permit modification actions, only those issues relevant to the modification(s) shall be reopened for public review and comment.

252:4-7-17. Permit decision-making authority

(a) Designated positions. The Executive Director may delegate in writing the power and duty to issue, renew, amend, modify and deny permits and take other authorization or registration action. Unless delegated to a Division Director by formal assignment or rule, the authority to act on Tier I applications shall be delegated to positions within each permitting program having technical supervisory responsibilities and, for local actions authorized by law, to environmental specialist positions held by the DEQ's local services representatives. The authority to act on emergency permits or Tier II applications shall be delegated to the Division Director of the applicable permitting division.

(b) Revision. The Executive Director may amend any delegation in writing.

252:4-7-18. Pre-issuance permit review and correction

(a) Applicant review. The DEQ may ask an applicant to review its permit for calculation and clerical errors or mistakes of fact or law before the permit is issued.

(b) Correction. The DEQ may correct any permit before it is issued.

(1) Notice of significant corrections. For permits based on Tier II and III applications, an applicant shall publish legal notice in one newspaper local to the site of any correction or change proposed by the DEQ which significantly alters a facility's permitted size, capacity or

limits.

(2) Comments. The DEQ may open a public comment period and/or reconvene a public meeting and/or administrative hearing to receive public comments on the proposed correction(s).

252:4-7-19. Consolidation of permitting process

(a) Discretionary. Whenever an applicant applies for more than one permit for the same site, the DEQ may authorize, with the consent of the applicant, the review of the applications to be consolidated so that each required draft permit, draft denial and/or proposed permit is prepared at the same time and public participation opportunities are combined.

(b) Scope. When consolidation is authorized by the DEQ:

(1) The procedural requirements for the highest specified tier shall apply to each affected application.

(2) The DEQ may also authorize the consolidation of public comment periods, process and public meetings, and/or administrative permit hearings.

(3) Final permits may be issued together.

(c) Renewal. The DEQ may coordinate the expiration dates of new permits issued to an applicant for the same facility or activity so that all the permits are of the same duration.

(d) Multiple modifications. Subsections (a) and (b) of this section shall also apply to multiple Tier II and III applications for permit modifications.

PART 3. AIR QUALITY DIVISION TIERS AND TIME LINES

252:4-7-31. Air quality time lines

The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

(1) Construction permits:

(A) PSD and Part 70 Sources - 365 days.

(B) Minor Facilities - 180 days.

(2) Operating permits:

(A) Part 70 Sources - 540 days.

(B) Minor Facilities - 365 days.

(3) Relocation permits - 30 days.

252:4-7-32. Air quality applications - Tier I

(a) Minor facility permits. The following air quality authorizations for minor facilities require Tier I applications.

(1) New permits. New construction, operating and relocation permits.

(2) Modifications of permits.

(A) Modification of a construction permit for a minor facility that will remain minor after the modification.

(B) Modification of an operating permit that will not change the facility's classification from minor to major.

(C) Extension of expiration date of a construction permit.

(3) Renewals. Renewals of operating permits.

(b) Part 70 source permits. The following air quality authorizations for Part 70 sources require

Tier I applications.

(1) New permits.

(A) New construction permit for an existing Part 70 source for any change considered minor under 252:100-8-7.2(b)(1).

(B) New operating permit that:

(i) is based on a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) has conditions which do not differ from the construction permit's operating conditions in any way considered significant under 252:100-8-7.2(b)(2).

(2) Modifications of permits.

(A) Modification of any operating permit condition that:

(i) is based on the operating conditions of a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) does not differ from those construction permit conditions in any way considered significant under 252:100-8-7.2(b)(2).

(B) A construction or operating permit modification that is minor under 252:100-8-7.2(b)(1).

(C) Extension of expiration date of a Part 70 source's construction permit with no or minor modifications.

(c) Other authorizations. The following air quality authorizations require Tier I applications.

(1) New, modified and renewed individual authorizations under general operating permits for which a schedule of compliance is not required by 252:100-8-5(c)(8)(B)(i).

(2) Burn approvals.

(3) Plant-wide emission plan approval under 252:100-37-25(b) or 252:100-39-46(j).

(4) Administrative amendments of all air quality permits and other authorizations.

(5) Alternative emissions reduction authorizations. ~~(Also subject to state implementation plan revision procedures in 252:100-11.)~~

252:4-7-33. Air quality applications - Tier II

(a) Minor facility permit actions. Any minor facility seeking a permit for a modification that when completed would turn it into a Part 70 source is required to apply under subsection (b) of this section.

(b) Part 70 source permits. The following air quality authorizations for Part 70 sources require Tier II applications.

(1) New permits.

(A) New construction permit for a new Part 70 source not classified under Tier III.

(B) New construction permit for an existing Part 70 source for any change considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(C) New operating permit for a Part 70 source that did not have an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(D) New operating permit with one or more conditions that differ from the underlying Tier II or III construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(E) New acid rain permit that is independent of a Part 70 permit application.

(F) New temporary source permit under 252:100-8-6.2.

(2) Modifications of permits.

(A) Significant modification, as described in 252:100-8-7.2(b)(2), of an operating permit that is not based on an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(B) Modification of an operating permit when the conditions proposed for modification differ from the underlying construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(C) A construction permit modification considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(3) Renewals. Renewals of operating permits.

(c) Other authorizations. The following air quality authorizations require Tier II applications.

(1) New, modified and renewed general operating permits.

(2) Individual authorizations under any general operating permit for which a schedule of compliance is required by 252:100-8-5(c)(8)(B)(i).

252:4-7-34. Air quality applications - Tier III

(a) New major stationary sources. A construction permit for any new major stationary source listed in this subsection requires a Tier III application. For purposes of this section, "Major stationary source" means:

(1) Any of the following sources of air pollutants which emits, or has the potential to emit, 100 tons per year or more of any pollutant subject to regulation:

(A) carbon black plants (furnace process),

(B) charcoal production plants,

(C) chemical process plants,

(D) coal cleaning plants (with thermal dryers),

(E) coke oven batteries,

(F) fossil-fuel boilers (or combustion thereof), totaling more than 250 million BTU per hour heat input,

(G) fossil fuel-fired steam electric plants of more than 250 million BTU per hour heat input,

(H) fuel conversion plants,

(I) glass fiber processing plants,

(J) hydrofluoric, sulfuric or nitric acid plants,

(K) iron and steel mill plants,

(L) kraft pulp mills,

(M) lime plants,

(N) incinerators, except where used exclusively as air pollution control devices,

(O) petroleum refineries,

(P) petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels,

(Q) phosphate rock processing plant,

(R) portland cement plants,

(S) primary aluminum ore reduction plants,

(T) primary copper smelters,

(U) primary lead smelters,

(V) primary zinc smelters,

(W) secondary metal production plants,

- (X) sintering plants,
- (Y) sulfur recovery plants, or
- (Z) taconite ore processing plants, and

(2) Any other source not specified in paragraph (1) of this definition which emits, or has the potential to emit, 250 tons per year or more of any pollutant subject to regulation.

(b) Existing incinerators. An application for any change in emissions or potential to emit, or any change in any permit condition, that would have caused an incinerator to be defined as a major stationary source when originally permitted shall require a Tier III application.

(c) Potential to emit. For purposes of this section, "potential to emit" means emissions resulting from the application of all enforceable permit limitations as defined in OAC 252:100-1-3.

SUBCHAPTER 9. ADMINISTRATIVE PROCEEDINGS

PART 1. ENFORCEMENT

252:4-9-1. Notice of Violation ("NOV")

Unless otherwise provided by the particular enabling legislation, administrative enforcement proceedings shall begin with a written notice of violation (NOV) being served upon the Respondent. The NOV shall set forth Respondent's action or omission and the specific provision of the Code, rules, license or permit alleged to be violated. An NOV may be a letter, inspection sheet, consent order or final order, if it meets the requirements of this Section.

252:4-9-2. Administrative compliance orders

(a) When issued. The Executive Director, upon the request of a Division, may issue an administrative order requiring compliance, assessing penalties for past violations and specifying penalties for continuing noncompliance.

(b) Contents. An administrative compliance order shall specify the findings of fact and conclusions of law upon which it is based and shall set a time for the Respondent to comply. The Order shall specify the penalty, not to exceed the statutory maximum per day of noncompliance, to be assessed in the event that the Respondent fails to comply with the Order within the prescribed time, and, if applicable, the penalty assessed for past violations of the Code, rules, or licenses or permits. The Order shall advise the Respondent that it shall become final unless an administrative hearing is requested in writing in accordance with 252:4-9-32 within fifteen (15) days of service of the Order.

(c) Service. An Order shall be served in accordance with 252:4-9-35.

(d) Order following hearing. Based on the hearing and record, a proposed order will be sustained, modified, or dismissed by the Executive Director. If the hearing process extends beyond any compliance deadline specified in the Order, fines specified in the Order for violations of the Order will continue to accrue during the hearing process unless the Administrative Law Judge stays the penalty upon request for good cause shown.

252:4-9-3. Determining penalty

In determining the amount of penalty specified in an administrative penalty order, the DEQ may consider the following:

- (1) the factors specified by 27A O.S. § 2-3-502(K)(2); and
- (2) the extent and severity of environmental degradation or adverse health effects caused by the

violation.

252:4-9-4. Assessment orders

(a) Issuance of assessment order. Any time the DEQ believes the Order has been violated, the Executive Director may issue an order assessing an administrative penalty pursuant to 27A O.S. § 2-3-502. In determining an appropriate administrative penalty, the Executive Director may consider Respondent's efforts to comply after being served with the Order.

(b) Content of assessment orders. An assessment order must state the nature and period of the violation and must determine the amount of the fine. The fine is due and payable immediately upon issuance of the assessment order, unless a hearing is requested within seven (7) days. See also 27A O.S. § 2-3-502.

(c) Continuing violations. If the DEQ believes that violations of the administrative compliance or penalty order continue after the issuance of an assessment order, the Executive Director may issue additional assessment orders covering periods of violation since the period covered by the issuance of a previous assessment order.

252:4-9-5. Considerations for self-reporting of noncompliance

(a) Conditions for not seeking administrative and civil penalties. Except in the case of habitual noncompliance or as otherwise provided in this section, in evaluating an enforcement action for a regulated entity's failure to comply with DEQ rules, the DEQ will not seek an administrative or civil penalty when the following circumstances are present:

(1) The regulated entity voluntarily, promptly and fully discloses the apparent failure to comply with applicable state environmental statutes or rules to the appropriate DEQ Division in writing before the Division learns of it or is likely to learn of it imminently;

(2) The failure is not deliberate or intentional;

(3) The failure does not indicate a lack or reasonable question of the basic good faith attempt to understand and comply with applicable state environmental statutes or rules through environmental management systems appropriate to the size and nature of the activities of the regulated entity;

(4) The regulated entity, upon discovery, took or began to take immediate and reasonable action to correct the failure (i.e., to cease any continuing or repeated violation);

(5) The regulated entity has taken, or has agreed in writing with the appropriate Division to take, remedial action as may be necessary to prevent recurrence of such failure. Any action the regulated entity agrees to take must be completed;

(6) The regulated entity has addressed, or has agreed in writing with the appropriate Division to address, any environmental impacts of the failure in an acceptable manner;

(7) The regulated entity has not realized and will not realize a demonstrable and significant economic or competitive advantage as a result of non-compliance; and

(8) The regulated entity cooperates with the DEQ as the DEQ performs its duties and provides such information as the DEQ reasonably requests to confirm the entity's compliance with these conditions.

(b) Partial qualification. Notwithstanding the failure of a regulated entity to meet all of the conditions in subsection a of this section, the DEQ will consider the nature and extent of such actions of the regulated entity in mitigation of any administrative or civil penalty otherwise appropriate. If the regulated entity meets all conditions in subsection (a) of this section except item seven (7) relating to significant economic or competitive advantage, the DEQ will seek an

administrative or civil penalty only to the extent of the economic or competitive advantage gained.
(c) Relationship to federal/state agreements. In the event of any conflict, the elimination or mitigation of penalties pursuant to subsections (a) and (b) of this section is subject to agreements between the DEQ and the United States Environmental Protection Agency (USEPA) relating to regulatory program delegation or authorization from the USEPA to the DEQ.
(d) Applicability. This section applies to all enforcement cases arising from violations discovered by or brought to the attention of the DEQ after June 2, 1997.

PART 3. INDIVIDUAL PROCEEDINGS

252:4-9-31. Individual proceedings filed by DEQ

(a) Initiation. Individual proceedings may be initiated by DEQ program areas by filing an administrative compliance or penalty order with the Administrative Law Clerk.
(b) Content. Each order shall name the Respondent(s), contain a brief statement of the facts, refer to the specific provision of the Code, rules, license or permit alleged to be violated, state the relief requested and include notice to the Respondent(s) of the opportunity to request an administrative hearing.
(c) Style. The style of the case shall be in accordance with the format in Appendix D.

252:4-9-32. Individual proceedings filed by others

(a) Request for administrative hearing in response to Order. A request for an individual proceeding initiated by the Respondent named in an Order shall be in writing and shall specifically set forth the Respondent's objections to the Order.
(b) Administrative hearing on Tier III permits. An individual proceeding on a proposed permit for a Tier III application may be requested in accordance with 27A O.S. § 2-14-304(C)(1).
(c) Style. The style of the case shall be in accordance with the format in Appendix D.
(d) Content. All requests for individual proceedings must be in writing, contain a brief statement of the basis of the request and the name and address of each requester, and be signed by the requester or an authorized representative.
(e) Declaratory ruling. Any person who alleges that any DEQ rule or order interferes with or impairs, or threatens to interfere with or impair, his/her legal rights may petition the DEQ, formally requesting a declaratory ruling on the applicability of the rule or order. After the petition is filed, the DEQ shall provide a copy to the Board.
(1) Form and content of petition. All petitions shall be in writing and filed with the Administrative Law Clerk. The petition shall include the information and follow the format in Appendix B.
(2) Determination. Petitions for declaratory rulings shall be decided by the DEQ. Rulings shall state the findings of fact and conclusions of law upon which they are based. If the DEQ refuses to make a ruling or begin an individual proceeding within 30 days, the petition shall be deemed to have been denied. If the DEQ begins an individual proceeding on the petition, it shall offer an opportunity for a hearing to the petitioner. After the DEQ issues a ruling or the Executive Director issues a final order, the DEQ shall provide a copy of the ruling or final order to the Board at its next available meeting.
(3) Mailing. The DEQ shall mail a copy of the ruling or final order to the petitioner.

252:4-9-33. Scheduling and notice of hearings

The DEQ shall schedule an administrative hearing after receipt of a proper and timely request. The Administrative Law Clerk shall notify the parties of the date, time and place of the hearing. Notice shall satisfy the requirements of the APA and shall be made at least fifteen (15) days prior to the hearing unless otherwise provided by law or agreed by the parties.

252:4-9-34. Administrative Law Judges and Clerks

(a) Administrative Law Judge. The Executive Director may designate an Administrative Law Judge for any administrative hearing in accordance with 27A O.S. § 2-3-103. Administrative Law Judges shall not have had prior involvement in the matter other than as an Administrative Law Judge, unless the parties waive this requirement.

(b) Administrative Law Clerk. The Executive Director may designate an Administrative Law Clerk to maintain the administrative hearing dockets and records, and perform such other duties as described in this Chapter or incidental thereto.

(c) Authority. Administrative Law Judges have complete authority to conduct individual proceedings and may take any action consistent with the APA and the rules of this subchapter. Administrative Law Judges may:

- (1) arrange and issue notice of the date, time and place of hearings and conferences;
- (2) establish the methods and procedures to be used in the presentation of the evidence;
- (3) hold conferences to settle, simplify, determine, or strike any of the issues in a hearing, or to consider other matters that may facilitate the expeditious disposition of the hearing;
- (4) administer oaths and affirmations;
- (5) regulate the course of the hearing and govern the conduct of participants;
- (6) examine witnesses;
- (7) rule on, admit, exclude and limit evidence, at or before hearings;
- (8) establish the time for filing motions, testimony, and other written evidence, briefs, findings, and other submissions, and hold the record open for such purposes;
- (9) rule on motions and pending matters;
- (10) divide the hearing into stages or join claims of parties whenever the number of parties is large or the issues are numerous and complex;
- (11) restrict attendance by persons not parties to the hearing in appropriate cases;
- (12) admit attorneys from other jurisdictions to practice law before the DEQ in accordance with Rules of the Oklahoma Bar Association, 5 O.S. Chapter 1, Appendix 1, Article II, § 5, and administer the oath required by 5 O.S. § 2.
- (13) require briefs on any relevant issues;
- (14) request proposed findings of fact, conclusions of law and a proposed order from all parties; and
- (15) restrict testimony to the facts alleged in an assessment order.

(d) Technical assistance. At the request of the Administrative Law Judge, the Executive Director may designate a DEQ representative, who has had no assigned responsibilities related to the matter at issue, to serve as technical adviser to the Administrative Law Judge.

252:4-9-35. Service

(a) Generally. Service shall be made in accordance with the Oklahoma Pleading Code, 12 O.S. § 2001 et seq., and 27A O.S. § 2-3-502 unless otherwise allowed by this section.

(b) By the DEQ. Where the DEQ is serving notice, personal service may be made by a person designated by the Executive Director for that purpose.

(c) **By certified mail.** Service by certified mail shall be effective on the date of receipt or, if refused, on the date of refusal by the Respondent.

252:4-9-36. Responsive pleading

A Respondent may file, and the Administrative Law Judge may direct a Respondent to file, a responsive pleading to the initiated action.

252:4-9-37. Prehearing conferences

(a) **General.** The Administrative Law Judge may schedule and conduct prehearing conferences as necessary. The Administrative Law Clerk shall notify the parties of the scheduling of a prehearing conference. The Administrative Law Judge may hold a prehearing conference by telephone. On request, prehearing conferences shall be on the record.

(b) **Subjects.** Prehearing conferences may address:

- (1) identification and simplification of issues, including the elimination of frivolous claims or defenses;
- (2) amendments to the pleadings;
- (3) the plan and schedule of discovery and limitations to be placed thereon;
- (4) identification of admissions of fact to avoid unnecessary proof and cumulative evidence;
- (5) the identification of witnesses and substance of testimony, exhibits, and documents;
- (6) the use of prehearing briefs and prefiled testimony in the form of sworn affidavits;
- (7) settlement of all or some of the issues before the hearing;
- (8) adoption of special procedures for managing potentially difficult or protracted actions that may involve complex issues, multiple parties, novel or difficult legal questions, or evidence problems;
- (9) scheduling; and
- (10) such other matters as may aid disposition.

(c) **Schedules and orders.** A prehearing conference may result in a scheduling or other prehearing order. Subsequent changes to any prehearing or scheduling order may be made by the Administrative Law Judge by modifying the order upon good cause shown.

252:4-9-38. Discovery

Discovery shall be conducted in accordance with the Oklahoma Discovery Code (12 O.S. § 3224 et seq.) unless otherwise ordered by the Administrative Law Judge for good cause.

252:4-9-39. Subpoenas

(a) **Issuance.** Subpoenas for the attendance of witnesses, the furnishing of information required by the Administrative Law Judge and the production of evidence shall be issued in accordance with the APA and the Oklahoma Pleading Code.

(b) **Failure to obey.** The Executive Director may seek an appropriate judicial order to compel compliance by persons who fail to obey a subpoena, who refuse to be sworn or make an affirmation at a hearing, or who refuse to answer a proper question during a hearing. The hearing may proceed despite any such refusal but the Administrative Law Judge may, in his/her discretion at any time, continue the proceedings as necessary to secure a court ruling.

252:4-9-40. Record

(a) **To be made.** A record of the hearing shall be made, which shall be a tape recording unless

otherwise agreed by the parties and the Administrative Law Judge. The recording will not be transcribed as a matter of course. A transcript may be obtained by submitting a written request to the Administrative Law Clerk and tendering payment in an amount sufficient to pay the cost of having the recording transcribed.

(b) Court reporter. A party may request a court reporter. The requesting party shall pay the costs, and the original transcript shall be filed in the case file as part of the record in the case. Each person or party requesting copies shall make arrangements with the reporter and pay the costs.

(c) Maintained. The record of a proceeding and the file containing the notices and the pleadings will be maintained by the Administrative Law Clerk. All pleadings, motions, orders and other papers submitted for filing in a proceeding shall be date/file stamped by the Administrative Law Clerk upon receipt. The burden of showing substantial prejudice by any failure to correctly file-stamp any submittal shall be upon the asserting party.

(d) Contents. The administrative record of all individual proceedings shall contain documents required by the APA, 75 O.S. § 309. An individual proceeding on a proposed permit for a Tier III application shall also include the following:

- (1) the permit application on file with the DEQ, as amended;
- (2) all written comments received during the public comment period;
- (3) the tape or transcript of the public meeting;
- (4) documents resulting from the DEQ's review of the permit application and public comments;
- (5) the draft permit, fact sheet and response to comments, if any, issued by the DEQ; and
- (6) all published notices.

252:4-9-41. Motions

(a) Filing. All requests for action in a matter already before the DEQ shall be made in a motion, signed by the party or his/her attorney, and filed with the Administrative Law Clerk.

(b) Service. Copies of motions shall be served on other parties in accordance with 252:4-9-35.

(c) Response. Within fifteen (15) days after service of any written motion, any party to the proceedings may file a response to the motion. The time for response may be extended or shortened by the Administrative Law Judge for good cause shown.

252:4-9-42. Continuances

A motion for an extension or continuance shall state the reasons for the request and specify the length of time requested. Unless made before the Administrative Law Judge in open hearing, motions for extensions of time or for a continuance of the hearing to another date or time shall be in writing and filed with the Administrative Law Clerk. The Administrative Law Judge shall promptly grant or deny such request at his/her discretion. If the motion is denied, it may be renewed orally by the party at the hearing.

252:4-9-43. Summary judgment

The Administrative Law Judge may grant a motion for summary judgment, subject to 252:4-9-46.

252:4-9-44. Default

(a) Generally. Any Respondent who fails to appear, after receipt of notice, may be determined to have waived the right to appear and present a defense. A Final Order may be issued by the

Executive Director granting the relief requested by default.

(b) Tier III application. The Executive Director may enter a default judgment against any party who fails to participate in an administrative hearing on a proposed permit for a Tier III application.

252:4-9-45. Withdrawal and dismissal

Parties may withdraw from a case and cases may be dismissed by the Administrative Law Judge in accordance with the Oklahoma Code of Civil Procedure.

252:4-9-46. Orders in administrative hearings

Proposed and final orders in administrative hearings shall be prepared and issued in accordance with the APA.

PART 5. AIR QUALITY ADVISORY COUNCIL HEARINGS

252:4-9-51. In general

The Air Quality Advisory Council is authorized to conduct individual proceedings on enforcement matters and requests for a variance from the Clean Air Act, 27A O.S. § 2-5-101 through 2-5-118, or the Air Pollution Control Rules, OAC 252:100.

252:4-9-52. Individual proceedings

Individual proceedings before the Air Quality Advisory Council will be conducted in accordance with the requirements in Part 3 of this Subchapter. To be heard by the Council, the request for hearing in response to an Order must include a request that the Council conduct the hearing. The Council may designate an Administrative Law Judge for individual proceedings to be held before the Council. The Council or its designee may perform Administrative Law Judge functions described in Part 3 of this Subchapter.

252:4-9-53. Variance

It is within the discretion of the Air Quality Advisory Council to decide whether or not an individual proceeding is necessary in granting a variance.

252:4-9-54. State implementation plan hearings

A state implementation plan (SIP) hearing may be initiated by an applicant for an alternative emissions reduction authorization ~~under 252:100-11~~ by filing a request for a SIP hearing with the Administrative Law Clerk. A request that the hearing be conducted by the Air Quality Advisory Council must be included in the request for hearing. ~~Additional requirements for a SIP hearing request are contained in 252:100-11-6.~~

APPENDIX B. PETITION FOR DECLARATORY RULING

BEFORE THE DEPARTMENT OF ENVIRONMENTAL QUALITY [NEW]

IN THE MATTER OF _____) Matter No.
)
RULE OAC 252: _____) Date filed:
(or Case No. _____)

Subject area: Air Quality Solid Waste
 Hazardous Waste Water Quality
 Laboratory Operator Certification
 Radiation Other

Petition will be referred by the Department to its appropriate program.

1. Rule Number(s): _____
(OAC number if known)
2. Attach a brief statement of the issues raised by the rule(s) which cause such a request to be made and a statement of your personal interest in the ruling.
3. If this request has been discussed with the Department of Environmental Quality, please indicate the name of the Division and employee consulted; otherwise, state "n/a."

4. Attachment(s): List of Exhibits
 Further explanation

_____ by: _____
Name of Business or group (print name) (title)

or Name of Individual (print): _____

Phone: _____

APPENDIX C. PERMITTING PROCESS SUMMARY [NEW]

Steps	Tier I	Tier II	Tier III
Filing - Applicant files application, pays any required fee, and provides landowner notice. Applicant may meet with the DEQ staff prior to this.	Yes	Yes	Yes
Notice of filing - Applicant publishes notice in one newspaper local to site.	No	Yes	Yes
Process meeting - Notice - 30-day opportunity is published with notice of filing. DEQ holds meeting if requested and sufficient interest is shown.	No	No	Yes
Administrative completeness review - DEQ reviews application and asks applicant to supply any missing information.	Yes	Yes	Yes
Technical review - DEQ reviews application for technical compliance and requests applicant to cure any deficiencies.	Yes	Yes	Yes
Draft permit or draft denial - DEQ prepares this after completing review.	No	Yes	Yes
Notice of draft permit, public comment period and public meeting request opportunity - Applicant publishes this in one newspaper local to site. (DEQ publishes notice of draft denial.)	No	Yes	Yes
Public comment period - 45 days for hazardous waste treatment, storage or disposal draft permits; 30 days for all others.	No	Yes	Yes
Public meeting - Conducted by DEQ if held	No	Yes	Yes
Review of comments - DEQ (written response)	No	Yes	Yes
Proposed permit - DEQ prepares this in response to comments on draft permit	No	No	Yes
Notice of proposed permit - Applicant publishes, in one newspaper local to site, notice of 20-day opportunity to review permit and request administrative hearing.	No	No	Yes
Administrative permit hearing - Conducted by DEQ if held. Results in final order.	No	No	Yes
Issuance or denial - DEQ's final decision	Yes	Yes	Yes

Notices of Rulemaking Intent

RULE IMPACT STATEMENT:

The rule impact statement for the proposed rule revocation will be on file at the DEQ and may be requested from the contact person.

CONTACT PERSON:

Contact Barbara Rauch by e-mail barbara.rauch@deqmail.state.ok.us or by phone (405) 702-7189 or fax (405) 702-7101. The DEQ is located at 707 N. Robinson, Oklahoma City, Oklahoma, 73102. The mailing address is P.O. Box 1677, Oklahoma City, Oklahoma, 73101-1677.

ADDITIONAL INFORMATION:

Persons with disabilities who desire to attend the rulemaking hearing and need an accommodation should notify the contact person three days in advance of the hearing, TDD Relay Number 1-800-522-8506.

[OAR Docket #00-2331; filed 9-21-00]

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 4. RULES OF PRACTICE AND PROCEDURE

[OAR Docket #00-2332]

RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking

PROPOSED RULES:

Chapter 4. Rules of Practice and Procedure [NEW]

SUMMARY:

The Administrative Procedures Act requires each agency to adopt rules describing its organization, methods of operation and methods by which people may obtain information from or give information to the agency. These rules must also specify the requirements of all formal and informal procedures available, including a description of forms and instructions. (75 O.S. § 302)

This proposed new Chapter 4 is a combination of three chapters of administrative rules relating to the DEQ, which will be revoked when Chapter 4 is adopted, i.e., current Chapter 1 (Procedures of the Environmental Quality Board), current Chapter 2 (Procedures of the Department of Environmental Quality), and current Chapter 3 (Procedures of the Environmental Quality Councils).

Duplicative and redundant rules were eliminated. The rulemaking process rules were rewritten in chronological order. The permitting process rules were substantially rewritten to simplify and clarify them. Three separate subchapters dealing with administrative proceedings were combined into one subchapter that addresses all individual proceedings. Statutory language was deleted.

The proposed Chapter 4 rules address general provisions, board and council meetings and public forums,

rulemaking, the environmental permit process, administrative proceedings, complaint processing, environmental education grants and local project funding.

This chapter also includes rules recommended by the Air Quality Council on June 14, 2000, which address hearings before that council. Rule numbers were changed to be consistent with the new proposed Chapter 4. See proposed Subchapter 4, Part 5.

AUTHORITY:

Environmental Quality Board powers and duties, 27A O.S. § 2-2-101; Administrative Procedures Act, 75 O.S. § 302

REQUEST FOR COMMENTS FROM BUSINESS ENTITIES:

The DEQ requests that business entities affected by this rule provide the DEQ, within the comment period, in dollar amounts if possible, the increase in the level of direct costs such as fees, and the indirect costs such as reporting, recordkeeping, equipment, construction, labor, professional services, revenue loss, or other costs expected to be incurred by a particular entity due to compliance with the proposed rule.

COMMENT PERIOD:

Deliver or mail written comments to the contact person from October 16 through November 6, 2000

PUBLIC HEARINGS:

Before the Environmental Quality Board at a meeting to be held at 9:30 a.m. on November 14, 2000, in Hooker, Oklahoma. Written or oral comments will be accepted.

COPY OF PROPOSED RULE:

The proposed rule may be obtained from the contact person and reviewed at the DEQ.

RULE IMPACT STATEMENT:

The rule impact statement for the proposed rule will be on file at the DEQ and may be requested from the contact person.

CONTACT PERSON:

Contact Barbara Rauch by e-mail barbara.rauch@deqmail.state.ok.us or by phone (405) 702-7189 or fax (405) 702-7101. The DEQ is located at 707 N. Robinson, Oklahoma City, Oklahoma, 73102. The mailing address is P.O. Box 1677, Oklahoma City, Oklahoma, 73101-1677.

ADDITIONAL INFORMATION:

Persons with disabilities who desire to attend the rulemaking hearing and need an accommodation should notify the contact person three days in advance of the hearing, TDD Relay Number 1-800-522-8506.

ANALYSIS:

The Administrative Procedures Act requires each agency to adopt rules describing its organization, methods of operation and methods by which people may obtain information from or give information to the agency. These rules must also specify the requirements of all formal and informal procedures available, including a description of forms and instructions. (75 O.S. §302)

This proposed new Chapter 4 is a combination of three chapters of administrative rules relating to the DEQ, which will be revoked when Chapter 4 is adopted, i.e. current Chapter 1 (Procedures of the Environmental Quality Board), current Chapter 2 (Procedures of the DEQ), and current Chapter 3 (Procedures of the Environmental Quality Councils).

Duplicative and redundant rules were eliminated. The rulemaking process rules were rewritten in chronological order. The permitting process rules were substantially rewritten to simplify and clarify them. Three separate subchapters dealing with administrative proceedings were combined into one subchapter that addresses all individual proceedings. Statutory language was deleted.

The proposed Chapter 4 rules address general provisions, Board and council meetings and public forums, rulemaking, the environmental permit process, administrative proceedings, complaint processing, environmental education grants and local project funding.

This chapter also includes rules recommended by the Air Quality Council on June 14, 2000, which address hearings before that council. Rule numbers were changed to be consistent with the new proposed Chapter 4. See proposed Subchapter 4, Part 5.

SUMMARY OF DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

There are analogous federal rules for permitting. 40 CFR Part 124 contains federal rules entitled "Procedures for Decisionmaking". Subpart A, "General Program Requirements", contains EPA procedures for issuing RCRA, UIC, PSD and NPDES permits. In those programs for which DEQ has received delegation or authorization from EPA, the DEQ is required by federal law to follow some EPA procedures in addition to those required under state law. In those cases, the EPA procedures have been incorporated by reference by the specific program area either by rule or by program approval. In the current Chapter 2 and the proposed Chapter 4 rules, additional notice requirements are acknowledged for NPDES, RCRA, and UIC permits.

CONTACT PERSON:

Contact Barbara Rauch by e-mail barbara.rauch@deqmail.state.ok.us or by phone (405) 702-7189 or fax (702-7101). The DEQ is located at 707 N. Robinson, Oklahoma City, Oklahoma, 73102. The mailing address is P.O. Box 1677, Oklahoma City, Oklahoma, 73101-1677.

ADDITIONAL INFORMATION:

The adoption of this new chapter was first considered by the Environmental Quality Board at their November 14, 2000 meeting, at which time board members continued it until the February 23, 2001 meeting.

PURSUANT TO THE ACTION DESCRIBED HEREIN, THE FOLLOWING RULES ARE CONSIDERED FINALLY ADOPTED AS SET FORTH IN 75 O.S. § 308.1(A), WITH AN EFFECTIVE DATE OF JUNE 11, 2001.

SUBCHAPTER 1. GENERAL PROVISIONS

252:4-1-1. Purpose and authority

(a) Purpose. This Chapter describes the practices and procedures of the Environmental Quality Board, Advisory Councils, and the Department of Environmental Quality.

(b) Authority. This Chapter is authorized by the Administrative Procedures Act, 75 O.S. § 302, and the Environmental Quality Code, 27A O.S. § 2-2-101.

252:4-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Administratively complete" means an application that contains the information specified in the application form and rules in sufficient detail to allow the DEQ to begin technical review.

"Administrative hearing" is defined at 27A O.S. § 2-1-102 and is synonymous with "individual proceeding" as that term is defined in the Administrative Procedures Act, 75 O.S. § 250.1 *et seq.*

"Administrative Law Judge" is synonymous with "hearing examiner" as that term is defined in the Administrative Procedures Act.

"Advisory Councils or Council" means any of the following Councils: the Air Quality Advisory Council, the Hazardous Waste Management Advisory Council, the Laboratory Services Advisory Council, the Radiation Management Advisory Council, the Solid Waste Management Advisory Council, the Water Quality Management Advisory Council, and the Waterworks and Wastewater Works Operator Certification Advisory Council.

"APA" means the Oklahoma Administrative Procedures Act, 75 O.S. § 250.1 *et seq.*

"Application" means "a document or set of documents, filed with the [DEQ], for the purpose of receiving a permit or the modification, amendment or renewal thereof from the [DEQ]... any subsequent additions, revisions or modifications submitted to the [DEQ] which supplement, correct or amend a pending application." [27A O.S. § 2-14-103(1)]

"Board" means the Environmental Quality Board.

"Code" means the Oklahoma Environmental Quality Code, 27A O.S. § 2-1-101 *et seq.*

"Complaint" means any written or oral information submitted to DEO alleging site-specific environmental pollution except information gained from facility inspections, or self-reported incidents.

"Department or DEO" means the Department of Environmental Quality.

"Enforcement action" means:

- (A) a written communication from the DEO to an alleged violator that identifies the alleged violations and directs or orders that the violations be corrected and/or their effect remedied;
- (B) an administrative action to revoke or suspend a permit or license;
- (C) a consent order or proposed consent order;
- (D) a civil petition, a complaint in municipal court, or a complaint in federal district court;
- (E) a referral by the DEO to the Oklahoma Attorney General's office, a state District Attorney's office, a U.S. Attorney's office, or a state or federal law enforcement agency for investigation.

"Executive Director" means the Executive Director of the Department of Environmental Quality.

"False complaint" means any written or oral information submitted to DEO alleging site-specific environmental pollution by a person who knowingly and willfully gives false information or misrepresents material information.

"Individual proceeding" is defined in the APA [75 O.S. § 250.3(7)]. It includes an administrative evidentiary hearing

to resolve issues of law or fact between parties, resulting in an order.

"Mediation" means a voluntary negotiating process in which parties to a dispute agree to use a mediator to assist them in jointly exploring and settling their differences, with a goal of resolving their differences by a formal agreement created by the parties.

"Notice of deficiencies" means a written notice to an applicant, describing with reasonable specificity the deficiencies in a permit application and requesting supplemental information.

"Off-site", as used in hazardous waste, solid waste and Underground Injection Control (UIC) tier classifications, means a facility which receives waste from various sources for treatment, storage, processing, or disposal.

"On-site", as used in hazardous waste, solid waste and UIC tier classifications, means a facility owned and operated by an industry for the treatment, storage, processing, or disposal of its own waste exclusively.

"Program" means a regulatory section or division of the DEO.

"Respondent" means a person or legal entity against whom relief is sought.

"Submittal" means a document or group of documents provided as part of an application.

"Supplement" means a response to a request for additional information following completeness and technical reviews, and information submitted voluntarily by the applicant.

"Technical review" means the evaluation of an application for compliance with applicable program rules.

252:4-1-3. Organization

(a) Environmental Quality Board. The Environmental Quality Board consists of thirteen (13) members, appointed by the Governor with the advice and consent of the Senate, selected from the environmental profession, general industry, hazardous waste industry, solid waste industry, water usage, petroleum industries, agriculture industries, conservation districts, local city or town governments, rural water districts, and statewide nonprofit environmental organizations. (See further 27A O.S. § 2-2-101.)

(b) Advisory Councils. There are seven advisory councils, each consisting of nine (9) members appointed by the Speaker of the House of Representatives, the President Pro Tempore of the Senate or the Governor. (See further 27A O.S. § 2-2-201 and 59 O.S. § 1101 *et seq.*)

(c) DEO. The DEO consists of the following divisions: Administrative Services, Air Quality, Land Protection, Water Quality, Environmental Complaints and Local Services, Customer Services and the State Environmental Laboratory.

252:4-1-4. Office location and hours; communications

(a) Office location and hours. The principal office of the

729

Permanent Final Adoptions

DEO is 707 N. Robinson, Oklahoma City, Oklahoma 73102. The mailing address is P.O. Box 1677, Oklahoma City, Oklahoma 73101-1677. Office hours are from 8:00 a.m. to 4:30 p.m., Monday through Friday except state holidays.

(b) **Communications.** Unless a person is working with a particular person or departmental area, written communication to the DEO shall be addressed to the Executive Director.

(1) **Board.** Communications to the Board may be made through the Executive Director.

(2) **Council.** Communications to a Council may be made through the Division Director of the program with which the Council works.

252:4-1-5. Availability of a record

(a) **Availability.** Records of the Board, Advisory Councils, and DEO, not otherwise confidential or privileged from disclosure by law, shall be available to the public for inspection and copying at the DEO's principal office during normal business hours. Information, data or materials required to be submitted to the DEO in a permit application process shall be made available to the public in accordance with the Oklahoma Uniform Environmental Permitting Act (27A O.S. § 2-14-101 *et seq.*) and the rules in this Chapter. The DEO may take reasonable precautions in order to ensure the safety and integrity of records under its care.

(b) **Removal.** A record may be removed from the DEO's offices or storage areas only with permission of the record's custodian.

(c) **Reproduction.**

(1) **By DEO.** The DEO may limit the number of copies made and the time and personnel available for reproduction of records requested by a member of the public.

(2) **Commercial reproduction.** With advance notice to the DEO, a person may arrange for the pick-up, reproduction and return of records by a commercial copying service at his/her own expense.

(3) **Other.** With prior DEO approval, a person may bring in and use his/her own copy machine.

(d) **Confidentiality.** Any person asserting a claim of confidentiality for any document submitted to the Board, Council or DEO must substantiate the claim upon submission. The DEO will make a determination on the claim and notify the person asserting the claim within a reasonable time. Each program may have more specific requirements, as required by state law or federal rule. [See 27A O.S. § 2-5-105(18) and 40 CFR § 2 Subpart B, particularly § 2.301 (Clean Air Act), § 2.302 (Clean Water Act), § 2.304 (Safe Drinking Water Act), § 2.305 (Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act), and § 2.310 (Comprehensive Environmental Response, Compensation, and Liability Act, as amended by Superfund Amendments and Reauthorization Act)].

(e) **Certification.** Copies of official records of the Board,

Advisory Councils or DEO may be certified by the Executive Director or his/her designees.

(f) **Charge.** The DEO's administrative fee schedule applies to in-house copying or reproduction of records for or by members of the public.

252:4-1-6. Administrative fees

(a) **Photocopying.** The fee for copying letter or legal sized paper is \$0.25 per page.

(b) **Certified copy.** The fee for a certified copy of a document is \$1.00 per document.

(c) **Search fee.** When the request is solely for commercial purpose or clearly would cause excessive disruption of the DEO's essential functions, the document search fee is as follows:

(1) 0 - 15 minutes, no charge;

(2) 16 - 30 minutes, \$5.00;

(3) every subsequent 30-minute increment or portion thereof, \$5.00.

252:4-1-7. Fee credits for regulatory fees

(a) The Executive Director may authorize Divisions of the DEO which have programs that collect recurring fees to apply a credit towards certain future invoices for those fees. The credit must be applied only within the program from which the carryover fees are derived. Only the amount that is projected to exceed three months of funding beyond the upcoming budget year for that program can be credited. A summary of any credit applied shall be reported to the Environmental Quality Board. For a credit to be applied:

(1) there must be a projected balance in the fee account carried over from the previous year;

(2) the credit must be distributable pro rata among the fee payers;

(3) the credit must be large enough to justify its administrative cost; and

(4) the Division must be unaware of a longer-range need, such as match for a superfund clean-up project.

(b) The DEO shall explain on the invoices that a carryover exists and that an identified one-time credit is being applied.

252:4-1-8. Board and Councils

(a) **Officers.** A chair of the Board shall not serve as chair for more than three (3) consecutive years. Officers of a Council may succeed themselves as officers at the discretion of a Council.

(b) **Committees.** Ad hoc committees may be appointed to assist the Board or a Council for any lawful purpose.

252:4-1-9. Severability

The provisions of OAC 252 are severable, and if any part or provision hereof shall be held void, the decision of the court so holding shall not affect or impair any of the remaining parts or provisions of OAC 252.

SUBCHAPTER 3. MEETINGS AND PUBLIC FORUMS

252:4-3-1. Meetings

(a) **Board.** The Board shall hold quarterly meetings and may hold other meetings as it deems necessary.

(b) **Council.** Each council shall hold at least one regularly scheduled meeting per calendar year, except the Air Quality Advisory Council which shall hold at least two regularly scheduled meetings.

(c) **Location.** The Board or a Council may meet at any location convenient and open to the public in this state to encourage public participation in the environmental rulemaking process.

(d) **Agenda.** The proposed agenda of a meeting may be developed with the advice of members and modified by the Chair. Time permitting, a copy of the proposed agenda shall be sent to each Board or Council member at least ten (10) calendar days before a regularly scheduled meeting. The Board or Council may, by majority vote during a meeting, continue an agenda item to or specify a new agenda item for another meeting or forum.

(e) **Public comment.** The agenda shall reserve time during the meeting for public comment on agenda action items. The DEO shall provide sign-in sheets at each meeting for persons who wish to present written or oral comment on an agenda action item. The Chair reserves the right to rearrange the agenda items during the meeting to accommodate public comment. The Chair may set reasonable time limits on oral comment and may accept written submittals on behalf of the Council or the Board.

252:4-3-2. Public forums

(a) **Generally.** A public forum for receiving public comments and dissemination of information may be held in conjunction with a Council or Board meeting but shall be a separate meeting.

(b) **Location.** Each forum may be held at a different location in the state.

(c) **Format.** The forum shall be conducted by the Chair or the Chair's designee.

(d) **Public comment.** The DEO shall provide sign-in sheets at each meeting for persons who wish to present written or oral comments. The Chair may set reasonable time limits on oral comment and may accept written submittals on behalf of the Council or the Board.

SUBCHAPTER 5. RULEMAKING

252:4-5-1. Adoption and revocation

The Board has the authority to adopt new or amended emergency or permanent rules and revoke existing rules within its jurisdiction.

252:4-5-2. Rule development

(a) **DEO.** The DEO may begin the development of rules at

the request of or on behalf of the Board or a Council or upon petition by an interested person. The DEO may appoint committees to assist in the development of rules.

(b) **Public.** Any person may informally discuss proposed rules with the DEO or may suggest proposed rules during a council meeting. Also, any person may file a petition with the DEO formally requesting the adoption, amendment, or revocation of one or more rules.

252:4-5-3. Petitions for Rulemaking

(a) **Form and content of petition.** Rulemaking petitions shall be in writing and filed with the DEO. The petition shall include the information and follow the format in Appendix A of this Chapter. The DEO shall provide a copy of the filed petition to the Board.

(b) **Referral.** The DEO shall refer a filed petition to the appropriate Council or, if none, to the appropriate DEO program for review. A petition referred to a Council shall be set on the agenda of the next available Council meeting for action.

(c) **Status.** The DEO shall advise the Board of the status of rulemaking petitions.

252:4-5-4. Notice of permanent rulemaking

The DEO shall submit notices of proposed permanent rulemaking to the Office of Administrative Rules for publication in accordance with the APA and the Administrative Rules on Rulemaking (OAC 655:10).

252:4-5-5. Rulemaking hearings

(a) **Hearing.** Hearings before a Council or the Board shall be conducted by the Chair or the Chair's designee.

(b) **Public comments.** The public may make comments orally at the hearing or submit comments in writing by the end of the specified public comment period, or both. Persons wishing to comment orally may be required to fill out a written request form. The person conducting the hearing may set reasonable time limits on oral presentations, may exclude repetitive or irrelevant comments and may require that oral presentations be submitted in writing.

(c) **Public comment period.** The comment period shall end at the conclusion of the hearing if the agenda indicates that the Council intends to make a final recommendation on the rules or that the Board intends to take a final action on the rules. Otherwise, the comment period may be extended by the person conducting such hearing for no more than thirty (30) calendar days after the hearing or until the close of the hearing, if continued.

(d) **Summary of comments.** The DEO shall maintain a summary of comments received on proposed rules during written comment periods. The summary shall be provided to the Council or Board prior to taking final action on the rule.

(e) **Hearing continuation.** A Council or the Board may continue the hearing by majority vote. Notice of the continuation shall be announced at the hearing and shall not require publication.

731

Permanent Final Adoptions

252:4-5-6. Council actions

(a) Contents of recommendation. On behalf of a Council, the DEO shall prepare a recommendation submittal on proposed permanent rules, which shall include the text of the proposed rules, a summary of pertinent minutes of Council meetings, and a summary of comments received. Recommendations may also be made for rules with a finding of emergency. The Council may recommend that any proposed rule be adopted by the Board on a permanent and emergency basis simultaneously.

(b) On remand. The Council shall reconsider any rulemaking recommendation remanded by the Board.

252:4-5-7. Presentation to Board

(a) Compliance with APA. When proposed rules are presented to the Board, the DEO shall indicate the rulemaking procedures which have been followed.

(b) Board packets. The DEO shall prepare a board packet consisting of the text of proposed rules, an executive summary, a rule impact statement, an economic impact/environmental benefit statement (if applicable), a summary of comments received on proposed rules at rulemaking hearings and during written comment periods, the Council's recommendations and a summary of pertinent Council meeting minutes (if applicable). The Board packets shall be sent to members with the proposed agenda of the Board meeting at which rules are to be considered. Board packets for emergency rules may vary.

252:4-5-8. Board actions

(a) Referral. The Board may refer any rulemaking matter to the DEO or an appropriate Council for review, comment or recommendation.

(b) Proposed permanent rules. The Board will not consider proposed permanent rules for adoption without the appropriate Council's recommendation except those rules for which no council has jurisdiction.

(c) Proposed emergency rules. The Board may adopt emergency rules without the advice of a Council in accordance with 27A O.S. § 2-2-101.

(d) Final language of rules. The rules adopted or repealed by the Board may vary from the Council recommendation except for rules recommended by the Air Quality Council. (See further, Oklahoma Clean Air Act at 27A O.S. § 2-5-106.)

(e) Remand. The Board may remand a Council's rulemaking recommendation for reconsideration.

(f) Notice to Council. The DEO shall provide each Council with copies of emergency rules adopted by the Board without the Council's recommendation and of any rules adopted by the Board which vary from that Council's recommendation.

252:4-5-9. Rulemaking record

The DEO shall maintain a rulemaking record on all rules adopted or revoked by the Board.

SUBCHAPTER 7. ENVIRONMENTAL PERMIT PROCESS

PART 1. THE PROCESS

252:4-7-1. Authority

The rules in this Subchapter implement the Oklahoma Uniform Environmental Permitting Act, 27A O.S. § 2-14-101 et seq., and apply to applicants for and holders of DEO permits and other authorizations.

252:4-7-2. Preamble

The Uniform Environmental Permitting Act requires that DEO licenses, permits, certificates, approvals and registrations fit into an application category, or Tier, established under the uniform environmental permitting rules. Tier I is the category for those things that are basically administrative decisions which can be made by a technical supervisor with no public participation except for the landowner. Tier II is the category for those permit applications that have some public participation (notice to the public, the opportunity for a public meeting and public comment), and the administrative decision is made by the Division Director. Tier III is the category for those permit applications that have extensive public participation (notice to the public, the opportunity for a public meeting and public comment, and the opportunity for an administrative evidentiary hearing), and the administrative decision is made by the Executive Director.

252:4-7-3. Compliance

Applicants and permittees are subject to the laws and rules of the DEO as they exist on the date of filing an application and afterwards as changed.

252:4-7-4. Filing an application

(a) Tier I. The applicant shall file (2) copies of a Tier I application unless the application form or instructions specifies that only one (1) copy is needed. Applicants seeking permits for alternative individual on-site sewage disposal systems and alternative small public on-site sewage disposal systems (OAC 252:641) shall file one copy with the local DEO office for the county in which the real property is located.

(b) Tier II & III. The applicant shall file three (3) copies of Tier II and Tier III applications with the DEO and place one (1) copy for public review in the county in which the site, facility or activity is located.

252:4-7-5. Fees

Fees shall be submitted with the application and, except as herein provided, will not be refunded.

252:4-7-6. Receipt of applications

When an application and appropriate fee are received, each program shall:

- (1) file stamp the application with the date of receipt, the Division and/or program name and an identification number;
- (2) assign the application to a permit reviewer; and
- (3) enter this information in a database or log book.

252:4-7-7. Administrative completeness review

The reviewer shall have 60 calendar days from the file-stamped date of filing to determine if the application is administratively complete.

- (1) **Not complete.** If the reviewer decides that the application is not complete, he/she shall immediately notify the applicant by mail, describing with reasonable specificity the deficiencies and requesting supplemental information. The reviewer may continue to ask for specific information until the application is administratively complete. If the reviewer does not notify the applicant of deficiencies, the period for technical review shall begin at the close of the administrative completeness review period.
- (2) **Complete.** When the application is administratively complete, the reviewer shall enter the date in the database or log book and immediately notify the applicant by mail. The period for technical review begins.

252:4-7-8. Technical review

(a) Each program shall have the time period specified in Parts 3 through 5 of this Subchapter to review each application for technical compliance with the relevant rules and to reach a final determination. If the data in the application does not technically comply with the relevant rules or law, the reviewer may notify the applicant by mail, describing with reasonable specificity the deficiencies and requesting supplemental information.

(b) Any environmental permit that is not described in this Subchapter shall be reviewed with all due and reasonable speed.

252:4-7-9. When review times stop

The time period for review stops during:

- (1) litigation;
- (2) public review and participation, including waiting periods, comment periods, public meetings, administrative hearings, DEO preparation of response to comments and/or review by state or federal agencies;
- (3) requests for supplemental information; and
- (4) the time in which an applicant amends his/her application of his/her own accord.

252:4-7-10. Supplemental time

The Notice of Deficiencies and request for supplemental information may state that up to 30 additional calendar days may be added to the application processing time. Requests for supplemental information may also state that additional days for technical review equal to the number of days the applicant used to respond may be added to the review time.

252:4-7-11. Extensions

Extensions to the time lines of this Subchapter shall only be made by agreement or when the Executive Director certifies that circumstances outside the DEO's control, including acts of God, a substantial and unexpected increase in the number of applications filed, or additional review duties imposed on the DEO from an outside source, prevent the reviewer from meeting the time periods.

252:4-7-12. Failure to meet deadline

Where failure to meet a deadline is imminent, then:

- (1) At least thirty (30) calendar days prior to the deadline the DEO shall reassign staff and/or retain outside consultants to meet such deadline; or
- (2) The applicant may agree to an extension of time for a specific purpose and period of time with refund of the entire application fee, unless a refund is prohibited by law.

252:4-7-13. Notices

(a) **Statutory requirements for notice.** The Uniform Environmental Permitting Act requires an applicant to give notice in accordance with 27A O.S. § 2-14-301.

(b) **Notice to landowner.** Applicants shall certify by affidavit that they own the real property, have a current lease or easement which is given to accomplish the permitted purpose or have provided legal notice to the landowner.

(c) **Notice content.** The applicant shall provide DEO with a draft notice for approval prior to publication. All published legal notice(s) shall contain the:

- (1) Name and address of the applicant;
- (2) Name, address and legal description of the site, facility and/or activity;
- (3) Purpose of notice;
- (4) Type of permit or permit action being sought;
- (5) Description of activities to be regulated;
- (6) Locations where the application may be reviewed;
- (7) Names, addresses and telephone numbers of contact persons for the DEO and for the applicant;
- (8) Description of public participation opportunities and time period for comment and requests; and
- (9) Any other information required by DEO rules.

(d) **Proof of publication.** Within twenty (20) days after the date of publication, an applicant shall provide the DEO with a written affidavit of publication for each notice published. In case of a mistake in a published notice, the DEO shall require a legal notice of correction or republication of the

Permanent Final Adoptions

entire notice, whichever is appropriate. Inconsequential errors in spelling, grammar or punctuation shall not be cause for correction or republication.

(e) **Exception to notice requirement.** Applicants for solid waste transfer station permits may be exempt from public meeting requirements under 27A O.S. § 2-10-307.

(f) **Additional notice.**

(1) Applicants for a NPDES, RCRA or UIC permit are subject to additional notice provisions of federal requirements adopted by reference as DEO rules.

(2) Applicants for a proposed wastewater discharge permit that may affect the water quality of a neighboring state or a Part 70 permit that may affect the air quality of a neighboring state must give written notice to the environmental regulatory agency of that state. [27A O.S. § 2-5-112(E)]

(3) Applicants for a landfill permit shall provide notice by certified mail, return receipt requested, to owners of mineral interests and to adjacent landowners whose property may be substantially affected by installation of a landfill site. See *DuLaney v. OSDH*, 868 P2d 676 (Okl. 1993).

252:4-7-14. Withdrawing applications

(a) **By applicant.** An applicant may withdraw an application at any time with written notice to the DEO and forfeiture of fees.

(b) **By DEO.** Except for good cause shown, when an applicant fails to supplement an application within 180 days after the mailing date of a Notice of Deficiencies, or by an agreed date, the DEO shall void the application. The DEO shall notify the applicant of an opportunity to show cause why this should not occur.

252:4-7-15. Permit issuance or denial

(a) **Compliance required.** A new, modified or renewed permit or other authorization sought by the applicant shall not be issued until the DEO has determined the application is in substantial compliance with applicable requirements of the Code and DEO rules.

(b) **Conditions for issuance.** The Department may not issue a new, modified or renewed permit or other authorization sought by the applicant if:

(1) The applicant has not paid all monies owed to the DEO or is not in substantial compliance with the Code, DEO rules and the terms of any existing DEO permits and orders. The DEO may impose special conditions on the applicant to assure compliance and/or a separate schedule which the DEO considers necessary to achieve required compliance; or

(2) Material facts were misrepresented or omitted from the application and the applicant knew or should have known of such misrepresentation or omission.

252:4-7-16. Tier II and III modifications

For Tier II and III permit modification actions, only

those issues relevant to the modification(s) shall be reopened for public review and comment.

252:4-7-17. Permit decision-making authority

(a) **Designated positions.** The Executive Director may delegate in writing the power and duty to issue, renew, amend, modify and deny permits and take other authorization or registration action. Unless delegated to a Division Director by formal assignment or rule, the authority to act on Tier I applications shall be delegated to positions within each permitting program having technical supervisory responsibilities and, for local actions authorized by law, to environmental specialist positions held by the DEO's local services representatives. The authority to act on emergency permits or Tier II applications shall be delegated to the Division Director of the applicable permitting division.

(b) **Revision.** The Executive Director may amend any delegation in writing.

252:4-7-18. Pre-issuance permit review and correction

(a) **Applicant review.** The DEO may ask an applicant to review its permit for calculation and clerical errors or mistakes of fact or law before the permit is issued.

(b) **Correction.** The DEO may correct any permit before it is issued.

(1) **Notice of significant corrections.** For permits based on Tier II and III applications, an applicant shall publish legal notice in one newspaper local to the site of any correction or change proposed by the DEO which significantly alters a facility's permitted size, capacity or limits.

(2) **Comments.** The DEO may open a public comment period and/or reconvene a public meeting and/or administrative hearing to receive public comments on the proposed correction(s).

252:4-7-19. Consolidation of permitting process

(a) **Discretionary.** Whenever an applicant applies for more than one permit for the same site, the DEO may authorize, with the consent of the applicant, the review of the applications to be consolidated so that each required draft permit, draft denial and/or proposed permit is prepared at the same time and public participation opportunities are combined.

(b) **Scope.** When consolidation is authorized by the DEO:

(1) The procedural requirements for the highest specified tier shall apply to each affected application.

(2) The DEO may also authorize the consolidation of public comment periods, process and public meetings, and/or administrative permit hearings.

(3) Final permits may be issued together.

(c) **Renewal.** The DEO may coordinate the expiration dates of new permits issued to an applicant for the same facility or activity so that all the permits are of the same duration.

(d) Multiple modifications. Subsections (a) and (b) of this section shall also apply to multiple Tier II and III applications for permit modifications.

PART 3. AIR QUALITY DIVISION TIERS AND TIME LINES

252:4-7-31. Air quality time lines

The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

- (1) Construction permits:
 - (A) PSD and Part 70 Sources - 365 days.
 - (B) Minor Facilities - 180 days.
- (2) Operating permits:
 - (A) Part 70 Sources - 540 days.
 - (B) Minor Facilities - 365 days.
- (3) Relocation permits - 30 days.

252:4-7-32. Air quality applications - Tier I

(a) Minor facility permits. The following air quality authorizations for minor facilities require Tier I applications.

- (1) New permits. New construction, operating and relocation permits.
- (2) Modifications of permits.
 - (A) Modification of a construction permit for a minor facility that will remain minor after the modification.
 - (B) Modification of an operating permit that will not change the facility's classification from minor to major.
 - (C) Extension of expiration date of a construction permit.
- (3) Renewals. Renewals of operating permits.

(b) Part 70 source permits. The following air quality authorizations for Part 70 sources require Tier I applications.

- (1) New permits.
 - (A) New construction permit for an existing Part 70 source for any change considered minor under 252:100-8-7.2(b)(1).
 - (B) New operating permit that:
 - (i) is based on a construction permit that was processed under Tier II or III, and 252:100-8-8, and
 - (ii) has conditions which do not differ from the construction permit's operating conditions in any way considered significant under 252:100-8-7.2(b)(2).
- (2) Modifications of permits.
 - (A) Modification of any operating permit condition that:
 - (i) is based on the operating conditions of a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) does not differ from those construction permit conditions in any way considered significant under 252:100-8-7.2(b)(2).

(B) A construction or operating permit modification that is minor under 252:100-8-7.2(b)(1).

(C) Extension of expiration date of a Part 70 source's construction permit with no or minor modifications.

(c) Other authorizations. The following air quality authorizations require Tier I applications.

- (1) New, modified and renewed individual authorizations under general operating permits for which a schedule of compliance is not required by 252:100-8-5(c)(8)(B)(i).
- (2) Burn approvals.
- (3) Plant-wide emission plan approval under 252:100-37-25(b) or 252:100-39-46(j).
- (4) Administrative amendments of all air quality permits and other authorizations.
- (5) Alternative emissions reduction authorizations. (Also subject to state implementation plan revision procedures in 252:100-11.)

252:4-7-33. Air quality applications - Tier II

(a) Minor facility permit actions. Any minor facility seeking a permit for a modification that when completed would turn it into a Part 70 source is required to apply under subsection (b) of this section.

(b) Part 70 source permits. The following air quality authorizations for Part 70 sources require Tier II applications.

- (1) New permits.
 - (A) New construction permit for a new Part 70 source not classified under Tier III.
 - (B) New construction permit for an existing Part 70 source for any change considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.
 - (C) New operating permit for a Part 70 source that did not have an underlying construction permit processed under Tier II or III, and 252:100-8-8.
 - (D) New operating permit with one or more conditions that differ from the underlying Tier II or III construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).
 - (E) New acid rain permit that is independent of a Part 70 permit application.
 - (F) New temporary source permit under 252:100-8-6.2.
- (2) Modifications of permits.
 - (A) Significant modification, as described in 252:100-8-7.2(b)(2), of an operating permit that is not based on an underlying construction permit processed under Tier II or III, and 252:100-8-8.

735

Permanent Final Adoptions

(B) Modification of an operating permit when the conditions proposed for modification differ from the underlying construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(C) A construction permit modification considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(3) Renewals. Renewals of operating permits.

(c) Other authorizations. The following air quality authorizations require Tier II applications.

(1) New, modified and renewed general operating permits.

(2) Individual authorizations under any general operating permit for which a schedule of compliance is required by 252:100-8-5(c)(8)(B)(i).

252:4-7-34. Air quality applications - Tier III

(a) New major stationary sources. A construction permit for any new major stationary source listed in this subsection requires a Tier III application. For purposes of this section, "Major stationary source" means:

(1) Any of the following sources of air pollutants which emits, or has the potential to emit, 100 tons per year or more of any pollutant subject to regulation:

(A) carbon black plants (furnace process),

(B) charcoal production plants,

(C) chemical process plants,

(D) coal cleaning plants (with thermal dryers),

(E) coke oven batteries,

(F) fossil-fuel boilers (or combustion thereof), totaling more than 250 million BTU per hour heat input,

(G) fossil fuel-fired steam electric plants of more than 250 million BTU per hour heat input,

(H) fuel conversion plants,

(I) glass fiber processing plants,

(J) hydrofluoric, sulfuric or nitric acid plants,

(K) iron and steel mill plants,

(L) kraft pulp mills,

(M) lime plants,

(N) incinerators, except where used exclusively as air pollution control devices,

(O) petroleum refineries,

(P) petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels,

(Q) phosphate rock processing plant,

(R) portland cement plants,

(S) primary aluminum ore reduction plants,

(T) primary copper smelters,

(U) primary lead smelters,

(V) primary zinc smelters,

(W) secondary metal production plants,

(X) sintering plants,

(Y) sulfur recovery plants, or

(Z) taconite ore processing plants, and

(2) Any other source not specified in paragraph (1) of this definition which emits, or has the potential to emit, 250 tons per year or more of any pollutant subject to regulation.

(b) Existing incinerators. An application for any change in emissions or potential to emit, or any change in any permit condition, that would have caused an incinerator to be defined as a major stationary source when originally permitted shall require a Tier III application.

(c) Potential to emit. For purposes of this section, "potential to emit" means emissions resulting from the application of all enforceable permit limitations as defined in OAC 252:100-1-3.

PART 5. LAND PROTECTION DIVISION TIERS AND TIME LINES

252:4-7-51. Waste management time lines

The Land Protection Division shall technically review applications and issue or deny permits within the following periods of time:

(1) Hazardous waste applications, including new RCRA permits or renewals, new state recycling permits, Class 3 modifications, closure and post-closure plans, transfer station plans and plan modifications - 300 days;

(2) Brownfields applications and each submittal or resubmittal - 60 days;

(3) Solid waste applications and each submittal or resubmittal - 90 days;

252:4-7-52. Hazardous waste management applications - Tier I

The following hazardous waste management authorizations require Tier I applications.

(1) Class 1 modification of any hazardous waste permit requiring prior Department approval as specified in 40 CFR § 270.42.

(2) Modification to a recycling permit in accordance with 27A O.S. § 2-7-118(A).

(3) Class 2 permit modification as defined in 40 CFR § 270.42.

(4) Emergency hazardous waste disposal plan approval.

(5) Hazardous waste generator disposal plan approval.

(6) Technical plan approval.

(7) Hazardous waste transporter license.

(8) Hazardous waste transfer station plan modification which is not related to capacity.

(9) Emergency permit issued in accordance with 40 CFR § 270.61.

(10) Interim status closure plan approval in accordance with 40 CFR § 265.113(d)(4).

(11) Minor administrative modification of all permits and other authorizations.

(12) Renewal of disposal plan approval and transporter license.

(13) New, modified or renewed authorization under a general permit.

(14) Approval of temporary authorizations in accordance with 40 CFR § 270.42.

252:4-7-53. Hazardous waste management applications - Tier II

The following hazardous waste management authorizations require Tier II applications.

(1) On-site hazardous waste treatment, storage or disposal permit.

(2) Mobile recycling permit.

(3) Research & Development permit.

(4) Class 3 modification of any hazardous waste permit as specified in 40 CFR § 270.42.

(5) Modification of an on-site hazardous waste facility permit for a fifty percent (50%) or greater increase in permitted capacity for storage, treatment, and/or disposal, including incineration.

(6) Modification of an on-site hazardous waste facility permit for an expansion of permitted boundaries.

(7) Modification of on-site hazardous waste facility permit in which the application is for new treatment, storage, or disposal methods or units which are significantly different from those permitted.

(8) Renewal of a hazardous waste treatment, storage or disposal permit.

(9) Hazardous waste transfer station plan approval.

(10) Hazardous waste transfer station plan modification involving increase in approved capacity.

(11) Variance which is not part of a permit application.

(12) Variance which is part of a Tier II permit application.

252:4-7-54. Hazardous waste management applications - Tier III

The following hazardous waste management authorizations require Tier III applications.

(1) Off-site hazardous waste treatment, storage, disposal, incineration and/or recycling permit.

(2) Modification of an off-site hazardous waste facility permit for a fifty percent (50%) or greater increase in permitted capacity for storage, treatment, and/or disposal, including incineration.

(3) Modification of an off-site hazardous waste facility permit for an expansion of permitted boundaries.

(4) Modification of off-site hazardous waste facility permit in which the application is for new treatment, storage, or disposal methods or units which are significantly different from those permitted.

(5) Variance which is part of a Tier III application.

252:4-7-55. Radiation management applications - Tier I

The following radiation management authorizations require Tier I applications:

(1) New, amended and renewed operating permits for radiation machines;

(2) New, amended and renewed permits for x-ray fluorescence spectroscopy instruments used to detect lead in paint;

(3) New and renewed specific licenses under the state agreement program not classified under Tiers II or III;

(4) Industrial radiography certifications;

(5) Approvals of license termination plans that require no decommissioning or remediation;

(6) Decommissioning and remediation plans required for remediation due to the use, storage or disposal of one or more radioactive materials with a half-life of 120 days or less;

(7) DEQ approvals of documentation showing residual radioactivity levels for a site or property are within acceptable limits as set by Chapter 410;

(8) Minor amendments of all authorizations classified under Tiers I, II or III; and

(9) Major amendments of all authorizations classified under Tier I.

252:4-7-56. Radiation management applications - Tier II

The following radiation management authorizations require Tier II applications:

(1) Decommissioning and remediation plans required for on-site remediation due to the use, storage or disposal of one or more radioactive materials with a half-life of more than 120 days, except for those facilities described in 252:4-7-57(3)(A);

(2) New or renewed permits for the non-commercial treatment or disposal of radioactive waste, generated by the applicant, by incineration or the amendment of the incinerator permit for a capacity increase or for any expansion beyond permitted boundaries for the purpose of expanding operations or storage; and

(3) Major amendments of all authorizations classified under Tier II.

252:4-7-57. Radiation management applications - Tier III

The following radiation management authorizations require Tier III applications:

(1) New or renewed permits for the land disposal of low-level radioactive waste received from others and the major amendment thereof;

(2) New or renewed permits for the commercial treatment or disposal of radioactive waste by incineration and the major amendment thereof; and

(3) Decommissioning and remediation plans and the major amendment thereof:

(A) for nuclear fuel cycle facilities or facilities and sites involved in the manufacturing or processing of licensed quantities of radioactive materials; and

(B) for sites that require both on- and off-site remediation due to the use, storage or disposal of

737

Permanent Final Adoptions

one or more radioactive materials with a half-life of more than 120 days.

252:4-7-58. Solid waste management applications - Tier I

The following solid waste management authorizations require Tier I applications.

(1) New permits.

(A) Locally approved solid waste transfer stations. Permit for a solid waste transfer station that, prior to application filing, received county commissioner approval according to 27A O.S. § 2-10-307.

(B) Biomedical waste transfer stations using only sealed containers. Biomedical waste transfer station permit when activities are limited to:

- (i) consolidation of sealed containers; and/or
- (ii) transfer of sealed containers from one vehicle or mode of transportation to another.

(C) Disaster relief. Emergency authorization for waste disposal resulting from a natural disaster.

(2) Modifications.

(A) All facilities.

(i) Modification of a solid waste permit to add methods, units or appurtenances for liquid bulking processes; yard waste composting; recycling operations; waste screening; or baling, chipping, shredding or grinding equipment or operations.

(ii) Modification to any solid waste permit to make minor changes.

(iii) Modification of plans for closure and/or post-closure.

(iv) Administrative modification of all permits and other authorizations.

(B) On-site and off-site land disposal facilities. Modification of an existing land disposal permit for a lateral expansion within permitted boundaries.

(C) Capacity increases of less than 25% with exceptions. The modification of a solid waste permit, excluding incineration permits, involving a request for less than twenty-five percent (25%) increase in permitted capacity for storage, processing or disposal when the request is for equivalent methods, units or appurtenances as those permitted and which does not involve expansions of permitted boundaries.

(3) Plans and other authorizations. The approval of new and when applicable, modified or renewed:

(A) Plans for composting of yard waste only.

(B) Permit transfers.

(C) Non-hazardous industrial solid waste disposal plans.

(D) Technical plans.

(E) County solid waste management plans.

(F) Individual authorizations under a general permit.

(G) All other administrative approvals required by solid waste rules.

252:4-7-59. Solid waste management applications - Tier II

The following solid waste management authorizations require Tier II applications.

(1) New permits.

(A) On-site solid waste processing facilities with exception. Permit for an on-site solid waste processing facility except yard waste composting as listed under Tier I.

(B) Solid waste transfer stations with exceptions. Permit for a solid waste transfer station except:

- (i) a transfer station permit with county commissioner approval as listed under Tier I, or
- (ii) a biomedical waste transfer station permit listed under Tier I.

(C) On-site incinerators with exceptions. Permit for an on-site incinerator except those exempt under solid waste rules or those that have an approved Air Quality permit or Solid Waste Management Plan.

(D) On-site land disposal sites. Permit for an on-site solid waste disposal site.

(E) Material Recovery Facility (MRF). Permit for a Material Recovery Facility if waste is not source-separated.

(2) Modifications.

(A) All facilities. Modification of a permit for a change in waste type.

(B) On-site facilities. Any modification of an on-site solid waste permit, except as listed under Tier I.

(C) Off-site facilities.

(i) Modification of any off-site solid waste permit involving a request for more than twenty-five percent (25%) but less than fifty percent (50%) increase in permitted capacity for storage, processing or disposal (excluding incineration) when the request is for equivalent methods, units or appurtenances as those permitted, except those listed under Tier I.

(ii) Modification of any off-site processing facility involving an expansion of permitted boundaries.

(D) Incinerators.

(i) Modification of an on-site incinerator permit for any increase in permitted capacity for storage, processing, or disposal.

(ii) Modification of an off-site incinerator permit involving a request for increases less than fifty percent (50%) in permitted capacity for storage, processing, or disposal when the

request is for equivalent methods, units or appurtenances as those permitted.

(3) General permit, New, modified or renewed general permit.

252:4-7-60. Solid waste management applications - Tier III

The following solid waste management authorizations require Tier III applications.

(1) New permits.

(A) Off-site processing facilities with exceptions. Permit for an off-site processing facility, unless otherwise specified in Tier I or Tier II.

(B) Off-site land disposal facility. Permit for an off-site solid waste land disposal site.

(C) Off-site incinerator. Permit for an off-site incinerator.

(2) Modifications.

(A) Off-site facilities; significant increase in capacity. Modification of any off-site solid waste permit involving a fifty percent (50%) or greater increase in permitted capacity for storage, processing, and/or disposal, including incineration.

(B) Off-site land disposal facility. Modification of an off-site solid waste land disposal permit for an expansion of permitted boundaries.

(C) Off-site facilities; different methods, units or appurtenances. Modification of an off-site solid waste permit in which the request involves different methods, units or appurtenances than those permitted, except those listed under Tier I.

(3) Variance approvals. All variances.

252:4-7-61. Brownfields applications - Tier I

A Tier I application shall be required for a Memorandum of Agreement for site characterization.

252:4-7-62. Brownfields applications - Tier II

A Tier II application shall be required for all Certificates.

252:4-7-63. Brownfields applications - Tier III

None.

PART 7. WATER QUALITY DIVISION TIERS AND TIME LINES

252:4-7-71. Water quality time lines

The Water Quality Division shall technically review applications and issue or deny permits within the following periods of time:

(1) Discharges, 401 Certifications, industrial wastewater other than discharge, pretreatment trust users, and sludge management plan - 180 days;

(2) Public water supply and water pollution control construction - 90 days; and

(3) UIC applications - 300 days.

252:4-7-72. Laboratory certification applications - Tier I

A Tier I application shall be required for a new, modified, amended or renewed laboratory certification.

252:4-7-73. Water quality applications - Tier I

The following water quality authorizations require Tier I applications.

(1) Permit for flow-through impoundment(s) as part of the pretreatment process.

(2) Re-permitting of facility with an expiring permit for industrial non-discharging impoundment or septic tank system.

(3) Re-permitting of expiring permit with minor or no change(s) for land application of sludge and/or wastewater for same site.

(4) New, modified or renewed authorization under a general permit, including but not limited to general permits for stormwater, underground storage tanks and petroleum storage and treatment facilities.

(5) Approval of new pretreatment program.

(6) Closure plan approval.

(7) Dredge and fill certification.

(8) Approval of exemption for water line extensions.

(9) Approval of exemption for water distribution and wastewater collection systems.

(10) Approval for alternative individual on-site sewage disposal systems.

(11) Approval for alternative small public on-site sewage disposal systems.

(12) Residential development approval.

(13) Transfer of discharge permit.

(14) Minor modification of discharge permit.

(15) Minor modification of permit for land application of sludge and/or wastewater.

(16) Modification of or addition to a municipal wastewater treatment system (including sewer line extensions).

(17) Modification of or addition to a public water supply treatment and/or distribution system.

(18) Modification of non-discharging impoundment and/or septic tank system permit.

(19) Modification of an approved pretreatment program.

(20) Administrative amendment of permits or other authorizations for the correction of administrative or typographical errors.

252:4-7-74. Water quality applications - Tier II

The following water quality authorizations require Tier II applications.

(1) Permit for municipal wastewater treatment system.

(2) Permit for public water supply system.

(3) Discharge permit for minor facility.

Permanent Final Adoptions

- (4) Individual storm water permit.
- (5) Permit for industrial non-discharging impoundment or septic tank.
- (6) Permit for land application of sludge and/or wastewater at new site system.
- (7) Re-permitting of a facility with expiring discharge permit.
- (8) Re-permitting of facility with expiring individual storm water discharge permit.
- (9) Re-permitting with major change(s) from expiring permit for land application of sludge and/or wastewater for the same site.
- (10) Variance including thermal components of effluent limitations for an individual discharge permit.
- (11) Major modification of discharge permit.
- (12) Major modification of permit for land application of sludge and/or wastewater.
- (13) New, modified or renewed general permit.

252:4-7-75. Water quality applications - Tier III

A new discharge permit for a major facility requires a Tier III application.

252:4-7-76. UIC applications-Tier I

The following underground injection control authorizations require Tier I applications.

- (1) Minor modification of a permit for Class I, III, and V wells in accordance with 40 CFR § 144.41.
- (2) Modification of an approved closure and/or post-closure plan for a Class I hazardous waste injection well.
- (3) Modification of an approved plugging and abandonment plan for Class I nonhazardous and Class III injection wells.
- (4) Modification of an approved corrective action plan for a Class I injection well.
- (5) Emergency permit in accordance with 40 CFR § 144.34.
- (6) New, modified or renewed authorization under a general permit.
- (7) Minor administrative modification of all permits and other authorizations.

252:4-7-77. UIC applications - Tier II

The following underground injection control authorizations require Tier II applications.

- (1) On-site Class I nonhazardous waste injection well permit.
- (2) Class III and V injection well permits except Class V permits issued under Tier III.
- (3) Modification and/or renewal of all DEQ-issued underground injection control well permits.

252:4-7-78. UIC applications - Tier III

The following underground injection control authorizations require Tier III applications.

- (1) Class I hazardous waste injection well permit.
- (2) Off-site Class I nonhazardous waste injection well permit.
- (3) Class V industrial waste injection well permit.

SUBCHAPTER 9. ADMINISTRATIVE PROCEEDINGS

PART 1. ENFORCEMENT

252:4-9-1. Notice of Violation ("NOV")

Unless otherwise provided by the particular enabling legislation, administrative enforcement proceedings shall begin with a written notice of violation (NOV) being served upon the Respondent. The NOV shall set forth Respondent's action or omission and the specific provision of the Code, rules, license or permit alleged to be violated. An NOV may be a letter, inspection sheet, consent order or final order, if it meets the requirements of this Section.

252:4-9-2. Administrative compliance orders

(a) **When issued.** The Executive Director, upon the request of a Division, may issue an administrative order requiring compliance, assessing penalties for past violations and specifying penalties for continuing noncompliance.

(b) **Contents.** An administrative compliance order shall specify the findings of fact and conclusions of law upon which it is based and shall set a time for the Respondent to comply. The Order shall specify the penalty, not to exceed the statutory maximum per day of noncompliance, to be assessed in the event that the Respondent fails to comply with the Order within the prescribed time, and, if applicable, the penalty assessed for past violations of the Code, rules, or licenses or permits. The Order shall advise the Respondent that it shall become final unless an administrative hearing is requested in writing in accordance with 252:4-9-32 within fifteen (15) days of service of the Order.

(c) **Service.** An Order shall be served in accordance with 252:4-9-35.

(d) **Order following hearing.** Based on the hearing and record, a proposed order will be sustained, modified, or dismissed by the Executive Director. If the hearing process extends beyond any compliance deadline specified in the Order, fines specified in the Order for violations of the Order will continue to accrue during the hearing process unless the Administrative Law Judge stays the penalty upon request for good cause shown.

252:4-9-3. Determining penalty

In determining the amount of penalty specified in an administrative penalty order, the DEO may consider the following:

- (1) the factors specified by 27A O.S. § 2-3-502(K)(2); and
- (2) the extent and severity of environmental

degradation or adverse health effects caused by the violation.

252:4-9-4. Assessment orders

(a) Issuance of assessment order. Any time the DEO believes the Order has been violated, the Executive Director may issue an order assessing an administrative penalty pursuant to 27A O.S. § 2-3-502. In determining an appropriate administrative penalty, the Executive Director may consider Respondent's efforts to comply after being served with the Order.

(b) Content of assessment orders. An assessment order must state the nature and period of the violation and must determine the amount of the fine. The fine is due and payable immediately upon issuance of the assessment order, unless a hearing is requested within seven (7) days. See also 27A O.S. § 2-3-502.

(c) Continuing violations. If the DEO believes that violations of the administrative compliance or penalty order continue after the issuance of an assessment order, the Executive Director may issue additional assessment orders covering periods of violation since the period covered by the issuance of a previous assessment order.

252:4-9-5. Considerations for self-reporting of noncompliance

(a) Conditions for not seeking administrative and civil penalties. Except in the case of habitual noncompliance or as otherwise provided in this section, in evaluating an enforcement action for a regulated entity's failure to comply with DEO rules, the DEO will not seek an administrative or civil penalty when the following circumstances are present:

(1) The regulated entity voluntarily, promptly and fully discloses the apparent failure to comply with applicable state environmental statutes or rules to the appropriate DEO Division in writing before the Division learns of it or is likely to learn of it imminently;

(2) The failure is not deliberate or intentional;

(3) The failure does not indicate a lack or reasonable question of the basic good faith attempt to understand and comply with applicable state environmental statutes or rules through environmental management systems appropriate to the size and nature of the activities of the regulated entity;

(4) The regulated entity, upon discovery, took or began to take immediate and reasonable action to correct the failure (i.e., to cease any continuing or repeated violation);

(5) The regulated entity has taken, or has agreed in writing with the appropriate Division to take, remedial action as may be necessary to prevent recurrence of such failure. Any action the regulated entity agrees to take must be completed;

(6) The regulated entity has addressed, or has agreed in writing with the appropriate Division to address, any

environmental impacts of the failure in an acceptable manner;

(7) The regulated entity has not realized and will not realize a demonstrable and significant economic or competitive advantage as a result of non-compliance; and

(8) The regulated entity cooperates with the DEO as the DEO performs its duties and provides such information as the DEO reasonably requests to confirm the entity's compliance with these conditions.

(b) Partial qualification. Notwithstanding the failure of a regulated entity to meet all of the conditions in subsection a of this section, the DEO will consider the nature and extent of such actions of the regulated entity in mitigation of any administrative or civil penalty otherwise appropriate. If the regulated entity meets all conditions in subsection (a) of this section except item seven (7) relating to significant economic or competitive advantage, the DEO will seek an administrative or civil penalty only to the extent of the economic or competitive advantage gained.

(c) Relationship to federal/state agreements. In the event of any conflict, the elimination or mitigation of penalties pursuant to subsections (a) and (b) of this section is subject to agreements between the DEO and the United States Environmental Protection Agency (USEPA) relating to regulatory program delegation or authorization from the USEPA to the DEO.

(d) Applicability. This section applies to all enforcement cases arising from violations discovered by or brought to the attention of the DEO after June 2, 1997.

PART 3. INDIVIDUAL PROCEEDINGS

252:4-9-31. Individual proceedings filed by DEO

(a) Initiation. Individual proceedings may be initiated by DEO program areas by filing an administrative compliance or penalty order with the Administrative Law Clerk.

(b) Content. Each order shall name the Respondent(s), contain a brief statement of the facts, refer to the specific provision of the Code, rules, license or permit alleged to be violated, state the relief requested and include notice to the Respondent(s) of the opportunity to request an administrative hearing.

(c) Style. The style of the case shall be in accordance with the format in Appendix D.

252:4-9-32. Individual proceedings filed by others

(a) Request for administrative hearing in response to Order. A request for an individual proceeding initiated by the Respondent named in an Order shall be in writing and shall specifically set forth the Respondent's objections to the Order.

(b) Administrative hearing on Tier III permits. An individual proceeding on a proposed permit for a Tier III application may be requested in accordance with 27A O.S. § 2-14-304(C)(1).

Permanent Final Adoptions

(c) **Style.** The style of the case shall be in accordance with the format in Appendix D.

(d) **Content.** All requests for individual proceedings must be in writing, contain a brief statement of the basis of the request and the name and address of each requester, and be signed by the requester or an authorized representative.

(e) **Declaratory ruling.** Any person who alleges that any DEO rule or order interferes with or impairs, or threatens to interfere with or impair, his/her legal rights may petition the DEO, formally requesting a declaratory ruling on the applicability of the rule or order. After the petition is filed, the DEO shall provide a copy to the Board.

(1) **Form and content of petition.** All petitions shall be in writing and filed with the Administrative Law Clerk. The petition shall include the information and follow the format in Appendix B.

(2) **Determination.** Petitions for declaratory rulings shall be decided by the DEO. Rulings shall state the findings of fact and conclusions of law upon which they are based. If the DEO refuses to make a ruling or begin an individual proceeding within 30 days, the petition shall be deemed to have been denied. If the DEO begins an individual proceeding on the petition, it shall offer an opportunity for a hearing to the petitioner. After the DEO issues a ruling or the Executive Director issues a final order, the DEO shall provide a copy of the ruling or final order to the Board at its next available meeting.

(3) **Mailing.** The DEO shall mail a copy of the ruling or final order to the petitioner.

252:4-9-33. Scheduling and notice of hearings

The DEO shall schedule an administrative hearing after receipt of a proper and timely request. The Administrative Law Clerk shall notify the parties of the date, time and place of the hearing. Notice shall satisfy the requirements of the APA and shall be made at least fifteen (15) days prior to the hearing unless otherwise provided by law or agreed by the parties.

252:4-9-34. Administrative Law Judges and Clerks

(a) **Administrative Law Judge.** The Executive Director may designate an Administrative Law Judge for any administrative hearing in accordance with 27A O.S. § 2-3-103. Administrative Law Judges shall not have had prior involvement in the matter other than as an Administrative Law Judge, unless the parties waive this requirement.

(b) **Administrative Law Clerk.** The Executive Director may designate an Administrative Law Clerk to maintain the administrative hearing dockets and records, and perform such other duties as described in this Chapter or incidental thereto.

(c) **Authority.** Administrative Law Judges have complete authority to conduct individual proceedings and may take

any action consistent with the APA and the rules of this subchapter. Administrative Law Judges may:

(1) arrange and issue notice of the date, time and place of hearings and conferences;

(2) establish the methods and procedures to be used in the presentation of the evidence;

(3) hold conferences to settle, simplify, determine, or strike any of the issues in a hearing, or to consider other matters that may facilitate the expeditious disposition of the hearing;

(4) administer oaths and affirmations;

(5) regulate the course of the hearing and govern the conduct of participants;

(6) examine witnesses;

(7) rule on, admit, exclude and limit evidence, at or before hearings;

(8) establish the time for filing motions, testimony, and other written evidence, briefs, findings, and other submissions, and hold the record open for such purposes;

(9) rule on motions and pending matters;

(10) divide the hearing into stages or join claims of parties whenever the number of parties is large or the issues are numerous and complex;

(11) restrict attendance by persons not parties to the hearing in appropriate cases;

(12) admit attorneys from other jurisdictions to practice law before the DEO in accordance with Rules of the Oklahoma Bar Association, 5 O.S. Chapter 1, Appendix 1, Article II, § 5, and administer the oath required by 5 O.S. § 2.

(13) require briefs on any relevant issues;

(14) request proposed findings of fact, conclusions of law and a proposed order from all parties; and

(15) restrict testimony to the facts alleged in an assessment order.

(d) **Technical assistance.** At the request of the Administrative Law Judge, the Executive Director may designate a DEO representative, who has had no assigned responsibilities related to the matter at issue, to serve as technical adviser to the Administrative Law Judge.

252:4-9-35. Service

(a) **Generally.** Service shall be made in accordance with the Oklahoma Pleading Code, 12 O.S. § 2001 *et seq.*, and 27A O.S. § 2-3-502 unless otherwise allowed by this section.

(b) **By the DEO.** Where the DEO is serving notice, personal service may be made by a person designated by the Executive Director for that purpose.

(c) **By certified mail.** Service by certified mail shall be effective on the date of receipt or, if refused, on the date of refusal by the Respondent.

252:4-9-36. Responsive pleading

A Respondent may file, and the Administrative Law

Judge may direct a Respondent to file a responsive pleading to the initiated action.

252:4-9-37. Prehearing conferences

(a) **General.** The Administrative Law Judge may schedule and conduct prehearing conferences as necessary. The Administrative Law Clerk shall notify the parties of the scheduling of a prehearing conference. The Administrative Law Judge may hold a prehearing conference by telephone. On request, prehearing conferences shall be on the record.

(b) **Subjects.** Prehearing conferences may address:

- (1) identification and simplification of issues, including the elimination of frivolous claims or defenses;
- (2) amendments to the pleadings;
- (3) the plan and schedule of discovery and limitations to be placed thereon;
- (4) identification of admissions of fact to avoid unnecessary proof and cumulative evidence;
- (5) the identification of witnesses and substance of testimony, exhibits, and documents;
- (6) the use of prehearing briefs and prefiled testimony in the form of sworn affidavits;
- (7) settlement of all or some of the issues before the hearing;
- (8) adoption of special procedures for managing potentially difficult or protracted actions that may involve complex issues, multiple parties, novel or difficult legal questions, or evidence problems;
- (9) scheduling; and
- (10) such other matters as may aid disposition.

(c) **Schedules and orders.** A prehearing conference may result in a scheduling or other prehearing order. Subsequent changes to any prehearing or scheduling order may be made by the Administrative Law Judge by modifying the order upon good cause shown.

252:4-9-38. Discovery

Discovery shall be conducted in accordance with the Oklahoma Discovery Code (12 O.S. § 3224 *et seq.*) unless otherwise ordered by the Administrative Law Judge for good cause.

252:4-9-39. Subpoenas

(a) **Issuance.** Subpoenas for the attendance of witnesses, the furnishing of information required by the Administrative Law Judge and the production of evidence shall be issued in accordance with the APA and the Oklahoma Pleading Code.

(b) **Failure to obey.** The Executive Director may seek an appropriate judicial order to compel compliance by persons who fail to obey a subpoena, who refuse to be sworn or make an affirmation at a hearing, or who refuse to answer a proper question during a hearing. The hearing may proceed despite any such refusal but the Administrative Law Judge may, in his/her discretion at any time, continue the proceedings as necessary to secure a court ruling.

252:4-9-40. Record

(a) **To be made.** A record of the hearing shall be made, which shall be a tape recording unless otherwise agreed by the parties and the Administrative Law Judge. The recording will not be transcribed as a matter of course. A transcript may be obtained by submitting a written request to the Administrative Law Clerk and tendering payment in an amount sufficient to pay the cost of having the recording transcribed.

(b) **Court reporter.** A party may request a court reporter. The requesting party shall pay the costs, and the original transcript shall be filed in the case file as part of the record in the case. Each person or party requesting copies shall make arrangements with the reporter and pay the costs.

(c) **Maintained.** The record of a proceeding and the file containing the notices and the pleadings will be maintained by the Administrative Law Clerk. All pleadings, motions, orders and other papers submitted for filing in a proceeding shall be date/file stamped by the Administrative Law Clerk upon receipt. The burden of showing substantial prejudice by any failure to correctly file-stamp any submittal shall be upon the asserting party.

(d) **Contents.** The administrative record of all individual proceedings shall contain documents required by the APA, 75 O.S. § 309. An individual proceeding on a proposed permit for a Tier III application shall also include the following:

- (1) the permit application on file with the DEO, as amended;
- (2) all written comments received during the public comment period;
- (3) the tape or transcript of the public meeting;
- (4) documents resulting from the DEO's review of the permit application and public comments;
- (5) the draft permit, fact sheet and response to comments, if any, issued by the DEO; and
- (6) all published notices.

252:4-9-41. Motions

(a) **Filing.** All requests for action in a matter already before the DEO shall be made in a motion, signed by the party or his/her attorney, and filed with the Administrative Law Clerk.

(b) **Service.** Copies of motions shall be served on other parties in accordance with 252:4-9-35.

(c) **Response.** Within fifteen (15) days after service of any written motion, any party to the proceedings may file a response to the motion. The time for response may be extended or shortened by the Administrative Law Judge for good cause shown.

252:4-9-42. Continuances

A motion for an extension or continuance shall state the reasons for the request and specify the length of time requested. Unless made before the Administrative Law Judge in open hearing, motions for extensions of time or for

743

Permanent Final Adoptions

a continuance of the hearing to another date or time shall be in writing and filed with the Administrative Law Clerk. The Administrative Law Judge shall promptly grant or deny such request at his/her discretion. If the motion is denied, it may be renewed orally by the party at the hearing.

252:4-9-43. Summary judgment

The Administrative Law Judge may grant a motion for summary judgment, subject to 252:4-9-46.

252:4-9-44. Default

(a) Generally. Any Respondent who fails to appear, after receipt of notice, may be determined to have waived the right to appear and present a defense. A Final Order may be issued by the Executive Director granting the relief requested by default.

(b) Tier III application. The Executive Director may enter a default judgment against any party who fails to participate in an administrative hearing on a proposed permit for a Tier III application.

252:4-9-45. Withdrawal and dismissal

Parties may withdraw from a case and cases may be dismissed by the Administrative Law Judge in accordance with the Oklahoma Code of Civil Procedure.

252:4-9-46. Orders in administrative hearings

Proposed and final orders in administrative hearings shall be prepared and issued in accordance with the APA.

PART 5. AIR QUALITY ADVISORY COUNCIL HEARINGS

252:4-9-51. In general

The Air Quality Advisory Council is authorized to conduct individual proceedings on enforcement matters and requests for a variance from the Clean Air Act, 27A O.S. §§ 2-5-101 through 2-5-118, or the Air Pollution Control Rules, OAC 252:100.

252:4-9-52. Individual proceedings

Individual proceedings before the Air Quality Advisory Council will be conducted in accordance with the requirements in Part 3 of this Subchapter. To be heard by the Council, the request for hearing in response to an Order must include a request that the Council conduct the hearing. The Council may designate an Administrative Law Judge for individual proceedings to be held before the Council. The Council or its designee may perform Administrative Law Judge functions described in Part 3 of this Subchapter.

252:4-9-53. Variance

It is within the discretion of the Air Quality Advisory Council to decide whether or not an individual proceeding is necessary in granting a variance.

252:4-9-54. State implementation plan hearings

A state implementation plan (SIP) hearing may be initiated by an applicant for an alternative emissions reduction authorization under 252:100-11 by filing a request for a SIP hearing with the Administrative Law Clerk. A request that the hearing be conducted by the Air Quality Advisory Council must be included in the request for hearing. Additional requirements for a SIP hearing request are contained in 252:100-11-6.

SUBCHAPTER 11. COMPLAINT PROCESSING

252:4-11-1. Purpose

This Subchapter establishes procedures used to process environmental complaints received from the public.

252:4-11-2. Receipt of complaints

(a) Complaints may be made by any of the following:

- (1) the toll-free hotline;
- (2) mail, including electronic transmission;
- (3) telephone to any DEO telephone number; or
- (4) in person at any office of the DEO.

(b) Complainants may request to be anonymous or to remain confidential.

252:4-11-3. Investigation

After receipt of a complaint, the DEO may assign an investigator to obtain any information which may tend to prove there has or has not been a violation of the Code or rules, who the potentially responsible persons are, and any other information which may be needed to resolve the complaint.

252:4-11-4. Notification

(a) Potential actions. Within two (2) working days of receipt of a complaint, the DEO shall notify the complainant of the potential actions which may occur to resolve the complaint.

(b) Course of action. Within seven (7) working days of the receipt of a complaint, the DEO shall notify the complainant, in writing, of the action to be taken by the DEO.

(c) Final letter. Within seven (7) working days of determining that there is no longer a DEO violation, the DEO shall notify the complainant in writing.

(d) Enforcement. Complainants shall be notified of enforcement actions taken in response to a complaint in accordance with 27A O.S. § 2-3-503.

252:4-11-5. Referral of complaints

(a) To appropriate agency. If the DEO receives a complaint for which DEO has no authority and which clearly falls within the jurisdiction of another governmental entity, the complaint shall be referred to that governmental entity.

(b) To mediation. DEO may notify a complainant and

persons named in the complaint (Respondents), by mail, of the opportunity to mediate the complaint in accordance with 27A O.S. § 2-3-104.

252:4-11-6. False complaint

When the DEO has a reasonable suspicion that a complainant has filed a false complaint, the Executive Director may refer all investigation materials, including but not limited to, reports, notes, initial data collection forms and letters to the District Attorney's office in the area where the complainant resides.

SUBCHAPTER 13. ENVIRONMENTAL EDUCATION GRANTS

252:4-13-1. Authority and eligibility

(a) **Authority.** This subchapter is adopted pursuant to 75 O.S. § 302, 27A O.S. § 2-2-101, 47 O.S. § 1104.2 and Executive Order 98-37.

(b) **Eligibility.** Oklahoma teachers and youth group leaders are eligible to apply for environmental education grants provided by the DEO.

252:4-13-2. Amount of grants

The DEO will award the following amounts to successful applicants:

- (1) Up to and including \$ 200.00 for field trips;
- (2) Up to and including \$ 500.00 for environmental education projects; and
- (3) Up to and including \$1000.00 for outdoor classrooms.

252:4-13-3. Criteria

The following will be considered by the DEO in determining grant awards:

- (1) Project proposed, including how the project accomplishes the following factors:
 - (A) Promotes enthusiasm to learn more about the environment;
 - (B) Fits in the school curriculum or youth group program;
 - (C) Involves community partnerships and/or outreach, if applicable.
- (2) Number of students/youth participating;
- (3) Grade level of students/youth; and
- (4) Geographic location.

252:4-13-4. Application

(a) **Complete application.** A complete application consists of a cover page, a letter of commitment, a summary of the project, a projected timeline, a proposed budget and a procedure for evaluation of the project.

(b) **Attachments.** Photographs, clippings, diagrams and

other graphic materials, not to exceed five (5) pages double sided, may be attached to the application.

(c) **Document submission.** An original and two (2) copies, double sided, of the application and attachments must be submitted to the DEO, date-stamped or postmarked on or before the published deadline. The DEO will not accept applications submitted by telecopy/facsimile or e-mail.

252:4-13-5. Cover page

The cover page must include the following information:

- (1) Title of the project;
- (2) Name of contact person, position held and relationship to project;
- (3) Name of school or youth group organization;
- (4) Grade level(s) and number of youth targeted;
- (5) Federal Employer Identification number (tax ID#);
- (6) Street address;
- (7) Mailing address, if different from street address;
- (8) E-mail address, if any;
- (9) Daytime and evening telephone numbers; and
- (10) Telecopy/facsimile number, if any.

252:4-13-6. Letter of commitment

The grant application must be accompanied by a letter from the applicant's principal or supervisor stating the organization's support for the performance of the grant objectives.

252:4-13-7. Summary of project

The applicant must submit a project summary, with a maximum length of one page, double sided. The project summary shall include the following:

- (1) **Synopsis.** Provide one paragraph summarizing the project;
- (2) **Description.** Give a clear concise description of the proposed project, indicating how the project promotes enthusiasm to learn more about the environment, fits in the school curriculum or youth group program and involves community partnerships and/or outreach, if applicable;
- (3) **Goals and objectives.** Clearly define realistic goals and objectives. Include information outlining where these goals address specific needs.
- (4) **Implementation.** Describe how the project will be implemented and whether it emphasizes a hands-on learning approach. Include the project's potential for broad implementation.

252:4-13-8. Timeline

The applicant must present target dates for project objectives.

Permanent Final Adoptions

252:4-13-9. Budget

The applicant must provide an itemized budget with specific project expenditures of grant funds.

252:4-13-10. Evaluation procedure

The applicant must provide a description of the methods to be used to measure project effectiveness, including how the evaluation method will improve the project's strength. The applicant must indicate in the evaluation method how the project will be continued after grant funds are expended.

252:4-13-11. Final written report

Applicants who are awarded environmental education grants under this subchapter shall submit a final written report, outlining accomplishments of the grant objectives and expenditures on or before December 15 following the award.

252:4-13-12. Shared strategies

Strategies from applicants who are awarded environmental education grants under this subchapter will become the property of the Environmental Quality Education Committee and may be shared with other interested environmental educators.

(3) Number of persons benefitted; and

(4) Equitable geographic distribution.

252:4-15-3. Proposals

(a) The applicant must submit a proposal in accordance with the rules implementing the statutory program and/or forms provided by the DEO.

(b) Proposals must demonstrate that the proposed project will implement and be consistent with relevant statutes and rules of the specific program area.

252:4-15-4. Funding

Within the priority criteria, funds shall be granted on a first-come first-served basis until funds are depleted.

SUBCHAPTER 15. LOCAL PROJECT FUNDING

252:4-15-1. Purpose, authority and applicability

(a) Purpose. The purpose of this Subchapter is to implement Executive Order 98-37, mandating state agencies to establish criteria for local project funding contracts.

(b) Authority. This subchapter is adopted pursuant to 75 O.S. § 302, 27A O.S. § 2-2-101 and Executive Order 98-37.

(c) Applicability. The rules in this Subchapter apply to any private entity, political subdivision, and unit of local government, including municipal and county governments and school districts.

252:4-15-2. Criteria

(a) The DEO will consider the following criteria in determining funding priorities for local projects:

(1) Criteria established by relevant statutory authority;
and

(2) Criteria established by rules adopted for the specific Division pursuant to relevant statutory authority.

(b) If relevant statutory authority and program-specific rules do not establish criteria, the DEO will consider the following in determining funding priorities for local projects:

(1) Potential of the project to effectively promote environmental health and safety or environmental education and awareness;

(2) Potential to enhance related programs or efforts by the recipient;

APPENDIX A. PETITION FOR RULEMAKING BEFORE THE ENVIRONMENTAL QUALITY BOARD
[NEW]

IN THE MATTER OF) Matter No.
)
RULE OAC 252: _____) Date filed:

Subject area: () Air Quality () Solid Waste
() Hazardous Waste () Water Quality
() Laboratory () Operator Certification
() Radiation () Other

Petition will be referred by the Department to its appropriate program and to any appropriate Council.

1. Nature of request:
() Adoption of new rule(s)
() Amendment of existing rule(s)
() Repeal of existing rule(s)
Identified as Rule Number(s): _____
(OAC number if known)

2. Attach a brief statement of the issues raised by the rule(s) which cause such a request to be made, a statement of your personal interest in the ruling, and how the proposed rulemaking would affect those interests and would affect others.

3. If this request has been discussed with the Department of Environmental Quality, please indicate the name of the Division and employee consulted; otherwise, state "n/a."

4. If a Council has considered this matter, please indicate the name of the Council and the date(s) the matter was considered; otherwise, state "n/a."

APPENDIX C. PERMITTING PROCESS SUMMARY [NEW]

Steps	Tier I	Tier II	Tier III
Filing - Applicant files application, pays any required fee, and provides landowner notice. Applicant may meet with the DEQ staff prior to this.	Yes	Yes	Yes
Notice of filing - Applicant publishes notice in one newspaper local to site.	No	Yes	Yes
Process meeting - Notice - 30-day opportunity is published with notice of filing. DEQ holds meeting if requested and sufficient interest is shown.	No	No	Yes
Administrative completeness review - DEQ reviews application and asks applicant to supply any missing information.	Yes	Yes	Yes
Technical review - DEQ reviews application for technical compliance and requests applicant to cure any deficiencies.	Yes	Yes	Yes
Draft permit or draft denial - DEQ prepares this after completing review.	No	Yes	Yes
Notice of draft permit, public comment period and public meeting request opportunity - Applicant publishes this in one newspaper local to site. (DEQ publishes notice of draft denial.)	No	Yes	Yes
Public comment period - 45 days for hazardous waste treatment, storage or disposal draft permits; 30 days for all others.	No	Yes	Yes
Public meeting - Conducted by DEQ if held	No	Yes	Yes
Review of comments - DEQ (written response)	No	Yes	Yes
Proposed permit - DEQ prepares this in response to comments on draft permit	No	No	Yes
Notice of proposed permit - Applicant publishes, in one newspaper local to site, notice of 20-day opportunity to review permit and request administrative hearing.	No	No	Yes
Administrative permit hearing - Conducted by DEQ if held. Results in final order.	No	No	Yes
Issuance or denial - DEQ's final decision	Yes	Yes	Yes

Permanent Final Adoptions

ANALYSIS:

The rules in this Chapter were substantially rewritten and reorganized through the DEQ's re-right/de-wrong rules simplification process and can be found in proposed Chapter 4. This Chapter is being revoked in its entirety, subject to the adoption of Chapter 4.

SUMMARY OF DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

Since this is a revocation, there are no analogous federal rules.

CONTACT PERSON:

Contact Barbara Rauch by e-mail barbara.rauch@deqmail.state.ok.us or by phone (405) 702-7189 or fax (702-7101). The DEQ is located at 707 N. Robinson, Oklahoma Oklahoma, 73102. The mailing address is P.O. Box 1677, Oklahoma City, Oklahoma, 73101-1677.

ADDITIONAL INFORMATION:

The revocation of this chapter was first considered by the Environmental Quality Board at their November 14, 2000 meeting,

at which time board members continued it until the February 23, 2001 meeting.

PURSUANT TO THE ACTION DESCRIBED HEREIN, THE FOLLOWING RULES ARE CONSIDERED FINALLY ADOPTED AS SET FORTH IN 75 O.S. § 308.1(A), WITH AN EFFECTIVE DATE OF JUNE 11, 2001.

SUBCHAPTER 1. GENERAL PROVISIONS [REVOKED]

252:2-1-1. Purpose [REVOKED]

(a) **Purpose.** This Chapter establishes the organization and procedures of the Department of Environmental Quality.

(b) **Fair construction.** This Chapter is intended to simplify procedures, avoid delays, save expenses and facilitate implementing the Oklahoma Environmental Quality Code and any other Oklahoma Statutes under which the DEQ has jurisdiction.

(c) **Scope.** The rules in this Chapter are not intended to limit the lawful authority of the DEQ. The DEQ may address any matter under its jurisdiction and change any procedure for good cause.

(d) **Severability.** The repeal or invalidity of any particular rule of this Chapter or Title shall not affect other rules.

252:2-1-2. Definitions [REVOKED]

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"**APA**" means the Oklahoma Administrative Procedures Act, 75:250.1 *et seq.*

"**Board**" means the Environmental Quality Board.

"**Code**" means the Oklahoma Environmental Quality Code, 27A O.S. § 2-1-101 *et seq.*

"**Council**" means the Air Quality Council, the Hazardous Waste Management Advisory Council, the Laboratory Services Advisory Council, the Radiation Management Advisory Council, the Solid Waste Management Advisory Council, the Water Quality Management Advisory Council and the Waterworks and Wastewater Works (Operator Certification) Advisory Council.

"**DEQ**" or "**Department**" means the Oklahoma Department of Environmental Quality and its officers and employees.

"**Executive Director**" means the Executive Director of the Department of Environmental Quality.

"**Individual proceeding**" means the same as defined in 75:250.3(7), a part of which includes an administrative evidentiary hearing.

"**Respondent**" means a person or legal entity named in a petition for an individual proceeding against whom relief is sought.

"**Proposed rule or rule changes**" means rules proposed for recommendation and adoption or repeal.

753

APPENDIX A. PETITION FOR RULEMAKING BEFORE THE ENVIRONMENTAL QUALITY BOARD
[REVOKED]

IN THE MATTER OF _____) Matter No. _____

RULE OAC 252: _____) Date filed: _____

Subject area: () Air Quality () Solid Waste
() Hazardous Waste () Water Quality
() Laboratory () Waterworks operators
() Radiation () Other

Petition will be referred by the Department to its appropriate program and to any appropriate Council.

- 1. Nature of request:
() Adoption of new rule(s)
() Amendment of existing rule(s)
() Repeal of existing rule(s)

Identified as Rule Number(s): _____
(OAC number if known)

2. Attach a brief statement of the issues raised by the rule(s) which cause such a request to be made, a statement of your personal interest in the ruling, and how the proposed rulemaking would affect those interests and would affect others.

3. If this request has been discussed with the Department of Environmental Quality, please indicate the name of the Division and employee consulted; otherwise, state "n/a."

4. If a Council has considered this matter, please indicate the name of the Council and the date(s) the matter was considered; otherwise, state "n/a."

5. Attachment(s): () suggested language () further explanation

_____ by: _____ (print name) _____ (title)
Name of Business or group

or Name of Individual (print): _____

[OAR Docket #01-872; filed 5-8-01]

"Rule package" means a set of rules or rule changes or a single rule or rule change proposed for a specific program or purpose.

252:2-1-3. Description of Department of Environmental Quality [REVOKED]

(a) **History.** The DEQ was created January 1, 1993, as a result of environmental legislation in 1992. On July 1, 1993, it assumed jurisdiction over air quality, hazardous waste, solid waste, water quality, environmental laboratory services and certification, radiation management and other programs and functions as specified in the Code.

(b) **Organization.** The DEQ consists of programs in air quality, waste management, water quality, complaints and local services, and offices of customer assistance, business and industry assistance, local government assistance, and administrative hearings. Such organization may be revised by the Executive Director. Organizational charts may be obtained upon request to the Office of the Executive Director.

(c) **Duties.** The DEQ has the following duties:

- (1) to implement the Code and other statutes under which it has jurisdiction;
- (2) to serve as the official state environmental agency of Oklahoma to cooperate with federal agencies in the management of environmental programs designated by law;
- (3) to perform such duties as required by law; and
- (4) to provide administrative assistance to the Board and Councils.

SUBCHAPTER 3. GENERAL OPERATION [REVOKED]

252:2-3-1. Office location and hours; communications [REVOKED]

(a) **Office.** The principal office of the DEQ is 1000 N.E. 10th Street, Oklahoma City, Oklahoma 73117-1212.

(b) **Hours of operation.** Office hours are from 8:00 a.m. to 4:30 p.m., unless otherwise designated by the Executive Director, each day except Saturday and Sunday and state holidays.

(c) **Communications.** Unless a person is working with a particular person or departmental area, written communication to the DEQ shall be addressed to the Executive Director at the principal office.

252:2-3-2. Availability of records [REVOKED]

(a) **Availability.** Records of the DEQ, not otherwise confidential or privileged from disclosure by law, shall be available to the public for inspection and copying at the DEQ's principal office or other offices during normal business hours. The DEQ may take reasonable precautions in order to ensure the safety and integrity of records under its care.

(b) **Removal.** Records may be removed from the DEQ's offices or storage areas only with permission of the record's custodian.

(c) **Reproduction.**

(1) **By DEQ.** The DEQ may limit the number of copies made and the time and personnel available for reproduction of open records requested by a member of the public or refer the requester to the provisions of paragraphs (2) and (3) of this subsection.

(2) **Commercial reproduction.** With advance notice to the DEQ, persons may arrange for the pick-up, reproduction and return of open records by a commercial copying service at their expense.

(3) **Other.** Provided the approval of the DEQ is obtained in advance and suitable floor space is available, a requester may bring in and use his own copy machine.

(d) **Confidentiality.** Any person submitting information, data or materials to the DEQ may assert and substantiate a claim of confidentiality upon submission. Absent such assertion and substantiation, information or materials shall be recognized and treated by the DEQ as being available for disclosure.

(e) **Certification.** Copies of official records of the DEQ may be certified by the Executive Director or Assistant Director or their designees.

(f) **Charge.** The DEQ's administrative fee schedule shall apply to in-house copying or reproduction of open records for or by members of the public.

252:2-3-3. Administrative fees [REVOKED]

(a) **Photocopying.** The fee for copying letter or legal sized paper is \$0.25 per page.

(b) **Certified copy.** The fee for a certified copy of a document is \$1.00 per document.

(c) **Search fee.** When the request is solely for commercial purpose or clearly would cause excessive disruption of the DEQ's essential functions, the document search fee is as follows:

- (1) 0-15 minutes, no charge;
- (2) 16-30 minutes, \$05.00;
- (3) 31-60 minutes, \$10.00;
- (4) 61-90 minutes, \$15.00;
- (5) 91-120 minutes, \$20.00;
- (6) every 30 minute increment or a portion thereof, \$5.00.

252:2-3-4. Fee credits [REVOKED]

The Executive Director may authorize Divisions of the DEQ which have programs that collect recurring fees to apply a credit towards certain future invoices for those fees. The credit must be applied only within the program from which the carryover fees are derived. Only the amount that is projected to exceed three months of funding beyond the upcoming budget year for that program can be credited. A

755

Permanent Final Adoptions

summary of any credit applied shall be reported to the Environmental Quality Board. For a credit to be applied:

- (1) There must be a projected balance in the fee account carried over from the previous year;
- (2) The credit must be distributable pro rata among the fee payers;
- (3) The credit must be large enough to justify its administrative cost;
- (4) The Division is unaware of a longer range need, such as match for a superfund clean up project; and
- (5) The Department can explain on the invoices that a carryover exists and that an identified one-time credit is being applied.

SUBCHAPTER 5. RULEMAKING [REVOKED]

252:2-5-1. Petitions for rulemaking [REVOKED]

(a) ~~Rulemaking request.~~ Any person may file a petition with the DEQ formally requesting the adoption, amendment, or repeal of one or more rules.

(b) ~~Form and content of petition.~~ Rulemaking petitions shall be in writing and filed with the DEQ. A petition shall include the information and follow the format of OAC 252:2 Appendix A, Petition for Rulemaking. After the petition is filed, the DEQ shall provide a copy to the Board.

(c) ~~Referral.~~ The DEQ shall refer a filed petition to the appropriate Council or if none, to the appropriate program of the DEQ, for review. A petition referred to a Council shall be set on the agenda of the next available Council meeting.

(d) ~~Status.~~ If rulemaking based on the petition does not commence within 30 calendar days after the next available Council meeting or after referral to a program of the DEQ, the petition shall be deemed denied. The DEQ shall advise the Board of the status of petitions and shall provide the petitioner a copy of any final action relating to the petition.

252:2-5-2. Rule development [REVOKED]

The DEQ may commence the development of rules and rule changes at the request of, or on behalf of, the Board or a Council or upon petition by an interested person. The DEQ may appoint committees to assist in the development of such rules.

252:2-5-3. Notice of permanent rulemaking [REVOKED]

The DEQ shall cause notice of proposed permanent rulemaking and of dates of known hearings to be given in accordance with the APA. Notice of the continuation of any rulemaking hearing shall be announced at the hearing or meeting from which the hearing is to be continued and shall not require publication.

252:2-5-4. Rulemaking comment periods & hearings before the DEQ [REVOKED]

(a) ~~Comments.~~ The DEQ may ask for oral or written comments on proposed rules or rule changes from any person at any time.

(b) ~~Hearings.~~ On behalf of the Board or a Council, the DEQ may conduct a rulemaking hearing separate from a Board or Council meeting to receive comments on proposed permanent rule packages.

(c) ~~Hearing procedures for oral comments.~~ Persons wishing to comment orally at a hearing on permanent rule packages may be asked to make a written request. The hearing officer may set reasonable time limits on oral presentations, may exclude repetitive or irrelevant comments and may require that the presentations be submitted in writing prior to the close of the comment period.

(d) ~~Comment period for written comments.~~ Comments on proposed permanent rule packages may be submitted in writing at the hearing or by the end of the specified public comment period, or both.

(e) ~~Length of comment period.~~ The comment period shall end at the conclusion of the hearing unless extended for no more than 30 days.

(f) ~~Summary of comments.~~ The DEQ shall maintain a summary of comments received on proposed rule packages at rulemaking hearings and during written comment periods and provide the summary to the Board or a Council prior to the Board's or Council's final action on such rules.

252:2-5-5. Hearings before the Board or a Council [REVOKED]

At the request of the Board or a Council, the DEQ may designate a hearing officer to conduct a rulemaking hearing on proposed permanent rule packages before those bodies.

252:2-5-6. Preparation of rulemaking record [REVOKED]

The DEQ shall maintain a rulemaking record on all rules adopted or repealed by the Board.

SUBCHAPTER 7. DECLARATORY RULINGS [REVOKED]

252:2-7-1. Declaratory rulings [REVOKED]

Any person who alleges that any DEQ rule or order interferes with or impairs, or threatens to interfere with or impair, their legal rights may petition the DEQ, formally requesting a declaratory ruling on the applicability of the rule or order.

(1) ~~Form and content of petition.~~ All such petitions shall be in writing and filed with the Administrative Law Clerk. The petition shall include the information and follow the format of OAC 252:2 Appendix B, Petition for Declaratory Ruling. After the petition is filed, the

DEQ shall provide a copy to the Board at its next available meeting.

(2) **Determination.** Petitions for declaratory rulings shall be determined by the DEQ. Rulings shall state the findings and conclusions upon which they are based. If the DEQ refuses to make a ruling, then the petition shall be deemed to have been denied. If the DEQ commences an individual proceeding on the petition, it shall offer an opportunity for a hearing to the petitioner. After the DEQ issues a ruling or the Executive Director issues a final order, the DEQ shall provide a copy of the ruling or final order to the Board at its next available meeting.

(3) **Mailing.** The DEQ shall mail a copy of the ruling or final order to the petitioner.

SUBCHAPTER 9. INDIVIDUAL PROCEEDINGS IN GENERAL [REVOKED]

252:2-9-1. Purpose and applicability [REVOKED]

(a) **Purpose and applicability.** The purpose of this

Subchapter is to establish general procedures for individual proceedings conducted by the DEQ for purposes of enforcement and administrative permit proceedings as specified by Subchapter 13 of this Chapter.

(b) **Applicable law.** The APA, the Code and this Chapter govern individual proceedings, including administrative hearings, undertaken by the DEQ.

252:2-9-2. Enforcement petitions [REVOKED]

(a) **Persons entitled.** Individual proceedings may be initiated by DEQ program areas by filing a petition or an administrative compliance or penalty order with the Administrative Law Clerk.

(b) **Petition content.** Each petition shall name the Respondent(s) and shall contain a reference to the statutes and rules involved, and a brief statement of the facts giving a right to relief and of the relief requested. The petition shall be signed by the person presenting the same, or his attorney (see APA § 310), and shall include the signer's address and phone number.

(c) **Petition style.** The style of documents in a matter shall appear in substantially the following form:

BEFORE THE OKLAHOMA DEPARTMENT OF ENVIRONMENTAL QUALITY

IN RE: [Nature of proceeding _____)
 and name of Respondent _____)
 e.g. Request for _____] _____)
 _____) No. [Year & Case #1]
 -[name of program area or person], _____)
 Petitioner. _____)

[Nature of Request]

252:2-9-3. Declaratory ruling petitions [REVOKED]

For information on declaratory ruling petitions, see Subchapter 7 of this Chapter.

252:2-9-4. Administrative permit hearing petitions [REVOKED]

For information on administrative permit hearing petitions, see Subchapter 13 of this Chapter.

252:2-9-5. Matters filed by DEQ [REVOKED]

A petition or administrative compliance or penalty order filed by a DEQ program area shall include notice of the opportunity to request an administrative hearing and shall be served on the named Respondents.

252:2-9-6. Administrative hearings [REVOKED]

(a) **Request.** A hearing request shall be in writing and shall

be filed with the Administrative Law Clerk as part of or in response to a filed Petition.

(b) **Scheduling.** The DEQ shall schedule an administrative hearing after receipt of a proper and timely request.

(c) **Notice.** When the DEQ schedules an administrative hearing, the Administrative Law Clerk shall notify the parties of the date, time and place of the hearing. Such notice shall satisfy the notice requirements of the APA and shall be made at least fifteen (15) days prior to the hearing unless otherwise provided by law or agreed by the parties.

(d) **Procedure.** The Administrative Law Judge may refer to District Court Rules and Procedure in the absence of applicable APA and DEQ statutes and rules, including this Chapter. Subject to the limitations in OAC 252:2-9-7(d), the Administrative Law Judge, with the consent of all parties, may vary the procedures of this Chapter.

707

Permanent Final Adoptions

252:2-9-7. Administrative Law Judges and Clerks [REVOKED]

(a) ~~Administrative Law Judge.~~ The Executive Director may designate an Administrative Law Judge for any administrative hearing properly and timely requested of the DEQ, unless precluded by law. Administrative Law Judges shall be familiar with the rules of procedure and generally familiar with the substantive rules governing the matter, and shall not have had prior involvement in the matter other than as an Administrative Law Judge. The Administrative Law Judge so designated shall have full authority to conduct all aspects of the hearing proceedings except for the issuance of a Final Order.

(b) ~~Administrative Law Clerk.~~ The Executive Director may designate an Administrative Law Clerk to maintain the administrative hearing dockets and records, and perform such other duties as described in this Chapter or incidental thereto.

(c) ~~References to Administrative Law Judge.~~ The Executive Director or designee may perform functions described in this Section for Administrative Law Judges.

(d) ~~Authority.~~ Administrative Law Judges have complete authority to conduct administrative hearing proceedings and may take any action not inconsistent with the provisions of the rules of this Chapter or of the APA for the maintenance of order at hearings and for the expeditious, fair, and impartial conduct of the proceedings. Administrative Law Judges may, without limitation:

- (1) arrange and issue notice of the date, time and place of hearings and conferences;
- (2) establish the methods and procedures to be used in the presentation of the evidence;
- (3) hold conferences to settle, simplify, determine, or strike any of the issues in a hearing, or to consider other matters that may facilitate the expeditious disposition of the hearing;
- (4) administer oaths and affirmations;
- (5) regulate the course of the hearing and govern the conduct of participants;
- (6) examine witnesses;
- (7) rule on, admit, exclude and limit evidence, at or before hearings;
- (8) establish the time for filing motions, testimony, and other written evidence, briefs, findings, and other submissions, and hold the record open for such purposes;
- (9) rule on motions and pending matters;
- (10) divide the hearing into stages or join claims of parties whenever the number of parties is large or the issues are numerous and complex; and
- (11) restrict attendance by persons not parties to the hearing in appropriate cases.

(e) ~~Technical assistance.~~ At the request of the Administrative Law Judge, the Executive Director may designate a DEQ representative, who has had no assigned

responsibilities related to the matter at issue, to serve as technical adviser to the Administrative Law Judge.

252:2-9-8. Service [REVOKED]

(a) ~~Methods of service.~~ Service of a petition and initial notice of hearing shall be by personal delivery served by a person licensed to make service of process in civil cases, or by certified mail with delivery shown by return receipt, or by publication if it is shown that service cannot be made by any other means despite the exercise of due diligence. Where the DEQ is serving a petition or notice, personal service may be made by a person designated by the Executive Director to make such service for the DEQ. Service by certified mail shall be effective on the date of receipt or, if refused, on the date of refusal by the Respondent. Acceptance or refusal by any officer of a business or an authorized agent for a business shall constitute acceptance or refusal by the party addressed.

(b) ~~Proof of service.~~ The person making service shall file proof of service thereof with the Administrative Law Clerk promptly and in any event within the time during which the person served must respond to the process. Failure to make proof of service does not affect the validity of service. The Administrative Law Judge may refer to the Oklahoma Pleading Code for guidance regarding service.

(1) ~~Acknowledgment.~~ Acknowledgment in writing by the recipient, or appearance by the recipient at a hearing without objecting to service, is equivalent to proof of service.

(2) ~~Actions on a license.~~ Service by mail in a matter seeking to revoke or suspend any license may be deemed complete when there is an affirmation that the notice was mailed by certified mail to the licensee's last known address, and that he or she may not be found otherwise, despite the exercise of due diligence. The Administrative Law Judge shall inquire into and determine whether due diligence has been exercised.

(c) ~~Service by mail.~~ Except for service of the petition and initial notice, service by mail is complete upon mailing, and may be shown by the postmark.

(d) ~~Service on representative.~~ Service made upon an attorney of record constitutes service upon the party the attorney represents. Service made upon a person authorized by Oklahoma law to receive service on behalf of a party constitutes service upon that party.

252:2-9-9. Responsive pleading [REVOKED]

A Respondent may file, and the Administrative Law Judge may direct a Respondent to file, a responsive pleading to the enforcement petition or order that initiated the action.

252:2-9-10. Prehearing conferences [REVOKED]

(a) ~~General.~~ The Administrative Law Judge may schedule and conduct prehearing conferences as necessary to identify parties and issues and to set schedules and agendas for hearing-related activities. The Administrative Law Clerk

shall notify the parties of the scheduling of a prehearing conference. The Administrative Law Judge may authorize a prehearing conference by telephone. On request, prehearing conferences shall be on the record.

- (b) **Subjects.** Prehearing conferences may address:
 - (1) identification and simplification of issues, including the elimination of frivolous claims or defenses;
 - (2) amendments to the pleadings;
 - (3) the plan and schedule of discovery and limitations to be placed thereon;
 - (4) identification of admissions of fact to avoid unnecessary proof and cumulative evidence;
 - (5) the identification of witnesses and substance of testimony, exhibits, and documents;
 - (6) the use of prehearing briefs and prefiled testimony in the form of sworn affidavits;
 - (7) settlement of all or some of the issues before the hearing;
 - (8) adoption of special procedures for managing potentially difficult or protracted actions that may involve complex issues, multiple parties, novel or difficult legal questions, or evidence problems;
 - (9) scheduling pursuant to OAC 252:2-9-11; and
 - (10) such other matters as may aid disposition.

252:2-9-11. Prehearing scheduling conference [REVOKED]

(a) **Purpose.** A prehearing scheduling conference may be held for the scheduling of matters to be accomplished. Such conference shall be designed to expedite the disposition of the action and discourage wasteful prehearing activities, establish early and continuing control of the management of the hearing, and set dates for prehearing activities.

(b) **Scheduling.** The Administrative Law Judge may enter an interim order which establishes, insofar as feasible, the time:

- (1) to amend the pleadings;
- (2) to file and hear motions;
- (3) to complete discovery;
- (4) of further prehearing conferences; and
- (5) for accomplishing any other matters appropriate in the circumstances of the case.

(c) **Changes in scheduling order.** The Administrative Law Judge may change dates and time periods set in the scheduling order by issuing a modifying order upon good cause shown.

252:2-9-12. Discovery [REVOKED]

All parties shall act in good faith in the scheduling and conduct of discovery. Failure of a party to provide reasonable opportunity for the opposing party to depose any witness shall be grounds to exclude the testimony of that witness at the hearing. Discovery shall be conducted in accordance with the Oklahoma Discovery Code unless otherwise ordered by the Administrative Law Judge for good cause.

252:2-9-13. Prehearing Order [REVOKED]

(a) **Purpose and form.** Following a prehearing conference, the Administrative Law Judge may issue a Prehearing Order which recites and schedules the action to be taken and which shall control the course of the action unless modified by a subsequent order to prevent manifest injustice.

(b) **Content.** The Prehearing Order should include the results of the conference and advice to the Administrative Law Judge regarding the factual and legal issues, including summaries of material evidence, to be presented. The Prehearing Order should also present all questions of law in the case. All exhibits shall be marked, listed and identified in the Prehearing Order. If there is objection to the admission of any exhibits, the grounds for the objection must be specifically stated. Witnesses shall also be listed along with the nature of their testimony. No exhibit or witness may be added to the Prehearing Order once the Order has been prepared, signed, and filed by the Administrative Law Judge without a showing to the Administrative Law Judge by the requesting party that injustice would be created if the evidence or testimony were not allowed.

(c) **Applicability.** The contents of the Prehearing Order shall supersede the pleadings and govern the hearing of the case unless amended or allowed by the Administrative Law Judge to prevent injustice.

252:2-9-14. Subpoenas [REVOKED]

(a) **Issuance.** Subpoenas for the attendance of witnesses, the furnishing of information required by the Administrative Law Judge and the production of evidence shall be issued by the Administrative Law Clerk upon written request by a party or on the Administrative Law Judge's own motion. Subpoenas shall be served and a return made in the same manner as provided for state court proceedings.

(b) **Failure to obey.** The Executive Director may seek an appropriate judicial order to compel compliance by persons who fail to obey a subpoena, who refuse to be sworn or make an affirmation at a hearing, or who refuse to answer a proper question during a hearing. The hearing may proceed despite any such refusal but the Administrative Law Judge may, in his discretion at any time, continue the proceedings as necessary to secure a court ruling.

252:2-9-15. Record [REVOKED]

(a) **To be made.** A record of the hearing shall be made, which shall be a tape recording unless otherwise agreed by the parties and the Administrative Law Judge. The recording will not be transcribed as a matter of course. A transcript may be obtained by submitting a written request to the Administrative Law Clerk and tendering payment in an amount sufficient to pay the cost of having the recording transcribed.

(b) **Court reporter.** A party may request a court reporter (CSR or LSR). The requesting party shall pay the costs, and the original transcript shall be filed in the case file as part of the record in the case. Each person or party requesting

759

Permanent Final Adoptions

copies shall make arrangements for such with the reporter, and pay the costs.

(c) **Maintained.** The record of a proceeding and the file containing the notices and the pleadings will be maintained in a location designated by the Office of Administrative Hearings. All pleadings, motions, orders and other papers submitted for filing in such a proceeding shall be date/file stamped by the Administrative Law Clerk upon receipt. The burden of showing substantial prejudice by any failure to correctly file stamp any submittal shall be upon the party asserting such.

(d) **Designation on appeal.** On appeal, the parties may designate and counter-designate portions of the record to save costs, following the procedures applicable in the Courts of Oklahoma.

252:2-9-16. Motions [REVOKED]

(a) **Filing.** All requests for action in a matter already before the DEQ shall be made in the form of a motion or cross petition, signed by the party presenting same or his attorney, and filed with the Administrative Law Clerk. A cross petition shall be served in the manner provided in Rule 252:2-9-8. A copy of any motion shall be mailed by the movant to all parties of record concurrently with the filing of the motion, and a certification of such mailing shall appear on the motion.

(b) **Response.** Within ten (10) days after service of any written motion, any party to the proceedings may file a response to the motion. The time for response may be extended or shortened by the Administrative Law Judge for good cause shown.

252:2-9-17. Continuances [REVOKED]

A motion for an extension or continuance shall state the reasons for the request and specify the length of time requested. Unless made before the Administrative Law Judge in open hearing, motions for extensions of time or for a continuance of the hearing to another date or time shall be in writing and filed with the Administrative Law Clerk. The Administrative Law Judge shall promptly grant or deny such request at his or her discretion. If the motion is denied, it may be renewed orally by the party at the hearing.

252:2-9-18. Evidentiary hearing procedures [REVOKED]

(a) **Generally that of civil proceedings.** The order of procedure in hearings in all individual proceedings shall generally follow that which applies in District Court civil proceedings. At the discretion of the Administrative Law Judge, any party may reopen his case in chief, even after the adverse party has rested, consonant with the requirements of justice. Parties may stipulate to any lawful matter.

(b) **Further presentation.** After presentation of all cases in chief, parties to the action shall be confined to rebutting evidence unless the Administrative Law Judge, for

good reasons in furtherance of justice, permits them to offer evidence in the original case.

(c) **Rulings.** The Administrative Law Judge shall rule on the admissibility of evidence and objections to evidence, and on motions or objections raised during hearings, except for motions for summary judgments. All objections to a ruling shall be made promptly with statement of basis or they will be deemed waived. Parties shall be deemed to have taken exception to any adverse ruling on an objection.

(d) **Summary judgment.** The granting of a motion for summary judgment shall be subject to the provisions of 252:2-9-21 (Proposed order) and 252:2-9-22 (Final order).

252:2-9-19. Default [REVOKED]

Any Respondent who fails to appear as directed, after receipt of notice as provided by this Chapter, may be determined to have waived the right to appear and present a defense to the allegations contained in the notice and/or petition. A Final Order in such proceeding may be issued by the Executive Director granting by default no more than the relief prayed for in the petition.

252:2-9-20. Settlement [REVOKED]

Administrative hearings may be resolved by agreed settlement or consent order with the concurrence of the Executive Director. The Administrative Law Judge may grant continuances to allow the parties to discuss settlement.

252:2-9-21. Proposed orders [REVOKED]

(a) **Preparation of proposed orders.** The Administrative Law Judge shall hear all evidence and arguments applicable in a case and shall prepare a proposed order including findings of facts and conclusions of law. Prior to such preparation, the Administrative Law Judge may request or require briefs from the parties on any relevant issue. The Administrative Law Judge shall also have the discretion to request or accept from the parties, proposed findings and conclusions.

(b) **Service and presentation.** Upon finalization of a proposed order, the Administrative Law Judge shall:

(1) present the proposed order and the record of the matter to the Executive Director for review and entry of a final order; or

(2) serve it on the parties, by regular mail, offering an opportunity for parties to file exceptions to the proposed order before a final order is entered, pursuant to APA § 311; and then shall present the proposed order, the exceptions, if any, and the record of the matter to the Executive Director for entry of a final order. The parties may by written stipulation waive any of the requirements for a proposed order.

252:2-9-22. Final orders [REVOKED]

(a) **Executive Director.** For proceedings heard by an Administrative Law Judge, the Executive Director may adopt, amend, or reject any findings or conclusions of the

Administrative Law Judge or exceptions of any party, or may remand the proceeding for additional argument or the introduction of additional evidence at a hearing held for that purpose. This may be done after:

- (1) the opportunity for exceptions has lapsed without receiving exceptions, or after exceptions, briefs and oral arguments, if any, are made; or
- (2) review of the record.

(b) **Issuance.** At the conclusion of the proceedings and [except as provided in Rule 252:2-9-19, Default] after review of the record and/or proposed findings of fact and conclusions of law, the Executive Director shall issue a final order reflecting the findings of fact made, the conclusions of law reached, and specifying the action to be taken. Upon the resolution of motions of summary judgment that are dispositive of the entire case and rulings on standing that are adverse to a Petitioner(s), the Executive Director shall issue a final order.

(c) **Notice.** Parties shall be notified either personally or by mail of the issuance of a final order. A copy of the final order shall be provided to any party and its attorney.

252:2-9-23. Reconsideration [REVOKED]

Any party may petition the DEQ for rehearing, reopening or reconsideration of any decision in an individual proceeding within ten days of its entry, pursuant to APA § 317. Nothing in this Chapter shall prevent reconsideration of a matter in accordance with other statutory provisions.

252:2-9-24. Judicial review [REVOKED]

The provisions of Section 318 of title 75 of the Oklahoma Statutes shall apply.

SUBCHAPTER 11. ADMINISTRATIVE PENALTY PROCEEDINGS [REVOKED]

252:2-11-1. Applicability [REVOKED]

The requirements of this Subchapter are in addition to the preceding requirements of this Chapter and are applicable to matters brought under 27A O.S.Supp. 1993, Sections 2-3-502, 2-5-110, and 2-7-126, or any similar statutes providing for the assessment by the DEQ of administrative penalties.

252:2-11-2. Notice of Violation ("NOV") [REVOKED]

Unless otherwise provided by the particular enabling legislation, administrative penalty proceedings shall be preceded by a written notice of violation (NOV) informing the Respondent of the regulatory requirement at issue. This NOV must be served upon the Respondent and must state the factual allegations and particular standards or rules upon which the NOV is based. A letter, inspection sheet, petition, consent order or final order may constitute a NOV for

purposes of instituting administrative penalty proceedings, if it meets the requirements of this Section.

252:2-11-3. Administrative compliance and penalty orders [REVOKED]

(a) **When issued.** The Executive Director upon the request of a DEQ program area may issue an administrative order requiring compliance, assessing penalties for past violations and specifying penalties for continuing noncompliance. If a preceding Notice of Violation is required by the enabling legislation, an administrative compliance or penalty order shall be issued not less than fifteen days after service of the NOV upon the Respondent, or such reduced period as may be necessary to render the Order reasonably effectual.

(b) **Must specify.** An administrative compliance or penalty order shall specify the facts and conclusions upon which it is based and shall set a time for the Respondent to comply with the applicable regulations. The Order shall specify the penalty, not to exceed the statutory maximum per day of noncompliance, to be assessed in the event that the Respondent fails to comply with the Order within the prescribed time, and, if applicable, the penalty assessed for past violations of the Code, rules, or licenses or permits.

(c) **Service.** An administrative compliance or penalty order shall be served in accordance with Rule 252:2-9-8. The Order shall advise the Respondent that it shall become final unless an administrative hearing is requested in writing within fifteen (15) days of service of the Order.

(d) **Order following hearing.** Based on the hearing and record, an administrative compliance or penalty order will be sustained, modified, or dismissed by the Executive Director. If the hearing process extends beyond any compliance deadline specified in the Order, fines specified in the Order for violations of the Order will continue to accrue during the hearing process unless the Administrative Law Judge stays the penalty upon request for good cause shown.

252:2-11-4. Determining penalty [REVOKED]

In addition to factors specified by 27A O.S.Supp. 1993, Section 2-3-502(K)(2) or other law, the following factors, without limitation, may be considered in determining the amount of penalty specified in an administrative penalty order:

- (1) the gravity of the violation, including the likelihood of the development of adverse health effects caused by the violation, and the extent and severity of environmental degradation or adverse health effects caused or placed at risk by the violation,
- (2) the degree of variance from the applicable standards,
- (3) costs of correction of damage, and
- (4) good or bad faith of the Respondent.

252:2-11-5. Assessment orders [REVOKED]

(a) **Failure to comply with administrative orders.** After an administrative compliance or penalty order is issued,

761

Permanent Final Adoptions

~~proceedings may be conducted to determine whether the Respondent has failed to comply with the Order for any period of time.~~

~~(b) Application for compliance and penalty hearing. Any time the DEQ believes the Order has been violated, it may with reasonable promptness apply to the Administrative Law Judge for a compliance and penalty hearing, alleging the period of noncompliance and the amount of the administrative penalty that has accrued. The DEQ shall provide a copy of the application to the Respondent.~~

~~(c) Elements to consider. The Executive Director, in deciding whether an administrative penalty or compliance order has been violated and whether the penalties are appropriate, may consider efforts to comply with applicable requirements made by the Respondent after issuance of the Order.~~

~~(d) Must request hearing within seven days. The DEQ's application shall advise the Respondent that the Respondent's right to contest the determination of noncompliance and the amount of the fine is waived if the request for hearing is not made within seven (7) calendar days of receiving notice. A request for hearing is deemed made when received by the DEQ. If timely requested, the hearing must be promptly set and held.~~

~~(e) Issuance of assessment orders. An assessment order shall be issued by the Executive Director following the determination of the application. An assessment order must state the nature and period of the violation, and determine the amount of the fine. The fine is due and payable immediately upon issuance of the assessment order, unless otherwise provided therein. A copy of the assessment order will be provided to the Respondent.~~

~~(f) Continuing violations. If the DEQ believes that violations of the administrative compliance or penalty order continue after the issuance of an assessment order, the DEQ may apply within a reasonable time for the issuance of additional assessment orders covering periods of violation since the period covered by the issuance of a previous assessment order.~~

252:2-11-6. Penalty-only proceedings [REVOKED]

~~(a) General. In accordance with 27A O.S. Supp. 1993, Section 2-3-502(L), the DEQ may, within three (3) years of discovery, issue an administrative penalty order proposing specified administrative penalties for non-continuing violations of the Code, rules promulgated thereunder, or permits or licenses issued pursuant thereto.~~

~~(b) Must specify. The administrative penalty order shall specify the facts and conclusions upon which it is based.~~

~~(c) Determining Penalty. For information on determining penalty, see 252:2-11-4.~~

~~(d) Service. The administrative penalty order shall be served in accordance with Rule 252:2-9-8. The Order shall advise the Respondent that it shall become final unless a hearing is requested in writing within fifteen (15) days of service of the Order.~~

~~(e) Hearing. Based on the hearing and the record, an administrative penalty order will be sustained, modified, or dismissed by the Executive Director.~~

252:2-11-7. Considerations for self-reporting of noncompliance [REVOKED]

~~(a) Purpose. The DEQ monitors the environmental compliance of regulated entities through activities such as periodic inspections and record reviews, but the regulated entities have a superior vantage point and generally greater resources to monitor their own performance. The public interest in environmental protection is served by positive incentives to promote, achieve and maintain compliance as well as by the negative incentive of a unilateral agency enforcement action with an associated penalty. The DEQ should encourage voluntary disclosure and prompt remedial action. The DEQ believes it is conducive to improved environmental compliance to mitigate an administrative and civil penalty which would otherwise be appropriate, in those cases where a regulated entity has disclosed an apparent violation, has taken prompt and appropriate action to correct the violation and its consequences, and has taken affirmative action to prevent its recurrence.~~

~~(b) Conditions for not seeking administrative and civil penalties. Except in the case of habitual noncompliance or as otherwise provided in this section, in evaluating enforcement action for a regulated entity's actual or apparent failure to comply with DEQ rules, the DEQ will not seek an administrative or civil penalty when the following circumstances are present:~~

~~(1) The regulated entity voluntarily, promptly and fully discloses the apparent failure to comply with applicable state environmental statutes or rules to the appropriate DEQ regulatory program in writing before the program learns of it or is likely to learn of it imminently;~~

~~(2) The failure is not deliberate or intentional;~~

~~(3) The failure does not indicate a lack or reasonable question of the basic good faith attempt to understand and comply with applicable state environmental statutes or rules through environmental management systems appropriate to the size and nature of the activities of the regulated entity;~~

~~(4) The regulated entity, upon discovery, took or began to take immediate and reasonable action to correct the failure (i.e., to cease any continuing or repeated violation);~~

~~(5) The regulated entity has taken, or has agreed in writing with the appropriate program to take, remedial action as may be necessary to prevent recurrence of such failure. Any action the regulated entity agrees to take must be completed;~~

~~(6) The regulated entity has addressed, or has agreed in writing with the appropriate program to address, any environmental impacts of the failure in an acceptable manner;~~

~~(7) The regulated entity has not realized and will not~~

realize a demonstrable and significant economic or competitive advantage as a result of non-compliance; and

(8) The regulated entity cooperates with the DEQ as the DEQ performs its duties and provides such information as the DEQ reasonably requests to confirm the entity's compliance with these conditions.

(c) **Partial qualification.** Notwithstanding the failure of a regulated entity to meet all of the conditions in subsection b, the DEQ will consider the nature and extent of such actions of the regulated entity in mitigation of any administrative or civil penalty otherwise appropriate. If the regulated entity meets all conditions in subsection b except item 7 relating to significant economic or competitive advantage, the DEQ will seek an administrative or civil penalty only to the extent of the economic or competitive advantage gained.

(d) **Relationship to federal/state agreements.** In the event of any conflict, the elimination or mitigation of penalties pursuant to subsections b and c is subject to agreements between the DEQ and the United States Environmental Protection Agency relating to regulatory program delegation or authorization from the United States Environmental Protection Agency to the DEQ.

(e) **Applicability.** This section applies to all enforcement cases arising from violations discovered by or brought to the attention of the DEQ after the effective date of this section.

SUBCHAPTER 13. FORMAL PUBLIC MEETINGS AND ADMINISTRATIVE PERMIT PROCEEDINGS
[REVOKED]

PART 3. ADMINISTRATIVE PERMIT PROCEEDINGS
[REVOKED]

252:2-13-30. Scope; purpose of proceedings
[REVOKED]

(a) **Applicability.** In addition to the requirements of Subchapter 9 of this Chapter, the requirements of this Part shall apply to administrative hearings on draft permits.

(b) **Purpose.** The purpose of an administrative permit proceeding is to provide for an evidentiary proceeding for challenges to draft permits and to determine their compliance with the Code and rules promulgated thereunder.

252:2-13-31. Definitions [REVOKED]

The following words or terms, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Administrative permit hearing" means an evidentiary hearing conducted by the DEQ as part of an administrative permit proceeding.

"Administrative permit proceeding" means all prehearing conferences, evidentiary hearings and other proceedings connected with an individual proceeding on a draft permit.

"Joining of parties" means the grouping of parties to an administrative permit proceeding who assert rights to relief in respect of or arising out of the same draft permit.

"Lead Counsel" means the attorney acting as coordinating counsel for all petitioners or, if only one petitioner, that party's legal representative.

"Petitioner(s)" means a person or group who requests an administrative permit hearing and is determined by the Administrative Law Judge to have standing as a party to the action.

"Respondent" means an applicant whose formally filed permit application and the draft permit related thereto are the subject of an administrative permit proceeding.

252:2-13-32. Request for administrative permit hearing [REVOKED]

(a) **Request.** A request for an administrative permit hearing must be in writing signed by the requester, requesters or authorized representative of a group of requesters and shall contain a brief statement of the basis of the request and the name and address of each requester. If the request is made by or on behalf of a group, the request should contain a list of names and addresses of group members. A request shall be considered an initial petition and should be personally delivered or sent to the address described in the notice telling of such request opportunity or to the DEQ's Office of Administrative Hearings.

(b) **Initiation of proceedings.** Unless otherwise provided by law, the initiation of administrative permit proceedings shall not occur until a draft permit has been prepared by the DEQ and amended, as appropriate, based on comments received during the public comment period.

(c) **Joinder of DEQ.** The DEQ, through the permit drafting program, shall be a party to the permit proceeding upon its own petition, or may be joined as a party upon order of the Administrative Law Judge. If the DEQ is not a party to the proceedings, the Administrative Law Judge may call witnesses, hear testimony and receive evidence from the permit drafting program. Such witnesses shall be subject to cross-examination by the parties.

(d) **Location for Administrative Permit Hearings.** Proceedings related to administrative permit hearings shall be held at the principal office of the DEQ unless otherwise specified by the Administrative Law Judge.

252:2-13-33. Relationship to other rules
[REVOKED]

In addition to the provisions of this Part, the requirements and procedures set forth in Subchapter 9 of this Chapter (OAC 252:2) for individual proceedings shall apply to administrative permit proceedings and hearings unless specified otherwise or in conflict. In cases of conflict, specific provisions of this Part control over Subchapter 9. The provisions include:

- (1) OAC 252:2-9-7 (Administrative Law Judges and Clerks);
- (2) OAC 252:2-9-8 (Service);

703

Permanent Final Adoptions

- (3) ~~OAC 252:2-9-10 (Prehearing conferences);~~
- (4) ~~OAC 252:2-9-11 (Prehearing scheduling conference);~~
- (5) ~~OAC 252:2-9-12 (Discovery);~~
- (6) ~~OAC 252:2-9-13 (Prehearing Order);~~
- (7) ~~OAC 252:2-9-14 (Subpoenas);~~
- (8) ~~OAC 252:2-9-16 (Motions);~~
- (9) ~~OAC 252:2-9-17 (Continuances);~~
- (10) ~~OAC 252:2-9-18 (Evidentiary hearing procedures);~~
- (11) ~~OAC 252:2-9-19 (Default);~~
- (12) ~~OAC 252:2-9-20 (Settlement);~~
- (13) ~~OAC 252:2-9-21 (Proposed orders);~~
- (14) ~~OAC 252:2-9-22 (Final orders); and~~
- (15) ~~OAC 252:2-9-23 (Reconsideration).~~

252:2-13-35. Prehearing verification conference [REVOKED]

~~(a) Notice.~~ According to 75:309(b), the Administrative Law Judge shall give notice to requesters and Respondents of a prehearing verification conference on a request for an administrative permit hearing.

~~(b) Purpose.~~ The prehearing verification conference shall be attended by all requesters and Respondents and/or their representatives for the purpose of examining notice and identifying parties and their representatives.

~~(c) Verification of notice.~~ The Administrative Law Judge shall examine evidence and receive testimony on whether notice of the opportunity to request an administrative permit hearing was given in accordance with applicable law.

~~(d) Verification of request.~~ The Administrative Law Judge shall verify whether each requester made a timely and proper request for the hearing.

~~(e) Verification of standing.~~ The Administrative Law Judge shall verify the standing of all requesters to be parties pursuant to requirements set by applicable law.

~~(f) Cure of deficiencies.~~ The Administrative Law Judge may allow deficiencies in notice or proof of standing to be cured.

~~(g) Identification of representatives.~~ When verification is complete, each party shall identify its counsel. All counsel and individuals appearing pro se (representing themselves) shall enter a written entry of appearance with the Administrative Law Judge. In addition, each party shall designate one individual to receive notice and to take primary responsibility for the filing of documents with the Administrative Law Clerk.

~~(h) Groups.~~ Members of a formally organized group may request to be considered as one party to the hearing and shall be considered a single entity if they meet applicable standing requirements for such a group or if ten (10) members meet the applicable standing requirements for individuals. A group qualified to be a single party must be represented by Counsel during administrative permit proceedings.

252:2-13-36. Selection of Lead Counsel [REVOKED] When more than one Petitioner is verified as a party and

their representation is by more than one Counsel, the Petitioners shall select one Lead Counsel to coordinate action and communications on behalf of all Petitioners and their attorneys. The selection of a Lead Counsel shall not prohibit other attorneys for petitioners, or unrepresented Petitioners, from dividing responsibilities such as direct and cross examination, discovery, and opening/closing arguments. Designation as Lead Counsel shall not be deemed to establish an attorney-client relationship not otherwise existing. For good cause, the Administrative Law Judge may allow substitution of Lead Counsel and authorize additional Lead Counsel when conflicts of interest appear.

252:2-13-37. Identification of issues [REVOKED]

~~(a) Integrated petition.~~ The Lead Counsel, on behalf of all joined Petitioners, shall file an integrated petition in the office of Administrative Hearings within twenty (20) days after the completion of the prehearing verification conference. The integrated petition shall name the person against whom relief is requested, contain a reference to the statutes and/or rules involved, contain a brief statement of the facts giving a right to relief, and state clearly and concisely the action or relief sought and the ground therefor. The integrated petition shall be in the form set forth in Rule 252:2-9-2(c). Relief in the alternative may be pleaded. The petition shall also contain a preliminary listing of topics which the Petitioner(s) intends to put at issue in the hearing. Upon filing an integrated petition with the DEQ, Lead Counsel shall serve the Respondent with a copy of the petition and shall mail copies to, or make personal delivery to, all Petitioner(s) or their representatives.

~~(b) Answer.~~ The Respondent shall file an answer to the integrated petition within twenty (20) days after service of the petition upon him. An answer may contain specific responses or a general denial and shall be served by the Respondent on all other parties to the action.

~~(c) Cross petition.~~ The Respondent may file a cross petition and the named parties shall have the right to file answers within 20 days of service.

~~(d) Amendment of petition and answer.~~ The parties have the right to amend petitions and answers upon a showing of good cause and with leave of the Administrative Hearing Judge.

252:2-13-38. Administrative record [REVOKED]

~~(a) Content.~~ In addition to the provisions of Subchapter 9 of this Chapter, the administrative permit hearing record shall include:

- (1) the permit application on file with the DEQ, as amended;
- (2) all written comments received during the public comment period;
- (3) the tape or transcript of the formal public meeting;
- (4) documents resulting from the DEQ's review of the permit application and public comments;

- (5) the draft permit, fact sheet and the response to comments, if any, issued by the DEQ; and
- (6) all published notices.

(b) **Admission into evidence.** The documents referenced in (a) of this Section may be admitted and received in evidence. The Administrative Law Judge may direct that a witness be provided to sponsor a portion or portions of these documents. The Administrative Law Judge may direct the appropriate party to produce the witness for cross-examination. If a sponsoring witness cannot be provided, the Administrative Law Judge may reduce the weight accorded the appropriate portion of the record.

252:2-13-39. Withdrawal and dismissal [REVOKED]

(a) **Withdrawal.** Any Petitioner may formally withdraw from the proceedings at any time by filing a statement of withdrawal with the Administrative Law Clerk.

(b) **Dismissal and release.**

(1) **By motion of Petitioner(s).** At any time during the proceedings, Petitioner(s) may request dismissal of the action by filing a motion with the Hearing Clerk that is signed by all Petitioner(s) or their representative(s). Such dismissal shall be with prejudice unless the words "without prejudice" appear in the Order of Dismissal issued by the Administrative Law Judge.

(2) **By motion of Respondent.** An action shall be dismissed by the Administrative Law Judge upon withdrawal of the permit application by the Respondent. Any such dismissal shall be with prejudice as to that permit application and the draft permit related thereto.

(3) **By Administrative Law Judge.** An action may be dismissed by the Administrative Law Judge if all Petitioners fail to appear or to prosecute with diligence, or when Petitioner(s) are in disobedience to an Interim Order issued by the Administrative Law Judge. Any Petitioner may be dismissed from an ongoing action for failure to appear or prosecute with diligence or for disobedience to an Interim Order, only upon motion by a party to the action. Such dismissals shall not occur until a Petitioner subject to the Dismissal Order receives notice of the prospective dismissal and is given the opportunity to be heard concerning it. The Administrative Law Judge may release any party from the action upon proper motion at any time.

252:2-13-40. Evidentiary hearing procedures on draft permits [REVOKED]

(a) **Order of procedure.** For information on order of procedure, see OAC 252:2-9-18.

(b) **Burden of proof.** The Respondent has the burden of proof as to issues raised by Petitioner(s).

(1) **Petitioner(s).** Petitioner(s) shall have the burden of going forward to present an affirmative case on the issues identified in the petition.

(2) **Respondent.** After the conclusion of the case of

the Petitioner(s), the Respondent shall have the burden of presenting an affirmative case on all issues raised by the Petitioner(s).

(c) **Testimony and cross-examination.** The Administrative Law Judge may provide for the testimony of opposing witnesses to be heard consecutively. No cross-examination shall be allowed on questions of law, on matters that are not subject to challenge in an administrative hearing, or on questions of DEQ policy except to the extent such policy must be analyzed to disclose the basis for draft permit requirements. Issues between the parties that are relevant to the hearing but not raised at the hearing shall be dismissed as between the parties and may be so reflected in the final findings of fact and conclusions of law.

252:2-13-41. Orders [REVOKED]

(a) **Proposed and Final Orders.** For information on Proposed and Final Orders, see OAC 252:2-9-21 and 252:2-9-22.

(b) **Final Orders.** Final Orders issuing from an administrative permit hearing shall be based on the applicable provisions of statutes and rules, and may be conditioned in accordance with findings and recommendations of the Administrative Law Judge.

252:2-13-42. Issuance or denial of permit [REVOKED]

The applicant bears the burden of persuading the agency that the permit should issue. Title 75 O.S. 1991, § 307 is the appropriate mechanism to address any alleged failure by the DEQ to conform the issuance or denial of the permit to the requirements of a Final Order.

SUBCHAPTER 15. UNIFORM PERMITTING PROCEDURES [REVOKED]

PART 1. UNIFORM PERMITTING PROGRAM IN GENERAL [REVOKED]

252:2-15-1. Purpose and applicability [REVOKED]

(a) **Purpose.** The rules in this Subchapter implement the Oklahoma Uniform Environmental Permitting Act, 27A O.S. Supp. 1995, § 2-14-101 *et seq.*, and apply to applicants for and holders of DEQ permits and other authorizations.

(b) **Supersedes inconsistent rules.** Except as otherwise provided by statute, the provisions of this Subchapter shall supersede any inconsistent provision of other Chapters of this Title.

(c) **Applicability.**

(1) Applications filed with the DEQ on and after July 1, 1996, are subject to the procedural requirements of 27A O.S. Supp. 1995, § 2-14-101 *et seq.*, this Subchapter and other applicable rules of the Board.

(2) Applications filed before July 1, 1996, are subject to the statutory and regulatory procedural requirements

Permanent Final Adoptions

existing at the time of the filing unless the applicant elects to comply with the statutes and rules described in paragraph 1 of this subsection.

252:2-15-2. Definitions [REVOKED]

In addition to terms defined in 252:2-1-2, the following words and terms, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Act" means the Oklahoma Uniform Environmental Permitting Act, 27A O.S. § 2-15-101 *et seq.*

"Administratively complete" means an application that contains the information specified in the application form and rules in sufficient detail to allow the DEQ to begin technical review.

"Application" See 27A O.S. Supp. 1995, § 2-14-103(1).

"Major facility", as used in air quality tier classifications, means a source subject to the permitting requirements of 40 CFR Part 70.

"Minor source", as used in air quality tier classifications, means a source that is not subject to the permitting requirements of 40 CFR Part 70.

"Off-site", as used in hazardous waste, solid waste and UIC tier classifications, means a facility which receives waste from various sources for treatment, storage, processing, or disposal.

"On-site", as used in hazardous waste, solid waste and UIC tier classifications, means a facility owned and operated by an industry for the treatment, storage, processing, or disposal of its own waste exclusively.

"Part" means a numbered Part of this Subchapter.

"Program" means a regulatory section or division of the DEQ.

"Submittal" means a document or group of documents provided as part of an application.

"Supplement" means a response to a request for additional information following completeness and technical reviews, and information submitted voluntarily by the applicant.

"UIC" means underground injection control.

PART 3. TIER I, II AND III PROCESS REQUIREMENTS [REVOKED]

252:2-15-26. Tier processes described [REVOKED]

To implement the three-tiered permitting processes of the Act, applications are classified in Part 5 as Tier I, II or III. The steps an applicant must follow for a Tier I, II or III application are shown in Appendix C of this Chapter.

252:2-15-27. Unclassified applications [REVOKED]

The tier designation for any type of application not classified in this Subchapter shall be determined according to 27A O.S. Supp. 1995, § 201.

252:2-15-28. Permit decision-making authority [REVOKED]

(a) **Designated positions.** The Executive Director may delegate in writing the power and duty to issue, renew, amend, modify and deny permits and take other authorization or registration action. Unless delegated to a Division Director by formal assignment or rule, the authority to act on Tier I applications shall be delegated to positions within each permitting program having technical supervisory responsibilities and, for local actions authorized by law, to environmental specialist positions held by the DEQ's local services representatives. The authority to act on emergency permits or Tier II applications shall be delegated to the Division Director of the applicable permitting division.

(b) **Revision.** The Executive Director may amend any delegation in writing.

252:2-15-29. Published notices [REVOKED]

(a) **Notice content.** In addition to content requirements of the Act, all published legal notice(s) shall contain the:

- (1) Name and address of the applicant;
- (2) Name, address and legal description of the site, facility and/or activity;
- (3) Purpose of notice;
- (4) Type of permit or permit action being sought;
- (5) Description of activities to be regulated;
- (6) Locations where the application may be reviewed;
- (7) Names, addresses and telephone numbers of contact persons for the DEQ and for the applicant;
- (8) Description of public participation opportunities and time period for comment and requests;
- (9) Any other information required by DEQ rules; and
- (10) Any information the applicant deems relevant.

(b) **Proof of publication.** An applicant, within twenty (20) days after the date of publication, shall provide the DEQ with a written affidavit of publication for each notice published. In case of a mistake in a published notice, the DEQ may approve the publication of a legal notice of correction or may require that the entire legal notice be republished.

252:2-15-30. Tier I process requirements [REVOKED]

(a) **Pre-application conference.** Prior to filing an application, an applicant may request a conference with the DEQ.

(b) **Application filing.**

(1) **Copies.** Two (2) copies of a Tier I application shall be filed with the DEQ except when the application form or instructions specifies that only one (1) copy is needed. Applicants for residential systems (OAC 252:640) and small public sewage systems (OAC 252:655-29) permits shall file their two copies with the local DEQ office for the county in which the real property is located.

(2) **Fees.** Fees established in DEQ program rules shall be payable at the time of application and are not refundable.

~~(3) Notice to landowner.~~ Applicants must demonstrate to the DEQ that they are not seeking a permit for land or for any operation upon land owned by others without their knowledge. Applicants shall certify by affidavit filed with the DEQ that: they own the real property; or they have a current lease or easement which is given to accomplish the permitted purpose; or if they do not own the real property, they have provided legal notice to those who do. The DEQ may rely on the affidavit, and the applicants shall bear the burden of meeting any challenges. Legal notice is governed by Oklahoma law which, for example, authorizes: service by sheriff or private process server; service by certified mail, restricted delivery; or service by publication, if the person cannot be located through due diligence. Notice to the person who signed a lease or to the administrator or executor of a trust or an estate may be sufficient.

~~(4) Withdrawal.~~ An applicant may withdraw an application at any time with written notice to the DEQ and forfeiture of fees.

~~(c) Application review.~~ Unless stated otherwise in new laws or rules, applications are subject to the laws and rules of the DEQ as they exist on the date of filing and afterward as changed, up to the date of issuance or denial. See Part 7 for review procedures and time lines.

~~(d) Issuance or denial.~~

~~(1) Compliance required.~~ A new, modified or renewed permit or other authorization shall not be issued until the DEQ has determined the application is in substantial compliance with applicable requirements of the Code and rules of the Board.

~~(2) Conditions for issuance.~~ The Department may not issue a new, modified or renewed permit or other authorization if:

~~(A) The applicant has not paid all monies owed to the DEQ or is not in substantial compliance with the Code, rules of the Board and the terms of any existing DEQ permits and orders. The DEQ may impose special conditions on the applicant to assure compliance and/or a separate schedule which the DEQ considers necessary to achieve required compliance; or~~

~~(B) Material facts were misrepresented or omitted from the application and the applicant knew or should have known of such misrepresentation or omission.~~

~~(3) Issuance.~~ See 252:2-15-28.

252:2-15-31. Tier II process requirements
[REVOKED]

~~(a) Pre-application conference.~~ "Tier I" requirements apply. See 252:2-15-30.

~~(b) Application.~~ "Tier I" requirements apply. See 252:2-15-30, except the applicant shall file three (3) copies of the application with the DEQ and place one (1) copy for

public review in the county in which the site, facility or activity is located.

~~(c) Published notice of filing.~~ See 27A O.S. § 2-14-301 and 252:2-15-29.

~~(d) Application review.~~ "Tier I" requirements apply. See 252:2-15-30.

~~(e) Draft permit or draft denial.~~ See 27A O.S. § 2-14-302.

~~(f) Notice of draft permit/denial.~~ See 27A O.S. § 2-14-302 and 252:2-15-29. For permit modification actions, only those issues relevant to the modification(s) shall be reopened for public review and comment.

~~(1) Exception to notice requirement.~~ Applicants for solid waste transfer station permits shall be exempt from public comment and public meeting requirements if the board of county commissioners of the county of the proposed site, after opportunity for written or oral public comment, has found the application to be within the scope of the county's solid waste management plan. See 27A O.S. Supp. 1995, § 2-10-307.

~~(2) Additional notice.~~ In addition to Section 302 notice:

~~(A) Applicants for a NPDES, RCRA or UIC permit are subject to applicable additional notice provisions of federal requirements promulgated as rules of the Board.~~

~~(B) Applicants for a proposed wastewater discharge or emissions permit which may affect the water quality or air quality of a neighboring state must give written notice to the environmental regulatory agency of that state.~~

~~(C) Applicants for a solid waste landfill permit shall provide notice by certified mail, return receipt requested, to owners of mineral interests and to adjacent landowners whose property may be substantially affected by installation of a landfill site. See *DuLaney v. OSDH*, Okl., 868 P.2d 676 (1993).~~

~~(g) Public comment and formal public meeting.~~ See 27A O.S. § 2-14-302 and 27A O.S. § 2-14-303. The DEQ shall determine the location of any formal public meeting to be held and the designated presiding officer shall establish its procedures.

~~(h) Response to comments.~~ See 27A O.S. § 2-14-304.

~~(i) Issuance or denial.~~ "Tier I" requirements apply. See 252:2-15-30.

252:2-15-32. Tier III process requirements
[REVOKED]

~~(a) Pre-application conference.~~ "Tier I" requirements apply. See 252:2-15-30.

~~(b) Filing, fees and withdrawal.~~ "Tier II" requirements apply. See 252:2-15-31.

~~(c) Notice of filing and process meeting opportunity.~~ The applicant shall include a 30-day opportunity to request a process meeting in the published notice of filing. See 27A O.S. § 2-14-301(B) and 252:2-15-29.

~~(d) Process meeting.~~ See 27A O.S. § 2-14-301(B). The

Permanent Final Adoptions

location of and procedures for the process meeting shall be determined by the DEQ.

(e) **Application review.** "Tier I" requirements apply. See 252:2-15-30.

(f) **Draft permit or draft denial.** See 27A O.S. § 2-14-302.

(g) **Notice of draft permit/denial.** "Tier II" requirements apply. See 252:2-15-31.

(h) **Public comment period and public meeting.** "Tier II" requirements apply. See 252:2-15-31.

(i) **Proposed permit and notice.** After the DEQ reviews public comments and prepares a proposed permit by amending the draft permit in response to comments as necessary, the applicant shall publish notice of the proposed permit and of the opportunity to request an administrative permit hearing. See 27A O.S. § 2-14-304 and 252:2-15-29.

(j) **Administrative permit hearing.** See 27A O.S. § 2-14-304 and, for procedures, Subchapter 13 of this Chapter, except references to "draft permit" in Subchapter 13 shall mean "proposed permit" as used in 27A O.S. § 2-14-103 and 27A O.S. § 2-14-304 (C) and (D).

(k) **Response to comments.** See 27A O.S. § 2-14-304.

(l) **Issuance or denial.** "Tier I" requirements apply. See 252:2-15-30.

PART 5. TIER CLASSIFICATIONS [REVOKED]

252:2-15-40. Air quality applications - Tier I [REVOKED]

(a) **Minor facility permits.** The following air quality authorizations for minor facilities require Tier I applications.

(1) **New permits.** New construction, operating and relocation permits.

(2) **Modifications of permits.**

(A) Modification of a construction permit for a minor facility that will remain minor after the modification.

(B) Modification of an operating permit that will not change the facility's classification from minor to major.

(C) Extension of expiration date of a construction permit.

(3) **Renewals.** Renewals of operating permits.

(b) **Part 70 source permits.** The following air quality authorizations for Part 70 sources require Tier I applications.

(1) **New permits.**

(A) New construction permit for an existing Part 70 source for any change considered minor under 252:100-8-7.2(b)(1).

(B) New operating permit that:

(i) is based on a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) has conditions which do not differ from the construction permit's operating conditions in

any way considered significant under 252:100-8-7.2(b)(2).

(2) **Modifications of permits.**

(A) Modification of any operating permit condition that:

(i) is based on the operating conditions of a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) does not differ from those construction permit conditions in any way considered significant under 252:100-8-7.2(b)(2).

(B) A construction or operating permit modification that is minor under 252:100-8-7.2(b)(1).

(C) Extension of expiration date of a Part 70 source's construction permit with no or minor modifications.

(c) **Other authorizations.** The following air quality authorizations require Tier I applications.

(1) New, modified and renewed individual authorizations under general operating permits for which a schedule of compliance is not required by 252:100-8-5(c)(8)(B)(i).

(2) Burn approvals.

(3) Plant wide emission plan approval under 252:100-37-25(b) or 252:100-39-46(j).

(4) Administrative amendments of all air quality permits and other authorizations.

(5) Alternative emissions reduction authorizations. (Also subject to state implementation plan revision procedures in 252:100-11.)

252:2-15-41. Air quality applications - Tier II [REVOKED]

(a) **Minor facility permit actions.** Any minor facility seeking a permit for a modification that when completed would turn it into a Part 70 source is required to apply under subsection (b) of this section.

(b) **Part 70 source permits.** The following air quality authorizations for Part 70 sources require Tier II applications.

(1) **New permits.**

(A) New construction permit for a new Part 70 source not classified under Tier III.

(B) New construction permit for an existing Part 70 source for any change considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(C) New operating permit for a Part 70 source that did not have an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(D) New operating permit with one or more conditions that differ from the underlying Tier II or III construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(E) New acid rain permit that is independent of a Part 70 permit application.

(F) New temporary source permit under 252:100-8-6.2.

(2) **Modifications of permits.**

(A) Significant modification, as described in 252:100-8-7.2(b)(2), of an operating permit that is not based on an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(B) Modification of an operating permit when the conditions proposed for modification differ from the underlying construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(C) A construction permit modification considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(3) **Renewals.** Renewals of operating permits.

(c) **Other authorizations.** The following air quality authorizations require Tier II applications.

(1) New, modified and renewed general operating permits.

(2) Individual authorizations under any general operating permit for which a schedule of compliance is required by 252:100-8-5(c)(8)(B)(i).

(P) petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels,

(Q) phosphate rock processing plant,

(R) portland cement plants,

(S) primary aluminum ore reduction plants,

(T) primary copper smelters,

(U) primary lead smelters,

(V) primary zinc smelters,

(W) secondary metal production plants,

(X) sintering plants,

(Y) sulfur recovery plants, or

(Z) taconite ore processing plants, and

(2) Any other source not specified in paragraph (1) of this definition which emits, or has the potential to emit, 250 tons per year or more of any pollutant subject to regulation.

(b) **Existing incinerators.** An application for any change in emissions or potential to emit, or any change in any permit condition, that would have caused an incinerator to be defined as a major stationary source when originally permitted shall require a Tier III application.

(c) **Potential to emit.** For purposes of this section, "potential to emit" means emissions resulting from the application of all enforceable permit limitations as defined in OAC 252:100-1-3.

252:2-15-42. Air quality applications - Tier III [REVOKED]

(a) **New major stationary sources.** A construction permit for any new major stationary source listed in this subsection requires a Tier III application. For purposes of this section, "Major stationary source" means:

(1) Any of the following sources of air pollutants which emits, or has the potential to emit, 100 tons per year or more of any pollutant subject to regulation:

(A) carbon black plants (furnace process),

(B) charcoal production plants,

(C) chemical process plants,

(D) coal cleaning plants (with thermal dryers),

(E) coke oven batteries,

(F) fossil fuel boilers (or combustion thereof), totaling more than 250 million BTU per hour heat input,

(G) fossil fuel-fired steam electric plants of more than 250 million BTU per hour heat input,

(H) fuel conversion plants,

(I) glass fiber processing plants,

(J) hydrofluoric, sulfuric or nitric acid plants,

(K) iron and steel mill plants,

(L) kraft pulp mills,

(M) lime plants,

(N) incinerators, except where used exclusively as air pollution control devices,

(O) petroleum refineries,

252:2-15-43. Hazardous waste management applications - Tier I [REVOKED]

The following hazardous waste management authorizations require Tier I applications.

(1) Class 1 modification of any hazardous waste permit requiring prior Department approval as specified in 40 CFR § 270.42.

(2) Modification to a recycling permit in accordance with 27A O.S. Supp. 1994, § 2-7-118(A).

(3) Class 2 permit modification as defined in 40 CFR § 270.42.

(4) Emergency hazardous waste disposal plan approval.

(5) Hazardous waste generator disposal plan approval.

(6) Technical plan approval.

(7) Hazardous waste transporter license.

(8) Hazardous waste transfer station plan modification which is not related to capacity.

(9) Emergency permit issued in accordance with 40 CFR § 270.61.

(10) Interim status closure plan approval in accordance with 40 CFR § 265.113(d)(4).

(11) Minor administrative modification of all permits and other authorizations.

(12) Renewal of disposal plan approval and transporter license.

(13) New, modified or renewed authorization under a general permit.

Permanent Final Adoptions

~~(14) Approval of temporary authorizations in accordance with 40 CFR § 270.42.~~

252:2-15-47. Laboratory certification applications - Tier II [REVOKED]

None.

252:2-15-44. Hazardous waste management applications - Tier II [REVOKED]

252:2-15-48. Laboratory certification applications - Tier III [REVOKED]

None.

The following hazardous waste management authorizations require Tier II applications.

~~(1) On-site hazardous waste treatment, storage or disposal permit.~~

~~(2) Mobile recycling permit.~~

~~(3) Research & Development permit.~~

~~(4) Class 3 modification of any hazardous waste permit as specified in 40 CFR § 270.42.~~

~~(5) Modification of an on-site hazardous waste facility permit for a fifty percent (50%) or greater increase in permitted capacity for storage, treatment, and/or disposal, including incineration.~~

~~(6) Modification of an on-site hazardous waste facility permit for an expansion of permitted boundaries.~~

~~(7) Modification of on-site hazardous waste facility permit in which the application is for new treatment, storage, or disposal methods or units which are significantly different from those permitted.~~

~~(8) Renewal of a hazardous waste treatment, storage or disposal permit.~~

~~(9) Hazardous waste transfer station plan approval.~~

~~(10) Hazardous waste transfer station plan modification involving increase in approved capacity.~~

~~(11) Variance which is not part of a permit application.~~

~~(12) Variance which is part of a Tier II permit application.~~

252:2-15-50. Operator certification applications - Tier II [REVOKED]

None.

252:2-15-51. Operator certification applications - Tier III [REVOKED]

None.

252:2-15-52. Radiation management applications - Tier I [REVOKED]

The following radiation management authorizations require Tier I applications:

~~(1) New, amended and renewed operating permits for radiation machines;~~

~~(2) New, amended and renewed permits for x-ray fluorescence spectroscopy instruments used to detect lead in paint;~~

~~(3) New and renewed specific licenses under the state agreement program not classified under Tiers II or III;~~

~~(4) Industrial radiography certifications;~~

~~(5) Approvals of license termination plans that require no decommissioning or remediation;~~

~~(6) Decommissioning and remediation plans required for remediation due to the use, storage or disposal of one or more radioactive materials with a half-life of 120 days or less;~~

~~(7) DEQ approvals of documentation showing residual radioactivity levels for a site or property are within acceptable limits as set by Chapter 410;~~

~~(8) Minor amendments of all authorizations classified under Tiers I, II or III; and~~

~~(9) Major amendments of all authorizations classified under Tier I.~~

252:2-15-45. Hazardous waste management applications - Tier III [REVOKED]

The following hazardous waste management authorizations require Tier III applications.

~~(1) Off-site hazardous waste treatment, storage, disposal, incineration and/or recycling permit.~~

~~(2) Modification of an off-site hazardous waste facility permit for a fifty percent (50%) or greater increase in permitted capacity for storage, treatment, and/or disposal, including incineration.~~

~~(3) Modification of an off-site hazardous waste facility permit for an expansion of permitted boundaries.~~

~~(4) Modification of off-site hazardous waste facility permit in which the application is for new treatment, storage, or disposal methods or units which are significantly different from those permitted.~~

~~(5) Variance which is part of a Tier III application.~~

252:2-15-53. Radiation management applications - Tier II [REVOKED]

The following radiation management authorizations require Tier II applications:

~~(1) Decommissioning and remediation plans required for on-site remediation due to the use, storage or disposal of one or more radioactive materials with a half-life of more than 120 days, except for those facilities described in 252:2-15-54(3)(A);~~

~~(2) New or renewed permits for the non-commercial treatment or disposal of radioactive waste, generated by the applicant, by incineration or the amendment of the incinerator permit for a capacity increase or for any expansion beyond permitted boundaries for the purpose of expanding operations or storage; and~~

252:2-15-46. Laboratory certification applications - Tier I [REVOKED]

A Tier I application shall be required for a new, modified, amended or renewed laboratory certification.

(3) Major amendments of all authorizations classified under Tier II.

252:2-15-54. Radiation management applications - Tier III [REVOKED]

The following radiation management authorizations require Tier III applications:

- (1) New or renewed permits for the land disposal of low-level radioactive waste received from others and the major amendment thereof;
- (2) New or renewed permits for the commercial treatment or disposal of radioactive waste by incineration and the major amendment thereof; and
- (3) Decommissioning and remediation plans and the major amendment thereof:
 - (A) for nuclear fuel cycle facilities or facilities and sites involved in the manufacturing or processing of licensed quantities of radioactive materials; and
 - (B) for sites that require both on and off-site remediation due to the use, storage or disposal of one or more radioactive materials with a half-life of more than 120 days.

252:2-15-55. Solid waste management applications - Tier I [REVOKED]

The following solid waste management authorizations require Tier I applications:

- (1) **New permits.**
 - (A) **Locally approved solid waste transfer stations.** Permit for a solid waste transfer station that, prior to application filing, received county commissioner approval according to 27A O.S. Supp. 1995, § 2-10-307.
 - (B) **Biomedical waste transfer stations using only sealed containers.** Biomedical waste transfer station permit when activities are limited to:
 - (i) consolidation of sealed containers; and/or
 - (ii) transfer of sealed containers from one vehicle or mode of transportation to another.
 - (C) **Disaster relief.** Emergency authorization for waste disposal resulting from a natural disaster.
- (2) **Modifications.**
 - (A) **All facilities.**
 - (i) Modification of a solid waste permit to add methods, units or appurtenances for liquid bulking processes; yard waste composting; recycling operations; waste screening; or baling, chipping, shredding or grinding equipment or operations.
 - (ii) Modification to any solid waste permit to make minor changes.
 - (iii) Modification of plans for closure and/or post-closure.
 - (iv) Administrative modification of all permits and other authorizations.
 - (B) **On-site and off-site land disposal facilities.**

Modification of an existing land disposal permit for a lateral expansion within permitted boundaries.

(C) **Capacity increases of less than 25% with exceptions.** The modification of a solid waste permit, excluding incineration permits, involving a request for less than twenty five percent (25%) increase in permitted capacity for storage, processing or disposal when the request is for equivalent methods, units or appurtenances as those permitted and which does not involve expansions of permitted boundaries.

- (3) **Plans and other authorizations.** The approval of new and when applicable, modified or renewed:
 - (A) Plans for composting of yard waste only.
 - (B) Permit transfers.
 - (C) Non-hazardous industrial solid waste disposal plans.
 - (D) Technical plans.
 - (E) County solid waste management plans.
 - (F) Individual authorizations under a general permit.
 - (G) All other administrative approvals required by OAC 252:510 or OAC 252:520.

252:2-15-56. Solid waste management applications - Tier II [REVOKED]

The following solid waste management authorizations require Tier II applications:

- (1) **New permits.**
 - (A) **On-site solid waste processing facilities with exception.** Permit for an on-site solid waste processing facility except yard waste composting as listed under Tier I, Rule 252:2-15-55.
 - (B) **Solid waste transfer stations with exceptions.** Permit for a solid waste transfer station except:
 - (i) a transfer station permit with county commissioner approval as listed under Tier I, Rule 252:2-15-55, or
 - (ii) a biomedical waste transfer station permit listed under Tier I, Rule 252:2-15-55.
 - (C) **On-site incinerators with exceptions.** Permit for an on-site incinerator except those exempt under OAC 252:520 or those that have an approved Air Quality permit or Solid Waste Management Plan.
 - (D) **On-site land disposal sites.** Permit for an on-site solid waste disposal site.
 - (E) **Material Recovery Facility (MRF).** Permit for a Material Recovery Facility if waste is not source-separated.
- (2) **Modifications.**
 - (A) **All facilities.** Modification of a permit for a change in waste type.
 - (B) **On-site facilities.** Any modification of an on-site solid waste permit, except as listed under Tier I, Rule 252:2-15-55.
 - (C) **Off-site facilities.**

771

Permanent Final Adoptions

(i) Modification of any off-site solid waste permit involving a request for more than twenty five percent (25%) but less than fifty percent (50%) increase in permitted capacity for storage, processing or disposal (excluding incineration) when the request is for equivalent methods, units or appurtenances as those permitted, except those listed under Tier I, Rule 252:2-15-55.

(ii) Modification of any off-site processing facility involving an expansion of permitted boundaries.

(D) Incinerators.

(i) Modification of an on-site incinerator permit for any increase in permitted capacity for storage, processing, or disposal.

(ii) Modification of an off-site incinerator permit involving a request for increases less than fifty percent (50%) in permitted capacity for storage, processing, or disposal when the request is for equivalent methods, units or appurtenances as those permitted.

(3) **General permit.** New, modified or renewed general permit.

252:2-15-57. Solid waste management applications - Tier III [REVOKED]

The following solid waste management authorizations require Tier III applications:

(1) New permits.

(A) **Off-site processing facilities with exceptions.** Permit for an off-site processing facility, unless otherwise specified in Tier I, Rule 252:2-15-55, or Tier II, Rule 252:2-15-56.

(B) **Off-site land disposal facility.** Permit for an off-site solid waste land disposal site.

(C) **Off-site incinerator.** Permit for an off-site incinerator.

(2) Modifications.

(A) **Off-site facilities: significant increase in capacity.** Modification of any off-site solid waste permit involving a fifty percent (50%) or greater increase in permitted capacity for storage, processing, and/or disposal, including incineration.

(B) **Off-site land disposal facility.** Modification of an off-site solid waste land disposal permit for an expansion of permitted boundaries.

(C) **Off-site facilities: different methods, units or appurtenances.** Modification of an off-site solid waste permit in which the request involves different methods, units or appurtenances than those permitted, except those listed under Tier I, Rule 252:2-15-55.

(3) **Variance approvals.** All variances.

252:2-15-58. UIC applications-Tier I [REVOKED]

The following underground injection control authorizations require Tier I applications:

(1) Minor modification of a permit for Class I, III, and V wells in accordance with 40 CFR § 144.41.

(2) Modification of an approved closure and/or post-closure plan for a Class I hazardous waste injection well.

(3) Modification of an approved plugging and abandonment plan for Class I nonhazardous and Class III injection wells.

(4) Modification of an approved corrective action plan for a Class I injection well.

(5) Emergency permit in accordance with 40 CFR § 144.34.

(6) New, modified or renewed authorization under a general permit.

(7) Minor administrative modification of all permits and other authorizations.

252:2-15-59. UIC applications - Tier II [REVOKED]

The following underground injection control authorizations require Tier II applications:

(1) On-site Class I nonhazardous waste injection well permit.

(2) Class III and V injection well permits except Class V permits issued under Tier III.

(3) Modification and/or renewal of all DEQ issued underground injection control well permits.

252:2-15-60. UIC applications - Tier III [REVOKED]

The following underground injection control authorizations require Tier III applications:

(1) Class I hazardous waste injection well permit.

(2) Off-site Class I nonhazardous waste injection well permit.

(3) Class V industrial waste injection well permit.

252:2-15-61. Water quality applications - Tier I [REVOKED]

The following water quality authorizations require Tier I applications:

(1) Permit for flow-through impoundment(s) as part of the pretreatment process.

(2) Re-permitting of facility with an expiring permit for industrial non-discharging impoundment or septic tank system.

(3) Re-permitting of expiring permit with minor or no change(s) for land application of sludge and/or wastewater for same site.

(4) New, modified or renewed authorization under a general permit, including but not limited to general permits for stormwater, underground storage tanks and petroleum storage and treatment facilities.

(5) Approval of new pretreatment program.

(6) Closure plan approval.

- (7) Dredge and fill certification.
- (8) Approval of exemption for water line extensions.
- (9) Approval of exemption for water distribution and wastewater collection systems.
- (10) Approval for individual residential sewage disposal system.
- (11) Approval of small public sewage system:
 - (A) with less than 5,000 gallons per day which do not discharge, land apply wastewater or sludge, or have lift stations designed to handle a peak capacity greater than 10 gallons per minute; or
 - (B) which serves less than ten (10) residential units.
- (12) Residential development approval.
- (13) Transfer of discharge permit.
- (14) Minor modification of discharge permit.
- (15) Minor modification of permit for land application of sludge and/or wastewater.
- (16) Modification of or addition to a municipal wastewater treatment system (including sewer line extensions).
- (17) Modification of or addition to a public water supply treatment and/or distribution system.
- (18) Modification of non-discharging impoundment and/or septic tank system permit.
- (19) Modification of an approved pretreatment program.
- (20) Administrative amendment of permits or other authorizations for the correction of administrative or typographical errors.

252:2-15-62. Water quality applications - Tier II [REVOKED]

The following water quality authorizations require Tier II applications.

- (1) Permit for municipal wastewater treatment system.
- (2) Permit for public water supply system.
- (3) Discharge permit for minor facility.
- (4) Individual storm water permit.
- (5) Permit for industrial non-discharging impoundment or septic tank.
- (6) Permit for land application of sludge and/or wastewater at new site system.
- (7) Re-permitting of a facility with expiring discharge permit.
- (8) Re-permitting of facility with expiring individual storm water discharge permit.
- (9) Re-permitting with major change(s) from expiring permit for land application of sludge and/or wastewater for the same site.
- (10) Variance including thermal components of effluent limitations for an individual discharge permit.
- (11) Major modification of discharge permit.
- (12) Major modification of permit for land application of sludge and/or wastewater.
- (13) New, modified or renewed general permit.

252:2-15-63. Water quality applications - Tier III [REVOKED]

A new discharge permit for a major facility requires a Tier III application.

252:2-15-64. Brownfields applications - Tier I [REVOKED]

A Tier I application shall be required for a Memorandum of Agreement for site characterization.

252:2-15-65. Brownfields applications - Tier II [REVOKED]

A Tier II application shall be required for all Certificates.

252:2-15-66. Brownfields applications - Tier III [REVOKED]

None.

PART 7. REVIEW PROCEDURES AND PERMITTING TIME LINES [REVOKED]

252:2-15-70. Common review procedures and time lines [REVOKED]

(a) **Receipt of applications.** Unless otherwise provided in this Subchapter, upon the receipt of an application for filing and the proper fee, each Program shall:

- (1) File stamp the application with the date of receipt, the Division and/or Program name and an identification number;
- (2) Assign the application to a named person who will do the review; and
- (3) Timely log this information.

(b) **Administrative completeness review.** Unless otherwise provided in the Code or this Subchapter, the reviewer shall have 60 calendar days from the logged date of filing in which to determine whether the application is administratively complete.

(1) Not complete.

(A) Upon determining that the application is not complete, the reviewer shall immediately notify the applicant by mail, describing with reasonable specificity the inadequacies and measures necessary to complete the application.

(B) This notice shall not require or preclude further review of the application and further requests for specific information.

(C) If the reviewer does not notify the applicant of inadequacies, the period for technical review shall begin at the close of the administrative completeness review period.

(2) **Complete.** When the application is administratively complete, the reviewer shall log the date and immediately notify the applicant by mail. The period for technical review begins.

(c) **Technical review.** Each Program involved shall have a certain time period to review each application for technical

773

Permanent Final Adoptions

compliance with the relevant regulations and reach a final determination.

(d) ~~When times are tolled.~~ The time period for review is tolled (the clock stops) during litigation, during periods of public review and participation [includes public meetings and administrative permit hearings (and waiting periods), public comment periods, time required for DEQ preparation of responses to public comments received, and review by other federal or State agencies], or when the Program has asked for supplemental information and advised the applicant that the time period is tolled pending receipt, or during the time in which an applicant amends his application of his own accord.

(e) ~~Supplemental time.~~ To compensate for time spent in reviewing inadequate materials, the DEQ's notice of deficiencies and request for supplemental information may specify that up to 30 additional calendar days may be added to the application processing time. Requests for supplemental information and data may also specify that additional days for technical review equal to the number of days the applicant used to prepare and submit such supplement may be added to the application review time.

(f) ~~Failure to respond.~~ Except for good cause shown, failure by an applicant to supplement an application within 180 days after the mailing date of a notice of deficiencies, or by a date agreed to by the DEQ and the applicant, shall void the application and forfeit the fees. The DEQ shall notify the applicant of an opportunity to show cause why this should not occur. Failure to show cause shall result in an order appealable according to 75 O.S. § 318.

(g) ~~Extensions.~~ Extensions to the time lines of this Subchapter may be made as provided by law.

252:2-15-71. Pending failures [REVOKED]

(a) ~~Circumstances outside agency control.~~ Technical review times shall be tolled for specified times when, prior to the deadline, the Executive Director certifies that a failure to meet a deadline is imminent and is caused by circumstances outside the control of the DEQ. Such circumstances include, but are not limited to, acts of God, a substantial and unexpected increase in the number of applications filed, and additional review duties imposed on the DEQ from an outside source.

(b) ~~Other circumstances.~~ Where circumstances that are not clearly outside the control of the DEQ may cause a failure to meet a deadline, then:

(1) ~~At least thirty (30) calendar days prior to the deadline the DEQ shall reassign staff and/or retain outside consultants to meet such deadline.~~

(2) ~~The applicant may agree to an extension of time for a specific purpose and period of time with refund of the entire application fee, unless a refund is prohibited by law.~~

252:2-15-72. Air quality permit time lines [REVOKED]

~~The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.~~

(1) ~~Construction permits:~~

(A) ~~PSD and Part 70 Sources—365 days.~~

(B) ~~Minor Facilities—180 days.~~

(2) ~~Operating permits:~~

(A) ~~Part 70 Sources—540 days.~~

(B) ~~Minor Facilities—365 days.~~

(3) ~~Relocation permits—30 days.~~

252:2-15-73. Hazardous waste permit time lines [REVOKED]

~~The following hazardous waste permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.~~

(1) ~~Hazardous waste permits:~~

(A) ~~New RCRA permit or the renewal thereof—300 days.~~

(B) ~~New State Recycling permit—300 days.~~

(C) ~~Class 3 permit modifications—300 days.~~

(2) ~~Closure plans, post-closure plans and transfer station plans and plan modifications—300 days.~~

252:2-15-74. Solid waste permit time lines [REVOKED]

~~The technical review period for solid waste permit applications and for each submittal and resubmittal shall be 90 days, subject to OAC 252:2-15-7-70.~~

252:2-15-75. Water quality permit time lines [REVOKED]

~~Applications for new or modified water quality permits, certifications and authorizations shall be technically reviewed and permits shall be issued or denied within the following time frames:~~

(1) ~~Discharges—180 days.~~

(2) ~~401 Certifications—180 days.~~

(3) ~~Industrial Wastewater other than discharge—180 days.~~

(4) ~~Pretreatment Trust Users—180 days.~~

(5) ~~Public Water Supply—90 days.~~

(6) ~~Underground Injection Control—300 days.~~

(7) ~~Water Pollution Control Construction—90 days.~~

(8) ~~Sludge management plan—180 days.~~

252:2-15-76. Other permits [REVOKED]

~~Any environmental license or permit that is not described in this Subchapter shall not be subject to these time frames but shall be reviewed with all due and reasonable speed.~~

252:2-15-76.1. Brownfields time lines [REVOKED]

~~The technical review period for Brownfields~~

applications and for each submittal and resubmittal shall be 60 days, subject to 252:2-15-70.

252:2-15-77. Pre-issuance permit review and correction [REVOKED]

(a) **Review.** In addition to its own review, the DEQ may, for Tier I and II, and shall, for Tier III, at any time before issuance, ask an applicant to review a permit for calculation and clerical errors or mistakes of fact or law.

(b) **Correction.** The DEQ may correct any permit before it is issued.

(1) **Notice of significant corrections.** For permits based on Tier II and III applications, an applicant shall publish legal notice in one newspaper local to the site of any correction or change proposed by the DEQ which significantly alters a facility's permitted size, capacity or limits.

(2) **Comments.** The DEQ may open a public comment period, and/or reconvene a public meeting and/or administrative hearing to receive public comments on the proposed correction(s).

PART 9. CONSOLIDATED PERMITTING [REVOKED]

252:2-15-90. Consolidation of permitting process [REVOKED]

(a) **Discretionary.** Whenever an applicant applies for more than one permit for the same site, the DEQ may authorize, with the consent of the applicant, the review of the applications to be consolidated so that each required draft permit, draft denial and/or proposed permit is prepared at the same time and public participation opportunities are combined.

(b) **Scope.** When consolidation is authorized by the DEQ:

(1) The procedural requirements for the highest specified tier shall apply to each affected application.

(2) The DEQ may also authorize the consolidation of public comment periods, process and public meetings, and/or administrative permit hearings.

(3) Final permits may be issued together.

(c) **Renewal.** The DEQ may coordinate the expiration dates of new permits issued to an applicant for the same facility or activity so that all the permits are of the same duration.

(d) **Multiple modifications.** Subsections (a) and (b) of this section shall also apply to multiple Tier II and III applications for permit modifications.

SUBCHAPTER 17. COMPLAINT PROCESSING [REVOKED]

252:2-17-1. Purpose [REVOKED]

The rules in this Subchapter identify the procedures to process pollution complaints.

252:2-17-2. Definitions [REVOKED]

The following words or terms, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Complaint" means any written or oral information submitted to ECLS alleging site specific environmental pollution. Information must be submitted by persons expecting a response, and does not include referrals from federal agencies, information gained from facility inspections or DEQ employees, or self-reported incidents.

"ECLS" means the Environmental Complaints and Local Services Division of the DEQ.

"Enforcement Action" means:

(A) any administrative compliance or penalty order;

(B) any administrative petition to revoke or suspend a permit or license;

(C) a consent order or proposed consent order in lieu of any enforcement action defined in subparagraph (A) or (B), of this definition; or

(D) A civil petition, or a criminal information or complaint in municipal or district court.

"Mediation" means a voluntary negotiating process in which parties to a dispute agree to use a mediator to assist them in jointly exploring and settling their differences, with a goal of resolving their differences by a formal agreement created by the parties.

"Resolution" means the determination by the DEQ, based on analysis and investigation of a complaint, that there has not been a violation of Oklahoma environmental statutes or rules as alleged by a complaint, that the violation has been corrected, or that an Enforcement Action has been filed and the 14 day complainant comment period has been considered.

"Response" means the initiation of appropriate action, including but not limited to investigation or referral of a complaint, and informing complainants regarding potential actions that may occur based on a complaint.

252:2-17-3. Receipt of complaints [REVOKED]

(a) **Toll free hot line.** The DEQ shall provide a toll free hot line to receive environmental complaints.

(b) **General mail or other DEQ phone numbers.** Complaints may be received by mail or by any of the DEQ's phone numbers during regular office hours.

(c) **DEQ offices.** Complaints may be made in person at any of the DEQ's offices during regular office hours.

252:2-17-4. Investigation of complaints [REVOKED]

After receipt of a complaint, ECLS may assign an investigator to the complaint. The investigator or other DEQ personnel may obtain any information which may tend to prove there has or has not been a violation of Oklahoma environmental statutes or rules, who the potentially

775

Permanent Final Adoptions

responsible persons are, and any other information which may be needed to resolve the complaint.

252:2-17-5. Notification [REVOKED]

(a) **Potential actions.** Within two (2) working days of receipt of a complaint, the ECLS shall notify the complainant of the potential actions which may occur to resolve the complaint.

(b) **Written notification.**

(1) Within seven (7) working days of the receipt of a complaint, the ECLS shall notify the complainant, in writing, of the determination of the course of action to be taken by the DEQ.

(2) Within seven (7) working days of the resolution of the complaint, the ECLS shall notify the complainant of the resolution. If complainants notify the DEQ they are dissatisfied with the resolution reached by the DEQ, complainants shall be notified in writing of their options, including but not limited to referral on written request to an outside source trained in mediation.

(c) **Enforcement.** If as a result of a complaint the DEQ undertakes an Enforcement Action, the ECLS shall notify by mail the person whose complaint caused the Enforcement Action to be initiated of an opportunity to provide, within fourteen (14) calendar days after the date of the mailing of the notice, written information pertinent to the complaint.

252:2-17-6. Referral of complaints [REVOKED]

(a) **To appropriate agency.** If the DEQ receives a complaint which clearly falls within the jurisdiction of another state environmental agency, the complaint shall be referred to the appropriate agency within one working day of the date of determination of jurisdiction. Complaints referred to other agencies shall require no further action by the DEQ and will not be referred by the DEQ to mediation.

(b) **To mediation.** Complainants who are not satisfied with the DEQ's resolution of their complaint may ask the ECLS in writing to refer their complaints to an outside source trained in mediation. Participation in the mediation process shall not hinder or interfere with any enforcement action taken by the DEQ. The ECLS shall maintain a roster of certified mediators which shall be available to the public. Complainants and persons named in the complaint shall be advised that participation in the mediation process conducted by the outside source is completely voluntary and confidential and that fulfillment of any agreements reached in mediation shall be the responsibility of the parties of the dispute. The DEQ shall not be responsible for any mediation costs.

SUBCHAPTER 19. ENVIRONMENTAL EDUCATION GRANTS [REVOKED]

252:2-19-1. Authority and eligibility [REVOKED]

(a) **Authority.** This subchapter is adopted pursuant to 75 O.S. § 302, 27A O.S. § 2-2-101 and Executive Order 98-37.

(b) **Eligibility.** Oklahoma teachers and youth group leaders are eligible to apply for environmental education grants provided by the DEQ.

252:2-19-2. Amount of grants [REVOKED]

The DEQ will award the following amounts to successful applicants:

- (1) Up to and including \$ 200.00 for field trips;
- (2) Up to and including \$ 500.00 for activities; and
- (3) Up to and including \$1000.00 for outdoor classroom/youth group projects.

252:2-19-3. Criteria [REVOKED]

The following will be considered by the DEQ in determining grant awards:

- (1) Project proposed, including how the project accomplishes the following factors:
 - (A) Promotes enthusiasm to learn more about the environment;
 - (B) Fits in the school curriculum or youth group program;
 - (C) Involves community partnerships and/or outreach, if applicable.
- (2) Number of students/youth participating;
- (3) Grade level of students/youth; and
- (4) Geographic location.

252:2-19-4. Application [REVOKED]

(a) **Complete application.** A complete application consists of a cover page, a letter of commitment, a summary of the project, a projected timeline, a proposed budget and a procedure for evaluation of the project.

(b) **Attachments.** Photographs, clippings, diagrams and other graphic materials, not to exceed five (5) pages double sided, may be attached to the application.

(c) **Document submission.** An original and two (2) copies, double sided, of the application and attachments must be submitted to the DEQ, date stamped or postmarked on or before the published deadline. The DEQ will not accept applications submitted by telecopy/facsimile.

252:2-19-5. Cover page [REVOKED]

The cover page must include the following information:

- (1) Title of the project;
- (2) Name of contact person, position held and relationship to project;
- (3) Name of school or youth group organization;
- (4) Grade level(s) and number of youth targeted;
- (5) Federal Employer Identification number (tax ID#);

- (6) Street address;
- (7) Mailing address, if different from street address;
- (8) E-mail address, if any;
- (9) Daytime and evening telephone numbers; and
- (10) Telecopy/facsimile number, if any.

252:2-19-6. Letter of commitment [REVOKED]

The grant application must be accompanied by a letter from the applicant's principal or supervisor stating the organization's support for the performance of the grant objectives.

252:2-19-7. Summary of project [REVOKED]

The applicant must submit a project summary, with a maximum length of one page, double sided. The project summary shall include the following:

- (1) **Synopsis.** Provide one paragraph summarizing the project;
- (2) **Description.** Give a clear concise description of the proposed project, indicating how the project promotes enthusiasm to learn more about the environment, fits in the school curriculum or youth group program and involves community partnerships and/or outreach, if applicable;
- (3) **Goals and objectives.** Clearly define realistic goals and objectives. Include information outlining where these goals address specific needs.
- (4) **Implementation.** Describe how the project will be implemented and whether it emphasizes a hands on learning approach. Include the project's potential for broad implementation.

252:2-19-8. Timeline [REVOKED]

The applicant must present target dates for project objectives.

252:2-19-9. Budget [REVOKED]

The applicant must provide an itemized budget with specific project expenditures of grant funds.

252:2-19-10. Evaluation procedure [REVOKED]

The applicant must provide a description of the methods to be used to measure project effectiveness, including how the evaluation method will improve the project's strength. The applicant must indicate in the evaluation method how the project will be continued after grant funds are expended.

252:2-19-11. Final written report [REVOKED]

Applicants who are awarded environmental education grants under this subchapter shall submit a final written report, outlining accomplishments of the grant objectives and expenditures on or before December 15 following the award.

252:2-19-12. Shared strategies [REVOKED]

Strategies from applicants who are awarded environmental education grants under this subchapter will become the property of the Environmental Quality Education Committee and may be shared with other interested environmental educators.

SUBCHAPTER 21. LOCAL PROJECT FUNDING [REVOKED]

252:2-21-1. Purpose, authority and applicability [REVOKED]

- (a) **Purpose.** The purpose of this Subchapter is to implement Executive Order 98-37, mandating state agencies to establish criteria for local project funding contracts.
- (b) **Authority.** This subchapter is adopted pursuant to 75 O.S. §302, 27A O.S. §2-2-101 and Executive Order 98-37.
- (c) **Applicability.** The rules in this Subchapter apply to any private entity, political subdivision, and unit of local government, including municipal and county governments and school districts.

252:2-21-2. Criteria [REVOKED]

- (a) The DEQ will consider the following criteria in determining funding priorities for local projects:
 - (1) Criteria established by relevant statutory authority; and
 - (2) Criteria established by rules adopted for the specific DEQ program area pursuant to relevant statutory authority.
- (b) If relevant statutory authority and program specific rules do not establish criteria, the DEQ will consider the following in determining funding priorities for local projects:
 - (1) Potential of the project to effectively promote environmental health and safety or environmental education and awareness;
 - (2) Potential to enhance related programs or efforts by the recipient;
 - (3) Number of persons benefitted; and
 - (4) Equitable geographic distribution.

252:2-21-3. Proposals [REVOKED]

- (a) The applicant must submit a proposal in accordance with the rules implementing the statutory program and/or forms provided by the DEQ.
- (b) Proposals must demonstrate that the proposed project will implement and be consistent with relevant statutes and rules of the specific program area.

252:2-21-4. Funding [REVOKED]

Within the priority criteria, funds shall be granted on a first-come first-served basis until funds are depleted.

APPENDIX A. PETITION FOR RULEMAKING BEFORE THE ENVIRONMENTAL QUALITY BOARD [REVOKED]

IN THE MATTER OF _____) Matter No. _____
)
)
RULE OAC 252: _____) Date filed: _____

Subject area: () Air Quality () Solid Waste
() Hazardous Waste () Water Quality
() Laboratory () Operator Certification
() Radiation () Other

Petition will be referred by the Department to its appropriate program and to any appropriate Council.

1. Nature of request:
() Adoption of new rule(s)
() Amendment of existing rule(s)
() Repeal of existing rule(s)
Identified as Rule Number(s): _____
(OAC number if known)

2. Attach a brief statement of the issues raised by the rule(s) which cause such a request to be made, a statement of your personal interest in the ruling, and how the proposed rulemaking would affect those interests and would affect others.

3. If this request has been discussed with the Department of Environmental Quality, please indicate the name of the Division and employee consulted; otherwise, state "n/a."

4. If a Council has considered this matter, please indicate the name of the Council and the date(s) the matter was considered; otherwise, state "n/a."

5. Attachment(s): () suggested language () further explanation

APPENDIX C. PERMITTING PROCESS SUMMARY [REVOKED]

Steps	Tier I	Tier II	Tier III
Filing - Applicant files application, pays any required fee, and provides landowner notice. Applicant may meet with the DEQ staff prior to this.	Yes	Yes	Yes
Notice of filing - Applicant publishes notice in one newspaper local to site.	No	Yes	Yes
Process meeting - Notice - 30-day opportunity is published with notice of filing. DEQ holds meeting if requested and sufficient interest is shown.	No	No	Yes
Administrative completeness review - DEQ reviews application and asks applicant to supply any missing information.	Yes	Yes	Yes
Technical review - DEQ reviews application for technical compliance and requests applicant to cure any deficiencies.	Yes	Yes	Yes
Draft permit or draft denial - DEQ prepares this after completing review.	No	Yes	Yes
Notice of draft permit, public comment period and public meeting request opportunity - Applicant publishes this in one newspaper local to site. (DEQ publishes notice of draft denial.)	No	Yes	Yes
Public comment period - 45 days for hazardous waste treatment, storage or disposal draft permits; 30 days for all others.	No	Yes	Yes
Public meeting - Conducted by DEQ if held	No	Yes	Yes
Review of comments - DEQ (written response)	No	Yes	Yes
Proposed permit - DEQ prepares this in response to comments on draft permit	No	No	Yes
Notice of proposed permit - Applicant publishes, in one newspaper local to site, notice of 20-day opportunity to review permit and request administrative hearing.	No	No	Yes
Administrative permit hearing - Conducted by DEQ if held. Results in final order.	No	No	Yes
Issuance or denial - DEQ's final decision	Yes	Yes	Yes

AUTHORITY:

Environmental Quality Board powers and duties, 27A O.S. § 2-2-101; Administrative Procedures Act, 75 O.S. § 302

DATES:

Comment period:

October 16, 2000, through November 6, 2000

Public hearing:

November 14, 2000 and February 23, 2001

Adoption:

February 23, 2001

Submitted to Governor:

March 2, 2001

Submitted to House:

March 2, 2001

Submitted to Senate:

March 2, 2001

Gubernatorial approval:

April 16, 2001

Legislative approval:

Failure of the Legislature to disapprove the rules resulted in approval on April 26, 2001

Final adoption:

April 26, 2001

Effective:

June 11, 2001

SUPERSEDED EMERGENCY ACTIONS:

None

INCORPORATIONS BY REFERENCE:

None

ANALYSIS:

The rules in this Chapter were substantially rewritten and reorganized through the DEQ's re-right/de-wrong rules simplification process and can be found in proposed Chapter 4. This Chapter is being revoked in its entirety, subject to the adoption of Chapter 4.

SUMMARY OF DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

There are no analogous federal rules

CONTACT PERSON:

Contact Barbara Rauch by e-mail barbara.rauch@deqmail.state.ok.us or by phone (405) 702-7189 or fax (702-7101). The DEQ is located at 707 N. Robinson, Oklahoma City, Oklahoma, 73102. The mailing address is P.O. Box 1677, Oklahoma City, Oklahoma, 73101-1677.

ADDITIONAL INFORMATION:

The revocation of this chapter was first considered by the Environmental Quality Board at their November 14, 2000 meeting, at which time board members continued it until the February 23, 2001 meeting.

PURSUANT TO THE ACTION DESCRIBED HEREIN, THE FOLLOWING RULES ARE CONSIDERED FINALLY ADOPTED AS SET FORTH IN 75 O.S. § 308.1(A), WITH AN EFFECTIVE DATE OF JUNE 11, 2001.

SUBCHAPTER 1. GENERAL PROVISIONS [REVOKED]

252:3-1-1. Purpose [REVOKED]

~~This Chapter describes the practices of the Council, its organization, meetings and records, and its procedures to review and recommend the adoption, amendment and repeal of rules.~~

252:3-1-1.1. Scope and construction [REVOKED]

~~(a) Fair construction. This Chapter is intended to simplify procedures, avoid delays, save expenses and facilitate implementing the Oklahoma Environmental Quality Code and the Waterworks and Wastewater Works Operator Certification Act. To that end, these rules should be given a fair and impartial construction.~~

~~(b) Scope. The rules in this Chapter are not intended to limit the lawful authority of the Council. The Council may address any matter under its jurisdiction and change any procedure for good cause.~~

~~(c) Severability. The repeal or invalidity of any particular rule of this Chapter or Title shall not affect the remainder of the rules.~~

252:3-1-2. Definitions [REVOKED]

~~The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:~~

~~"Board" means the Environmental Quality Board.~~

~~"Council" means any of the following Councils: the Air Quality Council, the Hazardous Waste Management Advisory Council, the Laboratory Services Advisory Council, the Radiation Management Advisory Council, the Solid Waste Management Advisory Council, the Water Quality Management Advisory Council, and the Waterworks and Wastewater Works Operator Certification Advisory Council.~~

SUMMARY OF DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

There are no federal rules.

CONTACT PERSON:

Contact Jimmy Givens by e-mail address: jimmy.givens@deqmail.state.ok.us or (405) 702-7189 (phone) or 702-7101 (fax). The DEQ is located at 707 N. Robinson, Oklahoma City, Oklahoma 73102. The mailing address is P.O. Box 1677, Oklahoma City, Oklahoma 73101-1677

PURSUANT TO THE ACTIONS DESCRIBED HEREIN, THE FOLLOWING RULES ARE CONSIDERED FINALLY ADOPTED AS SET FORTH IN 75 O.S., SECTION 308.1(A), WITH AN EFFECTIVE DATE OF JUNE 12, 2000.

SUBCHAPTER 3. GENERAL OPERATION

252:2-3-3. Administrative fees

(a) Photocopying. The fee for copying letter or legal sized paper is \$0.25 per page.

(b) Certified copy. The fee for a certified copy of a document is \$1.00 per document.

(c) Search fee. When the request is solely for commercial purpose or clearly would cause excessive disruption of the DEQ's essential functions, the document search fee is as follows:

- (1) 0 - 15 minutes, no charge;
- (2) 16 - 30 minutes, \$05.00;
- (3) 31 - 60 minutes, \$10.00;
- (4) 61 - 90 minutes, \$15.00;
- (5) 91 - 120 minutes, \$20.00;
- (6) every 30 minute increment or a portion thereof, \$5.00.

SUBCHAPTER 15. UNIFORM PERMITTING PROCEDURES

PART 5. TIER CLASSIFICATIONS

252:2-15-40. Air quality applications - Tier I

(a) Minor source facility permits. The following air quality authorizations for minor sources-facilities require Tier I applications.

- (1) **New permits.** New construction, operating and relocation permits.
- (2) **Modifications of permits.**
 - (A) Modification of a construction permit for a

783

Permanent Final Adoptions

minor ~~source-facility~~ that will remain minor after the modification.

(B) Modification of an operating permit that will not change the ~~source's-facility's~~ classification from minor to major.

(C) Extension of expiration date of a construction permit.

(3) **Renewals.** Renewals of operating permits.

(b) **Major facility Part 70 source permits.** The following air quality authorizations for ~~major facilities Part 70 sources~~ require Tier I applications.

(1) **New permits.**

(A) New construction permit for an existing ~~major facility Part 70 source~~ for any ~~facility-change~~ considered minor under 252:100-8-7.2(b)(1).

(B) New operating permit that:

(i) is based on a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) has conditions which do not differ from the construction permit's operating conditions in any way considered significant under 252:100-8-7.2(b)(2).

(2) **Modifications of permits.**

(A) Modification of any operating permit condition that:

(i) is based on the operating conditions of a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) does not differ from those construction permit conditions in any way considered significant under 252:100-8-7.2(b)(2).

(B) A construction or operating permit modification that is minor under 252:100-8-7.2(b)(1).

(C) Extension of expiration date of a ~~major facility's Part 70 source's~~ construction permit with no or minor modifications.

(c) **Other authorizations.** The following air quality authorizations require Tier I applications.

(1) New, modified and renewed individual authorizations under general operating permits for which a schedule of compliance is not required by 252:100-8-5(c)(8)(B)(i).

(2) Burn approvals.

(3) Plant-wide emission plan approval under 252:100-37-25(b) or 252:100-39-46(j).

(4) Administrative amendments of all air quality permits and other authorizations.

(5) Alternative emissions reduction authorizations. (Also subject to state implementation plan revision procedures in ~~see~~ 252:100-11.)

252:2-15-41. Air quality applications - Tier II

(a) **Minor ~~source-facility~~ permit actions.** Any minor ~~source~~ ~~facility~~ seeking a permit for a ~~facility~~-modification that when

completed would turn it into a ~~major facility Part 70 source~~ is required to apply under subsection (b) of this section.

(b) **Major facility Part 70 source permits.** The following air quality authorizations for ~~major facilities Part 70 sources~~ require Tier II applications.

(1) **New permits.**

(A) New construction permit for a new ~~major facility Part 70 source~~ not classified under Tier III.

(B) New construction permit for an existing ~~major facility Part 70 source~~ for any ~~facility-change~~ considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(C) New operating permit for a ~~major facility Part 70 source~~ that did not have an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(D) New operating permit with one or more conditions that differ from the underlying Tier II or III construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(E) New acid rain permit that is independent of a ~~Title V Part 70~~ permit application.

(F) New temporary source permit under 252:100-8-6.2.

(2) **Modifications of permits.**

(A) Significant modification, as described in 252:100-8-7.2(b)(2), of an operating permit that is not based on an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(B) Modification of an operating permit when the conditions proposed for modification differ from the underlying construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(C) A construction permit modification considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(3) **Renewals.** Renewals of operating permits.

(c) **Other authorizations.** The following air quality authorizations require Tier II applications.

(1) New, modified and renewed general operating permits.

(2) Individual authorizations under any general operating permit for which a schedule of compliance is required by 252:100-8-5(c)(8)(B)(i).

PART 7. REVIEW PROCEDURES AND PERMITTING TIME LINES

252:2-15-72. Air quality permit time lines

The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

(1) Construction permits:

- (A) PSD (Part 70 sources) - 540 and Part 70 Sources - 365 days.
- (B) Major Sources (Part 70 sources Sources (other than PSD) - 365 days.
- (C)(B) Minor Sources-Facilities - 180 days.
- (2) Operating permits:
 - (A) Major Part 70 Sources - 540 days.
 - (B) Minor Sources-Facilities - 365 days.
- (3) Relocation permits - 30 days.

ANALYSIS:

This rule is being revoked as part of the "re-right/de-wrong" process of simplifying DEQ rules. This revocation does not affect the operator certification program or the proposed rules in Chapter 710. Although the term "permit" includes certifications and registrations [27A O.S. §2-14-103(4)], it is the belief of the DEQ that the operator certification program is a personal licensure program which does not fall into a Tier category. A Tier I application is a "basic process of permitting which includes application, notice to the landowner, and Department review." [27A O.S. §2-14-103(9)]

Certifications and registrations issued by the DEQ to persons who complete certain training and successfully pass an examination do not fit into a permitting process as envisioned by the Uniform Environmental Permitting Act and the rules in OAC 252:2-15.

The basic Tier I permitting process was designated for environmental permits where notice was given to landowners. Personal licensure should not have been included in the Tier categories. The revocation of this rule is an effort to remedy that situation.

SUMMARY OF DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

There are no corresponding federal rules

SUBCHAPTER 15. UNIFORM PERMITTING PROCEDURES

PART 5. TIER CLASSIFICATIONS

252:2-15-49. Operator certification applications - Tier I [REVOKED]

The following authorizations require Tier I applications.

- (1) Waterworks operator certification (standard and temporary).
- (2) Wastewater works operator certification (standard and temporary).
- (3) Waterworks laboratory operator certification.
- (4) Wastewater works laboratory operator certification.
- (5) Septic tank installer certification.
- (6) Septic tank cleaner license.
- (7) Landfill operator and/or manager certification.
- (8) Waterworks helper registration.
- (9) Wastewater works helper registration.

Notices of Rulemaking Intent

Prior to adoption and gubernatorial/legislative review of a proposed PERMANENT rulemaking action, an agency must publish a Notice of Rulemaking Intent in the *Register*. In addition, an agency may publish a Notice of Rulemaking Intent in the *Register* prior to adoption of a proposed EMERGENCY or PREEMPTIVE rulemaking action.

A Notice of Rulemaking Intent announces a comment period, or a comment period and public hearing, and provides other information about the intended rulemaking action as required by law, including where copies of proposed rules may be obtained. For additional information on Notices of Rulemaking Intent, see 75 O.S., Section 303.

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY

[OAR Docket #97-1189]

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking
Proposed rules:

252:2. Procedures of the Department of Environmental Quality Subchapter 15. Uniform Permitting Procedures [AMENDED]

Summary:

The proposed amendments of 252:2-15-40 and 252:2-15-41 result from the U.S. Environmental Protection Agency's (EPA) review of the Department of Environmental Quality's (DEQ) air quality permitting program for Title V. Per EPA request and other comments received, the Air Quality Tier I and II rules of the uniform permitting program are being amended. Amendments include format changes for purposes of clarity and substantive changes to move certain permits from Tier I to Tier II to allow more public participation - e.g., acid rain permits, temporary permits, some operating permits, and general permit authorizations required to have compliance schedules under OAC 252:100-8.

AUTHORITY:

Environmental Quality Board, 27A O.S. Supp. 1993, §§ 2-2-101 and 2-5-101 *et seq.*, Oklahoma Clean Air Act

COMMENT PERIOD:

Deliver or mail written comments from Tuesday, September 15, 1997, through Wednesday, October 15, 1997, to contact person. Also scheduled before the Environmental Quality Board at their meeting on Tuesday, November 18, 1997 - 9:30 a.m., in Oklahoma City, Oklahoma (Location to be determined. See contact person).

PUBLIC HEARINGS:

Before the Air Quality Council on Tuesday, October 21, 1997, 9:30 a.m. briefing and 1:00 p.m. hearing, at the Tulsa City-County Health Department, 4616 East 15th Street, Tulsa, Oklahoma.

COPIES OF PROPOSED RULES:

Copies of the rules will be available September 15, 1997, for review at the Air Quality Division office at the address listed below or may be obtained from the contact person.

RULE IMPACT STATEMENT:

The rule impact statement may be obtained from the Air Quality Division at the address below.

CONTACT PERSON:

[OAR Docket #97-1189; filed 8-22-97]

~~TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 100. AIR POLLUTION CONTROL~~

~~[OAR Docket #97-1190]~~

~~INTENDED RULEMAKING ACTION:~~

~~Notice of proposed EMERGENCY and PERMANENT rulemaking~~

~~Proposed rules:~~

~~Subchapter 5. Registration of Air Contaminant Sources [AMENDED]~~

~~Subchapter 7. Construction Permits for Major and Minor Sources; Operating and Relocation Permits for Minor Sources [AMENDED]~~

~~Subchapter 8. Operating Permits (Part 70) [AMENDED]~~

~~Subchapter 41. Control of Emission of Hazardous and Toxic Air Contaminants [AMENDED]~~

~~Summary:~~

~~The proposed amendments to Subchapter 5 include moving the requirements to file an emission inventory from Subchapter 7 to Subchapter 5, moving the requirements to pay annual operating fees from Subchapters 7 and 8 to Subchapter 5, and revising the annual operating fees for~~

minor facilities, non-part 70 sources and part 70 sources. The proposed amendments to Subchapter 5 are designed to simplify and clarify the rules. The proposed amendments to Subchapter 7 are necessary to incorporate a new permit classification system into the Air Quality program. The proposed changes include: remove any requirements for Part 70 sources and major facilities (which will be moved to Subchapter 8); define and exempt "de minimis" facilities from the requirements of Subchapter 7; revise minor permit application fees; and introduce two new types of construction and operating permits, permit by rule and general permit. The proposed amendments to Subchapter 8 are necessary to incorporate a new permit classification system; move the requirements for construction permits for Part 70 sources and major facilities from Subchapter 7 to Subchapter 8; move the requirement to pay annual operating fees from Subchapter 8 to Subchapter 5; and meet the federal permitting requirements for final approval of the Oklahoma Operating Permits Program under Title V of the federal Clean Air Act and 40 CFR Part 70. The proposed amendments include: introduction of general permits for construction of Part 70 sources and major facilities not subject to Part 70 and general permits for operating major sources not subject to Part 70; addition of the requirements for construction permits for Part 70 sources and construction and operating permits for major facilities not subject to Part 70; revision of the permit application fees; deletion of annual operating fees (which will be moved to Subchapter 5); and amendments to meet the requirements for final approval of the Title V program including the incorporation by reference of federal rules governing case-by-case MACT determinations (40 CFR §§63.40, 63.41, 63.43 and 63.44). The following changes were set forth by EPA in the interim approval of the Oklahoma Program published in the Federal Register at 62 FR 4220, Monday, February 5, 1996: (1) Revise Subchapter 8 to Include Transition Schedule; (2) Revise Subchapter 8 definition of "Major Source"; (3) Revise Subchapter 8 Insignificant Activities Provision; (4) Revise Subchapter 8 Permit Content Language; (5) Revise Subchapter 8 Judicial Review Provision; (6) Revise Subchapter 8 Administrative Amendment Provision; and (7) Submission of a SIP Revision for Subchapter 7. The proposed amendments to Subchapter 41 include adopting by reference the existing Maximum Available Control Technology ("MACT") standards for hazardous air pollutants found in 40 CFR Part 63, Subparts F, G, H, I, L, M, N, O, Q, R, T, U, W, X, Y, CC, DD, EE, GG, II, JJ, KK, OO, PP, QQ, RR, VV, JJJ. The Division is requesting comments on these issues.

AUTHORITY:

Environmental Quality Board, 27A O.S. Supp. 1993, §§ 2-2-101 and 2-5-101 *et seq.*, Oklahoma Clean Air Act

COMMENT PERIOD:

Deliver or mail written comments from Tuesday, September 15, 1997, through Wednesday, October 15, 1997, to contact person. Also scheduled before the

PUBLIC HEARINGS:

Before the Air Quality Council on Tuesday, October 21, 1997, 9:30 a.m. briefing and 1:00 p.m. hearing, at the Tulsa City-County Health Department, 4616 East 15th Street, Tulsa, Oklahoma.

COPIES OF PROPOSED RULES:

Copies of the rules will be available September 15, 1997, for review at the Air Quality Division office at the address listed below or may be obtained from the contact person.

RULE IMPACT STATEMENT:

The rule impact statements may be obtained from the Air Quality Division at the address below.

CONTACT PERSON:

Joyce D. Sheedy, Ph.D., Department of Environmental Quality, Air Quality Division, 4545 N. Lincoln Blvd., Suite 250, Oklahoma City, Oklahoma 73105-3483; (405) 290-8247.

ADDITIONAL INFORMATION:

The proposed rulemaking activities for Subchapters 5, 7, and 41 represent a continuation of a hearing held on August 19, 1997, in Oklahoma City, Oklahoma.

PERSONS WITH DISABILITIES:

Should you desire to attend but have a disability and need an accommodation, please notify the Air Quality Division three (3) days in advance at (405) 290-8247

[OAR Docket #97-1190; filed 8-22-97]

**TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 200. HAZARDOUS WASTE MANAGEMENT**

[OAR Docket #97-1191a]

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT and EMERGENCY rulemaking

Proposed rules:

252:200-3-1 [AMENDED]

252:200-3-2 [AMENDED]

252:200-9-7(b)(1) [AMENDED]

252:200-19-29 through 252:200-19-34 [AMENDED]

Summary:

The proposed amendment to 252:200-3-1 changes the "Reference to 40 CFR" Section of Subchapter 3, to allow the State of Oklahoma to continue to implement a hazardous waste management program in Oklahoma in lieu of the United States Environmental Protection Agency. The Section 3-1 amendment will update the reference of 40

Notices of Rulemaking Intent

SUMMARY:

The proposed amendment to OAC 60:10-3-5 deletes an obsolete provision relating to the destruction of duplicate records. The proposed amendments to 60:10-5-1 and OAC 60:10-9-1 revoke obsolete rules based on Executive Order 89-14 which is no longer in effect. The proposed amendment to OAC 60:10-7-4 provides for uncertified micrographics laboratories to have their microfilm and microfiche inspected by any certified laboratory and requires that certified laboratories submit copies of quality evaluation forms and a five percent (5%) sample of microfilm and microfiche they create or inspect to the Records Management Division of the Oklahoma Department of Libraries. OAC 60:10-10 establishes rules for state government records which will be maintained on video tapes and audio tapes.

AUTHORITY:

Archives and Records Commission; 67 O. S., § 212 and 67 O. S., § 301

COMMENT PERIOD:

Written and oral comments will be accepted prior to and during a public hearing on January 14, 1998. The January 14, 1998 public hearing will be held in the South Conference Room of the Allen Wright Building of the Oklahoma Department of Libraries, 200 N. E. 18th Street, Oklahoma City, Oklahoma 73105-3298. The public hearing will begin at 10:00 A. M. Oral comments may be made during the public hearing and written comments may be submitted during the public hearing or in writing prior to the public hearing. Written comments on OAC 60:10-3-5, 60:10-5-1, 60:10-7-4, 60:10-9-1, and 60:10-10 may be mailed to the Office of Government Information, Oklahoma Department of Libraries, 200 N. E. 18th Street, Oklahoma City, Oklahoma 73105-3298, c/o Thomas W. Kremm.

PUBLIC HEARING:

A public hearing regarding the proposed amendments to the rules will be held Wednesday January 14, 1998, at 10:00 A. M. in the South Conference Room of the Allen Wright Building of the Oklahoma Department of Libraries, 200 N. E. 18th Street, Oklahoma City, Oklahoma 73105-3298.

COPIES OF PROPOSED RULES:

Copies of proposed rules may be obtained from the Office of Government Information, Oklahoma Department of Libraries, 200 N. E. 18th Street, Oklahoma City, Oklahoma 73105-3298.

RULE IMPACT STATEMENT:

Pursuant to 75 O. S., § 303 (D), a Rule Impact Statement will be prepared and will be available by December 15, 1997, at the Office of Government Information, Oklahoma Department of Libraries, 200 N. E. 18th Street, Oklahoma City, Oklahoma 73105-3298.

CONTACT PERSON:

Thomas W. Kremm, Office of Government Information
(405) 521-2502

ADDITIONAL INFORMATION:

The public hearing will be held in conjunction with the Archives and Records Commission's regularly scheduled January 14, 1998 meeting. The Commission intends to consider adoption of the proposed amendments at the regularly scheduled January 14, 1998 meeting. Notification of this intended action will be mailed within three days after publication of this Notice to all persons who have made a timely request for advanced notice of proposed rulemaking proceedings.

[OAR Docket #97-1284; filed 10-28-97]

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY

[OAR Docket #97-1271]

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking

PROPOSED RULES:

Subchapter 15. Uniform Permitting Procedures
[AMENDED]

SUMMARY:

The proposed amendments of 252:2-15-40 and 252:2-15-41 result from the U.S. Environmental Protection Agency's (EPA) review of the Department of Environmental Quality's (DEQ) air quality permitting program for Title V. Per EPA request and other comments received, the Air Quality Tier I and II rules of the uniform permitting program are being amended. Amendments include format changes for purposes of clarity and substantive changes to move certain permits from Tier I to Tier II to allow more public participation - e.g., acid rain permits, temporary permits, some operating permits, and general permit authorizations required to have compliance schedules under 252:100-8.

AUTHORITY:

Environmental Quality Board, 27A O.S. Supp. 1993, §§ 2-2-101 and 2-5-101 *et seq.*, Oklahoma Clean Air Act

COMMENT PERIOD:

Monday, November 17, 1997, through Tuesday, December 16, 1997. To be thoroughly considered by staff prior to the hearing, written comments should be submitted to the contact person by Wednesday, December 10, 1997. Also scheduled before the Environmental Quality Board at their meeting on Tuesday, January 27, 1998 - 9:30 a.m. (Location to be determined. See contact person).

PUBLIC HEARINGS:

Before the Air Quality Council on Tuesday, December 16, 1997, 9:30 a.m. briefing and 1:00 p.m. hearing, at the

Department of Environmental Quality, Air Quality Division, 4545 N. Lincoln Blvd., Burgundy Room, Oklahoma City, Oklahoma.

COPIES OF PROPOSED RULES:

Copies of the rules will be available November 17, 1997, for review at the Air Quality Division office at the address listed below or may be obtained from the contact person.

RULE IMPACT STATEMENT:

The rule impact statement may be obtained from the Air Quality Division at the address below.

CONTACT PERSON:

[OAR Docket #97-1271; filed 10-24-97]

**TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 100. AIR POLLUTION CONTROL**

[OAR Docket #97-1272]

INTENDED RULEMAKING ACTION:

Notice of proposed EMERGENCY and PERMANENT rulemaking

PROPOSED RULES:

- 252:100. Air Pollution Control
- Subchapter 5. Registration of Air Contaminant Sources [AMENDED]
- Subchapter 8. Operating Permits (Part 70) [AMENDED]
- Subchapter 17. Incinerators [AMENDED]

SUMMARY:

In Subchapter 5 at 252:100-5-2.2(b)(2), it is proposed to review the annual operating fees for Part 70 sources. The proposed amendments to Subchapter 8 are necessary to incorporate a new permit classification system; move the requirements for construction permits for Part 70 sources and major facilities from Subchapter 7 to Subchapter 8; move the requirement to pay annual operating fees from Subchapter 8 to Subchapter 5; and meet the federal requirements for final approval of the Oklahoma Operating Permits Program under Title V of the federal Clean Air Act and 40 CFR Part 70. The proposed amendments include: introduction of general permits for construction of Part 70

sources and major facilities not subject to Part 70 general permits for operating major sources not subj Part 70; addition of the requirements for permits for Part 70 sources and construction and oper permits for major facilities not subject to Part 70; revisi the permit application fees; deletion of annual oper fees (which will be moved to Subchapter 5); amendments to meet the requirements for final appro the Title V program including the incorporation reference of federal rules governing case-by-case M determinations (40 CFR §§63.40, 63.41, 63.43 and 63. The following changes were set forth by EPA in the int approval of the Oklahoma program published in Federal Register at 62 FR 4220, Monday, February 5, 1 (1) Revise Subchapter 8 to Include Transition Schedule Revise Subchapter 8 definition of "Major Source"; Revise Subchapter 8 Insignificant Activities Provision Revise Subchapter 8 Permit Content Language; (5) Re Subchapter 8 Judicial Review Provision; (6) Re Subchapter 8 Administrative Amendment Provision; (7) Submission of a SIP Revision for Subchapter 7. proposed to amend Subchapter 17 by adding a new Pa and a new Appendix K to address Municipal W Combustors (MWC). This amendment is necessary to n federal requirements for State plans under Section 11 of the federal Clean Air Act applicable to existing sour This change would adopt standards published on Decem 19, 1995, in the Federal register at 40 CFR 60, and amended on August 25, 1997. These stand apply to MWC units with the capacity to combust more t 250 tons per day of municipal solid waste. In addition, existing portions of Subchapter 17 are revised redesignated as Part 1, General Provisions, and Par Incinerators. Proposed revisions include deletion references to Ringelmann standards and substitutio relative opacity. Revisions were also made to Appendice and B for reasons of simplification. The Division requesting comments on these issues.

Monday, November 17, 1997, through Tuesd December 16, 1997. To be thoroughly considered by st prior to the hearing, written comments should be submit to the contact person by Wednesday, December 10, 19 Also scheduled before the Environmental Quality Board their meeting on Tuesday, January 27, 1998 - 9:30 a [Location to be determined. See contact person.]

PUBLIC HEARINGS:

Before the Air Quality Council on Tuesday, Decem 16, 1997, 9:30 a.m. briefing and 1:00 p.m. hearing, at Department of Environmental Quality, Air Qua Division, 4545 N. Lincoln Blvd., Burgun Oklahoma City, Oklahoma.

~~shall, at a minimum, allow incoming calls from any location within the county, or a larger area if such area is demonstrated to be more economical, to be completed at no charge (i.e., toll free) to the calling party a larger area if the provision of such service is determined to be more economically efficient for the telecommunications carrier. The written request by a board of county commissioners shall be in the form and content approved by the Director of the Public Utility Division.~~

~~(b) Where the technical capability exists, the eligible telecommunications carrier shall periodically monitor the usage only of the provided telephone number, and if, upon review, usage does not support the requested number of access lines, the number of access lines may be reduced.~~

~~(b)(c) The eligible telecommunications carrier providing the Special Universal Service shall receive reimbursement from the OUSF in the amount of the tariffed rate or charge directly attributable to the provisioning of from the OUSF for reimbursement of the provided telephone number, access lines and associated usage the incoming, toll-free telephone number, the associated usage, the access lines and all access or other charges paid by the telecommunications carrier providing the Special Universal Service.~~

165:59-7-11. Dispute resolution

~~Any dispute(s) regarding any Special Universal Service shall be directed to the OUSF Administrator, resolved pursuant to OAC 165:59-3-36.~~

165:59-7-13. Resold Special Universal Services

~~To the extent Special Universal Services are purchased from a telecommunications service provider by another telecommunications carrier, such Special Universal Services provider of Special Universal Services are for the exclusive use of the not-for-profit hospital, public school and public library or county seat government which has submitted a bona fide request and demonstration of need written request for Special Universal Services. Under no circumstances shall Special Universal Services be resold, repackaged or shared with any other customer of the telecommunications carrier the not-for-profit hospital, public school, public library or county government sell, repackage or share Special Universal Services with any other entity.~~

165:59-7-14. [RESERVED]

165:59-7-15. Provision of Special Universal Services

~~(a) Upon receipt of a written request by a not-for-profit hospital, public school, public library or board of county commissioners, the provider of Special Universal Services receiving the request shall make a good faith effort to provide the requested Special Universal Service not later than ten (10) business days after receiving the request.~~

~~(b) If the requested Special Universal Service cannot be provided within the time limit established by subsection (a) of this Section, the provider of Special Universal Services~~

~~shall immediately notify the entity requesting the service of the estimated delay and any interim service that might be available. Service requests shall be filled as quickly as practicable, but no longer than thirty (30) days after the request for service has been received by the provider unless unavoidable delays beyond the provider's control are experienced. If the service will be delayed longer than thirty (30) days, the provider shall promptly notify the Commission of the reason for the delay upon becoming aware of the delay, and the anticipated completion date of the request for service.~~

165:59-7-16. [RESERVED]

165:59-7-17. Disclosure on bill regarding provided Special Universal Services

~~Each provider of Special Universal Services, which may be either a telecommunications carrier or OneNet, shall render a bill to the not-for-profit hospital, public school, public library, or county seat government regarding said Special Universal Services. The bill shall reflect the provider's tariffed rate or charge for the provided toll-free telephone number, access lines, usage and any other costs incurred by the provider in conjunction with the provision of the Special Universal Services, along with a credit equivalent to the reimbursement received by the provider from the Oklahoma Universal Service Fund.~~

ANALYSIS:

The changes in the permit tier rules revise the air approvals at EPA's request for Title V compliance.

Air Quality Advisory Council recommended these amendments for adoption at their meeting on December 16, 1997.

SUMMARY OF DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

There are no differences. The air approvals are consistent with EPA Title V guidance.

CONTACT PERSON:

Joyce D. Sheedy, Ph.D., Department of Environmental Quality, Air Quality Division, 4545 N. Lincoln Blvd. Suite 250, Oklahoma City, Oklahoma 73105. (405) 290-8247.

PURSUANT TO THE ACTIONS DESCRIBED HEREIN, THE FOLLOWING RULES ARE CONSIDERED FINALLY ADOPTED AS SET FORTH IN 75 O.S. 1997, SECTION 308.1(A), WITH AN EFFECTIVE DATE OF JUNE 1, 1998.

SUBCHAPTER 15. UNIFORM PERMITTING PROCEDURES

PART 5. TIER CLASSIFICATIONS

252:2-15-40. Air quality applications - Tier I

The following air quality authorizations require Tier I applications:

- (1) Construction permit for a minor source.
- (2) Operating permit for a minor source.
- (3) Operating permit for a major facility, issued after a construction permit, which does not differ from the construction permit in any manner which would

otherwise subject the operating permit application to public review.

(4) ~~New, modified or renewed authorization under a general permit.~~

(5) ~~Modification of a minor source's construction and/or operating permit when the source remains a minor source after the modification.~~

(6) ~~Minor modification of a major facility's construction and/or operating permit.~~

(7) ~~Acid rain permits.~~

(8) ~~Burn approval.~~

(9) ~~Relocation permit.~~

(10) ~~Temporary permit.~~

(11) ~~Plant-wide emission plan approval.~~

(12) ~~Administrative amendment of all permits and other authorizations.~~

(13) ~~Extension of a minor source's construction permit.~~

(14) ~~Extension of a major facility's construction permit with no or minor modification.~~

(15) ~~Renewal of an operating permit for a minor source.~~

(a) Minor source permits. The following air quality authorizations for minor sources require Tier I applications.

(1) New permits. New construction, operating and relocation permits.

(2) Modifications of permits.

(A) Modification of a construction permit for a minor source that will remain minor after the modification.

(B) Modification of an operating permit that will not change the source's classification from minor to major.

(C) Extension of expiration date of a construction permit.

(3) Renewals. Renewals of operating permits.

(b) Major facility permits. The following air quality authorizations for major facilities require Tier I applications.

(1) New permits.

(A) New construction permit for an existing major facility for any facility change considered minor under 252:100-8-7.2(b)(1).

(B) New operating permit that:

(i) is based on a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) has conditions which do not differ from the construction permit's operating conditions in any way considered significant under 252:100-8-7.2(b)(2).

(2) Modifications of permits.

(A) Modification of any operating permit condition that:

(i) is based on the operating conditions of a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) does not differ from those construction

permit conditions in any way considered significant under 252:100-8-7.2(b)(2).

(B) A construction or operating permit modification that is minor under 252:100-8-7.2(b)(1).

(C) Extension of expiration date of a major facility's construction permit with no or minor modifications.

(c) Other authorizations. The following air quality authorizations require Tier I applications.

(1) New, modified and renewed individual authorizations under general operating permits for which a schedule of compliance is not required by 252:100-8-5(c)(8)(B)(i).

(2) Burn approvals.

(3) Plant-wide emission plan approval under 252:100-37-25(b) or 252:100-39-46(j).

(4) Administrative amendments of all air quality permits and other authorizations.

(5) Alternative emissions reduction authorizations. (Also subject to state implementation plan revision procedures in see 252:100-11.)

252:2-15-41. Air quality applications - Tier II

The following air quality authorizations require Tier II applications.

(1) Operating permit for a major facility, issued after a construction permit, which differs from the construction permit in a manner which subjects the operating permit application to public review.

(2) Operating permit for a major facility that does not have a construction permit.

(3) Significant modification, as defined in OAC 252:100-8-7(e)(2), of a major facility's construction or operating permit.

(4) New, modified or renewed general permit.

(5) Time extension of a major facility's construction permit with a modification that would otherwise be subject to public review.

(6) Renewal of an operating permit for a major facility.

(7) A construction permit for a new major facility or a major modification to an existing major facility.

(a) Minor source permit actions. Any minor source seeking a permit for a facility modification that when completed would turn it into a major facility is required to apply under subsection (b) of this section.

(b) Major facility permits. The following air quality authorizations for major facilities require Tier II applications.

(1) New permits.

(A) New construction permit for a new major facility not classified under Tier III.

(B) New construction permit for an existing major facility for any facility change considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(C) New operating permit for a major facility that did not have an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(D) New operating permit with one or more conditions that differ from the underlying Tier II or III construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(E) New acid rain permit that is independent of a Title V permit application.

(F) New temporary source permit under 252:100-8-6.2.

(2) Modifications of permits.

(A) Significant modification, as described in 252:100-8-7.2(b)(2), of an operating permit that is not based on an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(B) Modification of an operating permit when the conditions proposed for modification differ from the underlying construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(C) A construction permit modification considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(3) Renewals. Renewals of operating permits.

(c) Other authorizations. The following air quality authorizations require Tier II applications.

(1) New, modified and renewed general operating permits.

(2) Individual authorizations under any general operating permit for which a schedule of compliance is required by 252:100-8-5(c)(8)(B)(i).

Notice of proposed PERMANENT Rulemaking.

PROPOSED RULE: OAC 252:010 Uniform Environmental Permitting [NEW]

SUMMARY: These proposed rules, with an effective date of July 1, 1996, implement in part the Oklahoma Uniform Environmental Permitting Act, 27A O.S.Supp. 1994, § 2-14-101 et seq, as last amended by S.B. 247 (1995). For each individual permitting program of the Department of Environmental Quality (DEQ), these proposed rules classify applications for specific types of permits, certifications, licenses, registrations or other kinds of DEQ authorization actions as Tier I, II or III.

AUTHORITY: Environmental Quality Board; 27A O.S.Supp. 1994, §§ 2-2-101 and 2-14-201.

COMMENT PERIOD: Deliver or mail written comments Tuesday, August 1 through Thursday, August 31, 1995 to appropriate contact person.

PUBLIC HEARINGS:

Friday, August 4, 1995 - Operator Certification Tier Rules: Before the Operator Certification Advisory Council - Conference Room 107, Engineering Science Division, Rose State College, 6420 S.E. 15th, Midwest City, Oklahoma; 1:00 p.m.

Tuesday, August 15, 1995 - Air Quality Tier Rules: Before the Air Quality Council - Lincoln Plaza, Burgundy Room, 4545 N. Lincoln, Oklahoma City; Briefing - 9:30 a.m.; Hearing 1:00 p.m. (Contact: Dennis Doughty 405/271-5338).

Tuesday, August 29, 1995 - Solid Waste Management Tier Rules: Before the Solid Waste Management Advisory Council - Chamber of Commerce Building, 409 S. Main, Stillwater; 10:00 a.m.

Thursday, August 31, 1995 - Hazardous Waste Management Tier Rules: Before the Hazardous Waste Management Advisory Council - Cherokee Strip Convention Center, 123 W. Main, Enid; 1:00 p.m.

Tuesday, September 5, 1995 - Water Quality and Underground Injection Control Tier Rules: Before the Water Quality Council - Room 1102, Department of Health Building, 1000 N.E. 10th, Oklahoma City; 10:00 a.m.

Thursday, September 7, 1995 - Radiation Management Tier Rules: Before the Radiation Management Advisory Council - 10:00 a.m.; Oklahoma City [Location to be determined].

Tuesday, October 3, 1995 - Water Quality and Underground Injection Control Tier Rules: Before the Water Quality Council - Board Room, State Agriculture Building, 2800 N. Lincoln, Oklahoma City; 1:00 p.m.

Tuesday, October 10, 1995 - Laboratory Certification Tier Rules: Before the Laboratory Services Advisory Council - Room 1102, Health Department Building, 1000 N.E. 10th, Oklahoma City; 1:00 p.m.

Tuesday, October 17, 1995 - Air Quality Tier Rules: Before the Air Quality Council - Tulsa City-County Health Department Auditorium, 4616 E. 15th, Tulsa; Briefing - 9:30 a.m.; Hearing 1:00 p.m. (Contact: Dennis Doughty 405/271-5338).

Thursday, October 19, 1995 - Solid Waste Management Tier Rules: Before the Solid Waste Management Advisory Council - 10:00 a.m.; Tulsa [Location to be determined].

Friday, October 27, 1995 - Operator Certification Tier Rules: Before the Operator Certification Advisory Council - Conference Room 107, Engineering Science Division, Rosa State College, 6420 S.E. 15th, Midwest City; 1:00 p.m.

Tuesday, November 7, 1995 - Water Quality and Underground Injection Control Tier Rules: Before the Water Quality Council - [Location to be determined] 1:00 p.m.

Thursday, November 9, 1995 - Hazardous Waste Management Tier Rules: Before the Hazardous Waste Management Advisory Council - 10:00 a.m. [Location to be determined].

Tuesday, November 28, 1995 - All Tier Rules: Before the Environmental Quality Board. [Location to be determined].

COPIES OF PROPOSED RULES: Copies may be reviewed in Room 1214 of the Department of Environmental Quality, 1000 N.E. 10th, Oklahoma City or may be obtained from contact persons.

RULE IMPACT STATEMENT: See "Copies of Proposed Rules".

CONTACT PERSONS: Mailing address for each contact person is Department of Environmental Quality, 1000 N.E. 10th, Oklahoma City, OK 73117-1212 unless another address is listed.

Air Quality: Jan Yue, 4545 N. Lincoln, Ste. 250, Oklahoma City, Oklahoma 73105; 405/271-5220.

Hazardous Waste Management: Don Barrett, 405/271-5338.

Laboratory Certification: Tony Bright, 405/271-5240.

Operator Certification: Laird Hughes 405/271-5205.

Private Sewage Disposal Systems, Residential Plat Plans, and Waterwells: Don Maisch, 405-271-7484.

Radiation Management: Mike Broderick, 405/271-7484.

Solid Waste Management: Wes Squyres, 405/745-7100.

Water Quality: Norma Aldridge, 405/271-5205.

Underground Injection Control: Amil Lyon, 405/271-7128.

General information: Kay York, 405/271-8140.

[ADDITIONAL INFORMATION: PERSONS WITH DISABILITIES: Should you desire to attend a rulemaking hearing but have a disability and need an accommodation, please notify the Department of Environmental Quality three (3) days in advance at 405/271-5220.]

[Okla. Reg. 95-1129; filed July 10, 1995]

250:10

**TITLE 252: DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 10. UNIFORM ENVIRONMENTAL PERMITTING RULES**

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT Rulemaking.

PROPOSED RULE: OAC 252:010 [Uniform Environmental Permitting];
[NEW]

SUMMARY: These proposed rules and rule changes, with an effective date of July 1, 1996, implement in part the Oklahoma Uniform Environmental Permitting Act, 27A O.S.Supp. 1994, § 2-14-101 et seq., as last amended by S.B. 247 (1995), and augment proposed rules (notice of which was published August 1, 1995) which classify applications for permits, certifications, licenses, registrations or other kinds of Department of Environmental Quality (DEQ) authorization actions as Tier I, II and III. Proposed OAC 252:010 contains uniform rules which establish tiered procedures that apply to all permitting programs, and program-specific rules which supplement the uniform rules. Also included for purposes of consistency and simplicity are program-specific rules and DEQ procedural rules which are located in other Chapters of Title 252 and which are to be amended, or revoked because they duplicate proposed OAC 252:010 rules. Specifically:

DEQ Procedural Rules: Revocation of Subchapter 15 ("Permitting Timelines") of OAC 252:002 and its recodification into OAC 252:010.

Air Quality Permitting Rules: Subchapter 21 of [NEW] OAC 252:010; Subchapters 7 and 8 and [NEW] Subchapter 6 of OAC 252:100.

Laboratory Certification Permitting Rules: Subchapter 41 of [NEW] OAC 252:010 and Subchapter 5 of OAC 252:300.

Solid Waste Management Permitting Rules: Subchapter 71 of [NEW] OAC 252:010; OAC 252:510; and [NEW] OAC 252:520.

Hazardous Waste Management Permitting Rules: Subchapter 31 of [NEW] OAC 252:010; OAC 252:200.

Operator Certification Procedural Rules: Subchapter 51 of [NEW] OAC 252:010; OAC 252:700; and OAC 252:645.

Radiation Management Permitting Rules: Subchapter 61 of [NEW] OAC 252:010; Subchapters 3 and 5 and proposed [NEW] Subchapter 17 ("XRF Licenses") of OAC 252:400.

Water Quality Permitting Rules: Subchapters 91 et seq. of [NEW] OAC 252:010 and OAC 252:605, 252:610, 252:615, 252:620, 252:622, 252:625, 252:630, 252:635, 252:640, 252:647 and 252:655.

Underground Injection Control Permitting Rules: Subchapter 81 of [NEW] OAC 252:010; OAC 252:650 and [NEW] OAC 252:652.

AUTHORITY: Environmental Quality Board; 27A O.S.Supp. 1994, §§ 2-2-101 and 2-14-201.

COMMENT PERIOD: Deliver or mail written comments to appropriate contact person Tuesday, August 15 through Thursday, September 7 on radiation rules. For all other rules, the comment period ends Friday, September 15, 1995.

PUBLIC HEARINGS: Hearings scheduled for 1995:

Tuesday, August 15 - Air Quality Permitting Rules: Before the Air Quality Council - Lincoln Plaza Burgundy Room, 4545 N. Lincoln, Oklahoma City; Briefing - 9:30 a.m.; Hearing 1:00 p.m. (Contact: Dennis Doughty 405/271-5220).

Tuesday, August 29 - Solid Waste Management Permitting Rules: Before Solid Waste Management Advisory Council - 409 S. Main, Chamber of Commerce Building, 409 S. Main, Stillwater; 10:00 a.m.

Thursday, August 31 - Hazardous Waste Management Permitting Rules: Before Hazardous Waste Management Advisory Council - Cherokee Strip Convention Center, 123 W. Main, Enid; 1:00 p.m.

Tuesday, September 5 - Water Quality & Underground Injection Control Permitting Rules: Before the Water Quality Council - Room 1102, Department of Health Building, 1000 N.E. 10th, Oklahoma City; 10:00 a.m.

Wednesday, September 6 - Uniform Agency-wide Permitting Rules (Subchapters 1 through 9 of [NEW] OAC 252:010): Before the DEQ - Rm. 314, Health Department Building, 1000 N.E. 10th, Oklahoma City.

Thursday, September 7 - Radiation Management Permitting Rules: Before the Radiation Management Advisory Council - 9:00 a.m.; Oklahoma City [Location to be determined].

Tuesday, October 3 - Water Quality & Underground Injection Control Permitting Rules: Before the Water Quality Council - Board Room, State Agriculture Building, 2800 N. Lincoln, Oklahoma City; 1:00 p.m.

Tuesday, October 10 - Laboratory Certification Permitting Rules: Before the Laboratory Services Advisory Council - Room 1102, Health Department Building, 1000 N.E. 10th, Oklahoma City; 1:00 p.m.

Tuesday, October 17 - Air Quality Permitting Rules: Before the Air Quality Council - Tulsa City-County Health Department Auditorium, 4616 E. 15th, Tulsa; Briefing - 9:30 a.m.; Hearing 1:00 p.m. (Contact: Dennis Doughty 405/271-5338).

Thursday, October 19 - Solid Waste Management Permitting Rules: Before the Solid Waste Management Advisory Council - 10:00 a.m.; Tulsa [Location to be determined].

Friday, October 27 - Operator Certification Permitting Rules: Before Operator Certification Advisory Council - Conference Room 107, Engineering Science Division, Rose State College, 6420 S.E. 15th, Midwest City; 1:00 p.m.

Tuesday, November 7 - Water Quality & Underground Injection Control Permitting Rules: Before the Water Quality Council - State Agriculture Building, 2800 N. Lincoln, Oklahoma City; 1:00 p.m.

Thursday, November 9 - Hazardous Waste Management Permitting Rules: Before the Hazardous Waste Management Advisory Council - 10:00 a.m. [Location to be determined].

Tuesday, December 5 - Water Quality & Underground Injection Control Permitting Rules: Before the Water Quality Council - State Agriculture Building, 2800 N. Lincoln, Oklahoma City; 1:00 p.m.

Thursday, December 7 - Radiation Management Permitting Rules: Before the Radiation Management Advisory Council - St. Francis Hospital, Classroom 2, Tulsa; 10:00 a.m.

Tuesday, December 19 - Air Quality Permitting Rules: Before the Air Quality Council - Burgundy Room, Lincoln Plaza, 4545 N. Lincoln, Oklahoma City; Briefing - 9:30 a.m.; Hearing 1:00 p.m. (Contact: Dennis Doughty 405/271-5220).

PUBLIC HEARINGS: Hearings scheduled for 1996:

Before Councils: (Individual Permitting Rules) Any continuance announced at 1995 hearings.

Before Environmental Quality Board: (All Permitting Rules) (Prior to March 1, 1996) [Exact date and location to be determined].

COPIES OF PROPOSED RULES: Copies may be reviewed in Room 1214 of the Department of Environmental Quality, 1000 N.E. 10th, Oklahoma City or may be obtained from contact persons.

RULE IMPACT STATEMENT: See "Copies of Proposed Rules".

CONTACT PERSONS: Mailing address for each contact person is Department of Environmental Quality, 1000 N.E. 10th, Oklahoma City, OK 73117-1212 unless another address is listed.

Air Quality: Jan Yue, 4545 N. Lincoln, Ste. 250, Oklahoma City, Oklahoma 73105; 405/271-5220.

Hazardous Waste Management: Don Barrett, 405/271-5338.

Laboratory Certification: Tony Bright, 405/271-5240.

Operator Certification: Laird Hughes 405/271-5205.

Radiation Management: Mike Broderick, 405/271-5338.

Solid Waste Management: Wes Squyres, 405/745-7100.

Water Quality (Private Sewage Disposal Systems, Residential Flat Plans, Small Public Sewage Systems & Private Individual Waterwells): Don Maisch, 405-271-8140.

Water Quality (All other rules): Norma Aldridge, 405/271-5205

Underground Injection Control: Amil Lyon, 405/271-7128.

General information and Uniform Rules: Kay York, 405/271-8140.

[ADDITIONAL INFORMATION: PERSONS WITH DISABILITIES: Should you desire to attend a rulemaking hearing but have a disability and need an accommodation, please notify the Department of Environmental Quality three (3) days in advance at 405/271-5220.]

[Okla. Reg. 95-1148; filed July 25, 1995]

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 002. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT Rulemaking.
PROPOSED RULE: OAC 252:002 [Procedures of the Department of Environmental Quality]; [AMENDED] -

SUMMARY: These proposed rules and rule changes, with an effective date of July 1, 1996, implement in part the Oklahoma Uniform Environmental Permitting Act, 27A O.S.Supp. 1994, § 2-14-101 et seq, as last amended by S.B. 247 (1995), and augment proposed rules (notice of which was published August 1, 1995) which classify applications for permits, certifications, licenses, registrations or other kinds of Department of Environmental Quality (DEQ) authorization actions as Tier I, II and III. The proposed amendments and new rules in Subchapter 15 of OAC 252:002 contain uniform rules which establish tiered procedures that apply to all permitting programs. To avoid duplication or conflict with the proposed uniform permitting procedures, certain changes are necessary for program-specific rules located in other Chapters of Title 252. These related actions for which separate notices are being published include:

Air Quality Permitting Rules: OAC 252:100 - Subchapters 7, 8 and 11 [AMENDED] and Subchapter 6 [NEW].

Hazardous Waste Management Permitting Rules: OAC 252:200 [AMENDED].

Laboratory Certification Permitting Rules: Subchapter 5 of OAC 252:300 [AMENDED].

Operator Certification Procedural Rules: OAC 252:700 and OAC 252:645 [AMENDED].

Radiation Management Permitting Rules: OAC 252:400, Subchapters 3 and 5 [AMENDED] and 17 [NEW] [AMENDED].

Solid Waste Management Permitting Rules: OAC 252:510 [AMENDED]; OAC 252:520 [NEW] [AMENDED].

Underground Injection Control Permitting Rules: OAC 252:650 [AMENDED] and OAC 252:652 [NEW].

Water Quality Permitting Rules: OAC 252:605, 252:610, 252:615, 252:620, 252:625, 252:640, 252:647 and 252:655 [ALL AMENDED].

AUTHORITY: Environmental Quality Board; 27A O.S.Supp. 1994, §§ 2-2-101 and 2-14-201.

COMMENT PERIOD: Deliver or mail written comments to appropriate contact person beginning Friday, September 15, 1995 and ending in 1995 on:

- Uniform permitting rules: Monday, October 16.
- Air Quality permitting rules: Friday, December 15.
- Hazardous Waste permitting rules: Friday, November 3.
- Laboratory Certification permitting rules: Friday, October 6.
- Operator Certification permitting rules: Friday, October 20.
- Radiation Management permitting rules: Friday, December 1.
- Solid Waste permitting rules: Friday, October 13.
- Underground Injection Control permitting rules and Water Quality permitting rules: Friday, December 1.

PUBLIC HEARINGS: Hearings scheduled for 1995:

Tuesday, October 10 - Laboratory Certification Permitting Rules: Before the Laboratory Services Advisory Council - Room 1102, Health Department Building, 1000 N.E. 10th, Oklahoma City; 1:00 p.m.

Wednesday, October 11 - Uniform Permitting Rules (OAC 252:002) Before the DEQ - Rm. 806, Health Department Building, 1000 N.E. 10th, Oklahoma City; 10:00 a.m. - 12:00 p.m.

Tuesday, October 17 - Air Quality Permitting Rules: Before the Air Quality Council - Tulsa City-County Health Department Auditorium, 4616 E. 15th, Tulsa; Briefing - 9:30 a.m.; Hearing 1:00 p.m. (Contact: Dennis Doughty 405/271-5338).

Thursday, October 19 - Solid Waste Management Permitting Rules: Before the Solid Waste Management Advisory Council - 10:00 a.m.; Tulsa [Location to be determined].

Friday, October 27 - Operator Certification Permitting Rules: Before Operator Certification Advisory Council - Conference Room 107, Engineering Science Division, Rose State College, 6420 S. 15th, Midwest City; 1:00 p.m.

Tuesday, November 7 - Water Quality & Underground Injection Control Permitting Rules: Before the Water Quality Council - State Agriculture Building, 2800 N. Lincoln, Oklahoma City; 1:00 p.m.

Thursday, November 9 - Hazardous Waste Management Permitting Rules: Before the Hazardous Waste Management Advisory Council - 10:00 a.m. [Location to be determined].

Tuesday, December 5 - Water Quality & Underground Injection Control Permitting Rules: Before the Water Quality Council - State Agriculture Building, 2800 N. Lincoln, Oklahoma City; 1:00 p.m.

Thursday, December 7 - Radiation Management Permitting Rules: Before the Radiation Management Advisory Council - St. Francis Hospital, Classroom 2, Tulsa; 10:00 a.m.

Tuesday, December 19 - Air Quality Permitting Rules; Before the Air Quality Council - Burgundy Room, Lincoln Plaza, 4545 N. Lincoln, Oklahoma City; Briefing - 9:30 a.m.; Hearing 1:00 p.m. (Contact: Dennis Doughty 405/271-5220).

PUBLIC HEARINGS: Hearings scheduled for 1996:

Before Councils: Any continuances to be announced at 1995 hearings.

Before Environmental Quality Board: (Uniform and Program Permitting Rules) (Prior to March 1, 1996) [Exact date and location to be determined].

COPIES OF PROPOSED RULES: Copies may be reviewed in Room 1214 of the Department of Environmental Quality, 1000 N.E. 10th, Oklahoma City or may be obtained from contact persons.

RULE IMPACT STATEMENT: See "Copies of Proposed Rules".

* Ref 2/15/95 ABC: 252:100-010 Uniform Permitting rules "will appear in a new subchapter Chapter 002 Procedures of the Department of Environmental Quality Subchapter 15 Uniform Permitting Procedures."

CONTACT PERSONS: Mailing address for each contact person is Department of Environmental Quality, 1000 N.E. 10th, Oklahoma City, OK 73117-1212 unless another address is listed.
Air Quality: Jan Yue, 4545 N. Lincoln, Ste. 250, Oklahoma City, Oklahoma 73105; 405/271-5220.
Hazardous Waste Management: Don Barrett, 405/271-5338.
Laboratory Certification: Tony Bright, 405/271-5240.
Operator Certification: Laird Hughes 405/271-5205.
Radiation Management: Mike Broderick, 4545 N. Lincoln, Ste. 250, Oklahoma City 73105; 405/271-7484.
Solid Waste Management: Wes Squyres, 405/745-7100.
Water Quality (Residential Sewage Disposal Systems, Residential Developments, Small Public Sewage Systems & Private Individual Waterwells): Don Maisch, 405-271-8140.
Water Quality (All other rules): Norma Aldridge, 405/271-5205.
Underground Injection Control: Amil Lyon, 405/271-7128.
General information and Uniform Rules: Kay York, 405/271-8140.

[**ADDITIONAL INFORMATION: PERSONS WITH DISABILITIES:** Should you desire to attend a rulemaking hearing but have a disability and need an accommodation, please notify the contact person for the program area three (3) days in advance at the number given above.]

[Okla. Reg. 95-1198; filed August 25, 1995]

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY

RULEMAKING ACTION: PERMANENT FINAL ADOPTION

RULE: 252:2-13-1 [REVOKED]; 252:2-15-1 [AMENDED]; 252:2-15-2 [AMENDED]; 252:2-15-3 [AMENDED AND RENUMBERED TO 252:2-15-70]; 252:2-15-4 [AMENDED AND RENUMBERED TO 252:2-15-71]; 252:2-15-5 [AMENDED AND RENUMBERED TO 252:2-15-72]; 252:2-15-6 [AMENDED AND RENUMBERED TO 252:2-15-73]; 252:2-15-7 [AMENDED AND RENUMBERED TO 252:2-15-74]; 252:2-15-8 [AMENDED AND RENUMBERED TO 252:2-15-75]; 252:2-15-9 [RENUMBERED TO 252:2-15-76]; 252:2-15-26 [NEW]; 252:2-15-27 [NEW]; 252:2-15-28 [RESERVED]; 252:2-15-29 [NEW]; 252:2-15-30 [NEW]; 252:2-15-31 [NEW]; 252:2-15-32 [NEW]; 252:2-15-70 through 252:2-15-77 [NEW]; 252:2-15-90 [NEW]; and APPENDIX C [NEW].

AUTHORITY: Environmental Quality Board, 27A O.S.Supp. 1993, Section 2-2-101; 27A O.S.Supp. 1995, Section 2-14-201.

DATES:

Comment period: September 15, 1995 through October 16, 1995.

Public hearing: October 11, 1995.

Adoption: January 16, 1996.

Submitted to Governor: January 26, 1996.

Submitted to House: January 26, 1996.

Submitted to Senate: January 26, 1996.

Gubernatorial approval: March 11, 1996.

Legislative approval: Failure of the Legislature to disapprove the rules resulted in approval on March 27, 1996.

Final adoption: March 27, 1996.

Effective: July 1, 1996.

SUPERSEDED EMERGENCY ACTIONS: None.

INCORPORATION BY REFERENCE: None.

ANALYSIS: These rules implement in part the Oklahoma Uniform Environmental Permitting Act ("Act"), 27A O.S.Supp. 1995, § 2-14-101 et seq. as last amended in S.B. 247 (1995). Proposed as permanent rules to take effect July 1, 1996, these rules amend Subchapter 15 of OAC 252:2, Parts 1, 3, 7 & 9. Part 1 rules state the purpose, scope and applicability of Subchapter 15 and define terms. The specified rules in Part 3 supplement the Tier process requirements of the Act. Part 7 consists of existing OAC 252:2-15 rules which have been renumbered, and amended and added to as necessary to update permitting review procedures and time lines. Part 9 specifies the types of permissive procedural consolidations available to applicants.

CONTACT PERSON: Kay York, Attorney, Department of Environmental Quality, 1000 N.E. 10th, Oklahoma City, OK 73117-1212. Phone (405) 271-8140.

PURSUANT TO THE ACTIONS DESCRIBED HEREIN, THE FOLLOWING RULE IS CONSIDERED FINALLY ADOPTED AS SET FORTH IN 75 O.S. 1991, SECTION 308.1(A), WITH AN EFFECTIVE DATE OF JULY 1, 1996.

SUBCHAPTER 13. FORMAL PUBLIC MEETINGS AND ADMINISTRATIVE PERMIT PROCEEDINGS

PART 1. FORMAL PUBLIC MEETINGS

252:2-13-1. Formal public meetings [REVOKED]

~~(a) Location. The DEQ shall determine the location and the facility at which a formal public meeting on a permit application and/or draft permit shall be held.~~

~~(b) Purpose. The designated presiding officer of a formal public meeting shall establish the procedure by which such meeting shall be conducted based on the requirements of the Code and applicable program specific rules.~~

Agency Note (1): The language of this revoked section has been amended and can now be found at 252:2-14-31(g).

SUBCHAPTER 15. ENVIRONMENTAL PERMIT PROCESSING-TIMS UNIFORM PERMITTING PROCEDURES

PART 1. UNIFORM PERMITTING PROGRAM IN GENERAL

252:2-15-1. Purpose and applicability

(a) Purpose. The rules in this Subchapter establish time periods for issuance or denial of environmental permits and licenses that are required by law implement the Oklahoma Uniform Environmental Permitting Act, 27A O.S.Supp. 1995, § 2-14-101 et seq., and apply to applicants for and holders of DEQ permits and other authorizations.

(b) Permits included. The provisions of this Subchapter apply to permits reviewed by the following programs and their successors:

~~(1) the Air Quality Division;~~

~~(2) the Hazardous Waste Management Program;~~

~~(3) the Solid Waste Management Program; and~~

~~(4) the Water Quality Division. Supersedes inconsistent rules. Except as otherwise provided by statute, the provisions of this Subchapter shall supersede any inconsistent provision of other Chapters of this Title.~~

~~(c) Supersedes inconsistent rules. Except as otherwise provided by statute, the provisions of this Subchapter shall supersede any inconsistent provision of other Chapters of this Title. Applicability.~~

~~(1) Applications filed with the DEQ on and after July 1, 1996, are subject to the procedural requirements of 27A O.S.Supp. 1995, § 2-14-101 et seq., this Subchapter and other applicable rules of the Board.~~

~~(2) Applications filed before July 1, 1996, are subject to the statutory and regulatory procedural requirements existing at the time of the filing unless the applicant elects to comply with the statutes and rules described in paragraph 1 of this subsection.~~

252:2-15-2. Definitions

~~The In addition to terms defined in 252:2-1-2, the following words~~

and terms, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Act" means the Oklahoma Uniform Environmental Permitting Act, 27A O.S. § 2-15-101 et seq.

"Administratively complete" means an application that contains the information specified in the application form and rules in sufficient detail to allow the DEQ to begin technical review.

"Application" means a document prepared in accordance with the rules and the forms and instruction provided by the respective Program and submitted with the expectation of providing that information necessary for review and determination of the permit. The application consists of the initial submittal and all supplements. See 27A O.S. Supp., 1995, § 2-14-103(1).

"Major facility", as used in air quality tier classifications, means a source subject to the permitting requirements of 40 CFR Part 70.

"Minor source", as used in air quality tier classifications, means a source that is not subject to the permitting requirements of 40 CFR Part 70.

"Off-site", as used in hazardous waste, solid waste and UIC tier classifications, means a facility which receives waste from various sources for treatment, storage, processing, or disposal.

"On-site", as used in hazardous waste, solid waste and UIC tier classifications, means a facility owned and operated by an industry for the treatment, storage, processing, or disposal of its own waste exclusively.

"Part" means a numbered Part of this Subchapter.

"Program" means the services or divisions of the DEQ that are specified in Section 252-002-15-1a regulatory section or division of the DEQ.

"Submittal" means each separately submitted document or group of document package that forms documents provided as part of an application.

"Supplement" means a response to a request for additional information following completeness and technical reviews, and information submitted voluntarily by the applicant.

"UIC" means underground injection control.

252:2-15-3. Common permitting procedures and timelines [AMENDED AND RENUMBERED TO 252:2-15-70]

(a) ~~Filing of applications. Unless otherwise provided in this Subchapter, upon the receipt of an application for filing and the proper fee, each Program shall:~~

(1) ~~file stamp the application with the date of receipt, the Service name and an identification number;~~

(2) ~~assign the application to a named person who will do the review; and~~

(3) ~~timely log this information.~~

(b) ~~Administrative completeness review. Unless otherwise provided in this Subchapter, the reviewer shall have 60 calendar days from the logged date of filing in which to initially determine if the application is administratively complete.~~

(1) ~~Not complete. Upon determining that the application is not~~

~~administratively complete, the reviewer shall immediately notify the applicant by mail, describing with reasonable specificity the inadequacies and measures necessary to complete the application. This notice shall not require or preclude further review of the application and further requests for specific information. If the reviewer does not notify the applicant of such inadequacies, the period for technical review shall begin at the close of the administrative completeness review period.~~

(2) ~~Complete. Upon a determination that the application is administratively complete, the reviewer shall log the date and immediately notify the applicant by mail. The period for technical review begins.~~

(c) ~~Technical review. Each Program involved shall have a certain time period to review each application for technical compliance with the relevant regulations and reach a final determination.~~

(d) ~~When times are tolled. The time period for review is tolled (the clock stops) during litigation, during periods of public review and participation (includes public meetings and administrative permit hearings (and waiting periods therefor); public comment periods, time required for DEQ preparation of responses to public comments received, and review by other federal or State agencies), or when the Program has asked for supplemental information and advised the applicant that the time period is tolled pending receipt, or during the time in which an applicant amends his application of his own accord.~~

(e) ~~Supplemental time. To compensate for time spent in reviewing inadequate materials, the DEQ's notice of deficiencies and request for supplemental information may specify that up to 30 additional calendar days may be added to the application processing time. This may also include the number of days the DEQ spent in preparing the notice and request. Requests for supplemental information and data may also specify that additional days for technical review equal to the number of days the applicant used to prepare and submit such supplement may be added to the application review time.~~

(f) ~~Withdrawal. Unless specified otherwise in a program's rules, failure by an applicant to supplement an application within 180 days after the request shall be deemed to be a withdrawal until the time is extended by agreement for good cause.~~

(g) ~~Extensions. Extensions to the timelines of this Subchapter may be made as provided by law.~~

252:2-15-4. Pending failures [AMENDED AND RENUMBERED TO 252:2-15-71]

(a) ~~Circumstances outside agency control. Technical review times shall be tolled for specified times when, prior to the deadline, the Executive Director certifies that a failure to meet a deadline is imminent and is caused by circumstances outside the control of the DEQ. Such circumstances include, but are not limited to, acts of God, a substantial and unexpected increase in the number of applications filed, and additional review duties imposed on the DEQ from an outside source.~~

(b) ~~Other circumstances. Where circumstances that are not clearly outside the control of the DEQ may cause a failure to meet a~~

deadline, then:

- (1) at least thirty (30) calendar days prior to the deadline the DEQ shall reassign staff and/or retain outside consultants to meet such deadline.
- (2) the Applicant may agree to an extension of time for a specific purpose and period of time with refund of the entire application fee, unless a refund is prohibited by law.

252:2-15-5. Air quality permit timelines [AMENDED AND RENUMBERED TO 252:2-15-72]

The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below:

- (1) Construction permits:
 - (A) PSD 540 days.
 - (B) Major Sources 365 days.
 - (C) Minor 180 days.
- (2) Operating permits for new construction or modifications 730 days.
- (3) Relocation permits 30 days.

252:2-15-6. Hazardous waste permit timelines [AMENDED AND RENUMBERED TO 252:2-15-73]

The following hazardous waste permits and authorizations shall be technically reviewed and issued or denied within the timeframes specified below:

- (1) Hazardous waste permits:
 - (A) New RCRA Operations permit or the renewal thereof 300 days.
 - (B) New State Recycling permit 300 days.
 - (C) New State Construction permit 300 days.
 - (D) Class 3 permit modifications 300 days.
 - (E) Underground Injection Control permit 300 days.
- (2) Class 1 and Class 2 permit modifications 300 days.
- (3) Closure plans, post closure plans and transfer station plans and plan modifications 300 days.

252:2-15-7. Solid waste permit timelines [AMENDED AND RENUMBERED TO 252:2-15-74]

Times for issuance or denial of applications for all solid waste permits shall be in accordance with applicable chapters of Solid Waste Regulations, OAC 252:500 et seq., or, if not specified therein, the technical review period for solid waste permit applications and for each submittal and resubmittal related thereto shall be 90 days, subject to OAC 252:2-15-3.

252:2-15-8. Water quality permit timelines [AMENDED AND RENUMBERED TO 252:2-15-75]

- (a) Applications for Water Quality permits, certifications and authorizations shall be technically reviewed and permits shall be issued or denied within the following timeframes:
 - (1) Dairy Waste 180 days
 - (2) Discharges 180 days

- (3) 401 Certifications 180 days
- (4) Industrial Wastewater other than discharge 180 days
- (5) Pretreatment Trust Users 180 days
- (6) Public Water Supply 90 days
- (7) Septage and Septic Tank Cleaners 120 days
- (8) Underground Injection Control (nonhazardous) 120 days
- (9) Water Pollution Control Construction 90 days
- (b) Preliminary and secondary applications associated with the State Revolving Fund shall be reviewed and, if acceptable, transmitted to the Oklahoma Water Resources Board for approval. If the DEQ can not concur in the preliminary or secondary loan applications, it will notify the applicant in writing. Transmittal of application to the Oklahoma Water Resources Board or a written notice of non approval shall occur within 90 days after receipt of the application.

252:2-15-9. Other permits [RENUMBERED TO 252:2-15-76]
Any environmental license or permit that is not described in this Subchapter shall not be subject to these time frames but shall be reviewed with all due and reasonable speed.

PART 3. TIER I, II AND III PROCESS REQUIREMENTS

252:2-15-26. Tier processes described
To implement the three tiered permitting processes of the Act, applications are classified in Part 5 as Tier I, II or III. The steps an applicant must follow for a Tier I, II or III application are shown in Appendix C of this Chapter.

252:2-15-27. Unclassified applications
The tier designation for any type of application not classified in this Subchapter shall be determined according to 27A O.S. Supp. 1995, § 201.

252:2-15-28. (RESERVED)

- 252:2-15-29. Published notices
 - (a) Notice content. In addition to content requirements of the Act, all published legal notice(s) shall contain the:
 - (1) Name and address of the applicant;
 - (2) Name, address and legal description of the site, facility and/or activity;
 - (3) Purpose of notice;
 - (4) Type of permit or permit action being sought;
 - (5) Description of activities to be regulated;
 - (6) Locations where the application may be reviewed;
 - (7) Names, addresses and telephone numbers of contact persons for the DEQ and for the applicant;
 - (8) Description of public participation opportunities and time period for comment and requests;
 - (9) Any other information required by DEQ rules; and
 - (10) Any information the applicant deems relevant.
 - (b) Proof of publication. An applicant, within twenty (20) days

after the date of publication, shall provide the DEO with a written affidavit of publication for each notice published. In case of a mistake in a published notice, the DEO may approve the publication of a legal notice of correction or may require that the entire legal notice be republished.

Agency Note (2): 27A O.S. Sections 2-14-301, 302 and 304 add requirements for Tier II and Tier III notices.

252:2-15-30. Tier I process requirements

(a) Pre-application conference. Prior to filing an application, an applicant may request a conference with the DEO.

(b) Application filing.

(1) Copies. Two (2) copies of a Tier I application shall be filed with the DEO except when the application form or instructions specifies that only one (1) copy is needed. Applicants for residential systems (OAC 252:640) and small public sewage systems (OAC 252:655-29) permits shall file their two copies with the local DEO office for the county in which the real property is located.

(2) Fees. Fees established in DEO program rules shall be payable at the time of application and are not refundable.

(3) Notice to landowner. Applicants must demonstrate to the DEO that they are not seeking a permit for land or for any operation upon land owned by others without their knowledge. Applicants shall certify by affidavit filed with the DEO that: they own the real property; or they have a current lease or easement which is given to accomplish the permitted purpose; or if they do not own the real property, they have provided legal notice to those who do. The DEO may rely on the affidavit, and the applicants shall bear the burden of meeting any challenges. Legal notice is governed by Oklahoma law which, for example, authorizes: service by sheriff or private process server; service by certified mail, restricted delivery; or service by publication, if the person cannot be located through due diligence. Notice to the person who signed a lease or to the administrator or executor of a trust or an estate may be sufficient.

(4) Withdrawal. An applicant may withdraw an application at any time with written notice to the DEO and forfeiture of fees.

(c) Application review. Unless stated otherwise in new laws or rules, applications are subject to the laws and rules of the DEO as they exist on the date of filing and afterward as changed, up to the date of issuance or denial. See Part 7 for review procedures and time lines.

(d) Issuance or denial.

(1) Compliance required. A new, modified or renewed permit or other authorization shall not be issued until the DEO has determined the application is in substantial compliance with applicable requirements of the Code and rules of the Board.

(2) Conditions for issuance. The Department may not issue a new, modified or renewed permit or other authorization if:

(A) The applicant has not paid all monies owed to the DEO or

is not in substantial compliance with the Code, rules of the Board and the terms of any existing DEO permits and orders. The DEO may impose special conditions on the applicant to assure compliance and/or a separate schedule which the DEO considers necessary to achieve required compliance; or
(B) Material facts were misrepresented or omitted from the application and the applicant knew or should have known of such misrepresentation or omission.

(3) Issuance. See 252:2-15-28.

252:2-15-31. Tier II process requirements

(a) Pre-application conference. "Tier I" requirements apply See 252:2-15-30.

(b) Application. "Tier I" requirements apply. See 252:2-15-30, except the applicant shall file three (3) copies of the application with the DEO and place one (1) copy for public review in the county in which the site, facility or activity is located.

(c) Published notice of filing. See 27A O.S. § 2-14-301 and 252:2-15-29.

(d) Application review. "Tier I" requirements apply. See 252:2-15-30.

(e) Draft permit or draft denial. See 27A O.S. § 2-14-302.

(f) Notice of draft permit/denial. See 27A O.S. § 2-14-302 and 252:2-15-29. For permit modification actions, only those issues relevant to the modification(s) shall be reopened for public review and comment.

(1) Exception to notice requirement. Applicants for solid waste transfer station permits shall be exempt from public comment and public meeting requirements if the board of county commissioners of the county of the proposed site, after opportunity for written or oral public comment, has found the application to be within the scope of the county's solid waste management plan. See 27A O.S. Supp. 1995, §2-10-307.

(2) Additional notice. In addition to Section 302 notice:

(A) Applicants for a NPDES, RCRA or UIC permit are subject to applicable additional notice provisions of federal requirements promulgated as rules of the Board.

(B) Applicants for a proposed wastewater discharge & emissions permit which may affect the water quality or air quality of a neighboring state must give written notice to the environmental regulatory agency of that state.

(C) Applicants for a solid waste landfill permit shall provide notice by certified mail, return receipt requested, to owners of mineral interests and to adjacent landowners whose property may be substantially affected by installation of a landfill site. See *DuLaney v. OSDH*, Okl., 868 P.2d 676 (1993).

(g) Public comment and formal public meeting. See 27A O.S. § 2-14-302 and 27A O.S. § 2-14-303. The DEO shall determine the location of any formal public meeting to be held and the designated presiding officer shall establish its procedures.

(h) Response to comments. See 27A O.S. § 2-14-304.

(i) Issuance or denial. "Tier I" requirements apply. See 252:2-15-

20.

Agency Note (3): Additional federal notice requirements may include radio announcements and letters to certain entities. See 40 CFR Part 124. For modifications of RCRA permits, also see Part 270, Subpart D.

252:2-15-32. Tier III process requirements

(a) Pre-application conference. "Tier I" requirements apply. See 252:2-15-30.

(b) Filing, fees and withdrawal. "Tier II" requirements apply. See 252:2-15-31.

(c) Notice of filing and process meeting opportunity. The applicant shall include a 30-day opportunity to request a process meeting in the published notice of filing. See 27A O.S. § 2-14-301(B) and 252:2-15-29.

(d) Process meeting. See 27A O.S. § 2-14-301(B). The location of and procedures for the process meeting shall be determined by the DEQ.

(e) Application review. "Tier I" requirements apply. See 252:2-15-30.

(f) Draft permit or draft denial. See 27A O.S. § 2-14-302.

(g) Notice of draft permit/denial. "Tier II" requirements apply. See 252:2-15-31.

(h) Public comment period and public meeting. "Tier II" requirements apply. See 252:2-15-31.

(i) Proposed permit and notice. After the DEQ reviews public comments and prepares a proposed permit by amending the draft permit in response to comments as necessary, the applicant shall publish notice of the proposed permit and of the opportunity to request an administrative permit hearing. See 27A O.S. § 2-14-304 and 252:2-15-29.

(j) Administrative permit hearing. See 27A O.S. § 2-14-304 and, for procedures, Subchapter 13 of this Chapter, except references to "draft permit" in Subchapter 13 shall mean "proposed permit" as used in 27A O.S. § 2-14-103 and 27A O.S. § 2-14-304 (C) and (D).

(k) Response to comments. See 27A O.S. § 2-14-304.

(l) Issuance or denial. "Tier I" requirements apply. See 252:2-15-30.

PART 5. TIER CLASSIFICATIONS (RESERVED)

PART 7. REVIEW PROCEDURES AND PERMITTING TIME LINES

252:2-15-70. Common review procedures and time lines

(a) Receipt of applications. Unless otherwise provided in this Subchapter, upon the receipt of an application for filing and the proper fee, each Program shall:

- (1) File-stamp the application with the date of receipt, the Division and/or Program name and an identification number;
- (2) Assign the application to a named person who will do the review; and
- (3) Timely log this information.

(b) Administrative completeness review. Unless otherwise provided in the Code or this Subchapter, the reviewer shall have 60 calendar days from the logged date of filing in which to determine whether the application is administratively complete.

(1) Not complete.

(A) Upon determining that the application is not complete, the reviewer shall immediately notify the applicant by mail, describing with reasonable specificity the inadequacies and measures necessary to complete the application.

(B) This notice shall not require or preclude further review of the application and further requests for specific information.

(C) If the reviewer does not notify the applicant of inadequacies, the period for technical review shall begin at the close of the administrative completeness review period.

(2) Complete. When the application is administratively complete, the reviewer shall log the date and immediately notify the applicant by mail. The period for technical review begins.

(c) Technical review. Each Program involved shall have a certain time period to review each application for technical compliance with the relevant regulations and reach a final determination.

(d) When times are tolled. The time period for review is tolled (the clock stops) during litigation, during periods of public review and participation (includes public meetings and administrative permit hearings (and waiting periods), public comment periods, time required for DEQ preparation of responses to public comments received, and review by other federal or State agencies), or when the Program has asked for supplemental information and advised the applicant that the time period is tolled pending receipt, or during the time in which an applicant amends his application of his own accord.

(e) Supplemental time. To compensate for time spent in reviewing inadequate materials, the DEQ's notice of deficiencies and request for supplemental information may specify that up to 30 additional calendar days may be added to the application processing time. Requests for supplemental information and data may also specify that additional days for technical review equal to the number of days the applicant used to prepare and submit such supplement may be added to the application review time.

(f) Failure to respond. Except for good cause shown, failure of an applicant to supplement an application within 180 days after the mailing date of a notice of deficiencies, or by a date agreed to by the DEQ and the applicant, shall void the application and forfeit the fees. The DEQ shall notify the applicant of an opportunity to show cause why this should not occur. Failure to show cause shall result in an order appealable according to 75 O.S. § 318.

(g) Extensions. Extensions to the time lines of this Subchapter may be made as provided by law.

252:2-15-71. Pending failures

(a) Circumstances outside agency control. Technical review times shall be tolled for specified times when, prior to the deadline, the Executive Director certifies that a failure to meet a deadline

is imminent and is caused by circumstances outside the control of the DEQ. Such circumstances include, but are not limited to, acts of God, a substantial and unexpected increase in the number of applications filed, and additional review duties imposed on the DEQ from an outside source.

(b) Other circumstances. Where circumstances that are not clearly outside the control of the DEQ may cause a failure to meet a deadline, then:

(1) At least thirty (30) calendar days prior to the deadline the DEQ shall reassign staff and/or retain outside consultants to meet such deadline.

(2) The applicant may agree to an extension of time for a specific purpose and period of time with refund of the entire application fee, unless a refund is prohibited by law.

252:2-15-72. Air quality permit time lines

The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

(1) Construction permits:

(A) PSD (Part 70 sources) - 540 days.

(B) Major Sources (Part 70 sources other than PSD) - 365 days.

(C) Minor Sources - 180 days.

(2) Operating permits:

(A) Major Sources - 540 days.

(B) Minor Sources - 365 days.

(3) Relocation permits - 30 days.

252:2-15-73. Hazardous waste permit time lines

The following hazardous waste permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

(1) Hazardous waste permits:

(A) New RCRA permit or the renewal thereof - 300 days.

(B) New State Recycling permit - 300 days.

(C) Class 3 permit modifications - 300 days.

(2) Closure plans, post-closure plans and transfer station plans and plan modifications - 300 days.

252:2-15-74. Solid waste permit time lines

The technical review period for solid waste permit applications and for each submittal and resubmittal shall be 90 days, subject to OAC 252:2-15-7-70.

252:2-15-75. Water quality permit time lines

Applications for new or modified water quality permits, certifications and authorizations shall be technically reviewed and permits shall be issued or denied within the following time frames:

(1) Discharges - 180 days.

(2) 401 Certifications - 180 days.

(3) Industrial Wastewater other than discharge - 180 days.

(4) Pretreatment Trust Users - 180 days.

(5) Public Water Supply - 90 days.

(6) Underground Injection Control - 300 days.

(7) Water Pollution Control Construction - 90 days.

(8) Sludge management plan - 180 days.

252:2-15-76. Other permits

Any environmental license or permit that is not described in this Subchapter shall not be subject to these time frames but shall be reviewed with all due and reasonable speed.

252:2-15-77. Pre-issuance permit review and correction

(a) Review. In addition to its own review, the DEQ may, for Tier I and II, and shall, for Tier III, at any time before issuance, require an applicant to review a permit for calculation and clerical errors, or mistakes of fact or law.

(b) Correction. The DEQ may correct any permit before it is issued.

(1) Notice of significant corrections. For permits based on Tier II and III applications, an applicant shall publish legal notice in one newspaper local to the site of any correction or change proposed by the DEQ which significantly alters a facility's permitted size, capacity or limits.

(2) Comments. The DEQ may open a public comment period, and/or reconvene a public meeting and/or administrative hearing to receive public comments on the proposed correction(s).

Agency Note (4): For statutory provisions related to administrative review of permit conditions or actions after issuance, see 27A O.S. Supp. 1995, § 2-14-304(H), "Denial of permit"; 75 O.S. § 317, "Rehearing, reopening or reconsideration of final order"; and 75 O.S. § 307, "Declaratory rulings".

PART 9. CONSOLIDATED PERMITTING

252:2-15-90. Consolidation of permitting process

(a) Discretionary. Whenever an applicant applies for more than one permit for the same site, the DEQ may authorize, with the consent of the applicant, the review of the applications to be consolidated so that each required draft permit, draft denial and/or proposed permit is prepared at the same time and public participation opportunities are combined.

(b) Scope. When consolidation is authorized by the DEQ:

(1) The procedural requirements for the highest specified tier shall apply to each affected application.

(2) The DEQ may also authorize the consolidation of public comment periods, process and public meetings, and/or administrative permit hearings.

(3) Final permits may be issued together.

(c) Renewal. The DEQ may coordinate the expiration dates of new permits issued to an applicant for the same facility or activity so that all the permits are of the same duration.

(d) Multiple modifications. Subsections (a) and (b) of this section shall also apply to multiple Tier II and III applications.

for permit modifications.

APPENDIX C. PERMITTING PROCESS SUMMARY [NEW]

Steps	Tier I	Tier II	Tier III
Filing - Applicant files application, pays any required fee, and provides landowner notice. Applicant may meet with the DEQ staff prior to this.	Yes	Yes	Yes
Notice of filing - Applicant publishes notice in one newspaper local to site.	No	Yes	Yes
Process meeting - Notice - 30-day opportunity is published with notice of filing. DEQ holds meeting if requested and sufficient interest is shown.	No	No	Yes
Administrative completeness review - DEQ reviews application and asks applicant to supply any missing information.	Yes	Yes	Yes
Technical review - DEQ reviews application for technical compliance and requests applicant to cure any deficiencies.	Yes	Yes	Yes
Draft permit or draft denial - DEQ prepares this after completing review.	No	Yes	Yes
Notice of draft permit, public comment period and public meeting request opportunity - Applicant publishes this in one newspaper local to site. (DEQ publishes notice of draft denial.)	No	Yes	Yes
Public comment period - 45 days for hazardous waste treatment, storage or disposal draft permits; 30 days for all others.	No	Yes	Yes
Public meeting - Conducted by DEQ if held	No	Yes	Yes
Review of comments - DEQ (written response)	No	Yes	Yes
Proposed permit - DEQ prepares this in response to comments on draft permit	No	No	Y
Notice of proposed permit - Applicant publishes, in one newspaper local to site, notice of 20-day opportunity to review permit and request administrative hearing.	No	No	Yes
Administrative permit hearing - Conducted by DEQ if held. Results in final order.	No	No	Yes
Issuance or denial - DEQ's final decision	Yes	Yes	Yes

[Okla. Reg. 96-446; filed April 25, 1996]

Uniform Permitti...

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY

RULEMAKING ACTION: PERMANENT FINAL ADOPTION
RULES: 252:2-15-40 through 15-63. [NEW].
AUTHORITY: Environmental Quality Board, 27A O.S.Supp. 1993,
Section 2-2-101; 27A O.S.Supp. 1995, Section 2-14-201.
DATES:

Comment period: August 1 through November 28, 1995.
Public hearings: August 29 and 31; September 5 & 7; October
3, 10, 17, 19 and 27; November 7, 9, 13 and 28. Specifically:
August 29 Solid Waste Management Advisory Council,
August 31 Hazardous Waste Management Advisory Council,
Sept. 7 Radiation Management Advisory Council,
Oct. 3 Water Quality Advisory Council,
Oct. 10 Laboratory Services Advisory Council,
Oct. 17 Air Quality Council,
Oct. 19 Solid Waste Management Advisory Council,
Oct. 27 Operator Certification Advisory Council,
Nov. 7 Water Quality Advisory Council,
Nov. 9 Hazardous Waste Management Advisory Council,
Nov. 13 Air Quality Council (continued from 10/17),
and

Nov 28 Environmental Quality Board.
Adoption: November 28, 1995
Submitted to Governor: December 1, 1995.
Submitted to House: December 1, 1995.
Submitted to Senate: December 1, 1995.
Gubernatorial approval: December 11, 1995.
Legislative approval: Failure of the Legislature to
disapprove the rules resulted in approval on March 27, 1996.
Final adoption: March 27, 1996.
Effective: July 1, 1996.

SUPERSEDED EMERGENCY ACTIONS: None.
INCORPORATION BY REFERENCE: None.
ANALYSIS: These proposed rules, with an effective date of July 1,
1996, implement in part the Oklahoma Uniform Environmental
Permitting Act, 27A O.S.Supp. 1994, § 2-14-101 et seq., as last
amended by S.B. 247 (1995). For each individual permitting program
of the Department of Environmental Quality (DEQ), these proposed
rules classify applications for specific types of permits, DEQ
certifications, licenses, registrations and other kinds of DEQ
authorization actions as Tier I, II or III.
CONTACT PERSON: Kay York, Attorney, Department of Environmental
Quality, 1000 N.E. 10th, Oklahoma City, OK 73117-1212. Phone (405)
271-8140.

PURSUANT TO THE ACTIONS DESCRIBED HEREIN, THE FOLLOWING RULE IS
CONSIDERED FINALLY ADOPTED AS SET FORTH IN 75 O.S. 1991, SECTION
308.1(A), WITH AN EFFECTIVE DATE OF JULY 1, 1996.

SUBCHAPTER 15. ENVIRONMENTAL PERMIT PROCESSING TIMES UNIFORM
PERMITTING PROCEDURES

PART 1. (RESERVED)

PART 3. (RESERVED)

PART 5. TIER CLASSIFICATIONS

252:2-15-40. Air quality applications - Tier I
The following air quality authorizations require Tier I
applications:

- (1) Construction permit for a minor source.
- (2) Operating permit for a minor source.
- (3) Operating permit for a major facility, issued after
construction permit, which does not differ from the construction
permit in any manner which would otherwise subject the operating
permit application to public review.
- (4) New, modified or renewed authorization under a general
permit.
- (5) Modification of a minor source's construction and/or
operating permit when the source remains a minor source after
the modification.
- (6) Minor modification of a major facility's construction
and/or operating permit.
- (7) Acid rain permits.
- (8) Burn approval.
- (9) Relocation permit.
- (10) Temporary permit.
- (11) Plant-wide emission plan approval.
- (12) Administrative amendment of all permits and other author-
izations.
- (13) Extension of a minor source's construction permit.
- (14) Extension of a major facility's construction permit with no
or minor modification.
- (15) Renewal of an operating permit for a minor source.

252:2-15-41. Air quality applications - Tier II
The following air quality authorizations require Tier II
applications:

- (1) Operating permit for a major facility, issued after a c
struction permit, which differs from the construction permit in
a manner which subjects the operating permit application to
public review.
- (2) Operating permit for a major facility that does not have a
construction permit.
- (3) Significant modification, as defined in OAC 252:100-8-
7(e)(2), of a major facility's construction or operating permit.
- (4) New, modified or renewed general permit.
- (5) Time extension of a major facility's construction permit
with a modification that would otherwise be subject to public
review.
- (6) Renewal of an operating permit for a major facility.
- (7) A construction permit for a new major facility or a major
modification to an existing major facility.

252:2-15-42. Air quality applications - Tier III

(a) New major stationary sources. A construction permit for any new major stationary source listed in this subsection requires a Tier III application. For purposes of this section, "Major stationary source" means:

(1) Any of the following sources of air pollutants which emits, or has the potential to emit, 100 tons per year or more of any pollutant subject to regulation:

- (A) carbon black plants (furnace process).
- (B) charcoal production plants.
- (C) chemical process plants.
- (D) coal cleaning plants (with thermal dryers).
- (E) coke oven batteries.
- (F) fossil-fuel boilers (or combustion thereof), totaling more than 250 million BTU per hour heat input.
- (G) fossil fuel-fired steam electric plants of more than 250 million BTU per hour heat input.
- (H) fuel conversion plants.
- (I) glass fiber processing plants.
- (J) hydrofluoric, sulfuric or nitric acid plants.
- (K) iron and steel mill plants.
- (L) kraft pulp mills.
- (M) lime plants.
- (N) incinerators, except where used exclusively as air pollution control devices.
- (O) petroleum refineries.
- (P) petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels.
- (Q) phosphate rock processing plant.
- (R) portland cement plants.
- (S) primary aluminum ore reduction plants.
- (T) primary copper smelters.
- (U) primary lead smelters.
- (V) primary zinc smelters.
- (W) secondary metal production plants.
- (X) sintering plants.
- (Y) sulfur recovery plants, or
- (Z) taconite ore processing plants, and

(2) Any other source not specified in paragraph (1) of this definition which emits, or has the potential to emit, 250 tons per year or more of any pollutant subject to regulation.

(b) Existing incinerators. An application for any change in emissions or potential to emit, or any change in any permit condition, that would have caused an incinerator to be defined as a major stationary source when originally permitted shall require a Tier III application.

(c) Potential to emit. For purposes of this section, "potential to emit" means emissions resulting from the application of all enforceable permit limitations as defined in OAC 252:100-1-3.

252:2-15-43. Hazardous waste management applications - Tier I

The following hazardous waste management authorizations require Tier I applications.

(1) Class 1 modification of any hazardous waste permit requiring prior Department approval as specified in 40 C.F.R. §

270.42.

- (2) Modification to a recycling permit in accordance with 27A O.S. Supp. 1994, §2-7-118(A).
- (3) Class 2 permit modification as defined in 40 C.F.R. §270.42.
- (4) Emergency hazardous waste disposal plan approval.
- (5) Hazardous waste generator disposal plan approval.
- (6) Technical plan approval.
- (7) Hazardous waste transporter license.
- (8) Hazardous waste transfer station plan modification which is not related to capacity.
- (9) Emergency permit issued in accordance with 40 C.F.R. § 270.61.
- (10) Interim status closure plan approval in accordance with 40 C.F.R. §265.113(d)(4).
- (11) Minor administrative modification of all permits and other authorizations.
- (12) Renewal of disposal plan approval and transporter license.
- (13) New, modified or renewed authorization under a general permit.
- (14) Approval of temporary authorizations in accordance with 40 C.F.R. § 270.42.

252:2-15-44. Hazardous waste management applications - Tier II
The following hazardous waste management authorizations require Tier II applications.

- (1) On-site hazardous waste treatment, storage or disposal permit.
- (2) Mobile recycling permit.
- (3) Research & Development permit.
- (4) Class 3 modification of any hazardous waste permit as specified in 40 C.F.R. § 270.42.
- (5) Modification of an on-site hazardous waste facility permit for a fifty percent (50%) or greater increase in permitted capacity for storage, treatment, and/or disposal, including incineration.
- (6) Modification of an on-site hazardous waste facility permit for an expansion of permitted boundaries.
- (7) Modification of on-site hazardous waste facility permit in which the application is for new treatment, storage, or disposal methods or units which are significantly different from those permitted.
- (8) Renewal of a hazardous waste treatment, storage or disposal permit.
- (9) Hazardous waste transfer station plan approval.
- (10) Hazardous waste transfer station plan modification involving increase in approved capacity.
- (11) Variance which is not part of a permit application.
- (12) Variance which is part of a Tier II permit application.

252:2-15-45. Hazardous waste management applications - Tier III
The following hazardous waste management authorizations require Tier III applications.

- (1) Off-site hazardous waste treatment, storage, disposal, incineration and/or recycling permit.

(2) Modification of an off-site hazardous waste facility permit for a fifty percent (50%) or greater increase in permitted capacity for storage, treatment, and/or disposal, including incineration.

(3) Modification of an off-site hazardous waste facility permit for an expansion of permitted boundaries.

(4) Modification of off-site hazardous waste facility permit in which the application is for new treatment, storage, or disposal methods or units which are significantly different from those permitted.

(5) Variance which is part of a Tier III application.

252:2-15-46. Laboratory certification applications - Tier I

A Tier I application shall be required for a new, modified, amended or renewed laboratory certification.

252:2-15-47. Laboratory certification applications - Tier II

None.

252:2-15-48. Laboratory certification applications - Tier III

None.

252:2-15-49. Operator certification applications - Tier I

The following authorizations require Tier I applications.

(1) Waterworks operator certification (standard and temporary).

(2) Wastewater works operator certification (standard and temporary).

(3) Waterworks laboratory operator certification.

(4) Wastewater works laboratory operator certification.

(5) Septic tank installer certification.

(6) Septic tank cleaner license.

(7) Landfill operator and/or manager certification.

(8) Waterworks helper registration.

(9) Wastewater works helper registration.

(10) Amendments, modifications and renewals of all authorizations.

252:2-15-50. Operator certification applications - Tier II

None.

252:2-15-51. Operator certification applications - Tier III

None.

252:2-15-52. Radiation management applications - Tier I

The following radiation management authorizations require Tier I applications.

(1) Industrial X-ray registration and the amendment, modification and/or renewal thereof.

(2) X-ray fluorescence spectroscopy instrument license and the amendment, modification and/or renewal thereof.

252:2-15-53. Radiation management applications - Tier II

None.

252:2-15-54. Radiation management applications - Tier III

None.

252:2-15-55. Solid waste management applications - Tier I

The following solid waste management authorizations require Tier I applications.

(1) New permits.

(A) Locally approved solid waste transfer stations.

Permit for a solid waste transfer station that, prior to application filing, received county commissioner approval according to 27A O.S. Supp., 1995, § 2-10-307.

(B) Biomedical waste transfer stations using only sealed containers. Biomedical waste transfer station permit when activities are limited to:

(i) consolidation of sealed containers; and/or
(ii) transfer of sealed containers from one vehicle or mode of transportation to another.

(C) Disaster relief. Emergency authorization for waste disposal resulting from a natural disaster.

(2) Modifications.

(A) All facilities.

(i) Modification of a solid waste permit to add methods, units or appurtenances for liquid bulking processes; yard waste composting; recycling operations; waste screening; or baling, chipping, shredding or grinding equipment or operations.

(ii) Modification to any solid waste permit to make minor changes.

(iii) Modification of plans for closure and/or post-closure.

(iv) Administrative modification of all permits and other authorizations.

(B) On-site and off-site land disposal facilities.

Modification of an existing land disposal permit for a lateral expansion within permitted boundaries.

(C) Capacity increases of less than 25% with exceptions. The modification of a solid waste permit, excluding incineration permits, involving a request for less than twenty-five percent (25%) increase in permitted capacity for storage, processing or disposal when the request is for equivalent methods, units or appurtenances as those permitted and which does not involve expansions of permit boundaries.

(3) Plans and other authorizations. The approval of new and when applicable, modified or renewed:

(A) Plans for composting of yard waste only.

(B) Permit transfers.

(C) Non-hazardous industrial solid waste disposal plans.

(D) Technical plans.

(E) County solid waste management plans.

(F) Individual authorizations under a general permit.

(G) All other administrative approvals required by OAC 252:510 or OAC 252:520.

252:2-15-56. Solid waste management applications - Tier II

The following solid waste management authorizations require Tier

II applications.

(1) New permits.

(A) On-site solid waste processing facilities with exception. Permit for an on-site solid waste processing facility except yard waste composting as listed under Tier I, Rule 252:2-15-55.

(B) Solid waste transfer stations with exceptions. Permit for a solid waste transfer station except:

(i) a transfer station permit with county commissioner approval as listed under Tier I, Rule 252:2-15-55, or

(ii) a biomedical waste transfer station permit listed under Tier I, Rule 252:2-15-55.

(C) On-site incinerators with exceptions. Permit for an on-site incinerator except those exempt under OAC 252:2-20 or those that have an approved Air Quality permit or Solid Waste Management Plan.

(D) On-site land disposal sites. Permit for an on-site solid waste disposal site.

(E) Material Recovery Facility (MRF). Permit for a Material Recovery Facility if waste is not source-separated.

(2) Modifications.

(A) All facilities. Modification of a permit for a change in waste type.

(B) On-site facilities. Any modification of an on-site solid waste permit, except as listed under Tier I, Rule 252:2-15-55.

(C) Off-site facilities.

(i) Modification of any off-site solid waste permit involving a request for more than twenty-five percent (25%) but less than fifty percent (50%) increase in permitted capacity for storage, processing or disposal (excluding incineration) when the request is for equivalent methods, units or appurtenances as those permitted, except those listed under Tier I, Rule 252:2-15-55.

(ii) Modification of any off-site processing facility involving an expansion of permitted boundaries.

(D) Incinerators.

(i) Modification of an on-site incinerator permit for any increase in permitted capacity for storage, processing, or disposal.

(ii) Modification of an off-site incinerator permit involving a request for increases less than fifty percent (50%) in permitted capacity for storage, processing, or disposal when the request is for equivalent methods, units or appurtenances as those permitted.

(3) General permit. New, modified or renewed general permit.252:2-15-57. Solid waste management applications - Tier III

The following solid waste management authorizations require Tier

III applications.

(1) New permits.(A) Off-site processing facilities with exceptions.

Permit for an off-site processing facility, unless otherwise specified in Tier I, Rule 252:2-15-55, or Tier II, Rule 252:2-15-56.

(B) Off-site land disposal facility. Permit for an off-site solid waste land disposal site.

(C) Off-site incinerator. Permit for an off-site incinerator.

(2) Modifications.

(A) Off-site facilities: significant increase in capacity. Modification of any off-site solid waste permit involving a fifty percent (50%) or greater increase in permitted capacity for storage, processing, and/or disposal, including incineration.

(B) Off-site land disposal facility. Modification of an off-site solid waste land disposal permit for an expansion of permitted boundaries.

(C) Off-site facilities: different methods, units or appurtenances. Modification of an off-site solid waste permit in which the request involves different methods, units or appurtenances than those permitted, except those listed under Tier I, Rule 252:2-15-55.

(3) Variance approvals. All variances.252:2-15-58. UIC applications-Tier I

The following underground injection control authorizations require Tier I applications.

(1) Minor modification of a permit for Class I, III, and V wells in accordance with 40 C.F.R. §144.41.

(2) Modification of an approved closure and/or post-closure plan for a Class I hazardous waste injection well.

(3) Modification of an approved plugging and abandonment plan for Class I nonhazardous and Class III injection wells.

(4) Modification of an approved corrective action plan for a Class I injection well.

(5) Emergency permit in accordance with 40 C.F.R. §144.34.

(6) New, modified or renewed authorization under a general permit.

(7) Minor administrative modification of all permits and other authorizations.

252:2-15-59. UIC applications - Tier II

The following underground injection control authorizations require Tier II applications.

(1) On-site Class I nonhazardous waste injection well permit.

(2) Class III and V injection well permits except Class V permits issued under Tier III.

(3) Modification and/or renewal of all DEQ-issued underground injection control well permits.

252:2-15-60. UIC applications - Tier III

The following underground injection control authorizations require Tier III applications.

(1) Class I hazardous waste injection well permit.

(2) Off-site Class I nonhazardous waste injection well permit.

(3) Class V industrial waste injection well permit.

252:2-15-61. Water quality applications - Tier I

The following water quality authorizations require Tier I applications.

- (1) Permit for flow-through impoundment(s) as part of the pretreatment process.
- (2) Re-permitting of facility with an expiring permit for industrial non-discharging impoundment or septic tank system.
- (3) Re-permitting of expiring permit with minor or no change(s) for land application of sludge and/or wastewater for same site.
- (4) New, modified or renewed authorization under a general permit, including but not limited to general permits for stormwater, underground storage tanks and petroleum storage and treatment facilities.
- (5) Approval of new pretreatment program.
- (6) Closure plan approval.
- (7) Dredge and fill certification.
- (8) Approval of exemption for water line extensions.
- (9) Approval of exemption for water distribution and wastewater collection systems.
- (10) Approval for individual residential sewage disposal system.
- (11) Approval of small public sewage system:
 - (A) with less than 5,000 gallons per day which do not discharge, land apply wastewater or sludge, or have lift stations designed to handle a peak capacity greater than 10 gallons per minute; or
 - (B) which serves less than ten (10) residential units.
- (12) Residential development approval.
- (13) Transfer of discharge permit.
- (14) Minor modification of discharge permit.
- (15) Minor modification of permit for land application of sludge and/or wastewater.
- (16) Modification of or addition to a municipal wastewater treatment system (including sewer line extensions).
- (17) Modification of or addition to a public water supply treatment and/or distribution system.
- (18) Modification of non-discharging impoundment and/or septic tank system permit.
- (19) Modification of an approved pretreatment program.
- (20) Administrative amendment of permits or other authorizations for the correction of administrative or typographical errors.

252:2-15-62. Water quality applications - Tier II

The following water quality authorizations require Tier II applications.

- (1) Permit for municipal wastewater treatment system.
- (2) Permit for public water supply system.
- (3) Discharge permit for minor facility.
- (4) Individual storm water permit.
- (5) Permit for industrial non-discharging impoundment or septic tank system.
- (6) Permit for land application of sludge and/or wastewater at new site.
- (7) Re-permitting of a facility with expiring discharge permit.

(8) Re-permitting of facility with expiring individual storm water discharge permit.

- (9) Re-permitting with major change(s) from expiring permit for land application of sludge and/or wastewater for the same site.
- (10) Variance including thermal components of effluent limitations for an individual discharge permit.
- (11) Major modification of discharge permit.
- (12) Major modification of permit for land application of sludge and/or wastewater.

252:2-15-63. Water quality applications - Tier III

A new discharge permit for a major facility requires a Tier III application.

[Okla. Reg. 96-534; filed April 25, 1996]

**TITLE 210. STATE DEPARTMENT OF EDUCATION
CHAPTER 35. STANDARDS FOR ACCREDITATION OF
ELEMENTARY, MIDDLE, SECONDARY AND AREA
VOCATIONAL AND TECHNICAL LEVEL SCHOOLS**

INTENDED RULEMAKING ACTION: Notice of proposed PERMANENT rulemaking Proposed rules: Subchapter 15. Expanded Opportunities in Summer Programs, 210:35-15-1 and 210:35-15-2 [NEW]; Subchapter 17. Co-Curricular and Extra Curricular Programs, 210:35-17-1 and 210:35-17-2 [NEW]; Subchapter 19. Concurrent Enrollment, 210:35-19-1 through 35-19-3 [NEW]; Subchapter 21. Alternative Instructional Delivery Systems, 210:35-21-1 and 210:35-21-2 [NEW]; Subchapter 25. Student Entrance and Progression Through the System, 210:35-25-1 and 210:35-25-2 [NEW]; and Subchapter 27. Proficiency Based Promotion, 210:35-27-1 through 35-27-3 [NEW]

Summary: Rules set forth requirements and procedures pertinent to the content areas specified in the various subchapter titles.

Proposed action: New subchapters are setting forth requirements and procedures pertinent to the content areas specified.

Need: 70 O.S. § 3-104 and 3-104.4 require the State Board of Education to promulgate rules for the accreditation of schools, and then further mandate that changes will be made in these rules to facilitate the implementation of the new state curriculum to take effect during the 1993-94 school year.

Effect: The intended effect is to reinstate and improve upon the effectiveness of previously existent rules which were originally published in the Appendices of the Accreditation Standards.

AUTHORITY: State Board of Education

70 O.S. § 3-104--Expanded Opportunities in Summer Programs, Co-Curricular and Extra Curricular Programs and Alternative Instructional Delivery Systems

70 O.S. § 628.13--Concurrent Enrollment

70 O.S. §§ 1-114 and 24-114.1--Student Entrance and Progression Through the System

70 O.S. § 11-103.6--Proficiency Based Promotion

COMMENT PERIOD: All interested persons are invited to submit data, views or arguments, orally or in writing, in support of or in opposition, to the new subchapters to the Office of the State Board of Education, Rm. 1-18 Oliver Hodge Memorial Building, 2500 N. Lincoln Blvd., Oklahoma City, Oklahoma 73105-4599 between the hours of 8 a.m. and 4:30 p.m., November 16 through December 15, 1993.

PUBLIC HEARING: Hearings begin at 2 p.m., Thursday, December 16, 1993, in Rm. 1-20 of the Oliver Hodge Memorial Building, 2500 N. Lincoln Blvd., Oklahoma City, Oklahoma.

COPIES OF PROPOSED RULES: Copies are on file for public viewing in the office of the State Board of Education, Rm. 1-18 Oliver Hodge Memorial Building, 2500 N. Lincoln Blvd., Oklahoma City, Oklahoma 73105-4599.

RULE IMPACT STATEMENT: A Rule Impact Statement for the new subchapters will be prepared, as required by law, and will be available after November 19, 1993, at the Office of the State Board of Education, Rm. 1-18 Oliver Hodge Education Building, 2500 N. Lincoln Blvd., Oklahoma City, Oklahoma.

CONTACT PERSON: Garrelne A. Jurko, State Board of Education Office, Rm. 1-18 Oliver Hodge Education Building, 2500 N. Lincoln Blvd., Oklahoma City, Oklahoma, 405/521-3308

[Okla. Reg. 93-1609; filed October 22, 1993]

✓ **TITLE 252: DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 002. PROCEDURES OF THE DEPARTMENT
OF ENVIRONMENTAL QUALITY**

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT/EMERGENCY Rulemaking.

Proposed Rules: OAC 252:002, Procedures of the Department of Environmental Quality [NEW]

Summary: The Oklahoma Environmental Quality Act directs the Board to promulgate replacement rules for programs transferred to the new Department of Environmental Quality ("DEQ"). (See Laws 1993, c. 324, Section 8.)

These proposed rules are intended to set forth procedures for the DEQ by renumbering, recodifying, and converting references from the OSDH (currently codified at 310:002) and implementing 27A:2-1-101 et seq. to the DEQ. They include general provisions and information about the DEQ, procedures to be followed in individual proceedings, administrative penalty proceedings, and public meetings and administrative hearings on permit applications; permit processing timelines; and complaint processing. New provisions include procedures for investigation and mediation of complaints and rulemaking.

AUTHORITY: Environmental Quality Board; Laws 1993, c. 145, Sections 55(H), 58(B) and 81; and 75 O.S. 1991, § 302.

COMMENT PERIOD: Deliver or mail comments November 15 through December 6, 1993 to contact person listed below.

PUBLIC HEARINGS: Oral and written comments will be received: Wednesday, December 15, 1993 - 9:00 a.m., Room 1211, Oklahoma State Department of Health Building, 1000 N.E. 10th, Oklahoma City, Oklahoma.
Wednesday, January 26, 1994 - Environmental Quality Board meeting.

COPIES OF PROPOSED RULES: May be obtained from the contact person listed below.

RULE IMPACT STATEMENT: May be obtained from contact person.

CONTACT PERSON: Office of General Counsel, 12th Floor, Department of Environmental Quality, 1000 N.E. 10th, Oklahoma City, Oklahoma 73117-1212; Mr. Robert Kellogg, 405/271-8060.

[Okla. Reg. 93-1610; filed October 25, 1993]

**TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 002. PROCEDURES OF THE DEPARTMENT
OF ENVIRONMENTAL QUALITY**

**CHAPTER 002. PROCEDURES OF THE DEPARTMENT
OF ENVIRONMENTAL QUALITY**

SUBCHAPTER 1. GENERAL PROVISIONS

RULEMAKING ACTION: PERMANENT final adoption.

RULES: 252:002, Procedures of the Department of Environmental Quality [NEW]

AUTHORITY: Environmental Quality Board; Laws 1993, c. 145, Sections 55(H), 58(B) and 81; and 75 O.S. 1991, § 302.

DATES:

Comment period: November 15, 1993 through December 6, 1993.

Public hearing: December 15, 1993 and January 26, 1994.

Adoption: January 26, 1994.

Submitted to Governor: February 7, 1994.

Submitted to House: February 7, 1994.

Submitted to Senate: February 7, 1994.

Gubernatorial approval: March 24, 1994.

Legislative approval: Failure of the Legislature to disapprove the rules resulted in approval on March 31, 1994.

Final adoption: March 31, 1994.

Effective: May 26, 1994.

SUPERSEDED EMERGENCY ACTIONS: None.

INCORPORATIONS BY REFERENCE: None.

ANALYSIS: The Oklahoma Environmental Quality Act directs the Board to promulgate replacement rules for programs transferred to the new Department of Environmental Quality ("DEQ"). (See Laws 1993, c. 324, Section 8.)

These proposed rules are intended to set forth procedures for the DEQ by renumbering, recodifying, and converting references from the OSDH (currently codified at 310:002) and implementing 27A:2-1-101 et seq. to the DEQ. They include general provisions and information about the DEQ, procedures to be followed in individual proceedings, administrative penalty proceedings, and public meetings and administrative hearings on permit applications; permit processing timelines; and complaint processing. New provisions include procedures for investigation and mediation of complaints and rulemaking.

CONTACT PERSON: Mr. Robert Kellogg, (405) 271-8060.

PURSUANT TO THE ACTIONS DESCRIBED HEREIN, THE FOLLOWING RULES ARE CONSIDERED FINALLY ADOPTED AS SET FORTH IN 75 O.S., SECTION 308.1(A), WITH AN EFFECTIVE DATE OF May 26, 1994:

252:002-1-1. Purpose

(a) **Purpose.** This Chapter establishes the organization and procedures of the Department of Environmental Quality.

(b) **Fair construction.** This Chapter is intended to simplify procedures, avoid delays, save expenses and facilitate implementing the Oklahoma Environmental Quality Code and any other Oklahoma Statutes under which the DEQ has jurisdiction.

(c) **Scope.** The rules in this Chapter are not intended to limit the lawful authority of the DEQ. The DEQ may address any matter under its jurisdiction and change any procedure for good cause.

(d) **Severability.** The repeal or invalidity of any particular rule of this Chapter or Title shall not affect other rules.

252:002-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"APA" means the Oklahoma Administrative Procedures Act, 75:250.1 et seq.

"Board" means the Environmental Quality Board.

"Code" means the Oklahoma Environmental Quality Code, 27A:2-1-101 et seq.

"Council" means the Air Quality Council, the Hazardous Waste Management Advisory Council, the Laboratory Services Advisory Council, the Radiation Management Advisory Council, the Solid Waste Management Advisory Council, the Water Quality Management Advisory Council and the Waterworks and Wastewater Works (Operator Certification) Advisory Council.

"DEQ" or "Department" means the Oklahoma Department of Environmental Quality and its officers and employees.

"Executive Director" means the Executive Director of the Department of Environmental Quality.

"Individual proceeding" means the same as defined in 75:250.3(7), a part of which includes an administrative evidentiary hearing.

"Respondent" means a person or legal entity named in a petition for an individual proceeding against whom relief is sought.

"Proposed rule or rule changes" means rules proposed for recommendation and adoption or repeal.

"Rule package" means a set of rules or rule changes or a single rule or rule change proposed for a specific program or purpose.

252:002-1-3. Description of Department of Environmental Quality

(a) **History.** The DEQ was created January 1, 1993, as a result of environmental legislation in 1992. On July 1, 1993, it assumed jurisdiction over air quality, hazardous waste, solid waste, water quality, environmental laboratory services and certification, radiation management and other programs and functions as specified

[NEW]

in the Code.

(b) **Organization.** The DEQ consists of programs in air quality, waste management, water quality, complaints and local services, and offices of customer assistance, business and industry assistance, local government assistance, and administrative hearings. Such organization may be revised by the Executive Director. Organizational charts may be obtained upon request to the Office of the Executive Director.

(c) **Duties.** The DEQ has the following duties:

- (1) to implement the Code and other statutes under which it has jurisdiction;
- (2) to serve as the official state environmental agency of Oklahoma to cooperate with federal agencies in the management of environmental programs designated by law;
- (3) to perform such duties as required by law; and
- (4) to provide administrative assistance to the Board and Councils.

SUBCHAPTER 3. GENERAL OPERATION

252:002-3-1. Office location and hours; communications

- (a) **Office.** The principal office of the DEQ is 1000 N.E. 10th Street, Oklahoma City, Oklahoma 73117-1212.
- (b) **Hours of operation.** Office hours are from 8:00 a.m. to 4:30 p.m., unless otherwise designated by the Executive Director, each day except Saturday and Sunday and state holidays.
- (c) **Communications.** Unless a person is working with a particular person or departmental area, written communication to the DEQ shall be addressed to the Executive Director at the principal office.

252:002-3-2. Availability of records

- (a) **Availability.** Records of the DEQ, not otherwise confidential or privileged from disclosure by law, shall be available to the public for inspection and copying at the DEQ's principal office or other offices during normal business hours. The DEQ may take reasonable precautions in order to ensure the safety and integrity of records under its care.
- (b) **Removal.** Records may be removed from the DEQ's offices or storage areas only with permission of the record's custodian.
- (c) **Reproduction.**
- (1) **By DEQ.** The DEQ may limit the number of copies made and the time and personnel available for reproduction of open records requested by a member of the public or refer the requester to the provisions of paragraphs (2) and (3) of this subsection.
 - (2) **Commercial reproduction.** With advance notice to the DEQ, persons may arrange for the pick-up, reproduction and return of open records by a commercial copying service at their expense.
 - (3) **Other.** Provided the approval of the DEQ is obtained in advance and suitable floor space is available, a requester may bring in and use his own copy machine.
- (d) **Confidentiality.** Any person submitting information, data or materials to the DEQ may assert and substantiate a claim of

[NEW]

confidentiality upon submission. Absent such assertion and substantiation, information or materials shall be recognized and treated by the DEQ as being available for disclosure.

(e) **Certification.** Copies of official records of the DEQ may be certified by the Executive Director or Assistant Director or their designees.

(f) **Charge.** The DEQ's administrative fee schedule shall apply to in-house copying or reproduction of open records for or by members of the public.

252:002-3-3. Administrative fees [RESERVED]

SUBCHAPTER 5. RULEMAKING

252:002-5-1. Petitions for rulemaking

- (a) **Rulemaking request.** Any person may file a petition with the DEQ formally requesting the adoption, amendment, or repeal of one or more rules.
- (b) **Form and content of petition.** Rulemaking petitions shall be in writing and filed with the DEQ. A petition shall include the information and follow the format of OAC 252:002 Appendix A, Petition for Rulemaking. After the petition is filed, the DEQ shall provide a copy to the Board.
- (c) **Referral.** The DEQ shall refer a filed petition to the appropriate Council or if none, to the appropriate program of the DEQ, for review. A petition referred to a Council shall be set on the agenda of the next available Council meeting.
- (d) **Status.** If rulemaking based on the petition does not commence within 30 calendar days after the next available Council meeting or after referral to a program of the DEQ, the petition shall be deemed denied. The DEQ shall advise the Board of the status of petitions and shall provide the petitioner a copy of any final action relating to the petition.

252:002-5-2. Rule development

The DEQ may commence the development of rules and rule changes at the request of, or on behalf of, the Board or a Council or petition by an interested person. The DEQ may appoint committees to assist in the development of such rules.

252:002-5-3. Notice of permanent rulemaking

The DEQ shall cause notice of proposed permanent rulemaking and of dates of known hearings to be given in accordance with the APA. Notice of the continuation of any rulemaking hearing shall be announced at the hearing or meeting from which the hearing is to be continued and shall not require publication.

252:002-5-4. Rulemaking comment periods & hearings before the DEQ

- (a) **Comments.** The DEQ may ask for oral or written comments on proposed rules or rule changes from any person at any time.
- (b) **Hearings.** On behalf of the Board or a Council, the DEQ may conduct a rulemaking hearing separate from a Board or Council

meeting to receive comments on proposed permanent rule packages.

(c) Hearing procedures for oral comments. Persons wishing to comment orally at a hearing on permanent rule packages may be asked to make a written request. The hearing officer may set reasonable time limits on oral presentations, may exclude repetitive or irrelevant comments and may require that the presentations be submitted in writing prior to the close of the comment period.

(d) Comment period for written comments. Comments on proposed permanent rule packages may be submitted in writing at the hearing or by the end of the specified public comment period, or both.

(e) Length of comment period. The comment period shall end at the conclusion of the hearing unless extended for no more than 30 days.

(f) Summary of comments. The DEQ shall maintain a summary of comments received on proposed rule packages at rulemaking hearings and during written comment periods and provide the summary to the Board or a Council prior to the Board's or Council's final action on such rules.

252:002-5-5. Hearings before the Board or a Council

At the request of the Board or a Council, the DEQ may designate a hearing officer to conduct a rulemaking hearing on proposed permanent rule packages before those bodies.

252:002-5-6. Preparation of rulemaking record

The DEQ shall maintain a rulemaking record on all rules adopted or repealed by the Board.

SUBCHAPTER 7. DECLARATORY RULINGS

252:002-7-1. Declaratory rulings

Any person who alleges that any DEQ rule or order interferes with or impairs, or threatens to interfere with or impair, their legal rights may petition the DEQ, formally requesting a declaratory ruling on the applicability of the rule or order.

(1) Form and content of petition. All such petitions shall be in writing and filed with the Administrative Law Clerk. The petition shall include the information and follow the format of OAC 252:002 Appendix B, Petition for Declaratory Ruling. After the petition is filed, the DEQ shall provide a copy to the Board at its next available meeting.

(2) Determination. Petitions for declaratory rulings shall be determined by the DEQ. Rulings shall state the findings and conclusions upon which they are based. If the DEQ refuses to make a ruling, then the petition shall be deemed to have been denied. If the DEQ commences an individual proceeding on the petition, it shall offer an opportunity for a hearing to the petitioner. After the DEQ issues a ruling or the Executive Director issues a final order, the DEQ shall provide a copy of the ruling or final order to the Board at its next available meeting.

(3) Mailing. The DEQ shall mail a copy of the ruling or final order to the petitioner.

SUBCHAPTER 9. INDIVIDUAL PROCEEDINGS IN GENERAL

252:002-9-1. Purpose and applicability

(a) Purpose and applicability. The purpose of this Subchapter is to establish general procedures for individual proceedings conducted by the DEQ for purposes of enforcement and administrative permit proceedings as specified by Subchapter 13 of this Chapter.

(b) Applicable law. The APA, the Code and this Chapter govern individual proceedings, including administrative hearings, undertaken by the DEQ.

252:002-9-2. Enforcement petitions

(a) Persons entitled. Individual proceedings may be initiated by DEQ program areas by filing a petition or an administrative compliance or penalty order with the Administrative Law Clerk.

(b) Petition content. Each petition shall name the Respondent(s) and shall contain a reference to the statutes and rules involved and a brief statement of the facts giving a right to relief and the relief requested. The petition shall be signed by the person presenting the same, or his attorney (see APA § 310), and shall include the signer's address and phone number.

(c) Petition style. The style of documents in a matter shall appear in substantially the following form:

BEFORE THE OKLAHOMA DEPARTMENT OF ENVIRONMENTAL QUALITY

IN RE: (Nature of proceeding)
and name of Respondent)
e.g. Request for _____) No. [Year & Case #]
[name of program area or person],)
Petitioner.)

[Nature of Request]

252:002-9-3. Declaratory ruling petitions

For information on declaratory ruling petitions, see Subchapter 7 of this Chapter.

252:002-9-4. Administrative permit hearing petitions

For information on administrative permit hearing petitions, see Subchapter 13 of this Chapter.

252:002-9-5. Matters filed by DEQ

A petition or administrative compliance or penalty order filed by a DEQ program area shall include notice of the opportunity to request an administrative hearing and shall be served on the named Respondents.

252:002-9-6. Administrative hearings

[NEW]

[NEW]

(a) **Request.** A hearing request shall be in writing and shall be filed with the Administrative Law Clerk as part of or in response to a filed Petition.

(b) **Scheduling.** The DEQ shall schedule an administrative hearing after receipt of a proper and timely request.

(c) **Notice.** When the DEQ schedules an administrative hearing, the Administrative Law Clerk shall notify the parties of the date, time and place of the hearing. Such notice shall satisfy the notice requirements of the APA and shall be made at least fifteen (15) days prior to the hearing unless otherwise provided by law or agreed by the parties.

(d) **Procedure.** The Administrative Law Judge may refer to District Court Rules and Procedure in the absence of applicable APA and DEQ statutes and rules, including this Chapter. Subject to the limitations in OAC 252:002-9-7(d), the Administrative Law Judge, with the consent of all parties, may vary the procedures of this Chapter.

252:002-9-7. Administrative Law Judges and Clerks

(a) **Administrative Law Judge.** The Executive Director may designate an Administrative Law Judge for any administrative hearing properly and timely requested of the DEQ, unless precluded by law. Administrative Law Judges shall be familiar with the rules of procedure and generally familiar with the substantive rules governing the matter, and shall not have had prior involvement in the matter other than as an Administrative Law Judge. The Administrative Law Judge so designated shall have full authority to conduct all aspects of the hearing proceedings except for the issuance of a Final Order.

(b) **Administrative Law Clerk.** The Executive Director may designate an Administrative Law Clerk to maintain the administrative hearing dockets and records, and perform such other duties as described in this Chapter or incidental thereto.

(c) **References to Administrative Law Judge.** The Executive Director or designee may perform functions described in this Section for Administrative Law Judges.

(d) **Authority.** Administrative Law Judges have complete authority to conduct administrative hearing proceedings and may take any action not inconsistent with the provisions of the rules of this Chapter or of the APA for the maintenance of order at hearings and for the expeditious, fair, and impartial conduct of the proceedings. Administrative Law Judges may, without limitation:

- (1) arrange and issue notice of the date, time and place of hearings and conferences;
- (2) establish the methods and procedures to be used in the presentation of the evidence;
- (3) hold conferences to settle, simplify, determine, or strike any of the issues in a hearing, or to consider other matters that may facilitate the expeditious disposition of the hearing;
- (4) administer oaths and affirmations;
- (5) regulate the course of the hearing and govern the conduct of participants;
- (6) examine witnesses;

(7) rule on, admit, exclude and limit evidence, at or before hearings;

(8) establish the time for filing motions, testimony, and other written evidence, briefs, findings, and other submissions, and hold the record open for such purposes;

(9) rule on motions and pending matters;

(10) divide the hearing into stages or join claims of parties whenever the number of parties is large or the issues are numerous and complex; and

(11) restrict attendance by persons not parties to the hearing in appropriate cases.

(e) **Technical assistance.** At the request of the Administrative Judge, the Executive Director may designate a DEQ representative, who has had no assigned responsibilities related to the matter at issue, to serve as technical adviser to the Administrative Law Judge.

252:002-9-8. Service

(a) **Methods of service.** Service of a petition and initial notice of hearing shall be by personal delivery served by a person licensed to make service of process in civil cases, or by certified mail with delivery shown by return receipt, or by publication if it is shown that service cannot be made by any other means despite the exercise of due diligence. Where the DEQ is serving a petition or notice, personal service may be made by a person designated by the Executive Director to make such service for the DEQ. Service by certified mail shall be effective on the date of receipt or, if refused, on the date of refusal by the Respondent. Acceptance or refusal by any officer of a business or an authorized agent for a business shall constitute acceptance or refusal by the party addressed.

(b) **Proof of service.** The person making service shall file proof of service thereof with the Administrative Law Clerk promptly and in any event within the time during which the person served must respond to the process. Failure to make proof of service does not affect the validity of service. The Administrative Law Judge may refer to the Oklahoma Pleading Code for guidance regarding service.

(1) **Acknowledgment.** Acknowledgment in writing by recipient, or appearance by the recipient at a hearing with objection to service, is equivalent to proof of service.

(2) **Actions on a license.** Service by mail in a matter seeking to revoke or suspend any license may be deemed complete when there is an affirmation that the notice was mailed by certified mail to the licensee's last known address, and that he or she may not be found otherwise, despite the exercise of due diligence. The Administrative Law Judge shall inquire into and determine whether due diligence has been exercised.

(c) **Service by mail.** Except for service of the petition and initial notice, service by mail is complete upon mailing, and may be shown by the postmark.

(d) **Service on representative.** Service made upon an attorney of record constitutes service upon the party the attorney represents. Service made upon a person authorized by Oklahoma law to receive

service on behalf of a party constitutes service upon that party.

252:002-9-9. Responsive pleading

A Respondent may file, and the Administrative Law Judge may direct a Respondent to file, a responsive pleading to the enforcement petition or order that initiated the action.

252:002-9-10. Prehearing conferences

(a) **General.** The Administrative Law Judge may schedule and conduct prehearing conferences as necessary to identify parties and issues and to set schedules and agendas for hearing-related activities. The Administrative Law Clerk shall notify the parties of the scheduling of a prehearing conference. The Administrative Law Judge may authorize a prehearing conference by telephone. On request, prehearing conferences shall be on the record.

(b) **Subjects.** Prehearing conferences may address:

- (1) identification and simplification of issues, including the elimination of frivolous claims or defenses;
- (2) amendments to the pleadings;
- (3) the plan and schedule of discovery and limitations to be placed thereon;
- (4) identification of admissions of fact to avoid unnecessary proof and cumulative evidence;
- (5) the identification of witnesses and substance of testimony, exhibits, and documents;
- (6) the use of prehearing briefs and prefiled testimony in the form of sworn affidavits;
- (7) settlement of all or some of the issues before the hearing;
- (8) adoption of special procedures for managing potentially difficult or protracted actions that may involve complex issues, multiple parties, novel or difficult legal questions, or evidence problems;
- (9) scheduling pursuant to OAC 252:002-9-11; and
- (10) such other matters as may aid disposition.

252:002-9-11. Prehearing scheduling conference

(a) **Purpose.** A prehearing scheduling conference may be held for the scheduling of matters to be accomplished. Such conference shall be designed to expedite the disposition of the action and discourage wasteful prehearing activities, establish early and continuing control of the management of the hearing, and set dates for prehearing activities.

(b) **Scheduling.** The Administrative Law Judge may enter an interim order which establishes, insofar as feasible, the time:

- (1) to amend the pleadings;
- (2) to file and hear motions;
- (3) to complete discovery;
- (4) of further prehearing conferences; and
- (5) for accomplishing any other matters appropriate in the circumstances of the case.

(c) **Changes in scheduling order.** The Administrative Law Judge may change dates and time periods set in the scheduling order by issuing a modifying order upon good cause shown.

252:002-9-12. Discovery

All parties shall act in good faith in the scheduling and conduct of discovery. Failure of a party to provide reasonable opportunity for the opposing party to depose any witness shall be grounds to exclude the testimony of that witness at the hearing. Discovery shall be conducted in accordance with the Oklahoma Discovery Code unless otherwise ordered by the Administrative Law Judge for good cause.

252:002-9-13. Prehearing Order

(a) **Purpose and form.** Following a prehearing conference, the Administrative Law Judge may issue a Prehearing Order which recites and schedules the action to be taken and which shall control the course of the action unless modified by a subsequent order to prevent manifest injustice.

(b) **Content.** The Prehearing Order should include the results of the conference and advice to the Administrative Law Judge regarding the factual and legal issues, including summaries of material evidence, to be presented. The Prehearing Order should also present all questions of law in the case. All exhibits shall be marked, listed and identified in the Prehearing Order. If there is an objection to the admission of any exhibits, the grounds for the objection must be specifically stated. Witnesses shall also be listed along with the nature of their testimony. No exhibit or witness may be added to the Prehearing Order once the Order has been prepared, signed, and filed by the Administrative Law Judge without a showing to the Administrative Law Judge by the requesting party that injustice would be created if the evidence or testimony were not allowed.

(c) **Applicability.** The contents of the Prehearing Order shall supersede the pleadings and govern the hearing of the case unless amended or allowed by the Administrative Law Judge to prevent injustice.

252:002-9-14. Subpoenas

(a) **Issuance.** Subpoenas for the attendance of witnesses, the furnishing of information required by the Administrative Law Judge and the production of evidence shall be issued by the Administrative Law Clerk upon written request by a party or on the Administrative Law Judge's own motion. Subpoenas shall be served and a return made in the same manner as provided for state court proceedings.

(b) **Failure to obey.** The Executive Director may seek an appropriate judicial order to compel compliance by persons who fail to obey a subpoena, who refuse to be sworn or make an affidavit at a hearing, or who refuse to answer a proper question during hearing. The hearing may proceed despite any such refusal but the Administrative Law Judge may, in his discretion at any time, continue the proceedings as necessary to secure a court ruling.

252:002-9-15. Record

(a) **To be made.** A record of the hearing shall be made, which shall be a tape recording unless otherwise agreed by the parties

[NEW]

and the Administrative Law Judge. The recording will not be transcribed as a matter of course. A transcript may be obtained by submitting a written request to the Administrative Law Clerk and tendering payment in an amount sufficient to pay the cost of having the recording transcribed.

(b) Court reporter. A party may request a court reporter (CSR or LSR). The requesting party shall pay the costs, and the original transcript shall be filed in the case file as part of the record in the case. Each person or party requesting copies shall make arrangements for such with the reporter, and pay the costs.

(c) Maintained. The record of a proceeding and the file containing the notices and the pleadings will be maintained in a location designated by the Office of Administrative Hearings. All pleadings, motions, orders and other papers submitted for filing in such a proceeding shall be date/file-stamped by the Administrative Law Clerk upon receipt. The burden of showing substantial prejudice by any failure to correctly file-stamp any submittal shall be upon the party asserting such.

(d) Designation on appeal. On appeal, the parties may designate and counter-designate portions of the record to save costs, following the procedures applicable in the Courts of Oklahoma.

252:002-9-16. Motions

(a) Filing. All requests for action in a matter already before the DEQ shall be made in the form of a motion or cross petition, signed by the party presenting same or his attorney, and filed with the Administrative Law Clerk. A cross petition shall be served in the manner provided in Rule 252:002-9-8. A copy of any motion shall be mailed by the movant to all parties of record concurrently with the filing of the motion, and a certification of such mailing shall appear on the motion.

(b) Response. Within ten (10) days after service of any written motion, any party to the proceedings may file a response to the motion. The time for response may be extended or shortened by the Administrative Law Judge for good cause shown.

252:002-9-17. Continuances

A motion for an extension or continuance shall state the reasons for the request and specify the length of time requested. Unless made before the Administrative Law Judge in open hearing, motions for extensions of time or for a continuance of the hearing to another date or time shall be in writing and filed with the Administrative Law Clerk. The Administrative Law Judge shall promptly grant or deny such request at his or her discretion. If the motion is denied, it may be renewed orally by the party at the hearing.

252:002-9-18. Evidentiary hearing procedures

(a) Generally that of civil proceedings. The order of procedure in hearings in all individual proceedings shall generally follow that which applies in District Court civil proceedings. At the discretion of the Administrative Law Judge, any party may reopen his case-in-chief, even after the adverse party has rested,

[NEW]

consonant with the requirements of justice. Parties may stipulate to any lawful matter.

(b) Further presentation. After presentation of all cases-in-chief, parties to the action shall be confined to rebutting evidence unless the Administrative Law Judge, for good reasons in furtherance of justice, permits them to offer evidence in the original case.

(c) Rulings. The Administrative Law Judge shall rule on the admissibility of evidence and objections to evidence, and on motions or objections raised during hearings, except for motions for summary judgments. All objections to a ruling shall be made promptly with statement of basis or they will be deemed waived. Parties shall be deemed to have taken exception to any adverse ruling on an objection.

(d) Summary judgment. The granting of a motion for summary judgment shall be subject to the provisions of 252:002-9-21 (Proposed order) and 252:002-9-22 (Final order).

252:002-9-19. Default

Any Respondent who fails to appear as directed, after receipt of notice as provided by this Chapter, may be determined to have waived the right to appear and present a defense to the allegations contained in the notice and/or petition. A Final Order in such proceeding may be issued by the Executive Director granting by default no more than the relief prayed for in the petition.

252:002-9-20. Settlement

Administrative hearings may be resolved by agreed settlement or consent order with the concurrence of the Executive Director. The Administrative Law Judge may grant continuances to allow the parties to discuss settlement.

252:002-9-21. Proposed orders

(a) Preparation of proposed orders. The Administrative Law Judge shall hear all evidence and arguments applicable in a case and shall prepare a proposed order including findings of facts and conclusions of law. Prior to such preparation, the Administrative Law Judge may request or require briefs from the parties on any relevant issue. The Administrative Law Judge shall also have the discretion to request or accept from the parties, proposed findings and conclusions.

(b) Service and presentation. Upon finalization of a proposed order, the Administrative Law Judge shall:

- (1) present the proposed order and the record of the matter to the Executive Director for review and entry of a final order; or
- (2) serve it on the parties, by regular mail, offering an opportunity for parties to file exceptions to the proposed order before a final order is entered, pursuant to APA § 311; and then shall present the proposed order, the exceptions, if any, and the record of the matter to the Executive Director for entry of a final order. The parties may by written stipulation waive any of the requirements for a proposed order.

252:002-9-22. Final orders

(a) **Executive Director.** For proceedings heard by an Administrative Law Judge, the Executive Director may adopt, amend, or reject any findings or conclusions of the Administrative Law Judge or exceptions of any party, or may remand the proceeding for additional argument or the introduction of additional evidence at a hearing held for that purpose. This may be done after:

- (1) the opportunity for exceptions has lapsed without receiving exceptions, or after exceptions, briefs and oral arguments, if any, are made; or
- (2) review of the record.

(b) **Issuance.** At the conclusion of the proceedings and (except as provided in Rule 252:002-9-19, Default) after review of the record and/or proposed findings of fact and conclusions of law, the Executive Director shall issue a final order reflecting the findings of fact made, the conclusions of law reached, and specifying the action to be taken. Upon the resolution of motions of summary judgment that are dispositive of the entire case and rulings on standing that are adverse to a Petitioner(s), the Executive Director shall issue a final order.

(c) **Notice.** Parties shall be notified either personally or by mail of the issuance of a final order. A copy of the final order shall be provided to any party and its attorney.

252:002-9-23. Reconsideration

Any party may petition the DEQ for rehearing, reopening or reconsideration of any decision in an individual proceeding within ten days of its entry, pursuant to APA § 317. Nothing in this Chapter shall prevent reconsideration of a matter in accordance with other statutory provisions.

252:002-9-24. Judicial review

The provisions of Section 318 of title 75 of the Oklahoma Statutes shall apply.

SUBCHAPTER 11. ADMINISTRATIVE PENALTY PROCEEDINGS

252:002-11-1. Applicability

The requirements of this Subchapter are in addition to the preceding requirements of this Chapter and are applicable to matters brought under 27A O.S.Supp. 1993, Sections 2-3-502, 2-5-110, and 2-7-126, or any similar statutes providing for the assessment by the DEQ of administrative penalties.

252:002-11-2. Notice of Violation ("NOV")

Unless otherwise provided by the particular enabling legislation, administrative penalty proceedings shall be preceded by a written notice of violation (NOV) informing the Respondent of the regulatory requirement at issue. This NOV must be served upon the Respondent and must state the factual allegations and particular standards or rules upon which the NOV is based. A letter, inspection sheet, petition, consent order or final order may

constitute a NOV for purposes of instituting administrative penalty proceedings, if it meets the requirements of this Section.

252:002-11-3. Administrative compliance and penalty orders

(a) **When issued.** The Executive Director upon the request of a DEQ program area may issue an administrative order requiring compliance, assessing penalties for past violations and specifying penalties for continuing noncompliance. If a preceding Notice of Violation is required by the enabling legislation, an administrative compliance or penalty order shall be issued not less than fifteen days after service of the NOV upon the Respondent, or such reduced period as may be necessary to render the Order reasonably effectual.

(b) **Must specify.** An administrative compliance or penalty order shall specify the facts and conclusions upon which it is based and shall set a time for the Respondent to comply with the applicable regulations. The Order shall specify the penalty, not to exceed the statutory maximum per day of noncompliance, to be assessed in the event that the Respondent fails to comply with the Order within the prescribed time, and, if applicable, the penalty assessed for past violations of the Code, rules, or licenses or permits.

(c) **Service.** An administrative compliance or penalty order shall be served in accordance with Rule 252:002-9-8. The Order shall advise the Respondent that it shall become final unless an administrative hearing is requested in writing within fifteen (15) days of service of the Order.

(d) **Order following hearing.** Based on the hearing and record, an administrative compliance or penalty order will be sustained, modified, or dismissed by the Executive Director. If the hearing process extends beyond any compliance deadline specified in the Order, fines specified in the Order for violations of the Order will continue to accrue during the hearing process unless the Administrative Law Judge stays the penalty upon request for good cause shown.

252:002-11-4. Determining penalty

In addition to factors specified by 27A O.S.Supp. 1993, Section 2-3-502(K)(2) or other law, the following factors, without limitation, may be considered in determining the amount of penalty specified in an administrative penalty order:

- (1) the gravity of the violation, including the likelihood of the development of adverse health effects caused by the violation, and the extent and severity of environmental degradation or adverse health effects caused or placed at risk by the violation,
- (2) the degree of variance from the applicable standards,
- (3) costs of correction of damage, and
- (4) good or bad faith of the Respondent.

252:002-11-5. Assessment orders

(a) **Failure to comply with administrative orders.** After an administrative compliance or penalty order is issued, proceedings may be conducted to determine whether the Respondent has failed to

[NEW]

comply with the Order for any period of time.

(b) **Application for compliance and penalty hearing.** Any time the DEQ believes the Order has been violated, it may with reasonable promptness apply to the Administrative Law Judge for a compliance and penalty hearing, alleging the period of noncompliance and the amount of the administrative penalty that has accrued. The DEQ shall provide a copy of the application to the Respondent.

(c) **Elements to consider.** The Executive Director, in deciding whether an administrative penalty or compliance order has been violated and whether the penalties are appropriate, may consider efforts to comply with applicable requirements made by the Respondent after issuance of the Order.

(d) **Must request hearing within seven days.** The DEQ's application shall advise the Respondent that the Respondent's right to contest the determination of noncompliance and the amount of the fine is waived if the request for hearing is not made within seven (7) calendar days of receiving notice. A request for hearing is deemed made when received by the DEQ. If timely requested, the hearing must be promptly set and held.

(e) **Issuance of assessment orders.** An assessment order shall be issued by the Executive Director following the determination of the application. An assessment order must state the nature and period of the violation, and determine the amount of the fine. The fine is due and payable immediately upon issuance of the assessment order, unless otherwise provided therein. A copy of the assessment order will be provided to the Respondent.

(f) **Continuing violations.** If the DEQ believes that violations of the administrative compliance or penalty order continue after the issuance of an assessment order, the DEQ may apply within a reasonable time for the issuance of additional assessment orders covering periods of violation since the period covered by the issuance of a previous assessment order.

252:002-11-6. Penalty-only proceedings

(a) **General.** In accordance with 27A O.S.Supp. 1993, Section 2-3-502(L), the DEQ may, within three (3) years of discovery, issue an administrative penalty order proposing specified administrative penalties for non-continuing violations of the Code, rules promulgated thereunder, or permits or licenses issued pursuant thereto.

(b) **Must specify.** The administrative penalty order shall specify the facts and conclusions upon which it is based.

(c) **Determining Penalty.** For information on determining penalty, see 252:002-11-4.

(d) **Service.** The administrative penalty order shall be served in accordance with Rule 252:002-9-8. The Order shall advise the Respondent that it shall become final unless a hearing is requested in writing within fifteen (15) days of service of the Order.

(e) **Hearing.** Based on the hearing and the record, an administrative penalty order will be sustained, modified, or dismissed by the Executive Director.

[NEW]

SUBCHAPTER 13. FORMAL PUBLIC MEETINGS AND ADMINISTRATIVE PERMIT PROCEEDINGS

PART 1. FORMAL PUBLIC MEETINGS

252:002-13-1. Formal public meetings

(a) **Location.** The DEQ shall determine the location and the facility at which a formal public meeting on a permit application and/or draft permit shall be held.

(b) **Procedure.** The designated presiding officer of a formal public meeting shall establish the procedure by which such meeting shall be conducted based on the requirements of the Code and applicable program-specific rules.

PART 3. ADMINISTRATIVE PERMIT PROCEEDINGS

252:002-13-30. Scope; purpose of proceedings

(a) **Applicability.** In addition to the requirements of Subchapter 9 of this Chapter, the requirements of this Part shall apply to administrative hearings on draft permits.

(b) **Purpose.** The purpose of an administrative permit proceeding is to provide for an evidentiary proceeding for challenges to draft permits and to determine their compliance with the Code and rules promulgated thereunder.

252:002-13-31. Definitions

The following words or terms, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Administrative permit hearing" means an evidentiary hearing conducted by the DEQ as part of an administrative permit proceeding.

"Administrative permit proceeding" means all prehearing conferences, evidentiary hearings and other proceedings connected with an individual proceeding on a draft permit.

"Joining of parties" means the grouping of parties to an administrative permit proceeding who assert rights to relief respect of or arising out of the same draft permit.

"Lead Counsel" means the attorney acting as coordinating counsel for all petitioners or, if only one petitioner, that party's legal representative.

"Petitioner(s)" means a person or group who requests an administrative permit hearing and is determined by the Administrative Law Judge to have standing as a party to the action.

"Respondent" means an applicant whose formally filed permit application and the draft permit related thereto are the subject of an administrative permit proceeding.

252:002-13-32. Request for administrative permit hearing

(a) **Request.** A request for an administrative permit hearing must be in writing signed by the requester, requesters or authorized representative of a group of requesters and shall contain a brief statement of the basis of the request and the name and address of

each requester. If the request is made by or on behalf of a group, the request should contain a list of names and addresses of group members. A request shall be considered an initial petition and should be personally delivered or sent to the address described in the notice telling of such request opportunity or to the DEQ's Office of Administrative Hearings.

(b) Initiation of proceedings. Unless otherwise provided by law, the initiation of administrative permit proceedings shall not occur until a draft permit has been prepared by the DEQ and amended, as appropriate, based on comments received during the public comment period.

(c) Joinder of DEQ. The DEQ, through the permit drafting program, shall be a party to the permit proceeding upon its own petition, or may be joined as a party upon order of the Administrative Law Judge. If the DEQ is not a party to the proceedings, the Administrative Law Judge may call witnesses, hear testimony and receive evidence from the permit drafting program. Such witnesses shall be subject to cross-examination by the parties.

(d) Location for Administrative Permit Hearings. Proceedings related to administrative permit hearings shall be held at the principal office of the DEQ unless otherwise specified by the Administrative Law Judge.

252:002-13-33. Relationship to other rules

In addition to the provisions of this Part, the requirements and procedures set forth in Subchapter 9 of this Chapter (OAC 252:002) for individual proceedings shall apply to administrative permit proceedings and hearings unless specified otherwise or in conflict. In cases of conflict, specific provisions of this Part control over Subchapter 9. The provisions include:

- (1) OAC 252:002-9-7 (Administrative Law Judges and Clerks);
- (2) OAC 252:002-9-8 (Service);

252:002-13-34. [RESERVED]

252:002-13-35. Prehearing verification conference

(a) Notice. According to 75:309(b), the Administrative Law Judge shall give notice to requesters and Respondents of a prehearing verification conference on a request for an administrative permit

hearing.

(b) Purpose. The prehearing verification conference shall be attended by all requesters and Respondents and/or their representatives for the purpose of examining notice and identifying parties and their representatives.

(c) Verification of notice. The Administrative Law Judge shall examine evidence and receive testimony on whether notice of the opportunity to request an administrative permit hearing was given in accordance with applicable law.

(d) Verification of request. The Administrative Law Judge shall verify whether each requester made a timely and proper request for the hearing.

(e) Verification of standing. The Administrative Law Judge shall verify the standing of all requesters to be parties pursuant to requirements set by applicable law.

(f) Cure of deficiencies. The Administrative Law Judge may allow deficiencies in notice or proof of standing to be cured.

(g) Identification of representatives. When verification is complete, each party shall identify its counsel. All counsel or individuals appearing pro se (representing themselves) shall enter a written entry of appearance with the Administrative Law Judge. In addition, each party shall designate one individual to receive notice and to take primary responsibility for the filing of documents with the Administrative Law Clerk.

(h) Groups. Members of a formally organized group may request to be considered as one party to the hearing and shall be considered a single entity if they meet applicable standing requirements for such a group or if ten (10) members meet the applicable standing requirements for individuals. A group qualified to be a single party must be represented by Counsel during administrative permit proceedings.

252:002-13-36. Selection of Lead Counsel

When more than one Petitioner is verified as a party and their representation is by more than one Counsel, the Petitioners shall select one Lead Counsel to coordinate action and communications on behalf of all Petitioners and their attorneys. The selection of a Lead Counsel shall not prohibit other attorneys for petitioners, or unrepresented Petitioners, from dividing responsibilities such as direct and cross examination, discovery, and opening/closing arguments. Designation as Lead Counsel shall not be deemed to establish an attorney-client relationship not otherwise existing. For good cause, the Administrative Law Judge may allow substitution of Lead Counsel and authorize additional Lead Counsel where conflicts of interest appear.

252:002-13-37. Identification of issues

(a) Integrated petition. The Lead Counsel, on behalf of all joined Petitioners, shall file an integrated petition in the office of Administrative Hearings within twenty (20) days after the completion of the prehearing verification conference. The integrated petition shall name the person against whom relief is requested, contain a reference to the statutes and/or rules

[NEW]

involved, contain a brief statement of the facts giving a right to relief, and state clearly and concisely the action or relief sought and the ground therefor. The integrated petition shall be in the form set forth in Rule 252:002-9-2(c). Relief in the alternative may be pleaded. The petition shall also contain a preliminary listing of topics which the Petitioner(s) intends to put at issue in the hearing. Upon filing an integrated petition with the DEQ, Lead Counsel shall serve the Respondent with a copy of the petition and shall mail copies to, or make personal delivery to, all Petitioner(s) or their representatives.

(b) **Answer.** The Respondent shall file an answer to the integrated petition within twenty (20) days after service of the petition upon him. An answer may contain specific responses or a general denial and shall be served by the Respondent on all other parties to the action.

(c) **Cross petition.** The Respondent may file a cross petition and the named parties shall have the right to file answers within 20 days of service.

(d) **Amendment of petition and answer.** The parties have the right to amend petitions and answers upon a showing of good cause and with leave of the Administrative Hearing Judge.

252:002-13-38. Administrative record

(a) **Content.** In addition to the provisions of Subchapter 9 of this Chapter, the administrative permit hearing record shall include:

- (1) the permit application on file with the DEQ, as amended;
- (2) all written comments received during the public comment period;
- (3) the tape or transcript of the formal public meeting;
- (4) documents resulting from the DEQ's review of the permit application and public comments;
- (5) the draft permit, fact sheet and the response to comments, if any, issued by the DEQ; and
- (6) all published notices.

(b) **Admission into evidence.** The documents referenced in (a) of this Section may be admitted and received in evidence. The Administrative Law Judge may direct that a witness be provided to sponsor a portion or portions of these documents. The Administrative Law Judge may direct the appropriate party to produce the witness for cross-examination. If a sponsoring witness cannot be provided, the Administrative Law Judge may reduce the weight accorded the appropriate portion of the record.

252:002-13-39. Withdrawal and dismissal

(a) **Withdrawal.** Any Petitioner may formally withdraw from the proceedings at any time by filing a statement of withdrawal with the Administrative Law Clerk.

(b) **Dismissal and release.**

- (1) **By motion of Petitioner(s).** At any time during the proceedings, Petitioner(s) may request dismissal of the action by filing a motion with the Hearing Clerk that is signed by all Petitioner(s) or their representative(s). Such dismissal shall

[NEW]

be with prejudice unless the words "without prejudice" appear in the Order of Dismissal issued by the Administrative Law Judge.

(2) **By motion of Respondent.** An action shall be dismissed by the Administrative Law Judge upon withdrawal of the permit application by the Respondent. Any such dismissal shall be with prejudice as to that permit application and the draft permit related thereto.

(3) **By Administrative Law Judge.** An action may be dismissed by the Administrative Law Judge if all Petitioners fail to appear or to prosecute with diligence, or when Petitioner(s) are in disobedience to an Interim Order issued by the Administrative Law Judge. Any Petitioner may be dismissed from an ongoing action for failure to appear or prosecute with diligence or for disobedience to an Interim Order, only upon motion by a party to the action. Such dismissals shall not occur until a Petitioner subject to the Dismissal Order receives notice of the prospective dismissal and is given the opportunity to be heard concerning it. The Administrative Law Judge may release any party from the action upon proper motion at any time.

252:002-13-40. Evidentiary hearing procedures on draft permits

(a) **Order of procedure.** For information on order of procedure, see OAC 252:002-9-18.

(b) **Burden of proof.** The Respondent has the burden of proof as to issues raised by Petitioner(s).

(1) **Petitioner(s).** Petitioner(s) shall have the burden of going forward to present an affirmative case on the issues identified in the petition.

(2) **Respondent.** After the conclusion of the case of the Petitioner(s), the Respondent shall have the burden of presenting an affirmative case on all issues raised by the Petitioner(s).

(c) **Testimony and cross-examination.** The Administrative Law Judge may provide for the testimony of opposing witnesses to be heard consecutively. No cross-examination shall be allowed on questions of law, on matters that are not subject to challenge in an administrative hearing, or on questions of DEQ policy except to the extent such policy must be analyzed to disclose the basis for draft permit requirements. Issues between the parties that are relevant to the hearing but not raised at the hearing shall be dismissed as between the parties and may be so reflected in the final findings of fact and conclusions of law.

252:002-13-41. Orders

(a) **Proposed and Final Orders.** For information on Proposed and Final Orders, see OAC 252:002-9-21 and 252:002-9-22.

(b) **Final Orders.** Final Orders issuing from an administrative permit hearing shall be based on the applicable provisions of statutes and rules, and may be conditioned in accordance with findings and recommendations of the Administrative Law Judge.

252:002-13-42. Issuance or denial of permit

The applicant bears the burden of persuading the agency that the

permit should issue. Title 75 O.S. 1991, § 307 is the appropriate mechanism to address any alleged failure by the DEQ to conform to the issuance or denial of the permit to the requirements of a Final Order.

SUBCHAPTER 15. ENVIRONMENTAL PERMIT PROCESSING TIMES

252:002-15-1. Purpose and applicability

(a) **Purpose.** The rules in this Subchapter establish time periods for issuance or denial of environmental permits and licenses that are required by law.

(b) **Permits included.** The provisions of this Subchapter apply to permits reviewed by the following Programs and their successors:

- (1) the Air Quality Division;
- (2) the Hazardous Waste Management Program;
- (3) the Solid Waste Management Program; and
- (4) the Water Quality Division.

(c) **Supersedes inconsistent rules.** Except as otherwise provided by statute, the provisions of this Subchapter shall supersede any inconsistent provision of other Chapters of this Title.

252:002-15-2. Definitions

The following words or terms, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Administratively complete" means an application that contains the information specified in the application form and rules in sufficient detail to allow the DEQ to begin technical review.

"Application" means a document prepared in accordance with the rules and the forms and instructions provided by the respective Program and submitted with the expectation of providing that information necessary for review and determination of the permit. The application consists of the initial submittal and all supplements.

"Program" means the services or divisions of the DEQ that are specified in Section 252:002-15-1.

"Submittal" means each separately submitted document or document package that forms a part of an application.

"Supplement" means a response to a request for additional information following completeness and technical reviews, and information submitted voluntarily by the applicant.

252:002-15-3. Common permitting procedures and timelines

(a) **Filing of applications.** Unless otherwise provided in this Subchapter, upon the receipt of an application for filing and the proper fee, each Program shall:

- (1) file-stamp the application with the date of receipt, the Service name and an identification number;
- (2) assign the application to a named person who will do the review; and
- (3) timely log this information.

(b) **Administrative completeness review.** Unless otherwise provided

in this Subchapter, the reviewer shall have 60 calendar days from the logged date of filing in which to initially determine if the application is administratively complete.

(1) **Not complete.** Upon determining that the application is not administratively complete, the reviewer shall immediately notify the applicant by mail, describing with reasonable specificity the inadequacies and measures necessary to complete the application. This notice shall not require or preclude further review of the application and further requests for specific information. If the reviewer does not notify the applicant of such inadequacies, the period for technical review shall begin at the close of the administrative completeness review period.

(2) **Complete.** Upon a determination that the application is administratively complete, the reviewer shall log the date and immediately notify the applicant by mail. The period for technical review begins.

(c) **Technical review.** Each Program involved shall have a certain time period to review each application for technical compliance with the relevant regulations and reach a final determination.

(d) **When times are tolled.** The time period for review is tolled (the clock stops) during litigation, during periods of public review and participation (includes public meetings and administrative permit hearings (and waiting periods therefor), public comment periods, time required for DEQ preparation of responses to public comments received, and review by other federal or State agencies), or when the Program has asked for supplemental information and advised the applicant that the time period is tolled pending receipt, or during the time in which an applicant amends his application of his own accord.

(e) **Supplemental time.** To compensate for time spent in reviewing inadequate materials, the DEQ's notice of deficiencies and request for supplemental information may specify that up to 30 additional calendar days may be added to the application processing time. This may also include the number of days the DEQ spent in preparing the notice and request. Requests for supplemental information and data may also specify that additional days for technical review equal to the number of days the applicant used to prepare and submit such supplement may be added to the application review time.

(f) **Withdrawal.** Unless specified otherwise in a program's rules, failure by an applicant to supplement an application within 180 days after the request shall be deemed to be a withdrawal unless the time is extended by agreement for good cause.

(g) **Extensions.** Extensions to the timelines of this Subchapter may be made as provided by law.

252:002-15-4. Pending failures

(a) **Circumstances outside agency control.** Technical review time shall be tolled for specified times when, prior to the deadline, the Executive Director certifies that a failure to meet a deadline is imminent and is caused by circumstances outside the control of the DEQ. Such circumstances include, but are not limited to, acts of God; a substantial and unexpected increase in the number of applications filed, and additional review duties imposed on the DEQ

[NEW]

[NEW]

from an outside source.

(b) Other circumstances. Where circumstances that are not clearly outside the control of the DEQ may cause a failure to meet a deadline, then:

- (1) at least thirty (30) calendar days prior to the deadline the DEQ shall reassign staff and/or retain outside consultants to meet such deadline.
- (2) the Applicant may agree to an extension of time for a specific purpose and period of time with refund of the entire application fee, unless a refund is prohibited by law.

252:002-15-5. Air quality permit timelines

The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

- (1) Construction permits:
 - (A) PSD - 540 days.
 - (B) Major Sources - 365 days.
 - (C) Minor - 180 days.
- (2) Operating permits for new construction or modifications - 730 days.
- (3) Relocation permits - 30 days.

252:002-15-6. Hazardous waste permit timelines

The following hazardous waste permits and authorizations shall be technically reviewed and issued or denied within the timeframes specified below.

- (1) Hazardous waste permits:
 - (A) New RCRA Operations permit or the renewal thereof - 300 days.
 - (B) New State Recycling permit - 300 days.
 - (C) New State Construction permit - 300 days.
 - (D) Class 3 permit modifications - 300 days.
 - (E) Underground Injection Control permit - 300 days.
- (2) Class 1 and Class 2 permit modifications - 300 days.
- (3) Closure plans, post-closure plans and transfer station plans and plan modifications - 300 days.

252:002-15-7. Solid waste permit timelines

Times for issuance or denial of applications for all solid waste permits shall be in accordance with applicable chapters of Solid Waste Regulations, OAC 252:500 et seq., or, if not specified therein, the technical review period for solid waste permit applications and for each submittal and resubmittal related thereto shall be 90 days, subject to OAC 252:002-15-3.

252:002-15-8. Water quality permit timelines

(a) Applications for Water Quality permits, certifications and authorizations shall be technically reviewed and permits shall be issued or denied within the following timeframes:

- (1) Dairy Waste - 180 days
- (2) Discharges - 180 days
- (3) 401 Certifications - 180 days

- (4) Industrial Wastewater other than discharge - 180 days
- (5) Pretreatment Trust Users - 180 days
- (6) Public Water Supply - 90 days
- (7) Septage and Septic Tank Cleaners - 120 days
- (8) Underground Injection Control (nonhazardous) - 420 days
- (9) Water Pollution Control Construction - 90 days

(b) Preliminary and secondary applications associated with the State Revolving Fund shall be reviewed and, if acceptable, transmitted to the Oklahoma Water Resources Board for approval. If the DEQ can not concur in the preliminary or secondary applications, it will notify the applicant in writing. Transmittal of application to the Oklahoma Water Resources Board or a written notice of non-approval shall occur within 90 days after receipt of the application.

252:002-15-9. Other permits

Any environmental license or permit that is not described in this Subchapter shall not be subject to these time frames but shall be reviewed with all due and reasonable speed.

SUBCHAPTER 17. COMPLAINT PROCESSING

252:002-17-1. Purpose

The rules in this Subchapter identify the procedures to process pollution complaints.

252:002-17-2. Definitions

The following words or terms, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Complaint" means any written or oral information submitted to ECLS alleging site-specific environmental pollution. Information must be submitted by persons expecting a response, and does not include referrals from federal agencies, information gained from facility inspections or DEQ employees, or self-reported incidents.

"ECLS" means the Environmental Complaints and Local Services Division of the DEQ.

"Enforcement Action" means:

- (A) any administrative compliance or penalty order;
- (B) any administrative petition to revoke or suspend a permit or license;
- (C) a consent order or proposed consent order in lieu of any enforcement action defined in subparagraph (A) or (B), of this definition; or
- (D) A civil petition, or a criminal information or complaint in municipal or district court.

"Mediation" means a voluntary negotiating process in which parties to a dispute agree to use a mediator to assist them in jointly exploring and settling their differences, with a goal of resolving their differences by a formal agreement created by the parties.

"Resolution" means the determination by the DEQ, based on

analysis and investigation of a complaint, that there has not been a violation of Oklahoma environmental statutes or rules as alleged by a complaint, that the violation has been corrected, or that an Enforcement Action has been filed and the 14-day complainant comment period has been considered.

"Response" means the initiation of appropriate action, including but not limited to investigation or referral of a complaint, and informing complainants regarding potential actions that may occur based on a complaint.

252:002-17-3. Receipt of complaints

- (a) Toll free hot line. The DEQ shall provide a toll-free hot line to receive environmental complaints.
- (b) General mail or other DEQ phone numbers. Complaints may be received by mail or by any of the DEQ's phone numbers during regular office hours.
- (c) DEQ offices. Complaints may be made in person at any of the DEQ's offices during regular office hours.

252:002-17-4. Investigation of complaints

After receipt of a complaint, ECLS may assign an investigator to the complaint. The investigator or other DEQ personnel may obtain any information which may tend to prove there has or has not been a violation of Oklahoma environmental statutes or rules, who the potentially responsible persons are, and any other information which may be needed to resolve the complaint.

252:002-17-5. Notification

- (a) Potential actions. Within two (2) working days of receipt of a complaint, the ECLS shall notify the complainant of the potential actions which may occur to resolve the complaint.
- (b) Written notification.
 - (1) Within seven (7) working days of the receipt of a complaint, the ECLS shall notify the complainant, in writing, of the determination of the course of action to be taken by the DEQ.
 - (2) Within seven (7) working days of the resolution of the complaint, the ECLS shall notify the complainant of the resolution. If complainants notify the DEQ they are dissatisfied with the resolution reached by the DEQ, complainants shall be notified in writing of their options, including but not limited to referral on written request to an outside source trained in mediation.
- (c) Enforcement. If as a result of a complaint the DEQ undertakes an Enforcement Action, the ECLS shall notify by mail the person whose complaint caused the Enforcement Action to be initiated of an opportunity to provide, within fourteen (14) calendar days after the date of the mailing of the notice, written information pertinent to the complaint.

252:002-17-6. Referral of complaints

- (a) To appropriate agency. If the DEQ receives a complaint which clearly falls within the jurisdiction of another state

environmental agency, the complaint shall be referred to the appropriate agency within one working day of the date of determination of jurisdiction. Complaints referred to other agencies shall require no further action by the DEQ and will not be referred by the DEQ to mediation.

(b) To mediation. Complainants who are not satisfied with the DEQ's resolution of their complaint may ask the ECLS in writing to refer their complaints to an outside source trained in mediation. Participation in the mediation process shall not hinder or interfere with any enforcement action taken by the DEQ. The ECLS shall maintain a roster of certified mediators which shall be available to the public. Complainants and persons named in the complaint shall be advised that participation in the mediation process conducted by the outside source is completely voluntary and confidential and that fulfillment of any agreements reached in mediation shall be the responsibility of the parties of the dispute. The DEQ shall not be responsible for any mediation costs.

MARK S. COLEMAN
Executive Director

FRANK KEATING
Governor

State of Oklahoma
DEPARTMENT OF ENVIRONMENTAL QUALITY

MEMORANDUM

August 1, 1995

TO: Interested Persons
FROM: Kay E. York *KE*
SUBJECT: Proposed Rules for Uniform Environmental Permitting

Our goal of having a simplified permitting procedure that applies uniformly to each program is almost here! The ***SUPER** program has been established by statute and will become effective on July 1, 1996, for applications filed on or after that date.

Now, implementing rules must be adopted by the Environmental Quality Board before March 1, 1996.

So, we've divided the rulemaking into 3 phases:

- A. "Designation/Delegation rule" (designates the positions to which the Executive Director may delegate the power and duty to issue/deny DEQ permits).
- B. "Tier Rules" (classify each type of permit or authorization the DEQ issues into 3 tiers).
- C. "Permitting Rules" - (New Chapter 10)
 - (uniform procedural rules that apply agency-wide), and
 - (program-specific rules to supplement the uniform rules.)

[NOTE: This 3rd phase also includes changes to existing program rules needed to implement Chapter 10 and ***SUPER**.]

Phases A and B are included in this packet.
Phase C will be mailed out on August 15.

Attached for your review:

1. Designation/Delegation rule (text and rulemaking notice).
2. Tier rules (text and rulemaking notice).
3. Tier I, II and III flow charts.

Please note dates of comment periods and public hearings. Comments received will be appreciated and considered.

Our program is forming the basis of programs under consideration by the EPA and in other states! Thanks to each of you for the assistance and support you have given us during these last 2 years.

* Simplified Uniform Permitting Through Environmental Regulation.

CHAPTER 010. UNIFORM ENVIRONMENTAL PERMITTING
SUBCHAPTER 21. AIR QUALITY

PART 1. APPLICATION CLASSIFICATIONS AND GENERAL PROVISIONS

252:010-21-1. Tier I air quality applications

The following air quality authorizations require Tier I applications:

- (1) Construction permit for a minor source.
- (2) Operating permit for a minor source.
- (3) Operating permit for a major facility*, issued after a construction permit, which does not differ from the construction permit in any manner which would otherwise subject the operating permit application to public review.
- (4) New, modified or renewed authorization under a general permit.
- (5) Modification of a minor source's construction and/or operating permit when the source remains a minor source after the modification.
- (6) Minor modification of a major facility's* construction and/or operating permit.
- (7) Applicability determination.
- (8) Emergency burn approval.
- (9) Asbestos renovation/demolition approval.
- (10) Relocation permit.
- (11) Temporary permit.
- (12) Plant-wide emission plan approval.
- (13) Administrative amendment of all permits and other authorizations.
- (14) Extension of a minor source's construction permit.
- (15) Extension of a major facility's* construction permit with no or minor modification.
- (16) Renewal of an operating permit for a minor source.

252:010-21-2. Tier II air quality applications

The following air quality authorizations require Tier II applications.

- (1) Operating permit for a major facility*, issued after a construction permit, which differs from the construction permit in a manner which subjects the operating permit application to public review.
- (2) Operating permit for a major facility* that does not have a construction permit.
- (3) Significant modification of a major facility's* construction or operating permit.
- (4) New, modified or renewed general permit.
- (5) Extension of a major facility's* construction permit with significant modification.
- (6) Renewal of an operating permit for a major facility*.

252:010-21-3. Tier III air quality applications

A construction permit for a new or existing major facility* requires a Tier III application.

*"Major facility" means a source subject to Title V permitting requirements.

DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 010. UNIFORM ENVIRONMENTAL PERMITTING
SUBCHAPTER 31. HAZARDOUS WASTE MANAGEMENT

PART 1. APPLICATION CLASSIFICATIONS AND GENERAL PROVISIONS

252:010-31-1. Tier I hazardous waste management applications

The following hazardous waste management authorizations require Tier I applications.

- (1) Minor modification of any hazardous waste permit.
- (2) Modification to a recycling permit in accordance with 27A O.S. Supp. 1994, §2-7-118(A).
- (3) Class II permit modification as defined in 40 CFR §270.42.
- (4) Emergency hazardous waste disposal plan approval.
- (5) Hazardous waste generator disposal plan approval.
- (6) Technical plan approval.
- (7) Hazardous waste transporter license.
- (8) Hazardous waste transfer station plan modification which is not related to capacity.
- (9) Emergency permit issued in accordance with 40 CFR § 270.61.
- (10) Interim status closure plan approval in accordance with 40 CFR §265.113(d)(4).
- (11) Minor administrative modification of all permits and other authorizations.
- (12) Renewal of disposal plan approval and transporter license.
- (13) New, modified or renewed authorization under a general permit.

252:010-31-2. Tier II hazardous waste management applications

The following hazardous waste management authorizations require Tier II applications.

- (1) On-site hazardous waste treatment, storage or disposal permit.
- (2) Mobile recycling permit.
- (3) Research & Development permit.
- (4) Major modification of any hazardous waste permit.
- (5) Modification of an on-site hazardous waste facility permit for a fifty percent (50%) or greater increase in permitted capacity for storage, treatment, and/or disposal, including incineration.
- (6) Modification of an on-site hazardous waste facility permit for an expansion of permitted boundaries.
- (7) Modification of on-site hazardous waste facility permit in which the application is for methods, units or appurtenances that are different from those permitted.
- (8) Renewal of a hazardous waste treatment, storage or disposal permit.
- (9) Hazardous waste transfer station plan approval.
- (10) Hazardous waste transfer station plan modification involving increase in approved capacity.
- (11) Variance which is not part of a permit application.
- (12) Variance which is part of a Tier II permit application.
- (13) New, modified or renewed general permit.

1
2 The following hazardous waste management authorizations
3 require Tier III applications.

4 (1) Off-site hazardous waste treatment, storage, disposal
5 and/or recycling permit.

6 (2) Modification of an off-site hazardous waste facility
7 permit for a fifty percent (50%) or greater increase in
8 permitted capacity for storage, treatment, and/or disposal,
9 including incineration.

10 (3) Modification of an off-site hazardous waste facility
11 permit for an expansion of permitted boundaries.

12 (4) Modification of off-site hazardous waste facility permit
13 in which the application is for methods, units or
14 appurtenances that are different from those permitted.

15 (5) Variance which is part of a Tier III application.

DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 010. UNIFORM ENVIRONMENTAL PERMITTING
SUBCHAPTER 71. SOLID WASTE MANAGEMENT

PART 1. APPLICATION CLASSIFICATIONS AND GENERAL PROVISIONS

252:010-71-1. Tier I solid waste management applications

The following solid waste management authorizations require Tier I applications.

- (1) Processing facility permit for the composting of yard waste only.
- (2) Emergency authorization for waste disposal resulting from a natural disaster.
- (3) Permit for a solid waste transfer station that, prior to application filing, received county commissioner approval according to 27A O.S. Supp 1995, §2-10-307.
- (4) Biomedical waste transfer station permit when activities are limited to the following:
 - (A) consolidation of sealed containers, and/or
 - (B) transfer of sealed containers from one vehicle or mode of transportation to another.
- (5) Modification of a solid waste permit to add methods, units or appurtenances for liquid bulking processes; yard waste composting; recycling operations; waste screening; or baling, chipping, shredding, grinding equipment and/or operations.
- (6) Modification of any solid waste permit involving a request for less than twenty-five percent (25%) increase in permitted capacity for storage, processing or disposal (including incineration) when the request is for equivalent methods, units or appurtenances as those permitted.
- (7) Modification to any solid waste permit to make minor changes that are not subject to Tier II or Tier III processes.
- (8) Modification of plans for closure and/or post-closure.
- (9) Nonhazardous industrial solid waste disposal plan approval, renewal or amendment.
- (10) County solid waste management plan approval.
- (11) Technical plan approval.
- (12) Permit transfer approval.
- (13) All other administrative approvals required by OAC 252:510 or OAC 252:520.
- (14) New, modified or renewed authorization under a general permit.
- (15) Administrative modification of all permits and other authorizations.

252:010-71-2. Tier II solid waste management applications

The following solid waste management authorizations require Tier II applications.

- (1) Permit for a solid waste processing facility except yard waste composting as listed under Tier I.
- (2) Permit for a solid waste transfer station except:
 - (A) a transfer station permit with county commissioner approval as listed under Tier I, or
 - (B) a biomedical waste transfer station permit listed under Tier I.
- (3) Permit for an on-site incinerator.
- (4) Permit for an on-site solid waste land disposal site.
- (5) Permit for a Material Recovery Facility (MRF) if waste is not source-separated.
- (6) Modification of any on-site solid waste permit except as listed under Tier I.

- 1 (7) Modification of an off-site (Tier III) solid waste
- 2 permit involving a request for more than twenty five percent
- 3 (25%) but less than fifty percent (50%) increase in permitted
- 4- capacity for storage, processing or disposal (including
- 5 - incineration) when the request is for equivalent methods,
- 6 - units or appurtenances as those permitted, except those listed
- 7 under Tier I, Rule 252:010-71-1(5).
- 8 (8) Modification of a permit for a change in waste type.
- 9 (9) New, modified or renewed general permit.

10
11 **252:010-71-3. Tier III solid waste management applications**

12 The following solid waste management authorizations require
13 Tier III applications.

- 14 (1) Permit for an off-site processing facility, unless
 - 15 otherwise specified in Tier I, Rule 252:010-71-1, or Tier II,
 - 16 Rule 252:010-71-2.
 - 17 (2) Permit for an off-site solid waste land disposal site.
 - 18 (3) Permit for an off-site incinerator.
 - 19 (4) Modification of any off-site solid waste permit involving
 - 20 a fifty percent (50%) or greater increase in permitted
 - 21 capacity for storage, processing, and/or disposal, including
 - 22 incineration.
 - 23 (5) Modification of an off-site solid waste land disposal
 - 24 permit for an expansion of permitted boundaries.
 - 25 (6) Modification of an off-site solid waste permit in which
 - 26 the request involves different methods, units or appurtenances
 - 27 than those permitted, except those listed under Tier I Rule
 - 28 252:010-71-1(5).
 - 29 (7) Variance.

CHAPTER 010. UNIFORM ENVIRONMENTAL PERMITTING
SUBCHAPTER 81. UNDERGROUND INJECTION CONTROL

PART 1. APPLICATION CLASSIFICATIONS AND GENERAL PROVISIONS

252:010-81-1. Tier I underground injection control applications

The following underground injection control authorizations require Tier I applications.

- (1) Minor modification of a permit for Class I, III, and V wells in accordance with 40 CFR §144.41 (1994).
- (2) Modification of an approved closure and/or post-closure plan for a Class I hazardous waste injection well.
- (3) Modification of an approved plugging and abandonment plan for Class I nonhazardous and Class III injection wells.
- (4) Modification of an approved corrective action plan for a Class I injection well.
- (5) Emergency permit in accordance with 40 CFR §144.34.
- (6) New, modified or renewed authorization under a general permit.
- (7) Minor administrative modification of all permits and other authorizations.

252:010-81-2. Tier II underground injection control applications

The following underground injection control authorizations require Tier II applications.

- (1) On-site Class I nonhazardous waste injection well permit.
- (2) Class III and V injection well permits except Class V permits issued under Tier III.
- (3) Modification and/or renewal of all DEQ-issued underground injection control well permits.
- (4) New, modified or renewed general permits.

252:010-81-3. Tier III underground injection control applications

The following underground injection control authorizations require Tier III applications.

- (1) Class I hazardous waste injection well permit.
- (2) Off-site Class I nonhazardous waste injection well permit.
- (3) Class V industrial waste injection well permit.

CHAPTER 010. UNIFORM ENVIRONMENTAL PERMITTING
SUBCHAPTER 91. WATER QUALITY

PART 1. APPLICATION CLASSIFICATIONS AND GENERAL PROVISIONS

252:010-91-1. Tier I water quality application

The following water quality authorizations require Tier I applications.

- (1) Permit for flow-through impoundment(s) as part of the pretreatment process.
- (2) Re-permitting of facility with an expiring permit for industrial non-discharging impoundment or septic tank system.
- (3) Re-permitting of expiring permit with minor or no change(s) for land application of sludge and/or wastewater for same site.
- (4) New, modified or renewed authorization under a general permit.
- (5) Approval of new pretreatment program.
- (6) Closure plan approval.
- (7) Dredge and fill certification.
- (8) Approval of exemption for water line extensions.
- (9) Approval of exemption for water distribution and wastewater collection systems.
- (10) Approval for individual residential sewage disposal system.
- (11) Approval of small public sewage system with less than 5,000 gallons per day which do not discharge, land apply wastewater or sludge, or have lift stations designed to handle a peak capacity greater than 10 gallons per minute.
- (12) Individual water well construction certification.
- (13) Residential development plan or plat approval.
- (14) Transfer of discharge permit.
- (15) Minor modification of discharge permit.
- (16) Minor modification of permit for land application of sludge and/or wastewater.
- (17) Modification of or addition to a municipal wastewater treatment system (including sewer line extensions).
- (18) Modification of or addition to a public water supply treatment and/or distribution system.
- (19) Modification of non-discharging impoundment and/or septic tank system permit.
- (20) Modification of an approved pretreatment program.
- (21) Administrative amendment of permits or other authorizations.

3 applications.

- 4- (1) Permit for municipal wastewater treatment system.
- 5- (2) Permit for public water supply system.
- 6- (3) Discharge permit for minor facility.
- 7 (4) Individual storm water permit.
- 8 (5) Permit for industrial non-discharging impoundment or
- 9 septic tank system.
- 10 (6) Permit for land application of sludge and/or wastewater
- 11 at new site.
- 12 (7) Re-permitting of a facility with expiring discharge
- 13 permit.
- 14 (8) Re-permitting of facility with expiring individual storm
- 15 water discharge permit.
- 16 (9) Re-permitting with major change(s) from expiring permit
- 17 for land application of sludge and/or wastewater for the same
- 18 site.
- 19 (10) Variance including thermal components of effluent
- 20 limitations for an individual discharge permit.
- 21 (11) New, modified and renewed general permits.
- 22 (12) Major modification of discharge permit.
- 23 (13) Major modification of permit for land application of
- 24 sludge and/or wastewater.

25
26 **252:010-91-3. Tier III water quality application**

27 A new discharge permit for a major facility requires a Tier
28 III application.

Council Members Absent

Larry Canter, Vice-Chairman

Guests Present

(see attached list)

PUBLIC MEETING

Notice of Public Meeting was forwarded to the Secretary of State's Office giving the time, date, and place of the meeting. Agendas were posted at the entrance door of the meeting room at the Lincoln Plaza location, and the entrance to the Air Quality Division offices.

Call to Order - Mr. Breisch called the meeting to order and roll was taken: Mr. Branecky - aye; Dr. Canter - absent; Mr. Fishback - aye; Ms. Hinkle - aye; Ms. Slagell - aye; Mayor Taron - aye; Mr. Albright - aye; Mr. Glass - aye; Mr. Breisch - aye.

Approval of Minutes - Mr. Breisch entertained a motion to approve the Minutes of the June 20, 1995 Meeting/Hearing. Mr. Branecky questioned page two, the election of vice-chairman. Subject to that correction being made to the June 20, 1995 Minutes, Mr. Albright moved to accept the June 20, 1995 Minutes. Mr. Glass made a second to the motion. Roll call as follows: Mr. Branecky - aye; Mr. Fishback - aye; Ms. Hinkle - aye; Ms. Slagell - abstain; Mayor Taron - aye; Mr. Albright - aye; Mr. Glass - aye; Mr. Breisch - aye.

PUBLIC HEARING
OAC 252:100-8 OPERATING PERMITS (PART 70)

As protocol officer, Larry Byrum convened the hearing and called Mr. Scott Thomas, staff representative.

Mr. Thomas: This hearing is a continuation of the hearing of June 20, 1995 in Tulsa, Oklahoma. The purpose of the proposed rule revisions are phased submittal of Title V Permit Applications and to correct deficiencies with Oklahoma's Title V Program. The EPA required these changes in the March 10, 1995 *Federal Register*. Following interim approval, EPA will allow eighteen months for corrections to be made to the rule for the purpose of obtaining final approval of the Title V Program.

Mr. Thomas entered into the record the written comments from EPA, the oil and gas industry, the aerospace industry, and Tinker Air Force Base. Commenters supported the proposal to allow for three-year phased submittal of a Title V permit application based on the source's SIC code. One commenter asked why refinery applications were delayed for twenty eight months. Mr. Thomas replied that refineries are complex sources. The additional time would allow for a more comprehensive review by staff, and in a better permit.

The proposed language of OAC 252:100-8-5, pages ten and eleven, would be consistent with EPA's source category limited approval. Additional time would allow for staff training and facilitating industry's preparation of comprehensive, accurate permit applications. The staff recommended these changes for adoption as a Permanent and Emergency rule.

Numerous comments were received on other revisions not related to OAC 252:100-8-5. Comments included nonaggregation of sources contained in the definition of 'major source' and what constitutes insignificant or trivial activity. Commenters had concern about revisions addressing the permit content providing for standing, judicial review, and administrative amendment procedures. Mr. Thomas responded that EPA final interim approval and recommendation is pending, therefore, for the State to take action at this time may not be appropriate. Postponing these rule revisions to a later date will allow Oklahoma's final approval to be consistent with other states and EPA guidance documents.

Deborah Perry, EnerCon: When a Title V permit for a source is not due for 28 months, will the source have until then to apply for a minor source permit.

Dr. Sheedy: At this time it is my understanding that they do.

Nick Hollinshed, ERM Southwest: Would one have to apply for a synthetic minor permit prior to the due date for that SIC code?

Mr. Thomas: That is the staff's understanding.

Merle Fritz, Sinclair Oil: Does the Council have a position on the recently issued EPA White Paper for the Title V permit?

Mr. Fishback: No position by Council has been taken.

Jole Luehrs, EPA, commented at the request of Mr. Byrum: Part 70 states that Oklahoma can receive interim approval with the caveat that if there were minor changes needed the State would have eighteen (18) months to correct those deficiencies and get full approval. This a very good program and EPA feels final approval can be issued sometime in 1996. During the interim time, permits issued are 'good permits and will not have to be recalled when final approval is received. Changes to permits can be made at renewal. There is a provision in Part 70 that insignificant activities at a source should not be part of the permit. The EPA has not come out with a definitive list of insignificant activities because the list is still being developed by states and EPA. The insignificant activities list is not part of the regulations, but an administrative-type list. The EPA knows during the transition period this list will increase and decrease as information is learned about activities that should be on the list.

Mr. Byrum: The staff recommends approval of the phased submittal portion of OAC 252:100-8-5 for Permanent and Emergency rulemaking.

Mr. Fishback made a motion to adopt OAC 252:100-5-8 as a Permanent and Emergency rule. Mr. Branecky seconded the motion. Roll call was as follows: Mr. Branecky - aye; Mr. Fishback - aye; Ms. Hinkle - aye; Ms. Slagell - aye; Mayor Taron - aye; Mr. Albright - aye; Mr. Glass - aye; Mr. Breisch - aye.

This concluded the Hearing portion of the meeting.

OAC 252:100-010 UNIFORM PERMITTING

Mr. Breisch requested that Ms. York's handout describing the rule changes be made a part of the Minutes record (Attached).

Kay York, DEQ staff attorney: These rules will appear in a new subchapter, Chapter 002 Prodecures of the Department of Environmental Quality, subchapter 15 Uniform Permitting Procedures. Examples were given of the types of sources specific to each of the three Tiers. For the first time grandfathered sources subject to Title V will be required to apply for a Title V operating permits. Title V sources with current permits will require Title V operating permits and currently permitted sources that are modified will require a construction permit prior to the modification and an operating permit for start-up after the modification. New sources will require both a new construction permit and an operating permit.

Mr. Fishback: It would be helpful to the regulated community to provide examples within the rule language.

Mr. Byrum: A guidance document would be added to the rule rather than incorporated into the rule.

Susie King, Conoco: Conoco feels it is a workable, more streamlined approach, but it comes at a difficult time in conjunction with the Title V process.

Mr. Fishback: The process of uniform permitting would create additional paperwork, additional forms, creating delays in the process or inadvertent delays of other requirements at the source. In the absence of these things, no problems were foreseen. The affect on air permits may be very small.

Dennis Doughty, AQD staff attorney: Under the present system, all of the Title V permits would be in Tier 3. And after the adoption of the tier system, the Title V operating permits will change to Tier 2. Our current rules state any Title V operating permit would be subject to a trial-type hearing at the administrative level. This is going to move all of these down one Tier. There would be less public review under the Tier system. Tier 2 complies with the basic federal requirements for all permitting and Tier 1 will be the smaller, administrative-type decisions.

Chairman Breisch continued the hearing until the October 17, 1995 meeting.

Ms. York: The Council will have its first hearing regarding the supplemental rules that affect Air Quality and have the opportunity to comment on the uniform permitting rules at the October meeting.

New Business - None.

Adjournment - Chairman Breisch adjourned the meeting with a unanimous vote. The next regular meeting will be held Tuesday, October 17, 1995 at the Tulsa City-County Health Department Auditorium.

William B. Breisch, Chairman
Air Quality Council

Larry D. Byrum, Director
Air Quality Division

AGENDA
DEPARTMENT OF ENVIRONMENTAL QUALITY
REGULAR MEETING
AIR QUALITY COUNCIL

A Public Meeting: TUESDAY, OCTOBER 17, 1995
1:00 P.M.

TULSA CITY-COUNTY HEALTH DEPARTMENT
4616 EAST 15TH STREET
TULSA, OK

HEARING/MEETING

1. Call to Order Chairman
2. Roll Call Secretary
3. Approval of Minutes / August 15, 1995 Chairman
4. Public Hearing Staff
OAC 252:010 Uniform Environmental Permitting {New Chapter}
Tier Classifications of Permit Applications
Discussion by Council/Public
Action by Council
5. Public Hearing Staff
OAC 252:100-7 Permits {AMENDED
OAC 252:100-8 Operating Permits (Part 70)
OAC 252:100-11 Alternative Emissions Reductions
Permits {AMENDED}
OAC 252:100-6 {NEW}
Discussion by Council/Public
Action by Council
6. New Business Chairman
Discussion/consideration of subjects/business
arising within the past 24 hours.
7. Adjournment Chairman
Next Regular Meeting - December 19, 1995
Lincoln Plaza Office Complex
4545 N. Lincoln Blvd.
Oklahoma City, OK 73105-3483

Should you desire to attend but have a disability and need an accommodation,
please notify our Department three days in advance at (405) 271-5220.

October 4, 1995

MEMORANDUM

TO: Air Quality Council

FROM: Larry D. Byrum, Director *LDB*
AIR QUALITY DIVISION

SUBJECT: UNIFORM PERMITTING RULES

Please note that rulemaking on the agenda for the Council's October 17, 1995 meeting involves our implementation of the Oklahoma Uniform Environmental Permitting Act.

Proposed rules **OAC 252:002-15-40, 41, and 42 -- Air Permitting Tier Classifications** -- are scheduled for final rulemaking hearing and action by the Air Quality Council on October 17, 1995. The Council held informal discussion and initial hearing on these rules on August 15, 1995.

Proposed air pollution control rules **OAC 252:100, Subchapter 6 - Permitting; OAC 252:100 Subchapter 7 - Construction Permits for Major and Minor Sources; OAC 252:100 Subchapter 8 - Operating Permits (Part 70); and OAC 252:100 Subchapter 11 - Alternate Emission Reduction** are scheduled for their first rulemaking hearing and discussion before the Council on October 17, 1995.

Attached are briefing papers and proposed rules.

**AIR QUALITY COUNCIL BRIEFING ON RULEMAKING
 PROPOSED PERMITTING RULES - AIR QUALITY TIER CLASSIFICATIONS
 OAC 252:002-15-40, 41 & 42**

Proposed action	Approval and recommendation of [NEW] air quality tier classifications.
Purpose	Implements in part Uniform Permitting Program for Air Quality.
Type/Effective Date	Permanent - effective July 1, 1996 after legislative review.
Comparison to Federal Regulations	Corresponding Air Quality federal regulations exist. However, these proposed tier classifications, as authorized by 27A O.S.Supp. 1995. § 101 <u>et seq.</u> are not more stringent. Therefore, no Economic Impact/Environmental Benefit Statement is required.
Notice of Rulemaking	Published in OK Register on August 1, 1995.
Public Comment Period	Began August 7. A comment summary/response will be presented at mtg.
Council Hearing (Date) (Procedure)	1. 8/15/95. AQ Council held informal discussion and hearing. 2. 10/18/95. Final rulemaking hearing and action by AQ Council.
Council Action (Options) Recommendation Form (Attached)	After hearing and final discussion, the Council may by roll call vote: 1. Approve and recommend the rule change (as proposed or as amended) to the Board as a permanent rule. [Takes minimum of 5 ayes.] 2. Or agree to continue the hearing and/or remand the proposed rule to the DEQ for further study and/or development. [NOTE: Would take a special meeting to be held on or before Wednesday, November 15, 1995.]
Other Considerations	Tier rule amendments made in response to comments received to date are shown by double underline and highlighted strikeover.
Before Board	Scheduled for Tuesday, November 28, 1995, in Muskogee.

002/15/95

CHAPTER 002. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY
SUBCHAPTER 15. UNIFORM PERMITTING PROCEDURES

*PART 1. UNIFORM PERMITTING PROGRAM IN GENERAL

- 252:002-15-1. Purpose and scope [AMENDED]
- 252:002-15-2. Definitions [AMENDED]

*PART 3. TIER I, II AND III PROCESS REQUIREMENTS

- 252:002-15-26. Tier processes described [NEW]
 - 252:002-15-27. Application classifications in general [NEW]
 - 252:002-15-28. Permit decision-making authority [NEW]
- NOTE: 8/1/95: RULEMAKING NOTICE PUBLISHED (EMERGENCY & PERMANENT). 9/6/95: HEARING HELD & COMMENT PERIOD CLOSED. 9/26/95: BOARD CONSIDERS ADOPTION.
- 252:002-15-29. Published notice content and verification [NEW]
 - 252:002-15-30. Tier I process requirements [NEW]
 - 252:002-15-31. Tier II process requirements [NEW]
 - 252:002-15-32. Tier III process requirements [NEW]

PART 5. TIER CLASSIFICATIONS

NOTE: 8/1/95: RULEMAKING NOTICE PUBLISHED. COMMENT PERIODS/HEARINGS BEFORE COUNCILS - NOW THROUGH NOV. (DATES VARY PER COUNCIL). 11/28/95: BOARD CONSIDERS ADOPTION.

- 252:002-15-40. Air quality applications - Tier I [AMENDS 8/1/95 DRAFT]
- 252:002-15-41. Air quality applications - Tier II [AMENDS 8/1/95 DRAFT]
- 252:002-15-42. Air quality applications - Tier III [AMENDS 8/1/95 DRAFT]
- 252:002-15-43. Hazardous waste applications - Tier I
- 252:002-15-44. Hazardous waste applications - Tier II
- 252:002-15-45. Hazardous waste applications - Tier III
- 252:002-15-46. Laboratory certification applications - Tier I
- 252:002-15-47. Laboratory certification applications - Tier II
- 252:002-15-48. Laboratory certification applications - Tier III
- 252:002-15-49. Operator certification applications - Tier I
- 252:002-15-50. Operator certification applications - Tier II
- 252:002-15-51. Operator certification applications - Tier III
- 252:002-15-52. Radiation management applications - Tier I
- 252:002-15-53. Radiation management applications - Tier II
- 252:002-15-54. Radiation management applications - Tier III
- 252:002-15-55. Solid waste applications - Tier I [AMENDS 8/1/95 DRAFT]
- 252:002-15-56. Solid waste applications - Tier II
- 252:002-15-57. Solid waste applications - Tier III
- 252:002-15-58. UIC applications - Tier I
- 252:002-15-59. UIC applications - Tier II
- 252:002-15-60. UIC applications - Tier III
- 252:002-15-61. Water quality applications - Tier I
- 252:002-15-62. Water quality applications - Tier II
- 252:002-15-63. Water quality applications - Tier III

*PART 7. REVIEW PROCEDURES AND PERMITTING TIME LINES

- 252:002-15-70. Common review procedures and time lines [AMENDED]
- 252:002-15-71. Pending failures [AMENDED]
- 252:002-15-72. Air quality time lines [AMENDED]
- 252:002-15-73. Hazardous waste time lines [AMENDED]
- 252:002-15-74. Solid waste time lines [AMENDED]
- 252:002-15-75. Water quality time lines [AMENDED]
- 252:002-15-76. Other permits [NO CHANGE]

*PART 9. CONSOLIDATED PERMITTING

- 252:002-15-90. Consolidation of permitting processes [NEW]

*9/15/95: RULEMAKING NOTICE PUBLISHED. 9/15 - 10-16/95: PUBLIC COMMENT PERIOD.
10/11/95: HEARING (10:00 A.M., OSDH, RM. 806); 1/96: BOARD/ADOPTION.

PART 1. UNIFORM PERMITTING PROGRAM (GENERAL)

252:002-15-1. Purpose and scope

252:002-15-2. Definitions

252:002-15-1. Purpose and scope

(a) Purpose. ~~The rules in this Subchapter establish time periods for issuance or denial of environmental permits and licenses that are required by law~~ implement the Oklahoma Uniform Environmental Permitting Act, 27A O.S. Supp. 1995, §2-14-101 et seq. and apply to applicants for and holders of DEQ permits and other authorizations.

(b) Supersedes inconsistent rules. Except as otherwise provided by statute, the provisions of this Subchapter shall supersede any inconsistent provision of other Chapters of this Title.

252:002-15-2. Definitions

~~The~~ In addition to terms defined in 252:002-1-2, the following words and terms, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Act" means the Oklahoma Uniform Environmental Permitting Act.

"Administratively complete" means an application that contains the information specified in the application form and rules in sufficient detail to allow the DEQ to begin technical review.

"Application" means a document prepared in accordance with the rules and the forms and instruction provided by the respective Program and submitted with the expectation of providing that information necessary for review and determination of the permit. The application consists of the initial submittal and all supplements.

"Major facility", as used in air quality tier classifications, means a source subject to Title V permitting requirements.

"Major modification", as used in hazardous waste tier classifications, is one which meets the criteria as a Class III permit modification as defined in 40 CFR § 270.42.

"Minor modification", as used in hazardous waste tier classifications for treatment, storage, disposal and/or recycling facility permits is one which meets the criteria as a Class I permit modification as defined in 40 CFR § 270.42.

"Minor source", as used in air quality tier classifications, means a source that is not subject to Title V permitting requirements.

"Off-site", as used in hazardous waste and solid waste tier classifications, means a facility which receives waste from various sources for treatment, processing, or disposal.

"On-site", as used in hazardous waste and solid waste tier classifications, means a facility owned and operated by an industry for the treatment, processing, or disposal of its own waste exclusively.

"Part" means a numbered Part of this Subchapter.

"Program" means the sections or divisions of the DEQ.

"Submittal" means each separately submitted document or document package that forms a part of an application.

"Supplement" means a response to a request for additional information following completeness and technical reviews, and information submitted voluntarily by the applicant.

"UIC" means underground injection control.

252:002-15-3. Common permitting procedures and timelines

Amended and renumbered to OAC 252:002-15-70.

1 252:002-15-4. Pen. ng failures
2 Amended and renumbered to OAC 252:002-15-71.

3
4 252:002-15-5. Air quality permit timelines
5 Amended and renumbered to OAC 252:002-15-72.

6
7 252:002-15-6. Hazardous waste permit timelines
8 Amended and renumbered to OAC 252:002-15-73.

9
10 252:002-15-7. Solid waste permit timelines
11 Amended and renumbered to OAC 252:002-15-74

12
13 252:002-15-8. Water quality permit timelines
14 Amended and renumbered to OAC 252:002-15-75.

15
16 252:002-15-9. Other permits
17 Amended and renumbered to OAC 252:002-15-76.

18
19
20 **PART 3. TIER I, II AND III PROCESS REQUIREMENTS**

21
22 Section

- 23 252:002-15-26. Tier processes described
24 252:002-15-27. Application classifications in general
25 252:002-15-28. Permit decision-making authority
26 252:002-15-29. Published notice content and verification
27 252:002-15-30. Tier I process requirements
28 252:002-15-31. Tier II process requirements
29 252:002-15-32. Tier III process requirements

30
31
32 **252:002-15-26. Tier processes described**

33 To implement the three-tiered permitting processes of the Act,
34 applications for permits and other authorizations are classified in
35 Part 5 as Tier I, II or III. The steps an applicant must follow
36 for a Tier I, II or III application are shown in Table 15A.
37

TABLE 15A
Permitting Process Summary

Steps	Tier I	Tier II	Tier III
Filing - Applicant files application and pays any required fee. Applicant may meet with the DEQ prior to this.	Yes	Yes	Yes
Notice of filing - Applicant publishes notice in one newspaper local to site.	No	Yes	Yes
Notice of opportunity for process meeting - Applicant includes this 30-day opportunity in published notice of filing. Meeting on permitting process held by DEQ upon request and sufficient interest shown.	No	No	Yes
Administrative completeness review - DEQ reviews application; requests applicant to cure identified administrative deficiencies.	Yes	Yes	Yes
Technical review - DEQ reviews application for technical completeness; requests applicant to cure identified deficiencies.	Yes	Yes	Yes
Draft permit or draft denial - DEQ prepares this after completing review.	No	Yes	Yes
Notice of draft permit, public comment period and public meeting request opportunity - Applicant publishes this in one newspaper local to site. (DEQ publishes notice of draft denial.)	No	Yes	Yes
Public comment period - 45 days for hazardous waste treatment, storage or disposal draft permits; 30 days for all others.	No	Yes	Yes
Public meeting - Conducted by DEQ if held	No	Yes	Yes
Review of comments received - DEQ	No	Yes	Yes
Proposed permit - DEQ prepares this from draft permit in response to comments	No	No	Yes
Notice of proposed permit - Applicant publishes, in one newspaper local to site, notice of 20-day opportunity to review permit and request administrative hearing.	No	No	Yes
Administrative permit hearing - Conducted by DEQ if held. Culminates in final order.	No	No	Yes
Issuance or denial - DEQ's final decision	Yes	Yes	Yes

1 **252:002-15-27. Unclassified applications**

2 The tier designation for any type of application not classified
3 in this Subchapter shall be determined according to the criteria of
4 Section 201 of the Act.

5
6 **252:002-15-28. Permit decision-making authority**

7 (a) **Designated positions.** The Executive Director may delegate in
8 writing the power and duty to issue, renew, amend, modify and deny
9 permits and take other authorization or registration action.
10 Unless delegated to a Division Director by formal assignment or
11 rule, the authority to act on Tier I applications shall be
12 delegated to positions within each permitting program having
13 technical supervisory responsibilities and, for local actions
14 authorized by law, to environmental specialist positions held by
15 DEQ's local services representatives. The authority to act on
16 emergency permits and Tier II applications shall be delegated to
17 the Division Director of the applicable permitting division.

18 (b) **Revision.** The Executive Director may amend any delegation in
19 writing.

20
21 **252:002-15-29. Published notice content and verification**

22 (a) **Notice content.** In addition to content requirements of the
23 Act, all published notice(s) shall contain the:

- 24 (1) Name and address of the applicant;
- 25 (2) Name and address or legal description of the site, facility
26 and/or activity;
- 27 (3) Purpose of notice;
- 28 (4) Type of permit or permit action being sought;
- 29 (5) Description of activities to be regulated;
- 0 (6) Locations where the application may be reviewed;
- 1 (7) Names, addresses and telephone numbers of contact persons
32 for the DEQ and for the applicant;
- 33 (8) Description of public participation opportunities and time
34 period for comment and requests;
- 35 (9) Any other information required by DEQ rules; and
- 36 (10) Any information the applicant deems relevant.

37 (b) **Notice publication verification.** An applicant, within ten
38 (10) days of the date of publication, shall provide the DEQ with a
39 written affidavit of publication for each notice published. In
40 case of a mistake in a published notice, the DEQ may approve the
41 publication of a notice of correction or may require that the
42 entire notice be re-published.

1 252:002-15-30. Tier I process requirements

2 (a) Pre-application conference. Prior to filing an application,
3 an applicant may request a conference with the DEQ.

4 (b) Application filing, fee payment, and application withdrawal.
5 Two (2) copies of a Tier I application shall be filed with the DEQ
6 except when the DEQ application form or instructions specifies that
7 only one (1) copy is needed. Applicants for permits for
8 residential systems (OAC 252:640) and small public sewage systems
9 (OAC 252:655-29) shall file their two copies with the local DEQ
10 office for the county in which the real property is located. A
11 nonrefundable fee as established in program-specific rules of the
12 Board shall be payable at the time of application. An applicant
13 may withdraw an application at any time with written notice to the
14 DEQ and forfeiture of fees.

15 (c) Application review. All applications shall be subject to the
16 laws and rules of the DEQ as they exist on the date of filing and
17 afterward as changed up to the date of issuance or denial. See
18 Part 7 for review procedures and time lines.

19 (d) Issuance or denial.

20 (1) Compliance required. A new, modified or renewed permit or
21 other authorization shall not be issued until the DEQ has
22 determined the application is in substantial compliance with
23 applicable requirements of the Code and rules of the Board.

24 (2) Conditions for issuance. The Department may not issue a
25 new, modified or renewed permit or other authorization if:

26 (A) The applicant has not paid all monies owed to the DEQ
27 and/or is not in substantial compliance with the Code, rules
28 of the Board and the terms of any existing DEQ permits and
29 orders. The DEQ may impose special conditions on the
30 applicant to assure compliance and/or a separate schedule
31 which the DEQ has determined is necessary to achieve required
32 compliance; or

33 (B) Material facts were misrepresented or omitted from the
34 application and the applicant knew or should have known of
35 such misrepresentation or omission.

36 (3) Authority to issue. See 252:002-15-28.
37
38

1 252:002-15-31. Tier II process requirements

2 (a) Pre-application conference. See "Tier I" at 252:002-15-30.

3 (b) Filing, fees, withdrawal. See "Tier I" at 252:002-15-30,
4 except instead of two (2) copies, the applicant shall file three
5 (3) copies of the application with the DEQ and place one (1) copy
6 for public review in the county in which the site, facility or
7 activity is located.

8 (c) Published notice of filing. See Section 301 of the Act and
9 252:002-15-29.

10 (d) Application review. See "Tier I" at 252:002-15-30.

11 (e) Draft permit or draft denial. See Section 302 of the Act.

12 (f) Notice of draft permit/denial. See Section 302 of the Act and
13 252:002-15-29. For permit modification actions, only those issues
14 relevant to the modification(s) shall be reopened for public review
15 and comment.

16 (1) Exception to notice requirement. Applicants for solid
17 waste transfer station permits shall be exempt from public
18 comment and public meeting requirements if the board of county
19 commissioners of the county of the proposed site, after
20 opportunity for written or oral public comment, has found the
21 application to be within the scope of the county's solid waste
22 management plan. See 27A O.S. Supp. 1995, §2-19-307.

23 (2) Additional notice. In addition to Section 302 notice:

24 (A) Applicants for an NPDES, RCRA or UIC permit shall be
25 subject to applicable provisions of 40 CFR Part 124.

26 (B) Applicants for a proposed wastewater discharge or
27 emissions permit which respectively may affect the water
28 quality or air quality of a neighboring state must give
29 notice to that state.

30 (C) Applicants for a solid waste landfill permit shall
31 provide notice by certified mail, return receipt requested,
32 to owners of mineral interests and to adjacent landowners
33 whose property may be substantially affected by
34 installation of a landfill site. See DuLaney v. OSDH,
35 Okl., 868 P2d 676 (1993).

36 (g) Public comment and formal public meeting. See Sections 302
37 and 303 of the Act. The DEQ shall determine the location of any
38 formal public meeting to be held and the designated presiding
39 officer shall establish its procedures.

40 (h) Response to comments. See Section 304 of the Act.

41 (i) Issuance or denial. See "Tier I" at 252:002-15-30.
42

1 252:002-15-32. Tier III process requirements

- 2 (a) Pre-application conference. See "Tier I" at 252:002-15-30.
3 (b) Filing, fees and withdrawal. See "Tier II" at 252:002-15-31.
4 (c) Notice of filing and process meeting opportunity. The
5 applicant shall include a 30-day opportunity to request a process
6 meeting in the published notice of filing. See Section 301(B) of
7 the Act and 252:002-15-29.
8 (d) Process meeting. See Section 301(B) of the Act. The location
9 of and procedures for the process meeting shall be determined by
10 the DEQ.
11 (e) Application review. See "Tier I" at 252:002-15-30.
12 (f) Draft permit or draft denial. See Section 302 of the Act.
13 (g) Notice of draft permit/denial. See "Tier II" at 252:002-15-
14 31.
15 (h) Public comment period and public meeting. See "Tier II" at
16 252:002-15-31.
17 (i) Proposed permit and notice. After the DEQ reviews public
18 comments and prepares a proposed permit by amending the draft
19 permit in response to comments as necessary, the applicant shall
20 publish notice of the proposed permit and of the opportunity to
21 request an administrative permit hearing. See Section 405 of the
22 Act and 252:002-15-29.
23 (j) Administrative permit hearing. See Section 304 of the Act
24 and, for procedures, Subchapter 13 of this Chapter.
25 (k) Response to comments. See Section 304 of the Act.
26 (l) Issuance or denial. See "Tier I" at 252:002-15-30.

- 252:002-15-55. Solid waste applications: Tier I
- 252:002-15-56. Solid waste applications: Tier II
- 252:002-15-57. Solid waste applications: Tier III
- 252:002-15-58. UIC applications: Tier I
- 252:002-15-59. UIC applications: Tier II
- 252:002-15-60. UIC applications: Tier III
- 252:002-15-61. Water quality applications: Tier I
- 252:002-15-62. Water quality applications: Tier II
- 252:002-15-63. Water quality applications: Tier III

252:002-15-40. Air quality applications - Tier I

The following air quality authorizations require Tier I applications:

- (1) Construction permit for a minor source.
- (2) Operating permit for a minor source.
- (3) Operating permit for a major facility, issued after a construction permit, which does not differ from the construction permit in any manner which would otherwise subject the operating permit application to public review.
- (4) New, modified or renewed authorization under a general permit.
- (5) Modification of a minor source's construction and/or operating permit when the source remains a minor source after the modification.
- (6) Minor modification of a major facility's construction and/or operating permit.
- (7) ~~Applicability determinations~~ Acid rain permits.
- (8) Emergency burn approval.
- (9) Asbestos renovation/demolition approval.
- (10) Relocation permit.
- (11) Temporary permit.
- (12) Plant-wide emission plan approval.
- (13) Administrative amendment of all permits and other authorizations.
- (14) Extension of a minor source's construction permit.
- (15) Extension of a major facility's construction permit with no or minor modification.
- (16) Renewal of an operating permit for a minor source.

1 252:002-15-41. Air quality applications - Tier II

2 The following air quality authorizations require Tier II
3 applications.

4 (1) Operating permit for a major facility or commercial
5 incinerator, issued after a construction permit, which differs
6 from the construction permit in a manner which subjects the
7 operating permit application to public review.

8 (2) Operating permit for a major facility that does not have a
9 construction permit.

10 (3) Significant modification of a major facility's construction
11 or operating permit.

12 (4) New, modified or renewed general permit.

13 (5) Extension of a major facility's construction permit with
14 significant modification.

15 (6) Renewal of an operating permit for a major facility.

16 (7) Major modification of a construction or operating
17 incinerator permit for a commercial incinerator.

18
19 252:002-15-42. Air quality applications - Tier III

20 A construction permit for a new or existing major facility or
21 commercial incinerator requires a Tier III application.

22
23 252:002-15-43. Hazardous waste management applications - Tier I

24 The following hazardous waste management authorizations require
25 Tier I applications.

26 (1) Minor modification of any hazardous waste permit.

27 (2) Modification to a recycling permit in accordance with 27A
28 O.S. Supp. 1994, §2-7-118(A).

29 (3) Class II permit modification as defined in 40 CFR §270.42.

30 (4) Emergency hazardous waste disposal plan approval.

31 (5) Hazardous waste generator disposal plan approval.

32 (6) Technical plan approval.

33 (7) Hazardous waste transporter license.

34 (8) Hazardous waste transfer station plan modification which is
35 not related to capacity.

36 (9) Emergency permit issued in accordance with 40 CFR § 270.61.

37 (10) Interim status closure plan approval in accordance with 40
38 CFR §265.113(d)(4).

39 (11) Minor administrative modification of all permits and other
40 authorizations.

41 (12) Renewal of disposal plan approval and transporter license.

42 (13) New, modified or renewed authorization under a general
43 permit.

44
45 252:002-15-44. Hazardous waste management applications - Tier II

46 The following hazardous waste management authorizations require
47 Tier II applications.

48 (1) On-site hazardous waste treatment, storage or disposal
49 permit.

50 (2) Mobile recycling permit.

51 (3) Research & Development permit.

52 (4) Major modification of any hazardous waste permit.

53 (5) Modification of an on-site hazardous waste facility permit
54 for a fifty percent (50%) or greater increase in permitted
55 capacity for storage, treatment, and/or disposal, including
56 incineration.

57 (6) Modification of an on-site hazardous waste facility permit
58 for an expansion of permitted boundaries.

59

- (7) Modification of on-site hazardous waste facility permit in which the application is for methods, units or appurtenances that are different from those permitted.
- (8) Renewal of a hazardous waste treatment, storage or disposal permit.
- (9) Hazardous waste transfer station plan approval.
- (10) Hazardous waste transfer station plan modification involving increase in approved capacity.
- (11) Variance which is not part of a permit application.
- (12) Variance which is part of a Tier II permit application.
- (13) New, modified or renewed general permit.

252:002-15-45. Hazardous waste management applications - Tier III

The following hazardous waste management authorizations require Tier III applications.

- (1) Off-site hazardous waste treatment, storage, disposal and/or recycling permit.
- (2) Modification of an off-site hazardous waste facility permit for a fifty percent (50%) or greater increase in permitted capacity for storage, treatment, and/or disposal, including incineration.
- (3) Modification of an off-site hazardous waste facility permit for an expansion of permitted boundaries.
- (4) Modification of off-site hazardous waste facility permit in which the application is for methods, units or appurtenances that are different from those permitted.
- (5) Variance which is part of a Tier III application.

252:002-15-46. Laboratory certification applications - Tier I

A Tier I application shall be required for a new, modified, amended or renewed laboratory certification.

252:002-15-47. Laboratory certification applications - Tier II

None

252:002-15-48. Laboratory certification applications - Tier III

None

252:002-15-49. Operator certification applications - Tier I

The following authorizations require Tier I applications.

- (1) Waterworks operator certification (standard and temporary).
- (2) Wastewater works operator certification (standard and temporary).
- (3) Waterworks laboratory operator certification.
- (4) Wastewater works laboratory operation certification.
- (5) Septic tank installer certification.
- (6) Septic tank cleaner license.
- (7) Landfill operator and/or manager certification.
- (8) Waterworks helper registration.
- (9) Wastewater works helper registration.
- (10) Amendments, modifications and renewals of all authorizations.

252:002-15-50. Operator certification applications - Tier II

None.

252:002-15-51. Operator certification applications - Tier III

None.

1 252:002-15-52. Radiation management applications - Tier I

2 The following radiation management authorizations require Tier
3 I applications.

- 4 (1) Industrial X-ray registration and the amendment,
5 modification and/or renewal thereof.
6 (2) X-ray fluorescence spectroscopy instrument license and the
7 amendment, modification and/or renewal thereof.
8

9 252:002-15-53. Radiation management applications - Tier II

10 None.

11
12 252:002-15-54. Radiation management applications - Tier III

13 None.
14

15 252:002-15-55. Solid waste management applications - Tier I

16 The following solid waste management authorizations require Tier
17 I applications.

- 18 (1) ~~Processing facility permit~~ Plan approval for the composting
19 of yard waste only.
20 (2) Emergency authorization for waste disposal resulting from
21 a natural disaster.
22 (3) Permit for a solid waste transfer station that, prior to
23 application filing, received county commissioner approval
24 according to 27A O.S. Supp 1995, §2-10-307.
25 (4) Biomedical waste transfer station permit when activities
26 are limited to the following:
27 (A) consolidation of sealed containers, and/or
28 (B) transfer of sealed containers from one vehicle or mode
29 of transportation to another.
30 (5) Modification of a solid waste permit to add methods, units
31 or appurtenances for liquid bulking processes; yard waste
32 composting; recycling operations; waste screening; or baling,
33 chipping, shredding, grinding equipment and/or operations.
34 (6) Excluding applications for expansion of existing permitted
35 boundaries, the modification of any solid waste permit involving
36 a request for less than twenty-five percent (25%) increase in
37 permitted capacity for storage, processing or disposal
38 (including incineration) when the request is for equivalent
39 methods, units or appurtenances as those permitted.
40 (7) Modification to any solid waste permit to make minor
41 changes that are not subject to Tier II or Tier III processes.
42 (8) Modification of plans for closure and/or post-closure.
43 (9) Nonhazardous industrial solid waste disposal plan approval,
44 renewal or amendment.
45 (10) County solid waste management plan approval.
46 (11) Technical plan approval.
47 (12) Permit transfer approval.
48 (13) All other administrative approvals required by OAC 252:510
49 or OAC 252:520.
50 (14) New, modified or renewed authorization under a general
51 permit.
52 (15) Administrative modification of all permits and other
53 authorizations.
54 (16) ~~Modification for a lateral expansion under of an existing~~
55 permit for a lateral expansion within permitted boundaries.
56
57

1 **252:002-15-56. Solid waste management applications - Tier II**

2 The following solid waste management authorizations require Tier
3 II applications.

- 4 (1) Permit for a solid waste processing facility except yard
5 waste composting as listed under Tier I.
6 (2) Permit for a solid waste transfer station except:
7 (A) a transfer station permit with county commissioner
8 approval as listed under Tier I, or
9 (B) a biomedical waste transfer station permit listed
10 under Tier I.
11 (3) Permit for an on-site incinerator except those exempt under
12 OAC 252:520.
13 (4) Permit for an on-site solid waste land disposal site.
14 (5) Permit for a Material Recovery Facility (MRF) if waste is
15 not source-separated.
16 (6) Modification of any on-site solid waste permit except as
17 listed under Tier I.
18 (7) Modification of any off-site (Tier III) solid waste permit
19 involving a request for more than twenty-five percent (25%) but
20 less than fifty percent (50%) increase in permitted capacity for
21 storage, processing or disposal (including incineration) when
22 the request is for equivalent methods, units or appurtenances as
23 those permitted, except those listed under Tier I, Rule 252:002-
24 15-55(5).
25 (8) Modification of a permit for a change in waste type.
26 (9) New, modified or renewed general permit.

27
28 **252:002-15-57. Solid waste management applications - Tier III**

29 The following solid waste management authorizations require Tier
30 III applications.

- 31 (1) Permit for an off-site processing facility, unless
32 otherwise specified in Tier I, Rule 252:002-15-55, or Tier II,
33 Rule 252:002-15-56.
34 (2) Permit for an off-site solid waste land disposal site.
35 (3) Permit for an off-site incinerator.
36 (4) Modification of any off-site solid waste permit involving
37 a fifty percent (50%) or greater increase in permitted capacity
38 for storage, processing, and/or disposal, including
39 incineration.
40 (5) Modification of an off-site solid waste land disposal
41 permit for an expansion of permitted boundaries.
42 (6) Modification of an off-site solid waste permit in which the
43 request involves different methods, units or appurtenances than
44 those permitted, except those listed under Tier I, Rule 252:002-
45 15-55(5).
46 (7) Variance.

47
48 **252:002-15-58. UIC applications-Tier I**

49 The following underground injection control authorizations
50 require Tier I applications.

- 51 (1) Minor modification of a permit for Class I, III, and V
52 wells in accordance with 40 CFR §144.41 (1994).
53 (2) Modification of an approved closure and/or post-closure
54 plan for a Class I hazardous waste injection well.
55 (3) Modification of an approved plugging and abandonment plan
for Class I nonhazardous and Class III injection wells.
56 (4) Modification of an approved corrective action plan for a
57 Class I injection well.
58
59

- 1 (5) Emergency permit in accordance with 40 CFR §144.34.
- 2 (6) New, modified or renewed authorization under a general
- 3 permit.
- 4 (7) Minor administrative modification of all permits and other
- 5 authorizations.
- 6

7 **252:002-15-59. UIC applications - Tier II**

8 The following underground injection control authorizations
9 require Tier II applications.

- 10 (1) On-site Class I nonhazardous waste injection well permit.
- 11 (2) Class III and V injection well permits except Class V
- 12 permits issued under Tier III.
- 13 (3) Modification and/or renewal of all DEQ-issued underground
- 14 injection control well permits.
- 15 (4) New, modified or renewed general permits.
- 16

17 **252:002-15-60. UIC applications - Tier III**

18 The following underground injection control authorizations
19 require Tier III applications.

- 20 (1) Class I hazardous waste injection well permit.
- 21 (2) Off-site Class I nonhazardous waste injection well permit.
- 22 (3) Class V industrial waste injection well permit.
- 23

24 **252:002-15-61. Water quality applications - Tier I**

25 The following water quality authorizations require Tier I
26 applications.

- 27 (1) Permit for flow-through impoundment(s) as part of the
- 28 pretreatment process.
- 29 (2) Re-permitting of facility with an expiring permit for
- 30 industrial non-discharging impoundment or septic tank system.
- 31 (3) Re-permitting of expiring permit with minor or no
- 32 change(s) for land application of sludge and/or wastewater for
- 33 same site.
- 34 (4) New, modified or renewed authorization under a general
- 35 permit.
- 36 (5) Approval of new pretreatment program.
- 37 (6) Closure plan approval.
- 38 (7) Dredge and fill certification.
- 39 (8) Approval of exemption for water line extensions.
- 40 (9) Approval of exemption for water distribution and wastewater
- 41 collection systems.
- 42 (10) Approval for individual residential sewage disposal system.
- 43 (11) Approval of small public sewage system:
- 44 (A) with less than 5,000 gallons per day which do not
- 45 discharge, land apply wastewater or sludge, or have lift
- 46 stations designed to handle a peak capacity greater than 10
- 47 gallons per minute; or
- 48 (B) which serves less than ten (10) residential units.
- 49 (12) Individual water well construction certification.
- 50 (13) Residential development approval.
- 51 (14) Transfer of discharge permit.
- 52 (15) Minor modification of discharge permit.
- 53 (16) Minor modification of permit for land application of sludge
- 54 and/or wastewater.
- 55

- 1 (17) Modification of or addition to a municipal wastewater
- 2 treatment system (including sewer line extensions).
- 3 (18) Modification of or addition to a public water supply
- 4 treatment and/or distribution system.
- 5 (19) Modification of non-discharging impoundment and/or septic
- 6 tank system permit.
- 7 (20) Modification of an approved pretreatment program.
- 8 (21) Administrative amendment of permits or other
- 9 authorizations.

10
11 **252:002-15-62. Water quality applications - Tier II**

12 The following water quality authorizations require Tier II

13 applications.

- 14 (1) Permit for municipal wastewater treatment system.
- 15 (2) Permit for public water supply system.
- 16 (3) Discharge permit for minor facility.
- 17 (4) Individual storm water permit.
- 18 (5) Permit for industrial non-discharging impoundment or septic
- 19 tank system.
- 20 (6) Permit for land application of sludge and/or wastewater at
- 21 new site.
- 22 (7) Re-permitting of a facility with expiring discharge permit.
- 23 (8) Re-permitting of facility with expiring individual storm
- 24 water discharge permit.
- 25 (9) Re-permitting with major change(s) from expiring permit for
- 26 land application of sludge and/or wastewater for the same site.
- 27 (10) Variance including thermal components of effluent
- 28 limitations for an individual discharge permit.
- 29 (11) New, modified and renewed general permits.
- 30 (12) Major modification of discharge permit.
- 31 (13) Major modification of permit for land application of sludge
- 32 and/or wastewater.

33
34 **252:002-15-63. Water quality applications - Tier III**

35 A new discharge permit for a major facility requires a Tier III

36 application.

PART 7. REVIEW PROCEDURES AND PERMITTING TIME LINES

Section

- 252:002-15-70. Common review procedures and time lines
- 252:002-15-71. Pending failures
- 252:002-15-72. Air quality time lines
- 252:002-15-73. Hazardous waste time lines
- 252:002-15-74. Solid waste time lines
- 252:002-15-75. Water quality time lines
- 252:002-15-76. Other permits

252:002-15-70. Common review procedures and time lines

(a) ~~Filing Receipt~~ of applications. Unless otherwise provided in this Subchapter, upon the receipt of an application for filing and the proper fee, each Program shall:

- (1) ~~file stamp~~ File-stamp the application with the date of receipt, the Division and/or Program name and an identification number;
- (2) ~~assign~~ Assign the application to a named person who will do the review; and
- (3) ~~timely~~ Timely log this information.

(b) **Administrative completeness review.** Unless otherwise provided in the Code or this Subchapter, the reviewer shall have 60 calendar days from the logged date of filing in which to initially determine if the application is administratively complete.

(1) **Not complete.**

(A) Upon determining that the application is not ~~administratively complete~~, the reviewer shall immediately notify the applicant by mail, describing with reasonable specificity the inadequacies and measures necessary to complete the application.

(B) This notice shall not require or preclude further review of the application and further requests for specific information.

(C) If the reviewer does not notify the applicant of such inadequacies, the period for technical review shall begin at the close of the administrative completeness review period.

(2) **Complete.** Upon a determination that the application is administratively complete, the reviewer shall log the date and immediately notify the applicant by mail. The period for technical review begins.

(c) **Technical review.** Using the procedures described in subsection (b) (1) (A) and (B) of this section, Each each Program involved shall have a certain time period to review each application for technical compliance with the relevant regulations and reach a final determination.

(d) **When times are tolled.** The time period for review is tolled (the clock stops) during litigation, during periods of public review and participation [includes public meetings and administrative permit hearings (and waiting periods therefor), public comment periods, time required for DEQ preparation of responses to public comments received, and review by other federal or State agencies], or when the Program has asked for supplemental information and advised the applicant that the time period is tolled pending receipt, or during the time in which an applicant amends his application of his own accord.

1 **252:002-15-72. Air quality permit time lines**

2 The following air quality permits and authorizations shall be
3 technically reviewed and issued or denied within the time frames
4 specified below.

5 (1) Construction permits:

6 (A) PSD (Title V) - 540 days.

7 (B) Major Sources (Title V other than PSD) - 365 days.

8 (C) Minor Sources - 180 days.

9 ~~(2) Operating permits for new construction or modifications~~
10 ~~minor sources - 365 days.~~

11 (A) Major Sources - 540 days.

12 (B) Minor Sources - 365 days.

13 (3) Relocation permits - 30 days.

14
15 **252:002:15-73. Hazardous waste permit time lines**

16 The following hazardous waste permits and authorizations shall
17 be technically reviewed and issued or denied within the time frames
18 specified below.

19 (1) Hazardous waste permits:

20 (A) New RCRA Operations permit or the renewal thereof - 300
21 days.

22 (B) New State Recycling permit - 300 days.

23 (C) ~~New State Construction permit - 300 days.~~

24 ~~(D) Class 3 permit modifications - 300 days.~~

25 ~~(E) Underground Injection Control permit - 300 days.~~

26 (2) ~~Class 1 and Class 2 permit modifications - 300 days.~~

27 ~~(3) Closure plans, post-closure plans and transfer station~~
28 ~~plans and plan modifications - 300 days.~~

29
30 **252:002:15-74. Solid waste permit time lines**

31 Times for issuance or denial of applications for all solid waste
32 permits shall be in accordance with applicable chapters of Solid
33 Waste Regulations, OAC 252:520 et seq., Municipal Solid Waste
34 Landfill Rules, OAC 252:510 et seq., or if not specified therein,
35 the technical review period for solid waste permit applications and
36 for each submittal and resubmittal related thereto shall be 90
37 days, subject to OAC 252:002:15-7-70.

38
39 **252:002:15-75. Water quality permit time lines**

40 Applications for water quality permits, certifications and
41 authorizations shall be technically reviewed and permits shall be
42 issued or denied within the following time frames:

43 (1) ~~Dairy Waste - 180 days~~

44 ~~(2) Discharges - 180 days.~~

45 ~~(3) (2) 401 Certifications - 180 days.~~

46 ~~(4) (3) Industrial Wastewater other than discharge - 180 days.~~

47 ~~(5) (4) Pretreatment Trust Users - 180 days.~~

48 ~~(6) (5) Public Water Supply - 90 days.~~

49 ~~(7) Septage and Septic Tank Cleaners - 120 days.~~

50 ~~(8) (6) Underground Injection Control - 420-300 days.~~

51 ~~(8) (7) Water Pollution Control Construction - 90 days.~~

52 (8) Sludge management plan - 180 days.

53
54 **252:002:15-76. Other permits**

55 Any environmental license or permit that is not described in this
56 Subchapter shall not be subject to these time frames but shall be
57 reviewed with all due and reasonable speed.

PL 9. CONSOLIDATED PERMITT. ;

Section
252:002-15-90.

252:002-15-90. Consolidation of permitting process

(a) Discretionary. Whenever an applicant applies for more than one permit for the same site, the DEQ may require the review of the applications to be consolidated so that each required draft permit, draft denial and/or proposed permit is prepared at the same time and public participation opportunities are combined.

(b) Scope. When consolidation is required by the DEQ:

(1) The procedural requirements for the highest specified tier shall apply to each affected application.

(2) The DEQ may also require the consolidation of public comment periods, process and public meetings, and/or administrative permit hearings.

(3) Final permits may be issued together.

(c) Renewal. The DEQ may coordinate the expiration dates of new permits issued to an applicant for the same facility or activity so that all the permits are of the same duration.

(d) Multiple major modifications. Subsection (a) of this section shall also apply to multiple applications for major modifications.

.....

OTHER PROPOSED AMENDMENTS TO 252:002

SUBCHAPTER 13. ADMINISTRATIVE PERMIT PROCEEDINGS

252:002-13-1. Formal public meetings

~~(a) Location. The DEQ shall determine the location and the facility at which a formal public meeting on a permit application and/or draft permit shall be held.~~

~~(b) Purpose. The designated presiding officer of a formal public meeting shall establish the procedure by which such meeting shall be conducted based on the requirements of the Code and applicable program specific rules.~~

Amended and renumbered to 252:002-15-31(g).

**AIR QUALITY TIER CLASSIFICATIONS
AMENDMENTS FROM 10/17/95 AQ COUNCIL MEETING.**

***252:002-15-40. Air quality applications - Tier I**

The following air quality authorizations require Tier I applications:

- (1) Construction permit for a minor source.
- (2) Operating permit for a minor source.
- (3) Operating permit for a major facility, issued after a construction permit, which does not differ from the construction permit in any manner which would otherwise subject the operating permit application to public review.
- (4) New, modified or renewed authorization under a general permit.
- (5) Modification of a minor source's construction and/or operating permit when the source remains a minor source after the modification.
- (6) Minor modification of a major facility's construction and/or operating permit.
- (7) ~~Applicability determinations~~ Acid rain permits.
- (8) ~~Emergency burn~~ Burn approval.
- (9) ~~Asbestos renovation/demolition approval~~
- ~~(10)~~ Relocation permit.
- ~~(11)~~ (10) Temporary permit.
- ~~(12)~~ (11) Plant-wide emission plan approval.
- ~~(13)~~ (12) Administrative amendment of all permits and other authorizations.
- ~~(14)~~ (13) Extension of a minor source's construction permit.
- ~~(15)~~ (14) Extension of a major facility's construction permit with no or minor modification.
- ~~(16)~~ (15) Renewal of an operating permit for a minor source.

***252:002-15-41. Air quality applications - Tier II**

The following air quality authorizations require Tier II applications.

- (1) Operating permit for a major facility ~~or commercial incinerator~~, issued after a construction permit, which differs from the construction permit in a manner which subjects the operating permit application to public review.
- (2) Operating permit for a major facility that does not have a construction permit.
- (3) Significant modification, as defined in OAC 252:100-8-7(e)(2) of a major facility's construction or operating permit.
- (4) New, modified or renewed general permit.
- (5) ~~Extension~~ Time extension of a major facility's construction permit with a significant modification that would otherwise be subject to public review.
- (6) Renewal of an operating permit for a major facility.
- (7) ~~Major modification of a construction or operating incinerator permit for a commercial incinerator.~~ A construction permit for an existing major facility.

****252:002-15-42. Air quality applications - Tier III**

A construction permit for a new ~~or existing~~ major facility ~~or commercial incinerator~~ requires a Tier III application.

*Tiers I and II amendments approved by roll call vote.

**Tier III amendments pending.

AIR QUALITY TIER CLASSIFICATIONS
AMENDMENTS FROM 10/17/95 AQ COUNCIL MEETING.

***252:002-15-40. Air quality applications - Tier I**

The following air quality authorizations require Tier I applications:

- (1) Construction permit for a minor source.
- (2) Operating permit for a minor source.
- (3) Operating permit for a major facility, issued after a construction permit, which does not differ from the construction permit in any manner which would otherwise subject the operating permit application to public review.
- (4) New, modified or renewed authorization under a general permit.
- (5) Modification of a minor source's construction and/or operating permit when the source remains a minor source after the modification.
- (6) Minor modification of a major facility's construction and/or operating permit.
- (7) ~~Applicability determinations~~ Acid rain permits.
- (8) ~~Emergency burn~~ Burn approval.
- (9) ~~Asbestos renovation/demolition approval~~
- ~~(10)~~ Relocation permit.
- ~~(11)~~ (10) Temporary permit.
- ~~(12)~~ (11) Plant-wide emission plan approval.
- ~~(13)~~ (12) Administrative amendment of all permits and other authorizations.
- ~~(14)~~ (13) Extension of a minor source's construction permit.
- ~~(15)~~ (14) Extension of a major facility's construction permit with no or minor modification.
- ~~(16)~~ (15) Renewal of an operating permit for a minor source.

***252:002-15-41. Air quality applications - Tier II**

The following air quality authorizations require Tier II applications.

- (1) Operating permit for a major facility ~~or commercial incinerator~~, issued after a construction permit, which differs from the construction permit in a manner which subjects the operating permit application to public review.
- (2) Operating permit for a major facility that does not have a construction permit.
- (3) Significant modification, as defined in OAC 252:100-8-7(e)(2) of a major facility's construction or operating permit.
- (4) New, modified or renewed general permit.
- (5) ~~Extension~~ Time extension of a major facility's construction permit with a significant modification that would otherwise be subject to public review.
- (6) Renewal of an operating permit for a major facility.
- (7) ~~Major modification of a construction or operating incinerator permit for a commercial incinerator~~ A construction permit for an existing major facility.

****252:002-15-42. Air quality applications - Tier III**

A construction permit for a new ~~or existing~~ major facility ~~or commercial incinerator~~ requires a Tier III application.

*Tiers I and II amendments approved by roll call vote.

**Tier III amendments pending

PUBLIC MEETING

Notice of Public Meeting for October 17, 1995 was forwarded to the Secretary of State's Office giving the time, date, and place of the meeting. Agendas were posted at the entrance door of the meeting room at the Tulsa City-County Health Department location.

Call to Order - Mr. Breisch called the October 17 meeting to order and roll was taken: Mr. Branecky - aye; Dr. Canter - absent; Mr. Fishback - aye; Ms. Hinkle - aye; Ms. Slagell - absent; Mayor Taron - aye; Mr. Albright - absent; Mr. Glass - aye; Mr. Breisch - aye.

Approval of Minutes - Mr. Breisch entertained a motion to approve the Minutes of the August 15, 1995 Meeting/Hearing. Mr. Branecky made motion to approve with a second to the motion made by Mr. Glass. Roll call as follows: Mayor Taron - aye; Mr. Branecky - aye; Ms. Hinkle - aye; Mr. Fishback - aye; Mr. Breisch - aye; Mr. Glass had stepped out.

PUBLIC HEARING

OAC 252:010 UNIFORM ENVIRONMENTAL PERMITTING (NEW CHAPTER) TIER CLASSIFICATIONS OF PERMIT APPLICATIONS

Larry Byrum convened the hearing as protocol officer. Ms. Kay York, DEQ Staff Attorney, made statement that the purpose of the Tier Classifications for Air Quality was to be a part of the permitting program implementation that was authorized during the past year by the Oklahoma Uniform Environmental Permitting Act. Ms. York presented rules OAC 252:002-15-40 "Air Quality Applications Tier 1"; OAC 252:002-15-41 "Air Quality Applications Tier II", and OAC 252:002-15-42 "Air Quality Applications Tier III".

Numerous discussions concerning the proposed tier rules were held by the Council, staff, and public. A detailed transcript of these discussions, including motions and roll call votes of the Council are included as ATTACHMENT A of the minutes.

Mr. Breisch then entertained a motion to continue this hearing to a date agreed upon by Council.

Mr. Branecky moved that the meeting be continued to Monday, November 13, 1995 in Oklahoma City at a location to be determined.

With no further discussion on the motion, Mr. Breisch continued the hearing to 9:30 a.m. at Lincoln Plaza Office Complex, 4545 N. Lincoln Boulevard, Oklahoma City on November 13, 1995. Mr. Fishback made the second.

Roll Call as follows: Mayor Taron - aye; Mr. Branecky - aye; Mr. Fishback - aye; Mr. Glass - aye; Mr. Breisch - aye.

Discussions were also held to continue the hearing scheduled for revisions to subchapters 7, 8, 11 and 6 to the November meeting.

CONTINUED HEARING NOVEMBER 13, 1995

Hearing held on October 17, 1995 in Tulsa, Oklahoma was reconvened in Oklahoma City, Oklahoma on November 13, 1995 in the Brown Room of the Lincoln Plaza Office Complex, 4545 N. Lincoln Boulevard. Council members present were Mr. Bill Breisch, Mr. David Branecky, Mr. Bill Fishback, Ms. Kathryn Hinkle, Ms. Meribeth Slagell, Dr. Larry Canter, Mayor Pierre Taron. Members absent were Mr. Ike Glass and Mr. George Albright.

Continuing as protocol officer, Mr. Byrum stated that at the last meeting, Council had recommendations to the Environmental Quality Board on Tier I and Tier II along with extensive discussion on Tier III. Numerous discussions concerning the Tier III classifications were held by the Council, staff, and public. A transcript of these proceedings is included as ATTACHMENT B to these minutes.

Mr. Breisch entertained a motion for revision of the Tier rules with everything else remaining as previously discussed. Mayor Taron made the motion with second by Mr. Fishback to recommend the revised language. A copy of the motion is included as ATTACHMENT C of these Minutes.

With no further discussion, roll call vote was taken as follows: Mr. Branecky - aye; Dr. Canter - aye; Mr. Fishback - aye; Ms. Hinkle - aye; Ms. Slagell - aye; Mayor Taron - aye; Mr. Breisch - aye.

HEARING - OAC 252:100-7, 8- 11- 6

As protocol officer, Mr. Byrum convened hearing on OAC252:100-7 Permits; OAC252:100-8 Operating Permits, part 70; OAC 252:100-11 Alternative Emissions Reductions; and OAC 252:100-6 NEW and called upon Ms. Kay York to give the staff recommendations. Ms. York reiterated discussions had in Tulsa at the October meeting and accepted comments. A transcript of these proceedings is continued in ATTACHMENT D of these Minutes.

With discussion by Council and public Mr. Breisch advised that the hearing for all these rules will be continued to the December 19 meeting with comment period being extended to December 11, 1995.

NEW BUSINESS: Mr. Byrum made note of the fact that the Meeting schedule for 1996 is due to the Secretary of State and proposed possible dates to be voted on by Council in next meeting.

ADJOURNMENT: Mr. Breisch adjourned meeting announcing that the next meeting would be held at the Lincoln Plaza Office Complex, 4545 N. Lincoln Boulevard, Oklahoma City, with briefing beginning at 9:30 a.m. and Hearing at 1:00 p.m.

AIR QUALITY COUNCIL

LARRY D. BYRUM, DIRECTOR
AIR QUALITY DIVISION

****252:002-15-42. Air quality applications - Tier III**

A construction permit for a new Major Stationary Source, as defined below, requires a Tier III application. "Major stationary source" means any source which meets any of the following conditions:

(A) Any of the following sources of air pollutants which emits, or has the potential to emit, 100 tons per year or more of any pollutant subject to regulation:

- (i) carbon black plants (furnace process.)
- (ii) charcoal production plants,
- (iii) chemical process plants,
- (iv) coal cleaning plants (with thermal dryers),
- (v) coke oven batteries,
- (vi) fossil-fuel boilers (or combustion thereof), totaling more than 250 million BTU per hour heat input,
- (vii) fossil fuel-fired steam electric plants of more than 250 million BTU per hour heat input,
- (viii) fuel conversion plants,
- (ix) glass fiber processing plants,
- (x) hydrofluoric, sulfuric or nitric acid plants,
- (xi) iron and steel mill plants,
- (xii) kraft pulp mills,
- (xiii) lime plants,
- (xiv) incinerators, except where used exclusively as air pollution control devices,
- (xv) petroleum refineries,
- (xvi) petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels,
- (xvii) phosphate rock processing plant,
- (xviii) portland cement plants,
- (xix) primary aluminum ore reduction plants,
- (xx) primary copper smelters,
- (xxi) primary lead smelters,
- (xxii) primary zinc smelters,
- (xxiii) secondary metal production plants,
- (xxiv) sintering plants,
- (xxv) sulfur recovery plants, or
- (xxvi) taconite ore processing plants.

(B) Any other source not on the list in (A) of this definition which emits, or has the potential to emit, 250 tons per year or more of any pollutant subject to regulation.

(C) Any change in emissions, or potential to emit, or any change in any permit condition, that would have caused an incinerator to be defined as a Major Stationary Source when originally permitted.

(D) "Potential to emit" in 252:002-15-42 means emissions resulting from the application of all enforceable permit limitations as defined in 252:100-1-3.

CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY
SUBCHAPTER 15. UNIFORM PERMITTING PROCEDURES

PART 5. TIER CLASSIFICATIONS

252:2-15-40. Air quality applications - Tier I

~~The following air quality authorizations require Tier I applications:~~

- ~~(1) Construction permit for a minor source.~~
- ~~(2) Operating permit for a minor source~~
- ~~(3) Operating permit for a major facility, issued after a construction permit, which does not differ from the construction permit in any manner which would otherwise subject the operating permit application to public review.~~
- ~~(4) New, modified or renewed authorization under a general permit.~~
- ~~(5) Modification of a minor source's construction and/or operating permit when the source remains a minor source after the modification.~~
- ~~(6) Minor modification of a major facility's construction and/or operating permit.~~
- ~~(7) Acid rain permits.~~
- ~~(8) Burn approval.~~
- ~~(9) Relocation permit.~~
- ~~(10) Temporary permit.~~
- ~~(11) Plant wide emission plan approval.~~
- ~~(12) Administrative amendment of all permits and other authorizations.~~
- ~~(13) Extension of a minor source's construction permit.~~
- ~~(14) Extension of a major facility's construction permit with no or minor modification.~~
- ~~(15) Renewal of an operating permit for a minor source.~~

(a) Minor source permits. The following air quality authorizations for minor sources require Tier I applications.

(1) New permits. New construction, operating and relocation permits.

(2) Modifications of permits.

(A) Modification of a construction permit for a minor source that will remain minor after the modification.

(B) Modification of an operating permit that will not change the source's classification from minor to major.

(C) Extension of expiration date of a construction permit.

(3) Renewals. Renewals of operating permits.

(b) Major facility permits. The following air quality authorizations for major facilities require Tier I applications.

(1) New permits.

(A) New construction permit for an existing major facility for any facility change considered minor under 252:100-8-7(e)(1).

(B) New operating permit that:

(i) is based on a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) has conditions which do not differ from the construction permit's operating conditions in any way considered significant under 252:100-8-7(e) (2) (A).

(2) Modifications of permits.

(A) Modification of any operating permit condition that:
(i) is based on the operating conditions of a construction permit that was processed under Tier II or III, and 252:100-8-8, and
(ii) does not differ from those construction permit conditions in any way considered significant under 252:100-8-7(e) (2) (A).

(B) A construction or operating permit modification that is minor under 252:100-8-7(e) (1) (A).

(C) Extension of expiration date of a major facility's construction permit with no or minor modifications.

(c) Other authorizations. The following air quality authorizations require Tier I applications.

(1) New, modified and renewed individual authorizations under general operating permits for which a schedule of compliance is not required by 252:100-8-5(d) (8) (C) (iii).

(2) Burn approvals.

(3) Plant-wide emission plan approval under 252:100-37-25(b) or 252:100-39-46(j).

(4) Administrative amendments of all air quality permits and other authorizations.

(5) Alternative emissions reduction authorizations. [Also subject to state implementation plan revision procedures in see 252:100-11.]

252:2-15-41. Air quality applications - Tier II

~~The following air quality authorizations require Tier II applications.~~

~~(1) Operating permit for a major facility, issued after a construction permit, which differs from the construction permit in a manner which subjects the operating permit application to public review.~~

~~(2) Operating permit for a major facility that does not have a construction permit.~~

~~(3) Significant modification, as defined in OAC 252:100-8-7(e) (2), of a major facility's construction or operating permit.~~

~~(4) New, modified or renewed general permit.~~

~~(5) Time extension of a major facility's construction permit with a modification that would otherwise be subject to public review.~~

~~(6) Renewal of an operating permit for a major facility.~~

~~(7) A construction permit for a new major facility or a major modification to an existing major facility.~~

(a) Minor source permit actions. Any minor source seeking a permit for a facility modification that when completed would turn it into a major facility is required to apply under subsection (b) of this section.

(b) Major facility permits. The following air quality authorizations for major facilities require Tier II applications.

(1) New permits.

(A) New construction permit for a new major facility not classified under Tier III.

(B) New construction permit for an existing major facility for any facility change considered significant under 252:100-8-7(e) (2) (A) and which is not classified under Tier III.

(C) New operating permit for a major facility that did not have an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(D) New operating permit with one or more conditions that differ from the underlying Tier II or III construction permit's operating conditions in a way considered significant under 252:100-8-7(e) (2) (A).

(E) New acid rain permit that is independent of a Title V permit application.

(F) New temporary source permit under 252:100-8-6(e).

(2) Modifications of permits.

(A) Significant modification, as described in 252:100-8-7(e) (2) (A), of an operating permit that is not based on an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(B) Modification of an operating permit when the conditions proposed for modification differ from the underlying construction permit's operating conditions in a way considered significant under 252:100-8-7(e) (2) (A).

(C) A construction permit modification considered significant under 252:100-8-7(e) (2) (A) and which is not classified under Tier III.

(3) Renewals. Renewals of operating permits.

(c) Other authorizations. The following air quality authorizations require Tier II applications.

(1) New, modified and renewed general operating permits.

(2) Individual authorizations under any general operating permit for which a schedule of compliance is required by 252:100-8-5(d) (8) (C) (iii).

PUBLIC MEETING

Notice of Public Meeting for October 21, 1997 was forwarded to the Office of the Secretary of State giving the time, date, and place of the meeting. Agendas were posted at the entrance door of the meeting room.

Call to Order - Mr. Breisch, Chairman, called the meeting to order and roll call was taken as follows: Mr. Fishback - aye; Ms. Slagell - aye; Mr. Kilpatrick - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Breisch - aye. Ms. Andrews and Dr. Canter were absent.

Approval of Minutes - Mr. Breisch entertained a motion to approve the Minutes of the October 21, 1997 Public Meeting/Hearing. Motion was made by Mr. Branecky to approve the Minutes and second to the motion was made by Ms. Myers. Roll call as follows: Mr. Fishback - aye; Ms. Slagell - abstain; Mr. Kilpatrick - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Breisch - aye.

Meeting Schedule - Mr. Breisch entertained motion to approve the 1998 Meeting Schedule as proposed. Ms. Myers made the motion with the second being made by Mr. Kilpatrick. Roll call as follows: Mr. Fishback - aye; Ms. Slagell - aye; Mr. Kilpatrick - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Breisch - aye. (Note: Dates proposed were February 18, April 21, June 16, August 18, October 20, December 15).

After discussion and comments from Council and audience, Mr. Breisch entertained motion to continue the hearing to the December 16 Air Quality Council meeting to be voted on along with SC 8 and SC 5. Ms. Slagell made that motion and second was by Mr. Kilpatrick. Roll call as follows: Mr. Fishback - aye; Ms. Slagell - aye; Mr. Kilpatrick - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Breisch - aye.

PUBLIC HEARING

OAC 252:100-8 OPERATING PERMITS (PART 70) [AMENDED]

As protocol officer, Larry Byrum convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes. Mr. Byrum called upon Dr. Joyce Sheedy to give staff position on the proposed rule.

Dr. Sheedy stated that it was staff's objective to correct deficiencies listed in the approval of the interim Title V Program to incorporate case-by-case MACT requirements; to incorporate permit continuum; as well as to clarify, simplify, and streamline the rule. Dr. Sheedy advised that staff recommendation was that the hearing on the revisions be continued to Council's December 16 meeting.

Mr. Byrum opened the floor for discussion and comments. Ms. Barton complimented staff on the monumental task accomplished making these changes.

Mr. Breisch entertained motion to continue this item to the next meeting on December 16 and that the comment period would remain open. Ms. Myers made this motion with second being made by Mr. Branecky. Roll call as follows: Mr. Fishback - aye; Ms. Slagell - aye; Mr. Kilpatrick - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Breisch - aye.

PUBLIC HEARING

OAC 252:10041-15 CONTROL OF EMISSIONS OF HAZARDOUS AND TOXIC AIR CONTAMMANTS PART 3: HAZARDOUS AIR CONTAMINANTS -15 NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS [AMENDED]

As protocol officer, Mr. Byrum convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 Code of Federal Regulations (CFR) Part 51, and Title 27A Oklahoma Statutes. Mr. Byrum called upon Dr. Joyce Sheedy to give staff recommendations.

Dr. Sheedy pointed out that the hearing on the proposed revisions to 252:100-41-15 was continued from the August 19, 1997 AQC meeting. She noted that revisions were made based on comments received. Dr. Sheedy outlined proposed changes to 252:100-41-15(a) as follows:

NEW BUSINESS - Mr. Byrum advised that a fax had been received from EnerCon Services dealing with a problem anticipated by those who worked on the Aerospace/ARACT rules. In the fax, EnerCon pointed out that at that time EPA had rules under NESHAP provision which could be in conflict with the State rules. He added that now industry petitioned to revisit these rules so that industry is not covered by two different rules that say two different things. Mr. Byrum suggested that a committee be formed with four people from the aerospace industry and four staff to handle most of the items administratively; then to bring any changes to the Council. He also pointed out that no action was required from Council at this time.

Nadine Barton recognized Mr. Byrum's years of service saying 'good luck'.

ADJOURNMENT: With no further business, meeting was adjourned with next meeting being held on December 16, 1997 at the Lincoln Plaza Office Park Burgundy Room, 4545 North Lincoln Boulevard, Oklahoma City, Oklahoma.

NOTE: The sign-in sheet and the hearing records are attached as an official part of these Minutes.

December 2, 1997

MEMORANDUM

TO: Air Quality Council

FROM: David Dyke, Assistant Director
Air Quality Division *DD*

SUBJECT: Modifications to Chapter 2

Enclosed is a copy of the proposed modifications to Chapter 2, Procedures of the Department of Environmental Quality, Subchapter 15, Uniform Permitting Procedures, which will be brought to public hearing on December 16, 1997. The rules proposed for revision are OAC 252:2-15-40, Air Quality applications - Tier I, and OAC 252:2-15-41, Air Quality applications - Tier II. This rulemaking arises from EPA requirements for the Title V permitting program. At EPA's request, Title V acid rain permits, temporary permits, and general permit authorizations required to have compliance schedules under OAC 252:100-8 are reclassified from Tier I to Tier II. In addition, a reorganization of the rules' format is also proposed due to general comments received from the public. Under the proposed format, Tier I and II classifications are reorganized by facility size and type of permit for simplification purposes. References in OAC 252:2-15-40 and OAC 252:2-15-41 to Air Quality regulations have been changed to reflect the proposed amendments to those regulations that will also be before the Council on December 16, 1997. The proposed modifications will aid the Air Quality Division in obtaining final EPA approval of the Title V permitting program.

Enclosure: 1

CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY
SUBCHAPTER 15. UNIFORM PERMITTING PROCEDURES

PART 5. TIER CLASSIFICATIONS

252:2-15-40. Air quality applications - Tier I

~~The following air quality authorizations require Tier I applications:~~

- ~~(1) Construction permit for a minor source.~~
- ~~(2) Operating permit for a minor source~~
- ~~(3) Operating permit for a major facility, issued after a construction permit, which does not differ from the construction permit in any manner which would otherwise subject the operating permit application to public review.~~
- ~~(4) New, modified or renewed authorization under a general permit.~~
- ~~(5) Modification of a minor source's construction and/or operating permit when the source remains a minor source after the modification.~~
- ~~(6) Minor modification of a major facility's construction and/or operating permit.~~
- ~~(7) Acid rain permits.~~
- ~~(8) Burn approval.~~
- ~~(9) Relocation permit.~~
- ~~(10) Temporary permit.~~
- ~~(11) Plant wide emission plan approval.~~
- ~~(12) Administrative amendment of all permits and other authorizations.~~
- ~~(13) Extension of a minor source's construction permit.~~
- ~~(14) Extension of a major facility's construction permit with no or minor modification.~~
- ~~(15) Renewal of an operating permit for a minor source.~~

(a) Minor source permits. The following air quality authorizations for minor sources require Tier I applications.

(1) New permits. New construction, operating and relocation permits.

(2) Modifications of permits.

(A) Modification of a construction permit for a minor source that will remain minor after the modification.

(B) Modification of an operating permit that will not change the source's classification from minor to major.

(C) Extension of expiration date of a construction permit.

(3) Renewals. Renewals of operating permits.

(b) Major facility permits. The following air quality authorizations for major facilities require Tier I applications.

(1) New permits.

(A) New construction permit for an existing major facility for any facility change considered minor under 252:100-8-7.2(b)(1).

(B) New operating permit that:

(i) is based on a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) has conditions which do not differ from the construction permit's operating conditions in any way considered significant under 252:100-8-7.2(b)(2).

(2) Modifications of permits.

(A) Modification of any operating permit condition that:

(i) is based on the operating conditions of a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) does not differ from those construction permit conditions in any way considered significant under 252:100-8-7.2(b)(2).

(B) A construction or operating permit modification that is minor under 252:100-8-7.2(b)(1).

(C) Extension of expiration date of a major facility's construction permit with no or minor modifications.

(c) Other authorizations. The following air quality authorizations require Tier I applications.

(1) New, modified and renewed individual authorizations under general operating permits for which a schedule of compliance is not required by 252:100-8-5(c)(8)(B)(i).

(2) Burn approvals.

(3) Plant-wide emission plan approval under 252:100-37-25(b) or 252:100-39-46(j).

(4) Administrative amendments of all air quality permits and other authorizations.

(5) Alternative emissions reduction authorizations. [Also subject to state implementation plan revision procedures in see 252:100-11.]

252:2-15-41. Air quality applications - Tier II

The following air quality authorizations require Tier II applications.

~~(1) Operating permit for a major facility, issued after a construction permit, which differs from the construction permit in a manner which subjects the operating permit application to public review.~~

~~(2) Operating permit for a major facility that does not have a construction permit.~~

~~(3) Significant modification, as defined in OAC 252:100-8-7(e)(2), of a major facility's construction or operating permit.~~

~~(4) New, modified or renewed general permit.~~

~~(5) Time extension of a major facility's construction permit with a modification that would otherwise be subject to public review.~~

~~(6) Renewal of an operating permit for a major facility.~~

~~(7) A construction permit for a new major facility or a major modification to an existing major facility.~~

(a) Minor source permit actions. Any minor source seeking a permit for a facility modification that when completed would turn it into a major facility is required to apply under subsection (b) of this section.

(b) Major facility permits. The following air quality authorizations for major facilities require Tier II applications.

(1) New permits.

(A) New construction permit for a new major facility not classified under Tier III.

(B) New construction permit for an existing major facility for any facility change considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(C) New operating permit for a major facility that did not have an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(D) New operating permit with one or more conditions that differ from the underlying Tier II or III construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(E) New acid rain permit that is independent of a Title V permit application.

(F) New temporary source permit under 252:100-8-6.2.

(2) Modifications of permits.

(A) Significant modification, as described in 252:100-8-7.2(b)(2), of an operating permit that is not based on an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(B) Modification of an operating permit when the conditions proposed for modification differ from the underlying construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(C) A construction permit modification considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(3) Renewals. Renewals of operating permits.

(c) Other authorizations. The following air quality authorizations require Tier II applications.

(1) New, modified and renewed general operating permits.

(2) Individual authorizations under any general operating permit for which a schedule of compliance is required by 252:100-8-5(c)(8)(B)(i).

252:2-15-42. Air quality applications - Tier III

(a) **New major stationary sources.** A construction permit for any new major stationary source listed in this subsection requires a Tier III application. For purposes of this section, "Major stationary source" means:

(1) Any of the following sources of air pollutants which emits, or has the potential to emit, 100 tons per year or more of any pollutant subject to regulation:

- (A) carbon black plants (furnace process),
- (B) charcoal production plants,
- (C) chemical process plants,
- (D) coal cleaning plants (with thermal dryers),
- (E) coke oven batteries,
- (F) fossil-fuel boilers (or combustion thereof), totaling more than 250 million BTU per hour heat input,
- (G) fossil fuel-fired steam electric plants of more than 250 million BTU per hour heat input,
- (H) fuel conversion plants,
- (I) glass fiber processing plants,
- (J) hydrofluoric, sulfuric or nitric acid plants,
- (K) iron and steel mill plants,
- (L) kraft pulp mills,
- (M) lime plants,
- (N) incinerators, except where used exclusively as air pollution control devices,
- (O) petroleum refineries,
- (P) petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels,
- (Q) phosphate rock processing plant,
- (R) portland cement plants,
- (S) primary aluminum ore reduction plants,
- (T) primary copper smelters,
- (U) primary lead smelters,
- (V) primary zinc smelters,
- (W) secondary metal production plants,
- (X) sintering plants,
- (Y) sulfur recovery plants, or
- (Z) taconite ore processing plants, and

(2) Any other source not specified in paragraph (1) of this definition which emits, or has the potential to emit, 250 tons per year or more of any pollutant subject to regulation.

(b) **Existing incinerators.** An application for any change in emissions or potential to emit, or any change in any permit condition, that would have caused an incinerator to be defined as a major stationary source when originally permitted shall require a Tier III application.

(c) **Potential to emit.** For purposes of this section, "potential to emit" means emissions resulting from the application of all enforceable permit limitations as defined in OAC 252:100-1-3.

MINUTES
AIR QUALITY COUNCIL

December 16, 1997

Lincoln Plaza Office Park Burgundy Room
4545 North Lincoln, Oklahoma City, OK

Myrna Bruce

Council Members Absent

Marilyn Andrews

Guests Present

**see attached list

PUBLIC MEETING

Notice of Public Meeting for December 16, 1997 was forwarded to the Office of the Secretary of State giving the time, date, and place of the meeting. Agendas were posted at the entrance door of the meeting room.

Call to Order - Mr. Breisch, Chairman, called the meeting to order and roll call was taken as follows: Mr. Kilpatrick - aye; Ms. Slagell - aye; Mr. Fishback - aye; Dr. Canter - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Breisch - aye. Ms. Andrews was absent during the hearing session.

Approval of Minutes - Mr. Breisch entertained a motion to approve the Minutes of the October 21, 1997 Public Meeting/Hearing. Motion was made by Mr. Kilpatrick to approve the Minutes as presented and second to the motion was made by Mr. Branecky. Roll call as follows: Mr. Kilpatrick - aye; Ms. Slagell - aye; Mr. Fishback - aye; Dr. Canter - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Breisch - aye.

PUBLIC HEARING

OAC 252:100-5-2.2(B)(2) PART 70 SOURCES ANNUAL OPERATING FEE [AMENDED]

As protocol officer, Mr. Dyke convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51 and Title 27A Oklahoma Statutes, Section 2-5-101 through 2-5-118.. Mr. Dyke called upon Jeanette Buttram to give staff position on the proposed changes to the rule.

Ms. Buttram advised that staff's recommendation was that the annual operating fee billed in 1998 for Part 70 sources be adjusted by the Consumer Price Index as specified in the existing rule which would render a 2.2 % increase from \$16.03 to \$16.39 per ton. She also pointed out staff's intention to bring before the Council any proposed adjustments to the fee on an annual basis.

Dr. Canter introduced the committee's report *Title V Fee Committee Findings and Recommendations* dated December 15, 1997 into the record. Members of this committee were Dr. Canter, Mr. Fishback, and Mr. Branecky. The full report is made an official part of these Minutes. Mr. Kilpatrick made motion to accept the committee's report and second was made by Mr. Fishback. With discussion that perhaps Mr. Fishback should not make the second since he was on the committee, Ms. Myers made the second. Roll call as follows: Mr. Kilpatrick - aye; Ms. Slagell - aye; Mr. Fishback - aye; Dr. Canter - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Breisch - aye.

Ms. Myers made additional motion to leave the fees as stated for 1998 with only the Consumer Price Index increase from \$16.03 to \$16.39. Mr. Fishback made the second. Mr. Doughty, staff attorney, mentioned that Council is recommending no action; therefore, this portion of the rule would not go before the Environmental Quality Board specifically. Roll call was as follows: Mr. Kilpatrick - aye; Ms. Slagell - aye; Mr. Fishback - aye; Dr. Canter - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Breisch - aye.

PUBLIC HEARING

OAC 252:100-8 OPERATING PERMITS (PART 70) [AMENDED]

As protocol officer, Mr. Dyke convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes, Section 2-5-101 through Section 2-5-118. Mr. Dyke stated that since there was extensive discussion in the briefing session regarding continuation of this subchapter to a later date, Dr. Joyce Sheedy would stand ready to discuss staff proposal for the rule.

Mr. Kilpatrick made motion to continue the hearing to January 9, 1998 at 1:00. Mr. Branecky made the second. Roll call as follows: Mr. Kilpatrick - aye; Ms. Slagell - aye; Mr. Fishback - aye; Dr. Canter - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Breisch - aye.

PUBLIC HEARING

OAC 252:100-17 INCINERATORS [AMENDED]

As protocol officer, Mr. Dyke convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51

and Title 27A Oklahoma Statutes, Section 2-5-101 through Section 2-5-118. Mr. Dyke called upon Michelle Martinez to give staff position on the proposed changes to the rule. Staff's recommendation was for approval as both emergency and permanent adoption.

Mr. Kilpatrick made motion to continue this hearing until January 9, 1998 at 1:00 p.m. Second was made by Ms. Slagell. During discussion, it was noted that continuing this hearing to February would cause the rule to be adopted by the Board as an emergency rule only, which could possibly put the State Plan at risk. Roll call as follows: Mr. Kilpatrick – aye; Ms. Slagell – aye; Mr. Fishback – no; Dr. Canter – no; Ms. Myers - no; Mr. Branecky - no; Mr. Breisch - no.

After this discussion, Mr. Branecky made motion that Council accept Subchapter 17 as amended and recommend to the Environmental Quality Board for both emergency and permanent adoption. Ms. Myers made the second. Roll call as follows: Mr. Kilpatrick – no; Ms. Slagell – no; Mr. Fishback – aye; Dr. Canter – aye; Ms. Myers – aye; Mr. Branecky - aye; Mr. Breisch - aye.

PUBLIC HEARING

OAC 252:2-40 and OAC 252:2-41 UNIFORM PERMITTING PROCEDURES [AMENDED]

As protocol officer, Mr. Dyke convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 Code of Federal Regulations Part 51, and Title 27A Oklahoma Statutes, Section 2-5-101 through Section 2-5-118. Mr. Dyke called upon Ms. Barbara Hoffman to give staff recommendations.

Staff requested that the Council recommend the revisions to the Environmental Quality Board for adoption as a permanent rule. After discussion, Ms. Myers made motion to approve the rule as amended and recommend to the Environmental Quality Board for permanent adoption. Mr. Branecky made the second. Roll call as follows: Mr. Kilpatrick – no; Ms. Slagell – aye; Mr. Fishback – aye; Dr. Canter – aye; Ms. Myers – aye; Mr. Branecky - aye; Mr. Breisch - aye.

OLD BUSINESS

OAC 252:100-5 REGISTRATION OF AIR CONTAMINANT SOURCE [AMENDED]

Mr. Dyke called upon Jeanette Buttram to give staff position on the proposed changes to this rule. After summarizing the changes, Ms. Buttram stated staff's recommendation was that Subchapter 5 be approved by Council and forwarded to the Environmental Quality Board at the same time that Subchapter 8 is approved.

Mr. Branecky moved that Council continue this hearing to January 9, 1998; and Ms. Myers made the second. Roll call as follows: Mr. Kilpatrick – aye; Ms. Slagell – aye; Mr. Fishback – aye; Dr. Canter – aye; Ms. Myers – aye; Mr. Branecky - aye; Mr. Breisch - aye.

**OAC 252:100-7 CONSTRUCTION PERMITS FOR MAJOR AND MINOR SOURCES;
OPERATING AND RELOCATION PERMITS FOR MINOR SOURCES [AMENDED]**

Mr. Dyke called upon Jeanette Buttram to give staff position on the proposed rule. After summarizing the changes, Ms. Buttram stated that staff recommended that Subchapter 7 be approved by Council at the same time that Subchapter 8 is approved.

Mr. Kilpatrick moved that Council continue the hearing on to the January 9, 1998 meeting. Second to the motion was made by Ms. Myers. Roll call as follows: Mr. Kilpatrick - aye; Ms. Slagell - aye; Mr. Fishback - aye; Dr. Canter - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Breisch - aye.

NEW BUSINESS Dr. Canter stated that no one member of the public could claim to represent all of the public, and that he believes Council hearings provide the proper forum to hear comments from the public on proposed rules. While it is sometimes difficult to decide what rule changes requested at hearings by AQD staff or the public are substantive, Dr. Canter said he resented the implication that the public was not given adequate opportunity to comment on Subchapter 17, since it had been presented at two Council meetings.

ADJOURNMENT With no further business, meeting was adjourned and an additional meeting scheduled for January 9, 1998 at the Lincoln Plaza Office Park Burgundy Room, 4545 North Lincoln Boulevard, Oklahoma City, Oklahoma.

NOTE: The sign-in sheet and the hearing records are attached as an official part of these Minutes.

- B. Roll call vote
4. Resolution for Meribeth Slagell
5. Approval of Minutes of the October 19, 1999 Regular Meeting
6. Public Rulemaking Hearings

A. OAC 252:100 Appendices E and F [AMENDED]

Appendix E Primary Ambient Air Quality Standards [REVOKED]

Appendix E Primary Ambient Air Quality Standards [NEW]

Appendix F Secondary Ambient Air Quality Standards [REVOKED]

Appendix F Secondary Ambient Air Quality Standards [NEW]

Proposal would restore the primary and secondary ambient air quality standards for ozone and particulate matter to what they were prior to June 1, 1999. The 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored. The PM-2.5 standard would be revoked along with the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard. *MILERY RITZ - MINOR SAVINGS OFFICE*

3. Possible action by Council
4. Roll call vote(s) for permanent adoption

** Lee Paden - Chair Env. Qual by Board*

B. OAC 252:100-5 Registration, Emission Inventory and Annual Operating Fees [AMENDED]

Proposal is designed to allow the Agency to bill annual operating fees on a flexible schedule; to allow the fees to be based on the most recent emission data possible; to require an owner or operator of a facility to report excess emissions on their annual emission inventory; to require inventories to be submitted one month earlier than presently required; to allow fee payers five years after payment is made to notify the DEQ that they overpaid and to receive credit for such overpayment; and to reduce the period of time to six months in which either the DEQ or the facility owner or operator can challenge the data or methods used to calculate the facility's emissions.

3. Possible action by Council
4. Roll call vote(s) for permanent adoption

** Howard Bud Greenwood*

C. OAC 252:100-9 Excess Emission and Malfunction Reporting [AMENDED]

Proposal would simplify the language under the agency-wide re-right/de-wrong initiative, including correction of typographical and grammatical errors and deletion of redundant language. Substantive changes include establishing a time limit on excess emissions caused by properly reported malfunctions, startup/shutdowns, and maintenance procedures. The burden of proving that excess emissions occurring more than eight hours or 1.5 percent of the process's operation time in a 3-month period are due to excusable malfunctions, startup/shutdowns or maintenance procedures rather than negligent, marginal, or improper operation is on the owner or operator of the process. Language was added to explain that compliance with this Subchapter will not exempt sources from complying with any applicable federal requirement; and additional demonstration requirements for malfunctions, maintenance, and startup/shutdowns were added under proposed section 252:100-9-3.2, Demonstration of cause.

D. OAC 252:100-13. Prohibition of Open Burning [AMENDED]

Proposal would simplify the language under the agency-wide re-right/de-wrong initiative, including consolidating the general conditions and requirements for allowed open burning into a new section. Substantive changes would add definitions for "domestic refuse" and "land clearing operation" along with a section on disaster relief procedures. In some instances, the requirement to notify the DEQ or other appropriate official for authorization to burn was added. In addition, the open-pit incinerator requirements were expanded and moved to a new section. Also the rule would only allow material from a land clearing operation to be burned in an open-pit incinerator.

1. Presentation – Max Price
 2. Questions and discussion by Council / Public
 3. Possible action by Council
 4. Roll call vote(s) for emergency adoption

Proposal would amend OAC 252:100-23-3(a) to remove references to OAC 252:100-27, which will be revoked effective June 1, 2000, and replace them with new section OAC 252:100-19-12, to take effect June 1, 2000.

F. OAC 252:100-24 Control of Emissions from Grain Elevators [AMENDED]

1. Presentation – Max Price
2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for emergency adoption

Proposal would amend OAC 252:100-24-3(a)(1) and (2) to remove references to OAC 252:100-27, which will be revoked effective June 1, 2000, and replace them with new section OAC 252:100-19-12, to take effect June 1, 2000.

G. OAC 252:2-15 Environmental Permit Processing Times [AMENDED]

The proposal would change the terms used in 252:2-15-40, 41 and 72 to be consistent with those used in 252:100, Air Pollution Control. The terms "minor source(s)" and "major facility(ies)" would be changed to "minor facility(ies)" and "Part 70 source(s)", respectively.

MEMORANDUM

TO: Air Quality Council
FROM: Eddie Terrill, Director ^{CT}
Air Quality Division
Re: Modifications to Chapter 2

Enclosed is a copy of the proposed amendments to OAC 252:2-15, Environmental Permit Processing Times. The Department is proposing to amend Sections 40, 41 and 72 to make them consistent with 252:100, Air Pollution Control. The references to "minor source(s)" and "major facility(ies)" would be changed to "minor facility(ies)" and "Part 70 source(s)", respectively.

At the hearing, staff will suggest that the Council vote to recommend to the Environmental Quality Board adoption of the amendment as a permanent rule.

Enclosures: 1

CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY
SUBCHAPTER 15. ENVIRONMENTAL PERMIT PROCESSING TIMES
PART 5. TIER CLASSIFICATIONS

252:2-15-40. Air quality applications - Tier I

(a) ~~Minor source facility~~ permits. The following air quality authorizations for ~~minor sources facilities~~ require Tier I applications.

(1) **New permits.** New construction, operating and relocation permits.

(2) **Modifications of permits.**

(A) Modification of a construction permit for a ~~minor source facility~~ that will remain minor after the modification.

(B) Modification of an operating permit that will not change the ~~source's facility's~~ classification from minor to major.

(C) Extension of expiration date of a construction permit.

(3) **Renewals.** Renewals of operating permits.

(b) ~~Major facility Part 70 source~~ permits. The following air quality authorizations for ~~major facilities Part 70 sources~~ require Tier I applications.

(1) **New permits.**

(A) New construction permit for an existing ~~major facility Part 70 source~~ for any ~~facility~~ change considered minor under 252:100-8-7.2(b)(1).

(B) New operating permit that:

(i) is based on a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) has conditions which do not differ from the construction permit's operating conditions in any way considered significant under 252:100-8-7.2(b)(2).

(2) **Modifications of permits.**

(A) Modification of any operating permit condition that:

(i) is based on the operating conditions of a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) does not differ from those construction permit conditions in any way considered significant under 252:100-8-7.2(b)(2).

(B) A construction or operating permit modification that is minor under 252:100-8-7.2(b)(1).

(C) Extension of expiration date of a ~~major facility's Part 70 source's~~ construction permit with no or minor modifications.

(c) **Other authorizations.** The following air quality authorizations require Tier I applications.

(1) New, modified and renewed individual authorizations under general operating permits for which a schedule of compliance is not required by 252:100-8-5(c)(8)(B)(i).

(2) Burn approvals.

(3) Plant-wide emission plan approval under 252:100-37-25(b) or 252:100-39-46(j).

(4) Administrative amendments of all air quality permits and

PART 7. REVIEW PROCEDURES AND PERMITTING TIME LINES

252:2-15-72. Air quality permit time lines

The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

(1) Construction permits:

(A) PSD ~~(Part 70 sources)~~ - 540 days.

(B) ~~Major Sources~~ (Part 70 sources Sources (other than PSD) - 365 days.

(C) ~~Minor Sources~~ Facilities - 180 days.

(2) Operating permits:

(A) ~~Major~~ Part 70 Sources - 540 days.

(B) ~~Minor Sources~~ Facilities - 365 days.

(3) Relocation permits - 30 days.

Notice of Public Meeting for December 14, 1999 was forwarded to the Office of the Secretary of State giving the time, date, and place of the meeting. Agendas were posted at the entrance doors.

Call to Order - Mr. Breisch, Chairman, called the meeting to order and roll call was taken as follows: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye. Dr. Canter, Ms. Myers, and Mr. Kilpatrick did not attend. Mr. Breisch and Mr. Terrill presented Meribeth Slagell a Resolution from the Council and Certificate of Appreciation from Mr. Coleman and thanked her for her years of dedicated service on the Council. Mr. Breisch introduced new Council member, Rick Treeman, who was appointed by the Governor to replace the position vacated by Mrs. Slagell.

Approval of Minutes - Mr. Breisch entertained a motion to approve the Minutes of the August 24, 1999 Public Meeting/Hearings. Motion was made by Mr. Fallon to approve the Minutes as presented and second was made by Dr. Grosz. Roll call as follows: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

CY 2000 Meeting Schedule - Staff suggested the following Year 2000 meeting dates:

- Wednesday, February 16 at Tulsa
- Wednesday, April 19 at Lawton
- Wednesday, June 14 at Tulsa
- Wednesday, August 16 at Ponca City
- Wednesday, October 18 at Oklahoma City
- Wednesday, December 14 at Oklahoma City

935

Motion to accept the schedule was made by Mr. Fallon with second by Mr. Branecky with following vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye

Protocol Statement — As protocol officer, Mr. Dyke convened the hearings by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes, Sections 2-5-101 through 2-5-118. Mr. Dyke entered the Agenda and the Oklahoma Register Notice into the record.

PUBLIC HEARING

OAC 252:100- Appendices E & F

Appendix E Primary Ambient Air Quality Standards [AMENDED]

Appendix F Secondary Ambient Air Quality Standards [AMENDED]

Ms. Michelle Martinez made the staff presentation stating that the proposed amendments to Appendices E and F would restore the primary and secondary ambient air quality standards for ozone to what they were prior to June 1, 1999. She advised that the 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored; and that the PM-2.5 standards would be revoked along with the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard.

Ms. Martinez entered into the record a fax received from EPA Region 6 dated December 10, 1999 which stated that updating these appendices was timely and appropriate. Ms. Martinez then asked that Council recommend proposed Appendices E and F to the Environmental Quality Board for permanent adoption.

Following discussion, Mr. Breisch asked for a motion to recommend the rule for adoption. Mr. Branecky made motion to recommend to the Board for permanent/emergency adoption. Second was made by Mr. Fallon. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-5

Registration, Emission Inventory and Annual Operating Fees [AMENDED]

Ms. Jeanette Buttram presented the staff presentation and advised that the proposed changes to Subchapter 5 were designed to allow the agency the ability to bill annual operating fees on a flexible schedule, and that these changes would also allow the fees to be based on the most recent emission data possible. Ms. Buttram pointed out that the proposed rule clarified that an owner or operator of a facility must report quantifiable excess emissions on their annual emission inventory. She stated that substantive changes included the requirement that all inventories be submitted prior to March 1, and the Agency would provide up to a 30-day extension upon request. Council made a recommendation that the language be changed to allow an additional 30-day extension for good cause shown. Also, the rule will allow fee payers five years after payment is made to notify the DEQ that they overpaid and receive

credit for such overpayment. Also, new language was proposed to reduce to six months after inventories are due or submitted, the period of time in which either the facility owner/operator or the DEQ, respectively, can challenge the methods used to calculate the facility's emissions for "fee calculation purposes."

Ms. Buttram advised that comments had been received from Central and Southwest Services and she entered them into the record. She stated that it was staff's recommendation that Council forward this rule to the Environmental Quality Board for adoption as a permanent rule.

Following comments from Council members and the audience, changes were made in the wording and Mr. Wilson made a motion to forward this rule, with changes, to the Environmental Quality Board for adoption. Second was made by Mr. Branecky. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-9

Excess Emission And Malfunction Reporting [AMENDED]

Ms. Jeanette Buttram was called upon to make the staff recommendation for this rule. She stated that the proposed changes to Subchapter 9 included correction of typographical and grammatical errors and deletion of redundant language; and that the rule was simplified and clarified according to the agency-wide re-right/de-wrong initiative.

Substantive changes include the addition of new definitions and the addition of a new subsection for certification of the information submitted.

Also, language was added under 100-9-3.3, Demonstration of cause, which states excess emissions caused by malfunction and maintenance, start-up/shutdown, can be exempt from compliance which air emission limitations established in permits, rules, orders of the DEQ if the owner/operator properly complies with the requirements in 252:100-9-3.1 and 252:100-9-3.2, respectively; and meets the demonstrations listed in those subsections. Then additional subsections added to 100-9-3.3 were discussed.

Ms. Buttram advised that comments had been received from EPA Region 6 and from Central and Southwest Services and entered them into the record. She stated that staff suggested that the rule be recommended for adoption by the Environmental Quality Board.

After much discussion with staff, Council, and audience members, Mr. Breisch called for a motion. Mr. Fallon made motion to continue this rule to the next regular meeting. Mr. Branecky made the second. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-13

Prohibition of Open Burning [AMENDED]

Ms. Jeanette Buttram was called upon to give the staff recommendation concerning this rule. She stated that the proposed changes to Subchapter 13 would simplify and clarify the Subchapter as a part of the agency-wide re-right/de-wrong initiative. She added that such changes included consolidating the general conditions and requirements for allowed open burning into a new section. She pointed out that a few substantive changes were made such as adding definitions for "domestic refuse" and "landclearing operation" and a section on disaster relief procedures; and that in some instances, the requirement to notify the DEQ or other appropriate official for authorization to burn was added. Ms. Buttram stated that new language was added under "land management and land clearing operations" requiring those who clear land in areas that are or have been designated nonattainment to burn their vegetation in open-pit incinerators. She stated that existing language on open-pit incinerators was expanded it would now prohibit accepting any material owned by other persons and from transporting any material to be burned to the property where the open-pit incinerator is located. She advised that it was staffs recommendation that Council forward this rule to the Environmental Quality Board for adoption as a permanent rule.

Ms. Buttram entered written comments from Central and Southwest Services into the record. Following questions and discussion by Council, changes were made in the wording after which Mr. Breisch entertained motion to accept the changes made and forward the rule to the Board for adoption as a permanent rule. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-23 Control of Emissions from Cotton Gins [AMENDED]

OAC 252:100-24 Control of Emissions from Grain Elevators [AMENDED]

Mr. Dyke called upon Mr. Max Price who advised Council that the proposed changes to 100-23-3 and 100-24-3, would substitute references to 252:100-19-12 for references to Subchapter 27. He added that these revisions were necessary because the substantive requirements of Subchapter 27 would be moved to 100-19-12 and Subchapter 27 would be revoked in June of 2000. He added that the references to Subchapter 27 would become meaningless unless they are replaced by references to 100-19-12. Mr. Price stated that it was staff's recommendation that Council refer these rules to the Environmental Quality Board for emergency adoption effective June 1, 2000.

Mr. Breisch stated that these two rules would be voted on separately and called for a motion on Subchapter 23. Mr. Wilson made the motion to forward to the Board as recommended

by staff. The second made by Mr. Branecky. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

Mr. Breisch then called for the same motion for Subchapter 24. Mr. Branecky made the motion and Dr. Grosz made the second. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:2-15

Environmental Permit Processing Times [AMENDED]

Mr. Dyke called upon Ms. Cheryl Bradley who stated that the proposed amendments to Sections 40, 41, and 72 would make them consistent with 252:100, Air Pollution Control; and that the references to "minor source(s)" and "major facility(ies)" would be changed to "minor facility(ies)" and Part 70 source(s)", respectively. She added that changes were also made at the Council meeting to section 2-15-72(1)(A) such that the phrase "and part 70 sources" was added along with changing the number of days from 540 to 365. Ms. Bradley stated that comments had been received from EPA Region 6 and she entered them into the record. Following discussion Ms. Bradley advised that it was staff's recommendation that Council refer this rule to the Board for permanent adoption of the proposed amendments. Mr. Breisch called for a motion. Mr. Branecky made motion to accept the changes as stated and forward the rule to the Board for adoption. Mr. Fallon made the second. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

DIVISION DIRECTOR'S REPORT - Mr. Terrill advised that he and Mr. Dyke would be attending a meeting with Central States Air Resources Board (CenSARA) to discuss, among other things, the status of the Regional Planning Body activities. He stated that he would like to take a few minutes at the next regular meeting for an update on these activities.

NEW BUSINESS - None

ADJOURNMENT With no further business, meeting was adjourned with announcement that the next regularly scheduled meeting would be February 16, 2000 at 9:00 a.m. in the Auditorium at OSU-Tulsa (formerly UCAT).

REGULAR MEETING AGENDA
DEPARTMENT OF ENVIRONMENTAL QUALITY
OKLAHOMA ENVIRONMENTAL QUALITY BOARD

A Public Meeting: 9:30 a.m., Tuesday, September 26, 1995
Elk City Civic Center, 1016 Airport Blvd.
Elk City, Oklahoma

1. Call to Order - Frank Condon
2. Roll Call - Lynda Finch
3. Approval of Minutes of the January 24, 1995 Regular Meeting
4. Consideration of New Rule 252:002-15-5 regarding signatory delegation of permits
 - A. Presentation of Proposed Rule - Kay York
 - B. Questions and Discussion by Board
 - C. Questions and Discussion by Public
 - D. Discussion by Board
 - E. Roll Call Vote
5. Consideration of amendments to 252:100-3 regarding prevention of significant deterioration (PSD) increments for particulate matter
 - A. Presentation of Proposed Rules - Larry Byrum
 - B. Questions and Discussion by Board
 - C. Questions and Discussion by Public
 - D. Discussion by Board
 - E. Roll Call Vote
6. Consideration of amendments to 252:100-8-5 regarding the phased submittal of Title V air pollution operating permits
 - A. Presentation of Proposed Rules - Larry Byrum
 - B. Questions and Discussion by Board
 - C. Questions and Discussion by Public
 - D. Discussion by Board
 - E. Roll Call Vote
7. Consideration of amendments to 252:200-11-4 (c) regarding hazardous waste facilities in the 100-year floodplain.
 - A. Presentation of Proposed Rules - Scott Nicholson
 - B. Questions and Discussion by Board
 - C. Questions and Discussion by Public
 - D. Discussion by Board
 - E. Roll Call Vote
8. Consideration of reformatting 252:500 into new series 252:520
 - A. Presentation of Proposed Rules - Steve Mason
 - B. Questions and Discussion by Board
 - C. Questions and Discussion by Public

- D. Discussion by Board
- E. Roll Call Vote

9. Consideration of amendments to 252:510 regarding stormwater discharge at municipal landfills

- A. Presentation of Proposed Rules - Steve Mason
- B. Questions and Discussion by Board
- C. Questions and Discussion by Public
- D. Discussion by Board
- E. Roll Call Vote

10. Consideration of finding of emergency for agenda items 4 through 9.

- A. Presentation of Proposed Finding - Bob Kellogg
- B. Questions and Discussion by Board
- C. Questions and Discussion by Public
- D. Discussion by Board
- E. Roll Call Vote

11. Consideration of the Department's FY97 Operational Budget Request

- A. Presentation - Mark Coleman

SUBCHAPTER 15. ENVIRONMENTAL PERMIT PROCESSING TIMES

252:2-15-28. Permit decision-making authority.

(a) Designated positions. The Executive Director may delegate in writing the power and duty to issue, renew, amend, modify and deny permits and take other authorization or registration action. Unless delegated to a Division Director by formal assignment or rule, the authority to act on Tier I applications shall be delegated to positions within each permitting program having technical supervisory responsibilities and, for local actions authorized by law, to environmental specialist positions held by the DEQ's local services representatives. The authority to act on emergency permits or Tier II applications shall be delegated to the Division Director of the applicable permitting division.

(b) Revision. The Executive Director may amend any delegation in writing.

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 002. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY
SUBCHAPTER 15. UNIFORM PERMITTING PROCEDURES
PART 5. TIER CLASSIFICATIONS

Section

- 252:002-15-40. Air quality applications: Tier I
- 252:002-15-41. Air quality applications: Tier II
- 252:002-15-42. Air quality applications: Tier III
- 252:002-15-43. Hazardous waste applications: Tier I
- 252:002-15-44. Hazardous waste applications: Tier II
- 252:002-15-45. Hazardous waste applications: Tier III
- 252:002-15-46. Laboratory certification applications: Tier I
- 252:002-15-47. Laboratory certification applications: Tier II
- 252:002-15-48. Laboratory certification applications: Tier III
- 252:002-15-49. Operator certification applications: Tier I
- 252:002-15-50. Operator certification applications: Tier II
- 252:002-15-51. Operator certification applications: Tier III
- 252:002-15-52. Radiation management applications: Tier I
- 252:002-15-53. Radiation management applications: Tier II
- 252:002-15-54. Radiation management applications: Tier III
- 252:002-15-55. Solid waste applications: Tier I
- 252:002-15-56. Solid waste applications: Tier II
- 252:002-15-57. Solid waste applications: Tier III
- 252:002-15-58. UIC applications: Tier I
- 252:002-15-59. UIC applications: Tier II
- 252:002-15-60. UIC applications: Tier III
- 252:002-15-61. Water quality applications: Tier I
- 252:002-15-62. Water quality applications: Tier II
- 252:002-15-63. Water quality applications: Tier III

252:002-15-40. Air quality applications - Tier I

The following air quality authorizations require Tier I applications:

- (1) Construction permit for a minor source.
- (2) Operating permit for a minor source.
- (3) Operating permit for a major facility, issued after a construction permit, which does not differ from the construction permit in any manner which would otherwise subject the operating permit application to public review.
- (4) New, modified or renewed authorization under a general permit.
- (5) Modification of a minor source's construction and/or operating permit when the source remains a minor source after the modification.
- (6) Minor modification of a major facility's construction and/or operating permit.
- (7) Acid rain permits.
- (8) Burn approval.
- (9) Relocation permit.
- (10) Temporary permit.
- (11) Plant-wide emission plan approval.
- (12) Administrative amendment of all permits and other authorizations.
- (13) Extension of a minor source's construction permit.
- (14) Extension of a major facility's construction permit with no or minor modification.
- (15) Renewal of an operating permit for a minor source.

252:002-15-41. Air quality applications - Tier II

The following air quality authorizations require Tier II applications.

- (1) Operating permit for a major facility, issued after a construction permit, which differs from the construction permit in a manner which subjects the operating permit application to public review.
- (2) Operating permit for a major facility that does not have a construction permit.
- (3) Significant modification, as defined in OAC 252:100-8-7(e)(2), of a major facility's construction or operating permit.
- (4) New, modified or renewed general permit.
- (5) Time extension of a major facility's construction permit with a modification that would otherwise be subject to public review.
- (6) Renewal of an operating permit for a major facility.
- (7) A construction permit for a major modification to an existing major facility.

252:002-15-42. Air quality applications - Tier III

(a) New major stationary sources. A construction permit for any new major stationary source listed in this subsection requires a Tier III application. For purposes of this section, "Major stationary source" means:

(1) Any of the following sources of air pollutants which emits, or has the potential to emit, 100 tons per year or more of any pollutant subject to regulation:

- (A) carbon black plants (furnace process),
- (B) charcoal production plants,
- (C) chemical process plants,
- (D) coal cleaning plants (with thermal dryers),
- (E) coke oven batteries,
- (F) fossil-fuel boilers (or combustion thereof), totaling more than 250 million BTU per hour heat input,
- (G) fossil fuel-fired steam electric plants of more than 250 million BTU per hour heat input,
- (H) fuel conversion plants,
- (I) glass fiber processing plants,
- (J) hydrofluoric, sulfuric or nitric acid plants,
- (K) iron and steel mill plants,
- (L) kraft pulp mills,
- (M) lime plants,
- (N) incinerators, except where used exclusively as air pollution control devices,
- (O) petroleum refineries,
- (P) petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels,
- (Q) phosphate rock processing plant,
- (R) portland cement plants,
- (S) primary aluminum ore reduction plants,
- (T) primary copper smelters,
- (U) primary lead smelters,
- (V) primary zinc smelters,
- (W) secondary metal production plants,
- (X) sintering plants,
- (Y) sulfur recovery plants, or
- (Z) taconite ore processing plants, and

(2) Any other source not specified in paragraph (1) of this definition which emits, or has the potential to emit, 250 tons per year or more of any pollutant subject to regulation.

(b) Existing incinerators. An application for any change in emissions or potential to emit, or any change in any permit condition, that would have caused an incinerator to be defined as a major stationary source when originally permitted shall require a Tier III application.

(c) Potential to emit. For purposes of this section, "potential to emit" means emissions resulting from the application of all enforceable permit limitations as defined in OAC 252:100-1-3.

252:002-15-43. Hazardous waste management applications - Tier I

The following hazardous waste management authorizations require Tier I applications.

- (1) Class I modification of any hazardous waste permit requiring Department approval as specified in 40 C.F.R. § 270.42.
- (2) Modification to a recycling permit in accordance with 27A O.S. Supp. 1994, §2-7-118(A).
- (3) Class 2 permit modification as defined in 40 C.F.R. §270.42.
- (4) Emergency hazardous waste disposal plan approval.
- (5) Hazardous waste generator disposal plan approval.
- (6) Technical plan approval.
- (7) Hazardous waste transporter license.
- (8) Hazardous waste transfer station plan modification which is not related to capacity.
- (9) Emergency permit issued in accordance with 40 C.F.R. § 270.61.
- (10) Interim status closure plan approval in accordance with 40 C.F.R. §265.113(d)(4).
- (11) Minor administrative modification of all permits and other authorizations.
- (12) Renewal of disposal plan approval and transporter license.
- (13) New, modified or renewed authorization under a general permit.
- (14) Approval of temporary authorizations in accordance with 40 C.F.R. § 270.42.

252:002-15-44. Hazardous waste management applications - Tier II

The following hazardous waste management authorizations require Tier II applications.

- (1) On-site hazardous waste treatment, storage or disposal permit.
- (2) Mobile recycling permit.
- (3) Research & Development permit.
- (4) Class 3 modification of any hazardous waste permit as specified in 40 C.F.R. § 270.42.
- (5) Modification of an on-site hazardous waste facility permit for a fifty percent (50%) or greater increase in permitted capacity for storage, treatment, and/or disposal, including incineration.
- (6) Modification of an on-site hazardous waste facility permit for an expansion of permitted boundaries.
- (7) Modification of on-site hazardous waste facility permit in which the application is for new treatment, storage, or disposal methods or units which are significantly different from those permitted.
- (8) Renewal of a hazardous waste treatment, storage or disposal permit.
- (9) Hazardous waste transfer station plan approval.
- (10) Hazardous waste transfer station plan modification involving increase in approved capacity.
- (11) Variance which is not part of a permit application.
- (12) Variance which is part of a Tier II permit application.

252:002-15-45. Hazardous waste management applications - Tier III
The following hazardous waste management authorizations require Tier III applications.

(1) Off-site hazardous waste treatment, storage, disposal, incineration and/or recycling permit.

(2) Modification of an off-site hazardous waste facility permit for a fifty percent (50%) or greater increase in permitted capacity for storage, treatment, and/or disposal, including incineration.

(3) Modification of an off-site hazardous waste facility permit for an expansion of permitted boundaries.

(4) Modification of off-site hazardous waste facility permit in which the application is for new treatment, storage, or disposal methods or units which are significantly different from those permitted.

(5) Variance which is part of a Tier III application.

252:002-15-46. Laboratory certification applications - Tier I

A Tier I application shall be required for a new, modified, amended or renewed laboratory certification.

252:002-15-47. Laboratory certification applications - Tier II

None

252:002-15-48. Laboratory certification applications - Tier III

None

252:002-15-49. Operator certification applications - Tier I

The following authorizations require Tier I applications.

(1) Waterworks operator certification (standard and temporary).

(2) Wastewater works operator certification (standard and temporary).

(3) Waterworks laboratory operator certification.

(4) Wastewater works laboratory operation certification.

(5) Septic tank installer certification.

(6) Septic tank cleaner license.

(7) Landfill operator and/or manager certification.

(8) Waterworks helper registration.

(9) Wastewater works helper registration.

(10) Amendments, modifications and renewals of all authorizations.

252:002-15-50. Operator certification applications - Tier II

None.

252:002-15-51. Operator certification applications - Tier III

None.

252:002-15-52. Radiation management applications - Tier I

The following radiation management authorizations require Tier I applications.

- (1) Industrial X-ray registration and the amendment, modification and/or renewal thereof.
- (2) X-ray fluorescence spectroscopy instrument license and the amendment, modification and/or renewal thereof.

252:002-15-53. Radiation management applications - Tier II

None.

252:002-15-54. Radiation management applications - Tier III

None.

252:002-15-55. Solid waste management applications - Tier I

The following solid waste management authorizations require Tier I applications.

(1) New permits.

(A) Locally approved solid waste transfer stations.

Permit for a solid waste transfer station that, prior to application filing, received county commissioner approval according to 27A O.S.Supp. 1995, § 2-10-307.

(B) Biomedical waste transfer stations using only sealed containers. Biomedical waste transfer station permit when activities are limited to:

(i) consolidation of sealed containers; and/or

(ii) transfer of sealed containers from one vehicle or mode of transportation to another.

(C) Disaster relief. Emergency authorization for waste disposal resulting from a natural disaster.

(2) Modifications.

(A) All facilities:

(i) Modification of a solid waste permit to add methods, units or appurtenances for liquid bulking processes; yard waste composting; recycling operations; waste screening; or baling, chipping, shredding or grinding equipment or operations.

(ii) Modification to any solid waste permit to make minor changes.

(iii) Modification of plans for closure and/or post-closure.

(iv) Administrative modification of all permits and other authorizations.

(B) On-site and off-site land disposal facilities.

Modification of an existing land disposal permit for a lateral expansion within permitted boundaries.

(C) Capacity increases of less than 25% with exceptions. The modification of a solid waste permit, excluding incineration permits, involving a request for less than twenty-five percent (25%) increase in permitted capacity for storage, processing or disposal when the request is for equivalent methods, units or appurtenances as those permitted and which does not involve expansions of permitted boundaries.

(3) Plans and other authorizations. The approval of new and when applicable, modified or renewed:

(A) Plans for composting of yard waste only.

(B) Permit transfers.

(C) Non-hazardous industrial solid waste disposal plans.

(D) Technical plans.

(E) County solid waste management plans.

(F) Individual authorizations under a general permit.

(G) All other administrative approvals required by OAC 252:510 or OAC 252:520.

252:002-15-56. Solid waste management applications - Tier II

The following solid waste management authorizations require Tier II applications.

(1) New permits.

(A) On-site solid waste processing facilities with exception. Permit for an on-site solid waste processing facility except yard waste composting as listed under Tier I, Rule 252:002-15-55.

(B) Solid waste transfer stations with exceptions. Permit for a solid waste transfer station except:

(i) a transfer station permit with county commissioner approval as listed under Tier I, Rule 252:002-15-55, or

(ii) a biomedical waste transfer station permit listed under Tier I, Rule 252:002-15-55.

(C) On-site incinerators with exceptions. Permit for an on-site incinerator except those exempt under OAC 252:520 or those that have an approved Air Quality permit or Solid Waste Management Plan.

(D) On-site land disposal sites. Permit for an on-site solid waste disposal site.

(E) Material Recovery Facility (MRF). Permit for a Material Recovery Facility if waste is not source-separated.

(2) Modifications.

(A) All facilities. Modification of a permit for a change in waste type.

(B) On-site facilities. Any modification of an on-site solid waste permit, except as listed under Tier I, Rule 252:002-15-55.

(C) Off-site facilities.

(i) Modification of any off-site solid waste permit involving a request for more than twenty-five percent (25%) but less than fifty percent (50%) increase in permitted capacity for storage, processing or disposal (excluding incineration) when the request is for equivalent methods, units or appurtenances as those permitted, except those listed under Tier I, Rule 252:002-15-55.

(ii) Modification of any off-site processing facility involving an expansion of permitted boundaries.

(D) Incinerators.

(i) Modification of an on-site incinerator permit for any increase in permitted capacity for storage, processing, or disposal.

(ii) Modification of an off-site incinerator permit involving a request for increases less than fifty percent (50%) in permitted capacity for storage, processing, or disposal when the request is for equivalent methods, units or appurtenances as those permitted.

(3) General permit. New, modified or renewed general permit.

252:002-15-57. Solid waste management applications - Tier III

The following solid waste management authorizations require Tier III applications.

(1) New permits.

(A) Off-site processing facilities with exceptions.

Permit for an off-site processing facility, unless otherwise specified in Tier I, Rule 252:002-15-55, or Tier II, Rule 252:002-15-56.

(B) Off-site land disposal facility. Permit for an off-site solid waste land disposal site.

(C) Off-site incinerator. Permit for an off-site incinerator.

(2) Modifications.

(A) Off-site facilities: significant increase in capacity.

Modification of any off-site solid waste permit involving a fifty percent (50%) or greater increase in permitted capacity for storage, processing, and/or disposal, including incineration.

(B) Off-site land disposal facility. Modification of an off-site solid waste land disposal permit for an expansion of permitted boundaries.

(C) Off-site facilities: different methods, units or appurtenances. Modification of an off-site solid waste permit in which the request involves different methods, units or appurtenances than those permitted, except those listed under Tier I, Rule 252:002-15-55.

(3) Variance approvals. All variances.

252:002-15-58. UIC applications-Tier I

The following underground injection control authorizations require Tier I applications.

- (1) Minor modification of a permit for Class I, III, and V wells in accordance with 40 C.F.R. §144.41.
- (2) Modification of an approved closure and/or post-closure plan for a Class I hazardous waste injection well.
- (3) Modification of an approved plugging and abandonment plan for Class I nonhazardous and Class III injection wells.
- (4) Modification of an approved corrective action plan for a Class I injection well.
- (5) Emergency permit in accordance with 40 C.F.R. §144.34.
- (6) New, modified or renewed authorization under a general permit.
- (7) Minor administrative modification of all permits and other authorizations.

252:002-15-59. UIC applications - Tier II

The following underground injection control authorizations require Tier II applications.

- (1) On-site Class I nonhazardous waste injection well permit.
- (2) Class III and V injection well permits except Class V permits issued under Tier III.
- (3) Modification and/or renewal of all DEQ-issued underground injection control well permits.

252:002-15-60. UIC applications - Tier III

The following underground injection control authorizations require Tier III applications.

- (1) Class I hazardous waste injection well permit.
- (2) Off-site Class I nonhazardous waste injection well permit.
- (3) Class V industrial waste injection well permit.

252:002-15-61. Water quality applications - Tier I

The following water quality authorizations require Tier I applications.

- (1) Permit for flow-through impoundment(s) as part of the pretreatment process.
- (2) Re-permitting of facility with an expiring permit for industrial non-discharging impoundment or septic tank system.
- (3) Re-permitting of expiring permit with minor or no change(s) for land application of sludge and/or wastewater for same site.
- (4) New, modified or renewed authorization under a general permit, including but not limited to general permits for stormwater, underground storage tanks and petroleum storage and treatment facilities.
- (5) Approval of new pretreatment program.
- (6) Closure plan approval.
- (7) Dredge and fill certification.
- (8) Approval of exemption for water line extensions.
- (9) Approval of exemption for water distribution and wastewater collection systems.

- (10) Approval for individual residential sewage disposal system.
- (11) Approval of small public sewage system:
 - (A) with less than 5,000 gallons per day which do not discharge, land apply wastewater or sludge, or have lift stations designed to handle a peak capacity greater than 10 gallons per minute; or
 - (B) which serves less than ten (10) residential units.
- (12) Residential development approval.
- (13) Transfer of discharge permit.
- (14) Minor modification of discharge permit.
- (15) Minor modification of permit for land application of sludge and/or wastewater.
- (16) Modification of or addition to a municipal wastewater treatment system (including sewer line extensions).
- (17) Modification of or addition to a public water supply treatment and/or distribution system.
- (18) Modification of non-discharging impoundment and/or septic tank system permit.
- (19) Modification of an approved pretreatment program.
- (20) Administrative amendment of permits or other authorizations for the correction of administrative or typographical errors.

252:002-15-62. Water quality applications - Tier II

The following water quality authorizations require Tier II applications.

- (1) Permit for municipal wastewater treatment system.
- (2) Permit for public water supply system.
- (3) Discharge permit for minor facility.
- (4) Individual storm water permit.
- (5) Permit for industrial non-discharging impoundment or septic tank system.
- (6) Permit for land application of sludge and/or wastewater at new site.
- (7) Re-permitting of a facility with expiring discharge permit.
- (8) Re-permitting of facility with expiring individual storm water discharge permit.
- (9) Re-permitting with major change(s) from expiring permit for land application of sludge and/or wastewater for the same site.
- (10) Variance including thermal components of effluent limitations for an individual discharge permit.
- (11) Major modification of discharge permit.
- (12) Major modification of permit for land application of sludge and/or wastewater.

252:002-15-63. Water quality applications - Tier III

A new discharge permit for a major facility requires a Tier III application.

REGULAR MEETING AGENDA
DEPARTMENT OF ENVIRONMENTAL QUALITY
OKLAHOMA ENVIRONMENTAL QUALITY BOARD

Revised 1-3-96

A Public Meeting: 9:00am, Tuesday, January 16, 1996
University Center at Tulsa, 700 N. Greenwood
Administration Building, Board Room

- 1. Call to Order - Frank Condon
- 2. Roll Call - Lynda Finch *Absent Carkley, Minor & Paden*
- 3. Approval of Minutes of the November 28, 1995 Regular Meeting
- 4. Election of Officers *Condon & Roberts*
- 5. Executive Director's Report *see Paden arrival*

✓ 6. Consideration of changes to Chapter 252:002, Procedures of the DEQ. The proposed changes in Subchapter 15 contain uniform rules which establish tiered procedures that apply to all permitting programs. To avoid duplication or conflict with the proposed uniform permitting procedures, changes needed in the program-specific rules are found in agenda items 7-24. *11-0*

- A. Presentation of proposed amendments - Kay York
- B. Questions and Discussion by Board
- C. Questions, Comments and Discussion by Public
- D. Discussion by Board
- E. Roll Call Vote *11-0 changed*

✓ 7. Consideration of changes to Chapter 252:100, amendments to Air Quality permitting rules for consistency with the uniform procedures and which would reduce time limits for minor source operating permits and extend time for unpermitted minor sources to operate.

- A. Presentation of proposed amendments - Larry Byrum
- B. Questions and Discussion by Board
- C. Questions, Comments and Discussion by Public
- D. Discussion by Board
- E. Roll Call Vote *11-0*

8. Consideration of emergency changes to Chapter 252:100-10 (new), related to general operating permits for the natural gas industry.

- A. Presentation of proposed amendments - Larry Byrum
- B. Questions and Discussion by Board
- C. Questions, Comments and Discussion by Public
- D. Discussion by Board
- E. Roll Call Vote to adopt *NO, not adopted*
- F. Roll Call Vote on Finding of Emergency

referred back to AQ-C for consideration and any changes if necessary

✓ 9. Consideration of changes to Chapter 252:200, amendments to Hazardous Waste Management permitting rules for consistency with the uniform procedures.

- A. Presentation of proposed amendments - Scott Nicholson
- B. Questions and Discussion by Board

Jimmy Owens

- C. Questions, Comments and Discussion by Public
- D. Discussion by Board
- E. Roll Call Vote 11-0

10. Consideration of changes to Chapter 252:300, Laboratory Certification permitting rules, for consistency with the uniform procedures.

- A. Presentation of proposed amendments - Judy Duncan
- B. Questions and Discussion by Board
- C. Questions, Comments and Discussion by Public
- D. Discussion by Board
- E. Roll Call Vote 11-0

11. Consideration of changes to Chapter 252:400, Radiation Management permitting rules, for consistency with the uniform procedures.

- A. Presentation of proposed amendments - Dr. David Gooden
- B. Questions and Discussion by Board
- C. Questions, Comments and Discussion by Public
- D. Discussion by Board
- E. Roll Call Vote 11-0

12. Consideration of changes to Chapter 252:510, Solid Waste Management permitting rules, for consistency with the uniform procedures.

- A. Presentation of proposed amendments - H.A. Caves
- B. Questions and Discussion by Board
- C. Questions, Comments and Discussion by Public
- D. Discussion by Board
- E. Roll Call Vote 11-0

13. Consideration of changes to Chapter 252:520, Solid Waste Management permitting rules, for consistency with the uniform rules, and re-adoption of entire unpromulgated Chapter as it was adopted on 9/26/95.

- A. Presentation of proposed rules and rule amendments - H.A. Caves
- B. Questions and Discussion by Board
- C. Questions, Comments and Discussion by Public
- D. Discussion by Board
- E. Roll Call Vote 11-0

Agenda Items 14 through 23 are from the Water Quality Management Advisory Council

14. Consideration of changes to Chapter 252:605, Discharges OPDES, for consistency with the uniform rules, to simplify procedural text and renew general permits.

- A. Presentation of changes - Craig Kennamer
- B. Questions and Discussion by Board
- C. Questions, Comments and Discussion by Public
- D. Discussion by Board
- E. Roll Call Vote - 11-0

changed at staff request

changed

15. Consideration of changes to Chapter 252:610, General Water Quality rules, for consistency with the uniform rules and to simplify procedural text.

- A. Presentation of changes - Craig Kennamer
- B. Questions and Discussion by Board

D. Discussion by Board

E. Roll Call Vote 11-0

✓ 16. Consideration of changes to Chapter 252:615, Industrial Wastewater Systems, for consistency with the uniform rules and to simplify procedural text.

A. Presentation of changes - Jon Craig

B. Questions and Discussion by Board

C. Questions, Comments and Discussion by Public

D. Discussion by Board

E. Roll Call Vote 11-0

✓ 17. Consideration of changes to Chapter 252:620, Non-Industrial Impoundments, for consistency with the uniform rules and to simplify procedural text.

A. Presentation of changes - Jon Craig

B. Questions and Discussion by Board

C. Questions, Comments and Discussion by Public *changed*

D. Discussion by Board

E. Roll Call Vote 11-0

✓ 18. Consideration of changes to Chapter 252:625, Public Water Supply Construction, for consistency with the uniform rules and to simplify procedural text.

A. Presentation of changes - Jon Craig

B. Questions and Discussion by Board

C. Questions, Comments and Discussion by Public *changed*

D. Discussion by Board

E. Roll Call Vote 11-0

✓ 19. Consideration of changes to Chapter 252:640, Residential Sewage Disposal, for consistency with the uniform rules and to simplify procedural text.

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY

SUBCHAPTER 13. FORMAL PUBLIC MEETINGS AND ADMINISTRATIVE
PERMIT PROCEEDINGS

PART 1. FORMAL PUBLIC MEETINGS

252:2-13-1. Formal public meetings [REVOKED]

~~(a) Location. The DEQ shall determine the location and the facility at which a formal public meeting on a permit application and/or draft permit shall be held.~~

~~(b) Purpose. The designated presiding officer of a formal public meeting shall establish the procedure by which such meeting shall be conducted based on the requirements of the Code and applicable program specific rules.~~

Agency Note (1): The language of this revoked section has been amended and can now be found at 252:2-14-31(g).

SUBCHAPTER 15. ENVIRONMENTAL PERMIT PROCESSING TIMESUNIFORM PERMITTING PROCEDURES

PART 1. UNIFORM PERMITTING PROGRAM IN GENERAL

252:2-15-1. Purpose and applicability

(a) Purpose. The rules in this Subchapter establish time periods for issuance or denial of environmental permits and licenses that are required by law implement the Oklahoma Uniform Environmental Permitting Act, 27A O.S.Supp. 1995, §2-14-101 et seq., and apply to applicants for and holders of DEQ permits and other authorizations.

(b) Permits included. The provisions of this Subchapter apply to permits reviewed by the following Programs and their successors:

~~(1) the Air Quality Division;~~

~~(2) the Hazardous Waste Management Program;~~

~~(3) the Solid Waste Management Program; and~~

~~(4) the Water Quality Division.~~ Supersedes inconsistent rules. Except as otherwise provided by statute, the provisions of this Subchapter shall supersede any inconsistent provision of other Chapters of this Title.

(c) Supersedes inconsistent rules. Except as otherwise provided by statute, the provisions of this Subchapter shall supersede any inconsistent provision of other Chapters of this Title. Applicability.

(1) Applications filed with the DEQ on and after July 1, 1996, are subject to the procedural requirements of 27A O.S.Supp. 1995, § 2-14-101 et seq., this Subchapter and other applicable rules of the Board.

(2) Applications filed before July 1, 1996, are subject to the statutory and regulatory procedural requirements existing at the time of the filing unless the applicant elects to comply with the statutes and rules described in paragraph 1 of this subsection.

252:2-15-2. Definitions

~~The~~In addition to terms defined in 252:2-1-2, the following words and terms, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Act" means the Oklahoma Uniform Environmental Permitting Act, 27A O.S. § 2-15-101 *et seq.*

"Administratively complete" means an application that contains the information specified in the application form and rules in sufficient detail to allow the DEQ to begin technical review.

~~"Application" means a document prepared in accordance with the rules and the forms and instruction provided by the respective Program and submitted with the expectation of providing that information necessary for review and determination of the permit. The application consists of the initial submittal and all supplements~~See 27A O.S. Supp. 1995, § 2-14-103(1).

"Major facility", as used in air quality tier classifications, means a source subject to the permitting requirements of 40 CFR Part 70.

"Minor source", as used in air quality tier classifications, means a source that is not subject to the permitting requirements of 40 CFR Part 70.

"Off-site", as used in hazardous waste, solid waste and UIC tier classifications, means a facility which receives waste from various sources for treatment, storage, processing, or disposal.

"On-site", as used in hazardous waste, solid waste and UIC tier classifications, means a facility owned and operated by an industry for the treatment, storage, processing, or disposal of its own waste exclusively.

"Part" means a numbered Part of this Subchapter.

"Program" means the services or divisions of the DEQ that are specified in Section 252:002 15 1a regulatory section or division of the DEQ.

"Submittal" means each separately submitted a document or group of document package that forms a documents provided as part of an application.

"Supplement" means a response to a request for additional information following completeness and technical reviews, and information submitted voluntarily by the applicant.

"UIC" means underground injection control.

252:2-15-3. Common permitting procedures and timelines

~~(a) Filing of applications. Unless otherwise provided in this Subchapter, upon the receipt of an application for filing and the proper fee, each Program shall:~~

~~(1) file stamp the application with the date of receipt, the Service name and an identification number;~~

~~(2) assign the application to a named person who will do the review; and~~

~~(3) timely log this information.~~

~~(b) Administrative completeness review. Unless otherwise provided in this Subchapter, the reviewer shall have 60 calendar days from the logged date of filing in which to initially determine if the application is administratively complete.~~

~~(1) Not complete.~~ Upon determining that the application is not administratively complete, the reviewer shall immediately notify the applicant by mail, describing with reasonable specificity the inadequacies and measures necessary to complete the application. This notice shall not require or preclude further review of the application and further requests for specific information. If the reviewer does not notify the applicant of such inadequacies, the period for technical review shall begin at the close of the administrative completeness review period.

~~(2) Complete.~~ Upon a determination that the application is administratively complete, the reviewer shall log the date and immediately notify the applicant by mail. The period for technical review begins.

~~(c) Technical review.~~ Each Program involved shall have a certain time period to review each application for technical compliance with the relevant regulations and reach a final determination.

~~(d) When times are tolled.~~ The time period for review is tolled (the clock stops) during litigation, during periods of public review and participation [includes public meetings and administrative permit hearings (and waiting periods therefor), public comment periods, time required for DEQ preparation of responses to public comments received, and review by other federal or State agencies], or when the Program has asked for supplemental information and advised the applicant that the time period is tolled pending receipt, or during the time in which an applicant amends his application of his own accord.

~~(e) Supplemental time.~~ To compensate for time spent in reviewing inadequate materials, the DEQ's notice of deficiencies and request for supplemental information may specify that up to 30 additional calendar days may be added to the application processing time. This may also include the number of days the DEQ spent in preparing the notice and request. Requests for supplemental information and data may also specify that additional days for technical review equal to the number of days the applicant used to prepare and submit such supplement may be added to the application review time.

~~(f) Withdrawal.~~ Unless specified otherwise in a program's rules, failure by an applicant to supplement an application within 180 days after the request shall be deemed to be a withdrawal unless the time is extended by agreement for good cause.

~~(g) Extensions.~~ Extensions to the timelines of this Subchapter may be made as provided by law. [AMENDED AND RENUMBERED TO 252:2-15-70]

252:2-15-4. Pending failures

~~(a) Circumstances outside agency control.~~ Technical review times shall be tolled for specified times when, prior to the deadline, the Executive Director certifies that a failure to meet a deadline is imminent and is caused by circumstances outside the control of the DEQ. Such circumstances include, but are not limited to, acts of God, a substantial and unexpected increase in the number of applications filed, and additional review duties imposed on the DEQ from an outside source.

~~(b) Other circumstances.~~ Where circumstances that are not clearly outside the control of the DEQ may cause a failure to meet a

deadline, then:

- ~~(1) at least thirty (30) calendar days prior to the deadline the DEQ shall reassign staff and/or retain outside consultants to meet such deadline.~~
- ~~(2) the Applicant may agree to an extension of time for a specific purpose and period of time with refund of the entire application fee, unless a refund is prohibited by law. [AMENDED AND RENUMBERED TO 252:2-15-71]~~

252:2-15-5. Air quality permit timelines

~~The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.~~

- ~~(1) Construction permits:
 - ~~(A) PSD 540 days.~~
 - ~~(B) Major Sources 365 days.~~
 - ~~(C) Minor 180 days.~~~~
- ~~(2) Operating permits for new construction or modifications 730 days.~~
- ~~(3) Relocation permits 30 days. [AMENDED AND RENUMBERED TO OAC 252:2-15-72]~~

252:2-15-6. Hazardous waste permit timelines

~~The following hazardous waste permits and authorizations shall be technically reviewed and issued or denied within the timeframes specified below.~~

- ~~(1) Hazardous waste permits:
 - ~~(A) New RCRA Operations permit or the renewal thereof 300 days.~~
 - ~~(B) New State Recycling permit 300 days.~~
 - ~~(C) New State Construction permit 300 days.~~
 - ~~(D) Class 3 permit modifications 300 days.~~
 - ~~(E) Underground Injection Control permit 300 days.~~~~
- ~~(2) Class 1 and Class 2 permit modifications 300 days.~~
- ~~(3) Closure plans, post closure plans and transfer station plans and plan modifications 300 days. [AMENDED AND RENUMBERED TO OAC 252:2-15-73]~~

252:2-15-7. Solid waste permit timelines

~~Times for issuance or denial of applications for all solid waste permits shall be in accordance with applicable chapters of Solid Waste Regulations, OAC 252:500 et seq., or, if not specified therein, the technical review period for solid waste permit applications and for each submittal and resubmittal related thereto shall be 90 days, subject to OAC 252:2-15-3. [AMENDED AND RENUMBERED TO OAC 252:2-15-74]~~

252:2-15-8. Water quality permit timelines

~~(a) Applications for Water Quality permits, certifications and authorizations shall be technically reviewed and permits shall be issued or denied within the following timeframes:~~

- ~~(1) Dairy Waste 180 days~~
- ~~(2) Discharges 180 days~~

- ~~(3) 401 Certifications — 180 days~~
 - ~~(4) Industrial Wastewater other than discharge — 180 days~~
 - ~~(5) Pretreatment Trust Users — 180 days~~
 - ~~(6) Public Water Supply — 90 days~~
 - ~~(7) Septage and Septic Tank Cleaners — 120 days~~
 - ~~(8) Underground Injection Control (nonhazardous) — 420 days~~
 - ~~(9) Water Pollution Control Construction — 90 days~~
- ~~(b) Preliminary and secondary applications associated with the State Revolving Fund shall be reviewed and, if acceptable, transmitted to the Oklahoma Water Resources Board for approval. If the DEQ can not concur in the preliminary or secondary loan applications, it will notify the applicant in writing. Transmittal of application to the Oklahoma Water Resources Board or a written notice of non approval shall occur within 90 days after receipt of the application. [AMENDED AND RENUMBERED TO OAC 252:2-15-75]~~

252:2-15-9. Other permits

~~Any environmental license or permit that is not described in this Subchapter shall not be subject to these time frames but shall be reviewed with all due and reasonable speed. [RENUMBERED TO OAC 252:2-15-76]~~

PART 3. TIER I, II AND III PROCESS REQUIREMENTS

252:2-15-26. Tier processes described

To implement the three tiered permitting processes of the Act, applications are classified in Part 5 as Tier I, II or III. The steps an applicant must follow for a Tier I, II or III application are shown in Appendix C of this Chapter.

252:2-15-27. Unclassified applications

The tier designation for any type of application not classified in this Subchapter shall be determined according to 27A O.S.Supp. 1995, § 201.

252:2-15-28. [RESERVED]

252:2-15-29. Published notices

(a) Notice content. In addition to content requirements of the Act, all published legal notice(s) shall contain the:

- (1) Name and address of the applicant;
- (2) Name, address and legal description of the site, facility and/or activity;
- (3) Purpose of notice;
- (4) Type of permit or permit action being sought;
- (5) Description of activities to be regulated;
- (6) Locations where the application may be reviewed;
- (7) Names, addresses and telephone numbers of contact persons for the DEQ and for the applicant;
- (8) Description of public participation opportunities and time period for comment and requests;
- (9) Any other information required by DEQ rules; and
- (10) Any information the applicant deems relevant.

(b) Proof of publication. An applicant, within twenty (20) days after the date of publication, shall provide the DEQ with a written affidavit of publication for each notice published. In case of a mistake in a published notice, the DEQ may approve the publication of a legal notice of correction or may require that the entire legal notice be republished.

Agency Note (2): 27A O.S. Sections 2-14-301, 302 and 304 add requirements for Tier II and Tier III notices.

252:2-15-30. Tier I process requirements

(a) Pre-application conference. Prior to filing an application, an applicant may request a conference with the DEQ.

(b) Application filing.

(1) Copies. Two (2) copies of a Tier I application shall be filed with the DEQ except when the application form or instructions specifies that only one (1) copy is needed. Applicants for residential systems (OAC 252:640) and small public sewage systems (OAC 252:655-29) permits shall file their two copies with the local DEQ office for the county in which the real property is located.

(2) Fees. Fees established in DEQ program rules shall be payable at the time of application and are not refundable.

(3) Notice to landowner. Applicants must demonstrate to the DEQ that they are not seeking a permit for land or for any operation upon land owned by others without their knowledge. Applicants shall certify by affidavit filed with the DEQ that: they own the real property; or they have a current lease or easement which is given to accomplish the permitted purpose; or if they do not own the real property, they have provided legal notice to those who do. The DEQ may rely on the affidavit, and the applicants shall bear the burden of meeting any challenges. Legal notice is governed by Oklahoma law which, for example, authorizes: service by sheriff or private process server; service by certified mail, restricted delivery; or service by publication, if the person cannot be located through due diligence. Notice to the person who signed a lease or to the administrator or executor of a trust or an estate may be sufficient.

(4) Withdrawal. An applicant may withdraw an application at any time with written notice to the DEQ and forfeiture of fees.

(c) Application review. Unless stated otherwise in new laws or rules, applications are subject to the laws and rules of the DEQ as they exist on the date of filing and afterward as changed, up to the date of issuance or denial. See Part 7 for review procedures and time lines.

(d) Issuance or denial.

(1) Compliance required. A new, modified or renewed permit or other authorization shall not be issued until the DEQ has determined the application is in substantial compliance with applicable requirements of the Code and rules of the Board.

(2) Conditions for issuance. The Department may not issue a new, modified or renewed permit or other authorization if:

- (A) The applicant has not paid all monies owed to the DEQ or is not in substantial compliance with the Code, rules of the Board and the terms of any existing DEQ permits and orders. The DEQ may impose special conditions on the applicant to assure compliance and/or a separate schedule which the DEQ considers necessary to achieve required compliance; or
- (B) Material facts were misrepresented or omitted from the application and the applicant knew or should have known of such misrepresentation or omission.

(3) Issuance. See 252:2-15-28.

252:2-15-31., Tier II process requirements

(a) Pre-application conference. "Tier I" requirements apply. See 252:2-15-30.

(b) Application. "Tier I" requirements apply. See 252:2-15-30, except the applicant shall file three (3) copies of the application with the DEQ and place one (1) copy for public review in the county in which the site, facility or activity is located.

(c) Published notice of filing. See 27A O.S. § 2-14-301 and 252:2-15-29.

(d) Application review. "Tier I" requirements apply. See 252:2-15-30.

(e) Draft permit or draft denial. See 27A O.S. § 2-14-302.

(f) Notice of draft permit/denial. See 27A O.S. § 2-14-302 and 252:2-15-29. For permit modification actions, only those issues relevant to the modification(s) shall be reopened for public review and comment.

(1) Exception to notice requirement. Applicants for solid waste transfer station permits shall be exempt from public comment and public meeting requirements if the board of county commissioners of the county of the proposed site, after opportunity for written or oral public comment, has found the application to be within the scope of the county's solid waste management plan. See 27A O.S. Supp. 1995, §2-10-307.

(2) Additional notice. In addition to Section 302 notice:

(A) Applicants for a NPDES, RCRA or UIC permit are subject to applicable additional notice provisions of federal requirements promulgated as rules of the Board.

(B) Applicants for a proposed wastewater discharge or emissions permit which may affect the water quality or air quality of a neighboring state must give written notice to the environmental regulatory agency of that state.

(C) Applicants for a solid waste landfill permit shall provide notice by certified mail, return receipt requested, to owners of mineral interests and to adjacent landowners whose property may be substantially affected by installation of a landfill site. See *DuLaney v. OSDH*, Okl., 868 P.2d 676 (1993).

(g) Public comment and formal public meeting. See 27A O.S. § 2-14-302 and 27A O.S. § 2-14-303. The DEQ shall determine the location of any formal public meeting to be held and the designated presiding officer shall establish its procedures.

(h) Response to comments. See 27A O.S. § 2-14-304.

(i) Issuance or denial. "Tier I" requirements apply. See 252:2-15-30.

Agency Note (3): Additional federal notice requirements may include radio announcements and letters to certain entities. See 40 CFR Part 124. For modifications of RCRA permits, also see Part 270, Subpart D.

252:2-15-32. Tier III process requirements

(a) Pre-application conference. "Tier I" requirements apply. See 252:2-15-30.

(b) Filing, fees and withdrawal. "Tier II" requirements apply. See 252:2-15-31.

(c) Notice of filing and process meeting opportunity. The applicant shall include a 30-day opportunity to request a process meeting in the published notice of filing. See 27A O.S. § 2-14-301(B) and 252:2-15-29.

(d) Process meeting. See 27A O.S. § 2-14-301(B). The location of and procedures for the process meeting shall be determined by the DEQ.

(e) Application review. "Tier I" requirements apply. See 252:2-15-30.

(f) Draft permit or draft denial. See 27A O.S. § 2-14-302.

(g) Notice of draft permit/denial. "Tier II" requirements apply. See 252:2-15-31.

(h) Public comment period and public meeting. "Tier II" requirements apply. See 252:2-15-31.

(i) Proposed permit and notice. After the DEQ reviews public comments and prepares a proposed permit by amending the draft permit in response to comments as necessary, the applicant shall publish notice of the proposed permit and of the opportunity to request an administrative permit hearing. See 27A O.S. § 2-14-304 and 252:2-15-29.

(j) Administrative permit hearing. See 27A O.S. § 2-14-304 and, for procedures, Subchapter 13 of this Chapter, except references to "draft permit" in Subchapter 13 shall mean "proposed permit" as used in 27A O.S. § 2-14-103 and 27A O.S. § 2-14-304 (C) and (D).

(k) Response to comments. See 27A O.S. § 2-14-304.

(l) Issuance or denial. "Tier I" requirements apply. See 252:2-15-30.

PART 5. TIER CLASSIFICATIONS [RESERVED]

PART 7. REVIEW PROCEDURES AND PERMITTING TIME LINES

252:2-15-70. Common review procedures and time lines

(a) Receipt of applications. Unless otherwise provided in this Subchapter, upon the receipt of an application for filing and the proper fee, each Program shall:

(1) File-stamp the application with the date of receipt, the Division and/or Program name and an identification number;

(2) Assign the application to a named person who will do the review; and

(3) Timely log this information.

(b) Administrative completeness review. Unless otherwise provided in the Code or this Subchapter, the reviewer shall have 60 calendar days from the logged date of filing in which to determine whether the application is administratively complete.

(1) Not complete.

(A) Upon determining that the application is not complete, the reviewer shall immediately notify the applicant by mail, describing with reasonable specificity the inadequacies and measures necessary to complete the application.

(B) This notice shall not require or preclude further review of the application and further requests for specific information.

(C) If the reviewer does not notify the applicant of inadequacies, the period for technical review shall begin at the close of the administrative completeness review period.

(2) Complete. When the application is administratively complete, the reviewer shall log the date and immediately notify the applicant by mail. The period for technical review begins.

(c) Technical review. Each Program involved shall have a certain time period to review each application for technical compliance with the relevant regulations and reach a final determination.

(d) When times are tolled. The time period for review is tolled (the clock stops) during litigation, during periods of public review and participation [includes public meetings and administrative permit hearings (and waiting periods), public comment periods, time required for DEQ preparation of responses to public comments received, and review by other federal or State agencies], or when the Program has asked for supplemental information and advised the applicant that the time period is tolled pending receipt, or during the time in which an applicant amends his application of his own accord.

(e) Supplemental time. To compensate for time spent in reviewing inadequate materials, the DEQ's notice of deficiencies and request for supplemental information may specify that up to 30 additional calendar days may be added to the application processing time. Requests for supplemental information and data may also specify that additional days for technical review equal to the number of days the applicant used to prepare and submit such supplement may be added to the application review time.

(f) Failure to respond. Except for good cause shown, failure by an applicant to supplement an application within 180 days after the mailing date of a notice of deficiencies, or by a date agreed to by the DEQ and the applicant, shall void the application and forfeit the fees. The DEQ shall notify the applicant of an opportunity to show cause why this should not occur. Failure to show cause shall result in an order appealable according to 75 O.S. § 318.

(g) Extensions. Extensions to the time lines of this Subchapter may be made as provided by law.

252:2-15-71. Pending failures

(a) Circumstances outside agency control. Technical review times shall be tolled for specified times when, prior to the deadline,

the Executive Director certifies that a failure to meet a deadline is imminent and is caused by circumstances outside the control of the DEQ. Such circumstances include; but are not limited to, acts of God, a substantial and unexpected increase in the number of applications filed, and additional review duties imposed on the DEQ from an outside source.

(b) Other circumstances. Where circumstances that are not clearly outside the control of the DEQ may cause a failure to meet a deadline, then:

(1) At least thirty (30) calendar days prior to the deadline the DEQ shall reassign staff and/or retain outside consultants to meet such deadline.

(2) The applicant may agree to an extension of time for a specific purpose and period of time with refund of the entire application fee, unless a refund is prohibited by law.

252:2-15-72. Air quality permit time lines

The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

(1) Construction permits:

(A) PSD (Part 70 sources) - 540 days.

(B) Major Sources (Part 70 sources other than PSD) - 365 days.

(C) Minor Sources - 180 days.

(2) Operating permits:

(A) Major Sources - 540 days.

(B) Minor Sources - 365 days.

(3) Relocation permits - 30 days.

252:2:15-73. Hazardous waste permit time lines

The following hazardous waste permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

(1) Hazardous waste permits:

(A) New RCRA permit or the renewal thereof - 300 days.

(B) New State Recycling permit - 300 days.

(C) Class 3 permit modifications - 300 days.

(2) Closure plans, post-closure plans and transfer station plans and plan modifications - 300 days.

252:2:15-74. Solid waste permit time lines

The technical review period for solid waste permit applications and for each submittal and resubmittal shall be 90 days, subject to OAC 252:2:15-7-70.

252:2:15-75. Water quality permit time lines

Applications for new or modified water quality permits, certifications and authorizations shall be technically reviewed and permits shall be issued or denied within the following time frames:

(1) Discharges - 180 days.

(2) 401 Certifications - 180 days.

(3) Industrial Wastewater other than discharge - 180 days.

- (4) Pretreatment Trust Users - 180 days.
- (5) Public Water Supply - 90 days.
- (6) Underground Injection Control - 300 days.
- (7) Water Pollution Control Construction - 90 days.
- (8) Sludge management plan - 180 days.

252:2:15-76. Other permits

Any environmental license or permit that is not described in this Subchapter shall not be subject to these time frames but shall be reviewed with all due and reasonable speed.

252:2-15-77. Pre-issuance permit review and correction

(a) Review. In addition to its own review, the DEQ may, for Tier I and II, and shall, for Tier III, at any time before issuance, ask an applicant to review a permit for calculation and clerical errors or mistakes of fact or law.

(b) Correction. The DEQ may correct any permit before it is issued.

(1) Notice of significant corrections. For permits based on Tier II and III applications, an applicant shall publish legal notice in one newspaper local to the site of any correction or change proposed by the DEQ which significantly alters a facility's permitted size, capacity or limits.

(2) Comments. The DEQ may open a public comment period, and/or reconvene a public meeting and/or administrative hearing to receive public comments on the proposed correction(s).

Agency Note (4): For statutory provisions related to administrative review of permit conditions or actions after issuance, see 27A O.S.Supp. 1995, § 2-14-304(H), "Denial of permit"; 75 O.S. § 317, "Rehearing, reopening or reconsideration of final order"; and 75 O.S. § 307, "Declaratory rulings".

PART 9. CONSOLIDATED PERMITTING

252:2-15-90. Consolidation of permitting process

(a) Discretionary. Whenever an applicant applies for more than one permit for the same site, the DEQ may authorize, with the consent of the applicant, the review of the applications to be consolidated so that each required draft permit, draft denial and/or proposed permit is prepared at the same time and public participation opportunities are combined.

(b) Scope. When consolidation is authorized by the DEQ:

(1) The procedural requirements for the highest specified tier shall apply to each affected application.

(2) The DEQ may also authorize the consolidation of public comment periods, process and public meetings, and/or administrative permit hearings.

(3) Final permits may be issued together.

(c) Renewal. The DEQ may coordinate the expiration dates of new permits issued to an applicant for the same facility or activity so that all the permits are of the same duration.

(d) Multiple modifications. Subsections (a) and (b) of this

section shall also apply to multiple Tier II and III applications for permit modifications.

APPENDIX C. PERMITTING PROCESS SUMMARY [NEW]

Steps	Tier I	Tier II	Tier III
Filing - Applicant files application, pays any required fee, and provides landowner notice. Applicant may meet with the DEQ staff prior to this.	Yes	Yes	Yes
Notice of filing - Applicant publishes notice in one newspaper local to site.	No	Yes	Yes
Process meeting - Notice - 30-day opportunity is published with notice of filing. DEQ holds meeting if requested and sufficient interest is shown.	No	No	Yes
Administrative completeness review - DEQ reviews application and asks applicant to supply any missing information.	Yes	Yes	Yes
Technical review - DEQ reviews application for technical compliance and requests applicant to cure any deficiencies.	Yes	Yes	Yes
Draft permit or draft denial - DEQ prepares this after completing review.	No	Yes	Yes
Notice of draft permit, public comment period and public meeting request opportunity - Applicant publishes this in one newspaper local to site. (DEQ publishes notice of draft denial.)	No	Yes	Yes
Public comment period - 45 days for hazardous waste treatment, storage or disposal draft permits; 30 days for all others.	No	Yes	Yes
Public meeting - Conducted by DEQ if held	No	Yes	Yes
Review of comments - DEQ (written response)	No	Yes	Yes
Proposed permit - DEQ prepares this in response to comments on draft permit	No	No	Yes
Notice of proposed permit - Applicant publishes, in one newspaper local to site, notice of 20-day opportunity to review permit and request administrative hearing.	No	No	Yes
Administrative permit hearing - Conducted by DEQ if held. Results in final order.	No	No	Yes
Issuance or denial - DEQ's final decision	Yes	Yes	Yes

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 002. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY

SUBCHAPTER 15. UNIFORM PERMITTING PROCEDURES

PART 1. UNIFORM PERMITTING PROGRAM IN GENERAL

252:002-15-1. Purpose and scope

(a) **Purpose.** ~~The rules in this Subchapter establish time periods for issuance or denial of environmental permits and licenses that are required by law~~ implement the Oklahoma Uniform Environmental Permitting Act, 27A O.S.Supp. 1995, §2-14-101 et seq., and apply to applicants for and holders of DEQ permits and other authorizations.

(b) **Supersedes inconsistent rules.** Except as otherwise provided by statute, the provisions of this Subchapter shall supersede any inconsistent provision of other Chapters of this Title.

(c) **Applicability.**

(1) Applications filed with the DEQ on and after July 1, 1996, are subject to the procedural requirements of 27A O.S.Supp. 1995, § 2-14-101 et seq., this Subchapter and other applicable rules of the Board.

(2) Applications filed before July 1, 1996, are subject to the statutory and regulatory procedural requirements existing at the time of the filing unless the applicant elects to comply with the statutes and rules described in paragraph 1 of this subsection.

252:002-15-2. Definitions

The~~In~~ addition to terms defined in 252:002-1-2, the following words and terms, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Act" means the Oklahoma Uniform Environmental Permitting Act, 27A O.S. § 2-15-101 et seq.

"Administratively complete" means an application that contains the information specified in the application form and rules in sufficient detail to allow the DEQ to begin technical review.

"Application" means a document prepared in accordance with the rules and the forms and instruction provided by the respective Program and submitted with the expectation of providing that information necessary for review and determination of the permit. The application consists of the initial submittal and all supplements~~See 27A O.S.Supp. 1995, § 2-14-103(1).~~

"Major facility", as used in air quality tier classifications, means a source subject to the permitting requirements of 40 CFR Part 70.

"Minor source", as used in air quality tier classifications, means a source that is not subject to the permitting requirements of 40 CFR Part 70.

"Off-site", as used in hazardous waste, solid waste and UIC tier classifications, means a facility which receives waste from various sources for treatment, storage, processing, or disposal.

"On-site", as used in hazardous waste, solid waste and UIC tier classifications, means a facility owned and operated by an industry

for the treatment, storage, processing, or disposal of its own waste exclusively.

"Part" means a numbered Part of this Subchapter.

"Program" means the sections or divisions a regulatory section or division of the DEQ.

"Submittal" means each separately submitted a document or group of document package that forms a documents provided as part of an application.

"Supplement" means a response to a request for additional information following completeness and technical reviews, and information submitted voluntarily by the applicant.

"UIC" means underground injection control.

252:002-15-3. Common permitting procedures and timelines

Amended and renumbered to OAC 252:002-15-70.

252:002-15-4. Pending failures

Amended and renumbered to OAC 252:002-15-71.

252:002-15-5. Air quality permit timelines

Amended and renumbered to OAC 252:002-15-72.

252:002-15-6. Hazardous waste permit timelines

Amended and renumbered to OAC 252:002-15-73.

252:002-15-7. Solid waste permit timelines

Amended and renumbered to OAC 252:002-15-74

252:002-15-8. Water quality permit timelines

Amended and renumbered to OAC 252:002-15-75.

252:002-15-9. Other permits

Amended and renumbered to OAC 252:002-15-76.

PART 3. TIER I, II AND III PROCESS REQUIREMENTS

252:002-15-26. Tier processes described

To implement the three tiered permitting processes of the Act, applications are classified in Part 5 as Tier I, II or III. The steps an applicant must follow for a Tier I, II or III application are shown in Table 15A.

[NEW]
TABLE 15A
Permitting Process Summary

Steps	Tier I	Tier II	Tier III
Filing - Applicant files application, pays any required fee, and provides landowner notice. Applicant may meet with the DEQ staff prior to this.	Yes	Yes	Yes
Notice of filing - Applicant publishes notice in one newspaper local to site.	No	Yes	Yes
Process meeting - Notice - 30-day opportunity is published with notice of filing. DEQ holds meeting if requested and sufficient interest is shown.	No	No	Yes
Administrative completeness review - DEQ reviews application and asks applicant to supply any missing information.	Yes	Yes	Yes
Technical review - DEQ reviews application for technical compliance and requests applicant to cure any deficiencies.	Yes	Yes	Yes
Draft permit or draft denial - DEQ prepares this after completing review.	No	Yes	Yes
Notice of draft permit, public comment period and public meeting request opportunity - Applicant publishes this in one newspaper local to site. (DEQ publishes notice of draft denial.)	No	Yes	Yes
Public comment period - 45 days for hazardous waste treatment, storage or disposal draft permits; 30 days for all others.	No	Yes	Yes
Public meeting - Conducted by DEQ if held	No	Yes	Yes
Review of comments - DEQ (written response)	No	Yes	Yes
Proposed permit - DEQ prepares this in response to comments on draft permit	No	No	Yes
Notice of proposed permit - Applicant publishes, in one newspaper local to site, notice of 20-day opportunity to review permit and request administrative hearing.	No	No	Yes
Administrative permit hearing - Conducted by DEQ if held. Results in final order.	No	No	Yes
Issuance or denial - DEQ's final decision	Yes	Yes	Yes

252:002-15-27. Unclassified applications

The tier designation for any type of application not classified in this Subchapter shall be determined according to 27A O.S. Supp. 1995, § 201.

252:002-15-29. Published notices

(a) Notice content. In addition to content requirements of the Act, all published legal notice(s) shall contain the:

- (1) Name and address of the applicant;
- (2) Name, address and legal description of the site, facility and/or activity;
- (3) Purpose of notice;
- (4) Type of permit or permit action being sought;
- (5) Description of activities to be regulated;
- (6) Locations where the application may be reviewed;
- (7) Names, addresses and telephone numbers of contact persons for the DEQ and for the applicant;
- (8) Description of public participation opportunities and time period for comment and requests;
- (9) Any other information required by DEQ rules; and
- (10) Any information the applicant deems relevant.

(b) Proof of publication. An applicant, within twenty (20) days after the date of publication, shall provide the DEQ with a written affidavit of publication for each notice published. In case of a mistake in a published notice, the DEQ may approve the publication of a legal notice of correction or may require that the entire legal notice be re-published.

Agency Note (1): 27A O.S. Sections 2-14-301, 302 and 304 add requirements for Tier II and Tier III notices.

252:002-15-30. Tier I process requirements

(a) Pre-application conference. Prior to filing an application, an applicant may request a conference with the DEQ.

(b) Application filing.

(1) Copies. Two (2) copies of a Tier I application shall be filed with the DEQ except when the application form or instructions specifies that only one (1) copy is needed. Applicants for residential systems (OAC 252:640) and small public sewage systems (OAC 252:655-29) permits shall file their two copies with the local DEQ office for the county in which the real property is located.

(2) Fees. Fees established in DEQ program rules shall be payable at the time of application and are not refundable.

(3) Notice to landowner. Applicants must demonstrate to the DEQ that they are not seeking a permit for land or for any operation upon land owned by others without their knowledge. Applicants shall certify by affidavit filed with the DEQ that: they own the real property; or they have a current lease or easement which is given to accomplish the permitted purpose; or if they do not own the real property, they have provided legal notice to those who do. The DEQ may rely on the affidavit, and the applicants shall bear the burden of meeting any challenges.

Legal notice is governed by Oklahoma law which, for example, authorizes: service by sheriff or private process server; service by certified mail, restricted delivery; or service by publication, if the person cannot be located through due diligence. Notice to the person who signed a lease or to the administrator or executor of a trust or an estate may be sufficient.

(4) **Withdrawal.** An applicant may withdraw an application at any time with written notice to the DEQ and forfeiture of fees.

(c) **Application review.** Unless stated otherwise in new laws or rules, applications are subject to the laws and rules of the DEQ as they exist on the date of filing and afterward as changed, up to the date of issuance or denial. See Part 7 for review procedures and time lines.

(d) **Issuance or denial.**

(1) **Compliance required.** A new, modified or renewed permit or other authorization shall not be issued until the DEQ has determined the application is in substantial compliance with applicable requirements of the Code and rules of the Board.

(2) **Conditions for issuance.** The Department may not issue a new, modified or renewed permit or other authorization if:

(A) The applicant has not paid all monies owed to the DEQ or is not in substantial compliance with the Code, rules of the Board and the terms of any existing DEQ permits and orders. The DEQ may impose special conditions on the applicant to assure compliance and/or a separate schedule which the DEQ considers necessary to achieve required compliance; or

(B) Material facts were misrepresented or omitted from the application and the applicant knew or should have known of such misrepresentation or omission.

(3) **Issuance.** See 252:002-15-28.

252:002-15-31. Tier II process requirements

(a) **Pre-application conference.** "Tier I" requirements apply. See 252:002-15-30.

(b) **Application.** "Tier I" requirements apply. See 252:002-15-30, except the applicant shall file three (3) copies of the application with the DEQ and place one (1) copy for public review in the county in which the site, facility or activity is located.

(c) **Published notice of filing.** See 27A O.S. § 2-14-301 and 252:002-15-29.

(d) **Application review.** "Tier I" requirements apply. See 252:002-15-30.

(e) **Draft permit or draft denial.** See 27A O.S. § 2-14-302.

(f) **Notice of draft permit/denial.** See 27A O.S. § 2-14-302 and 252:002-15-29. For permit modification actions, only those issues relevant to the modification(s) shall be reopened for public review and comment.

(1) **Exception to notice requirement.** Applicants for solid waste transfer station permits shall be exempt from public comment and public meeting requirements if the board of county commissioners of the county of the proposed site, after opportunity for written or oral public comment, has found the

application to be within the scope of the county's solid waste management plan. See 27A O.S. Supp. 1995, §2-10-307.

(2) Additional notice. In addition to Section 302 notice:

(A) Applicants for an NPDES, RCRA or UIC permit are subject to applicable additional notice provisions of federal requirements promulgated as rules of the Board.

(B) Applicants for a proposed wastewater discharge or emissions permit which may affect the water quality or air quality of a neighboring state must give written notice to the environmental regulatory agency of that state.

(C) Applicants for a solid waste landfill permit shall provide notice by certified mail, return receipt requested, to owners of mineral interests and to adjacent landowners whose property may be substantially affected by installation of a landfill site. See DuLaney v. OSDH, Okl., 868 P2d 676 (1993).

(g) Public comment and formal public meeting. See 27A O.S. § 2-14-302 and 27A O.S. § 2-14-303. The DEQ shall determine the location of any formal public meeting to be held and the designated presiding officer shall establish its procedures.

(h) Response to comments. See 27A O.S. § 2-14-304.

(i) Issuance or denial. "Tier I" requirements apply. See 252:002-15-30.

Agency Note (2): Additional federal notice requirements include radio announcements and letters to certain entities. For example see 40 CFR Part 124.

252:002-15-32. Tier III process requirements

(a) Pre-application conference. "Tier I" requirements apply. See 252:002-15-30.

(b) Filing, fees and withdrawal. "Tier II" requirements apply. See 252:002-15-31.

(c) Notice of filing and process meeting opportunity. The applicant shall include a 30-day opportunity to request a process meeting in the published notice of filing. See 27A O.S. § 2-14-301(B) and 252:002-15-29.

(d) Process meeting. See 27A O.S. § 2-14-301(B). The location of and procedures for the process meeting shall be determined by the DEQ.

(e) Application review. "Tier I" requirements apply. See 252:002-15-30.

(f) Draft permit or draft denial. See 27A O.S. § 2-14-302.

(g) Notice of draft permit/denial. "Tier II" requirements apply. See 252:002-15-31.

(h) Public comment period and public meeting. "Tier II" requirements apply. See 252:002-15-31.

(i) Proposed permit and notice. After the DEQ reviews public comments and prepares a proposed permit by amending the draft permit in response to comments as necessary, the applicant shall publish notice of the proposed permit and of the opportunity to request an administrative permit hearing. See 27A O.S. § 2-14-304 and 252:002-15-29.

(j) Administrative permit hearing. See 27A O.S. § 2-14-304 and, for procedures, Subchapter 13 of this Chapter, except references to "draft permit" in Subchapter 13 shall mean "proposed permit" as used in 27A O.S. § 2-14-103 and 27A O.S. § 2-14-304 (C) and (D).

(k) Response to comments. See 27A O.S. § 2-14-304.

(l) Issuance or denial. "Tier I" requirements apply. See 252:002-15-30.

PART 7. REVIEW PROCEDURES AND PERMITTING TIME LINES

252:002-15--3-70. Common ~~permitting review~~ procedures and ~~timelines~~ time lines

(a) Filing Receipt of applications. Unless otherwise provided in this Subchapter, upon the receipt of an application for filing and the proper fee, each Program shall:

(1) ~~file stamp~~ File-stamp the application with the date of receipt, the Division and/or Program name and an identification number;

(2) ~~assign~~ Assign the application to a named person who will do the review; and

(3) ~~timely~~ Timely log this information.

(b) Administrative completeness review. Unless otherwise provided in the Code or this Subchapter, the reviewer shall have 60 calendar days from the logged date of filing in which to ~~initially~~ determine ~~if whether~~ the application is administratively complete.

(1) Not complete.

(A) Upon determining that the application is not ~~administratively~~ complete, the reviewer shall immediately notify the applicant by mail, describing with reasonable specificity the inadequacies and measures necessary to complete the application.

(B) This notice shall not require or preclude further review of the application and further requests for specific information.

(C) If the reviewer does not notify the applicant of ~~such~~ inadequacies, the period for technical review shall begin at the close of the administrative completeness review period.

(2) Complete. ~~Upon a determination that~~ When the application is administratively complete, the reviewer shall log the date and immediately notify the applicant by mail. The period for technical review begins.

(c) Technical review. Each Program involved shall have a certain time period to review each application for technical compliance with the relevant regulations and reach a final determination.

(d) When times are tolled. The time period for review is tolled (the clock stops) during litigation, during periods of public review and participation [includes public meetings and administrative permit hearings (and waiting periods ~~therefor~~), public comment periods, time required for DEQ preparation of responses to public comments received, and review by other federal or State agencies], or when the Program has asked for supplemental information and advised the applicant that the time period is tolled pending receipt, or during the time in which an applicant

amends his application of his own accord.

(e) **Supplemental time.** To compensate for time spent in reviewing inadequate materials, the DEQ's notice of deficiencies and request for supplemental information may specify that up to 30 additional calendar days may be added to the application processing time. ~~This may also include the number of days the DEQ spent in preparing the notice and request.~~ Requests for supplemental information and data may also specify that additional days for technical review equal to the number of days the applicant used to prepare and submit such supplement may be added to the application review time.

(f) **Failure to respond.** ~~Unless specified otherwise in a program's rules~~ Except for good cause shown, failure by an applicant to supplement an application within 180 days after the request shall be deemed to be a withdrawal unless the time is extended by agreement for good cause mailing date of a notice of deficiencies, or by a date agreed to by the DEQ and the applicant, shall void the application and forfeit the fees. The DEQ shall notify the applicant of an opportunity to show cause why this should not occur. Failure to show cause shall result in an order appealable according to 75 O.S. § 318.

(g) **Extensions.** Extensions to the ~~timelinetime~~ time lines of this Subchapter may be made as provided by law.

252:002-15-4--71. Pending failures

(a) **Circumstances outside agency control.** Technical review times shall be tolled for specified times when, prior to the deadline, the Executive Director certifies that a failure to meet a deadline is imminent and is caused by circumstances outside the control of the DEQ. Such circumstances include, but are not limited to, acts of God, a substantial and unexpected increase in the number of applications filed, and additional review duties imposed on the DEQ from an outside source.

(b) **Other circumstances.** Where circumstances that are not clearly outside the control of the DEQ may cause a failure to meet a deadline, then:

(1) At least thirty (30) calendar days prior to the deadline the DEQ shall reassign staff and/or retain outside consultants to meet such deadline.

(2) The applicant may agree to an extension of time for a specific purpose and period of time with refund of the entire application fee, unless a refund is prohibited by law.

252:002-15-5--72. Air quality permit ~~timelinetime~~ lines

The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

(1) Construction permits:

(A) PSD (Part 70 sources) - 540 days.

(B) Major Sources (Part 70 sources other than PSD) - 365 days.

(C) Minor Sources - 180 days.

(2) Operating permits ~~for new construction or modifications~~ minor sources - 365 days :

- (A) Major Sources - 540 days.
- (B) Minor Sources - 365 days.
- (3) Relocation permits - 30 days.

252:002:15-6-73. Hazardous waste permit ~~timelinestime~~ lines

The following hazardous waste permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

- (1) Hazardous waste permits:
 - (A) New RCRA ~~Operations~~ permit or the renewal thereof - 300 days.
 - (B) New State Recycling permit - 300 days.
 - (C) ~~New State Construction permit - 300 days.~~
 - ~~(D) Class 3 permit modifications - 300 days.~~
 - ~~(E) Underground Injection Control permit - 300 days.~~
- (2) ~~Class 1 and Class 2 permit modifications - 300 days.~~
- ~~(3) Closure plans, post-closure plans and transfer station plans and plan modifications - 300 days.~~

252:002:15-7-74. Solid waste permit ~~timelinestime~~ lines

~~Times for issuance or denial of applications for all solid waste permits shall be in accordance with applicable chapters of Solid Waste Regulations, OAC 252:520 et seq., Municipal Solid Waste Landfill Rules, OAC 252:510 et seq., or if not specified therein, the~~The technical review period for solid waste permit applications and for each submittal and resubmittal ~~related thereto~~ shall be 90 days, subject to OAC 252:002:15-7-70.

252:002:15-8-75. Water quality permit ~~timelinestime~~ lines

Applications for new or modified water quality permits, certifications and authorizations shall be technically reviewed and permits shall be issued or denied within the following time frames:

- ~~(1) Dairy Waste - 180 days~~
- ~~(2) Discharges - 180 days.~~
- ~~(3) (2) 401 Certifications - 180 days.~~
- ~~(4) (3) Industrial Wastewater other than discharge - 180 days.~~
- ~~(5) (4) Pretreatment Trust Users - 180 days.~~
- ~~(6) (5) Public Water Supply - 90 days.~~
- ~~(7) Septage and Septic Tank Cleaners - 120 days~~
- ~~(8) (6) Underground Injection Control - 420-300 days.~~
- ~~(8) (7) Water Pollution Control Construction - 90 days.~~
- (8) Sludge management plan - 180 days.

252:002:15-9-76. Other permits

Any environmental license or permit that is not described in this Subchapter shall not be subject to these time frames but shall be reviewed with all due and reasonable speed.

252:002-15-77. Pre-issuance permit review and correction

(a) Review. In addition to its own review, the DEQ may, for Tier I and II, and shall, for Tier III, at any time before issuance, ask an applicant to review a permit for calculation and clerical errors or mistakes of fact or law.

(b) Correction. The DEQ may correct any permit before it is issued.

(1) Notice of significant corrections. For permits based on Tier II and III applications, an applicant shall publish legal notice in one newspaper local to the site of any correction or change proposed by the DEQ which significantly alters a facility's permitted size, capacity or limits.

(2) Comments. The DEQ may open a public comment period, and/or reconvene a public meeting and/or administrative hearing to receive public comments on the proposed correction(s).

Agency Note (3): For statutory provisions related to administrative review of permit conditions or actions after issuance, see 27A O.S.Supp. 1995, § 2-14-304(H), "Denial of permit"; 75 O.S. § 317, "Rehearing, reopening or reconsideration of final order"; and 75 O.S. § 307, "Declaratory rulings".

PART 9. CONSOLIDATED PERMITTING

252:002-15-90. Consolidation of permitting process

(a) Discretionary. Whenever an applicant applies for more than one permit for the same site, the DEQ may authorize, with the consent of the applicant, the review of the applications to be consolidated so that each required draft permit, draft denial and/or proposed permit is prepared at the same time and public participation opportunities are combined.

(b) Scope. When consolidation is authorized by the DEQ:

(1) The procedural requirements for the highest specified tier shall apply to each affected application.

(2) The DEQ may also authorize the consolidation of public comment periods, process and public meetings, and/or administrative permit hearings.

(3) Final permits may be issued together.

(c) Renewal. The DEQ may coordinate the expiration dates of new permits issued to an applicant for the same facility or activity so that all the permits are of the same duration.

(d) Multiple modifications. Subsections (a) and (b) of this section shall also apply to multiple Tier II and III applications for permit modifications.

SUBCHAPTER 13. ADMINISTRATIVE PERMIT PROCEEDINGS

252:002-13-1. Formal public meetings

~~(a) Location. The DEQ shall determine the location and the facility at which a formal public meeting on a permit application and/or draft permit shall be held.~~

~~(b) Purpose. The designated presiding officer of a formal public meeting shall establish the procedure by which such meeting shall be conducted based on the requirements of the Code and applicable program specific rules.~~

Amended and renumbered to 252:002-15-31(g).

REGULAR MEETING AGENDA
DEPARTMENT OF ENVIRONMENTAL QUALITY
OKLAHOMA ENVIRONMENTAL QUALITY BOARD

A Public Meeting: 9:30 a.m., Tuesday, January 28, 1997
Guest House Inn and Dome
810 East Trudgeon
Henryetta, Oklahoma

1. Call to Order - Frank Condon
2. Roll Call - Lynda Finch
3. Approval of Minutes of the November 26, 1996 Regular Meeting
4. Election of Officers
5. **OAC 252:220 Brownfields:**
Consideration of permanent and emergency adoption of a new chapter. The new chapter implements the 1996 Oklahoma Brownfields Act and establishes standard procedures for the voluntary redevelopment of contaminated property needed for liability protection under the new law. There are no analogous federal rules. Recommended by the Hazardous Waste Management Advisory Council, October 3, 1996.
 - A. Presentation - Scott Nicholson *on Catherine*
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote for permanent and emergency adoption
6. **OAC 252:002 DEQ Procedures:**
Four rules are involved. The first is a new rule 252:2-3-4 (Fee credits). This new rule is a permanent rule identical to the emergency rule adopted on November 28, 1996. The fee credit rule will allow balances of recurring fees that are carried over from a previous year to be applied as a credit on future invoices. There is no analogous federal rule.

The other three permanent and emergency rules involve the Uniform permitting program:
 - **Air Quality.** Amendments to rules 252:2-15-40 and 41 (Tiers I and II). These amendments change some Title V classifications at EPA's request and revise the format to improve clarity. Title V-based amendments are consistent with federal rules.
 - **Brownfields.** Adoption of new rules 252:2-15-64, 65 and 66 (Tiers I, II & III) and 252:2-15-76.1 (Permitting timeline, 60 days). These new rules establish Brownfield permit procedures, for which there are no analogous federal rules.
 - **Water Quality.** Amendment of rule 252:2-15-62 (Tier II). This amendment adds general permits as in other programs, and is consistent with federal rules.
 - A. Presentation - Bob Kellogg
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote for permanent and emergency adoption

7. **OAC 252:400 Radiation Management:**

Consideration of the permanent adoption of new Subchapter 17, 252:400-17 (X-Ray Fluorescence [XRF] instruments). The Board remanded this issue to the Council on August 20, 1996. The Radiation Council has revised the August version by limiting it to mobile instruments used to detect lead in paint, to improve readability and refine requirements through general permit format. There are no analogous federal rules. Recommended by the Radiation Management Advisory Council on December 5, 1996.

- A. Presentation - Steve Woods *Vice chair*
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote for permanent adoption

8. **OAC 252:510 Municipal Solid Waste Landfills:**

Three permanent and emergency amendments are proposed. The first amendment being considered is to rule 252:510-21-6 (Financial assurances). This amendment limits the pay-in period for Trust Fund financial assurance to 15 years or to the life of the site, whichever is less. The Office of Administrative Rules requires that we also incorporate the emergency amendments now in effect (adopted on June 18 and approved by the Governor on August 1, 1996). The proposed trust fund pay-in period is more stringent than the federal rule. This amendment was recommended by Solid Waste Management Advisory Council on January 14, 1997.

The other two amendments are to rules 252:510-1-5 (Definitions) and 252:510-17-9 (Reporting requirements). These two amendments define large industrial waste generators for fee exemption, and add three and delete three reports. These amendments are not more stringent than federal rules. Recommended by Solid Waste Management Advisory Council on October 17, 1996.

- A. Presentation - Steve Mason
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote for permanent and emergency adoption

9. **OAC 252:605 Discharges - OPDES (NPDES):**

Consideration of permanent amendments to 252:605 Appendices G, H & I, by revising the criteria and procedures for calculating fees. There are no analogous federal rules. Recommended by the Water Quality Management Advisory Council on January 7, 1997.

- A. Presentation - Jon L. Craig
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote for permanent adoption

10. **OAC 252:615 Industrial Wastewater Systems:**
 Consideration of permanent amendments to rule 252:615-3-4 (Fees for industrial surface impoundments). The fee changes for industrial surface impoundments are tied to existing wastewater classifications. There are no analogous federal rules. Recommended by the Water Quality Management Advisory Council on January 7, 1997.
- A. Presentation - Jon L. Craig
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote for permanent adoption
11. **OAC 252:620 Non-Industrial Impoundments:**
 Consideration of permanent amendments to rule 252:620-13-1 (Annual permit fees for non-industrial surface impoundments). The fee changes are tied to new population range categories. There are no analogous federal rules. Recommended by the Water Quality Management Advisory Council on January 7, 1997.
- A. Presentation - Jon L. Craig
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote for permanent adoption
12. **OAC 252:633 Drinking Water State Revolving Fund:**
 Consideration of permanent and emergency adoption of a new chapter. The new chapter enables Oklahoma to use EPA capitalization grant monies to provide low cost loans to state water supply systems under the federal Safe Drinking Water Act. There are no analogous federal rules. Recommended by Water Quality Management Advisory Council on January 7, 1997.
- A. Presentation - Jon L. Craig
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote for permanent and emergency adoption
13. **OAC 252:647 Sludge and Land Application of Wastewater:**
 Consideration of permanent amendments to rule 252:647-3-7 (Fees for non-industrial land application). The fee changes are tied to new population range categories. There are no analogous federal rules. Recommended by Water Quality Management Advisory Council on January 7, 1997.
- A. Presentation - Jon L. Craig
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote for permanent adoption

14. **Consideration of Finding of Emergency for agenda items 5, 8, 12 and the permit tier amendments in item 6 (252:2-3-4, Fee credit, is already in effect by emergency).**

The Environmental Quality Board finds that a compelling extraordinary circumstance necessitates the seeking of emergency certification of the rules and regulations adopted today. These actions provide modern tools for the protection of environmental health in their respective fields of regulation. Without an emergency, these amendments would not take effect until the spring of 1997 and Oklahomans should not have to wait that long.

- A. Presentation - Bob Kellogg
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote

15. **Addendum to the 1997 Environmental Quality Report.**

The statutorily-mandated Environmental Quality Report requires the Department to, among other thing, report to the Governor and to the Legislature any new federal mandates and their cost. The report was approved by the Board at its meeting on November 28, 1996 and was submitted on the January 1, 1997 deadline. Since the submittal, a potential new federal mandate related to changes in the National Ambient Air Quality Standards for ozone and particulate matter has been proposed by EPA. This new mandate is of such import that an amendment to the report is being proposed.

- A. Presentation - Steve Thompson
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote

16. **New Business (any matter not known about, or which could not have been reasonably foreseen prior to the time of posting of agenda)**

17. **Executive Director's Report**

18. **Adjournment**

Public Forum

Should you have a disability and need an accommodation, please notify our department three days in advance at 271-8056. TDD number 232-0591.

SUBCHAPTER 15. ENVIRONMENTAL PERMIT PROCESSING TIMES

PART 5. TIER CLASSIFICATIONS

252:2-15-40. Air quality applications - Tier I

(a) ~~Minor source~~-facility permits. The following air quality authorizations for ~~minor sources~~-facilities require Tier I applications.

(1) **New permits.** New construction, operating and relocation permits.

(2) **Modifications of permits.**

(A) Modification of a construction permit for a minor ~~source~~ facility that will remain minor after the modification.

(B) Modification of an operating permit that will not change the ~~source's~~-facility's classification from minor to major.

(C) Extension of expiration date of a construction permit.

(3) **Renewals.** Renewals of operating permits.

(b) ~~Major facility~~-Part 70 source permits. The following air quality authorizations for ~~major facilities~~-Part 70 sources require Tier I applications.

(1) **New permits.**

(A) New construction permit for an existing ~~major facility~~ Part 70 source for any ~~facility~~ change considered minor under 252:100-8-7.2(b)(1).

(B) New operating permit that:

(i) is based on a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) has conditions which do not differ from the construction permit's operating conditions in any way considered significant under 252:100-8-7.2(b)(2).

(2) **Modifications of permits.**

(A) Modification of any operating permit condition that:

(i) is based on the operating conditions of a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) does not differ from those construction permit conditions in any way considered significant under 252:100-8-7.2(b)(2).

(B) A construction or operating permit modification that is minor under 252:100-8-7.2(b)(1).

(C) Extension of expiration date of a ~~major facility's~~ Part 70 source's construction permit with no or minor modifications.

(c) **Other authorizations.** The following air quality authorizations require Tier I applications.

(1) New, modified and renewed individual authorizations under general operating permits for which a schedule of compliance is not required by 252:100-8-5(c)(8)(B)(i).

(2) Burn approvals.

(3) Plant-wide emission plan approval under 252:100-37-25(b) or 252:100-39-46(j).

(4) Administrative amendments of all air quality permits and other authorizations.

(5) Alternative emissions reduction authorizations. (Also subject to state implementation plan revision procedures in see

252:100-11.)

252:2-15-41. Air quality applications - Tier II

(a) **Minor ~~source-facility~~ permit actions.** Any minor ~~source~~ facility seeking a permit for a ~~facility~~ modification that when completed would turn it into a ~~major-facility-Part 70 source~~ is required to apply under subsection (b) of this section.

(b) **~~Major-facility-Part 70 source~~ permits.** The following air quality authorizations for ~~major-facilities-Part 70 sources~~ require Tier II applications.

(1) **New permits.**

(A) New construction permit for a new ~~major-facility-Part 70 source~~ not classified under Tier III.

(B) New construction permit for an existing ~~major-facility-Part 70 source~~ for any ~~facility~~ change considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(C) New operating permit for a ~~major-facility-Part 70 source~~ that did not have an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(D) New operating permit with one or more conditions that differ from the underlying Tier II or III construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(E) New acid rain permit that is independent of a ~~Title-V-Part 70~~ permit application.

(F) New temporary source permit under 252:100-8-6.2.

(2) **Modifications of permits.**

(A) Significant modification, as described in 252:100-8-7.2(b)(2), of an operating permit that is not based on an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(B) Modification of an operating permit when the conditions proposed for modification differ from the underlying construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(C) A construction permit modification considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(3) **Renewals.** Renewals of operating permits.

(c) **Other authorizations.** The following air quality authorizations require Tier II applications.

(1) New, modified and renewed general operating permits.

(2) Individual authorizations under any general operating permit for which a schedule of compliance is required by 252:100-8-5(c)(8)(B)(i).

PART 7. REVIEW PROCEDURES AND PERMITTING TIME LINES

252:2-15-72. Air quality permit time lines

The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

(1) Construction permits:

(A) PSD ~~(Part 70 sources)~~ 540 and Part 70 Sources - 365

days.

~~(B) Major Sources (Part 70 sources Sources (other than PSD) - 365 days.~~

~~(C) (B) Minor Sources Facilities - 180 days.~~

(2) Operating permits:

(A) ~~Major Part 70 Sources~~ - 540 days.

(B) ~~Minor Sources Facilities~~ - 365 days.

(3) Relocation permits - 30 days.

REGULAR MEETING AGENDA
DEPARTMENT OF ENVIRONMENTAL QUALITY
OKLAHOMA ENVIRONMENTAL QUALITY BOARD

A Public Meeting: 9:30 a.m., Tuesday, January 27, 1998
Canadian Valley Vo Tech
1401 Michigan Avenue
Chickasha, Oklahoma

✓ 1. Call to Order - Herschel Roberts

✓ 2. Roll Call - Lynda Finch *All present except Roger Miner and Carla Smalts*

✓ 3. Approval of Minutes of the November 18, 1997 Regular Meeting

✓ 4. Election of Officers *Same slate, same salary*

5. OAC 252:2 DEQ Procedures:

Changes to 252:2-15-40 and 41 are proposed to the air quality uniform permit tiers. This is in part at EPA's request for the Title 5 permit program, and to make the material more clear. Some permits, such as acid rain permits, are being moved from Tier 1 to Tier 2 to allow for more public input. Approved by the Air Quality Council on December 16, 1997. *we have an on-going obligation to the citizens of this state & work a regulatory process as clear and understandable as possible*

- ✓ A. Presentation - David Branecky, Air Quality Council member
- ✓ B. Questions and discussion by the Board *yes, affect gen op. permit? No*
- ✓ C. Questions, comments and discussion by the public *concern = Cheryl Proadine*
- ✓ D. Discussion by the Board *in verbal memos*
- ✓ E. Roll call vote for permanent adoption *6-5 passed*

** we need a common set of definitions that apply uniformly in every rule
* We need to make our rules clear. Not the rules.*

6. OAC 252:100 Air Pollution Control:

Title V permitting criteria in four subchapters are addressed for consistency with EPA criteria, and they are simplified and clarified. Some provisions are also relocated among the subchapters. Approved by the Air Quality Council on December 16, 1997 and January 9, 1998. The major substantive changes in -

- Subchapter 5 (currently Registration of Air Contaminant Sources), would change the annual operating fees for minor facilities from a tiered system to a set figure per ton of pollutant emitted.
- Subchapter 7 (currently Construction Permits for Major and Minor Sources ...), would incorporate a new permit classification system according to impact, emissions levels and source categories, and introduce two new types of permits, permit by rule and general permit. This is part of the agency's "permit continuum" initiative.
- Subchapter 8 (currently Operating Permits), would adopt the federal case-by-case procedures in 40 CFR Part 63 for determining a MACT standard for a particular facility. These changes are needed to obtain EPA's final approval of our Title V program.
- Subchapter 17 (Incinerators), would address large municipal waste combustors.

- ✓ A. Presentation - David Branecky, Air Quality Council member
- ✓ B. Questions and discussion by the Board *depts & internal mtg.*
- ✓ C. Questions, comments and discussion by the public *rod aware of 25 mile & impact*
- ✓ D. Discussion by the Board *Sylvia - stack tests on furans*
- NO E. Roll call vote for permanent and emergency adoption *Continue to March 20, OKC*

*Roger Miner arrived
Full Board is present
except Smalts*

7. OAC 252:200 Hazardous Waste Management:

Three revisions, approved by the Hazardous Waste Management Advisory Council on January 8, 1998, are proposed:

- The first would amend 252:200-3-1 and 3-2 to update the incorporation by reference of federal hazardous waste rules to the current, 7-1-97, edition of the CFR.
- The second would amend rule 9-7 (additional waste analysis requirements) to change the terminology used in paragraph (b)(1) to establish the waste characteristic.
- Third, the drum recycling provisions of Subchapter 19 would be deleted.

No Cookley, Aldo Wuerflin, Roberts

- ✓ A. Presentation - Scott Nicholson, Hazardous Waste Council Chair *Nadine*
- ✓ B. Questions and discussion by the Board
- ✓ C. Questions, comments and discussion by the public *Clare, address reaction; don't react to*
- ✓ D. Discussion by the Board *discussed empty seat. drum recycling until you have a replacement.*
- ✓ E. Roll call vote for permanent and emergency adoption

Approval vote on 102 8-41 Subch 19 continued 4 3-20-98

8. OAC 252:520 Solid Waste Management:

This proposal would add a new subchapter to process disposal plans for the off-site disposal of non-hazardous industrial solid waste. These rules streamline the process across a "continuum" of industrial solid waste. Recommended by the Solid Waste Management Advisory Council on October 16, 1997.

Robert left

Minor, Savage No Roberts Abstained

- 7 A. Presentation - Steve Mason, Solid Waste Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote for permanent adoption *Clare H. why public access rules removed?*

Larry B. - concern of priority, waste category, liners, metals, approval time, catchment in wrong categories.
Ken R. - G(c) problematic. Concept good, but practicality, a problem due to limited availability of kind landfills.
Nadine B. - Problem with drinking water DER role in general; wants public access provision. Concern of deal with from CAPOs.
Mr. Brewer - on behalf of 10 other members - need requirements for OR approval; need category. to obtain Robert H. - 2-6 to be away right of landfills to take certain wastes, need to be statement.

9. OAC 252:633 Drinking Water State Revolving Fund:

This proposal would reform the Chapter to meet federal guidelines. The rules are also simplified and clarified according to the agency's rules review process. Recommended by the Water Quality Management Advisory Council on January 6, 1998.

- A. Presentation - Jeffrey Short, Water Quality Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote for permanent and emergency adoption

10. Rulemaking Finding of Emergency:

The Environmental Quality Board finds that a compelling extraordinary circumstance necessitates the seeking of emergency certification of the rule changes of agenda items 7 and 9 adopted today. The changes provide modern tools to protect environmental health. Without an emergency the changes could not take effect until June 1998, and Oklahomans should not have to wait that long.

- A. Presentation - Bob Kellogg, DEQ General Counsel.
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote

11. New Business (any matter not known about, or which could not have been reasonably foreseen prior to the time of posting of agenda) *Resolution commanding RDK, final language to be drafted*

12. Executive Director's Report

13. Adjournment

Clarif. that mtg on 3-20 is a continued mtg.

Public Forum: The Board meets four times a year at different locations across the State to hear the views and concerns of all Oklahomans about environmental issues. This opportunity is informal, and we invite you to sign the register to speak.

Past Recycling Project - Melinda Alfred
John Gilgren - Pro Coalition for Protection of Clear Creek - oppose Hidden Valley LF - no coop. from DEQ
Nadine Barton - Following up on Gilgren's comments. Commendation of RDK. Title V - comments made missing Findings very disappointing. Consol. of TCHD env. w/ DEQ. What happens to TCC rules?
Sylvia Pratt - Indoor air quality
Clare Newsum - Captive insurance. Laidlaw has switched to bond. But no response to DEQ from Ins. Comm. yet. Laidlaw didn't pay premiums for 75-96? Laidlaw Cell 5 CA finan. asser. - where from? Excess. teachers in Cals 11, 12, 13. why has cell 11 not been repaired?

Should you have a disability and need an accommodation, please notify our department three days in advance at 271-8056. TDD number 232-0591.

CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY
SUBCHAPTER 15. UNIFORM PERMITTING PROCEDURES

PART 5. TIER CLASSIFICATIONS

252:2-15-40. Air quality applications - Tier I

~~The following air quality authorizations require Tier I applications.~~

- ~~(1) Construction permit for a minor source.~~
- ~~(2) Operating permit for a minor source.~~
- ~~(3) Operating permit for a major facility, issued after a construction permit, which does not differ from the construction permit in any manner which would otherwise subject the operating permit application to public review.~~
- ~~(4) New, modified or renewed authorization under a general permit.~~
- ~~(5) Modification of a minor source's construction and/or operating permit when the source remains a minor source after the modification.~~
- ~~(6) Minor modification of a major facility's construction and/or operating permit.~~
- ~~(7) Acid rain permits.~~
- ~~(8) Burn approval.~~
- ~~(9) Relocation permit.~~
- ~~(10) Temporary permit.~~
- ~~(11) Plant wide emission plan approval.~~
- ~~(12) Administrative amendment of all permits and other authorizations.~~
- ~~(13) Extension of a minor source's construction permit.~~
- ~~(14) Extension of a major facility's construction permit with no or minor modification.~~
- ~~(15) Renewal of an operating permit for a minor source.~~

(a) Minor source permits. The following air quality authorizations for minor sources require Tier I applications.

(1) New permits. New construction, operating and relocation permits.

(2) Modifications of permits.

(A) Modification of a construction permit for a minor source that will remain minor after the modification.

(B) Modification of an operating permit that will not change the source's classification from minor to major.

(C) Extension of expiration date of a construction permit.

(3) Renewals. Renewals of operating permits.

(b) Major facility permits. The following air quality authorizations for major facilities require Tier I applications.

(1) New permits.

(A) New construction permit for an existing major facility for any facility change considered minor under 252:100-8-7.2(b)(1).

(B) New operating permit that:

(i) is based on a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) has conditions which do not differ from the construction permit's operating conditions in any way considered significant under 252:100-8-7.2(b)(2).

(2) Modifications of permits.

(A) Modification of any operating permit condition that:

(i) is based on the operating conditions of a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) does not differ from those construction permit conditions in any way considered significant under 252:100-8-7.2(b)(2).

(B) A construction or operating permit modification that is minor under 252:100-8-7.2(b)(1).

(C) Extension of expiration date of a major facility's construction permit with no or minor modifications.

(c) Other authorizations. The following air quality authorizations require Tier I applications.

(1) New, modified and renewed individual authorizations under general operating permits for which a schedule of compliance is not required by 252:100-8-5(c)(8)(B)(i).

(2) Burn approvals.

(3) Plant-wide emission plan approval under 252:100-37-25(b) or 252:100-39-46(j).

(4) Administrative amendments of all air quality permits and other authorizations.

(5) Alternative emissions reduction authorizations. (Also subject to state implementation plan revision procedures in see 252:100-11.)

252:2-15-41. Air quality applications - Tier II

~~The following air quality authorizations require Tier II applications.~~

~~(1) Operating permit for a major facility, issued after a construction permit, which differs from the construction permit in a manner which subjects the operating permit application to public review.~~

~~(2) Operating permit for a major facility that does not have a construction permit.~~

~~(3) Significant modification, as defined in OAC 252:100-8-7(e)(2), of a major facility's construction or operating permit.~~

~~(4) New, modified or renewed general permit.~~

~~(5) Time extension of a major facility's construction permit with a modification that would otherwise be subject to public review.~~

~~(6) Renewal of an operating permit for a major facility.~~

~~(7) A construction permit for a new major facility or a major modification to an existing major facility.~~

(a) Minor source permit actions. Any minor source seeking a permit for a facility modification that when completed would turn it into a major facility is required to apply under subsection (b) of this section.

(b) Major facility permits. The following air quality authorizations for major facilities require Tier II applications.

(1) New permits.

(A) New construction permit for a new major facility not classified under Tier III.

(B) New construction permit for an existing major facility for any facility change considered significant under 252:100-

8-7.2(b)(2) and which is not classified under Tier III.

(C) New operating permit for a major facility that did not have an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(D) New operating permit with one or more conditions that differ from the underlying Tier II or III construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(E) New acid rain permit that is independent of a Title V permit application.

(F) New temporary source permit under 252:100-8-6.2.

(2) Modifications of permits.

(A) Significant modification, as described in 252:100-8-7.2(b)(2), of an operating permit that is not based on an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(B) Modification of an operating permit when the conditions proposed for modification differ from the underlying construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(C) A construction permit modification considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(3) Renewals. Renewals of operating permits.

(c) Other authorizations. The following air quality authorizations require Tier II applications.

(1) New, modified and renewed general operating permits.

(2) Individual authorizations under any general operating permit for which a schedule of compliance is required by 252:100-8-5(c)(8)(B)(i).

REGULAR MEETING AGENDA
DEPARTMENT OF ENVIRONMENTAL QUALITY
OKLAHOMA ENVIRONMENTAL QUALITY BOARD

A Public Meeting: 9:30 a.m., Friday, February 25, 2000
Department of Environmental Quality
707 North Robinson
Oklahoma City, Oklahoma 73102

NOTE: The business meeting of the Board will be preceded at 8:30 a.m. by a continental breakfast. No business will be conducted, but there will be opportunity for an informal interchange among attendees, particularly on matters of interest raised by individual Board members. Board members and DEQ staff will be present, and the public may attend.

1. Call to Order – Lee Paden, Chair
2. Roll Call - Lynda Finch
3. Approval of Minutes of the November 16, 1999 Regular Meeting
4. **Election of Officers**
Election of Chair and Vice-Chair for 2000
5. **Rulemaking – OAC 252:002 Procedures of the DEQ (Administrative Fees)**
The proposed rule relates to administrative fees. The Oklahoma Open Records Act allows an agency to charge a document copying fee, a fee for certified copies, and a reasonable fee for document searches when the search request is solely for a commercial purpose or clearly would cause an excessive disruption of the agency's essential functions. Fees must be promulgated as rules under the Administrative Procedures Act (1999 Okl.Op.Atty.Gen. 55, August 17, 1999). The proposed rule establishes a photocopy fee of \$0.25 per page, a certified copy fee of \$1.00 per document, and a document search fee of \$5.00 per one-half (1/2) hour (with the first 15 minutes free).
 - A. Presentation – Jimmy Givens, DEQ General Counsel
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote on permanent adoption
6. **Rulemaking – OAC 252:100 Air Pollution Control**
Four sets of changes are proposed:
 - Subchapter 5: The proposed amendments are designed to allow the agency to bill on a flexible schedule those owners and operators with sources that produce emissions. The changes also allow the fees to be based on the most recent emission data possible. The proposal clarifies that an owner or operator of a facility must report quantifiable excess emissions on the annual emission inventory, which must be submitted prior to March 1 unless an extension is granted. The proposal also establishes time frames for requests for credit based on overpayment and for challenges to the method used to calculate the facility's emissions for fee calculation purposes.
 - Subchapter 13: The proposed amendments simplify and clarify the rule as part of the agency-wide re-right/de-wrong initiative. Such changes include consolidating the general conditions and requirements for allowed open burning into a new section. Some substantive changes were made,

including adding a section on disaster relief procedures; requiring notification to the DEQ or other appropriate official for authorization to burn in some circumstances; requiring those who clear land in areas that are or have been designated nonattainment to burn their vegetation in open-pit incinerators; and prohibiting burning of off-site material in open-pit incinerators.

- Subchapters 23 and 24: The changes replace references to Subchapter 27 with references to 252:100-19-12. These changes are necessary because, based on Board action last November, the substantive requirements of Subchapter 27 will be moved to section 252:100-19-12 and Subchapter 27 will be revoked, effective June of 2000.
- Appendices E and F: The proposed amendments restore the primary and secondary ambient air quality standards to what they were prior to June 1, 1999. The 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored. The PM-2.5 standard would be revoked along with the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard.

- A. Presentation— David Branecky, Air Quality Council Member
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote(s) on permanent adoption of amendments to Subchapters 5 and 13, on emergency adoption* (only) of amendments to Subchapters 23 and 24, and on both permanent and emergency adoptions of amended Appendices E and F .

7. Rulemaking— OAC 252:002 Procedures of the DEQ (Air Quality-Related)

The Department is proposing amendments to the air quality provisions of OAC 252:2-15, Environmental Permit Processing Times, to make them consistent with 252:100, Air Pollution Control. The terms "minor source(s)" and major "facility(ies)" would be changed to "minor facility(ies)" and "Part 70 source(s)", respectively.

- A. Presentation— David Branecky, Air Quality Council Member
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

8. Rulemaking— OAC 252:205 Hazardous Waste Management

Two sets of changes are proposed:

- Subchapter 3: The proposed amendment to OAC 252:205-3-1 updates the adoption by reference of federal hazardous waste regulations to July 1, 1999. Proposed revisions to 252:205-3-3 incorporate new or superseding amendments to 40 CFR contained in 64 FR 36465-36490, published July 6, 1999, which add hazardous waste lamps as a universal waste at the federal level. Corresponding changes are made in other sections.
- Subchapters 5 and 9: The proposed revisions to 252:205-5 move language from 252:205-5-5(b) to 252:205-5-3(b)(5). The amendment to 252:205-9-6 provides alternative waste characterization mechanisms for off-site hazardous waste facilities.

- A. Presentation— Jody Reinhart, Hazardous Waste Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote(s) on emergency* and permanent adoption of amendments to Subchapter 3, and on permanent adoption of amendments to Subchapters 5 and 9 .

9. Rulemaking-- OAC 252:220 Brownfields

The proposed language is the result of recent legislation. It states the criteria by which the DEQ will verify loan application eligibility of Brownfields sites for loans from the Wastewater Facility Construction Revolving Loan Account and other state funding sources.

- A. Presentation-- Jody Reinhart, Hazardous Waste Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote(s) on emergency* and permanent adoption

10. Rulemaking -- OAC 252:615 and 616 Industrial Wastewater Systems

Chapter 615 has been reviewed as part of the "re-right/de-wrong" process of simplifying DEQ rules. Because so many changes were made, it is proposed that Chapter 615 be revoked and a new Chapter 616 created to replace it. Language has been simplified and clarified and rules deemed unenforceable have been removed.

- A. Presentation-- Robert Johnston, Water Quality Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

11. Rulemaking -- OAC 252:630 and 631 Public Water Supply Operation

Chapter 630 has been reviewed as part of the "re-right/de-wrong" process of simplifying DEQ rules. Because so many changes were made, it is proposed that Chapter 630 be revoked and a new Chapter 631 created to replace it. Language has been simplified and clarified and unenforceable rules have been removed. The most recent federal requirements for maintaining primacy over the Safe Drinking Water Act program have been included.

- A. Presentation-- Robert Johnston, Water Quality Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

12. Rulemaking -- OAC 252:641 On-Site Sewage Disposal Systems

The proposed rule amendments eliminate the document search fee, combination fee (soil percolation test and final inspection or existing system evaluation report) and residential plat review fees, and reduce the soil percolation/soil profile fee, final inspection fee, existing system evaluation fee and the certified installer final inspection fee.

- A. Presentation -- Gary Collins, Director, DEQ Environmental Complaints and Local Services Division
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

13. **Rulemaking – OAC 252:700 and 710 Waterworks/Wastewater Works Operator Certification**
Chapter 700 has been reviewed as part of the "re-right/de-wrong" process of simplifying DEQ rules. Because so many changes were made, it is proposed that Chapter 700 be revoked and a new chapter 710 created to replace it. New subchapters have been created; many rules have been simplified and/or broken into several shorter rules for clarity; and statutory citations have been updated. The rules for landfill operator certification are being revoked as inappropriate to these chapters.

- A. Presentation – Rick Stebbens, Waterworks and Wastewater Works Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

14. **Rulemaking – OAC 252:002 Procedures of the DEQ (Operator Certification-Related)**

The DEQ proposes that Section 252:2-15-49 be revoked as part of the "re-right/de-wrong" rules simplification process. This revocation does not affect the operator certification program or the proposed rules in Chapter 710. The basic Tier I permitting process was designed for environmental permits where notice was given to landowners. The DEQ believes that personal licensure should not have been included in the Tier categories.

- A. Presentation – Rick Stebbens, Waterworks and Wastewater Works Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

15. **New Business (any matter not known about and which could not reasonably have been foreseen prior to the time of posting of agenda)**

16. **Executive Director's Report**

17. **Adjournment**

Public Forum: The Board meets four times a year at different locations across the State to hear the views and concerns of all Oklahomans about environmental issues. This opportunity is informal, and we invite you to sign the register to speak. The forum will also include a short presentation from the DEQ Water Quality Division about State Water Quality Standards implementation, the State "303(d)" (impaired waters) list, and related issues.

Should you have a disability and need an accommodation, please notify the DEQ three days in advance at 702-7100.

* Specification of proposed adoption by emergency rulemaking, by permanent rulemaking, or by both, is based on the recommendations of the respective advisory councils. Adoption or amendment of rules as emergency rulemaking requires a finding by the Board that a compelling extraordinary circumstance warrants the seeking of emergency certification, so that the rules will take effect immediately upon the Governor's signature. Absent a finding and certification of emergency, rules adopted today will not become effective until on or about June 1st.

SUBCHAPTER 15. ENVIRONMENTAL PERMIT PROCESSING TIMES

PART 5. TIER CLASSIFICATIONS

252:2-15-40. Air quality applications - Tier I

(a) ~~Minor source-facility permits.~~ The following air quality authorizations for minor ~~sources-facilities~~ require Tier I applications.

(1) **New permits.** New construction, operating and relocation permits.

(2) **Modifications of permits.**

(A) Modification of a construction permit for a minor ~~source facility~~ that will remain minor after the modification.

(B) Modification of an operating permit that will not change the ~~source's-facility's~~ classification from minor to major.

(C) Extension of expiration date of a construction permit.

(3) **Renewals.** Renewals of operating permits.

(b) ~~Major facility Part 70 source permits.~~ The following air quality authorizations for ~~major facilities-Part 70 sources~~ require Tier I applications.

(1) **New permits.**

(A) New construction permit for an existing ~~major facility Part 70 source~~ for any ~~facility~~ change considered minor under 252:100-8-7.2(b) (1).

(B) New operating permit that:

(i) is based on a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) has conditions which do not differ from the construction permit's operating conditions in any way considered significant under 252:100-8-7.2(b) (2).

(2) **Modifications of permits.**

(A) Modification of any operating permit condition that:

(i) is based on the operating conditions of a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) does not differ from those construction permit conditions in any way considered significant under 252:100-8-7.2(b) (2).

(B) A construction or operating permit modification that is minor under 252:100-8-7.2(b) (1).

(C) Extension of expiration date of a ~~major facility's-Part 70 source's~~ construction permit with no or minor modifications.

(c) **Other authorizations.** The following air quality authorizations require Tier I applications.

(1) New, modified and renewed individual authorizations under general operating permits for which a schedule of compliance is not required by 252:100-8-5(c) (8) (B) (i).

(2) Burn approvals.

(3) Plant-wide emission plan approval under 252:100-37-25(b) or 252:100-39-46(j).

(4) Administrative amendments of all air quality permits and other authorizations.

(5) Alternative emissions reduction authorizations. (Also subject to state implementation plan revision procedures in-see

252:100-11.)

252:2-15-41. Air quality applications - Tier II

(a) ~~Minor source-facility permit actions.~~ Any minor ~~source facility~~ seeking a permit for a ~~facility~~ modification that when completed would turn it into a ~~major facility-Part 70 source~~ is required to apply under subsection (b) of this section.

(b) ~~Major facility-Part 70 source permits.~~ The following air quality authorizations for ~~major facilities-Part 70 sources~~ require Tier II applications.

(1) **New permits.**

(A) New construction permit for a new ~~major facility-Part 70 source~~ not classified under Tier III.

(B) New construction permit for an existing ~~major facility-Part 70 source~~ for any ~~facility~~ change considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(C) New operating permit for a ~~major facility-Part 70 source~~ that did not have an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(D) New operating permit with one or more conditions that differ from the underlying Tier II or III construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(E) New acid rain permit that is independent of a ~~Title V-Part 70~~ permit application.

(F) New temporary source permit under 252:100-8-6.2.

(2) **Modifications of permits.**

(A) Significant modification, as described in 252:100-8-7.2(b)(2), of an operating permit that is not based on an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(B) Modification of an operating permit when the conditions proposed for modification differ from the underlying construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(C) A construction permit modification considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(3) **Renewals.** Renewals of operating permits.

(c) **Other authorizations.** The following air quality authorizations require Tier II applications.

(1) New, modified and renewed general operating permits.

(2) Individual authorizations under any general operating permit for which a schedule of compliance is required by 252:100-8-5(c)(8)(B)(i).

PART 7. REVIEW PROCEDURES AND PERMITTING TIME LINES

252:2-15-72. Air quality permit time lines

The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

(1) Construction permits:

(A) PSD (~~Part 70 sources~~) ~~540~~ and Part 70 Sources - 365

days.

~~(B) Major Sources (Part 70 sources Sources (other than PSD) - 365 days.~~

~~(C) (B) Minor Sources Facilities - 180 days.~~

(2) Operating permits:

(A) Major Part 70 Sources - 540 days.

(B) Minor Sources Facilities - 365 days.

(3) Relocation permits - 30 days.

REGULAR MEETING AGENDA
DEPARTMENT OF ENVIRONMENTAL QUALITY
OKLAHOMA ENVIRONMENTAL QUALITY BOARD

A Public Meeting: 9:30 a.m., Friday, February 23, 2001
Room 3, The Commons
University of Oklahoma
1620 Asp Avenue
Norman, Oklahoma

1. Call to Order – Lee Paden, Chair
2. Roll Call - Lynda Finch
3. Approval of Minutes of the November 14, 2000 Regular Meeting
4. **Election of Officers**
Election of Chair and Vice-Chair for 2001

5. **Rulemaking-- OAC 252:1, 2, 3 and 4 Rules of Practice and Procedure**

The proposed new Chapter 4 (Rules of Practice and Procedure) is a product of DEQ's "re-right/de-wrong" rules simplification process. It represents a comprehensive and integrated rewrite of existing Chapter 1 (Procedures of the Environmental Quality Board), Chapter 2 (Procedures of the DEQ) and Chapter 3 (Procedures of the Environmental Quality Councils), in an effort to make the procedures easier to follow. Among the changes are: reorganization into more logical arrangements; language simplification; elimination of duplicative rules; updating of statutory citations; and deletion of statutory language. Chapter 4 also includes rules recommended by the Air Quality Council, which address hearings before that council. Chapters 1, 2 and 3 are proposed for revocation, subject to the adoption of proposed Chapter 4. This agenda item was initially discussed at the November 14, 2000 Board meeting. The Board voted to continue the item to the current meeting.

- A. Presentation – Jimmy Givens, DEQ General Counsel
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote(s) on permanent adoption of Chapter 4 and permanent revocation of Chapters 1, 2 and 3

6. **Rulemaking – OAC 252:205 Hazardous Waste Management**

The proposed amendment to 252:205-3-1 updates the adoption by reference of the federal hazardous waste regulations from July 1, 1999 to July 1, 2000. In general, the proposed amendments to 252:205-3-2 delineate hazardous waste regulatory duties that remain with the U.S. EPA. The proposed amendment to 252:205-3-2(b) provides for the operation of a state hazardous waste delisting program in lieu of the federal program. Section 252:205-3-3 is revoked because it is no longer necessary after the update of the adoption by reference.

- A. Presentation – Jody Reinhart, Hazardous Waste Management Advisory Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

7. **Rulemaking – OAC 252:305 Laboratory Services**

In connection with the statutory requirement that the analytical fee rates for the DEQ's State Environmental Laboratory be based on actual cost of performing the analyses and providing the services, the proposed changes include both increases and decreases of those fees. Language is added to clarify the associated services that are provided. An option for a price discount for large-volume prescheduled samples is included. A provision is added regarding handling of analyses and services not listed in the rule, specifying how fees for such special services will be determined.

- A. Presentation – Bill Janacek, Laboratory Services Advisory Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

8. **Rulemaking – OAC 252:410 Radiation Management**

The proposed amendments establish a \$90.00 fee to take the radiography certification examination, and a \$20.00 fee for the issuance of a replacement certification card. This allows the DEQ to recover the cost of purchasing and administering the certification examination and issuing cards to those individuals who pass it. Currently, individuals must take the examination and pay the fee in another state, then become authorized under reciprocity recognition to perform industrial radiography in Oklahoma.

- A. Presentation – Dr. David Gooden, Chair, Radiation Management Advisory Council
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

9. **Rulemaking – OAC 252:605 Discharge (OPDES) Standards**

Proposed revisions correct typographical errors, update the adoption by reference of federal rules from July 1, 1999 to July 1, 2000, update references to other DEQ rules, remove outdated language, and remove requirements for which the DEQ no longer has jurisdiction.

- A. Presentation – Jeffrey Short, Water Quality Management Advisory Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

10. **Rulemaking – OAC 252:616 Industrial Wastewater Systems**

Proposed revisions correct typographical errors, add a definition ("engineer"), and include language that was mistakenly omitted during the DEQ's "re-right/de-wrong" rules simplification process.

- A. Presentation – Jeffrey Short, Water Quality Management Advisory Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

11. **Rulemaking – OAC 252:631 Public Water Supply Operation**
Proposed revisions correct typographical errors, update the adoption by reference of federal rules from July 1, 1999 to July 1, 2000, and include language that was mistakenly omitted during the DEQ's "re-right/de-wrong" rules simplification process.
 - A. Presentation – Jeffrey Short, Water Quality Management Advisory Council Chair
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote on permanent adoption

12. **Rulemaking – OAC 252:656 Water Pollution Control Facility Construction**
Proposed revisions correct typographical errors, update citations of other DEQ rules and clarify confusing language.
 - A. Presentation – Jeffrey Short, Water Quality Management Advisory Council Chair
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote on permanent adoption

13. New Business (any matter not known about, or which could not have been reasonably foreseen prior to the time of posting of the agenda)

14. Executive Director's Report

15. Adjournment

Public Forum: The Board meets four times a year at different locations across the State to hear the views and concerns of all Oklahomans about environmental issues. This opportunity is informal, and we invite you to sign the register to speak.

Should you have a disability and need an accommodation, please notify the DEQ three days in advance at 702-7100.

**TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY**

RULEMAKING ACTION:

PERMANENT final adoption

RULES:

Chapter 2. Procedures of the Department of Environmental Quality
[REVOKED]

AUTHORITY:

Environmental Quality Board powers and duties, 27A O.S. § 2-2-101; Administrative Procedures Act, 75 O.S. § 302

DATES:

Comment period:

October 16, 2000, through November 6, 2000

Public hearing:

November 14, 2000 and February 23, 2001

Adoption:

February 23, 2001 (proposed)

Submitted to Governor:

Submitted to House:

Submitted to Senate:

Gubernatorial approval:

Legislative approval:

Final adoption:

Effective:

SUPERSEDED EMERGENCY ACTIONS:

None

INCORPORATIONS BY REFERENCE:

None

ANALYSIS:

The rules in this Chapter were substantially rewritten and reorganized through the DEQ's re-right/de-wrong rules simplification process and can be found in proposed Chapter 4. This Chapter is being revoked in its entirety, subject to the adoption of Chapter 4.

SUMMARY OF DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

Since this is a revocation, there are no analogous federal rules.

CONTACT PERSON:

Contact Barbara Rauch by e-mail barbara.rauch@deqmail.state.ok.us or by phone (405) 702-7189 or fax (702-7101). The DEQ is located at 707 N. Robinson, Oklahoma City, Oklahoma, 73102. The mailing address is P.O. Box 1677, Oklahoma City, Oklahoma, 73101-1677.

ADDITIONAL INFORMATION:

The revocation of this chapter was first considered by the Environmental Quality Board at their November 14, 2000 meeting, at which time board members continued it until the February 23, 2001 meeting.

PURSUANT TO THE ACTION DESCRIBED HEREIN, THE FOLLOWING RULES ARE CONSIDERED FINALLY ADOPTED AS SET FORTH IN 75 O.S. § 308.1(A), WITH AN EFFECTIVE DATE OF JUNE 11, 2001.

SUBCHAPTER 1. GENERAL PROVISIONS [REVOKED]

252:2-1-1. Purpose [REVOKED]

- ~~(a) Purpose. This Chapter establishes the organization and procedures of the Department of Environmental Quality.~~
- ~~(b) Fair construction. This Chapter is intended to simplify procedures, avoid delays, save expenses and facilitate implementing the Oklahoma Environmental Quality Code and any other Oklahoma Statutes under which the DEQ has jurisdiction.~~
- ~~(c) Scope. The rules in this Chapter are not intended to limit the lawful authority of the DEQ. The DEQ may address any matter under its jurisdiction and change any procedure for good cause.~~
- ~~(d) Severability. The repeal or invalidity of any particular rule of this Chapter or Title shall not affect other rules.~~

252:2-1-2. Definitions [REVOKED]

~~The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:~~

~~"APA" means the Oklahoma Administrative Procedures Act, 75:250.1 et seq.~~

~~"Board" means the Environmental Quality Board.~~

~~"Code" means the Oklahoma Environmental Quality Code, 27A O.S. § 2-1-101 et seq.~~

~~"Council" means the Air Quality Council, the Hazardous Waste Management Advisory Council, the Laboratory Services Advisory Council, the Radiation Management Advisory Council, the Solid Waste Management Advisory Council, the Water Quality Management Advisory Council and the Waterworks and Wastewater Works (Operator Certification) Advisory Council.~~

~~"DEQ" or "Department" means the Oklahoma Department of Environmental Quality and its officers and employees.~~

~~"Executive Director" means the Executive Director of the Department of Environmental Quality.~~

~~"Individual proceeding" means the same as defined in 75:250.3(7), a part of which includes an administrative evidentiary hearing.~~

~~"Respondent" means a person or legal entity named in a petition for an individual proceeding against whom relief is sought.~~

~~"Proposed rule or rule changes" means rules proposed for recommendation and adoption or repeal.~~

~~"Rule package" means a set of rules or rule changes or a single rule or rule change proposed for a specific program or purpose.~~

252:2-1-3. Description of Department of Environmental Quality [REVOKED]

~~(a) History. The DEQ was created January 1, 1993, as a result of environmental legislation in 1992. On July 1, 1993, it assumed jurisdiction over air quality, hazardous waste, solid waste, water quality, environmental laboratory services and certification, radiation management and other programs and functions as specified in the Code.~~

~~(b) Organization. The DEQ consists of programs in air quality, waste management, water quality, complaints and local services, and offices of customer assistance, business and industry assistance,~~

~~local government assistance, and administrative hearings. Such organization may be revised by the Executive Director. Organizational charts may be obtained upon request to the Office of the Executive Director.~~

~~(c) Duties. The DEQ has the following duties:~~

- ~~(1) to implement the Code and other statutes under which it has jurisdiction;~~
- ~~(2) to serve as the official state environmental agency of Oklahoma to cooperate with federal agencies in the management of environmental programs designated by law;~~
- ~~(3) to perform such duties as required by law; and~~
- ~~(4) to provide administrative assistance to the Board and Councils.~~

SUBCHAPTER 3. GENERAL OPERATION [REVOKED]

252:2-3-1. Office location and hours; communications [REVOKED]

~~(a) Office. The principal office of the DEQ is 1000 N.E. 10th Street, Oklahoma City, Oklahoma 73117-1212.~~

~~(b) Hours of operation. Office hours are from 8:00 a.m. to 4:30 p.m., unless otherwise designated by the Executive Director, each day except Saturday and Sunday and state holidays.~~

~~(c) Communications. Unless a person is working with a particular person or departmental area, written communication to the DEQ shall be addressed to the Executive Director at the principal office.~~

252:2-3-2. Availability of records [REVOKED]

~~(a) Availability. Records of the DEQ, not otherwise confidential or privileged from disclosure by law, shall be available to the public for inspection and copying at the DEQ's principal office or other offices during normal business hours. The DEQ may take reasonable precautions in order to ensure the safety and integrity of records under its care.~~

~~(b) Removal. Records may be removed from the DEQ's offices or storage areas only with permission of the record's custodian.~~

~~(c) Reproduction.~~

~~(1) By DEQ. The DEQ may limit the number of copies made and the time and personnel available for reproduction of open records requested by a member of the public or refer the requester to the provisions of paragraphs (2) and (3) of this subsection.~~

~~(2) Commercial reproduction. With advance notice to the DEQ, persons may arrange for the pick up, reproduction and return of open records by a commercial copying service at their expense.~~

~~(3) Other. Provided the approval of the DEQ is obtained in advance and suitable floor space is available, a requester may bring in and use his own copy machine.~~

~~(d) Confidentiality. Any person submitting information, data or materials to the DEQ may assert and substantiate a claim of confidentiality upon submission. Absent such assertion and substantiation, information or materials shall be recognized and treated by the DEQ as being available for disclosure.~~

~~(e) Certification. Copies of official records of the DEQ may be certified by the Executive Director or Assistant Director or their designees.~~

~~(f) Charge. The DEQ's administrative fee schedule shall apply to in house copying or reproduction of open records for or by members of the public.~~

252:2-3-3. Administrative fees [REVOKED]

~~(a) Photocopying. The fee for copying letter or legal sized paper is \$0.25 per page.~~

~~(b) Certified copy. The fee for a certified copy of a document is \$1.00 per document.~~

~~(c) Search fee. When the request is solely for commercial purpose or clearly would cause excessive disruption of the DEQ's essential functions, the document search fee is as follows:~~

~~(1) 0 - 15 minutes, no charge;~~

~~(2) 16 - 30 minutes, \$05.00;~~

~~(3) 31 - 60 minutes, \$10.00;~~

~~(4) 61 - 90 minutes, \$15.00;~~

~~(5) 91 - 120 minutes, \$20.00;~~

~~(6) every 30 minute increment or a portion thereof, \$5.00.~~

252:2-3-4. Fee credits [REVOKED]

~~The Executive Director may authorize Divisions of the DEQ which have programs that collect recurring fees to apply a credit towards certain future invoices for those fees. The credit must be applied only within the program from which the carryover fees are derived. Only the amount that is projected to exceed three months of funding beyond the upcoming budget year for that program can be credited. A summary of any credit applied shall be reported to the Environmental Quality Board. For a credit to be applied:~~

~~(1) There must be a projected balance in the fee account carried over from the previous year;~~

~~(2) The credit must be distributable pro rata among the fee payers;~~

~~(3) The credit must be large enough to justify its administrative cost;~~

~~(4) The Division is unaware of a longer range need, such as match for a superfund clean up project; and~~

~~(5) The Department can explain on the invoices that a carryover exists and that an identified one time credit is being applied.~~

SUBCHAPTER 5. RULEMAKING [REVOKED]

252:2-5-1. Petitions for rulemaking [REVOKED]

~~(a) Rulemaking request. Any person may file a petition with the DEQ formally requesting the adoption, amendment, or repeal of one or more rules.~~

~~(b) Form and content of petition. Rulemaking petitions shall be in writing and filed with the DEQ. A petition shall include the information and follow the format of OAC 252:2 Appendix A, Petition for Rulemaking. After the petition is filed, the DEQ shall provide a copy to the Board.~~

~~(c) Referral. The DEQ shall refer a filed petition to the appropriate Council or if none, to the appropriate program of the DEQ, for review. A petition referred to a Council shall be set on the agenda of the next available Council meeting.~~

~~(d) Status. If rulemaking based on the petition does not commence~~

~~within 30 calendar days after the next available Council meeting or after referral to a program of the DEQ, the petition shall be deemed denied. The DEQ shall advise the Board of the status of petitions and shall provide the petitioner a copy of any final action relating to the petition.~~

252:2-5-2. Rule development [REVOKED]

~~The DEQ may commence the development of rules and rule changes at the request of, or on behalf of, the Board or a Council or upon petition by an interested person. The DEQ may appoint committees to assist in the development of such rules.~~

252:2-5-3. Notice of permanent rulemaking [REVOKED]

~~The DEQ shall cause notice of proposed permanent rulemaking and of dates of known hearings to be given in accordance with the APA. Notice of the continuation of any rulemaking hearing shall be announced at the hearing or meeting from which the hearing is to be continued and shall not require publication.~~

252:2-5-4. Rulemaking comment periods & hearings before the DEQ [REVOKED]

~~(a) Comments. The DEQ may ask for oral or written comments on proposed rules or rule changes from any person at any time.~~

~~(b) Hearings. On behalf of the Board or a Council, the DEQ may conduct a rulemaking hearing separate from a Board or Council meeting to receive comments on proposed permanent rule packages.~~

~~(c) Hearing procedures for oral comments. Persons wishing to comment orally at a hearing on permanent rule packages may be asked to make a written request. The hearing officer may set reasonable time limits on oral presentations, may exclude repetitive or irrelevant comments and may require that the presentations be submitted in writing prior to the close of the comment period.~~

~~(d) Comment period for written comments. Comments on proposed permanent rule packages may be submitted in writing at the hearing or by the end of the specified public comment period, or both.~~

~~(e) Length of comment period. The comment period shall end at the conclusion of the hearing unless extended for no more than 30 days.~~

~~(f) Summary of comments. The DEQ shall maintain a summary of comments received on proposed rule packages at rulemaking hearings and during written comment periods and provide the summary to the Board or a Council prior to the Board's or Council's final action on such rules.~~

252:2-5-5. Hearings before the Board or a Council [REVOKED]

~~At the request of the Board or a Council, the DEQ may designate a hearing officer to conduct a rulemaking hearing on proposed permanent rule packages before those bodies.~~

252:2-5-6. Preparation of rulemaking record [REVOKED]

~~The DEQ shall maintain a rulemaking record on all rules adopted or repealed by the Board.~~

SUBCHAPTER 7. DECLARATORY RULINGS [REVOKED]

252:2-7-1. Declaratory rulings [REVOKED]

~~Any person who alleges that any DEQ rule or order interferes with or impairs, or threatens to interfere with or impair, their legal rights may petition the DEQ, formally requesting a declaratory ruling on the applicability of the rule or order.~~

~~(1) Form and content of petition. All such petitions shall be in writing and filed with the Administrative Law Clerk. The petition shall include the information and follow the format of OAC 252:2 Appendix B, Petition for Declaratory Ruling. After the petition is filed, the DEQ shall provide a copy to the Board at its next available meeting.~~

~~(2) Determination. Petitions for declaratory rulings shall be determined by the DEQ. Rulings shall state the findings and conclusions upon which they are based. If the DEQ refuses to make a ruling, then the petition shall be deemed to have been denied. If the DEQ commences an individual proceeding on the petition, it shall offer an opportunity for a hearing to the petitioner. After the DEQ issues a ruling or the Executive Director issues a final order, the DEQ shall provide a copy of the ruling or final order to the Board at its next available meeting.~~

~~(3) Mailing. The DEQ shall mail a copy of the ruling or final order to the petitioner.~~

SUBCHAPTER 9. INDIVIDUAL PROCEEDINGS IN GENERAL [REVOKED]

252:2-9-1. Purpose and applicability [REVOKED]

~~(a) Purpose and applicability. The purpose of this Subchapter is to establish general procedures for individual proceedings conducted by the DEQ for purposes of enforcement and administrative permit proceedings as specified by Subchapter 13 of this Chapter.~~

~~(b) Applicable law. The APA, the Code and this Chapter govern individual proceedings, including administrative hearings, undertaken by the DEQ.~~

252:2-9-2. Enforcement petitions [REVOKED]

~~(a) Persons entitled. Individual proceedings may be initiated by DEQ program areas by filing a petition or an administrative compliance or penalty order with the Administrative Law Clerk.~~

~~(b) Petition content. Each petition shall name the Respondent(s) and shall contain a reference to the statutes and rules involved, and a brief statement of the facts giving a right to relief and of the relief requested. The petition shall be signed by the person presenting the same, or his attorney (see APA § 310), and shall include the signer's address and phone number.~~

~~(c) Petition style. The style of documents in a matter shall appear in substantially the following form:~~

~~BEFORE THE OKLAHOMA DEPARTMENT OF ENVIRONMENTAL QUALITY~~

~~IN RE: [Nature of proceeding])
and name of Respondent)
e.g. Request for [])~~

~~) No. [Year & Case #]~~

~~[name of program area or person],)
Petitioner.)~~

~~{Nature of Request}~~

252:2-9-3. Declaratory ruling petitions [REVOKED]

~~For information on declaratory ruling petitions, see Subchapter 7 of this Chapter.~~

252:2-9-4. Administrative permit hearing petitions [REVOKED]

~~For information on administrative permit hearing petitions, see Subchapter 13 of this Chapter.~~

252:2-9-5. Matters filed by DEQ [REVOKED]

~~A petition or administrative compliance or penalty order filed by a DEQ program area shall include notice of the opportunity to request an administrative hearing and shall be served on the named Respondents.~~

252:2-9-6. Administrative hearings [REVOKED]

~~(a) Request. A hearing request shall be in writing and shall be filed with the Administrative Law Clerk as part of or in response to a filed Petition.~~

~~(b) Scheduling. The DEQ shall schedule an administrative hearing after receipt of a proper and timely request.~~

~~(c) Notice. When the DEQ schedules an administrative hearing, the Administrative Law Clerk shall notify the parties of the date, time and place of the hearing. Such notice shall satisfy the notice requirements of the APA and shall be made at least fifteen (15) days prior to the hearing unless otherwise provided by law or agreed by the parties.~~

~~(d) Procedure. The Administrative Law Judge may refer to District Court Rules and Procedure in the absence of applicable APA and DEQ statutes and rules, including this Chapter. Subject to the limitations in OAC 252:2-9-7(d), the Administrative Law Judge, with the consent of all parties, may vary the procedures of this Chapter.~~

252:2-9-7. Administrative Law Judges and Clerks [REVOKED]

~~(a) Administrative Law Judge. The Executive Director may designate an Administrative Law Judge for any administrative hearing properly and timely requested of the DEQ, unless precluded by law. Administrative Law Judges shall be familiar with the rules of procedure and generally familiar with the substantive rules governing the matter, and shall not have had prior involvement in the matter other than as an Administrative Law Judge. The Administrative Law Judge so designated shall have full authority to conduct all aspects of the hearing proceedings except for the issuance of a Final Order.~~

~~(b) Administrative Law Clerk. The Executive Director may designate an Administrative Law Clerk to maintain the administrative hearing dockets and records, and perform such other duties as described in this Chapter or incidental thereto.~~

~~(c) References to Administrative Law Judge. The Executive Director or designee may perform functions described in this Section for Administrative Law Judges.~~

~~(d) Authority. Administrative Law Judges have complete authority to conduct administrative hearing proceedings and may take any~~

~~action not inconsistent with the provisions of the rules of this Chapter or of the APA for the maintenance of order at hearings and for the expeditious, fair, and impartial conduct of the proceedings. Administrative Law Judges may, without limitation:~~

- ~~(1) arrange and issue notice of the date, time and place of hearings and conferences;~~
- ~~(2) establish the methods and procedures to be used in the presentation of the evidence;~~
- ~~(3) hold conferences to settle, simplify, determine, or strike any of the issues in a hearing, or to consider other matters that may facilitate the expeditious disposition of the hearing;~~
- ~~(4) administer oaths and affirmations;~~
- ~~(5) regulate the course of the hearing and govern the conduct of participants;~~
- ~~(6) examine witnesses;~~
- ~~(7) rule on, admit, exclude and limit evidence, at or before hearings;~~
- ~~(8) establish the time for filing motions, testimony, and other written evidence, briefs, findings, and other submissions, and hold the record open for such purposes;~~
- ~~(9) rule on motions and pending matters;~~
- ~~(10) divide the hearing into stages or join claims of parties whenever the number of parties is large or the issues are numerous and complex; and~~
- ~~(11) restrict attendance by persons not parties to the hearing in appropriate cases.~~

~~(e) Technical assistance. At the request of the Administrative Law Judge, the Executive Director may designate a DEQ representative, who has had no assigned responsibilities related to the matter at issue, to serve as technical adviser to the Administrative Law Judge.~~

252:2-9-8. Service [REVOKED]

~~(a) Methods of service. Service of a petition and initial notice of hearing shall be by personal delivery served by a person licensed to make service of process in civil cases, or by certified mail with delivery shown by return receipt, or by publication if it is shown that service cannot be made by any other means despite the exercise of due diligence. Where the DEQ is serving a petition or notice, personal service may be made by a person designated by the Executive Director to make such service for the DEQ. Service by certified mail shall be effective on the date of receipt or, if refused, on the date of refusal by the Respondent. Acceptance or refusal by any officer of a business or an authorized agent for a business shall constitute acceptance or refusal by the party addressed.~~

~~(b) Proof of service. The person making service shall file proof of service thereof with the Administrative Law Clerk promptly and in any event within the time during which the person served must respond to the process. Failure to make proof of service does not affect the validity of service. The Administrative Law Judge may refer to the Oklahoma Pleading Code for guidance regarding service.~~

- ~~(1) Acknowledgment. Acknowledgment in writing by the recipient, or appearance by the recipient at a hearing without objecting to service, is equivalent to proof of service.~~

~~(2) Actions on a license. Service by mail in a matter seeking to revoke or suspend any license may be deemed complete when there is an affirmation that the notice was mailed by certified mail to the licensee's last known address, and that he or she may not be found otherwise, despite the exercise of due diligence. The Administrative Law Judge shall inquire into and determine whether due diligence has been exercised.~~

~~(c) Service by mail. Except for service of the petition and initial notice, service by mail is complete upon mailing, and may be shown by the postmark.~~

~~(d) Service on representative. Service made upon an attorney of record constitutes service upon the party the attorney represents. Service made upon a person authorized by Oklahoma law to receive service on behalf of a party constitutes service upon that party.~~

252:2-9-9. Responsive pleading [REVOKED]

~~A Respondent may file, and the Administrative Law Judge may direct a Respondent to file, a responsive pleading to the enforcement petition or order that initiated the action.~~

252:2-9-10. Prehearing conferences [REVOKED]

~~(a) General. The Administrative Law Judge may schedule and conduct prehearing conferences as necessary to identify parties and issues and to set schedules and agendas for hearing related activities. The Administrative Law Clerk shall notify the parties of the scheduling of a prehearing conference. The Administrative Law Judge may authorize a prehearing conference by telephone. On request, prehearing conferences shall be on the record.~~

~~(b) Subjects. Prehearing conferences may address:~~

- ~~(1) identification and simplification of issues, including the elimination of frivolous claims or defenses;~~
- ~~(2) amendments to the pleadings;~~
- ~~(3) the plan and schedule of discovery and limitations to be placed thereon;~~
- ~~(4) identification of admissions of fact to avoid unnecessary proof and cumulative evidence;~~
- ~~(5) the identification of witnesses and substance of testimony, exhibits, and documents;~~
- ~~(6) the use of prehearing briefs and prefiled testimony in the form of sworn affidavits;~~
- ~~(7) settlement of all or some of the issues before the hearing;~~
- ~~(8) adoption of special procedures for managing potentially difficult or protracted actions that may involve complex issues, multiple parties, novel or difficult legal questions, or evidence problems;~~
- ~~(9) scheduling pursuant to OAC 252:2-9-11; and~~
- ~~(10) such other matters as may aid disposition.~~

252:2-9-11. Prehearing scheduling conference [REVOKED]

~~(a) Purpose. A prehearing scheduling conference may be held for the scheduling of matters to be accomplished. Such conference shall be designed to expedite the disposition of the action and discourage wasteful prehearing activities, establish early and continuing control of the management of the hearing, and set dates for prehearing activities.~~

~~(b) Scheduling. The Administrative Law Judge may enter an interim order which establishes, insofar as feasible, the time:~~

- ~~(1) to amend the pleadings;~~
- ~~(2) to file and hear motions;~~
- ~~(3) to complete discovery;~~
- ~~(4) of further prehearing conferences; and~~
- ~~(5) for accomplishing any other matters appropriate in the circumstances of the case.~~

~~(c) Changes in scheduling order. The Administrative Law Judge may change dates and time periods set in the scheduling order by issuing a modifying order upon good cause shown.~~

252:2-9-12. Discovery [REVOKED]

~~All parties shall act in good faith in the scheduling and conduct of discovery. Failure of a party to provide reasonable opportunity for the opposing party to depose any witness shall be grounds to exclude the testimony of that witness at the hearing. Discovery shall be conducted in accordance with the Oklahoma Discovery Code unless otherwise ordered by the Administrative Law Judge for good cause.~~

252:2-9-13. Prehearing Order [REVOKED]

~~(a) Purpose and form. Following a prehearing conference, the Administrative Law Judge may issue a Prehearing Order which recites and schedules the action to be taken and which shall control the course of the action unless modified by a subsequent order to prevent manifest injustice.~~

~~(b) Content. The Prehearing Order should include the results of the conference and advice to the Administrative Law Judge regarding the factual and legal issues, including summaries of material evidence, to be presented. The Prehearing Order should also present all questions of law in the case. All exhibits shall be marked, listed and identified in the Prehearing Order. If there is objection to the admission of any exhibits, the grounds for the objection must be specifically stated. Witnesses shall also be listed along with the nature of their testimony. No exhibit or witness may be added to the Prehearing Order once the Order has been prepared, signed, and filed by the Administrative Law Judge without a showing to the Administrative Law Judge by the requesting party that injustice would be created if the evidence or testimony were not allowed.~~

~~(c) Applicability. The contents of the Prehearing Order shall supersede the pleadings and govern the hearing of the case unless amended or allowed by the Administrative Law Judge to prevent injustice.~~

252:2-9-14. Subpoenas [REVOKED]

~~(a) Issuance. Subpoenas for the attendance of witnesses, the furnishing of information required by the Administrative Law Judge and the production of evidence shall be issued by the Administrative Law Clerk upon written request by a party or on the Administrative Law Judge's own motion. Subpoenas shall be served and a return made in the same manner as provided for state court proceedings.~~

~~(b) Failure to obey. The Executive Director may seek an~~

~~appropriate judicial order to compel compliance by persons who fail to obey a subpoena, who refuse to be sworn or make an affirmation at a hearing, or who refuse to answer a proper question during a hearing. The hearing may proceed despite any such refusal but the Administrative Law Judge may, in his discretion at any time, continue the proceedings as necessary to secure a court ruling.~~

252:2-9-15. Record [REVOKED]

~~(a) To be made. A record of the hearing shall be made, which shall be a tape recording unless otherwise agreed by the parties and the Administrative Law Judge. The recording will not be transcribed as a matter of course. A transcript may be obtained by submitting a written request to the Administrative Law Clerk and tendering payment in an amount sufficient to pay the cost of having the recording transcribed.~~

~~(b) Court reporter. A party may request a court reporter (CSR or LSR). The requesting party shall pay the costs, and the original transcript shall be filed in the case file as part of the record in the case. Each person or party requesting copies shall make arrangements for such with the reporter, and pay the costs.~~

~~(c) Maintained. The record of a proceeding and the file containing the notices and the pleadings will be maintained in a location designated by the Office of Administrative Hearings. All pleadings, motions, orders and other papers submitted for filing in such a proceeding shall be date/file stamped by the Administrative Law Clerk upon receipt. The burden of showing substantial prejudice by any failure to correctly file stamp any submittal shall be upon the party asserting such.~~

~~(d) Designation on appeal. On appeal, the parties may designate and counter designate portions of the record to save costs, following the procedures applicable in the Courts of Oklahoma.~~

252:2-9-16. Motions [REVOKED]

~~(a) Filing. All requests for action in a matter already before the DEQ shall be made in the form of a motion or cross petition, signed by the party presenting same or his attorney, and filed with the Administrative Law Clerk. A cross petition shall be served in the manner provided in Rule 252:2-9-8. A copy of any motion shall be mailed by the movant to all parties of record concurrently with the filing of the motion, and a certification of such mailing shall appear on the motion.~~

~~(b) Response. Within ten (10) days after service of any written motion, any party to the proceedings may file a response to the motion. The time for response may be extended or shortened by the Administrative Law Judge for good cause shown.~~

252:2-9-17. Continuances [REVOKED]

~~A motion for an extension or continuance shall state the reasons for the request and specify the length of time requested. Unless made before the Administrative Law Judge in open hearing, motions for extensions of time or for a continuance of the hearing to another date or time shall be in writing and filed with the Administrative Law Clerk. The Administrative Law Judge shall promptly grant or deny such request at his or her discretion. If the motion is denied, it may be renewed orally by the party at the~~

hearing.

252:2-9-18. Evidentiary hearing procedures [REVOKED]

~~(a) Generally that of civil proceedings. The order of procedure in hearings in all individual proceedings shall generally follow that which applies in District Court civil proceedings. At the discretion of the Administrative Law Judge, any party may reopen his case in chief, even after the adverse party has rested, consonant with the requirements of justice. Parties may stipulate to any lawful matter.~~

~~(b) Further presentation. After presentation of all cases in chief, parties to the action shall be confined to rebutting evidence unless the Administrative Law Judge, for good reasons in furtherance of justice, permits them to offer evidence in the original case.~~

~~(c) Rulings. The Administrative Law Judge shall rule on the admissibility of evidence and objections to evidence, and on motions or objections raised during hearings, except for motions for summary judgments. All objections to a ruling shall be made promptly with statement of basis or they will be deemed waived. Parties shall be deemed to have taken exception to any adverse ruling on an objection.~~

~~(d) Summary judgment. The granting of a motion for summary judgment shall be subject to the provisions of 252:2-9-21 (Proposed order) and 252:2-9-22 (Final order).~~

252:2-9-19. Default [REVOKED]

~~Any Respondent who fails to appear as directed, after receipt of notice as provided by this Chapter, may be determined to have waived the right to appear and present a defense to the allegations contained in the notice and/or petition. A Final Order in such proceeding may be issued by the Executive Director granting by default no more than the relief prayed for in the petition.~~

252:2-9-20. Settlement [REVOKED]

~~Administrative hearings may be resolved by agreed settlement or consent order with the concurrence of the Executive Director. The Administrative Law Judge may grant continuances to allow the parties to discuss settlement.~~

252:2-9-21. Proposed orders [REVOKED]

~~(a) Preparation of proposed orders. The Administrative Law Judge shall hear all evidence and arguments applicable in a case and shall prepare a proposed order including findings of facts and conclusions of law. Prior to such preparation, the Administrative Law Judge may request or require briefs from the parties on any relevant issue. The Administrative Law Judge shall also have the discretion to request or accept from the parties, proposed findings and conclusions.~~

~~(b) Service and presentation. Upon finalization of a proposed order, the Administrative Law Judge shall:~~

- ~~(1) present the proposed order and the record of the matter to the Executive Director for review and entry of a final order; or~~
- ~~(2) serve it on the parties, by regular mail, offering an opportunity for parties to file exceptions to the proposed order~~

~~before a final order is entered, pursuant to APA § 311, and then shall present the proposed order, the exceptions, if any, and the record of the matter to the Executive Director for entry of a final order. The parties may by written stipulation waive any of the requirements for a proposed order.~~

252:2-9-22. Final orders [REVOKED]

~~(a) Executive Director. For proceedings heard by an Administrative Law Judge, the Executive Director may adopt, amend, or reject any findings or conclusions of the Administrative Law Judge or exceptions of any party, or may remand the proceeding for additional argument or the introduction of additional evidence at a hearing held for that purpose. This may be done after:~~

~~(1) the opportunity for exceptions has lapsed without receiving exceptions, or after exceptions, briefs and oral arguments, if any, are made, or~~

~~(2) review of the record.~~

~~(b) Issuance. At the conclusion of the proceedings and [except as provided in Rule 252:2-9-19, Default] after review of the record and/or proposed findings of fact and conclusions of law, the Executive Director shall issue a final order reflecting the findings of fact made, the conclusions of law reached, and specifying the action to be taken. Upon the resolution of motions of summary judgment that are dispositive of the entire case and rulings on standing that are adverse to a Petitioner(s), the Executive Director shall issue a final order.~~

~~(c) Notice. Parties shall be notified either personally or by mail of the issuance of a final order. A copy of the final order shall be provided to any party and its attorney.~~

252:2-9-23. Reconsideration [REVOKED]

~~Any party may petition the DEQ for rehearing, reopening or reconsideration of any decision in an individual proceeding within ten days of its entry, pursuant to APA § 317. Nothing in this Chapter shall prevent reconsideration of a matter in accordance with other statutory provisions.~~

252:2-9-24. Judicial review [REVOKED]

~~The provisions of Section 318 of title 75 of the Oklahoma Statutes shall apply.~~

SUBCHAPTER 11. ADMINISTRATIVE PENALTY PROCEEDINGS [REVOKED]

252:2-11-1. Applicability [REVOKED]

~~The requirements of this Subchapter are in addition to the preceding requirements of this Chapter and are applicable to matters brought under 27A O.S.Supp. 1993, Sections 2-3-502, 2-5-110, and 2-7-126, or any similar statutes providing for the assessment by the DEQ of administrative penalties.~~

252:2-11-2. Notice of Violation ("NOV") [REVOKED]

~~Unless otherwise provided by the particular enabling legislation, administrative penalty proceedings shall be preceded by a written notice of violation (NOV) informing the Respondent of the regulatory requirement at issue. This NOV must be served upon the~~

~~Respondent and must state the factual allegations and particular standards or rules upon which the NOV is based. A letter, inspection sheet, petition, consent order or final order may constitute a NOV for purposes of instituting administrative penalty proceedings, if it meets the requirements of this Section.~~

252:2-11-3. Administrative compliance and penalty orders [REVOKED]

~~(a) When issued. The Executive Director upon the request of a DEQ program area may issue an administrative order requiring compliance, assessing penalties for past violations and specifying penalties for continuing noncompliance. If a preceding Notice of Violation is required by the enabling legislation, an administrative compliance or penalty order shall be issued not less than fifteen days after service of the NOV upon the Respondent, or such reduced period as may be necessary to render the Order reasonably effectual.~~

~~(b) Must specify. An administrative compliance or penalty order shall specify the facts and conclusions upon which it is based and shall set a time for the Respondent to comply with the applicable regulations. The Order shall specify the penalty, not to exceed the statutory maximum per day of noncompliance, to be assessed in the event that the Respondent fails to comply with the Order within the prescribed time, and, if applicable, the penalty assessed for past violations of the Code, rules, or licenses or permits.~~

~~(c) Service. An administrative compliance or penalty order shall be served in accordance with Rule 252:2-9-8. The Order shall advise the Respondent that it shall become final unless an administrative hearing is requested in writing within fifteen (15) days of service of the Order.~~

~~(d) Order following hearing. Based on the hearing and record, an administrative compliance or penalty order will be sustained, modified, or dismissed by the Executive Director. If the hearing process extends beyond any compliance deadline specified in the Order, fines specified in the Order for violations of the Order will continue to accrue during the hearing process unless the Administrative Law Judge stays the penalty upon request for good cause shown.~~

252:2-11-4. Determining penalty [REVOKED]

~~In addition to factors specified by 27A O.S.Supp. 1993, Section 2-3-502(K)(2) or other law, the following factors, without limitation, may be considered in determining the amount of penalty specified in an administrative penalty order:~~

- ~~(1) the gravity of the violation, including the likelihood of the development of adverse health effects caused by the violation, and the extent and severity of environmental degradation or adverse health effects caused or placed at risk by the violation,~~
- ~~(2) the degree of variance from the applicable standards,~~
- ~~(3) costs of correction of damage, and~~
- ~~(4) good or bad faith of the Respondent.~~

252:2-11-5. Assessment orders [REVOKED]

~~(a) Failure to comply with administrative orders. After an administrative compliance or penalty order is issued, proceedings~~

~~may be conducted to determine whether the Respondent has failed to comply with the Order for any period of time.~~

~~(b) Application for compliance and penalty hearing. Any time the DEQ believes the Order has been violated, it may with reasonable promptness apply to the Administrative Law Judge for a compliance and penalty hearing, alleging the period of noncompliance and the amount of the administrative penalty that has accrued. The DEQ shall provide a copy of the application to the Respondent.~~

~~(c) Elements to consider. The Executive Director, in deciding whether an administrative penalty or compliance order has been violated and whether the penalties are appropriate, may consider efforts to comply with applicable requirements made by the Respondent after issuance of the Order.~~

~~(d) Must request hearing within seven days. The DEQ's application shall advise the Respondent that the Respondent's right to contest the determination of noncompliance and the amount of the fine is waived if the request for hearing is not made within seven (7) calendar days of receiving notice. A request for hearing is deemed made when received by the DEQ. If timely requested, the hearing must be promptly set and held.~~

~~(e) Issuance of assessment orders. An assessment order shall be issued by the Executive Director following the determination of the application. An assessment order must state the nature and period of the violation, and determine the amount of the fine. The fine is due and payable immediately upon issuance of the assessment order, unless otherwise provided therein. A copy of the assessment order will be provided to the Respondent.~~

~~(f) Continuing violations. If the DEQ believes that violations of the administrative compliance or penalty order continue after the issuance of an assessment order, the DEQ may apply within a reasonable time for the issuance of additional assessment orders covering periods of violation since the period covered by the issuance of a previous assessment order.~~

252:2-11-6. Penalty-only proceedings [REVOKED]

~~(a) General. In accordance with 27A O.S. Supp. 1993, Section 2-3-502(L), the DEQ may, within three (3) years of discovery, issue an administrative penalty order proposing specified administrative penalties for non-continuing violations of the Code, rules promulgated thereunder, or permits or licenses issued pursuant thereto.~~

~~(b) Must specify. The administrative penalty order shall specify the facts and conclusions upon which it is based.~~

~~(c) Determining Penalty. For information on determining penalty, see 252:2-11-4.~~

~~(d) Service. The administrative penalty order shall be served in accordance with Rule 252:2-9-8. The Order shall advise the Respondent that it shall become final unless a hearing is requested in writing within fifteen (15) days of service of the Order.~~

~~(e) Hearing. Based on the hearing and the record, an administrative penalty order will be sustained, modified, or dismissed by the Executive Director.~~

252:2-11-7. Considerations for self-reporting of noncompliance [REVOKED]

~~(a) Purpose.~~ The DEQ monitors the environmental compliance of regulated entities through activities such as periodic inspections and record reviews, but the regulated entities have a superior vantage point and generally greater resources to monitor their own performance. The public interest in environmental protection is served by positive incentives to promote, achieve and maintain compliance as well as by the negative incentive of a unilateral agency enforcement action with an associated penalty. The DEQ should encourage voluntary disclosure and prompt remedial action. The DEQ believes it is conducive to improved environmental compliance to mitigate an administrative and civil penalty which would otherwise be appropriate, in those cases where a regulated entity has disclosed an apparent violation, has taken prompt and appropriate action to correct the violation and its consequences, and has taken affirmative action to prevent its recurrence.

~~(b) Conditions for not seeking administrative and civil penalties.~~ Except in the case of habitual noncompliance or as otherwise provided in this section, in evaluating enforcement action for a regulated entity's actual or apparent failure to comply with DEQ rules, the DEQ will not seek an administrative or civil penalty when the following circumstances are present:

~~(1) The regulated entity voluntarily, promptly and fully discloses the apparent failure to comply with applicable state environmental statutes or rules to the appropriate DEQ regulatory program in writing before the program learns of it or is likely to learn of it imminently;~~

~~(2) The failure is not deliberate or intentional;~~

~~(3) The failure does not indicate a lack or reasonable question of the basic good faith attempt to understand and comply with applicable state environmental statutes or rules through environmental management systems appropriate to the size and nature of the activities of the regulated entity;~~

~~(4) The regulated entity, upon discovery, took or began to take immediate and reasonable action to correct the failure (i.e., to cease any continuing or repeated violation);~~

~~(5) The regulated entity has taken, or has agreed in writing with the appropriate program to take, remedial action as may be necessary to prevent recurrence of such failure. Any action the regulated entity agrees to take must be completed;~~

~~(6) The regulated entity has addressed, or has agreed in writing with the appropriate program to address, any environmental impacts of the failure in an acceptable manner;~~

~~(7) The regulated entity has not realized and will not realize a demonstrable and significant economic or competitive advantage as a result of non-compliance; and~~

~~(8) The regulated entity cooperates with the DEQ as the DEQ performs its duties and provides such information as the DEQ reasonably requests to confirm the entity's compliance with these conditions.~~

~~(c) Partial qualification.~~ Notwithstanding the failure of a regulated entity to meet all of the conditions in subsection b, the DEQ will consider the nature and extent of such actions of the regulated entity in mitigation of any administrative or civil penalty otherwise appropriate. If the regulated entity meets all conditions in subsection b except item 7 relating to significant

~~economic or competitive advantage, the DEQ will seek an administrative or civil penalty only to the extent of the economic or competitive advantage gained.~~

~~(d) Relationship to federal/state agreements. In the event of any conflict, the elimination or mitigation of penalties pursuant to subsections b and c is subject to agreements between the DEQ and the United States Environmental Protection Agency relating to regulatory program delegation or authorization from the United States Environmental Protection Agency to the DEQ.~~

~~(e) Applicability. This section applies to all enforcement cases arising from violations discovered by or brought to the attention of the DEQ after the effective date of this section.~~

SUBCHAPTER 13. FORMAL PUBLIC MEETINGS AND ADMINISTRATIVE PERMIT PROCEEDINGS [REVOKED]

PART 3. ADMINISTRATIVE PERMIT PROCEEDINGS [REVOKED]

252:2-13-30. Scope; purpose of proceedings [REVOKED]

~~(a) Applicability. In addition to the requirements of Subchapter 9 of this Chapter, the requirements of this Part shall apply to administrative hearings on draft permits.~~

~~(b) Purpose. The purpose of an administrative permit proceeding is to provide for an evidentiary proceeding for challenges to draft permits and to determine their compliance with the Code and rules promulgated thereunder.~~

252:2-13-31. Definitions [REVOKED]

~~The following words or terms, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise:~~

~~"Administrative permit hearing" means an evidentiary hearing conducted by the DEQ as part of an administrative permit proceeding.~~

~~"Administrative permit proceeding" means all prehearing conferences, evidentiary hearings and other proceedings connected with an individual proceeding on a draft permit.~~

~~"Joining of parties" means the grouping of parties to an administrative permit proceeding who assert rights to relief in respect of or arising out of the same draft permit.~~

~~"Lead Counsel" means the attorney acting as coordinating counsel for all petitioners or, if only one petitioner, that party's legal representative.~~

~~"Petitioner(s)" means a person or group who requests an administrative permit hearing and is determined by the Administrative Law Judge to have standing as a party to the action.~~

~~"Respondent" means an applicant whose formally filed permit application and the draft permit related thereto are the subject of an administrative permit proceeding.~~

252:2-13-32. Request for administrative permit hearing [REVOKED]

~~(a) Request. A request for an administrative permit hearing must be in writing signed by the requester, requesters or authorized representative of a group of requesters and shall contain a brief statement of the basis of the request and the name and address of~~

~~each requester. If the request is made by or on behalf of a group, the request should contain a list of names and addresses of group members. A request shall be considered an initial petition and should be personally delivered or sent to the address described in the notice telling of such request opportunity or to the DEQ's Office of Administrative Hearings.~~

~~(b) Initiation of proceedings. Unless otherwise provided by law, the initiation of administrative permit proceedings shall not occur until a draft permit has been prepared by the DEQ and amended, as appropriate, based on comments received during the public comment period.~~

~~(c) Joinder of DEQ. The DEQ, through the permit drafting program, shall be a party to the permit proceeding upon its own petition, or may be joined as a party upon order of the Administrative Law Judge. If the DEQ is not a party to the proceedings, the Administrative Law Judge may call witnesses, hear testimony and receive evidence from the permit drafting program. Such witnesses shall be subject to cross examination by the parties.~~

~~(d) Location for Administrative Permit Hearings. Proceedings related to administrative permit hearings shall be held at the principal office of the DEQ unless otherwise specified by the Administrative Law Judge.~~

252:2-13-33. Relationship to other rules [REVOKED]

~~In addition to the provisions of this Part, the requirements and procedures set forth in Subchapter 9 of this Chapter (OAC 252:2) for individual proceedings shall apply to administrative permit proceedings and hearings unless specified otherwise or in conflict. In cases of conflict, specific provisions of this Part control over Subchapter 9. The provisions include:~~

- ~~(1) OAC 252:2-9-7 (Administrative Law Judges and Clerks);~~
- ~~(2) OAC 252:2-9-8 (Service);~~
- ~~(3) OAC 252:2-9-10 (Prehearing conferences);~~
- ~~(4) OAC 252:2-9-11 (Prehearing scheduling conference);~~
- ~~(5) OAC 252:2-9-12 (Discovery);~~
- ~~(6) OAC 252:2-9-13 (Prehearing Order);~~
- ~~(7) OAC 252:2-9-14 (Subpoenas);~~
- ~~(8) OAC 252:2-9-16 (Motions);~~
- ~~(9) OAC 252:2-9-17 (Continuances);~~
- ~~(10) OAC 252:2-9-18 (Evidentiary hearing procedures);~~
- ~~(11) OAC 252:2-9-19 (Default);~~
- ~~(12) OAC 252:2-9-20 (Settlement);~~
- ~~(13) OAC 252:2-9-21 (Proposed orders);~~
- ~~(14) OAC 252:2-9-22 (Final orders); and~~
- ~~(15) OAC 252:2-9-23 (Reconsideration).~~

252:2-13-34. [RESERVED] [REVOKED]

252:2-13-35. Prehearing verification conference [REVOKED]

~~(a) Notice. According to 75:309(b), the Administrative Law Judge shall give notice to requesters and Respondents of a prehearing verification conference on a request for an administrative permit hearing.~~

~~(b) Purpose. The prehearing verification conference shall be attended by all requesters and Respondents and/or their~~

~~representatives for the purpose of examining notice and identifying parties and their representatives.~~

~~(c) Verification of notice. The Administrative Law Judge shall examine evidence and receive testimony on whether notice of the opportunity to request an administrative permit hearing was given in accordance with applicable law.~~

~~(d) Verification of request. The Administrative Law Judge shall verify whether each requester made a timely and proper request for the hearing.~~

~~(e) Verification of standing. The Administrative Law Judge shall verify the standing of all requesters to be parties pursuant to requirements set by applicable law.~~

~~(f) Cure of deficiencies. The Administrative Law Judge may allow deficiencies in notice or proof of standing to be cured.~~

~~(g) Identification of representatives. When verification is complete, each party shall identify its counsel. All counsel and individuals appearing pro se (representing themselves) shall enter a written entry of appearance with the Administrative Law Judge. In addition, each party shall designate one individual to receive notice and to take primary responsibility for the filing of documents with the Administrative Law Clerk.~~

~~(h) Groups. Members of a formally organized group may request to be considered as one party to the hearing and shall be considered a single entity if they meet applicable standing requirements for such a group or if ten (10) members meet the applicable standing requirements for individuals. A group qualified to be a single party must be represented by Counsel during administrative permit proceedings.~~

252:2-13-36. Selection of Lead Counsel [REVOKED]

~~When more than one Petitioner is verified as a party and their representation is by more than one Counsel, the Petitioners shall select one Lead Counsel to coordinate action and communications on behalf of all Petitioners and their attorneys. The selection of a Lead Counsel shall not prohibit other attorneys for petitioners, or unrepresented Petitioners, from dividing responsibilities such as direct and cross examination, discovery, and opening/closing arguments. Designation as Lead Counsel shall not be deemed to establish an attorney client relationship not otherwise existing. For good cause, the Administrative Law Judge may allow substitution of Lead Counsel and authorize additional Lead Counsel when conflicts of interest appear.~~

252:2-13-37. Identification of issues [REVOKED]

~~(a) Integrated petition. The Lead Counsel, on behalf of all joined Petitioners, shall file an integrated petition in the office of Administrative Hearings within twenty (20) days after the completion of the prehearing verification conference. The integrated petition shall name the person against whom relief is requested, contain a reference to the statutes and/or rules involved, contain a brief statement of the facts giving a right to relief, and state clearly and concisely the action or relief sought and the ground therefor. The integrated petition shall be in the form set forth in Rule 252:2-9-2(c). Relief in the alternative may be pleaded. The petition shall also contain a preliminary listing~~

~~of topics which the Petitioner(s) intends to put at issue in the hearing. Upon filing an integrated petition with the DEQ, Lead Counsel shall serve the Respondent with a copy of the petition and shall mail copies to, or make personal delivery to, all Petitioner(s) or their representatives.~~

~~(b) Answer. The Respondent shall file an answer to the integrated petition within twenty (20) days after service of the petition upon him. An answer may contain specific responses or a general denial and shall be served by the Respondent on all other parties to the action.~~

~~(c) Cross petition. The Respondent may file a cross petition and the named parties shall have the right to file answers within 20 days of service.~~

~~(d) Amendment of petition and answer. The parties have the right to amend petitions and answers upon a showing of good cause and with leave of the Administrative Hearing Judge.~~

252:2-13-38. Administrative record [REVOKED]

~~(a) Content. In addition to the provisions of Subchapter 9 of this Chapter, the administrative permit hearing record shall include:~~

- ~~(1) the permit application on file with the DEQ, as amended;~~
- ~~(2) all written comments received during the public comment period;~~
- ~~(3) the tape or transcript of the formal public meeting;~~
- ~~(4) documents resulting from the DEQ's review of the permit application and public comments;~~
- ~~(5) the draft permit, fact sheet and the response to comments, if any, issued by the DEQ; and~~
- ~~(6) all published notices.~~

~~(b) Admission into evidence. The documents referenced in (a) of this Section may be admitted and received in evidence. The Administrative Law Judge may direct that a witness be provided to sponsor a portion or portions of these documents. The Administrative Law Judge may direct the appropriate party to produce the witness for cross examination. If a sponsoring witness cannot be provided, the Administrative Law Judge may reduce the weight accorded the appropriate portion of the record.~~

252:2-13-39. Withdrawal and dismissal [REVOKED]

~~(a) Withdrawal. Any Petitioner may formally withdraw from the proceedings at any time by filing a statement of withdrawal with the Administrative Law Clerk.~~

~~(b) Dismissal and release.~~

- ~~(1) By motion of Petitioner(s). At any time during the proceedings, Petitioner(s) may request dismissal of the action by filing a motion with the Hearing Clerk that is signed by all Petitioner(s) or their representative(s). Such dismissal shall be with prejudice unless the words "without prejudice" appear in the Order of Dismissal issued by the Administrative Law Judge.~~
- ~~(2) By motion of Respondent. An action shall be dismissed by the Administrative Law Judge upon withdrawal of the permit application by the Respondent. Any such dismissal shall be with prejudice as to that permit application and the draft permit related thereto.~~

~~(3) By Administrative Law Judge. An action may be dismissed by the Administrative Law Judge if all Petitioners fail to appear or to prosecute with diligence, or when Petitioner(s) are in disobedience to an Interim Order issued by the Administrative Law Judge. Any Petitioner may be dismissed from an ongoing action for failure to appear or prosecute with diligence or for disobedience to an Interim Order, only upon motion by a party to the action. Such dismissals shall not occur until a Petitioner subject to the Dismissal Order receives notice of the prospective dismissal and is given the opportunity to be heard concerning it. The Administrative Law Judge may release any party from the action upon proper motion at any time.~~

252:2-13-40. Evidentiary hearing procedures on draft permits [REVOKED]

~~(a) Order of procedure. For information on order of procedure, see OAC 252:2-9-18.~~

~~(b) Burden of proof. The Respondent has the burden of proof as to issues raised by Petitioner(s).~~

~~(1) Petitioner(s). Petitioner(s) shall have the burden of going forward to present an affirmative case on the issues identified in the petition.~~

~~(2) Respondent. After the conclusion of the case of the Petitioner(s), the Respondent shall have the burden of presenting an affirmative case on all issues raised by the Petitioner(s).~~

~~(c) Testimony and cross examination. The Administrative Law Judge may provide for the testimony of opposing witnesses to be heard consecutively. No cross examination shall be allowed on questions of law, on matters that are not subject to challenge in an administrative hearing, or on questions of DEQ policy except to the extent such policy must be analyzed to disclose the basis for draft permit requirements. Issues between the parties that are relevant to the hearing but not raised at the hearing shall be dismissed as between the parties and may be so reflected in the final findings of fact and conclusions of law.~~

252:2-13-41. Orders [REVOKED]

~~(a) Proposed and Final Orders. For information on Proposed and Final Orders, see OAC 252:2-9-21 and 252:2-9-22.~~

~~(b) Final Orders. Final Orders issuing from an administrative permit hearing shall be based on the applicable provisions of statutes and rules, and may be conditioned in accordance with findings and recommendations of the Administrative Law Judge.~~

252:2-13-42. Issuance or denial of permit [REVOKED]

~~The applicant bears the burden of persuading the agency that the permit should issue. Title 75 O.S. 1991, § 307 is the appropriate mechanism to address any alleged failure by the DEQ to conform the issuance or denial of the permit to the requirements of a Final Order.~~

SUBCHAPTER 15. ENVIRONMENTAL PERMIT PROCESSING TIMES [REVOKED]

PART 1. UNIFORM PERMITTING PROGRAM IN GENERAL [REVOKED]

252:2-15-1. Purpose and applicability [REVOKED]

~~(a) Purpose. The rules in this Subchapter implement the Oklahoma Uniform Environmental Permitting Act, 27A O.S.Supp. 1995, § 2-14-101 et seq., and apply to applicants for and holders of DEQ permits and other authorizations.~~

~~(b) Supersedes inconsistent rules. Except as otherwise provided by statute, the provisions of this Subchapter shall supersede any inconsistent provision of other Chapters of this Title.~~

~~(c) Applicability.~~

~~(1) Applications filed with the DEQ on and after July 1, 1996, are subject to the procedural requirements of 27A O.S.Supp. 1995, § 2-14-101 et seq., this Subchapter and other applicable rules of the Board.~~

~~(2) Applications filed before July 1, 1996, are subject to the statutory and regulatory procedural requirements existing at the time of the filing unless the applicant elects to comply with the statutes and rules described in paragraph 1 of this subsection.~~

252:2-15-2. Definitions [REVOKED]

~~In addition to terms defined in 252:2-1-2, the following words and terms, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise.~~

~~"Act" means the Oklahoma Uniform Environmental Permitting Act, 27A O.S. § 2-15-101 et seq.~~

~~"Administratively complete" means an application that contains the information specified in the application form and rules in sufficient detail to allow the DEQ to begin technical review.~~

~~"Application" See 27A O.S.Supp. 1995, § 2-14-103(1).~~

~~"Major facility", as used in air quality tier classifications, means a source subject to the permitting requirements of 40 CFR Part 70.~~

~~"Minor source", as used in air quality tier classifications, means a source that is not subject to the permitting requirements of 40 CFR Part 70.~~

~~"Off site", as used in hazardous waste, solid waste and UIC tier classifications, means a facility which receives waste from various sources for treatment, storage, processing, or disposal.~~

~~"On site", as used in hazardous waste, solid waste and UIC tier classifications, means a facility owned and operated by an industry for the treatment, storage, processing, or disposal of its own waste exclusively.~~

~~"Part" means a numbered Part of this Subchapter.~~

~~"Program" means a regulatory section or division of the DEQ.~~

~~"Submittal" means a document or group of documents provided as part of an application.~~

~~"Supplement" means a response to a request for additional information following completeness and technical reviews, and information submitted voluntarily by the applicant.~~

~~"UIC" means underground injection control.~~

PART 3. TIER I, II AND III PROCESS REQUIREMENTS [REVOKED]

252:2-15-26. Tier processes described [REVOKED]

~~To implement the three-tiered permitting processes of the Act,~~

~~applications are classified in Part 5 as Tier I, II or III. The steps an applicant must follow for a Tier I, II or III application are shown in Appendix C of this Chapter.~~

252:2-15-27. Unclassified applications [REVOKED]

~~The tier designation for any type of application not classified in this Subchapter shall be determined according to 27A O.S.Supp. 1995, § 201.~~

252:2-15-28. Permit decision-making authority [REVOKED]

~~(a) Designated positions. The Executive Director may delegate in writing the power and duty to issue, renew, amend, modify and deny permits and take other authorization or registration action. Unless delegated to a Division Director by formal assignment or rule, the authority to act on Tier I applications shall be delegated to positions within each permitting program having technical supervisory responsibilities and, for local actions authorized by law, to environmental specialist positions held by the DEQ's local services representatives. The authority to act on emergency permits or Tier II applications shall be delegated to the Division Director of the applicable permitting division.~~

~~(b) Revision. The Executive Director may amend any delegation in writing.~~

252:2-15-29. Published notices [REVOKED]

~~(a) Notice content. In addition to content requirements of the Act, all published legal notice(s) shall contain the:~~

- ~~(1) Name and address of the applicant;~~
- ~~(2) Name, address and legal description of the site, facility and/or activity;~~
- ~~(3) Purpose of notice;~~
- ~~(4) Type of permit or permit action being sought;~~
- ~~(5) Description of activities to be regulated;~~
- ~~(6) Locations where the application may be reviewed;~~
- ~~(7) Names, addresses and telephone numbers of contact persons for the DEQ and for the applicant;~~
- ~~(8) Description of public participation opportunities and time period for comment and requests;~~
- ~~(9) Any other information required by DEQ rules; and~~
- ~~(10) Any information the applicant deems relevant.~~

~~(b) Proof of publication. An applicant, within twenty (20) days after the date of publication, shall provide the DEQ with a written affidavit of publication for each notice published. In case of a mistake in a published notice, the DEQ may approve the publication of a legal notice of correction or may require that the entire legal notice be republished.~~

252:2-15-30. Tier I process requirements [REVOKED]

~~(a) Pre application conference. Prior to filing an application, an applicant may request a conference with the DEQ.~~

~~(b) Application filing.~~

- ~~(1) Copies. Two (2) copies of a Tier I application shall be filed with the DEQ except when the application form or instructions specifies that only one (1) copy is needed. Applicants for residential systems (OAC 252:640) and small~~

public sewage systems (OAC 252:655-29) permits shall file their two copies with the local DEQ office for the county in which the real property is located.

~~(2) Fees.~~ Fees established in DEQ program rules shall be payable at the time of application and are not refundable.

~~(3) Notice to landowner.~~ Applicants must demonstrate to the DEQ that they are not seeking a permit for land or for any operation upon land owned by others without their knowledge. Applicants shall certify by affidavit filed with the DEQ that they own the real property, or they have a current lease or easement which is given to accomplish the permitted purpose, or if they do not own the real property, they have provided legal notice to those who do. The DEQ may rely on the affidavit, and the applicants shall bear the burden of meeting any challenges. Legal notice is governed by Oklahoma law which, for example, authorizes: service by sheriff or private process server; service by certified mail, restricted delivery; or service by publication, if the person cannot be located through due diligence. Notice to the person who signed a lease or to the administrator or executor of a trust or an estate may be sufficient.

~~(4) Withdrawal.~~ An applicant may withdraw an application at any time with written notice to the DEQ and forfeiture of fees.

~~(c) Application review.~~ Unless stated otherwise in new laws or rules, applications are subject to the laws and rules of the DEQ as they exist on the date of filing and afterward as changed, up to the date of issuance or denial. See Part 7 for review procedures and time lines.

~~(d) Issuance or denial.~~

~~(1) Compliance required.~~ A new, modified or renewed permit or other authorization shall not be issued until the DEQ has determined the application is in substantial compliance with applicable requirements of the Code and rules of the Board.

~~(2) Conditions for issuance.~~ The Department may not issue a new, modified or renewed permit or other authorization if:

~~(A) The applicant has not paid all monies owed to the DEQ or is not in substantial compliance with the Code, rules of the Board and the terms of any existing DEQ permits and orders. The DEQ may impose special conditions on the applicant to assure compliance and/or a separate schedule which the DEQ considers necessary to achieve required compliance; or~~

~~(B) Material facts were misrepresented or omitted from the application and the applicant knew or should have known of such misrepresentation or omission.~~

~~(3) Issuance.~~ See 252:2-15-28.

252:2-15-31. Tier II process requirements [REVOKED]

~~(a) Pre-application conference.~~ "Tier I" requirements apply. See 252:2-15-30.

~~(b) Application.~~ "Tier I" requirements apply. See 252:2-15-30, except the applicant shall file three (3) copies of the application with the DEQ and place one (1) copy for public review in the county in which the site, facility or activity is located.

~~(c) Published notice of filing.~~ See 27A O.S. § 2-14-301 and 252:2-15-29.

~~(d) Application review. "Tier I" requirements apply. See 252:2-15-30.~~

~~(e) Draft permit or draft denial. See 27A O.S. § 2-14-302.~~

~~(f) Notice of draft permit/denial. See 27A O.S. § 2-14-302 and 252:2-15-29. For permit modification actions, only those issues relevant to the modification(s) shall be reopened for public review and comment.~~

~~(1) Exception to notice requirement. Applicants for solid waste transfer station permits shall be exempt from public comment and public meeting requirements if the board of county commissioners of the county of the proposed site, after opportunity for written or oral public comment, has found the application to be within the scope of the county's solid waste management plan. See 27A O.S. Supp. 1995, § 2-10-307.~~

~~(2) Additional notice. In addition to Section 302 notice:~~

~~(A) Applicants for a NPDES, RCRA or UIC permit are subject to applicable additional notice provisions of federal requirements promulgated as rules of the Board.~~

~~(B) Applicants for a proposed wastewater discharge or emissions permit which may affect the water quality or air quality of a neighboring state must give written notice to the environmental regulatory agency of that state.~~

~~(C) Applicants for a solid waste landfill permit shall provide notice by certified mail, return receipt requested, to owners of mineral interests and to adjacent landowners whose property may be substantially affected by installation of a landfill site. See *DuLaney v. OSDH*, Okl., 868 P.2d 676 (1993).~~

~~(g) Public comment and formal public meeting. See 27A O.S. § 2-14-302 and 27A O.S. § 2-14-303. The DEQ shall determine the location of any formal public meeting to be held and the designated presiding officer shall establish its procedures.~~

~~(h) Response to comments. See 27A O.S. § 2-14-304.~~

~~(i) Issuance or denial. "Tier I" requirements apply. See 252:2-15-30.~~

252:2-15-32. Tier III process requirements [REVOKED]

~~(a) Pre application conference. "Tier I" requirements apply. See 252:2-15-30.~~

~~(b) Filing, fees and withdrawal. "Tier II" requirements apply. See 252:2-15-31.~~

~~(c) Notice of filing and process meeting opportunity. The applicant shall include a 30-day opportunity to request a process meeting in the published notice of filing. See 27A O.S. § 2-14-301(B) and 252:2-15-29.~~

~~(d) Process meeting. See 27A O.S. § 2-14-301(B). The location of and procedures for the process meeting shall be determined by the DEQ.~~

~~(e) Application review. "Tier I" requirements apply. See 252:2-15-30.~~

~~(f) Draft permit or draft denial. See 27A O.S. § 2-14-302.~~

~~(g) Notice of draft permit/denial. "Tier II" requirements apply. See 252:2-15-31.~~

~~(h) Public comment period and public meeting. "Tier II" requirements apply. See 252:2-15-31.~~

~~(i) Proposed permit and notice. After the DEQ reviews public comments and prepares a proposed permit by amending the draft permit in response to comments as necessary, the applicant shall publish notice of the proposed permit and of the opportunity to request an administrative permit hearing. See 27A O.S. § 2-14-304 and 252:2-15-29.~~

~~(j) Administrative permit hearing. See 27A O.S. § 2-14-304 and, for procedures, Subchapter 13 of this Chapter, except references to "draft permit" in Subchapter 13 shall mean "proposed permit" as used in 27A O.S. § 2-14-103 and 27A O.S. § 2-14-304 (C) and (D).~~

~~(k) Response to comments. See 27A O.S. § 2-14-304.~~

~~(l) Issuance or denial. "Tier I" requirements apply. See 252:2-15-30.~~

PART 5. TIER CLASSIFICATIONS [REVOKED]

252:2-15-40. Air quality applications - Tier I [REVOKED]

~~(a) Minor facility permits. The following air quality authorizations for minor facilities require Tier I applications.~~

~~(1) New permits. New construction, operating and relocation permits.~~

~~(2) Modifications of permits.~~

~~(A) Modification of a construction permit for a minor facility that will remain minor after the modification.~~

~~(B) Modification of an operating permit that will not change the facility's classification from minor to major.~~

~~(C) Extension of expiration date of a construction permit.~~

~~(3) Renewals. Renewals of operating permits.~~

~~(b) Part 70 source permits. The following air quality authorizations for Part 70 sources require Tier I applications.~~

~~(1) New permits.~~

~~(A) New construction permit for an existing Part 70 source for any change considered minor under 252:100-8-7.2(b)(1).~~

~~(B) New operating permit that:~~

~~(i) is based on a construction permit that was processed under Tier II or III, and 252:100-8-8, and~~

~~(ii) has conditions which do not differ from the construction permit's operating conditions in any way considered significant under 252:100-8-7.2(b)(2).~~

~~(2) Modifications of permits.~~

~~(A) Modification of any operating permit condition that:~~

~~(i) is based on the operating conditions of a construction permit that was processed under Tier II or III, and 252:100-8-8, and~~

~~(ii) does not differ from those construction permit conditions in any way considered significant under 252:100-8-7.2(b)(2).~~

~~(B) A construction or operating permit modification that is minor under 252:100-8-7.2(b)(1).~~

~~(C) Extension of expiration date of a Part 70 source's construction permit with no or minor modifications.~~

~~(c) Other authorizations. The following air quality authorizations require Tier I applications.~~

~~(1) New, modified and renewed individual authorizations under general operating permits for which a schedule of compliance is~~

~~not required by 252:100-8-5(e)(8)(B)(i).~~

~~(2) Burn approvals.~~

~~(3) Plant wide emission plan approval under 252:100-37-25(b) or 252:100-39-46(j).~~

~~(4) Administrative amendments of all air quality permits and other authorizations.~~

~~(5) Alternative emissions reduction authorizations. (Also subject to state implementation plan revision procedures in 252:100-11.)~~

252:2-15-41. Air quality applications - Tier II [REVOKED]

~~(a) Minor facility permit actions. Any minor facility seeking a permit for a modification that when completed would turn it into a Part 70 source is required to apply under subsection (b) of this section.~~

~~(b) Part 70 source permits. The following air quality authorizations for Part 70 sources require Tier II applications.~~

~~(1) New permits.~~

~~(A) New construction permit for a new Part 70 source not classified under Tier III.~~

~~(B) New construction permit for an existing Part 70 source for any change considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.~~

~~(C) New operating permit for a Part 70 source that did not have an underlying construction permit processed under Tier II or III, and 252:100-8-8.~~

~~(D) New operating permit with one or more conditions that differ from the underlying Tier II or III construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).~~

~~(E) New acid rain permit that is independent of a Part 70 permit application.~~

~~(F) New temporary source permit under 252:100-8-6.2.~~

~~(2) Modifications of permits.~~

~~(A) Significant modification, as described in 252:100-8-7.2(b)(2), of an operating permit that is not based on an underlying construction permit processed under Tier II or III, and 252:100-8-8.~~

~~(B) Modification of an operating permit when the conditions proposed for modification differ from the underlying construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).~~

~~(C) A construction permit modification considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.~~

~~(3) Renewals. Renewals of operating permits.~~

~~(c) Other authorizations. The following air quality authorizations require Tier II applications.~~

~~(1) New, modified and renewed general operating permits.~~

~~(2) Individual authorizations under any general operating permit for which a schedule of compliance is required by 252:100-8-5(e)(8)(B)(i).~~

252:2-15-42. Air quality applications - Tier III [REVOKED]

~~(a) New major stationary sources. A construction permit for any~~

~~new major stationary source listed in this subsection requires a Tier III application. For purposes of this section, "Major stationary source" means:~~

~~(1) Any of the following sources of air pollutants which emits, or has the potential to emit, 100 tons per year or more of any pollutant subject to regulation:~~

~~(A) carbon black plants (furnace process),~~

~~(B) charcoal production plants,~~

~~(C) chemical process plants,~~

~~(D) coal cleaning plants (with thermal dryers),~~

~~(E) coke oven batteries,~~

~~(F) fossil fuel boilers (or combustion thereof), totaling more than 250 million BTU per hour heat input,~~

~~(G) fossil fuel fired steam electric plants of more than 250 million BTU per hour heat input,~~

~~(H) fuel conversion plants,~~

~~(I) glass fiber processing plants,~~

~~(J) hydrofluoric, sulfuric or nitric acid plants,~~

~~(K) iron and steel mill plants,~~

~~(L) kraft pulp mills,~~

~~(M) lime plants,~~

~~(N) incinerators, except where used exclusively as air pollution control devices,~~

~~(O) petroleum refineries,~~

~~(P) petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels,~~

~~(Q) phosphate rock processing plant,~~

~~(R) portland cement plants,~~

~~(S) primary aluminum ore reduction plants,~~

~~(T) primary copper smelters,~~

~~(U) primary lead smelters,~~

~~(V) primary zinc smelters,~~

~~(W) secondary metal production plants,~~

~~(X) sintering plants,~~

~~(Y) sulfur recovery plants, or~~

~~(Z) taconite ore processing plants, and~~

~~(2) Any other source not specified in paragraph (1) of this definition which emits, or has the potential to emit, 250 tons per year or more of any pollutant subject to regulation.~~

~~(b) Existing incinerators. An application for any change in emissions or potential to emit, or any change in any permit condition, that would have caused an incinerator to be defined as a major stationary source when originally permitted shall require a Tier III application.~~

~~(c) Potential to emit. For purposes of this section, "potential to emit" means emissions resulting from the application of all enforceable permit limitations as defined in OAC 252.100-1-3.~~

252:2-15-43. Hazardous waste management applications - Tier I [REVOKED]

~~The following hazardous waste management authorizations require Tier I applications.~~

~~(1) Class 1 modification of any hazardous waste permit requiring prior Department approval as specified in 40 CFR § 270.42.~~

- ~~(2) Modification to a recycling permit in accordance with 27A O.S. Supp. 1994, § 2-7-118(A).~~
- ~~(3) Class 2 permit modification as defined in 40 CFR § 270.42.~~
- ~~(4) Emergency hazardous waste disposal plan approval.~~
- ~~(5) Hazardous waste generator disposal plan approval.~~
- ~~(6) Technical plan approval.~~
- ~~(7) Hazardous waste transporter license.~~
- ~~(8) Hazardous waste transfer station plan modification which is not related to capacity.~~
- ~~(9) Emergency permit issued in accordance with 40 CFR § 270.61.~~
- ~~(10) Interim status closure plan approval in accordance with 40 CFR § 265.113(d)(4).~~
- ~~(11) Minor administrative modification of all permits and other authorizations.~~
- ~~(12) Renewal of disposal plan approval and transporter license.~~
- ~~(13) New, modified or renewed authorization under a general permit.~~
- ~~(14) Approval of temporary authorizations in accordance with 40 CFR § 270.42.~~

**252:2-15-44. Hazardous waste management applications - Tier II
[REVOKED]**

The following hazardous waste management authorizations require Tier II applications.

- ~~(1) On site hazardous waste treatment, storage or disposal permit.~~
- ~~(2) Mobile recycling permit.~~
- ~~(3) Research & Development permit.~~
- ~~(4) Class 3 modification of any hazardous waste permit as specified in 40 CFR § 270.42.~~
- ~~(5) Modification of an on site hazardous waste facility permit for a fifty percent (50%) or greater increase in permitted capacity for storage, treatment, and/or disposal, including incineration.~~
- ~~(6) Modification of an on site hazardous waste facility permit for an expansion of permitted boundaries.~~
- ~~(7) Modification of on site hazardous waste facility permit in which the application is for new treatment, storage, or disposal methods or units which are significantly different from those permitted.~~
- ~~(8) Renewal of a hazardous waste treatment, storage or disposal permit.~~
- ~~(9) Hazardous waste transfer station plan approval.~~
- ~~(10) Hazardous waste transfer station plan modification involving increase in approved capacity.~~
- ~~(11) Variance which is not part of a permit application.~~
- ~~(12) Variance which is part of a Tier II permit application.~~

**252:2-15-45. Hazardous waste management applications - Tier III
[REVOKED]**

The following hazardous waste management authorizations require Tier III applications.

- ~~(1) Off site hazardous waste treatment, storage, disposal, incineration and/or recycling permit.~~
- ~~(2) Modification of an off site hazardous waste facility permit~~

~~for a fifty percent (50%) or greater increase in permitted capacity for storage, treatment, and/or disposal, including incineration.~~

~~(3) Modification of an off site hazardous waste facility permit for an expansion of permitted boundaries.~~

~~(4) Modification of off site hazardous waste facility permit in which the application is for new treatment, storage, or disposal methods or units which are significantly different from those permitted.~~

~~(5) Variance which is part of a Tier III application.~~

**252:2-15-46. Laboratory certification applications - Tier I
[REVOKED]**

~~A Tier I application shall be required for a new, modified, amended or renewed laboratory certification.~~

**252:2-15-47. Laboratory certification applications - Tier II
[REVOKED]**

~~None.~~

**252:2-15-48. Laboratory certification applications - Tier III
[REVOKED]**

~~None.~~

**252:2-15-50. Operator certification applications - Tier II
[REVOKED]**

~~None.~~

**252:2-15-51. Operator certification applications - Tier III
[REVOKED]**

~~None.~~

252:2-15-52. Radiation management applications - Tier I [REVOKED]

~~The following radiation management authorizations require Tier I applications:~~

~~(1) New, amended and renewed operating permits for radiation machines;~~

~~(2) New, amended and renewed permits for x ray fluorescence spectroscopy instruments used to detect lead in paint;~~

~~(3) New and renewed specific licenses under the state agreement program not classified under Tiers II or III;~~

~~(4) Industrial radiography certifications;~~

~~(5) Approvals of license termination plans that require no decommissioning or remediation;~~

~~(6) Decommissioning and remediation plans required for remediation due to the use, storage or disposal of one or more radioactive materials with a half life of 120 days or less;~~

~~(7) DEQ approvals of documentation showing residual radioactivity levels for a site or property are within acceptable limits as set by Chapter 410;~~

~~(8) Minor amendments of all authorizations classified under Tiers I, II or III; and~~

~~(9) Major amendments of all authorizations classified under Tier I.~~

252:2-15-53. Radiation management applications - Tier II
[REVOKED]

~~The following radiation management authorizations require Tier II applications:~~

- ~~(1) Decommissioning and remediation plans required for on-site remediation due to the use, storage or disposal of one or more radioactive materials with a half life of more than 120 days, except for those facilities described in 252:2-15-54(3)(A);~~
- ~~(2) New or renewed permits for the non-commercial treatment or disposal of radioactive waste, generated by the applicant, by incineration or the amendment of the incinerator permit for a capacity increase or for any expansion beyond permitted boundaries for the purpose of expanding operations or storage; and~~
- ~~(3) Major amendments of all authorizations classified under Tier II.~~

252:2-15-54. Radiation management applications - Tier III
[REVOKED]

~~The following radiation management authorizations require Tier III applications:~~

- ~~(1) New or renewed permits for the land disposal of low level radioactive waste received from others and the major amendment thereof;~~
- ~~(2) New or renewed permits for the commercial treatment or disposal of radioactive waste by incineration and the major amendment thereof; and~~
- ~~(3) Decommissioning and remediation plans and the major amendment thereof:
 - ~~(A) for nuclear fuel cycle facilities or facilities and sites involved in the manufacturing or processing of licensed quantities of radioactive materials; and~~
 - ~~(B) for sites that require both on and off site remediation due to the use, storage or disposal of one or more radioactive materials with a half life of more than 120 days.~~~~

252:2-15-55. Solid waste management applications - Tier I
[REVOKED]

~~The following solid waste management authorizations require Tier I applications:~~

- ~~(1) New permits.
 - ~~(A) Locally approved solid waste transfer stations. Permit for a solid waste transfer station that, prior to application filing, received county commissioner approval according to 27A O.S. Supp. 1995, § 2-10-307.~~
 - ~~(B) Biomedical waste transfer stations using only sealed containers. Biomedical waste transfer station permit when activities are limited to:
 - ~~(i) consolidation of sealed containers; and/or~~
 - ~~(ii) transfer of sealed containers from one vehicle or mode of transportation to another.~~~~
 - ~~(C) Disaster relief. Emergency authorization for waste disposal resulting from a natural disaster.~~~~
- ~~(2) Modifications.
 - ~~(A) All facilities.~~~~

- ~~(i) Modification of a solid waste permit to add methods, units or appurtenances for liquid bulking processes, yard waste composting, recycling operations, waste screening, or baling, chipping, shredding or grinding equipment or operations.~~
- ~~(ii) Modification to any solid waste permit to make minor changes.~~
- ~~(iii) Modification of plans for closure and/or post-closure.~~
- ~~(iv) Administrative modification of all permits and other authorizations.~~

~~(B) On site and off site land disposal facilities.~~ Modification of an existing land disposal permit for a lateral expansion within permitted boundaries.

~~(C) Capacity increases of less than 25% with exceptions.~~ The modification of a solid waste permit, excluding incineration permits, involving a request for less than twenty five percent (25%) increase in permitted capacity for storage, processing or disposal when the request is for equivalent methods, units or appurtenances as those permitted and which does not involve expansions of permitted boundaries.

~~(3) Plans and other authorizations.~~ The approval of new and when applicable, modified or renewed:

~~(A) Plans for composting of yard waste only.~~

~~(B) Permit transfers.~~

~~(C) Non hazardous industrial solid waste disposal plans.~~

~~(D) Technical plans.~~

~~(E) County solid waste management plans.~~

~~(F) Individual authorizations under a general permit.~~

~~(G) All other administrative approvals required by OAC 252:510 or OAC 252:520.~~

252:2-15-56. Solid waste management applications - Tier II
[REVOKED]

The following solid waste management authorizations require Tier II applications.

~~(1) New permits.~~

~~(A) On site solid waste processing facilities with exception.~~ Permit for an on site solid waste processing facility except yard waste composting as listed under Tier I, Rule 252:2 15-55.

~~(B) Solid waste transfer stations with exceptions.~~ Permit for a solid waste transfer station except:

~~(i) a transfer station permit with county commissioner approval as listed under Tier I, Rule 252:2 15-55, or~~

~~(ii) a biomedical waste transfer station permit listed under Tier I, Rule 252:2 15-55.~~

~~(C) On site incinerators with exceptions.~~ Permit for an on site incinerator except those exempt under OAC 252:520 or those that have an approved Air Quality permit or Solid Waste Management Plan.

~~(D) On site land disposal sites.~~ Permit for an on site solid waste disposal site.

~~(E) Material Recovery Facility (MRF).~~ Permit for a Material Recovery Facility if waste is not source separated.

~~(2) Modifications.~~

~~(A) All facilities. Modification of a permit for a change in waste type.~~

~~(B) On site facilities. Any modification of an on site solid waste permit, except as listed under Tier I, Rule 252:2 15 55.~~

~~(C) Off site facilities.~~

~~(i) Modification of any off site solid waste permit involving a request for more than twenty five percent (25%) but less than fifty percent (50%) increase in permitted capacity for storage, processing or disposal (excluding incineration) when the request is for equivalent methods, units or appurtenances as those permitted, except those listed under Tier I, Rule 252:2 15 55.~~

~~(ii) Modification of any off site processing facility involving an expansion of permitted boundaries.~~

~~(D) Incinerators.~~

~~(i) Modification of an on site incinerator permit for any increase in permitted capacity for storage, processing, or disposal.~~

~~(ii) Modification of an off site incinerator permit involving a request for increases less than fifty percent (50%) in permitted capacity for storage, processing, or disposal when the request is for equivalent methods, units or appurtenances as those permitted.~~

~~(3) General permit. New, modified or renewed general permit.~~

252:2-15-57. Solid waste management applications - Tier III
[REVOKED]

The following solid waste management authorizations require Tier III applications.

~~(1) New permits.~~

~~(A) Off site processing facilities with exceptions. Permit for an off site processing facility, unless otherwise specified in Tier I, Rule 252:2 15 55, or Tier II, Rule 252:2 15 56.~~

~~(B) Off site land disposal facility. Permit for an off site solid waste land disposal site.~~

~~(C) Off site incinerator. Permit for an off site incinerator.~~

~~(2) Modifications.~~

~~(A) Off site facilities: significant increase in capacity. Modification of any off site solid waste permit involving a fifty percent (50%) or greater increase in permitted capacity for storage, processing, and/or disposal, including incineration.~~

~~(B) Off site land disposal facility. Modification of an off site solid waste land disposal permit for an expansion of permitted boundaries.~~

~~(C) Off site facilities: different methods, units or appurtenances. Modification of an off site solid waste permit in which the request involves different methods, units or appurtenances than those permitted, except those listed under Tier I, Rule 252:2 15 55.~~

~~(3) Variance approvals. All variances.~~

252:2-15-58. UIC applications-Tier I [REVOKED]

~~The following underground injection control authorizations require Tier I applications.~~

- ~~(1) Minor modification of a permit for Class I, III, and V wells in accordance with 40 CFR § 144.41.~~
- ~~(2) Modification of an approved closure and/or post closure plan for a Class I hazardous waste injection well.~~
- ~~(3) Modification of an approved plugging and abandonment plan for Class I nonhazardous and Class III injection wells.~~
- ~~(4) Modification of an approved corrective action plan for a Class I injection well.~~
- ~~(5) Emergency permit in accordance with 40 CFR § 144.34.~~
- ~~(6) New, modified or renewed authorization under a general permit.~~
- ~~(7) Minor administrative modification of all permits and other authorizations.~~

252:2-15-59. UIC applications - Tier II [REVOKED]

~~The following underground injection control authorizations require Tier II applications.~~

- ~~(1) On site Class I nonhazardous waste injection well permit.~~
- ~~(2) Class III and V injection well permits except Class V permits issued under Tier III.~~
- ~~(3) Modification and/or renewal of all DEQ issued underground injection control well permits.~~

252:2-15-60. UIC applications - Tier III [REVOKED]

~~The following underground injection control authorizations require Tier III applications.~~

- ~~(1) Class I hazardous waste injection well permit.~~
- ~~(2) Off site Class I nonhazardous waste injection well permit.~~
- ~~(3) Class V industrial waste injection well permit.~~

252:2-15-61. Water quality applications - Tier I [REVOKED]

~~The following water quality authorizations require Tier I applications.~~

- ~~(1) Permit for flow through impoundment(s) as part of the pretreatment process.~~
- ~~(2) Re permitting of facility with an expiring permit for industrial non discharging impoundment or septic tank system.~~
- ~~(3) Re permitting of expiring permit with minor or no change(s) for land application of sludge and/or wastewater for same site.~~
- ~~(4) New, modified or renewed authorization under a general permit, including but not limited to general permits for stormwater, underground storage tanks and petroleum storage and treatment facilities.~~
- ~~(5) Approval of new pretreatment program.~~
- ~~(6) Closure plan approval.~~
- ~~(7) Dredge and fill certification.~~
- ~~(8) Approval of exemption for water line extensions.~~
- ~~(9) Approval of exemption for water distribution and wastewater collection systems.~~
- ~~(10) Approval for individual residential sewage disposal system.~~
- ~~(11) Approval of small public sewage system.~~

- ~~(A) with less than 5,000 gallons per day which do not discharge, land apply wastewater or sludge, or have lift stations designed to handle a peak capacity greater than 10 gallons per minute; or~~
- ~~(B) which serves less than ten (10) residential units.~~
- ~~(12) Residential development approval.~~
- ~~(13) Transfer of discharge permit.~~
- ~~(14) Minor modification of discharge permit.~~
- ~~(15) Minor modification of permit for land application of sludge and/or wastewater.~~
- ~~(16) Modification of or addition to a municipal wastewater treatment system (including sewer line extensions).~~
- ~~(17) Modification of or addition to a public water supply treatment and/or distribution system.~~
- ~~(18) Modification of non discharging impoundment and/or septic tank system permit.~~
- ~~(19) Modification of an approved pretreatment program.~~
- ~~(20) Administrative amendment of permits or other authorizations for the correction of administrative or typographical errors.~~

252:2-15-62. Water quality applications - Tier II [REVOKED]

~~The following water quality authorizations require Tier II applications.~~

- ~~(1) Permit for municipal wastewater treatment system.~~
- ~~(2) Permit for public water supply system.~~
- ~~(3) Discharge permit for minor facility.~~
- ~~(4) Individual storm water permit.~~
- ~~(5) Permit for industrial non discharging impoundment or septic tank.~~
- ~~(6) Permit for land application of sludge and/or wastewater at new site system.~~
- ~~(7) Re-permitting of a facility with expiring discharge permit.~~
- ~~(8) Re-permitting of facility with expiring individual storm water discharge permit.~~
- ~~(9) Re-permitting with major change(s) from expiring permit for land application of sludge and/or wastewater for the same site.~~
- ~~(10) Variance including thermal components of effluent limitations for an individual discharge permit.~~
- ~~(11) Major modification of discharge permit.~~
- ~~(12) Major modification of permit for land application of sludge and/or wastewater.~~
- ~~(13) New, modified or renewed general permit.~~

252:2-15-63. Water quality applications - Tier III [REVOKED]

~~A new discharge permit for a major facility requires a Tier III application.~~

252:2-15-64. Brownfields applications - Tier I [REVOKED]

~~A Tier I application shall be required for a Memorandum of Agreement for site characterization.~~

252:2-15-65. Brownfields applications - Tier II [REVOKED]

~~A Tier II application shall be required for all Certificates.~~

252:2-15-66. Brownfields applications - Tier III [REVOKED]

~~None.~~

PART 7. REVIEW PROCEDURES AND PERMITTING TIME LINES [REVOKED]

252:2-15-70. Common review procedures and time lines [REVOKED]

~~(a) Receipt of applications. Unless otherwise provided in this Subchapter, upon the receipt of an application for filing and the proper fee, each Program shall:~~

- ~~(1) File, stamp the application with the date of receipt, the Division and/or Program name and an identification number;~~
- ~~(2) Assign the application to a named person who will do the review; and~~
- ~~(3) Timely log this information.~~

~~(b) Administrative completeness review. Unless otherwise provided in the Code or this Subchapter, the reviewer shall have 60 calendar days from the logged date of filing in which to determine whether the application is administratively complete.~~

~~(1) Not complete.~~

~~(A) Upon determining that the application is not complete, the reviewer shall immediately notify the applicant by mail, describing with reasonable specificity the inadequacies and measures necessary to complete the application.~~

~~(B) This notice shall not require or preclude further review of the application and further requests for specific information.~~

~~(C) If the reviewer does not notify the applicant of inadequacies, the period for technical review shall begin at the close of the administrative completeness review period.~~

~~(2) Complete. When the application is administratively complete, the reviewer shall log the date and immediately notify the applicant by mail. The period for technical review begins.~~

~~(c) Technical review. Each Program involved shall have a certain time period to review each application for technical compliance with the relevant regulations and reach a final determination.~~

~~(d) When times are tolled. The time period for review is tolled (the clock stops) during litigation, during periods of public review and participation [includes public meetings and administrative permit hearings (and waiting periods), public comment periods, time required for DEQ preparation of responses to public comments received, and review by other federal or State agencies], or when the Program has asked for supplemental information and advised the applicant that the time period is tolled pending receipt, or during the time in which an applicant amends his application of his own accord.~~

~~(e) Supplemental time. To compensate for time spent in reviewing inadequate materials, the DEQ's notice of deficiencies and request for supplemental information may specify that up to 30 additional calendar days may be added to the application processing time. Requests for supplemental information and data may also specify that additional days for technical review equal to the number of days the applicant used to prepare and submit such supplement may be added to the application review time.~~

~~(f) Failure to respond. Except for good cause shown, failure by an applicant to supplement an application within 180 days after the~~

mailing date of a notice of deficiencies, or by a date agreed to by the DEQ and the applicant, shall void the application and forfeit the fees. The DEQ shall notify the applicant of an opportunity to show cause why this should not occur. Failure to show cause shall result in an order appealable according to 75 O.S. § 318.

~~(g) Extensions.~~ Extensions to the time lines of this Subchapter may be made as provided by law.

252:2-15-71. Pending failures [REVOKED]

~~(a) Circumstances outside agency control.~~ Technical review times shall be tolled for specified times when, prior to the deadline, the Executive Director certifies that a failure to meet a deadline is imminent and is caused by circumstances outside the control of the DEQ. Such circumstances include, but are not limited to, acts of God, a substantial and unexpected increase in the number of applications filed, and additional review duties imposed on the DEQ from an outside source.

~~(b) Other circumstances.~~ Where circumstances that are not clearly outside the control of the DEQ may cause a failure to meet a deadline, then:

~~(1) At least thirty (30) calendar days prior to the deadline the DEQ shall reassign staff and/or retain outside consultants to meet such deadline.~~

~~(2) The applicant may agree to an extension of time for a specific purpose and period of time with refund of the entire application fee, unless a refund is prohibited by law.~~

252:2-15-72. Air quality permit time lines [REVOKED]

The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

~~(1) Construction permits:~~

~~(A) PSD and Part 70 Sources 365 days.~~

~~(B) Minor Facilities 180 days.~~

~~(2) Operating permits:~~

~~(A) Part 70 Sources 540 days.~~

~~(B) Minor Facilities 365 days.~~

~~(3) Relocation permits 30 days.~~

252:2-15-73. Hazardous waste permit time lines [REVOKED]

The following hazardous waste permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

~~(1) Hazardous waste permits:~~

~~(A) New RCRA permit or the renewal thereof 300 days.~~

~~(B) New State Recycling permit 300 days.~~

~~(C) Class 3 permit modifications 300 days.~~

~~(2) Closure plans, post closure plans and transfer station plans and plan modifications 300 days.~~

252:2-15-74. Solid waste permit time lines [REVOKED]

The technical review period for solid waste permit applications and for each submittal and resubmittal shall be 90 days, subject to OAC 252:2-15-7-70.

252:2-15-75. Water quality permit time lines [REVOKED]

~~Applications for new or modified water quality permits, certifications and authorizations shall be technically reviewed and permits shall be issued or denied within the following time frames:~~

- ~~(1) Discharges — 180 days.~~
- ~~(2) 401 Certifications — 180 days.~~
- ~~(3) Industrial Wastewater other than discharge — 180 days.~~
- ~~(4) Pretreatment Trust Users — 180 days.~~
- ~~(5) Public Water Supply — 90 days.~~
- ~~(6) Underground Injection Control — 300 days.~~
- ~~(7) Water Pollution Control Construction — 90 days.~~
- ~~(8) Sludge management plan — 180 days.~~

252:2-15-76. Other permits [REVOKED]

~~Any environmental license or permit that is not described in this Subchapter shall not be subject to these time frames but shall be reviewed with all due and reasonable speed.~~

252:2:15-76.1. Brownfields time lines [REVOKED]

~~The technical review period for Brownfields applications and for each submittal and resubmittal shall be 60 days, subject to 252:2:15-70.~~

252:2-15-77. Pre-issuance permit review and correction [REVOKED]

~~(a) Review. In addition to its own review, the DEQ may, for Tier I and II, and shall, for Tier III, at any time before issuance, ask an applicant to review a permit for calculation and clerical errors or mistakes of fact or law.~~

~~(b) Correction. The DEQ may correct any permit before it is issued.~~

~~(1) Notice of significant corrections. For permits based on Tier II and III applications, an applicant shall publish legal notice in one newspaper local to the site of any correction or change proposed by the DEQ which significantly alters a facility's permitted size, capacity or limits.~~

~~(2) Comments. The DEQ may open a public comment period, and/or reconvene a public meeting and/or administrative hearing to receive public comments on the proposed correction(s).~~

PART 9. CONSOLIDATED PERMITTING [REVOKED]

252:2-15-90. Consolidation of permitting process [REVOKED]

~~(a) Discretionary. Whenever an applicant applies for more than one permit for the same site, the DEQ may authorize, with the consent of the applicant, the review of the applications to be consolidated so that each required draft permit, draft denial and/or proposed permit is prepared at the same time and public participation opportunities are combined.~~

~~(b) Scope. When consolidation is authorized by the DEQ:~~

~~(1) The procedural requirements for the highest specified tier shall apply to each affected application.~~

~~(2) The DEQ may also authorize the consolidation of public comment periods, process and public meetings, and/or administrative permit hearings.~~

~~(3) Final permits may be issued together.~~

~~(c) Renewal. The DEQ may coordinate the expiration dates of new permits issued to an applicant for the same facility or activity so that all the permits are of the same duration.~~

~~(d) Multiple modifications. Subsections (a) and (b) of this section shall also apply to multiple Tier II and III applications for permit modifications.~~

SUBCHAPTER 17. COMPLAINT PROCESSING [REVOKED]

252:2-17-1. Purpose [REVOKED]

~~The rules in this Subchapter identify the procedures to process pollution complaints.~~

252:2-17-2. Definitions [REVOKED]

~~The following words or terms, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise:~~

~~"Complaint" means any written or oral information submitted to ECLS alleging site specific environmental pollution. Information must be submitted by persons expecting a response, and does not include referrals from federal agencies, information gained from facility inspections or DEQ employees, or self reported incidents.~~

~~"ECLS" means the Environmental Complaints and Local Services Division of the DEQ.~~

~~"Enforcement Action" means:~~

~~(A) any administrative compliance or penalty order;~~

~~(B) any administrative petition to revoke or suspend a permit or license;~~

~~(C) a consent order or proposed consent order in lieu of any enforcement action defined in subparagraph (A) or (B), of this definition; or~~

~~(D) A civil petition, or a criminal information or complaint in municipal or district court.~~

~~"Mediation" means a voluntary negotiating process in which parties to a dispute agree to use a mediator to assist them in jointly exploring and settling their differences, with a goal of resolving their differences by a formal agreement created by the parties.~~

~~"Resolution" means the determination by the DEQ, based on analysis and investigation of a complaint, that there has not been a violation of Oklahoma environmental statutes or rules as alleged by a complaint, that the violation has been corrected, or that an Enforcement Action has been filed and the 14 day complainant comment period has been considered.~~

~~"Response" means the initiation of appropriate action, including but not limited to investigation or referral of a complaint, and informing complainants regarding potential actions that may occur based on a complaint.~~

252:2-17-3. Receipt of complaints [REVOKED]

~~(a) Toll free hot line. The DEQ shall provide a toll free hot line to receive environmental complaints.~~

~~(b) General mail or other DEQ phone numbers. Complaints may be received by mail or by any of the DEQ's phone numbers during regular office hours.~~

~~(c) DEQ offices. Complaints may be made in person at any of the DEQ's offices during regular office hours.~~

252:2-17-4. Investigation of complaints [REVOKED]

~~After receipt of a complaint, ECLS may assign an investigator to the complaint. The investigator or other DEQ personnel may obtain any information which may tend to prove there has or has not been a violation of Oklahoma environmental statutes or rules, who the potentially responsible persons are, and any other information which may be needed to resolve the complaint.~~

252:2-17-5. Notification [REVOKED]

~~(a) Potential actions. Within two (2) working days of receipt of a complaint, the ECLS shall notify the complainant of the potential actions which may occur to resolve the complaint.~~

~~(b) Written notification.~~

~~(1) Within seven (7) working days of the receipt of a complaint, the ECLS shall notify the complainant, in writing, of the determination of the course of action to be taken by the DEQ.~~

~~(2) Within seven (7) working days of the resolution of the complaint, the ECLS shall notify the complainant of the resolution. If complainants notify the DEQ they are dissatisfied with the resolution reached by the DEQ, complainants shall be notified in writing of their options, including but not limited to referral on written request to an outside source trained in mediation.~~

~~(c) Enforcement. If as a result of a complaint the DEQ undertakes an Enforcement Action, the ECLS shall notify by mail the person whose complaint caused the Enforcement Action to be initiated of an opportunity to provide, within fourteen (14) calendar days after the date of the mailing of the notice, written information pertinent to the complaint.~~

252:2-17-6. Referral of complaints [REVOKED]

~~(a) To appropriate agency. If the DEQ receives a complaint which clearly falls within the jurisdiction of another state environmental agency, the complaint shall be referred to the appropriate agency within one working day of the date of determination of jurisdiction. Complaints referred to other agencies shall require no further action by the DEQ and will not be referred by the DEQ to mediation.~~

~~(b) To mediation. Complainants who are not satisfied with the DEQ's resolution of their complaint may ask the ECLS in writing to refer their complaints to an outside source trained in mediation. Participation in the mediation process shall not hinder or interfere with any enforcement action taken by the DEQ. The ECLS shall maintain a roster of certified mediators which shall be available to the public. Complainants and persons named in the complaint shall be advised that participation in the mediation process conducted by the outside source is completely voluntary and confidential and that fulfillment of any agreements reached in mediation shall be the responsibility of the parties of the dispute. The DEQ shall not be responsible for any mediation costs.~~

SUBCHAPTER 19. ENVIRONMENTAL EDUCATION GRANTS [REVOKED]

252:2-19-1. Authority and eligibility [REVOKED]

~~(a) Authority. This subchapter is adopted pursuant to 75 O.S. § 302, 27A O.S. § 2-101 and Executive Order 98-37.~~

~~(b) Eligibility. Oklahoma teachers and youth group leaders are eligible to apply for environmental education grants provided by the DEQ.~~

252:2-19-2. Amount of grants [REVOKED]

~~The DEQ will award the following amounts to successful applicants:~~

- ~~(1) Up to and including \$ 200.00 for field trips;~~
- ~~(2) Up to and including \$ 500.00 for activities; and~~
- ~~(3) Up to and including \$1000.00 for outdoor classroom/youth group projects.~~

252:2-19-3. Criteria [REVOKED]

~~The following will be considered by the DEQ in determining grant awards:~~

- ~~(1) Project proposed, including how the project accomplishes the following factors:
 - ~~(A) Promotes enthusiasm to learn more about the environment;~~
 - ~~(B) Fits in the school curriculum or youth group program;~~
 - ~~(C) Involves community partnerships and/or outreach, if applicable.~~~~
- ~~(2) Number of students/youth participating;~~
- ~~(3) Grade level of students/youth; and~~
- ~~(4) Geographic location.~~

252:2-19-4. Application [REVOKED]

~~(a) Complete application. A complete application consists of a cover page, a letter of commitment, a summary of the project, a projected timeline, a proposed budget and a procedure for evaluation of the project.~~

~~(b) Attachments. Photographs, clippings, diagrams and other graphic materials, not to exceed five (5) pages double sided, may be attached to the application.~~

~~(c) Document submission. An original and two (2) copies, double sided, of the application and attachments must be submitted to the DEQ, date stamped or postmarked on or before the published deadline. The DEQ will not accept applications submitted by telecopy/facsimile.~~

252:2-19-5. Cover page [REVOKED]

~~The cover page must include the following information:~~

- ~~(1) Title of the project;~~
- ~~(2) Name of contact person, position held and relationship to project;~~
- ~~(3) Name of school or youth group organization;~~
- ~~(4) Grade level(s) and number of youth targeted;~~
- ~~(5) Federal Employer Identification number (tax ID#);~~
- ~~(6) Street address;~~
- ~~(7) Mailing address, if different from street address;~~
- ~~(8) E mail address, if any;~~

- ~~(9) Daytime and evening telephone numbers; and~~
- ~~(10) Telecopy/facsimile number, if any.~~

252:2-19-6. Letter of commitment [REVOKED]

~~The grant application must be accompanied by a letter from the applicant's principal or supervisor stating the organization's support for the performance of the grant objectives.~~

252:2-19-7. Summary of project [REVOKED]

~~The applicant must submit a project summary, with a maximum length of one page, double sided. The project summary shall include the following:~~

- ~~(1) Synopsis. Provide one paragraph summarizing the project;~~
- ~~(2) Description. Give a clear concise description of the proposed project, indicating how the project promotes enthusiasm to learn more about the environment, fits in the school curriculum or youth group program and involves community partnerships and/or outreach, if applicable;~~
- ~~(3) Goals and objectives. Clearly define realistic goals and objectives. Include information outlining where these goals address specific needs.~~
- ~~(4) Implementation. Describe how the project will be implemented and whether it emphasizes a hands on learning approach. Include the project's potential for broad implementation.~~

252:2-19-8. Timeline [REVOKED]

~~The applicant must present target dates for project objectives.~~

252:2-19-9. Budget [REVOKED]

~~The applicant must provide an itemized budget with specific project expenditures of grant funds.~~

252:2-19-10. Evaluation procedure [REVOKED]

~~The applicant must provide a description of the methods to be used to measure project effectiveness, including how the evaluation method will improve the project's strength. The applicant must indicate in the evaluation method how the project will be continued after grant funds are expended.~~

252:2-19-11. Final written report [REVOKED]

~~Applicants who are awarded environmental education grants under this subchapter shall submit a final written report, outlining accomplishments of the grant objectives and expenditures on or before December 15 following the award.~~

252:2-19-12. Shared strategies [REVOKED]

~~Strategies from applicants who are awarded environmental education grants under this subchapter will become the property of the Environmental Quality Education Committee and may be shared with other interested environmental educators.~~

SUBCHAPTER 21. LOCAL PROJECT FUNDING [REVOKED]

252:2-21-1. Purpose, authority and applicability [REVOKED]

~~(a) Purpose. The purpose of this Subchapter is to implement Executive Order 98 37, mandating state agencies to establish criteria for local project funding contracts.~~

~~(b) Authority. This subchapter is adopted pursuant to 75 O.S. §302, 27A O.S. §2-2-101 and Executive Order 98 37.~~

~~(c) Applicability. The rules in this Subchapter apply to any private entity, political subdivision, and unit of local government, including municipal and county governments and school districts.~~

252:2-21-2. Criteria [REVOKED]

~~(a) The DEQ will consider the following criteria in determining funding priorities for local projects:~~

- ~~(1) Criteria established by relevant statutory authority, and~~
- ~~(2) Criteria established by rules adopted for the specific DEQ program area pursuant to relevant statutory authority.~~

~~(b) If relevant statutory authority and program specific rules do not establish criteria, the DEQ will consider the following in determining funding priorities for local projects:~~

- ~~(1) Potential of the project to effectively promote environmental health and safety or environmental education and awareness;~~
- ~~(2) Potential to enhance related programs or efforts by the recipient;~~
- ~~(3) Number of persons benefitted, and~~
- ~~(4) Equitable geographic distribution.~~

252:2-21-3. Proposals [REVOKED]

~~(a) The applicant must submit a proposal in accordance with the rules implementing the statutory program and/or forms provided by the DEQ.~~

~~(b) Proposals must demonstrate that the proposed project will implement and be consistent with relevant statutes and rules of the specific program area.~~

252:2-21-4. Funding [REVOKED]

~~Within the priority criteria, funds shall be granted on a first-come first-served basis until funds are depleted.~~

APPENDIX A. PETITION FOR RULEMAKING
BEFORE THE ENVIRONMENTAL QUALITY BOARD [REVOKED]

IN THE MATTER OF) Matter No.
)
RULE OAC 252: _____) Date filed:

Subject area: () Air Quality () Solid Waste
() Hazardous Waste () Water Quality
() Laboratory () Operator Certification
() Radiation () Other

Petition will be referred by the Department to its appropriate program and to any appropriate Council.

1. Nature of request:
() Adoption of new rule(s)
() Amendment of existing rule(s)
() Repeal of existing rule(s)
Identified as Rule Number(s): _____
(OAC number if known)
2. Attach a brief statement of the issues raised by the rule(s) which cause such a request to be made, a statement of your personal interest in the ruling, and how the proposed rulemaking would affect those interests and would affect others.
3. If this request has been discussed with the Department of Environmental Quality, please indicate the name of the Division and employee consulted; otherwise, state "n/a."

4. If a Council has considered this matter, please indicate the name of the Council and the date(s) the matter was considered; otherwise, state "n/a."

5. Attachment(s): () suggested language () further explanation

_____ by: _____
Name of Business or group (print name) (title)

or Name of Individual (print): _____

Signature: _____

Address: _____

Phone: _____

APPENDIX C. PERMITTING PROCESS SUMMARY [REVOKED]

Steps	Tier I	Tier II	Tier III
Filing - Applicant files application, pays any required fee, and provides landowner notice. Applicant may meet with the DEQ staff prior to this.	Yes	Yes	Yes
Notice of filing - Applicant publishes notice in one newspaper local to site.	No	Yes	Yes
Process meeting - Notice - 30-day opportunity is published with notice of filing. DEQ holds meeting if requested and sufficient interest is shown.	No	No	Yes
Administrative completeness review - DEQ reviews application and asks applicant to supply any missing information.	Yes	Yes	Yes
Technical review - DEQ reviews application for technical compliance and requests applicant to cure any deficiencies.	Yes	Yes	Yes
Draft permit or draft denial - DEQ prepares this after completing review.	No	Yes	Yes
Notice of draft permit, public comment period and public meeting request opportunity - Applicant publishes this in one newspaper local to site. (DEQ publishes notice of draft denial.)	No	Yes	Yes
Public comment period - 45 days for hazardous waste treatment, storage or disposal draft permits; 30 days for all others.	No	Yes	Yes
Public meeting - Conducted by DEQ if held	No	Yes	Yes
Review of comments - DEQ (written response)	No	Yes	Yes
Proposed permit - DEQ prepares this in response to comments on draft permit	No	No	Yes
Notice of proposed permit - Applicant publishes, in one newspaper local to site, notice of 20-day opportunity to review permit and request administrative hearing.	No	No	Yes
Administrative permit hearing - Conducted by DEQ if held. Results in final order.	No	No	Yes
Issuance or denial - DEQ's final decision	Yes	Yes	Yes

**TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 4. RULES OF PRACTICE AND PROCEDURE**

RULEMAKING ACTION:

PERMANENT final adoption

RULES:

Chapter 4. Rules of Practice and Procedure [NEW]

AUTHORITY:

Environmental Quality Board powers and duties, 27A O.S. § 2-2-101; Administrative Procedures Act, 75 O.S. § 302

DATES:

Comment period:

October 16, 2000, through November 6, 2000

Public hearing:

November 14, 2000 and February 23, 2001

Adoption:

February 23, 2001

Submitted to Governor:

Submitted to House:

Submitted to Senate:

Gubernatorial approval:

Legislative approval:

Final adoption:

Effective:

SUPERSEDED EMERGENCY ACTIONS:

None

INCORPORATED BY REFERENCE:

None

ANALYSIS:

The Administrative Procedures Act requires each agency to adopt rules describing its organization, methods of operation and methods by which people may obtain information from or give information to the agency. These rules must also specify the requirements of all formal and informal procedures available, including a description of forms and instructions. (75 O.S. §302)

This proposed new Chapter 4 is a combination of three chapters of administrative rules relating to the DEQ, which will be revoked when Chapter 4 is adopted, i.e. current Chapter 1 (Procedures of the Environmental Quality Board), current Chapter 2 (Procedures of the DEQ), and current Chapter 3 (Procedures of the Environmental Quality Councils).

Duplicative and redundant rules were eliminated. The rulemaking process rules were rewritten in chronological order. The permitting process rules were substantially rewritten to simplify and clarify them. Three separate subchapters dealing with administrative proceedings were combined into one subchapter that addresses all individual proceedings. Statutory language was deleted.

The proposed Chapter 4 rules address general provisions, Board and council meetings and public forums, rulemaking, the environmental permit process, administrative proceedings, complaint processing, environmental education grants and local project funding.

This chapter also includes rules recommended by the Air Quality Council on June 14, 2000, which address hearings before that

council. Rule numbers were changed to be consistent with the new proposed Chapter 4. See proposed Subchapter 4, Part 5.

SUMMARY OF DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

There are analogous federal rules for permitting. 40 CFR Part 124 contains federal rules entitled "Procedures for Decisionmaking". Subpart A, "General Program Requirements", contains EPA procedures for issuing RCRA, UIC, PSD and NPDES permits. In those programs for which DEQ has received delegation or authorization from EPA, the DEQ is required by federal law to follow some EPA procedures in addition to those required under state law. In those cases, the EPA procedures have been incorporated, by reference by the specific program area either by rule or by program approval. In the current Chapter 2 and the proposed Chapter 4 rules, additional notice requirements are acknowledged for NPDES, RCRA, and UIC permits.

CONTACT PERSON:

Contact Barbara Rauch by e-mail barbara.rauch@deqmail.state.ok.us or by phone (405) 702-7189 or fax (702-7101). The DEQ is located at 707 N. Robinson, Oklahoma City, Oklahoma, 73102. The mailing address is P.O. Box 1677, Oklahoma City, Oklahoma, 73101-1677.

ADDITIONAL INFORMATION:

The adoption of this new chapter was first considered by the Environmental Quality Board at their November 14, 2000 meeting, at which time board members continued it until the February 23, 2001 meeting.

PURSUANT TO THE ACTION DESCRIBED HEREIN, THE FOLLOWING RULES ARE CONSIDERED FINALLY ADOPTED AS SET FORTH IN 75 O.S. § 308.1(A), WITH AN EFFECTIVE DATE OF JUNE 11, 2001.

SUBCHAPTER 1. GENERAL PROVISIONS

252:4-1-1. Purpose and authority

(a) Purpose. This Chapter describes the practices and procedures of the Environmental Quality Board, Advisory Councils, and the Department of Environmental Quality.

(b) Authority. This Chapter is authorized by the Administrative Procedures Act, 75 O.S. § 302, and the Environmental Quality Code, 27A O.S. § 2-2-101.

252:4-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Administratively complete" means an application that contains the information specified in the application form and rules in sufficient detail to allow the DEQ to begin technical review.

"Administrative hearing" is defined at 27A O.S. § 2-1-102 and is synonymous with "individual proceeding" as that term is defined in the Administrative Procedures Act, 75 O.S. § 250.1 et seq.

"Administrative Law Judge" is synonymous with "hearing examiner" as that term is defined in the Administrative Procedures Act.

"Advisory Councils or Council" means any of the following Councils: the Air Quality Advisory Council, the Hazardous Waste Management Advisory Council, the Laboratory Services Advisory Council, the Radiation Management Advisory Council, the Solid Waste Management Advisory Council, the Water Quality Management Advisory Council, and the Waterworks and Wastewater Works Operator Certification Advisory Council.

"APA" means the Oklahoma Administrative Procedures Act, 75 O.S. § 250.1 et seq.

"Application" means "a document or set of documents, filed with the [DEQ], for the purpose of receiving a permit or the modification, amendment or renewal thereof from the [DEQ]... any subsequent additions, revisions or modifications submitted to the [DEQ] which supplement, correct or amend a pending application." [27A O.S. § 2-14-103(1)]

"Board" means the Environmental Quality Board.

"Code" means the Oklahoma Environmental Quality Code, 27A O.S. § 2-1-101 et seq.

"Complaint" means any written or oral information submitted to DEQ alleging site-specific environmental pollution except information gained from facility inspections, or self-reported incidents.

"Department or DEQ" means the Department of Environmental Quality.

"Enforcement action" means:

(A) a written communication from the DEQ to an alleged violator that identifies the alleged violations and directs or orders that the violations be corrected and/or their effect remedied;

(B) an administrative action to revoke or suspend a permit or license;

(C) a consent order or proposed consent order;

(D) a civil petition, a complaint in municipal court, or a

complaint in federal district court;
(E) a referral by the DEQ to the Oklahoma Attorney General's office, a state District Attorney's office, a U.S. Attorney's office, or a state or federal law enforcement agency for investigation.

"Executive Director" means the Executive Director of the Department of Environmental Quality.

"False complaint" means any written or oral information submitted to DEQ alleging site-specific environmental pollution by a person who knowingly and willfully gives false information or misrepresents material information.

"Individual proceeding" is defined in the APA [75 O.S. § 250.3(7)]. It includes an administrative evidentiary hearing to resolve issues of law or fact between parties, resulting in an order.

"Mediation" means a voluntary negotiating process in which parties to a dispute agree to use a mediator to assist them in jointly exploring and settling their differences, with a goal of resolving their differences by a formal agreement created by the parties.

"Notice of deficiencies" means a written notice to an applicant, describing with reasonable specificity the deficiencies in a permit application and requesting supplemental information.

"Off-site", as used in hazardous waste, solid waste and Underground Injection Control (UIC) tier classifications, means a facility which receives waste from various sources for treatment, storage, processing, or disposal.

"On-site", as used in hazardous waste, solid waste and UIC tier classifications, means a facility owned and operated by an industry for the treatment, storage, processing, or disposal of its own waste exclusively.

"Program" means a regulatory section or division of the DEQ.

"Respondent" means a person or legal entity against whom relief is sought.

"Submittal" means a document or group of documents provided as part of an application.

"Supplement" means a response to a request for additional information following completeness and technical reviews, and information submitted voluntarily by the applicant.

"Technical review" means the evaluation of an application for compliance with applicable program rules.

252:4-1-3. Organization

(a) Environmental Quality Board. The Environmental Quality Board consists of thirteen (13) members, appointed by the Governor with the advice and consent of the Senate, selected from the environmental profession, general industry, hazardous waste industry, solid waste industry, water usage, petroleum industries, agriculture industries, conservation districts, local city or town governments, rural water districts, and statewide nonprofit environmental organizations. (See further 27A O.S. § 2-2-101.)

(b) Advisory Councils. There are seven advisory councils, each consisting of nine (9) members appointed by the Speaker of the House of Representatives, the President Pro Tempore of the Senate or the Governor. (See further 27A O.S. § 2-2-201 and 59 O.S. § 1101)

et seq.)

(c) DEQ. The DEQ consists of the following divisions: Administrative Services, Air Quality, Land Protection, Water Quality, Environmental Complaints and Local Services, Customer Services and the State Environmental Laboratory.

252:4-1-4. Office location and hours; communications

(a) Office location and hours. The principal office of the DEQ is 707 N. Robinson, Oklahoma City, Oklahoma 73102. The mailing address is P.O. Box 1677, Oklahoma City, Oklahoma 73101-1677. Office hours are from 8:00 a.m. to 4:30 p.m., Monday through Friday except state holidays.

(b) Communications. Unless a person is working with a particular person or departmental area, written communication to the DEQ shall be addressed to the Executive Director.

(1) Board. Communications to the Board may be made through the Executive Director.

(2) Council. Communications to a Council may be made through the Division Director of the program with which the Council works.

252:4-1-5. Availability of a record

(a) Availability. Records of the Board, Advisory Councils, and DEQ, not otherwise confidential or privileged from disclosure by law, shall be available to the public for inspection and copying at the DEQ's principal office during normal business hours. Information, data or materials required to be submitted to the DEQ in a permit application process shall be made available to the public in accordance with the Oklahoma Uniform Environmental Permitting Act (27A O.S. § 2-14-101 et seq.) and the rules in this Chapter. The DEQ may take reasonable precautions in order to ensure the safety and integrity of records under its care.

(b) Removal. A record may be removed from the DEQ's offices or storage areas only with permission of the record's custodian.

(c) Reproduction.

(1) By DEQ. The DEQ may limit the number of copies made and the time and personnel available for reproduction of records requested by a member of the public.

(2) Commercial reproduction. With advance notice to the DEQ, a person may arrange for the pick-up, reproduction and return of records by a commercial copying service at his/her own expense.

(3) Other. With prior DEQ approval, a person may bring in and use his/her own copy machine.

(d) Confidentiality. Any person asserting a claim of confidentiality for any document submitted to the Board, Council or DEQ must substantiate the claim upon submission. The DEQ will make a determination on the claim and notify the person asserting the claim within a reasonable time. Each program may have more specific requirements, as required by state law or federal rule. [See 27A O.S. § 2-5-105(18) and 40 CFR § 2 Subpart B, particularly § 2.301 (Clean Air Act), § 2.302 (Clean Water Act), § 2.304 (Safe Drinking Water Act), § 2.305 (Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act), and § 2.310 (Comprehensive Environmental Response, Compensation, and Liability Act, as amended by Superfund Amendments and Reauthorization Act)].

(e) Certification. Copies of official records of the Board, Advisory Councils or DEQ may be certified by the Executive Director or his/her designees.

(f) Charge. The DEQ's administrative fee schedule applies to in-house copying or reproduction of records for or by members of the public.

252:4-1-6. Administrative fees

(a) Photocopying. The fee for copying letter or legal sized paper is \$0.25 per page.

(b) Certified copy. The fee for a certified copy of a document is \$1.00 per document.

(c) Search fee. When the request is solely for commercial purpose or clearly would cause excessive disruption of the DEQ's essential functions, the document search fee is as follows:

(1) 0 - 15 minutes, no charge;

(2) 16 - 30 minutes, \$5.00;

(3) every subsequent 30-minute increment or portion thereof, \$5.00.

252:4-1-7. Fee credits for regulatory fees

(a) The Executive Director may authorize Divisions of the DEQ which have programs that collect recurring fees to apply a credit towards certain future invoices for those fees. The credit must be applied only within the program from which the carryover fees are derived. Only the amount that is projected to exceed three months of funding beyond the upcoming budget year for that program can be credited. A summary of any credit applied shall be reported to the Environmental Quality Board. For a credit to be applied:

(1) there must be a projected balance in the fee account carried over from the previous year;

(2) the credit must be distributable pro rata among the fee payers;

(3) the credit must be large enough to justify its administrative cost; and

(4) the Division must be unaware of a longer-range need, such as match for a superfund clean-up project.

(b) The DEQ shall explain on the invoices that a carryover exists and that an identified one-time credit is being applied.

252:4-1-8. Board and Councils

(a) Officers. A chair of the Board shall not serve as chair for more than three (3) consecutive years. Officers of a Council may succeed themselves as officers at the discretion of a Council.

(b) Committees. Ad hoc committees may be appointed to assist the Board or a Council for any lawful purpose.

252:4-1-9. Severability

The provisions of OAC 252 are severable, and if any part or provision hereof shall be held void, the decision of the court so holding shall not affect or impair any of the remaining parts or provisions of OAC 252.

252:4-3-1. Meetings

(a) Board. The Board shall hold quarterly meetings and may hold other meetings as it deems necessary.

(b) Council. Each council shall hold at least one regularly scheduled meeting per calendar year, except the Air Quality Advisory Council which shall hold at least two regularly scheduled meetings.

(c) Location. The Board or a Council may meet at any location convenient and open to the public in this state to encourage public participation in the environmental rulemaking process.

(d) Agenda. The proposed agenda of a meeting may be developed with the advice of members and modified by the Chair. Time permitting, a copy of the proposed agenda shall be sent to each Board or Council member at least ten (10) calendar days before a regularly scheduled meeting. The Board or Council may, by majority vote during a meeting, continue an agenda item to or specify a new agenda item for another meeting or forum.

(e) Public comment. The agenda shall reserve time during the meeting for public comment on agenda action items. The DEQ shall provide sign-in sheets at each meeting for persons who wish to present written or oral comment on an agenda action item. The Chair reserves the right to rearrange the agenda items during the meeting to accommodate public comment. The Chair may set reasonable time limits on oral comment and may accept written submittals on behalf of the Council or the Board.

252:4-3-2. Public forums

(a) Generally. A public forum for receiving public comments and dissemination of information may be held in conjunction with a Council or Board meeting but shall be a separate meeting.

(b) Location. Each forum may be held at a different location in the state.

(c) Format. The forum shall be conducted by the Chair or the Chair's designee.

(d) Public comment. The DEQ shall provide sign-in sheets at each meeting for persons who wish to present written or oral comments. The Chair may set reasonable time limits on oral comment and may accept written submittals on behalf of the Council or the Board.

SUBCHAPTER 5. RULEMAKING

252:4-5-1. Adoption and revocation

The Board has the authority to adopt new or amended emergency or permanent rules and revoke existing rules within its jurisdiction.

252:4-5-2. Rule development

(a) DEQ. The DEQ may begin the development of rules at the request of or on behalf of the Board or a Council or upon petition by an interested person. The DEQ may appoint committees to assist in the development of rules.

(b) Public. Any person may informally discuss proposed rules with the DEQ or may suggest proposed rules during a council meeting. Also, any person may file a petition with the DEQ formally requesting the adoption, amendment, or revocation of one or more

rules.

252:4-5-3. Petitions for Rulemaking

(a) Form and content of petition. Rulemaking petitions shall be in writing and filed with the DEQ. The petition shall include the information and follow the format in Appendix A of this Chapter. The DEQ shall provide a copy of the filed petition to the Board.

(b) Referral. The DEQ shall refer a filed petition to the appropriate Council or, if none, to the appropriate DEQ program for review. A petition referred to a Council shall be set on the agenda of the next available Council meeting for action.

(c) Status. The DEQ shall advise the Board of the status of rulemaking petitions.

252:4-5-4. Notice of permanent rulemaking

The DEQ shall submit notices of proposed permanent rulemaking to the Office of Administrative Rules for publication in accordance with the APA and the Administrative Rules on Rulemaking (OAC 655:10).

252:4-5-5. Rulemaking hearings

(a) Hearing. Hearings before a Council or the Board shall be conducted by the Chair or the Chair's designee.

(b) Public comments. The public may make comments orally at the hearing or submit comments in writing by the end of the specified public comment period, or both. Persons wishing to comment orally may be required to fill out a written request form. The person conducting the hearing may set reasonable time limits on oral presentations, may exclude repetitive or irrelevant comments and may require that oral presentations be submitted in writing.

(c) Public comment period. The comment period shall end at the conclusion of the hearing if the agenda indicates that the Council intends to make a final recommendation on the rules or that the Board intends to take a final action on the rules. Otherwise, the comment period may be extended by the person conducting such hearing for no more than thirty (30) calendar days after the hearing or until the close of the hearing, if continued.

(d) Summary of comments. The DEQ shall maintain a summary of comments received on proposed rules during written comment periods. The summary shall be provided to the Council or Board prior to taking final action on the rule.

(e) Hearing continuation. A Council or the Board may continue the hearing by majority vote. Notice of the continuation shall be announced at the hearing and shall not require publication.

252:4-5-6. Council actions

(a) Contents of recommendation. On behalf of a Council, the DEQ shall prepare a recommendation submittal on proposed permanent rules, which shall include the text of the proposed rules, a summary of pertinent minutes of Council meetings, and a summary of comments received. Recommendations may also be made for rules with a finding of emergency. The Council may recommend that any proposed rule be adopted by the Board on a permanent and emergency basis simultaneously.

(b) On remand. The Council shall reconsider any rulemaking

recommendation remanded by the Board.

252:4-5-7. Presentation to Board

(a) Compliance with APA. When proposed rules are presented to the Board, the DEQ shall indicate the rulemaking procedures which have been followed.

(b) Board packets. The DEQ shall prepare a board packet consisting of the text of proposed rules, an executive summary, a rule impact statement, an economic impact/environmental benefit statement (if applicable), a summary of comments received on proposed rules at rulemaking hearings and during written comment periods, the Council's recommendations and a summary of pertinent Council meeting minutes (if applicable). The Board packets shall be sent to members with the proposed agenda of the Board meeting at which rules are to be considered. Board packets for emergency rules may vary.

252:4-5-8. Board actions

(a) Referral. The Board may refer any rulemaking matter to the DEQ or an appropriate Council for review, comment or recommendation.

(b) Proposed permanent rules. The Board will not consider proposed permanent rules for adoption without the appropriate Council's recommendation except those rules for which no council has jurisdiction.

(c) Proposed emergency rules. The Board may adopt emergency rules without the advice of a Council in accordance with 27A O.S. § 2-2-101.

(d) Final language of rules. The rules adopted or repealed by the Board may vary from the Council recommendation except for rules recommended by the Air Quality Council. (See further, Oklahoma Clean Air Act at 27A O.S. § 2-5-106.)

(e) Remand. The Board may remand a Council's rulemaking recommendation for reconsideration.

(f) Notice to Council. The DEQ shall provide each Council with copies of emergency rules adopted by the Board without the Council's recommendation and of any rules adopted by the Board which vary from that Council's recommendation.

252:4-5-9. Rulemaking record

The DEQ shall maintain a rulemaking record on all rules adopted or revoked by the Board.

SUBCHAPTER 7. ENVIRONMENTAL PERMIT PROCESS

PART 1. THE PROCESS

252:4-7-1. Authority

The rules in this Subchapter implement the Oklahoma Uniform Environmental Permitting Act, 27A O.S. § 2-14-101 et seq., and apply to applicants for and holders of DEQ permits and other authorizations.

252:4-7-2. Preamble

The Uniform Environmental Permitting Act requires that DEQ

licenses, permits, certificates, approvals and registrations fit into an application category, or Tier, established under the uniform environmental permitting rules. Tier I is the category for those things that are basically administrative decisions which can be made by a technical supervisor with no public participation except for the landowner. Tier II is the category for those permit applications that have some public participation (notice to the public, the opportunity for a public meeting and public comment), and the administrative decision is made by the Division Director. Tier III is the category for those permit applications that have extensive public participation (notice to the public, the opportunity for a public meeting and public comment, and the opportunity for an administrative evidentiary hearing), and the administrative decision is made by the Executive Director.

252:4-7-3. Compliance

Applicants and permittees are subject to the laws and rules of the DEQ as they exist on the date of filing an application and afterwards as changed.

252:4-7-4. Filing an application

(a) Tier I. The applicant shall file (2) copies of a Tier I application unless the application form or instructions specifies that only one (1) copy is needed. Applicants seeking permits for alternative individual on-site sewage disposal systems and alternative small public on-site sewage disposal systems (OAC 252:641) shall file one copy with the local DEQ office for the county in which the real property is located.

(b) Tier II & III. The applicant shall file three (3) copies of Tier II and Tier III applications with the DEQ and place one (1) copy for public review in the county in which the site, facility or activity is located.

252:4-7-5. Fees

Fees shall be submitted with the application and, except as herein provided, will not be refunded.

252:4-7-6. Receipt of applications

When an application and appropriate fee are received, each program shall:

- (1) file stamp the application with the date of receipt, the Division and/or program name and an identification number;
- (2) assign the application to a permit reviewer; and
- (3) enter this information in a database or log book.

252:4-7-7. Administrative completeness review

The reviewer shall have 60 calendar days from the file-stamped date of filing to determine if the application is administratively complete.

- (1) Not complete. If the reviewer decides that the application is not complete, he/she shall immediately notify the applicant by mail, describing with reasonable specificity the deficiencies and requesting supplemental information. The reviewer may continue to ask for specific information until the application is administratively complete. If the reviewer does not notify

the applicant of deficiencies, the period for technical review shall begin at the close of the administrative completeness review period.

(2) Complete. When the application is administratively complete, the reviewer shall enter the date in the database or log book and immediately notify the applicant by mail. The period for technical review begins.

252:4-7-8. Technical review

(a) Each program shall have the time period specified in Parts 3 through 5 of this Subchapter to review each application for technical compliance with the relevant rules and to reach a final determination. If the data in the application does not technically comply with the relevant rules or law, the reviewer may notify the applicant by mail, describing with reasonable specificity the deficiencies and requesting supplemental information.

(b) Any environmental permit that is not described in this Subchapter shall be reviewed with all due and reasonable speed.

252:4-7-9. When review times stop

The time period for review stops during:

(1) litigation;

(2) public review and participation, including waiting periods, comment periods, public meetings, administrative hearings, DEQ preparation of response to comments and/or review by state or federal agencies;

(3) requests for supplemental information; and

(4) the time in which an applicant amends his/her application of his/her own accord.

252:4-7-10. Supplemental time

The Notice of Deficiencies and request for supplemental information may state that up to 30 additional calendar days may be added to the application processing time. Requests for supplemental information may also state that additional days for technical review equal to the number of days the applicant used to respond may be added to the review time.

252:4-7-11. Extensions

Extensions to the time lines of this Subchapter shall only be made by agreement or when the Executive Director certifies that circumstances outside the DEQ's control, including acts of God, a substantial and unexpected increase in the number of applications filed, or additional review duties imposed on the DEQ from an outside source, prevent the reviewer from meeting the time periods.

252:4-7-12. Failure to meet deadline

Where failure to meet a deadline is imminent, then:

(1) At least thirty (30) calendar days prior to the deadline the DEQ shall reassign staff and/or retain outside consultants to meet such deadline; or

(2) The applicant may agree to an extension of time for a specific purpose and period of time with refund of the entire application fee, unless a refund is prohibited by law.

252:4-7-13. Notices

(a) Statutory requirements for notice. The Uniform Environmental Permitting Act requires an applicant to give notice in accordance with 27A O.S. § 2-14-301.

(b) Notice to landowner. Applicants shall certify by affidavit that they own the real property, have a current lease or easement which is given to accomplish the permitted purpose or have provided legal notice to the landowner.

(c) Notice content. The applicant shall provide DEQ with a draft notice for approval prior to publication. All published legal notice(s) shall contain the:

- (1) Name and address of the applicant;
- (2) Name, address and legal description of the site, facility and/or activity;
- (3) Purpose of notice;
- (4) Type of permit or permit action being sought;
- (5) Description of activities to be regulated;
- (6) Locations where the application may be reviewed;
- (7) Names, addresses and telephone numbers of contact persons for the DEQ and for the applicant;
- (8) Description of public participation opportunities and time period for comment and requests; and
- (9) Any other information required by DEQ rules.

(d) Proof of publication. Within twenty (20) days after the date of publication, an applicant shall provide the DEQ with a written affidavit of publication for each notice published. In case of a mistake in a published notice, the DEQ shall require a legal notice of correction or republication of the entire notice, whichever is appropriate. Inconsequential errors in spelling, grammar or punctuation shall not be cause for correction or republication.

(e) Exception to notice requirement. Applicants for solid waste transfer station permits may be exempt from public meeting requirements under 27A O.S. § 2-10-307.

(f) Additional notice.

(1) Applicants for a NPDES, RCRA or UIC permit are subject to additional notice provisions of federal requirements adopted by reference as DEQ rules.

(2) Applicants for a proposed wastewater discharge permit that may affect the water quality of a neighboring state or a Part 70 permit that may affect the air quality of a neighboring state must give written notice to the environmental regulatory agency of that state. [27A O.S. § 2-5-112(E)]

(3) Applicants for a landfill permit shall provide notice by certified mail, return receipt requested, to owners of mineral interests and to adjacent landowners whose property may be substantially affected by installation of a landfill site. See *DuLaney v. OSDH*, 868 P.2d 676 (Okl. 1993).

252:4-7-14. Withdrawing applications

(a) By applicant. An applicant may withdraw an application at any time with written notice to the DEQ and forfeiture of fees.

(b) By DEQ. Except for good cause shown, when an applicant fails to supplement an application within 180 days after the mailing date of a Notice of Deficiencies, or by an agreed date, the DEQ shall void the application. The DEQ shall notify the applicant of an

opportunity to show cause why this should not occur.

252:4-7-15. Permit issuance or denial

(a) Compliance required. A new, modified or renewed permit or other authorization sought by the applicant shall not be issued until the DEQ has determined the application is in substantial compliance with applicable requirements of the Code and DEQ rules.

(b) Conditions for issuance. The Department may not issue a new, modified or renewed permit or other authorization sought by the applicant if:

(1) The applicant has not paid all monies owed to the DEQ or is not in substantial compliance with the Code, DEQ rules and the terms of any existing DEQ permits and orders. The DEQ may impose special conditions on the applicant to assure compliance and/or a separate schedule which the DEQ considers necessary to achieve required compliance; or

(2) Material facts were misrepresented or omitted from the application and the applicant knew or should have known of such misrepresentation or omission.

252:4-7-16. Tier II and III modifications

For Tier II and III permit modification actions, only those issues relevant to the modification(s) shall be reopened for public review and comment.

252:4-7-17. Permit decision-making authority

(a) Designated positions. The Executive Director may delegate in writing the power and duty to issue, renew, amend, modify and deny permits and take other authorization or registration action. Unless delegated to a Division Director by formal assignment or rule, the authority to act on Tier I applications shall be delegated to positions within each permitting program having technical supervisory responsibilities and, for local actions authorized by law, to environmental specialist positions held by the DEQ's local services representatives. The authority to act on emergency permits or Tier II applications shall be delegated to the Division Director of the applicable permitting division.

(b) Revision. The Executive Director may amend any delegation in writing.

252:4-7-18. Pre-issuance permit review and correction

(a) Applicant review. The DEQ may ask an applicant to review its permit for calculation and clerical errors or mistakes of fact or law before the permit is issued.

(b) Correction. The DEQ may correct any permit before it is issued.

(1) Notice of significant corrections. For permits based on Tier II and III applications, an applicant shall publish legal notice in one newspaper local to the site of any correction or change proposed by the DEQ which significantly alters a facility's permitted size, capacity or limits.

(2) Comments. The DEQ may open a public comment period and/or reconvene a public meeting and/or administrative hearing to receive public comments on the proposed correction(s).

252:4-7-19. Consolidation of permitting process

(a) Discretionary. Whenever an applicant applies for more than one permit for the same site, the DEQ may authorize, with the consent of the applicant, the review of the applications to be consolidated so that each required draft permit, draft denial and/or proposed permit is prepared at the same time and public participation opportunities are combined.

(b) Scope. When consolidation is authorized by the DEQ:

(1) The procedural requirements for the highest specified tier shall apply to each affected application.

(2) The DEQ may also authorize the consolidation of public comment periods, process and public meetings, and/or administrative permit hearings.

(3) Final permits may be issued together.

(c) Renewal. The DEQ may coordinate the expiration dates of new permits issued to an applicant for the same facility or activity so that all the permits are of the same duration.

(d) Multiple modifications. Subsections (a) and (b) of this section shall also apply to multiple Tier II and III applications for permit modifications.

PART 3. AIR QUALITY DIVISION TIERS AND TIME LINES

252:4-7-31. Air quality time lines

The following air quality permits and authorizations shall be technically reviewed and issued or denied within the time frames specified below.

(1) Construction permits:

(A) PSD and Part 70 Sources - 365 days.

(B) Minor Facilities - 180 days.

(2) Operating permits:

(A) Part 70 Sources - 540 days.

(B) Minor Facilities - 365 days.

(3) Relocation permits - 30 days.

252:4-7-32. Air quality applications - Tier I

(a) Minor facility permits. The following air quality authorizations for minor facilities require Tier I applications.

(1) New permits. New construction, operating and relocation permits.

(2) Modifications of permits.

(A) Modification of a construction permit for a minor facility that will remain minor after the modification.

(B) Modification of an operating permit that will not change the facility's classification from minor to major.

(C) Extension of expiration date of a construction permit.

(3) Renewals. Renewals of operating permits.

(b) Part 70 source permits. The following air quality authorizations for Part 70 sources require Tier I applications.

(1) New permits.

(A) New construction permit for an existing Part 70 source for any change considered minor under 252:100-8-7.2(b)(1).

(B) New operating permit that:

(i) is based on a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) has conditions which do not differ from the construction permit's operating conditions in any way considered significant under 252:100-8-7.2(b) (2).

(2) Modifications of permits.

(A) Modification of any operating permit condition that:

(i) is based on the operating conditions of a construction permit that was processed under Tier II or III, and 252:100-8-8, and

(ii) does not differ from those construction permit conditions in any way considered significant under 252:100-8-7.2(b) (2).

(B) A construction or operating permit modification that is minor under 252:100-8-7.2(b) (1).

(C) Extension of expiration date of a Part 70 source's construction permit with no or minor modifications.

(c) Other authorizations. The following air quality authorizations require Tier I applications.

(1) New, modified and renewed individual authorizations under general operating permits for which a schedule of compliance is not required by 252:100-8-5(c) (8) (B) (i).

(2) Burn approvals.

(3) Plant-wide emission plan approval under 252:100-37-25(b) or 252:100-39-46(j).

(4) Administrative amendments of all air quality permits and other authorizations.

(5) Alternative emissions reduction authorizations. (Also subject to state implementation plan revision procedures in 252:100-11.)

252:4-7-33. Air quality applications - Tier II

(a) Minor facility permit actions. Any minor facility seeking a permit for a modification that when completed would turn it into a Part 70 source is required to apply under subsection (b) of this section.

(b) Part 70 source permits. The following air quality authorizations for Part 70 sources require Tier II applications.

(1) New permits.

(A) New construction permit for a new Part 70 source not classified under Tier III.

(B) New construction permit for an existing Part 70 source for any change considered significant under 252:100-8-7.2(b) (2) and which is not classified under Tier III.

(C) New operating permit for a Part 70 source that did not have an underlying construction permit processed under Tier II or III, and 252:100-8-8.

(D) New operating permit with one or more conditions that differ from the underlying Tier II or III construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b) (2).

(E) New acid rain permit that is independent of a Part 70 permit application.

(F) New temporary source permit under 252:100-8-6.2.

(2) Modifications of permits.

(A) Significant modification, as described in 252:100-8-7.2(b) (2), of an operating permit that is not based on an

underlying construction permit processed under Tier II or III, and 252:100-8-8.

(B) Modification of an operating permit when the conditions proposed for modification differ from the underlying construction permit's operating conditions in a way considered significant under 252:100-8-7.2(b)(2).

(C) A construction permit modification considered significant under 252:100-8-7.2(b)(2) and which is not classified under Tier III.

(3) Renewals. Renewals of operating permits.

(c) Other authorizations. The following air quality authorizations require Tier II applications.

(1) New, modified and renewed general operating permits.

(2) Individual authorizations under any general operating permit for which a schedule of compliance is required by 252:100-8-5(c)(8)(B)(i).

252:4-7-34. Air quality applications - Tier III

(a) New major stationary sources. A construction permit for any new major stationary source listed in this subsection requires a Tier III application. For purposes of this section, "Major stationary source" means:

(1) Any of the following sources of air pollutants which emits, or has the potential to emit, 100 tons per year or more of any pollutant subject to regulation:

(A) carbon black plants (furnace process),

(B) charcoal production plants,

(C) chemical process plants,

(D) coal cleaning plants (with thermal dryers),

(E) coke oven batteries,

(F) fossil-fuel boilers (or combustion thereof), totaling more than 250 million BTU per hour heat input,

(G) fossil fuel-fired steam electric plants of more than 250 million BTU per hour heat input,

(H) fuel conversion plants,

(I) glass fiber processing plants,

(J) hydrofluoric, sulfuric or nitric acid plants,

(K) iron and steel mill plants,

(L) kraft pulp mills,

(M) lime plants,

(N) incinerators, except where used exclusively as air pollution control devices,

(O) petroleum refineries,

(P) petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels,

(Q) phosphate rock processing plant,

(R) portland cement plants,

(S) primary aluminum ore reduction plants,

(T) primary copper smelters,

(U) primary lead smelters,

(V) primary zinc smelters,

(W) secondary metal production plants,

(X) sintering plants,

(Y) sulfur recovery plants, or

(Z) taconite ore processing plants, and

(2) Any other source not specified in paragraph (1) of this definition which emits, or has the potential to emit, 250 tons per year or more of any pollutant subject to regulation.

(b) Existing incinerators. An application for any change in emissions or potential to emit, or any change in any permit condition, that would have caused an incinerator to be defined as a major stationary source when originally permitted shall require a Tier III application.

(c) Potential to emit. For purposes of this section, "potential to emit" means emissions resulting from the application of all enforceable permit limitations as defined in OAC 252:100-1-3.

PART 5. LAND PROTECTION DIVISION TIERS AND TIME LINES

252:4-7-51. Waste management time lines

The Land Protection Division shall technically review applications and issue or deny permits within the following periods of time:

(1) Hazardous waste applications, including new RCRA permits or renewals, new state recycling permits, Class 3 modifications, closure and post-closure plans, transfer station plans and plan modifications - 300 days;

(2) Brownfields applications and each submittal or resubmittal - 60 days;

(3) Solid waste applications and each submittal or resubmittal - 90 days;

252:4-7-52. Hazardous waste management applications - Tier I

The following hazardous waste management authorizations require Tier I applications.

(1) Class 1 modification of any hazardous waste permit requiring prior Department approval as specified in 40 CFR § 270.42.

(2) Modification to a recycling permit in accordance with 27A O.S. § 2-7-118(A).

(3) Class 2 permit modification as defined in 40 CFR § 270.42.

(4) Emergency hazardous waste disposal plan approval.

(5) Hazardous waste generator disposal plan approval.

(6) Technical plan approval.

(7) Hazardous waste transporter license.

(8) Hazardous waste transfer station plan modification which is not related to capacity.

(9) Emergency permit issued in accordance with 40 CFR § 270.61.

(10) Interim status closure plan approval in accordance with 40 CFR § 265.113(d)(4).

(11) Minor administrative modification of all permits and other authorizations.

(12) Renewal of disposal plan approval and transporter license.

(13) New, modified or renewed authorization under a general permit.

(14) Approval of temporary authorizations in accordance with 40 CFR § 270.42.

252:4-7-53. Hazardous waste management applications - Tier II

The following hazardous waste management authorizations require

Tier II applications.

- (1) On-site hazardous waste treatment, storage or disposal permit.
- (2) Mobile recycling permit.
- (3) Research & Development permit.
- (4) Class 3 modification of any hazardous waste permit as specified in 40 CFR § 270.42.
- (5) Modification of an on-site hazardous waste facility permit for a fifty percent (50%) or greater increase in permitted capacity for storage, treatment, and/or disposal, including incineration.
- (6) Modification of an on-site hazardous waste facility permit for an expansion of permitted boundaries.
- (7) Modification of on-site hazardous waste facility permit in which the application is for new treatment, storage, or disposal methods or units which are significantly different from those permitted.
- (8) Renewal of a hazardous waste treatment, storage or disposal permit.
- (9) Hazardous waste transfer station plan approval.
- (10) Hazardous waste transfer station plan modification involving increase in approved capacity.
- (11) Variance which is not part of a permit application.
- (12) Variance which is part of a Tier II permit application.

252:4-7-54. Hazardous waste management applications - Tier III

The following hazardous waste management authorizations require Tier III applications.

- (1) Off-site hazardous waste treatment, storage, disposal, incineration and/or recycling permit.
- (2) Modification of an off-site hazardous waste facility permit for a fifty percent (50%) or greater increase in permitted capacity for storage, treatment, and/or disposal, including incineration.
- (3) Modification of an off-site hazardous waste facility permit for an expansion of permitted boundaries.
- (4) Modification of off-site hazardous waste facility permit in which the application is for new treatment, storage, or disposal methods or units which are significantly different from those permitted.
- (5) Variance which is part of a Tier III application.

252:4-7-55. Radiation management applications - Tier I

The following radiation management authorizations require Tier I applications:

- (1) New, amended and renewed operating permits for radiation machines;
- (2) New, amended and renewed permits for x-ray fluorescence spectroscopy instruments used to detect lead in paint;
- (3) New and renewed specific licenses under the state agreement program not classified under Tiers II or III;
- (4) Industrial radiography certifications;
- (5) Approvals of license termination plans that require no decommissioning or remediation;
- (6) Decommissioning and remediation plans required for

remediation due to the use, storage or disposal of one or more radioactive materials with a half-life of 120 days or less;

(7) DEQ approvals of documentation showing residual radioactivity levels for a site or property are within acceptable limits as set by Chapter 410;

(8) Minor amendments of all authorizations classified under Tiers I, II or III; and

(9) Major amendments of all authorizations classified under Tier I.

252:4-7-56. Radiation management applications - Tier II

The following radiation management authorizations require Tier II applications:

(1) Decommissioning and remediation plans required for on-site remediation due to the use, storage or disposal of one or more radioactive materials with a half-life of more than 120 days, except for those facilities described in 252:4-7-57(3) (A);

(2) New or renewed permits for the non-commercial treatment or disposal of radioactive waste, generated by the applicant, by incineration or the amendment of the incinerator permit for a capacity increase or for any expansion beyond permitted boundaries for the purpose of expanding operations or storage; and

(3) Major amendments of all authorizations classified under Tier II.

252:4-7-57. Radiation management applications - Tier III

The following radiation management authorizations require Tier III applications:

(1) New or renewed permits for the land disposal of low-level radioactive waste received from others and the major amendment thereof;

(2) New or renewed permits for the commercial treatment or disposal of radioactive waste by incineration and the major amendment thereof; and

(3) Decommissioning and remediation plans and the major amendment thereof:

(A) for nuclear fuel cycle facilities or facilities and sites involved in the manufacturing or processing of licensed quantities of radioactive materials; and

(B) for sites that require both on- and off-site remediation due to the use, storage or disposal of one or more radioactive materials with a half-life of more than 120 days.

252:4-7-58. Solid waste management applications - Tier I

The following solid waste management authorizations require Tier I applications.

(1) New permits.

(A) Locally approved solid waste transfer stations. Permit for a solid waste transfer station that, prior to application filing, received county commissioner approval according to 27A O.S. § 2-10-307.

(B) Biomedical waste transfer stations using only sealed containers. Biomedical waste transfer station permit when activities are limited to:

- (i) consolidation of sealed containers; and/or
 - (ii) transfer of sealed containers from one vehicle or mode of transportation to another.
 - (C) Disaster relief. Emergency authorization for waste disposal resulting from a natural disaster.
- (2) Modifications.
 - (A) All facilities.
 - (i) Modification of a solid waste permit to add methods, units or appurtenances for liquid bulking processes; yard waste composting; recycling operations; waste screening; or baling, chipping, shredding or grinding equipment or operations.
 - (ii) Modification to any solid waste permit to make minor changes.
 - (iii) Modification of plans for closure and/or post-closure.
 - (iv) Administrative modification of all permits and other authorizations.
 - (B) On-site and off-site land disposal facilities. Modification of an existing land disposal permit for a lateral expansion within permitted boundaries.
 - (C) Capacity increases of less than 25% with exceptions. The modification of a solid waste permit, excluding incineration permits, involving a request for less than twenty-five percent (25%) increase in permitted capacity for storage, processing or disposal when the request is for equivalent methods, units or appurtenances as those permitted and which does not involve expansions of permitted boundaries.
- (3) Plans and other authorizations. The approval of new and when applicable, modified or renewed:
 - (A) Plans for composting of yard waste only.
 - (B) Permit transfers.
 - (C) Non-hazardous industrial solid waste disposal plans.
 - (D) Technical plans.
 - (E) County solid waste management plans.
 - (F) Individual authorizations under a general permit.
 - (G) All other administrative approvals required by solid waste rules.

252:4-7-59. Solid waste management applications - Tier II

The following solid waste management authorizations require Tier II applications.

- (1) New permits.
 - (A) On-site solid waste processing facilities with exception. Permit for an on-site solid waste processing facility except yard waste composting as listed under Tier I.
 - (B) Solid waste transfer stations with exceptions. Permit for a solid waste transfer station except:
 - (i) a transfer station permit with county commissioner approval as listed under Tier I, or
 - (ii) a biomedical waste transfer station permit listed under Tier I.
 - (C) On-site incinerators with exceptions. Permit for an on-site incinerator except those exempt under solid waste rules or those that have an approved Air Quality permit or Solid

Waste Management Plan.

(D) On-site land disposal sites. Permit for an on-site solid waste disposal site.

(E) Material Recovery Facility (MRF). Permit for a Material Recovery Facility if waste is not source-separated.

(2) Modifications.

(A) All facilities. Modification of a permit for a change in waste type.

(B) On-site facilities. Any modification of an on-site solid waste permit, except as listed under Tier I.

(C) Off-site facilities.

(i) Modification of any off-site solid waste permit involving a request for more than twenty-five percent (25%) but less than fifty percent (50%) increase in permitted capacity for storage, processing or disposal (excluding incineration) when the request is for equivalent methods, units or appurtenances as those permitted, except those listed under Tier I.

(ii) Modification of any off-site processing facility involving an expansion of permitted boundaries.

(D) Incinerators.

(i) Modification of an on-site incinerator permit for any increase in permitted capacity for storage, processing, or disposal.

(ii) Modification of an off-site incinerator permit involving a request for increases less than fifty percent (50%) in permitted capacity for storage, processing, or disposal when the request is for equivalent methods, units or appurtenances as those permitted.

(3) General permit. New, modified or renewed general permit.

252:4-7-60. Solid waste management applications - Tier III

The following solid waste management authorizations require Tier III applications.

(1) New permits.

(A) Off-site processing facilities with exceptions. Permit for an off-site processing facility, unless otherwise specified in Tier I or Tier II.

(B) Off-site land disposal facility. Permit for an off-site solid waste land disposal site.

(C) Off-site incinerator. Permit for an off-site incinerator.

(2) Modifications.

(A) Off-site facilities: significant increase in capacity. Modification of any off-site solid waste permit involving a fifty percent (50%) or greater increase in permitted capacity for storage, processing, and/or disposal, including incineration.

(B) Off-site land disposal facility. Modification of an off-site solid waste land disposal permit for an expansion of permitted boundaries.

(C) Off-site facilities: different methods, units or appurtenances. Modification of an off-site solid waste permit in which the request involves different methods, units or appurtenances than those permitted, except those listed under

Tier I.

(3) Variance approvals. All variances.

252:4-7-61. Brownfields applications - Tier I

A Tier I application shall be required for a Memorandum of Agreement for site characterization.

252:4-7-62. Brownfields applications - Tier II

A Tier II application shall be required for all Certificates.

252:4-7-63. Brownfields applications - Tier III

None.

PART 7. WATER QUALITY DIVISION TIERS AND TIME LINES

252:4-7-71. Water quality time lines

The Water Quality Division shall technically review applications and issue or deny permits within the following periods of time:

- (1) Discharges, 401 Certifications, industrial wastewater other than discharge, pretreatment trust users, and sludge management plan - 180 days;
- (2) Public water supply and water pollution control construction - 90 days; and
- (3) UIC applications - 300 days.

252:4-7-72. Laboratory certification applications - Tier I

A Tier I application shall be required for a new, modified, amended or renewed laboratory certification.

252:4-7-73. Water quality applications - Tier I

The following water quality authorizations require Tier I applications.

- (1) Permit for flow-through impoundment(s) as part of the pretreatment process.
- (2) Re-permitting of facility with an expiring permit for industrial non-discharging impoundment or septic tank system.
- (3) Re-permitting of expiring permit with minor or no change(s) for land application of sludge and/or wastewater for same site.
- (4) New, modified or renewed authorization under a general permit, including but not limited to general permits for stormwater, underground storage tanks and petroleum storage and treatment facilities.
- (5) Approval of new pretreatment program.
- (6) Closure plan approval.
- (7) Dredge and fill certification.
- (8) Approval of exemption for water line extensions.
- (9) Approval of exemption for water distribution and wastewater collection systems.
- (10) Approval for alternative individual on-site sewage disposal systems.
- (11) Approval for alternative small public on-site sewage disposal systems.
- (12) Residential development approval.
- (13) Transfer of discharge permit.
- (14) Minor modification of discharge permit.

- (15) Minor modification of permit for land application of sludge and/or wastewater.
- (16) Modification of or addition to a municipal wastewater treatment system (including sewer line extensions).
- (17) Modification of or addition to a public water supply treatment and/or distribution system.
- (18) Modification of non-discharging impoundment and/or septic tank system permit.
- (19) Modification of an approved pretreatment program.
- (20) Administrative amendment of permits or other authorizations for the correction of administrative or typographical errors.

252:4-7-74. Water quality applications - Tier II

The following water quality authorizations require Tier II applications.

- (1) Permit for municipal wastewater treatment system.
- (2) Permit for public water supply system.
- (3) Discharge permit for minor facility.
- (4) Individual storm water permit.
- (5) Permit for industrial non-discharging impoundment or septic tank.
- (6) Permit for land application of sludge and/or wastewater at new site system.
- (7) Re-permitting of a facility with expiring discharge permit.
- (8) Re-permitting of facility with expiring individual storm water discharge permit.
- (9) Re-permitting with major change(s) from expiring permit for land application of sludge and/or wastewater for the same site.
- (10) Variance including thermal components of effluent limitations for an individual discharge permit.
- (11) Major modification of discharge permit.
- (12) Major modification of permit for land application of sludge and/or wastewater.
- (13) New, modified or renewed general permit.

252:4-7-75. Water quality applications - Tier III

A new discharge permit for a major facility requires a Tier III application.

252:4-7-76. UIC applications-Tier I

The following underground injection control authorizations require Tier I applications.

- (1) Minor modification of a permit for Class I, III, and V wells in accordance with 40 CFR § 144.41.
- (2) Modification of an approved closure and/or post-closure plan for a Class I hazardous waste injection well.
- (3) Modification of an approved plugging and abandonment plan for Class I nonhazardous and Class III injection wells.
- (4) Modification of an approved corrective action plan for a Class I injection well.
- (5) Emergency permit in accordance with 40 CFR § 144.34.
- (6) New, modified or renewed authorization under a general permit.
- (7) Minor administrative modification of all permits and other

authorizations.

252:4-7-77. UIC applications - Tier II

The following underground injection control authorizations require Tier II applications.

- (1) On-site Class I nonhazardous waste injection well permit.
- (2) Class III and V injection well permits except Class V permits issued under Tier III.
- (3) Modification and/or renewal of all DEQ-issued underground injection control well permits.

252:4-7-78. UIC applications - Tier III

The following underground injection control authorizations require Tier III applications.

- (1) Class I hazardous waste injection well permit.
- (2) Off-site Class I nonhazardous waste injection well permit.
- (3) Class V industrial waste injection well permit.

SUBCHAPTER 9. ADMINISTRATIVE PROCEEDINGS

PART 1. ENFORCEMENT

252:4-9-1. Notice of Violation ("NOV")

Unless otherwise provided by the particular enabling legislation, administrative enforcement proceedings shall begin with a written notice of violation (NOV) being served upon the Respondent. The NOV shall set forth Respondent's action or omission and the specific provision of the Code, rules, license or permit alleged to be violated. An NOV may be a letter, inspection sheet, consent order or final order, if it meets the requirements of this Section.

252:4-9-2. Administrative compliance orders

(a) When issued. The Executive Director, upon the request of a Division, may issue an administrative order requiring compliance, assessing penalties for past violations and specifying penalties for continuing noncompliance.

(b) Contents. An administrative compliance order shall specify the findings of fact and conclusions of law upon which it is based and shall set a time for the Respondent to comply. The Order shall specify the penalty, not to exceed the statutory maximum per day of noncompliance, to be assessed in the event that the Respondent fails to comply with the Order within the prescribed time, and, if applicable, the penalty assessed for past violations of the Code, rules, or licenses or permits. The Order shall advise the Respondent that it shall become final unless an administrative hearing is requested in writing in accordance with 252:4-9-32 within fifteen (15) days of service of the Order.

(c) Service. An Order shall be served in accordance with 252:4-9-35.

(d) Order following hearing. Based on the hearing and record, a proposed order will be sustained, modified, or dismissed by the Executive Director. If the hearing process extends beyond any compliance deadline specified in the Order, fines specified in the Order for violations of the Order will continue to accrue during the hearing process unless the Administrative Law Judge stays the

penalty upon request for good cause shown.

252:4-9-3. Determining penalty

In determining the amount of penalty specified in an administrative penalty order, the DEQ may consider the following:

- (1) the factors specified by 27A O.S. § 2-3-502(K)(2); and
- (2) the extent and severity of environmental degradation or adverse health effects caused by the violation.

252:4-9-4. Assessment orders

(a) Issuance of assessment order. Any time the DEQ believes the Order has been violated, the Executive Director may issue an order assessing an administrative penalty pursuant to 27A O.S. § 2-3-502. In determining an appropriate administrative penalty, the Executive Director may consider Respondent's efforts to comply after being served with the Order.

(b) Content of assessment orders. An assessment order must state the nature and period of the violation and must determine the amount of the fine. The fine is due and payable immediately upon issuance of the assessment order, unless a hearing is requested within seven (7) days. See also 27A O.S. § 2-3-502.

(c) Continuing violations. If the DEQ believes that violations of the administrative compliance or penalty order continue after the issuance of an assessment order, the Executive Director may issue additional assessment orders covering periods of violation since the period covered by the issuance of a previous assessment order.

252:4-9-5. Considerations for self-reporting of noncompliance

(a) Conditions for not seeking administrative and civil penalties. Except in the case of habitual noncompliance or as otherwise provided in this section, in evaluating an enforcement action for a regulated entity's failure to comply with DEQ rules, the DEQ will not seek an administrative or civil penalty when the following circumstances are present:

(1) The regulated entity voluntarily, promptly and fully discloses the apparent failure to comply with applicable state environmental statutes or rules to the appropriate DEQ Division in writing before the Division learns of it or is likely to learn of it imminently;

(2) The failure is not deliberate or intentional;

(3) The failure does not indicate a lack or reasonable question of the basic good faith attempt to understand and comply with applicable state environmental statutes or rules through environmental management systems appropriate to the size and nature of the activities of the regulated entity;

(4) The regulated entity, upon discovery, took or began to take immediate and reasonable action to correct the failure (i.e., to cease any continuing or repeated violation);

(5) The regulated entity has taken, or has agreed in writing with the appropriate Division to take, remedial action as may be necessary to prevent recurrence of such failure. Any action the regulated entity agrees to take must be completed;

(6) The regulated entity has addressed, or has agreed in writing with the appropriate Division to address, any environmental impacts of the failure in an acceptable manner;

(7) The regulated entity has not realized and will not realize a demonstrable and significant economic or competitive advantage as a result of non-compliance; and

(8) The regulated entity cooperates with the DEQ as the DEQ performs its duties and provides such information as the DEQ reasonably requests to confirm the entity's compliance with these conditions.

(b) Partial qualification. Notwithstanding the failure of a regulated entity to meet all of the conditions in subsection a of this section, the DEQ will consider the nature and extent of such actions of the regulated entity in mitigation of any administrative or civil penalty otherwise appropriate. If the regulated entity meets all conditions in subsection (a) of this section except item seven (7) relating to significant economic or competitive advantage, the DEQ will seek an administrative or civil penalty only to the extent of the economic or competitive advantage gained.

(c) Relationship to federal/state agreements. In the event of any conflict, the elimination or mitigation of penalties pursuant to subsections (a) and (b) of this section is subject to agreements between the DEQ and the United States Environmental Protection Agency (USEPA) relating to regulatory program delegation or authorization from the USEPA to the DEQ.

(d) Applicability. This section applies to all enforcement cases arising from violations discovered by or brought to the attention of the DEQ after June 2, 1997.

PART 3. INDIVIDUAL PROCEEDINGS

252:4-9-31. Individual proceedings filed by DEQ

(a) Initiation. Individual proceedings may be initiated by DEQ program areas by filing an administrative compliance or penalty order with the Administrative Law Clerk.

(b) Content. Each order shall name the Respondent(s), contain a brief statement of the facts, refer to the specific provision of the Code, rules, license or permit alleged to be violated, state the relief requested and include notice to the Respondent(s) of the opportunity to request an administrative hearing.

(c) Style. The style of the case shall be in accordance with the format in Appendix D.

252:4-9-32. Individual proceedings filed by others

(a) Request for administrative hearing in response to Order. A request for an individual proceeding initiated by the Respondent named in an Order shall be in writing and shall specifically set forth the Respondent's objections to the Order.

(b) Administrative hearing on Tier III permits. An individual proceeding on a proposed permit for a Tier III application may be requested in accordance with 27A O.S. § 2-14-304(C) (1).

(c) Style. The style of the case shall be in accordance with the format in Appendix D.

(d) Content. All requests for individual proceedings must be in writing, contain a brief statement of the basis of the request and the name and address of each requester, and be signed by the requester or an authorized representative.

(e) Declaratory ruling. Any person who alleges that any DEQ rule

or order interferes with or impairs, or threatens to interfere with or impair, his/her legal rights may petition the DEQ, formally requesting a declaratory ruling on the applicability of the rule or order. After the petition is filed, the DEQ shall provide a copy to the Board.

(1) Form and content of petition. All petitions shall be in writing and filed with the Administrative Law Clerk. The petition shall include the information and follow the format in Appendix B.

(2) Determination. Petitions for declaratory rulings shall be decided by the DEQ. Rulings shall state the findings of fact and conclusions of law upon which they are based. If the DEQ refuses to make a ruling or begin an individual proceeding within 30 days, the petition shall be deemed to have been denied. If the DEQ begins an individual proceeding on the petition, it shall offer an opportunity for a hearing to the petitioner. After the DEQ issues a ruling or the Executive Director issues a final order, the DEQ shall provide a copy of the ruling or final order to the Board at its next available meeting.

(3) Mailing. The DEQ shall mail a copy of the ruling or final order to the petitioner.

252:4-9-33. Scheduling and notice of hearings

The DEQ shall schedule an administrative hearing after receipt of a proper and timely request. The Administrative Law Clerk shall notify the parties of the date, time and place of the hearing. Notice shall satisfy the requirements of the APA and shall be made at least fifteen (15) days prior to the hearing unless otherwise provided by law or agreed by the parties.

252:4-9-34. Administrative Law Judges and Clerks

(a) Administrative Law Judge. The Executive Director may designate an Administrative Law Judge for any administrative hearing in accordance with 27A O.S. § 2-3-103. Administrative Law Judges shall not have had prior involvement in the matter other than as an Administrative Law Judge, unless the parties waive this requirement.

(b) Administrative Law Clerk. The Executive Director may designate an Administrative Law Clerk to maintain the administrative hearing dockets and records, and perform such other duties as described in this Chapter or incidental thereto.

(c) Authority. Administrative Law Judges have complete authority to conduct individual proceedings and may take any action consistent with the APA and the rules of this subchapter. Administrative Law Judges may:

(1) arrange and issue notice of the date, time and place of hearings and conferences;

(2) establish the methods and procedures to be used in the presentation of the evidence;

(3) hold conferences to settle, simplify, determine, or strike any of the issues in a hearing, or to consider other matters that may facilitate the expeditious disposition of the hearing;

(4) administer oaths and affirmations;

(5) regulate the course of the hearing and govern the conduct

of participants;

(6) examine witnesses;

(7) rule on, admit, exclude and limit evidence, at or before hearings;

(8) establish the time for filing motions, testimony, and other written evidence, briefs, findings, and other submissions, and hold the record open for such purposes;

(9) rule on motions and pending matters;

(10) divide the hearing into stages or join claims of parties whenever the number of parties is large or the issues are numerous and complex;

(11) restrict attendance by persons not parties to the hearing in appropriate cases;

(12) admit attorneys from other jurisdictions to practice law before the DEQ in accordance with Rules of the Oklahoma Bar Association, 5 O.S. Chapter 1, Appendix 1, Article II, § 5, and administer the oath required by 5 O.S. § 2.

(13) require briefs on any relevant issues;

(14) request proposed findings of fact, conclusions of law and a proposed order from all parties; and

(15) restrict testimony to the facts alleged in an assessment order.

(d) Technical assistance. At the request of the Administrative Law Judge, the Executive Director may designate a DEQ representative, who has had no assigned responsibilities related to the matter at issue, to serve as technical adviser to the Administrative Law Judge.

252:4-9-35. Service

(a) Generally. Service shall be made in accordance with the Oklahoma Pleading Code, 12 O.S. § 2001 et seq., and 27A O.S. § 2-3-502 unless otherwise allowed by this section.

(b) By the DEQ. Where the DEQ is serving notice, personal service may be made by a person designated by the Executive Director for that purpose.

(c) By certified mail. Service by certified mail shall be effective on the date of receipt or, if refused, on the date of refusal by the Respondent.

252:4-9-36. Responsive pleading

A Respondent may file, and the Administrative Law Judge may direct a Respondent to file, a responsive pleading to the initiated action.

252:4-9-37. Prehearing conferences

(a) General. The Administrative Law Judge may schedule and conduct prehearing conferences as necessary. The Administrative Law Clerk shall notify the parties of the scheduling of a prehearing conference. The Administrative Law Judge may hold a prehearing conference by telephone. On request, prehearing conferences shall be on the record.

(b) Subjects. Prehearing conferences may address:

(1) identification and simplification of issues, including the elimination of frivolous claims or defenses;

(2) amendments to the pleadings;

(3) the plan and schedule of discovery and limitations to be placed thereon;

(4) identification of admissions of fact to avoid unnecessary proof and cumulative evidence;

(5) the identification of witnesses and substance of testimony, exhibits, and documents;

(6) the use of prehearing briefs and prefiled testimony in the form of sworn affidavits;

(7) settlement of all or some of the issues before the hearing;

(8) adoption of special procedures for managing potentially difficult or protracted actions that may involve complex issues, multiple parties, novel or difficult legal questions, or evidence problems;

(9) scheduling; and

(10) such other matters as may aid disposition.

(c) **Schedules and orders.** A prehearing conference may result in a scheduling or other prehearing order. Subsequent changes to any prehearing or scheduling order may be made by the Administrative Law Judge by modifying the order upon good cause shown.

252:4-9-38. Discovery

Discovery shall be conducted in accordance with the Oklahoma Discovery Code (12 O.S. § 3224 et seq.) unless otherwise ordered by the Administrative Law Judge for good cause.

252:4-9-39. Subpoenas

(a) **Issuance.** Subpoenas for the attendance of witnesses, the furnishing of information required by the Administrative Law Judge and the production of evidence shall be issued in accordance with the APA and the Oklahoma Pleading Code.

(b) **Failure to obey.** The Executive Director may seek an appropriate judicial order to compel compliance by persons who fail to obey a subpoena, who refuse to be sworn or make an affirmation at a hearing, or who refuse to answer a proper question during a hearing. The hearing may proceed despite any such refusal but the Administrative Law Judge may, in his/her discretion at any time, continue the proceedings as necessary to secure a court ruling.

252:4-9-40. Record

(a) **To be made.** A record of the hearing shall be made, which shall be a tape recording unless otherwise agreed by the parties and the Administrative Law Judge. The recording will not be transcribed as a matter of course. A transcript may be obtained by submitting a written request to the Administrative Law Clerk and tendering payment in an amount sufficient to pay the cost of having the recording transcribed.

(b) **Court reporter.** A party may request a court reporter. The requesting party shall pay the costs, and the original transcript shall be filed in the case file as part of the record in the case. Each person or party requesting copies shall make arrangements with the reporter and pay the costs.

(c) **Maintained.** The record of a proceeding and the file containing the notices and the pleadings will be maintained by the Administrative Law Clerk. All pleadings, motions, orders and other papers submitted for filing in a proceeding shall be date/file

stamped by the Administrative Law Clerk upon receipt. The burden of showing substantial prejudice by any failure to correctly file-stamp any submittal shall be upon the asserting party.

(d) Contents. The administrative record of all individual proceedings shall contain documents required by the APA, 75 O.S. § 309. An individual proceeding on a proposed permit for a Tier III application shall also include the following:

- (1) the permit application on file with the DEQ, as amended;
- (2) all written comments received during the public comment period;
- (3) the tape or transcript of the public meeting;
- (4) documents resulting from the DEQ's review of the permit application and public comments;
- (5) the draft permit, fact sheet and response to comments, if any, issued by the DEQ; and
- (6) all published notices.

252:4-9-41. Motions

(a) Filing. All requests for action in a matter already before the DEQ shall be made in a motion, signed by the party or his/her attorney, and filed with the Administrative Law Clerk.

(b) Service. Copies of motions shall be served on other parties in accordance with 252:4-9-35.

(c) Response. Within fifteen (15) days after service of any written motion, any party to the proceedings may file a response to the motion. The time for response may be extended or shortened by the Administrative Law Judge for good cause shown.

252:4-9-42. Continuances

A motion for an extension or continuance shall state the reasons for the request and specify the length of time requested. Unless made before the Administrative Law Judge in open hearing, motions for extensions of time or for a continuance of the hearing to another date or time shall be in writing and filed with the Administrative Law Clerk. The Administrative Law Judge shall promptly grant or deny such request at his/her discretion. If the motion is denied, it may be renewed orally by the party at the hearing.

252:4-9-43. Summary judgment

The Administrative Law Judge may grant a motion for summary judgment, subject to 252:4-9-46.

252:4-9-44. Default

(a) Generally. Any Respondent who fails to appear, after receipt of notice, may be determined to have waived the right to appear and present a defense. A Final Order may be issued by the Executive Director granting the relief requested by default.

(b) Tier III application. The Executive Director may enter a default judgment against any party who fails to participate in an administrative hearing on a proposed permit for a Tier III application.

252:4-9-45. Withdrawal and dismissal

Parties may withdraw from a case and cases may be dismissed by

the Administrative Law Judge in accordance with the Oklahoma Code of Civil Procedure.

252:4-9-46. Orders in administrative hearings

Proposed and final orders in administrative hearings shall be prepared and issued in accordance with the APA.

PART 5. AIR QUALITY ADVISORY COUNCIL HEARINGS

252:4-9-51. In general

The Air Quality Advisory Council is authorized to conduct individual proceedings on enforcement matters and requests for a variance from the Clean Air Act, 27A O.S. §§ 2-5-101 through 2-5-118, or the Air Pollution Control Rules, OAC 252:100.

252:4-9-52. Individual proceedings

Individual proceedings before the Air Quality Advisory Council will be conducted in accordance with the requirements in Part 3 of this Subchapter. To be heard by the Council, the request for hearing in response to an Order must include a request that the Council conduct the hearing. The Council may designate an Administrative Law Judge for individual proceedings to be held before the Council. The Council or its designee may perform Administrative Law Judge functions described in Part 3 of this Subchapter.

252:4-9-53. Variance

It is within the discretion of the Air Quality Advisory Council to decide whether or not an individual proceeding is necessary in granting a variance.

252:4-9-54. State implementation plan hearings

A state implementation plan (SIP) hearing may be initiated by an applicant for an alternative emissions reduction authorization under 252:100-11 by filing a request for a SIP hearing with the Administrative Law Clerk. A request that the hearing be conducted by the Air Quality Advisory Council must be included in the request for hearing. Additional requirements for a SIP hearing request are contained in 252:100-11-6.

SUBCHAPTER 11. COMPLAINT PROCESSING

252:4-11-1. Purpose

This Subchapter establishes procedures used to process environmental complaints received from the public.

252:4-11-2. Receipt of complaints

(a) Complaints may be made by any of the following:

- (1) the toll-free hotline;
- (2) mail, including electronic transmission;
- (3) telephone to any DEQ telephone number; or
- (4) in person at any office of the DEQ.

(b) Complainants may request to be anonymous or to remain confidential.

252:4-11-3. Investigation

After receipt of a complaint, the DEQ may assign an investigator to obtain any information which may tend to prove there has or has not been a violation of the Code or rules, who the potentially responsible persons are, and any other information which may be needed to resolve the complaint.

252:4-11-4. Notification

(a) Potential actions. Within two (2) working days of receipt of a complaint, the DEQ shall notify the complainant of the potential actions which may occur to resolve the complaint.

(b) Course of action. Within seven (7) working days of the receipt of a complaint, the DEQ shall notify the complainant, in writing, of the action to be taken by the DEQ.

(c) Final letter. Within seven (7) working days of determining that there is no longer a DEQ violation, the DEQ shall notify the complainant in writing.

(d) Enforcement. Complainants shall be notified of enforcement actions taken in response to a complaint in accordance with 27A O.S. § 2-3-503.

252:4-11-5. Referral of complaints

(a) To appropriate agency. If the DEQ receives a complaint for which DEQ has no authority and which clearly falls within the jurisdiction of another governmental entity, the complaint shall be referred to that governmental entity.

(b) To mediation. DEQ may notify a complainant and persons named in the complaint (Respondents), by mail, of the opportunity to mediate the complaint in accordance with 27A O.S. § 2-3-104.

252:4-11-6. False complaint

When the DEQ has a reasonable suspicion that a complainant has filed a false complaint, the Executive Director may refer all investigation materials, including but not limited to, reports, notes, initial data collection forms and letters to the District Attorney's office in the area where the complainant resides.

SUBCHAPTER 13. ENVIRONMENTAL EDUCATION GRANTS

252:4-13-1. Authority and eligibility

(a) Authority. This subchapter is adopted pursuant to 75 O.S. § 302, 27A O.S. § 2-2-101, 47 O.S. § 1104.2 and Executive Order 98-37.

(b) Eligibility. Oklahoma teachers and youth group leaders are eligible to apply for environmental education grants provided by the DEQ.

252:4-13-2. Amount of grants

The DEQ will award the following amounts to successful applicants:

- (1) Up to and including \$ 200.00 for field trips;
- (2) Up to and including \$ 500.00 for environmental education projects; and
- (3) Up to and including \$1000.00 for outdoor classrooms.

252:4-13-3. Criteria

The following will be considered by the DEQ in determining grant awards:

- (1) Project proposed, including how the project accomplishes the following factors:
 - (A) Promotes enthusiasm to learn more about the environment;
 - (B) Fits in the school curriculum or youth group program;
 - (C) Involves community partnerships and/or outreach, if applicable.
- (2) Number of students/youth participating;
- (3) Grade level of students/youth; and
- (4) Geographic location.

252:4-13-4. Application

(a) Complete application. A complete application consists of a cover page, a letter of commitment, a summary of the project, a projected timeline, a proposed budget and a procedure for evaluation of the project.

(b) Attachments. Photographs, clippings, diagrams and other graphic materials, not to exceed five (5) pages double sided, may be attached to the application.

(c) Document submission. An original and two (2) copies, double sided, of the application and attachments must be submitted to the DEQ, date-stamped or postmarked on or before the published deadline. The DEQ will not accept applications submitted by telecopy/facsimile or e-mail.

252:4-13-5. Cover page

The cover page must include the following information:

- (1) Title of the project;
- (2) Name of contact person, position held and relationship to project;
- (3) Name of school or youth group organization;
- (4) Grade level(s) and number of youth targeted;
- (5) Federal Employer Identification number (tax ID#);
- (6) Street address;
- (7) Mailing address, if different from street address;
- (8) E-mail address, if any;
- (9) Daytime and evening telephone numbers; and
- (10) Telecopy/facsimile number, if any.

252:4-13-6. Letter of commitment

The grant application must be accompanied by a letter from the applicant's principal or supervisor stating the organization's support for the performance of the grant objectives.

252:4-13-7. Summary of project

The applicant must submit a project summary, with a maximum length of one page, double sided. The project summary shall include the following:

- (1) Synopsis. Provide one paragraph summarizing the project;
- (2) Description. Give a clear concise description of the proposed project, indicating how the project promotes enthusiasm to learn more about the environment, fits in the school curriculum or youth group program and involves community

partnerships and/or outreach, if applicable;

(3) Goals and objectives. Clearly define realistic goals and objectives. Include information outlining where these goals address specific needs.

(4) Implementation. Describe how the project will be implemented and whether it emphasizes a hands-on learning approach. Include the project's potential for broad implementation.

252:4-13-8. Timeline

The applicant must present target dates for project objectives.

252:4-13-9. Budget

The applicant must provide an itemized budget with specific project expenditures of grant funds.

252:4-13-10. Evaluation procedure

The applicant must provide a description of the methods to be used to measure project effectiveness, including how the evaluation method will improve the project's strength. The applicant must indicate in the evaluation method how the project will be continued after grant funds are expended.

252:4-13-11. Final written report

Applicants who are awarded environmental education grants under this subchapter shall submit a final written report, outlining accomplishments of the grant objectives and expenditures on or before December 15 following the award.

252:4-13-12. Shared strategies

Strategies from applicants who are awarded environmental education grants under this subchapter will become the property of the Environmental Quality Education Committee and may be shared with other interested environmental educators.

SUBCHAPTER 15. LOCAL PROJECT FUNDING

252:4-15-1. Purpose, authority and applicability

(a) Purpose. The purpose of this Subchapter is to implement Executive Order 98-37, mandating state agencies to establish criteria for local project funding contracts.

(b) Authority. This subchapter is adopted pursuant to 75 O.S. § 302, 27A O.S. § 2-2-101 and Executive Order 98-37.

(c) Applicability. The rules in this Subchapter apply to any private entity, political subdivision, and unit of local government, including municipal and county governments and school districts.

252:4-15-2. Criteria

(a) The DEQ will consider the following criteria in determining funding priorities for local projects:

(1) Criteria established by relevant statutory authority; and

(2) Criteria established by rules adopted for the specific Division pursuant to relevant statutory authority.

(b) If relevant statutory authority and program-specific rules do

not establish criteria, the DEQ will consider the following in determining funding priorities for local projects:

- (1) Potential of the project to effectively promote environmental health and safety or environmental education and awareness;
- (2) Potential to enhance related programs or efforts by the recipient;
- (3) Number of persons benefitted; and
- (4) Equitable geographic distribution.

252:4-15-3. Proposals

(a) The applicant must submit a proposal in accordance with the rules implementing the statutory program and/or forms provided by the DEQ.

(b) Proposals must demonstrate that the proposed project will implement and be consistent with relevant statutes and rules of the specific program area.

252:4-15-4. Funding

Within the priority criteria, funds shall be granted on a first-come first-served basis until funds are depleted.

APPENDIX C. PERMITTING PROCESS SUMMARY [NEW]

Steps	Tier I	Tier II	Tier III
Filing - Applicant files application, pays any required fee, and provides landowner notice. Applicant may meet with the DEQ staff prior to this.	Yes	Yes	Yes
Notice of filing - Applicant publishes notice in one newspaper local to site.	No	Yes	Yes
Process meeting - Notice - 30-day opportunity is published with notice of filing. DEQ holds meeting if requested and sufficient interest is shown.	No	No	Yes
Administrative completeness review - DEQ reviews application and asks applicant to supply any missing information.	Yes	Yes	Yes
Technical review - DEQ reviews application for technical compliance and requests applicant to cure any deficiencies.	Yes	Yes	Yes
Draft permit or draft denial - DEQ prepares this after completing review.	No	Yes	Yes
Notice of draft permit, public comment period and public meeting request opportunity - Applicant publishes this in one newspaper local to site. (DEQ publishes notice of draft denial.)	No	Yes	Yes
Public comment period - 45 days for hazardous waste treatment, storage or disposal draft permits; 30 days for all others.	No	Yes	Yes
Public meeting - Conducted by DEQ if held	No	Yes	Yes
Review of comments - DEQ (written response)	No	Yes	Yes
Proposed permit - DEQ prepares this in response to comments on draft permit	No	No	Yes
Notice of proposed permit - Applicant publishes, in one newspaper local to site, notice of 20-day opportunity to review permit and request administrative hearing.	No	No	Yes
Administrative permit hearing - Conducted by DEQ if held. Results in final order.	No	No	Yes
Issuance or denial - DEQ's final decision	Yes	Yes	Yes

BOARD BRIEFING PAPER
TITLE 252: DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 002. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY
EMERGENCY AND PERMANENT RULEMAKING

EXECUTIVE SUMMARY: This rule implements Section 2-1-201(C)(4) of the Uniform Environmental Permitting Act, 27A O.S.Supp. 1995, § 2-14-101 et seq. It is proposed as OAC 252:002-15-28, the Subchapter in which all the uniform permitting rules will be codified after promulgation. This rule specifies the positions to which the Executive Director may delegate the power and authority to issue, renew, amend, modify and deny permits, certifications, licenses and take other authorization or registration action based on Tier I and Tier II applications.

STATUTORY AUTHORITY: 27A O.S.Supp. 1993, § 2-1-101 and 27A O.S.Supp. 1995, § 2-14-201.

COMPARISON WITH FEDERAL REQUIREMENTS. No corresponding federal requirements exist; therefore, no economic impact/environmental benefit statement is required.

PUBLIC PARTICIPATION. Notice of opportunity to submit written comments was published on August 1, 1995 for the period from August 1, 1995 through September 6, 1995, with a rulemaking hearing on September 6. Persons who requested notices of rulemaking were mailed notices on August 1, 1995.

COMMENTS: No comments were received during the public comment period and no one attended the hearing.

SUMMARY OF MAJOR AMENDMENTS IN RESPONSE TO COMMENTS RECEIVED: None

CORRECTIONS AND AMENDMENTS PROPOSED BY STAFF:

1. The effective date has been struck; as an emergency rule it will become effective on the date the Governor signs it.

(a) *Designated positions. Beginning November 15, 1995, the The Executive Director may delegate in writing....*

2. The Chapter and rule number for codification has been corrected.

~~252:10-3-70.~~ 252:002-15-28.

SUBCHAPTER 15. ENVIRONMENTAL PERMIT PROCESSING TIMES

252:2-15-28. Permit decision-making authority.

(a) Designated positions. The Executive Director may delegate in writing the power and duty to issue, renew, amend, modify and deny permits and take other authorization or registration action. Unless delegated to a Division Director by formal assignment or rule, the authority to act on Tier I applications shall be delegated to positions within each permitting program having technical supervisory responsibilities and, for local actions authorized by law, to environmental specialist positions held by the DEQ's local services representatives. The authority to act on emergency permits or Tier II applications shall be delegated to the Division Director of the applicable permitting division.

(b) Revision. The Executive Director may amend any delegation in writing.

COMMENT SUMMARY AND RESPONSE

AIR QUALITY TIER CLASSIFICATIONS OAC 252:002-15-40, 41 and 42

Comments regarding the air quality tiered permitting system were considered by the Air Quality Council at its meetings on October 17 and November 13, 1995.

Burn approval clarified in Tier I. A commenter pointed out that there are permissible open burning events for which approvals may be sought that are not considered emergencies. The Council concurred and in the October 17th hearing chose to remove the word "emergency" from the proposed listing.

Makes clear that existing facilities fall under Tier II when making major modifications to their facilities. Written as well as oral comments were received on whether to classify construction permits filed by existing facilities in Tier II or III. The Council elected to put them in Tier II.

Alternate emissions reduction as a permit omitted. A commenter pointed out that alternate emission reduction permits required by OAC 252:100-11 were not included in the tier classifications. These were intentionally left out. Proposed amendments pending before the Council makes these "authorizations" rather than "permits". The DEQ will thus handle them as modifications of the applicant's permit rather than as a separate permit.

Incinerators with potential to emit 100 tons per year classified as Tier III. Comments regarding the high degree of public concern about incinerators caused the Council to place these incinerators in Tier III regardless of whether they are proposed (new) or are existing facilities requesting to increase net emissions to 100 tons or more per year.

PSD sources placed in Tier III. After much discussion and many comments as to the advisability of Tier III processes, the Council elected to include in Tier III the 26 sources classified as PSD (Prevention of Significant Deterioration) facilities.

Actions involving only filing of plans or notice removed from classifications. Commenters pointed out that applicability determinations and asbestos renovation/demolition notifications do not require applications or DEQ approval. Consequently, the Council struck these from the Tier I rule.

Meaning of "significant [permit] modification" clarified. In response to questions about what a "significant modification" was, Council added a cross-reference to the existing definition in Subchapter 8 of the air quality rules.

COMMENT SUMMARY AND RESPONSE
HAZARDOUS WASTE MANAGEMENT TIER CLASSIFICATIONS
OAC 252:002-15-43, 44 and 45

Comments regarding the hazardous waste tiered permitting system were considered by the Hazardous Waste Management Advisory Council at its meetings on August 31 and November 9, 1995.

Modification descriptions clarified. One commenter suggested removing the terms "minor permit modification" and "major permit modification" and replacing these terms with the appropriate classification term, consistent with the federal hazardous waste rules (i.e., Class 1, 2 and 3). This was discussed during the Council meeting and the terms "minor permit modification" and "major permit modification" were recommended to be removed. As a result, the Council also recommends that these terms be removed from the definition section of the tiered rules which will come before the Board in January, 1996.

Requested increase in storage, treatment, disposal (including incineration) as permit modification category maintained at 50% or more level. Some commenters suggested that the levels of requested increases set at 50% or more in the Tier categories be lowered to 10% or 25%. Since the 50% action level is prescribed for Tier III by statute (Hazardous Waste Management Act), the Council made no change in the Tier III category for off-site facilities. The Council also elected to maintain the modification action level in Tier II at 50% for on-site facilities in the interest of consistency.

Expansion of administrative hearing opportunity declined. One commenter suggested that adjacent property owners and mineral interest owners should have the right to an administrative hearing prior to issuance of any facility permit. The Council did not elect to expand the administrative hearing opportunity beyond the grounds imposed by the Oklahoma Uniform Environmental Permitting Act.

Changing certain applications to higher tier classifications not recommended. Several commenters requested that some of the applications classified as Tier II be moved into Tier III. The Council chose to not move any application types from one Tier to another.

COMMENT SUMMARY AND RESPONSE
RULEMAKING HEARING ON PROPOSED SOLID WASTE TIER RULES

Comments regarding the solid waste tiered permitting system were considered by the Solid Waste Management Advisory Council at its meetings on August 29, and October 19, 1995.

Comment: There was concern yard waste composting facilities would require a permit under the Tiered system, yet they were exempted from permitting in the OAC 252:520 rules recently passed.

Response: OAC 252:002-15-55(3)(A) was modified to clarify that composting of yard waste would be done under a Tier I plan approval process.

Comment: There was concern that a new Transfer Station should not be permitted within a Tier I process.

Response: The Solid Waste Management Act currently allows Transfer Stations that are included within the County Commissioners' approved County Solid Waste Management Plan to be permitted without the typical public notification process required for other transfer station permits. This is because an approved County Solid Waste Management Plan is subject to public participation requirements at the local level. It is consistent with the statute to include such facilities under a Tier I approval process.

Comment: OAC 252:002-15-56(1)(C) only exempts on-site incinerators operated by hospitals, clinics, or laboratories or other similar facilities for incineration of infectious or pathological waste generated on-site. Does the Department intend to start regulating other facilities that burn solid waste on-site, such as grocery stores that burn cardboard?

Response: Neither the rules or statutes previously exempted such facilities from having to obtain a solid waste permit. However, the Waste Management Division has not historically permitted such facilities and concurs that there would be limited value added by issuing a second permit for on-site facilities permitted by Air Quality to burn their own nonhazardous wastes. Therefore, the Council elected to modify the language of OAC 252:002-15-56(1)(C) to exclude hospitals, clinics, laboratories or other similar facilities for incineration of infectious or pathological waste generated on-site and also other facilities that either operate under an Air Quality permit or an approved Solid Waste Management Plan.

Comment: OAC 252:002-15-55(2)(C) is unclear as to whether it allows a landfill to increase its permit boundary in increments less than 25% without public participation.

Response: The language of OAC 252:002-15-55(2)(C) has been modified to specifically prohibit expansion of permitted boundaries. Any expansion of a landfill permitted boundary will be handled within a Tier II process for on-site facilities or a Tier III process for off-site facilities.

Comment: There was concern that biomedical waste transfer stations which transfer closed containers of waste should not be permitted within a Tier I process.

Response: Within the normal course of transportation there may be a need for a facility, which may in fact be only a truck or trailer, that receives sealed containers of biomedical waste from smaller collection vehicles. Although this meets the technical definition of a transfer facility, it poses minimum risks and was determined appropriate by the Council as a Tier I permit.

COMMENT SUMMARY AND RESPONSE
RULEMAKING HEARING ON PROPOSED WATER QUALITY TIER RULES

Comment 1.

In looking at 252:002-70(b) and (c), I see a sequential procedure with a maximum period of 60 days for an administrative review plus a technical review period. Later, 252:002-15-75(1) and (3) define the technical review period as 180 days for discharge permits and industrial wastewater construction permits. Collectively, it appears to me that the process could take up to 240 days to complete; however 252:615-3-31(e) (1) requires a submittal of plans at least 120 days prior to ". . . *initiating on-site construction or modification of any new or existing surface impoundment. . .*" Accordingly, a project manager could be four (4) months into construction before a permit is issued. Similar language is found in 252:605-3-43(a). This section recommends construction plans be submitted 120 days "prior to *initiating on-site construction of any new [industrial] wastewater disposal system. . .*" Yet again, 252:655-3-31(f) states, "An application for a construction permit *should be filed with sufficient lead time before the proposed commencement of a construction requiring a permit. Usually, sixty (60) days should be considered sufficient lead time*" (emphasis mine). A review of 252:002-15-75(7) shows a water pollution control permit technical review could take 90 days, for a total review period of 180 days.

I suggest some agreement between the documents would be helpful to project managers applying for permits under the new rule. The timing recommendations and requirements need to reflect the timing as given in either the specific rules or the SUPER DEQ Permitting Proposed Rules. If the timing is only a recommendation as indicated by the nonmandatory language of some of the rules, I would suggest these sections be omitted and let the Proposed Rule set the standard.

Response 1.

The timelines you referenced in 252:002-70(b)&(c) and 252:002-15-75(1)&(3) are time burdens placed on the DEQ for maximum review periods. The timelines referenced in 252:615-3-31(e) (1), 252:605-3-43(a), and 252:655-3-31(f) are time constraints or recommended lead times for the applicant's submittal of an application. The applicant timelines do not expand the total time for an application review but merely require or suggest a certain lead time for submittal of the application by the applicant. The DEQ's time review period begins to run when the applicant submits its application and the two time periods, DEQ's and the applicant's, run concurrently. However, the DEQ does agree there may be some confusion and will provide a cross reference in the program rules to the sections in Uniform Permitting Rules that set out the timelines for the DEQ.

Comment 2.

I noticed in 252:002-15-61 that an individual water well construction certification is considered a Tier I application and subject to the requirements of the act. This does not appear to be an "Issuance or denial" situation as shown on TABLE 15A of the act since 252:625-19-5(a) states the DEQ will only issue a report "that the private individual water well appears to comply with the construction guidelines set forth in the Standards for Individual Water Wells, State of Oklahoma Department of Health, Bulletin #0585, May, 1984." The table and the Tier I procedures imply that an approval is given when actually only an opinion is given via a report.

I suggest omitting this and other similar actions from the Tier I applications found in 252:002-15-61. In my opinion, it appears the DEQ does not actually approve actions or future conduct as implied by the act.

Response 2.

The DEQ agrees that an individual water well construction certification is not subject to DEQ approval and is not subject to the requirements of the Uniform Permitting Act. Therefore, we will recommend the Water Quality Council omit line 49 item (12) from the list of Tier 1 applications at 252:002-15-61.

Tulsa, OK

October 17, 1995

3:40 o'clock p.m.

THE SECRETARY: Mayor Taron?

MAYOR TARON: Here.

THE SECRETARY: Mr. Branecky?

MR BRANECKY: Here.

THE SECRETARY: Ms. Hinkle?

MS. HINKLE: Here.

THE SECRETARY: Mr. Fishback?

MR. FISHBACK: Here.

THE SECRETARY: Mr. Glass is on the phone.

Mr. Breisch?

MR. BREISCH: Here.

THE SECRETARY: And for the record, absent are

Dr. Canter,

Ms. Slagell, and Mr. Albright.

THE CHAIRMAN: Okay. I need a motion for the approval of the minutes of the August 15th meeting.

MR. BRANECKY: I have a question on that. Page 4 under comments. It says under the present system all Title 5 permits to be in Tier 3 and after the adoption of the tier system, Title 5 operating permits to be changed to Tier 3 --

COURT REPORTER: I'm sorry, sir. I cannot hear you.

MR. BRANECKY: Oh, I'm sorry. Under the present system, all of the Title 5 permits will be in Tier 3. And after the adoption of the tier system in Title 5, all permits change to Tier 2. It didn't make sense. Under the present system, we don't have any tiers. I guess that statement -- I don't know. Is that what Dennis said or not?

MR. BYRUM: I really don't -- I really don't recall what we were discussing there either. I'd have to go back and look at it.

Myrna, do you remember?

THE SECRETARY: No, sir, I don't.

MR. BYRUM: We'll take that under advisement.

MR. BRANECKY: Okay.

MR. CHAIRMAN: Go back to the tapes and see what it said exactly.

MR. BRANECKY: Well, with that I move that the minutes be approved.

MAYOR TARON: That's a second.

MR. CHAIRMAN: Second?

MAYOR TARON: Yes, second.

THE CHAIRMAN: Okay. With the one I am taking under advisement, we'll call the roll for the approval

of the minutes.

THE SECRETARY: Mayor Taron?

MAYOR TARON: Aye.

THE SECRETARY: Mr. Branecky?

MR. BRANECKY: Aye.

THE SECRETARY: Ms. Hinkle?

MS. HINKLE: Aye.

THE SECRETARY: Mr. Fishback?

MR. FISHBACK: Aye.

THE SECRETARY: Mr. Breisch?

THE CHAIRMAN: Aye.

Okay. We'll move on to Item 4 on the public hearing. Larry Byrum will act as protocol officer.

Larry.

MR. BYRUM: Ladies and gentlemen: My name is Larry Byrum. I'm the Director of the Air Quality Division. As such, I will act as the protocol officer for this hearing. This hearing is convened by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act, Title 40 of the Code of Federal Regulations, Part 51, as well as the authority of Title 63 of Oklahoma Statutes Sections 1, 1801 and following.

This hearing was advertised in the Oklahoma Register for purposes of receiving comments pertaining

to the proposed revisions of the Oklahoma Administrative Code 252:010. If you wish to make a statement on this particular issue, please complete the form with the registration table, and you will be called upon at the appropriate time.

At this time I would like to call upon Mrs. Kay York of our legal staff to give the staff position on these proposed changes.

Mrs. York.

MS. YORK: On the tier classifications for Air Quality that is part of the overall permitting program implementation that was authorized by the Oklahoma environmental -- uniform environmental permitting act this past year.

I would like to present the Rule 252:001-15-40 Tier 1 classification. This is on page 9 and 10 of your uniform rules.

Rule 252:002-15-41, air quality applications, Tier 2. And rule 252:002--15-42, air quality applications, Tier 3.

Based on comments that have been received by this department, and on behalf of the council, I would like to propose that the council consider approving and recommending to the Board for adoption Rule 002-15-40, Tier 1 applications, with the following changes.

On line 46, Number 8, which now reads "emergency burn approval." Strike through "emergency" and capitalize the "B" on "burn." As amended, it would read Number 8, "burn approval."

Line 47, Number 9. Two choices of two amendments.

One is to remove Item Number 9, which is asbestos renovation, slash, demolition approval and renumber accordingly thereafter. Or to change the word "approval" to "notification" and leave it as Number 9.

THE CHAIRMAN: Kay, do you want us to take action item for item as you read them? Would that be better?

MS. YORK: Yes. And it would be best if you allow time for public comments before you took action on each rule.

And also for comments from the council.

MR. BYRUM: We have before us the language that Ms. York has proposed at 252:15 -- 252:002-15-41, Item Number 8, changing -- adopting the word "emergency" and capitalizing the word "burn," and then the two options that were for Item Number 9, either the total deletion or the change of the approval to notification.

Is there anyone who wishes to comment on those particular issues? I have an indication that B.J.

Medley, Nadene Barton, and Ron Truelove may wish to speak to these issues. Do any one of the three of you wish to speak to these particular issues -- this particular issue?

Ron.

MR. TRUELOVE: My name is Ron Truelove. I represent the Environmental Federation of Oklahoma. And we support the removal of the word "emergency" to make line 46 read "burn approval." And we support completely deleting line 47, which will be Number 9, asbestos renovation and demolition approval. And then renumbering the remaining list of applications. This would be consistent with current requirements under state rules and federal rules.

MR. BYRUM: Ms. Coleman.

MS. COLEMAN: I'm Nancy Coleman representing Tinker Air Force Base. Based on our previously submitted written comments, we would support the change in line 46 to remove the word "emergency" and the deletion of item 9 and renumbering of the remaining items.

MR. BYRUM: Ms. Medley, you have indicated you may wish to speak to this.

MS. MEDLEY: My name is B.J. Medley with Earth Concerns, and we are accepting of the changes on line 46

and 47.

MR. BYRUM: I don't believe that -- I don't see Ms. Barton present.

MS. MEDLEY: She has left.

MR. BYRUM: Okay. Is there anyone else who wishes to speak to this issue?

(No audible response.)

MR. BYRUM: Mr. Chairman, no one else wishes to speak to this issue.

THE CHAIRMAN: I would like to take the vote on those items now or other items in Tier 1 that you deem necessary.

MR. BRANECKY: Do we need to make a motion since you gave us two options on the item Number 9?

MAYOR TARON: Yes. What is the motion?

THE CHAIRMAN: Well, your motion would be up to you. I would suggest that the motion is as recommended by the audience.

MR. BRANECKY: Okay. So I move that Section 252:002-15-40 be amended by line 46, Item 8, striking the word "emergency" and capping or capitalizing "B" in the word "burn" and striking line 47, Item Number 9, asbestos renovation/demolition approval, and renumbering the subsequent items.

MAYOR TARON: I second that motion.

THE CHAIRMAN: We've got a motion and a second. Any further discussion?

Myrna, will you call the roll on that item.

THE SECRETARY: Mayor Taron?

MAYOR TARON: Yes.

THE SECRETARY: Mr. Branecky?

MR. BRANECKY: Aye.

THE SECRETARY: Ms. Hinkle?

MS. HINKLE: Aye.

THE SECRETARY: Mr. Fishback?

MR. FISHBACK: Aye.

THE SECRETARY: Mr. Glass?

MR. GLASS: Aye.

THE SECRETARY: Mr. Breisch?

THE CHAIRMAN: Aye.

MR. BYRUM: Continuing on, I would again call on Kay.

MS. YORK: On Rule 002-15-41.

Bill, I believe that we should probably take these one at a time. And I will begin with Number 3, on line 10: significant modification of a major facilities construction or operating permit.

Based on comments received by the department and on behalf of the council, the department recommends that you consider the following amendment: On line 10,

after the word "modification" and before the word "of" insert as defined in OAC-252:100-8-8(e)(2). Also that the words "construction or" be marked through so that lines 10 and 11 read "Number 3, significant modification as defined in OAC 252:100-8-8(e)(2) of a major facilities operating permit."

Bill, if you want to have me read all of them, or if you want to act on one at a time?

THE CHAIRMAN: I would like to go through all the Tier 2 changes, if it's all right with the council.

MS. YORK: Okay.

MR. FISHBACK: If that be the case, we have a proposed change in Number 1.

MS. YORK: Yes, sir, we do. I'll save those for the last. Okay?

MR. FISHBACK: Okay.

MS. YORK: Number 5. This is on line 13 and 14 of 15-41. Rather than starting the phrase with the word "extension" add the word "time" before it. So that it reads "time extension." The small "e" on extension of a major facilities construction permit with -- add the word "a," strike through "significant" modification, and add these words: "That would otherwise be subject to public review." I will read that as it is recommended. Number 5 on lines 13, 14 would read: "Time extension of

a major facilities construction permit with a modification that would otherwise be subject to public review."

Based on a recommendation that we have for Tier 3, a corresponding amendment of Tier 2 would be necessary. This would be added on line 18. It would be a new Number 8, and it would read: "A construction permit for a major modification to an existing major facility."

"A construction permit for a major modification to an existing major facility."

Those are the issues, Bill, that do not -- that are not related to the commercial incinerator question. And if there -- if you want me to go on then to the commercial incinerator, I will do my best to reflect what has been suggested.

THE CHAIRMAN: Please do.

MR. YORK: Number 1. Based on comments received from the public and from the council, council has indicated it will consider amending Number 1 without the underlined words, accepting it without the underlined words. "Or commercial incinerator" would be taken out, so that it reads: "Operating permits for a major facility issued after the construction permit which differs from the construction permit in a manner

which subjects the operating permit application to public review." Corresponding change to Number 7: "The major modification of construction for operating permit."

That's not right.

MR. BYRUM: Excuse me?

MS. YORK: That's not right. May I ask you to hold off on Number 7.

If we remove the references to commercial incinerator, then we will need to remove Number 7 totally.

MR. BYRUM: Agreed.

MS. YORK: So the references to incinerators would be, number one, to remove the words "or commercial incinerator" on lines 4 and 5, strike through Number 7 totally -- which would be lines 16 and 17 -- and renumber on line 18 our new section as 7.

MR. BYRUM: Questions for Kay from council?

MR. FISHBACK: Where is the item in line 7 otherwise covered?

If we delete "for the commercial incinerator" on line 17?

MS. YORK: We would remove all of 7, because the modification of a construction or operating permit is otherwise covered for all other facilities. Number 7

was bringing out commercial incinerators and making them subject to Tier 2 for their major modifications, regardless of whether they were minor or major.

MR. FISHBACK: Well, that wasn't my question. Where is it otherwise covered?

MR. YORK: If it's in part 70, it would be covered in the significant modification, in Tier 2. If it is a nonpart of 70, it would be in Tier 1.

MR. DOUGHTY: Item 3, Kay, I believe is where that is covered.

MR. BYRUM: Sure.

MR. FISHBACK: I was looking for identical wording and didn't find it. That's cause we're using "significant" in one case and "major" in another.

MS. YORK: Okay.

MR. FISHBACK: Okay.

MR. BYRUM: That was Dennis Doughty over here on the staff.

Please be sure to identify yourselves for the record.

MS. YORK: So it would be covered in Number 3 under Tier 2.

MS. HINKLE: Could you -- as in Number 5 on Tier 1. Whether it be Kay or someone else, could you -- someone -- restate for me, briefly, two arguments here,

which I think I understand. Not treating incinerators any differently than anything else, but then there was a reason why it was put here to begin with. And so --

MS. BYRUM: Basically -- if I could do that for you, the reason is because commercial incinerators typically are an issue that is highly visible, has a lot of public interest. And we did that to cause them to go through the public scrutiny that we believe the public was -- is asking for in that area. However, I -- and we added that as a -- simply because of experiences we've had with incinerators.

MS. HINKLE: And the reason we're deciding, perhaps, today to leave that is we've decided that some of the thinking is that --

MR. BYRUM: I think that -- I think the major problem was defining all the incinerators that are out there, whether it be the backyard incinerators, whether it be the medical waste incinerator, whether it be a commercial hazardous waste incinerator, or biomedical waste incinerator. All the issues and all the various incinerators, we couldn't cover them with the word "commercial."

MR. FISHBACK: The other aspect, too, I believe, was that it is more important to characterize the source in terms of its emissions than in terms of

its source category. So you don't want to give preferential treatment or the reverse of that, nonpreferential treatment, to one source category and not all.

MR. BYRUM: Other questions for Kay from the council?

Since I don't know -- the way we're doing this, I don't know if you want to talk to each one of these issues. I'm just going to call on you; and if you do, go ahead, and then the rest can raise their hands.

B.J.? No comment.

Ron?

MR. TRUELOVE: Again Ron Truelove, representing the Environmental Federation of Oklahoma. And without going through each one of these individually, we would support all of the changes that were identified. The only other change that we would add to this list of sources under Section 41 is the source that's currently listed as a Tier 3 source, which we haven't addressed yet, but that's listed as 15-42.

That particular source, the construction permit for a new major facility, under current rules would only go through the kind of public review that's outlined in the Tier 2 procedures. And therefore we think it more appropriately fits as an addition to the Tier 2 source

list. And that air quality permitting should not have Tier 3 applications.

Some other media permitting may warrant that Tier 3 approach. But EFO does not believe that air quality permitting should fall under -- any air quality permitting should fall under Tier 3. And all other requirements as they currently are should be fit into Tier 1 and Tier 2, because those two sets of tiers adequately cover everything that's currently required.

And I'll readdress that comment when we get to Tier 3, also. Thank you.

MR. BYRUM: Anyone else?

MR. NICHOLSON: Scott Nicholson with ECCI out of Enid. I'd like to concur with EFO's position on changing the Tier 3 up to Tier 2 and making the other changes that were discussed, dropping the commercial incinerators and making the other changes.

MR. BYRUM: Anyone else?

One more time. Anyone else wish to speak?

Mr. Chairman.

THE CHAIRMAN: We have language on items 1, 3, 5, let's see, 7, which was deleted, and 8, which we have made item 7. We have had a comment from the audience also to consider. I would entertain a motion on all of the ones that we have defined in new language or

deletion. Plus, if you desire to incorporate a change that was also asked for, then you can do so.

MR. BRANECKY: I guess it's my understanding, then, not having the Tier 3 category as additional requirements that currently do not exist for air quality permits. Am I right?

MS. YORK: That's what the legislature intended that to apply to the most complex and complicated applications.

MR. BRANECKY: Even though --

MS. YORK: The legislature has asked the councils and the Board to consider the following determinations, the following criteria, when making these decisions: the significance of potential impact of the type of activity on the environment; the amounts of volume and types of waste proposed to be accepted, stored, treated, disposed, discharged, emitted; the degree of public concern traditionally connected with the type of activity; the federal classification, if any, for such proposed activity, operation, or type of site or facility; and any other relevant factors.

If the legislature, when creating this process, created it with the intention that the Tier 3 process would be reserved for the most complex, the most complicated, and the most difficult permitting issues

that this department faces. Based on the emphasis that the federal government is putting on the Title 5, Part 70 sources, the department believes that this falls in that category and should fall into Tier 3 classification, for new sites that have never been permitted.

For existing sites, you have already talked about amending that to be in Tier 2. But for new sites which the public has not dealt with before, the department is proposing to put those into Tier 3, which (1) gives the public the right to meet with the department to find out where they can have meaningful input in the permitting process, and (2) that gives any member of the public who has environmental interest that may be detrimental -- detrimentally affected by the construction of the site to ask for or participate in an administrative hearing at the administrative level, that's presided over by the -- by an independent administrative law judge.

The advantage to applicants for having this proceeding available at the administrative level is that if the permit is issued and the public file an appeal, the record is limited to the issues that were in the administrative proceeding only. It is not a new trial where everything is opened.

On the other hand, the advantage to the public is that this allows them at less cost and in a more timely manner to litigate the issues that they truly believe need to be taken into consideration that the department did not take into consideration when the decision was made to prepare the proposed permit.

THE CHAIRMAN: I understand completely. And that's a joke, because I don't understand a word you said. Kay, in simple terms, are you saying that the items which we discussed before Ron made his comment are in concert with the legislative action that we're supposed to take?

MS. YORK: Change is before --

THE CHAIRMAN: Okay. How about Ron's comment?

MS. YORK: To leave all air quality permitting out of Tier 3, that is not within the intent of the legislature. And I don't believe it's within the intent of the Board.

MS. HINKLE: Okay. So these changes involving Tier 2 you believe are to follow the intent of the legislation and the Board, but what we just discussed with Tier 3 does not?

MS. YORK: That's right.

MR. FISHBACK: Do I make a motion that we consider them separately?

MR. BYRUM: We have a couple of people that wish to comment maybe before we get there.

B.J., raised your hand first.

MS. MEDLEY: B.J. Madley, Earth Concerns.

I appreciate what Kay had to say, and I think if the corporate people take a note of one of things she said, the advantage to you is that if we are unhappy with the new permit and administrative hearing is held and then we get ruled against and we go on to court, the only thing we can deal with are the items in the administrative hearing. Obviously, that somewhat cramps our style but at least puts you in the administrative position, and that's opening the door in other areas.

But the biggest thing she said is the fact that we can go into an administrative hearing with minimal funds, and the biggest problem we have in this state is none of us environmentalists have any money. And we don't have a big, you know, money pot somewhere where we're able to draw from to do a lot of lawsuits. And so the administrative hearing process is our only potential way to get, you know, an independent -- and I put that in quotes -- person to review both sides and make a decision.

And I think we've seen many people in this state, you know, spend an awful lot money dealing with,

you know, fighting a big company and losing everything. You know, I've got a couple of lawsuits going personally, and I'm in debt for \$25,000 so far. I mean -- and I don't make the kind of money to do that. And I say this not to go cry and moan and help me get my kid through college, but what I mean, it's a tough situation; it's very expensive, and no one pays for this but me. I mean, we don't have a bunch of people and funds to do that. We don't have a bunch of big groups with money.

So it gives the ability to at least have a way. Then if we lose there, then we've got to make a decision if we can get the money. But it gives that one more step. And I think for Oklahoma to make use of this, I think you'll get a better benefit from the public knowing that that's there if they need it.

And whether we'll use it or not, I don't know. But I really think the public will feel better about it and I think it's -- we've just seen too often where we've not had any other place to go except to court, and it's awfully expensive to do that. And I know some of these companies love that because there's times we wanted to sue and we can't because we don't have the ability to.

MS. YORK: May I also bring up something. I

think Dennis Doughty would be in better position to describe this. The Title 5 requires a permit to be appealable.

MR. DOUGHTY: Subject to judicial review is what it says, Kay.

So that -- well, I was going to add this, that under the Clean Air Act, before it was amended recently, all Title 5 permits would have been a Tier 3 review. And strange as it may seem, there was a lot of concurrence by both industry and the public that this was the way that it could best be facilitated because -- well, in the first place, most of your controversy is going to be settled at the public meeting forum. And they bring everything at that forum and settle most issues, except those that we're just at loggerheads about. And then you go to administrative hearing where you in an administrative forum, where it's a lot cheaper and where people like B. J. can come in and have it heard before an ALJ that's used to hearing these sort of things, familiar with the issues.

And then the appeal is on the record. And when you go to district court as opposed to having a whole brand new trial. And having talked to people in Texas and the way they run their program down there, any permit was subject to a hearing. And where they had

their hearings -- where their appeal was on the record, there was very little change or no change by the district courts. Most of the -- most of the determinations at the department level were upheld.

And any of you that's ever been in court on environmental issues may think you know what the result's going to be, but I guarantee you, you really don't know how the Judge is going to see things.

So I just thought I'd add that bit. And so actually as opposed to what the old Clean Air Act was, you only have one instance now where you can have a Tier 3 as opposed to everything under Title 5, previously.

MR. BYRUM: I believe Ms. Perry wanted to speak.

MS. PERRY: Yeah. Debbie Perry from Enterprise Services. What I was going to say is if the true intention of the statute is to address the most environmentally significant courses under Tier 3, it seems like the direction that we had earlier today with the commercial incinerators, although it's very difficult in defining those, those really are the most significant sources that we deal with in the state.

Hazardous waste incinerators, commercial incinerators, and possibly commercial biomedical incinerators seem to me the ones that could possibly be

in Tier 3, much more than necessarily just a Title 5 source of any kind.

MR. BYRUM: Ron, did you -- okay.

MR. TRUELOVE: I want to make sure that I understand this "major" -- kind of like the same line Bill was talking about -- "major" can still be mighty small. The NESHAPs for the chrome platers, for this instance, makes all of them, I believe, subject to the Title 5 permitting. And those can be mighty small facilities.

The state has been dealing with some of the foundry associations. Let me tell you, those are -- those aren't too much bigger than just a few people in some cases. So major facility doesn't mean it's a very complex facility at all. And maybe the balance that you can strike, somehow, is not just all of the Title 5 facilities, cause that can get mighty small; if you realize it.

So maybe some balance above that. The commercial hazardous waste incinerators is obviously, I think, one that might be a controversial -- those are going to be caught under Tier 3 under the hazardous waste tier permitting anyways. I mean, you can assume other factors as I understood Kay to say. But just making it open to all Title 5 facilities is going to be,

I think, too big.

MR. FISHBACK: I would disagree with Debbie's statement that incinerators or commercial incinerators are the most environmentally significant. They may be the most controversial and they may have the highest public visibility, but there are many other major sources that I can think of that have a more significant impact than incinerators. Because as Mr. Doughty said earlier, they're very tightly regulated and the emissions from incinerators are very small.

So I think we have to distinguish between environmentally significant and controversial.

MR. BYRUM: Are there people who wish to speak?

MS. MEDLEY: Are we moved down now to 42? Because I do have comments.

THE CHAIRMAN: No. No.

MS. MEDLEY: Okay. Well, I'm just trying -- I'm just saying I don't think 42 should go into 41. And I'm assuming that's what you're getting ready to vote on. And I would like to comment on 42 once we get there, after you not approve moving 42 to 41.

MR. BYRUM: So noted.

With that, I hear no one else wishing to speak on this particular issue.

1711

Mr. Chairman.

THE CHAIRMAN: I'll entertain a motion.

MR. FISHBACK: I would make a motion that -- is it subchapter or subsection 41?

MS. YORK: Section 41.

MR. FISHBACK: Section 41. I would make a motion that Section 41 be modified, and I don't know if you want to read all that again -- as we've discussed here, with the exception of moving 42 -- Section 42 statement into 41. In other words, all the other things that we talked about: I make a motion that we adopt those recommendations that you read separately from that. In other words, Section 41 Number 1, Section 41 Number 3, 5.

MS. YORK: Delete 7.

MR. FISHBACK: Delete 7.

MS. YORK: And add in a new 7.

MR. FISHBACK: And add in a new 7 and leave 42 alone for now. In my current motion.

MR. GLASS: Second.

THE CHAIRMAN: Okay. I have a motion and a second. Any further discussion or comments on this? If not, Myrna, will you call the roll?

THE SECRETARY: Mayor Taron?

MAYOR TARON: Aye.

THE SECRETARY: Mr. Branecky?

MR. BRANECKY: Aye.

THE SECRETARY: Ms. Hinkle?

MS. HINKLE: Aye.

THE SECRETARY: Mr. Fishback?

MR. FISHBACK: Aye.

THE SECRETARY: Mr. Glass?

MR. GLASS: Aye.

THE SECRETARY: Mr. Breisch?

THE CHAIRMAN: Aye.

MR. BYRUM: Moving on to Section 252:002-15-42. Kay.

THE CHAIRMAN: 43. Oh, I'm sorry; you're right

MR BYRUM: 42.

MS. YORK: Based on comments received by the public and the council and on behalf of the council, the department recommends that council consider the following amendment: To 252:002-15-42, lines 20 and 21 of this document, to strike through the words "or existing." So that it reads: A construction permit for a new major facility. To strike through the words "or commercial incinerator." So that it reads: A construction permit for a new major facility requires a Tier 3 application. For a new -- did I say new? New

major facility.

MR. BYRUM: Questions for the council?

MS. HINKLE: Would you read that again.

MS. YORK: Yes, ma'am.

MS. HINKLE: The whole sentence.

MS. YORK: The way it would be amended: "A construction permit for a new major facility requires a Tier 3 application." And that is defined as part 70 sources.

MR. BYRUM: Additional questions from the council?

Questions from the audience? Discussion?

MS. MEDLEY: Comments.

MR. BYRUM: B.J.

MS. MEDLEY: B.J. Medley, ECO. I approve leaving this in Tier 3, but I disapprove of taking out the incinerator. I appreciate what Mr. Oxford was trying to do. I understand the problem there; and I think for the benefit of our discussions earlier, I would at least say leave in "or commercial incinerator."

I state this for two reasons. One is: You are correct, the problem on incineration is not strictly the air emissions which really, I think, are higher than we all say they are. Okay. But is the major public concern regards incineration. And I think if I was

1 reading this as a layman -- and I don't consider myself
2 quite a layman -- but if I subsist and had a copy of
3 this and had an incineration situation occurring
4 potentially near me and saw there was nothing in there
5 about that, I might think it was never, you know, not
6 even covered.

7 So I would like to see it in there. I think it
8 is a hot issue when it comes to the public. I mean, I
9 can't tell you all the calls I get. I'm right in the
10 middle of, you know, the blue circle permit thing right
11 now, because people, you know, are preparing for
12 incineration of even nonhazardous waste, much less the
13 potential for biomed or hazardous. So I think we've got
14 to consider those situations again.

15 You now, one of the things I keep preaching to
16 some of the corporate people that I talk to a lot is,
17 you know, the more open we can be and the more
18 advantages we can give the public to at least review,
19 the easier it's going to be to communicate when we go to
20 public meetings and deal with these things. And I think
21 that's such a hot issue that if we're going to put it
22 in, I think we're just better off, and I would feel more
23 comfortable doing that

24 MR. NICHOLSON: Scott Nicholson with ECCI I
25 just want to make the comment one more time. I think

9/11

the definition of major facility in some cases is so small that we're going to detrimentally impact some of our businesses who are trying to meet market demands. Out there in the streets, we have certain segments, certain industry segments, that are growing in response to demand, and the thresholds for these major facilities -- the ten tons per year, for the HAP and 25 combined is not a significant enough threshold to warrant a Tier 3 approach to these facilities.

The wood industry right now in some segments is growing very fast in furniture manufacturing; and they'll cross the 10-ton, 25-ton threshold real quick. And we're going to hurt that segment of Oklahoma industry. We need to consider a higher threshold.

MR. BYRUM: Other comments?

MR. TRUELOVE: Ron Truelove again, with the Environmental Federation of Oklahoma. And I just want to -- without restating all the words -- say that the comment with respect to the Tier 2 list what I suggested moving Tier 3 up to Tier 2. I want that for the record under this Tier 3 discussion. And as an example to what the gentleman just talked about regarding relatively small sources, a dry cleaning operation would be a major facility.

That if mom and pop wanted to build a dry

cleaner, they would be potentially subject to the Tier 3 requirements, which appear to be pretty onerous and definitely are in addition to existing requirements. And I strongly recommend the council weigh all those things very heavily and even consider tabling this particular approval item until potentially a special meeting could be called and would give the council, specific council members, staff members, representatives from the environmental community, representatives from industry a chance to meet and discuss specifically what ought to be in Tier 3.

As Kay read the intent of the legislature, it seemed to me the intent was to consider all of those things, not that necessarily would an application or would a permit have to be forced into a particular category. And I think there are things that potentially may, may fit this particular category; but the all-inclusive term "major facility" can mean such small operations that could really hamper a new company and new industries who are located in Oklahoma. And I would like that stated for the record.

THE CHAIRMAN: Ron, when do you believe your fears would be realized?

MR. TRUELOVE: When do I believe that would be realized?

THE CHAIRMAN: Uh-huh.

MR. TRUELOVE: If you've got -- if you're wanting to locate to a community where you -- I know of a couple instances where people are concerned in an abnormal fashion more in the area of wanting to fight anything regardless of the logic, regardless of science. And it gives the opportunity -- I appreciate what B.J. had to say. And communication is vital, tremendously vital to any of the permit processes. And you have in many cases people who will absorb that good science, understand it, and move forward with working with a company to achieve what's best for the environment as well as the economy.

But I've had personal experience -- and I can't reveal particular people -- but I've had personal experience where good science and logic is thrown out and the particular citizenry were looking to make a buck, basically. And that -- and they use the process to their advantage.

And I don't want to see a process which can abnormally hamper things beyond what should be done.

MR. CHAIRMAN: Okay. Really my question also is asking what time frame? Six months from now, a year from now, or when certain permit applications are submitted? When?

MR. TRUELOVE: When what?

THE CHAIRMAN: When? What time? Six months from now, a year from now? When do you think these things would come about?

MR. TRUELOVE: Oh, it's the construction of new major facilities.

THE CHAIRMAN: Okay. Do you believe --

MR. BYRUM: It would be after Title 5 approval.

THE CHAIRMAN: Sir?

MR. BYRUM: It would be after Title 5 approval.

THE CHAIRMAN: Do you believe then that people that would be affected could come to this council and ask for modification of this rule?

MR. TRUELOVE: Sure.

THE CHAIRMAN: Okay. That's what I would like to see. I would like to get this rule on the books and then let the people come. We'll modify it, if there's reason to. And I think all the council -- we've done it before -- I think all the council agrees to this.

MR. BRANECKY: Well, I think there's sufficient concern from the public that we do need to look at this. If there's -- if we don't have -- we do have a choice, though. We don't have to act on this today.

THE CHAIRMAN: I would like to hear some

5/11

reason that's really a good reason not to have it on the table.

MR. FISHBACK: Well, I mean -- can anybody on the staff or anyone give an estimate of the amount of time, the amount of additional time that a Tier 3 application would take versus a Tier 2?

MS. YORK: The process meeting is done in conjunction with the administrative completeness review. So that does not take any additional time. The putting in application -- turning a draft permit into a proposed permit and putting it out for public review takes 28 additional days for public review.

At the end of that time, if an administrative hearing is not requested, the permit would issue as is. If an administrative hearing is requested, we would go into the administrative hearing procedures. I am -- I manage that office of administrative hearings, and we have had a few administrative hearings in the solid waste area to date.

Their law has required that since 1990. And we have had a few of the administrative hearings.

We have had -- we have had them range all the way from one day to two months, with regard to how fast the attorneys work getting information back and getting it rescheduled before the administrative law judge. The

administrative law judge comes to the department once a month, and we schedule things during, during his time there. We schedule the proceedings and take additional days if we need to.

I've never had a hearing, evidentiary hearing, last more than three hours. Getting to that, where we do allow discovery, a discovery has never been taken advantage of, by the way. If it is, you call for it; but there has never been any discovery that has occurred.

MR. FISHBACK: And the important time frame is not the actual deliberation time but the elapsed time?

MR. YORK: Yes.

MR. FISHBACK: The delay that's incurred by the applicant --

MS. YORK: The attorneys.

MR. FISHBACK: -- getting the source.

MS. YORK: And I -- and when I managed the proceeding themselves, I give deadlines even though through the rules, there are no deadlines. The only deadline that's there is in the statute, and it requires that the first hearing be set within 60 days of having received the request.

I might point out that under the current law, the air quality -- the contested case hearing that is

available to Title 5 permits are limited -- are not limited to new science, but they are subject to those under -- for existing science and modifications as well and renewals. This would not include renewals nor modifications. And that the department has the right to stay issuance of any permit based on contested case proceeding request. And that contested case also is before the department and would go under the same procedure as the administrative hearing.

So in a way, the air quality applicants are actually having less possibility of administrative proceedings than more, under the current air quality law that pertains to renewals and modifications of existing permits, not just to new unpermitted sites.

MR. HYRUM: I think Dennis may have something to say.

MR. DOUGHTY: Just for the sake of clarification based on some of the comments. My impression was that this Tier 3 was to apply only to new constructions where there was a siting issue not a source that was once minor and became a major. Now, if I'm wrong, somebody tell me.

Kay, do you know?

MS. YORK: This is for new nonexisting sites. So if they are a minor facility, and they have to have a

Title 5 permit, they are still an existing site and would fall under Tier 2 with the requirements.

MR. DOUGHTY: So we're just talking new construction.

MS. MARTIN: Kathy Martin, DEQ Customer Assistance Program. I worked on the dry cleaner NESHAP and I would just like to reiterate what Ron Truelove said and probably what Scott Nicholson was bringing up is that NESHAPS bring in a lot of small businesses. In the customer assistance program, we deal with a lot of small businesses that have never been regulated before.

For instance, a dry cleaner is triggered into a NESHAP just because they use perchloroethylene. There is hardly -- there is minimum amount. It's 180 gallons per year. And if you take this times 14 pounds per gallon as the density, you have 2500 pounds per year perc., okay.

Let's assume on a 100 percent volatilization, what you have is you have a major facility because of the NESHAP, with 2500 pounds per year emissions, as compared to a major facility due to just HAPS, which is 10 tons. Okay.

A tremendously different -- there's a wide disparage between 2500 pounds and 10 tons, obviously. So like Ron says, we're going to have a lot of small

facilities with very small emissions of hazardous air pollutants, granted; but they are operating as a major facility. But they are because of the unique definition. Because they're there as a NESHAP.

MS. PERRY: But they're still --

MS. MARTIN: -- because they're there as a NESHAP.

MS. PERRY: -- but they're still considered area sources --

THE COURT REPORTER: I'm sorry, but I can't write --

MS. MARTIN: So I have a solution.

I'm sorry, Debbie. But I think you may add to my solution.

The solution may be that it's a major facility, unless major solely because of a NESHAP would be a Tier 3 application. And that would get rid of all the small businesses.

MR. BYRUM: Debbie.

MS. PERRY: Debbie Perry. I was just going to respond to that. Those sources that are covered in the NESHAP that are not truly major are really not considered major sources. They are area sources, and let's look at the Title 5 permit. And they're also subject for NESHAP rules. But they are not considered a

major source, and they wouldn't necessarily fall under a Tier 3 rule.

MR. MARTIN: Well, that is not clear.

MR. BYRUM: I'd like to add something here. We also have provisions in the Oklahoma Act and the Federal Act for the Small Business Assistance Program, where the small business can go through that program and request a dispensation on any issue through the air quality council. For these businesses that are adversely affected by this particular rule, I think that's probably the best avenue for them to use.

They can petition the council for special exemptions, and those can be granted by the air quality council upon recommendation of the small business assistance program.

Kathy, I helped write the language. I'm sorry.

MS. MARTIN: It's not that I disagree with you, but I think that would be hundreds -- I'm sorry -- hundreds and hundreds of facilities that would be required to come in and get a special variance, when you could just eliminate them from Tier 3, keep them in Tier 2 or Tier 1, where they rightfully belong. By just making one --

MR. BYRUM: I think the council probably has the ability, as does the small business panel, to

recognize that a class of industry is affected and ask for one-time exemption.

MS. MARTIN: Okay. But once again, it would require them to get organized enough to come and ask for that; and I don't believe that's fair, when all of us here recognize that problem.

MS. YORK: May I suggest something? Bill, back to your original question as to what point in time is this going to make a difference. The Title 5 program is pending. Then we have a staggered submittal period over a five-year period of time.

This particular rule applies to applications that would be filed by new applicants for new sites that have never been permitted or not in existence, and they would apply the applications like those that were filed after July 1, 1996.

So the essence of this is that it is not going to take place immediately. But we are under a statutory deadline to make these approval -- approve and recommend to the Board and for the Board to make its adoption.

It would be my suggestion that perhaps some thought be given to modify the definition for major facility. That would eliminate the applicability of this to the small folks that there's still time to do that. That is in the uniform rule, and we can bring

that back to you in December. And the issue can be then focused on the definition of major facility for that purpose. That would have no bearing on Title 3 as it was amended and read to you a few minutes ago.

MR. FISHBACK: Tier 3, not Title 3.

MS. YORK: Tier 3.

MR. FISHBACK: I think Kay has hit the essence of the argument here. The two sides of the issue is, as I see it, are adequate public participation in the process of permitting facilities that affect them. The other aspect of it is sufficiently short time periods for those facilities to get built, and that's the essence of the job here is balancing. Environmental protection with economic development. I mean, those are almost buzz words but that is fact.

And one way to do that, as Kay suggested, leave this requirement in Tier 3 and adjust the definition of "major facility," or provide enough exemptions to it that we don't penalize the small business. I think that definition "major facility" is way too broad to leave this intact. In Section 42. However, as I look at the differences between Tier 2 and Tier 3, I see that both of them offer notice of draft permit; both of them offer public comment period; both of them offer public meetings; both of them require a review of comments by

the DEQ. And so, my feeling here is that interest of the affected public are adequately protected by Tier 2 application for all facilities.

And I really am primarily concerned about the imposition of new requirements which I believe this, does -- Mr. Truelove said earlier -- and my experience would agree with it -- that all of the existing

requirements of the permitting process in Oklahoma fit into either the Tier 1 or 2. And so that if we're permitting some of into a Tier 3, we really are imposing new requirements.

I would not even suggest what I'm about to suggest if I felt the public didn't have an opportunity to adequately participate in the process. I feel like they do. I feel like they also have had. In fact, the public can be a very vocal and very effective in opposition to facilities and always have the opportunity to participate.

So any recommendation and any motion, if we get to that point, is to move the sentence -- well, delete a commercial incinerator, because I don't think any source category deserves special consideration above the other, but delete that term and move what's in Section 42 into Section 41.

THE CHAIRMAN: Section 41.

MR. FISHBACK: Move Section 42, the sentence in Section 42 into Tier 3, into the Section 41 under Tier 2 after deleting the reference to commercial incinerators.

MR. BRANECKY: What is your reaction to that?

MS. YORK: The Department is in agreement with that.

MS. HINKLE: And I have one question, Dennis. As this was printed, we had "or existing." But I heard you say that your understanding of the intention of the Department was not the way it was printed here?

MR. DOUGHTY: That's what I understood.

MS. YORK: There was mistake.

MR. DOUGHTY: I think there was some changes made in the meantime.

MS. HINKLE: So this is a mistake this "or existing"?

MR. DOUGHTY: I think so. I think so. I don't think it was included because siting was an issue that I think entered into this. If you're going to have a brand new anything that's a major next door to you, although siting is not really our thing; it's not our jurisdiction to determine siting. Then -- what should I say? The opinions and emotions run pretty high oftentimes on something like that. And I think the Department felt that certainly a sufficiently large new

nonsited source go through the Tier 3.

MR. BRANECKY: I think -- I guess there's sufficient concern on part of the public and, you know, we've had air quality rules in effect for years, and we lived with them. They seemed to have worked.

This adds new rules, new procedures; and I guess I would have to be hesitant to say: Let's put it there and then we'll change it. I'd rather pull it out and go back to work on it and put it back in if we needed to. Because to me, it's always hard to change something wrong once it's there.

MR. FISHBACK: So your recommendation, David, would be to delete it from 42 and put it nowhere today?

THE CHAIRMAN: Say again, Bill.

MR. BRANECKY: Are we covered if we do that? Does that fall under 41 anywhere?

MS. YORK: No, it doesn't, no.

MR. BYRUM: No. It doesn't.

MR. BRANECKY: I would say to do that and also work on this with the public and come to the same consensus, and if we have to, move that back into Tier 3. I think, there's enough doubt, enough concern, enough controversy that we need to look at that before we leave it in Tier 3.

MR. CHAIRMAN: David, are you saying delete 42?

MR. BRANECKY: Delete 42, and I guess the same thing as Bill moved into 41.

MR. BYRUM: Create an Item 8.

MR. BRANECKY: Or there was some suggestion -- changing 7 to a new or existing.

MR. FISHBACK: Yeah. That covers both of them.

MR. TRUELOVE: It's advice --

MR. FISHBACK: Yeah. Good point. Two items are easier to deal with later.

MR. BRANECKY: So it would be the same as Bill's then. But I think there's enough concern and enough doubt that we need to look at that, and I'd hate to leave something in there that -- there's so much concern, uncertainty.

THE CHAIRMAN: Back on page 9, part 5. What can we do to reference 42 there on line 6?

MR. BRANECKY: Well, I guess you could still have the section. I just don't have anything in it.

MR. FISHBACK: Would you say again where that is, Bill?

MR. BYRUM: It's line 6.

THE CHAIRMAN: Line 6, previous page.

MR. BRANECKY: Can you just have the section and nothing in it?

MR. FISHBACK: Sure.

MR. BRANECKY: And still the reference to section -- it just be empty.

MS. MEDLEY: I'm not signing that you're not calling on me; I'm signing there's people up there discussing this.

MR. BYRUM: I was signaling to you that I will get to you, B.J., in just a second.

B.J. is wishing to address us again.

MS. MEDLEY: B.J. Medley, ECO. I want to discuss, Bill, what you mentioned about the fact that on the permitting process is the citizens involved in Tier 2 is Tier 3 and that's absolutely false.

MR. FISHBACK: That's not what I said.

MS. MEDLEY: You said until you get done with the administrative hearing --

MR. FISHBACK: No. I specifically listed four items that were in common with both processes.

MS. MEDLEY: Well, which most of those are administrative with DEQ. Let me go through these. The filing, of course, the filing has nothing to do with the public, per se, other than eventually they will have opportunity to see that and notice in the paper, which are appropriate. But in regard to the notice of opportunity for process meeting, there is not -- under the -- on Tier 2 there is only on Tier 3. And that's a

meeting on the permitting process held by DEQ before they begin the review of permitting process. And, I'm sorry, I don't remember the gentleman's name next to you, Cathy. But you made a comment in regards to the public is protected because of the fact that, you know, the public comments, you know, the ability to make public comments and the filing and these problems and that things have gone well in air quality so far. And that's not correct.

I don't know how long you've been on board, and I'm not sure how many air quality public meetings you've been to, but all those meetings occur, after the permit is basically approved and then we go -- luckily we are wonderful people. I will say, like Kay, who runs these air meetings for us and does just a beautiful job. But we know when we're going in that permit is basically approved, and we're just there to make the final comments before they sign off.

And so the advantage of Tier 3 is the fact that you have the ability to actually have a meeting before the DEQ reviews and completes review of the permitting process, and I think that is really an important step beyond the administrative hearing down at the bottom in that process. So there are some -- those are some two real major items, besides the public comment period,

which if you notice on the time line here, our permit processes occurs after -- I repeat -- after the draft permit or draft denial is done. And so this gives you one more step, and I think it's important.

I have a real problem with us ignoring Tier 3, by allowing -- and if you want to adjust wording then I certainly accept the fact this has obviously some problem in the wording of that -- putting potentially smaller facilities in there, even though based on the word major, they fit in that major category but aren't really major emitters or whatever. I understand your concern about that.

But let me go back to the fact that the purpose of the law written by the legislative body was to say if you have a major potential source and it wasn't done by pound; it wasn't -- it was saying, you know, you pick -- you pick how you want it. But let's have a Tier 3 for complete review for public benefit, not just environmental degradation but concern by the public, et cetera, that was listed, that Ms. York read to us.

And I'm saying that Tier 3 is there for a reason and there are -- and I can list you right now probably three or four facilities that if I was aware of, I would say: Boy, I sure as hell would want them in Tier 3 not Tier 2. I'd want as much information and

ability to comment before DEQ begins their process of review.

The permit as I would at the very end after they have already reviewed the permit, and then I get to have a public meeting, and I also might very well want and appeal and so I think we have got to be real careful. I appreciate you all's thoughts about we can't come to a decision and it's 5:00 o'clock, and I want to go home just to literally put this aside and say move it up to Tier 2, because it makes life easier for us. I have a real difficult time with that. And I don't think it's going to affect the economics. Kay has already given you the rundown of where she thinks it is going to extend, a potential of, what, 25 days, somewhere in that vicinity, potentially, and then a maximum of 60 days.

I mean, this is the longest hearing she has had in solid waste. And we all know this permit can take forever to be done anyway. So I mean, another 20 days is not going to be a major problem, if that occurs. And she said that's the longest; many have been two or three days. We're not talking an extension of time or major cost to industry to come in and do this, other than the smaller facility, which I accept; and I think there needs to be that discussed, thought out, and done with. But do not eliminate Tier 3 because you guys can't

1051

decide how to put aside the NESHAP group.

I mean, we're all tired and we want to go home, but I really think that's what we're prepared to do here today, to either delete it totally or move it up to Tier 2, and I do not think that is the road to go.

MR. FISHBACK: Two comments, if I may. I think one thing, that may be neglected in your analysis is that once this permit application is filed with an agency, it is a public document. You can get involved in the process as early as you want.

You don't have to wait till the draft permit is issued by DEQ.

MS. MEDLEY: Bill, I understand, but there are citizens out there who don't know the process like we do, and that's where we run into the problems. We may not know that that permit has been filed, and we may --

MR. FISHBACK: Is there, what, a yearly, a monthly, or weekly permit?

MS. MEDLEY: Bill, how often do you think I t money to have the ability to take a publication such as that?

MR. FISHBACK: It's a freebie now.

MS. MEDLEY: We have people that call us and let you know sometimes when it's going on. But, Bill, you are talking about a 200 -- you are talking about

citizens in the state who don't even know what a permit is, who are the ones that are going to be affected by it, and eventually they will be the ones we will be working with to help in the process of doing this.

MR. FISHBACK: And those are the same ones that they don't even know what a permit is, and they are going to get involved in a public meeting to review it?

MS. MEDLEY: They are certainly going to get involved as soon as they know about it. I can guarantee you I get five calls a week, Bill, from people around this state who go: So and so, you know, the biomed incinerators. I got a call because the lady remembered my name from the state fair this previous September, and she picked up the phone and called me, and we went down and worked with her. And that's how we were able to get the biomed incinerator stopped and the law passed on certificate of need. We wouldn't have done this if she wouldn't remembered to call me, and she didn't know where to go before she called me. And I'm saying every citizen has no idea. You live it; I live it. I mean, I know what department to go to and who to call, but the average person has no concept. And that's why we're here to hopefully help them and tell them who to call and work with them.

We take our time and effort to sit here and make sure that those people who know nothing about the process of the Environmental Quality Board or Act, or any of the agencies that we have to deal with on an environmental level, that we make sure they're protected because they can't come, number one, most of them; and, number two, they don't even know that you exist. They do not know what you do.

MS. YORK: May I make a comment? When the legislature took two years to do this Act, the first year they did it major/minor permits and modifications and decided their two-tier approach wasn't sophisticated enough, so they went to three tiers.

What we have on Tier 3 is pretty much the major permit that they started with. They created the Tier 2 as a middle ground. The Tier 3 process, except for that process meeting up front they can ask the department for the Tier 3 process is already in place and has been for solid waste, hazardous waste, and water quality.

One of the intentions of making this uniform was to also apply it to air quality. It was reserved for the most complex, the most complicated, and if the NESHAPs applications don't fall in that category, then this needs to be modified. But I would really urge you to consider your obligations to the public at large, in

giving people who have the prospect of having a major facility, large facility come in next to them and have an opportunity to have an administrative proceeding at the administrative level, rather than waiting until the permit is issued and then going to court. I really urge council -- you to consider that.

MR. BYRUM: Ms. Hinkle.

MR. HINKLE: Do we have a motion on the floor yet?

MR. BYRUM: No.

MS. HINKIE: I would like to make one. If this is -- then we can still have further discussion, but --

THE CHAIRMAN: Is that proper?

MR. BYRUM: Is there anyone else who wishes to speak to the issue?

Then I turn it to you.

THE CHAIRMAN: Then we can make a motion.

Kathy.

MS. HINKLE: I would move the language here in 42 be as printed with the exception of deleting "or existing."

THE CHAIRMAN: I understand that you're leaving in the language "commercial incinerator."

(A discussion was held off the record.)

MS. YORK: That's a hazardous waste program.

THE CHAIRMAN: Do I hear a second to this motion?

Again, do I hear a second to this motion?

MR. GLASS: I'll second it.

THE CHAIRMAN: Okay. The motion has been made and seconded.

Any further discussion, comments?

MS. PERRY: Debbie Perry. I would like to suggest that if you're going to leave the words "commercial incinerator," that you include -- that you add the words "commercial hazardous waste for biomedical waste incinerator" to specifically those noncontroversial incinerators, and not include all the little small ones that may not be of concern.

MS. HINKLE: Well, I guess I have felt some level of assurance from some of the statements I've heard from Larry and Bill about how these things can be handled, whether it is down the road defining something or treating things as a class with an application. Can it also be dealt with in the -- with commercial incinerators or is this something we really do have to hash out here in the language?

MR. BYRUM: As I said earlier, we included the commercial -- the word "commercial incinerators." There we were looking at those that are very controversial

incinerators. It may not be the best word, that's why that was included.

We know that that's an issue with many citizens of the state. I understand what Bill is saying about singularly looking at a specific class of industry. But if we do indeed look back in our records on a single class of industry, that single class of industry has generated more public input and more public outcry than any other one in this industry. So that's the reason we suggested that.

How do -- how to handle what we've talked about -- these small incinerators and that sort of thing -- I think there is a possibility, as we said earlier, going into the other rules and further defining what we mean here. I think that is a possibility that we can do.

MS. YORK: Or limiting it here.

THE CHAIRMAN: I believe from what I hear that we have to consider the option of continuing this, because I'm not comfortable with doing anything other than what we discussed as far as eliminating incinerators, and what was the other thing? Language of what -- "or existing." I'm not comfortable with doing any more than that, until I understand more about the various incinerators. And plus I am not -- I am not

convinced that there isn't a better way to solve the small facilities coming under this.

So, you know, my feeling is, we pass it with the changes that Kay talked about or we just postpone and continue it, and that is to a special meeting for next December and get hand slapped by DEQ. I mean, I want to tell you how I feel about it.

MR. BRANECKY: I don't feel comfortable with the "major facility" definition, and so I would prefer some postponement of action.

But we've got the motion on --

THE CHAIRMAN: We're still discussing --

MR. FISHBACK: We have already made a motion, seconded, and passed the other changes. Why are we required to recommend this tier classification in total or not at all?

MS. YORK: I would say in total. Because I would hate for the Board to adopt something that you then come back and want to amend.

That makes it very difficult.

MR. CHAIRMAN: Again, I have no problem other than you realize what we are mandated to do. We've had this in our possession for quite sometime. And I believe that we should have had this conversation before. But with that, either we vote on this motion or

you have to withdraw it.

If you're not withdrawing it and there's no more comments, call a roll, Myrna.

MR. BYRUM: One more comment, Ron.

MR. TRUELOVE: I want to respond a little bit to what B.J. was saying about the public sometimes not having all the adequate resources to research the rules. Believe it or not, we have plenty of major sources who don't have all the major resources either.

As it stands, as I understand your is motion to leave in "new major facilities" without -- is that correct? So it would just be all new major facilities. I respect your position that they can always come back and ask for the change in this rule.

But I think David had it probably more adequately. Until we've identified a source category or an area that needs that type of Tier 3 regulation, I'd certainly look for you to consider leaving it aside or putting it in Tier 2 than coming back once one is identified.

Because I guarantee you the small business operators out there don't look at these rules and, say: We can go to the council to change the rule. They see the government rule as a very complex organization and unapproachable through normal procedures. So

approaching it from let's have a rule until somebody says let's change it isn't very practical for a small business owner.

MR. BYRUM: Other comments?

THE CHAIRMAN: If no further comments, call roll.

MR. GLASS: Restate your proposition please.

Mr. Hryn.

MS. HINKLE: Would read a construction permit that new major facility or commercial incinerator requires a Tier 3 application.

MR. CHAIRMAN: Again, that's the motion.

Would you call the roll.

THE SECRETARY: Mayor. Taron?

MAYOR TARON: Aye.

THE SECRETARY: Mr. Branecky?

MR. BRANECKY: No.

THE SECRETARY: Ms. Hinkle?

MS. HINKLE: Aye.

THE SECRETARY: Mr. Fishback?

MR. FISHBACK: No.

THE SECRETARY: Mr. Glass?

MR. GLASS: No.

THE SECRETARY: Mr. Breisch?

THE CHAIRMAN: No.

THE SECRETARY: That motion failed. Do I hear another motion?

MR. FISHBACK: I'll make a motion I was going to make earlier. Delete lines 20 and 21 and the word "new" to our newly created line 7 in section 41 so that that would read: Construction permit for a major modification to the new or existing major facility.

THE CHAIRMAN: Say it again, Bill.

MR. FISHBACK: I beg your pardon. I withdraw that because we decided to do as to separate. I'm sorry, it's better kept separate. Okay. So I withdraw the motion I just made.

Instead of deleting lines 20 and 21, change lines 20 and 21 two step process, okay? Change lines 20 and 21 to read: "A construction permit for the new major facility requires a Tier 3 application." That deletes the words "or existing" and it deletes the word "or commercial incinerator." So once again that read: "A construction permit for the new major facility requires a Tier 3 application." That's step one. Then delete it from Section 42 and put it as Item 8, Section 41.

MR. CHAIRMAN: What?

MR. FISHBACK: Having modified as I said, delete it from Section 42 and insert it as Item 8 in

Section 41.

MS. YORK: May I make a comment. Based on my understanding of what the Title 5 requirements, that would end up reinstating into the statute the contested case hearing language that is there now, rather than that being repealed and it would continue in effect.

MR. CHAIRMAN: What are you saying, Kay?

MS. YORK: I'm saying that if this administrative proceeding is not -- not in the process, then the contested case hearing would continue in the process as it is in the statute now.

MR. DOUGHTY: Was that repealed in Oklahoma? Wasn't that repealed, Kay?

MS. YORK: Yes. Wasn't it required by Title 5 to have some type of administrative proceeding? Isn't that what --

MR. DOUGHTY: No. What it actually required was a public review with the opportunity for judicial review. The administrative hearing was actually the thing that was -- that was decided on to keep the hearings and proceedings within the department rather than having them go to district court.

So I don't know. I don't know if it did, and I don't know if it would make that come back in, but it couldn't last until it's repealed in that July of next

year or something.

MR. BYRUM: I call on Ron.

MR. TRUELOVE: Ron Truelove, EFO again. As a point of clarification: Subchapter 8 to Title 5 provision apply to operative permits after the source has already been constructed and is already operated?

The issue that we're trying to deal with is one of trying to keep construction from being delayed extensively. So if I'm personally having to give up something, I would rather be giving up the debate around the operating permit while I've already started construction and I'm moving my source forward. Then I would have to extend the permitting process while I'm awaiting to start construction.

So if I've got to give up something and it reverts back to what Subchapter 8 says, I'm willing to accept that judicial review, because of the fact that the source is already constructed under the construction permit and then you're in the middle of whatever public process is necessary under Title 5, that's fine; the source is already operating.

So I -- as we keep talking about Title 5 reverting back in; as a point of clarification, that applies to operating permit only. Title 5 is not -- Subchapter 8 are not construction permitted programs.

MR. BRANECKY: I guess I would like maybe Mr. Fishback to consider in his motion -- it seems to me we got a lot of controversy and I hate to -- I mean, despite somebody's opinion, I'm not -- at 5:00 I'm ready to go home. I hate to throw something together here tonight.

I would prefer that we table action on 42, get together and have it -- and try and hash this out and have another special meeting before the November 15 deadline.

I think we would come out with a better product that everybody can live with it. I just don't think we can do that right here tonight.

THE CHAIRMAN: Right. I concur with that. I'm just uncomfortable. I don't like to see members of the Council in disagreement with each other. Not that that makes a big difference; but, we know, I think that what I've seen this council in the past do is agree, work on things, and I just don't see this happening right now.

I think you've got a good idea but --

MR. BYRUM: I would comment that so you -- give to you that if you choose that route, that between the staff and some of the public that's here and some of the industry that's here, we should be able to come up

with some language that would be acceptable to all of the parties that are affected here.

And it's probably an oversight on our part, an oversimplification that the legislature pass that major source be adopted and just went right along our merry way. And with all the things that we've looked at, and you can tell from today's discussion, we probably didn't adequately consider the impact of small sources. And I think that's probably something that could be worked out in a matter of very few days.

The language that's acceptable, I think, to every party that's concerned. And that's the option that the Council should choose to take. We would be more than happy to work on scheduling a date, getting a room, and all those issues are necessary to have a special meeting. But I would hope that we maybe limit that to the issue that we're dealing with here, so we can have a fairly short meeting. We're very busy doing a lot of things at this time.

MR. CHAIRMAN: Okay. Bill, would you -- would you withdraw your motion?

MR. FISHBACK: I would, except the question or the answer to the question was asked earlier was whether or not we had to refer this to the DEQ Board either intact or with excepting --

MR. BRANECKY: The special meeting would be held before that.

MS. YORK: By November 15.

MR. BRANECKY: We have to have it resolved by November 15th.

THE CHAIRMAN: Okay. How do we -- can we work in that timetable? Can you set a meeting, Larry?

(A discussion was held off the record.)

MR. DOUGHTY: Ten days I believe we have to file in the Secretary of State's Office for the special meeting.

THE CHAIRMAN: So today --

MS. MEDLEY: Why? If you don't adjourn, can't you continue?

THE COURT REPORTER: Excuse me -- I cannot --

THE CHAIRMAN: We'll let Larry call on people that want to speak from now on.

MR. BYRUM: I'd asked Dennis about a special meeting. He said we could have ten days. That's something that's doable. I believe another option you have -- and correct me if I'm wrong, Dennis -- is that you can continue this meeting at another time to be announced, that we can get this information out. We do a mass mailout on that. That's an option that you have available to you.

I would like for you to -- if you choose to do this -- in your motion set out what we're going to establish in that meeting, today, so those here know what we're going to be doing. We'll reiterate that perhaps you want to settle this issue and get a record.

We can have the court reporter where you can get a record on the other items that were discussed if you chose to do that. So we'll be working on some of those whatever your options are.

MR. DOUGHTY: In addition, Larry, let me suggest that they continue this meeting. That way we don't have any notice requirements that we've got to redo and republish and everything. This is a continuation of this hearing and this meeting to another time to be determined, the time and place should be determined at this meeting, so --

MR. BYRUM: At the meeting today?

MR. YORK: Yes.

MR. BYRUM: Everybody's got --

THE CHAIRMAN: Just a second. Are you saying that we don't have to define the subject or the agenda of a special meeting? We just continue this one?

MR. DOUGHTY: A special meeting can only be held for that particular special purpose. I'm saying if you continue this meeting to another time, then all of

our public notifications on rule-making hearings and all that sort of thing will still be good.

THE CHAIRMAN: It's not a special meeting; it's a continuation.

And we should establish now.

MR. DOUGHTY: Yes.

MS. YORK: May I also point out that the agenda called for a rule-making hearing on chapter -- Subchapter 6, 7, 8 and 11 and that we really have not gotten to this, because of time considerations, and that you probably should specifically either postpone that to your department meeting or include that in your continuation. That would be up to you.

THE CHAIRMAN: Well, Kay, that's what I asked. If we just continue this one, it takes care if we want to discuss this at that time.

MS. YORK: But if you want to continue this rule-making hearing and this meeting and not get into the other, you can do that too.

THE CHAIRMAN: Oh, I wouldn't want to limit it to not getting into the other, if we have time.

MR. FISHBACK: May I ask a question? Do the discussions of record made today stand if the meeting is continued?

MR. BYRUM: Yes.

MR. FISHBACK: We don't have to revote on all that?

MR. BYRUM: Yes. You've taken action on those items.

MR. FISHBACK: All right. I'll withdraw my motion.

THE CHAIRMAN: Okay. We have a withdrawal of the motion Mr. Fishback made. I would entertain a motion that we continue this hearing at the date that could be agreed upon, suggested it be November 9th.

MR. BYRUM: That's a Sunday, no.

MR. FISHBACK: That will keep it short.

MR. BYRUM: That is a Thursday. Sure a Thursday, a golf day. Kay will be gone the 7th, 8th, and 9th.

THE CHAIRMAN: What's wrong with Monday?

MS. HINKLE: Yeah, Monday the 6th.

MR. BYRUM: There is a conference --

THE CHAIRMAN: Oh, that's right.

MR. BYRUM: -- that some of us are involved here in Tulsa.

MS. YORK: The Board meeting mailing has to be prepared by that Friday, Larry, and so that Thursday would even be a possibility.

MR. BYRUM: You're taking off --

MS. YORK: Clear through the 16th would be a possibility, yes.

MR. CHAIRMAN: How about Monday the 13th?

MR. BYRUM: That's a possibility. That's an agency-wide staff meeting, but I can miss that. We'll pull staff out if we have to.

THE CHAIRMAN: Larry, the 13th is that a consensus? Could I have a consensus where --

I think our best possibility of getting a room is in probably Oklahoma City in the Burgundy or Brown Room. I don't know that. But one thing we can do, we can kick anyone out of our conference room and have it there.

MS. MARTIN: Are you saying the 13th?

That was the date that everybody was in agreement to come to.

MR. CHAIRMAN: The only thing that I have to question you about is availability of a room in Oklahoma City, where it wouldn't be available here.

MR. BYRUM: I don't know the availability of this room on a Monday. Do you, Otis?

OTIS: It's not going to be a good day; I can tell you.

MR. BYRUM: I do know that I control the conference room in our area, and we'll throw somebody

out if we have to.

MR. FISHBACK: There is a one-room outhouse in Stroud, if you want.

MR. BYRUM: Rather large --

MR. BRANECKY: Well, I move, then, that meeting be continued on Monday, November 13th, in Oklahoma City at a location and time to be determined.

MAYOR TARON: Will we receive notice of the time?

MR. BYRUM: You will receive a mailout package on this. I suggest that you -- do you want a briefing, or do you feel that we can have another meeting and start at 1:00 o'clock?

THE CHAIRMAN: In a briefing --

MR. FISHBACK: We're still on the hearing.

THE CHAIRMAN: Let's just continue to start at 9:00 and 9:30 in the morning.

(A discussion was held off the record.)

MR. BYRUM: 9:30 on the 13th. It will be at -- it will be at the 4545 North Lincoln. I cannot tell you the room at this time.

(A discussion was held off the record.)

THE CHAIRMAN: 9:30. Okay. Do I here a second to this?

MR. BRANECKY: Any further discussion on the

hearing anyone. Will you call the roll?

THE SECRETARY: Mayor Taron?

MAYOR TARON: Aye.

THE SECRETARY: Mr. Branecky?

MR. BRANECKY: Aye.

THE SECRETARY: Mr. Fishback?

MR. FISHBACK: Aye.

THE SECRETARY: Mr. Glass?

MR. GLASS: Aye.

THE SECRETARY: Mr. Breisch?

THE CHAIRMAN: Aye.

(Court adjourned.)

.....

I, DAWN C. FLICK, CSR, having been duly appointed as Official Court Reporter herein, do hereby certify that the foregoing pages number from 1 to 70, inclusive, constitute a full, true, and accurate transcript of all the proceedings had in the above matter, all done to the best of my skill and ability.

DATED the 1st day of November, 1995.

PRIDE REPORTING SERVICES

Oklahoma City, OK
 November 11, 1995
 9:30 o'clock a.m.

.....

THE CHAIRMAN: We'll call the meeting into session.

If you remember, this is a continued hearing from our October 17th hearing. We're here to continue hearing on what is published as 252:010 -- I think that that has been renumbered into OAC 252:002-15 through 31 and 42. We're also continuing the hearings on 252:100-11-8-6.

Larry Byrum will continue to act as protocol officer. Larry Byrum, to refresh your recollection: At the last meeting we were discussing Tier III. We had voted on Tier I and Tier II. At the close of the last session, the counsel asked that, I believe, Dave Branecky and Bill Fishback and I think Mr. Glass, I believe, indicated he was interested in meeting with representatives -- or interested parties on what items should be included in Tier III.

That meeting did occur, and I'm going to ask Mr. Branecky to capsule the events of that meeting for us, and we'll discuss that at any length that anyone chooses to do so.

1 MR. BRANECKY: We met last Thursday, Thursday
 2 afternoon. It was Larry and me, and Bill Fishback was
 3 tied in by phone. Scott Nicholson was present, and we
 4 had B.J. Medley and Nadine Barton, Claire Newsom and
 5 Sylvia.

6 MR. BYRUM: Right.

7 MR. BRANECKY: We met for about an hour and a
 8 half, and the purpose was to come up with some language
 9 that would be acceptable, and I think we came to that.
 10 And I don't know if I need to go into details. I guess
 11 the environmental group is concerned about the exclusion
 12 or inclusion of commercial incinerators. They felt they
 13 would like to see that included in Tier III.

14 On the other hand, industry was concerned about
 15 catching all the little mom and pops and having them in
 16 Tier III.

17 I will read you what we came up with on the
 18 compromise language. I guess we can just go from there.

19 What we came up with -- a construction permit
 20 for a new major facility subject to PSD requirements and
 21 any commercial incinerator that emits 100 tons per year
 22 or more of any pollutant requires a Tier III
 3 application.

4 Is that right? So the difference between what
 5 we have here and what was originally in the language for

Tier III was a addition of PSD. What PSD does is, if you're familiar with PSD, if you have a 150-ton threshold, unless you're one of the listed sources which is subject to PSD. So that removes all of the small mom and pop operations from having Tier III, but catches the big ones.

And then B.J. was concerned about the commercial incinerators, so we included that, adding that commercial incinerator to the 100 ton.

I guess that's basically it. Anything else I need, Bill?

Bill had some concerns -- and I guess I can go into that a little bit -- by adding commercial incinerator, we were singling out specific industry groups. And so that was a point of discussion throughout the meeting, part of the meeting.

THE CHAIRMAN: Dave --

MR. BRAHECKY: Maybe I can let Bill explain.

THE CHAIRMAN: First of all, which paragraphs are we on?

MR. BYRUM: Page 10. Okay.

MS. YORK: Dave, I have a real practical problem with the language as you read it, and I am wondering if it would be possible to maybe change some of that language.

MR. BRAHECKY: I think we can word it --

MS. YORK: You had read "or commercial incinerator that emits 100 tons or more per year." The problem is with the permitting in the air quality area is that under this Tier III, this being new facilities that are not built. And so I think what we have to talk about is the potential for -- with a permitted capacity of 100 tons or more.

Because we don't know what it's going to emit. And if you use those kinds of words, then you could be bringing in incinerators that perhaps would not -- would not be in that category.

I think what you need to talk about, since you're talking about new facilities here, you need to talk about potential to emit or are asking for permitted capacity.

MR. FISHBACK: I don't have any problem with that.

The PSD potential to emit clearly includes control equipment. And that needs to be clearly understood here. That is not the potential to emit in the absence of control equipment. That's no potential to emit after considering control equipment.

So we need to maintain the PSD provisions in this.

MR. BRANECKY: Uh-huh.

MR. FISHBACK: But you could stick the word

"will emit" or "will have the potential to emit" of 100 tons per year.

MR. BRANECKY: I think that's the way it's stated in PSD.

MR. BYRUM: I was just going to caution everyone to identify themselves, because the court reporter will have difficulty if we don't.

MR. BRANECKY: So maybe what it can read then is a construction permit for a new major facility subject to PSD requirements and any commercial incinerator that emits or has the potential to emit 100 tons per year.

Do we need to define "potential" to make sure that's PSD potential?

MR. FISHBACK: We may be word smithing here, but lawsuits are won and lost on the basis of interpretation. And I'm not sure that that implies that a commercial incinerator undergoes the same criteria that any other PSD facility does.

It sounds like it's PSD and commercial incinerators as a separate entity. What we really intended was, as you said earlier, in that list of 26 sources that's in 45 C.F.R. (A)(2) point 1. We add one

1 more to it, commercial incinerators, and it's treated
2 the same.

3 MR. BYRUM: The thought occurs to me that we
4 could adopt that tech as defined and like in
5 section (A), I don't believe -- I think it's
6 section (A), it talks about, and then the list,
7 including this list. But it talks about the
8 qualifications.

9 MR. FISHBACK: We're not treating it as a
10 separate. I don't want to read it as a separate source
11 category. Because I think it invites a lot of people to
12 say: Well, why not something else? Why are you
13 singling it out?

14 So if we're going to do it this way, I think
15 it's appropriate that it be considered just like the
16 other 26 source categories.

17 MS. SHEEDY: My name is Joyce Sheedy. I am
18 with the Air Quality Service. I think David and
19 Mr. Fishback and Mr. Branecky both hit upon this, but we
20 need to be careful by using potential to emit, because
21 this is one -- there is potential to emit for Title A
22 and potential to emit. So we need to be careful when we
23 use it to define it.

24 MR. BRANECKY: Do we need to say that is the
25 potential to emit as defined by whatever that site would

be?

MR. FISHBACK: This is PSD. This is not Title A. And that's always a source of confusion too. So the net effect is we're adding one more source category, since 1977, and we're treating them all the same.

MR. BYRUM: I think also discussed during our meeting was a possible definition for the commercial incinerator.

MR. BRANECKY: I'm sorry. I forgot this.

MR. BYRUM: The staff would offer that commercial incinerator means any incinerator which burns waste material for a fee or other valuable consideration. The term includes, but is not limited to, municipal, biomedical, and hazardous waste incinerators.

Would you like for me to read it one more time?

MR. FISHBACK: Yes.

MR. BYRUM: Somebody.

MS. HINKLE: I'm writing as fast as I can.

MR. BYRUM: Commercial incinerator means any incinerator which burns waste material for a fee or other valuable consideration. The term incinerator includes, but is not limited to, municipal, biomedical, and hazardous waste incinerators.

MAYOR TARON: Do we have that in print?

1 somewhere in this?

2 MR. BYRUM: No.

3 MAYOR TARON: May we have it in print?

4 MR. BYRUM: This was done at the last hour. We
5 were actually -- everyone was gone when we were through
6 with our meeting.

7 MR. FISHBACK: If I may, I would like to take
8 one step backwards, and I believe Kay has discussed this
9 with the council before. But the question I have is
10 related to the requirements of the statutes that created
11 the uniform permitting requirements and also the tiering
12 of the permits.

13 I wanted to be clear and I wanted everybody
14 else to be clear on the extent to which this was
15 mandated or requested or suggested. In other words,
16 what is the -- what's the driving force behind this?

17 Could you just summarize that for us. And what
18 does the statute say, and does it say that this is a
19 requirement of these rules or -- because I've seen some
20 language where it says the legislature has asked the
21 councils to consider, and that doesn't sound like a
22 mandate. But could you refresh my recollection on that.

23 MS. YORK: The intent of the legislature was
24 that each permitting area, major permitting area in the
25 department, would have applications that fell in, I, II,

1109

and III.

MR. FISHBACK: Now, you say intent. Do they actually specify that?

MS. YORK: Does it specify that? No, it does not say that outright and could not, because we have some certifications, like waste water certifications and solid waste landfill, that are Tier I necessarily.

So in our certification permitting program, we do not have any Tier II nor Tier III, nor would it make sense to have.

MR. FISHBACK: So the tiering approach was created not by the legislature but by the DEQ.

MS. YORK: The tiering approach was created by the legislature. The first year they had that they had major permits and left in place the --

MR. FISHBACK: What do the statutes say about the tiering? Does it specify that that's a requirement?

MS. YORK: Yes, sir.

MR. FISHBACK: I wanted to be very clear on that

MS. YORK: Yes, sir.

MR. FISHBACK: Okay. The statute says that the permit shall fall into three tiers.

MS. YORK: Yes, sir.

MR. FISHBACK: And was it left up to the

1 Department as to what were the requirements of the
2 tiers?

3 MS. YORK: No. The legislature gave the
4 factors to be considered, and the Department was charged
5 by the Board to develop their recommendations. And then
6 they were to go through the councils for recommendation.

7 MR. FISHBACK: In general, the concept here is
8 that as you go to a higher tier, you increase the level
9 of public participation.

10 Is that a correct statement?

11 MS. YORK: Yes, sir. The notice and public
12 participation is the purpose of this. It does not
13 change any technical requirements whatsoever, nor does
14 it require any changes in the review procedure that is
15 in place at this time.

16 MR. FISHBACK: Is that a true statement for all
17 sources? I would assume that there were some sources
18 that would be subject to Tier III that would have
19 additional requirements that they wouldn't have had in
20 the past?

21 MS. YORK: Review requirements? No, sir.

22 MR. FISHBACK: By review do you mean public
23 review or?

24 MS. YORK: No. I mean Department review.

25 MR. FISHBACK: Department. Okay, I would agree

with that. The public does become involved or however you want to say it.

MS. YORK: Actually, in air quality, for example, this is a lesser evidentiary hearing requirement than existed before. The evidentiary hearing that was available to the public under the old statute applied to all Title V applications, their modification, and their renewal.

In solid waste and hazardous waste, it pretty well has stayed the same. In water quality, it again is a lesser requirement than what existed under the statutes for FUBS discharge permit.

MR. BRANECKY: Lesser in what way? That fewer requirements are imposed on the applicant? Or how do you mean that it's lesser?

MS. YORK: Fewer applications.

MR. FISHBACK: Fewer applications will be subject to it?

MS. YORK: That's correct.

MR. FISHBACK: Not that once you're in the process it has lesser, fewer, requirements, just fewer people will go through the process.

What do you think is the main advantage -- not of the uniform permitting rules -- because I believe we understand that uniformity and consistency is probably

1 an advantage -- but what do you see as the main
2 advantage for the public of a Tier III versus a Tier II
3 in air quality, specifically?

4 MS. YORK: I think there is an advantage to the
5 public, and I think there's also an advantage to the
6 applicant.

7 The advantage to the public is that for new,
8 never -- just proposed, unbuilt facilities, the people
9 who live -- who will be living around that facility,
10 should it be permitted and constructed, will have an
11 opportunity to have a forum other than a public meeting
12 for their concerns. And to demonstrate and to have --
13 or to have demonstrated to them that this is not going
14 to pose a threat to their quality of life or their
15 health.

16 MR. FISHBACK: Is that something they do not
17 presently have, in your judgment?

18 MS. YORK: Is that something they do not have?

19 MR. FISHBACK: That opportunity, yeah, to have
20 that public forum and get that information? Is that
21 something that they currently do not have?

22 MS. YORK: In air quality they would have a
23 forum under the law as it exists now.

24 For applications for filing a modification of
25 Title V and renewals of Title V. So they are giving up

171

some of their -- some of that advantage in that it just relates to new, never-built sites.

The applicant, on the other hand, the advantage to the applicant is that if you have people who live in a surrounding area who are opposed to the facility to the point that they will not only challenge it at the administrative level, they will challenge it at the court level, you have the administrative level, being dealt at the administrative level that the court then limits itself to, and you do not have a trial that starts brand new at the district court level.

MR. FISHBACK: I appreciate that explanation. I guess I'm still -- I'm still puzzled by -- and I believe I understand what you said, but I'm still puzzled by what is achieved by facilities that go through the Tier III process.

MS. YORK: The legislature is giving a due process right to people to have a say and to actually review evidence and to present evidence.

MR. FISHBACK: But they do have that opportunity and that right now? Or not?

MS. YORK: Not now, no. For the Title V program when it goes in, that is something that the federal government has allowed for -- or required for solid -- hazardous waste, air quality, and water quality

all along.

This is a narrower approach.

MR. FISHBACK: If I understand what you're saying, the permits that have been issued by the DEQ and its predecessor agency for a number of years in Oklahoma, the public always had the opportunity to comment on that and have input into the process. But they do not have a right for the new Title V operating permits without implementing this rule; they do have for its subchapter .

MS. YORK: In the interest of uniformity, which you yourself have just said makes a lot of sense and you can understand why we're doing that, the legislature has chosen to put a uniform procedure that applies equally to air, water, hazardous waste, and water. So we have had differing opportunities for each one of those areas.

Now we have a uniform -- a uniform set of rights.

MR. FISHBACK: Do you think this would have been lesser desirable or implemented if there had been no Title V program? Would this have happened anyway?

MS. YORK: Uh-huh. Title V just happens to fall in this point in time. The Title V has to do with the fact that the legislature has chosen to do a uniform permitting process for the agency.

MR. FISHBACK: Again, I'm sorry if I'm repetitive here. But I'm trying to clearly understand the mandate that we've been given.

The advantages that you have mentioned for this -- not the uniform permitting process itself, but the tiering process, the advantages are this record of evidence is created; the public does give up some of the rights that it has, because it applies to only the new and not renewals.

But everything that they are able to do under this program, they are currently able to do, and more, up to this point; and the advantage of this is that it brings the Title 7 operating permits into the same level of public participation as the subchapter 7 permits already have? Is that all true?

MS. YORK: No, that's not true at all.

MR. FISHBACK: Then I misunderstood.

MS. YORK: The Title V is the one that carries the contested case here. The contested case has never been a possibility for air quality permits until the Title V program came in. I see where you're confusing the two.

Number one, the legislature has chosen to do a uniform permit process that applies equally to everybody. That involves giving certain people due

1 process rights with regard to certain applications.

2 Now, the legislature could have been like the
3 state of Texas or the state of Massachusetts, which
4 allows a hearing on everything the Department issues.

5 The state of Texas has a full-time
6 administrative law office that does nothing but hold
7 hearings day after day after day. The state of
8 Massachusetts, I talked with them last week. Three
9 years ago they had over a hundred hearings pending that
10 they couldn't get to.

11 State of Oklahoma has chosen not to do that.
12 The State of Oklahoma has chosen to give that due
13 process right to people with regard to application for
14 the big, complex facilities that are proposed and not
15 built, as far as air and water are concerned. Hazardous
16 waste and solid waste have existing facilities that also
17 are subject to this. But I'm not going to go into those
18 because it's too complicated.

19 But air and water are part of the environmental
20 scheme, and the legislature chose to give due process
21 rights to certain people for certain types of
22 facilities.

23 And they have again the criteria under which
24 the councils -- the Department, the councils and the
25 Board -- are to consider in dividing those up.

MR. FISHBACK: What would a member that wanted to stop the construction of something, what would they have done five years ago?

MS. YORK: What would they have done five years ago?

MR. FISHBACK: What options were available to t. five years ago?

MS. YORK: They would have gone to the Court and asked for an injunction.

MR. FISHBACK: And that was basically their only option?

MR. YORK: I don't recollect their options in air and water.

MR. FISHBACK: And after this becomes effective?

MS. YORK: The court will require they appeal the order of an administrative order. And that will become part of the court proceeding.

MR. FISHBACK: They could still file a temporary injunction after this becomes effective?

MS. YORK: That's true; they could. But the facts will turn on the administrative case, rather than starting over.

MR. FISHBACK: And the hope, I guess, of the proponents of this is that you can resolve it at the

1 administrative level.

2 MS. YORK: Yes, sir.

3 MR. FISHBACK: So that's the new piece.

4 MS. YORK: Yes, sir.

5 MR. FISHBACK: And those remedies for temporary
6 injunctions and lawsuits are still available, but you
7 hope you don't get to that point.

8 MS. YORK: Yes, sir.

9 THE CHAIRMAN: Kay, have the other councils
10 acted on this uniform permitting?

11 MS. YORK: Yes, sir. You are the only council
12 that has not made recommendations at this point.

13 THE CHAIRMAN: If we could move on at this
14 point, I would like to again hear the final reading of
15 the paragraph on dash 15, dash 42; that really is the
16 crux of these.

17 MR. BYRUM: And citation here; I don't have my
18 rules with me.

19 MR. BRANECKY: I can read that, but I don't
20 have the citation.

21 MR. BYRUM: Dennis, do you have your rules with
22 you?

23 MR. DOUGHTY: The only thing I've got is the
24 old council packet.

25 Scott, don't you have it?

MR. BYRUM: If someone has a copy, I would like to borrow it.

THE CHAIRMAN: What are you looking for?

MR. FISHBACK: 5221. What is left is to establish the criteria what goes into tier.

MR. BRANECKY: Tier III. We've already decided I and Tier II. Just Tier III.

THE CHAIRMAN: Where does the paragraph on the commercial -- of the commercial incinerator come in?

Where does say that definition --

MR. FISHBACK: It's got to be part of 42.

THE CHAIRMAN: That has to be added as part of that.

MR. BRANECKY: Added in 42?

MR. FISHBACK: This is not current as of last Thursday's meeting.

MR. BRANECKY: So we would add --

MR. FISHBACK: From a format standpoint, do we want to mix definitions?

MS. YORK: Excuse me. There are definitions to uniform rules, and that's where that rightfully belongs. That can be couched in it as it applies to the tier classifications of air quality. And that does not have to be -- that does not have to be a formal recommendation by you for the definitions, as the words

1 you would want to use.

2 THE CHAIRMAN: That's what I was getting at. I
3 wou... rather get that done right now and go on from
4 here. Because we have got to finish this today and pass
5 it on.

6 MS. YORK: Yes, sir.

7 MR. FISHBACK: From a clarity standpoint -- and
8 I'm not sure people would agree with this. But from a
9 clarity standpoint, I would sure like to see some
10 parenthetical definitions. They don't have to be
11 official, maybe. Maybe the definition could be
12 referenced, as we're about ready to do, to a part of the
13 C.F.R., but where -- because the terms are used so
14 loosely and so interchangeably and with so much
15 confusion. Where we say "major," I would like it to say
16 "as defined in 5221." I would like it to say that
17 right in parenthesis, right in the definition of Tier
18 III, right in section 42.

19 And when it says "potential to emit," I would
20 like it to say "considering the PSD language,
21 considering the effect of control equipment." Because
22 that's the first question that somebody will ask when
23 they see this. It's a whole lot easier to have it in
24 front of you then to have to flip to something else.

25 MR. BRANECKY: You've got a definition of major

115

facility, and in clarifying that, you're saying only majors that are subject to PSD. So to me that's pretty clear. I mean --

MR. FISHBACK: Well, it would be except that it's almost as if that's a two-level definition.

We're not saying that it's Title V major and if happens to be PSD major, something else happens. We're saying it only applies to PSD major facilities. Correct?

In other words, you don't go through Title V definition to get to this one; you go -- we're talking just about PSD major.

Now, it would be nice if those had the same tonnage threshold, but they don't.

MS. YORK: You could arrive at that by taking the word major out at Tier III and just say "facility subject to PSD requirements."

MR. FISHBACK: Facility subject to PSD requirements per 40 C.F.R. 5221.

MR. BYRUM: We've got several people that have indicated they wish to speak, and we're going to be calling on them just as soon as the council gets through talking with Kay.

MR. BRANECKY: Do we have a citation?

MR. BYRUM: The closest I can get for you is

1 252:100-7-31, major stationary source.

2 MR. FISHBACK: You are going to do it on the
3 Oklahoma regulations?

4 MR. BYRUM: You're dealing just with Oklahoma
5 rules.

6 MR. BRANECKY: That's where potential is
7 defined.

8 MR. BYRUM: I think that's word for word out of
9 the federal.

10 MR. FISHBACK: Usually it is.

11 MR. BYRUM: And I -- you were speaking to look
12 at only one document; that's why I was suggesting we do
13 it in this particular manner.

14 MR. FISHBACK: If when eliminate the word
15 major, then we can't use the definition of major
16 stationary source from this citation.

17 But we could say major stationary source as
18 defined in and then give this citation. And this is the
19 PSD language. There's 26 sources that are major when
20 they exceed 100 tons a year, and everything else is
21 major when it exceeds 250 tons a year.

22 No. It's any pollutants subject to
23 regulations, but generally those are criteria
24 pollutants. Because you wouldn't have 250 tons of a
25 hazardous air pollutant. That's a separate.

MR. BYRUM: Are there any additional questions for Kay from the council?

Then I would ask: Are there questions from the audience for Kay?

Yes, sir.

MR. OXFORD: This is Rod Oxford.

If you make it a PSD permit, and we go into nonattainment, where does that put the source? Are they exempt from Tier III because it happens to be in a region that is now nonattainment?

MR. BYRUM: I had difficulty hearing part of that.

MR. OXFORD: PSD requirements are applicable to facilities that are in attainment areas. If we're going to have a definition of Tier III, it ought to accommodate facilities that are in nonattainment areas as well.

That's --

MR. FISHBACK: We don't have any now, but that's not a bad thought. We might have.

MR. BYRUM: That's not something specifically we discussed in the meeting that we had the other day.

So . . .

MR. FISHBACK: Let me ask the gentleman that asked that question. Would that -- would your idea be

1 met if you had a parallel definition with an "and" in
2 there that said PSD major -- I guess it would be.

3 MR. OXFORD: I'm looking at subchapter 7 and
4 the definition of major stationary source in
5 subchapter 7. What I think you need to do is take out
6 the reference to PSD and use the definition for 26
7 source category as major, major irrespective of whether
8 they are attainment or nonattainment area.

9 MR. FISHBACK: I think that's where we were
10 headed with that citation. But your point is that in a
11 nonattainment area those thresholds of significance are
12 lower. Is that correct?

13 MR. OXFORD: That wasn't my primary point.

14 MR. FISHBACK: Oh, that's not your primary
15 point.

16 MR. OXFORD: I was just saying if you don't
17 want to embrace PSD -- the only point I was making: If
18 you want to use 100 tons per a particular source
19 category, use 100 tons. But don't make it dependent on
20 how the rest of the area is doing under the federal act.

21 MR. FISHBACK: I don't have any objection to
22 that. What we were after is the thresholds, and PSD had
23 the thresholds in them. But you're saying use the
24 thresholds without using PSD.

25 MR. OXFORD: Right.

MR. FISHBACK: I don't have a problem with that. Do you?

MR. BYRUM: Nadine?

MS. BARTON: As a member of the environmental community and a member of the Tulsa Air Quality Committee, I do concur with that, because we are right on the brink of going over, as you know. We do have to address that. All of our discussions we've never discussed that. So this is a really important issue that he brings up that we should cover in doing this.

MR. FISHBACK: What would you propose the thresholds be in nonattainment areas? The Title V significance thresholds?

MR. OXFORD: For criteria pollutants, there are reduced tonnage levels. But those are for Title V permitting requirements; they don't have anything to do with PSD requirements.

MR. FISHBACK: As an example, in a certain level of nonattainment, your major source threshold becomes 25 tons instead of 100. Are you proposing that Tier III apply to a 50-ton source if it's in a nonattainment area? Is that what you're proposing?

MR. OXFORD: No. I was just proposing that you get out of what appeared to be a ridiculous rule that would say the Tier III applied only in nonattainment

1 areas.

2 MR. BYRUM: I think what --

3 MR. OXFORD: It should apply more so in
4 nonattainment areas than attainment areas is what I'm
5 trying to say. If there's a need for a public hearing
6 on a facility that makes 100 tons of VOCs and the area
7 is nonattainment for ozone, you need the hearing more so
8 in that area than you do in an area that is attainment.

9 MR. BYRUM: I think what his idea is basically
10 is that we do not tie it to PSD.

11 MR. OXFORD: That's right. I wasn't trying to
12 change the tonnage levels.

13 MR. BYRUM: Not change the tonnage.

14 MR. OXFORD: In fact, I think you could pick
15 this definition, add commercial incineration to it, and
16 you would have a workable definition.

17 MR. BYRUM: Let me bring us back just a second.

18 Are there any other questions specifically of
19 Kay?

20 (No response.)

21 MR. BYRUM: Okay. Then I'm going to move on,
22 and I'm sure we are going to discuss just exactly what
23 we're talking about. The only slip that I have from
24 anyone indicating that they wish to speak at this time
25 is from Ron Truelove.

And, Ron, I will call on you at this time.

MR. TRUELOVE: My name is Ron Truelove, and I am with Roberts/Schornick & Associates. And I'm representing the Environmental Federation of Oklahoma today. And, first of all, I would like to express an appreciation for the council for the environmental community and for others to meet and try to work out a reasonable solution.

And, in general, I think EFO supports wholeheartedly the concepts of Tier III permitting applying to the new type of sources that would undergo PSD permitting or nonattainment new source review permitting, which is what we're referring to with this other concept of things that would be major as defined by PSD rules. But because of the designation of PSD in attainment areas and nonattainment, new source review in nonattainment areas should all be captured. And I would like to get that on the record.

Secondly, I can't support what Mr. Fishback has offered as adding commercial incinerators to the list of 26 major sources under the PSD rules, because by doing so, some commercial incinerators would be subjected to new and additional substantive requirements under BACT and under max modeling that they may not have to go through if they were a 105-ton commercial incinerator.

1 They might still go through Tier III public
2 review, but would not undergo PSD, because they are in
3 the 250-ton source category.

4 So I have a real problem with adding that and
5 invoking a new PSD requirement on a new type of source
6 that's not invoked across the country.

7 So I think it's better to treat those as
8 separately designated as opposed to adding them to the
9 source definition in the 26 listed categories. And I
10 think to overcome the problem of the nonattainment new
11 source review versus the PSD, if the definition in
12 Tier III list were crafted such that it would say
13 something like "new major stationary source as defined
14 in," and list the OAC cite in subchapter 7 and "subject
15 to permitting under" and then list the cite for PSD
16 permitting in subchapter 7 and nonattainment new source
17 review, you would accomplish what you intend to
18 accomplish.

19 I also cannot support putting federal citations
20 in the rule, because Oklahoma has completely delegated
21 authority under PSD. When we start bringing federal
22 definitions and federal citations in, we begin to dilute
23 what Oklahoma intended to do with creating completely
24 delegated authority.

25 Thank you.

MR. BYRUM: Questions for Mr. Truelove?

MR. FISHBACK: It's interesting that you take that view, because that's exactly what I was trying to do prior to our discussions last Thursday, and the compromise we've reached is the one that's been presented.

I don't have any -- the whole thrust of this as far as I was concerned was that no source category should be called out specifically. It's discriminatory. The incinerator category was of such concern to people that we agreed to list it separately.

I want to put this on the record, because our conversation last Thursday was not on the record. It is my view that it is very likely that you can have a source category that's not listed in this list with more emissions than an incinerator that is listed. And that's the discriminatory part. But we can't deny the public response to incinerators.

So the compromise that we reached was to add incinerators to the list but give them a threshold. As far as I am concerned, the technically correct way to do this is to base it on the amount of the emissions, period, without regard to any source category. Whatever the emissions are determines what the level of review is.

1 But we have the list of 26, and I agree with
2 Ron: It's better to use the Oklahoma version of it;
3 it's identical to federal version. We have this list of
4 26 that's been around for, what, 18 years now? And
5 we're going to add another -- or we're proposing to add
6 another one to it.

7 I also agree with this discussion it's not
8 necessary to tie it to PSD, because my view is that it
9 needs to be tied to emission threshold. So that's
10 exactly what we would do. Whether attainment area or
11 not, whether new source review or not, whether PSD or
12 not, the thing that puts it in a tier is the amount of
13 emissions.

14 And we -- the compromise we reached was to put
15 incinerators on the list at 100 tons. So I don't have
16 any problems with the suggestions that he made.

17 MR. BYRUM: Madine.

18 MS. BARTON: You know, we worked very hard
19 about this incinerator business here. And I cannot go
20 along with what he says about the incinerators. The
21 public -- the public, which all are represented, and
22 that means major corporations, too -- have the right to
23 have incinerators in there. In the original rules,
24 incinerator was incorporated in here.

25 We are not citing anyone out, and the PSD, it

states municipal incinerators which have the same capacity as commercial incinerators. We all know that the incinerator in Stroud, the medical incinerator, has shut down. There is a company that is looking at that facility right now.

And as Larry stated in a previous meeting, that any company that is coming into this state is going to expect the same type of scrutiny as any other state would have, where incineration is concerned. The environmental community -- and I am getting emotional here, and I usually do not get emotional -- has given up a lot on this one point.

I am not talking about Title V here; we are talking about just this: We have an obligation to citizens and to our future generation of citizens to have this put in here.

It is not too much, I don't think -- and I do not think we're discriminating -- to leave it out as a discrimination against the other companies that are listed.

But the citizens of this state have the right to that third tier under incineration. We did not know what the future brings. And this body is held with a responsibility to be foresighted. You were specifically chosen for this.

1 Please help us and protect us as the citizens.
2 We have given up a lot.

3 MR. BYRUM: Mr. Truelove.

4 MR. TRUELOVE: Ron Truelove with EFO. I would
5 just like to clarify my statement. I think it might
6 have been taken out of context.

7 When I stated that we supported, what I was
8 supporting is what Mr. Branecky had highlighted earlier
9 in the meeting, where commercial incinerators were
10 directly listed in the Tier III at 100 tons.

11 What we don't support is adding it to the PSD
12 list specifically of 26 major source categories, because
13 that's a federal list that all states have adopted and
14 are delegated. I'm not supporting pulling them out of
15 Tier III. I support listing commercial incinerators at
16 100 tons directly in Tier III.

17 MR. BRANECKY: Are you opposed to just pulling
18 the list out without any reference to PSD and using that
19 list as a list and including that?

20 MR. TRUELOVE: That list could be referenced as
21 a definition of new major stationary source in
22 subchapter 7, whatever, to be that list of 26 majors at
23 100 tons and then the remaining definition of 250. That
24 goes in Tier III, and then in addition to that,
25 commercial incinerators at 100 tons as negotiated last

Thursday.

We're not subjecting those commercial incinerators to any provisions of PSD that they otherwise would not have already gone through. We're just subjecting them to Tier III permitting.

MR. BRANECKY: I guess what I think we're trying to do is pull the list out, forget PSD and just use the list.

MR. TRUELOVE: Just use the list.

MR. BRANECKY: And add to that list of 26, commercial incinerators, which has no reference to all the PSDs; it's just a list.

MR. TRUELOVE: If you want to make that list in Tier III --

MR. BRANECKY: Yes, that's what I'm thinking.

MR. TRUELOVE: That's fine.

But don't put it back in the PSD rules.

MR. TRUELOVE: No.

MR. FISHBACK: I agree with that. In fact, the reason we referenced PSD was that the list was already prepared for us. But we can consider this as a list we found on the street. It just happens to be a list we like to use.

MR. BRANECKY: And add incinerators.

MR. FISHBACK: He was not asking to delete --

MS. BARTON: I appreciate that clarity; thank you. Everyone thanks you. God thanks you.

MR. FISHBACK: Everyone but the municipal incinerator operator thanks you.

MR. BRANECKY: The list of what we're going to use, I think we need to see that.

MR. BYRUM: I've been trying to take notes as we went through this of what I basically have that we're trying to get accomplished here is that a major stationary source for the purposes of the Tier rules, specifically Tier III, means the major stationary sources as listed at 252:100-7-31.

I don't know if that capsulizes.

MR. BRANECKY: It doesn't have any reference to PSD.

MR. BYRUM: The page just went out the back door, and I haven't had a chance to look at that.

MR. BRANECKY: I guess the other option would be just to list them.

MR. BYRUM: We can pull that out and take some things out of that.

And then we need to add language to that that would also include commercial incinerators having the potential to emit of 100 tons per year. Is that where we're at on that?

We are going to get copies made of this and move forward.

We have -- what I would like to do, if this is acceptable with everyone, is to defer on that and look at what we passed out a few moments ago, the commercial incinerator definition.

While we're waiting on that language to come back, hopefully we've got enough copies if you look over someone's shoulders, you may be able to see one of those.

Again commercial incinerator means any incinerator which burns waste material for a fee or other valuable consideration. The term incinerator means, but is not limited to, municipal, biomedical, and hazardous waste incinerators. I believe if we put the term commercial incinerator in, we probably need to define what we were talking about.

So what I would like to do is hear from the council any discussion on this particular issue.

MR. FISHBACK: Does this imply then that the location of this commercial incinerator, whether on someone's property who uses it or remote from somebody's property that uses it, does not matter?

In other words, you could operate an incinerator that you built on your own property, put

1 your own waste in it, and you're not paying anybody to
2 do that, so it's not commercial; it's yours. As soon as
3 you bring material in and you charge for it, your
4 incinerator becomes commercial.

5 MR. BYRUM: That would be my reading of it.

6 MR. FISHBACK: So this does not cover --

7 MR. BRANECKY: What if it's cheaper for me to
8 build my own -- rather than send my waste off and have
9 it incinerated, to build my own, and I have a net gain
10 from that, because it's cheaper, saving money. Am I
11 doing that for a valuable consideration?

12 MR. BYRUM: Other discussion? We'll have to
13 look at that.

14 MR. DOUGHTY: My name is Dennis Doughty. I
15 might add this. Let's say that you put in an
16 incinerator and you contracted with the local
17 municipality to burn part of their solid waste for some
18 sort of consideration, sewage or some sort of something
19 that you might get from the city.

20 In other words, you don't have to get money,
21 but you have to get something that is valuable. If you
22 get an easement or a right-of-way, that's valuable
23 consideration.

24 MR. BYRUM: I will get to you in just a second.

25 I think the idea of what we were trying to

1875

capture there is in your particular situation if you contracted with anyone else, then it would become a commercial incinerator. As long as it's internal to the ownership of the incinerator; I don't think that's the intent that we had in mind. We may need to clarify that.

MR. FISHBACK: So ownership is not the key issue; it's fee for service or valuable consideration.

MR. BYRUM: Right. That's what I think we were looking at.

MR. FISHBACK: So the situation exists where you can have an incinerator on your own property that has higher emissions than a commercial incinerator that's next door. The commercial incinerator goes through Tier III, and the one you own does not.

MR. BYRUM: That's the essence of the discussion we had the other day.

MR. FISHBACK: I just want to make sure everybody is clear on that; that possibility exists.

MR. BYRUM: It doesn't mean it wouldn't be permitted.

MR. FISHBACK: No. It would be permitted; it just wouldn't go through Tier III.

MR. BYRUM: Other discussion from the council? Okay. We'll go to the public. And I think Jim.

1 MR. BARNETT: Jim Barnett. I just had one
2 question on the definition. Maybe Dennis or someone
3 else could straighten me out.

4 I think it could be potentially a little bit
5 troublesome, this valuable consideration included in the
6 definition. Say you've got a company that has an
7 incinerator and they have a neighbor that has a one-time
8 need to get rid of something. And as part of a good
9 neighbor policy, they say: You can go over and
10 incinerate in our deal and we won't charge you anything.

11 The truth is there's good will derived from
12 that action. Under my interpretation of the law, that
13 would be valuable consideration, even though there was
14 no money changed hands, nothing.

15 MR. FISHBACK: It's avoided cost.

16 MR. BARNETT: Do we really want to deter people
17 from being good neighbors?

18 My concern is maybe the definition goes a
19 little far.

20 MR. FISHBACK: There's one other thing. That's
21 a very good point. There's one other thing we need to
22 consider. We're talking about this as being a "new
23 major facility." So if it is not commercial, no money
24 or valuable consideration changes hands in the proposed
25 application, and it's permitted without being Tier III.

Then at some point in time later, if economics change and neighbors grow up around you that need to use your services, and you start charging for them, it's already a built facility. Then what?

I guess it is exempt. You don't go back through Tier III. I mean, I'm asking that question.

MR. BARNETT: So you're saying there is no negative repercussions from being defined as a commercial incinerator if you've already got your incinerator built?

If that's the case, then I don't think it makes any difference.

MR. BYRUM: I don't see any retroactivity.

MR. FISHBACK: Now, bringing in your neighbor's trash could be a modification that would subject you to permitting.

MR. BARNETT: You're saying being defined as a commercial incinerator doesn't have any ill effects on anything else you may be doing as a company, doesn't have any spillover other than just the tier.

MR. BYRUM: We don't see it as having any, because the definition would be tied directly to the tier.

Nadine.

MS. BARTON: It doesn't sound real good for the

public there. I don't know how to remedy that to make everybody happy. I would hate to see that as a loophole for unscrupulous people that would want to do some kind of burning that would not be caught someplace.

MR. FISHBACK: Well, Larry is quite correct, Nadine, that it would not be in secret, so to speak. There would be a permit; there would be conditions that have to be met; and presumably any modifications of that permit to bring in new, different trash would be subject to review.

MS. BARTON: What kind of opportunity would the public have to know about that, if someone decided to do that?

MR. FISHBACK: What we've said is --

MS. BARTON: Would we have notification and any kind of public hearing about it?

MR. BYRUM: Nadine, I can't categorically say that it would fall in Tier II, but it will probably most likely fall in Tier II, if there's any major change. But I don't know that in every instance.

MS. BARTON: How many instances do we have in this state that would apply to that?

Jim, do you know the answer to that question?

MR. BYRUM: I don't know that I can think of any.

MS. BARTON: Do you know of any?

MR. TRUELOVE: I'm Ron.

MS. BARTON: Okay. Ron.

MR. TRUELOVE: No, I don't.

MR. BYRUM: Yes, sir.

MR. OXFORD: Rod Oxford. I think what you just
 ed about, you just revealed that your definition
 would encourage an application for a construction
 permit --

MR. BYRUM: This only applies to operator --

MR. TRUELOVE: -- and to switch over after they
 have obtained the permit to become commercial --
 legally, legitimately.

You've written a definition which would
 encourage that activity. And I don't think you need to
 characterize the applicant as being devious; they would
 just be taking advantage of the definition as written.

Say: We're building an incinerator; we don't
 plan to take in outside waste right now; we may change
 our plans.

I mean, what I guess I'm suggesting: Either
 accept that that loophole is there and that people will
 use it, or change the definition so it doesn't hinge on
 whether this incinerator is out for hire or not.

MR. FISHBACK: This very reason is why I was so

1 insistent in the negotiations up to this point that the
 2 rules should be based on emissions and not source
 3 category; this very reason. Because if it applies
 4 universally to all types of facilities, regardless of
 5 whether it's commercial or not, regardless of whether
 6 it's in your backyard or not, fundamentally to protect
 7 public health, the only thing that counts is emissions,
 8 what comes out of the stack and in what concentration is
 9 received by some individual.

10 And whether it's an incinerator or not,
 11 fundamentally makes absolutely no difference. But it's
 12 a hot button with the public, and so we tried to include
 13 it.

14 But your point is well taken. As soon as you
 15 become specific on source categories, you invite: Well,
 16 I'm not really an incinerator; I'm just a refuse-burning
 17 facility. You invite all kind of funny business with
 18 the definitions.

19 MR. OXFORD: And, further, that's why I think
 20 the public if they found out three years down the line
 21 that an incinerator was burning in their neighborhood
 22 and that this loophole -- the council knew of this
 23 loophole and let it run free. I think the public would
 24 feel it was not being dealt with candidly at the front
 25 end.

I mean, the choice should be: Take incineration out or make it on a tonnage basis so it stands with the others.

MR. FISHBACK: I agree.

MAYOR TARON: Mr. Chairman, will we not have the authority to amend this regulation as is needed? Can we sit here and draft a perfect law to suit everybody at this sitting? I think we might better move along.

THE CHAIRMAN: I think if we can get to a language that's acceptable, I would like to today.

I don't see why we can't call for another review if it goes commercial.

I don't like the loophole; I will say that.

MS. BARTON: I don't like it either.

THE CHAIRMAN: I don't think that loophole ought to exist, because it does invite -- so I think we just call for --

MS. BARTON: The tonnage?

THE CHAIRMAN: Another review, another review if it goes from an industrial source which uses for themselves into a commercial, assuming that it is over the tonnage.

I just don't see why we're arguing about it, because, first of all, we all agree we want something in

1 there for commercial, right? And so let's just put
2 anybody that wants to go from just a source and an
3 industry to commercial, let's have -- let's have it
4 trigger the review again.

5 Now, Larry, staff will have to come up with
6 that, if it's suitable, have to come up with that
7 language. But, you know, you're going into a different
8 use category, and I do think the public needs to be
9 alerted to that.

10 MS. YORK: Let me ask a question. I want to
11 direct it to Mr. Branecky.

12 MR. BRANECKY: Yes.

13 MS. YORK: If it was limited to all
14 incinerators that had the potential or were asking for
15 permitted capacity of 100 tons or more, what effect
16 would that have on your understanding of what you were
17 trying to accomplish here?

18 MR. BRANECKY: Run that past me again.

19 MS. YORK: If you took the word "commercial"
20 out.

21 MR. BRANECKY: Uh-huh.

22 MS. YORK: Would that have any impact on what
23 you were trying to accomplish on this Tier III
24 classification? So that any incinerator that had the
25 potential or was asking for a permitted capacity of 100

tons or more.

MR. BRANECKY: That incinerator would be defined?

MS. YORK: Would not be defined.

MR. BRANECKY: Would not be defined.

MR. FISHBACK: I think I understand your question. Okay. What would happen is that incinerators other than commercial between 100 and 250 would be subject to Tier III.

MR. BRANECKY: Anything over 50 is going to get caught.

MS. YORK: I understand that. I'm just wondering what that does to the concept that you have. Would that have a negative effect on what you're trying to accomplish?

MR. BYRUM: I believe you would include a significantly additional number of private incinerators.

MS. YORK: Remember, we're talking about proposed new; we're not talking about existing.

MR. BYRUM: Joyce, we don't have a lot of permits that come in for private incineration; there are probable a handful of them.

MS. SHEEDY: And they are usually minor.

MR. FISHBACK: Could you give us a feel for that, Joyce? Are we talking about the old -- what's

1 that called, the IT incinerator where Wal-Mart throws
2 their cardboard boxes in it? Is that one kind that you
3 permit?

4 MS. SHEEDY: We have done so in the past. We
5 don't get many of those anymore, if any.

6 Most of these incinerators that I have seen
7 have generally been less than 100 tons per year, even
8 commercial ones. The Stroud incinerator, for instance,
9 wasn't that less than 100 tons?

10 MR. BYRUM: It was right around 100 tons.

11 MS. SHEEDY: So I'm not sure that that would
12 greatly increase the number of incinerators --

13 MR. FISHBACK: How about wood waste
14 incinerators in the pulp and paper industry?

15 MS. SHEEDY: A lot of times those wood waste
16 are used as a boiler.

17 MR. FISHBACK: But it's a permitted source.

18 MS. SHEEDY: Yeah, because they are using wood
19 waste as a fuel in a boiler.

20 MR. BYRUM: I believe Mr. Truelove has a
21 statement.

22 MR. TRUELOVE: Ron Truelove again with EFO. It
23 seems like what we're arguing about is if a commercial
24 or incinerators as a new incinerator gets permitted and
25 it's greater than 100 tons per year potential to emit,

and for some reason puts that in as a Tier II, as opposed to a Tier III, and then later wants to become commercial, it would seem to me that if an operating permit modification or operating permit needs to be issued for this change and the resulting overall change if it were new construction would have caused that commercial incinerator to have gone through Tier III -- in this specific case it should have to -- and maybe we've got Group A that we've already been talking about of the list and the 100 and the commercial incinerators, 250. Maybe a Group B is an operation permit or some modification for a commercial incinerator that would have undergone Tier III requirements and did not because of some condition that existed at construction.

I don't know how to phrase all of that. But the intent is if it should have gone through Tier III, after it's -- that person is requesting a change to the method of operation or a permit change for emission and the resulting change would create the source in a way that it should have undergone Tier III, to satisfy everyone, it seems to me like they should have to go through Tier III.

Is that the kind of intent that --

MS. BARTON: If it's a modification.

MR. TRUELOVE: If you've got to go into a

1 permit change to take this additional waste from off
2 site and get paid for it, then that change ought to go
3 through Tier III if it now causes that incinerator to be
4 a commercial incinerator and it didn't go through Tier
5 III review already.

6 THE CHAIRMAN: Ron, I think we ought to support
7 that. I don't know the language, but there again that's
8 what I was getting at.

9 MR. TRUELOVE: If it's gone through Tier III
10 already and there is a change, then that change should
11 be subjected to whatever review that it would naturally
12 fall under. That source as a new source has gone
13 through Tier III already.

14 But if it hasn't gone through Tier III and as a
15 resulting change ends up causing the source to be a Tier
16 III, then let's put it through Tier III.

17 MR. FISHBACK: But how about all the other
18 sources that are going to go through the same process?
19 They were Tier II, now five years down the road they do
20 something that would have made them Tier III. We get
21 away from the whole intent of Tier III, which is new
22 major facilities.

23 Again, I come back to the same concern about
24 being so specific in taking care of one source category.

25 MR. TRUELOVE: So the other option is: If you

pulled the commercial incinerator out, it would fall under the 250 threshold in general. That's the other option. And I don't think that's supportive necessarily from all of the people in the room.

MR. BRANECKY: I think Kay York's suggestion was to remove commercial and just have it apply to all incinerators.

And that gets to the point of just looking at emissions rather than what type.

MS. HINKLE: I guess I don't understand. Is there a problem with that?

MS. BARTON: It's the tonnage.

MS. HINKLE: The 100 tonnage. It looks to me like that is a good thing to do.

So if there was a new private incinerator going in, that they would be covered. Right?

MR. FISHBACK: Right. And what you're doing is you're moving the threshold for covering them from 250 to 100, by doing that.

MS. BARTON: I will go for that.

MR. BRANECKY: Does the industry have a feeling on that?

MR. NICHOLSON: Scott Nicholson with ECCI. I would rather try to fix the problem, which was to add maybe another -- as Ron suggested, another Tier III

criteria for moving from a Tier II status to commercial incinerator. I think that's where Ron was going with it.

I don't think it's that difficult to fix, quite frankly, without knowing where the other universe is.

MR. FISHBACK: In the year 2010 people are going to look at this and think the only industry in the state of Oklahoma was incinerators.

MR. NICHOLSON: It is a public concern area; I agree.

MR. MARBERGER: Grant Marberger. We have that precedence. If a facility changes by condition to where they become subject to PSD, then in our regulation it's already written that it will be treated as if they had never been constructed and they start the permit application over.

So we have that language already in the regulation that would fit this.

MR. FISHBACK: Grant, are you referring to -- I'm not sure I follow that.

Are you referring to modifications under PSD that apply there, or are you referring to how a modification qualifies for Tier II?

MR. MARBERGER: It has nothing to do with Tier I, II, or III. It's the fact that if a facility wants a

modification to their existing permit which pulls them into the PSD requirements --

MR. FISHBACK: Right.

MR. HARBERGER: Then the regulation reads they will be treated as if they had never been constructed, and you start all over with permit application, even though it's sitting there operating.

That's in our present regulations.

MR. FISHBACK: Okay. Now, what he's referring to -- this might work. What he's referring to, for everybody's information, is if the facility -- I believe what you're referring to -- excuse me; I'm not inside your head here.

What I believe you are referring to is if a facility makes a modification that subjects it to PSD requirements, it goes back through a process as if it had never been permitted in the first place.

MR. HARBERGER: That's right.

MR. FISHBACK: And if that new permit -- and then we would have to be concerned about whether we're talking about new facility or permit.

But for that to be true, it would have to be a PSD major facility in the first place. So the modification would trigger a PSD modification.

MS. SHEEDY: This is Joyce Sheedy. And in

1 order for modification to trigger PSD. It either has to
2 be a PSD site itself, or it has to occur at a PSD major
3 existing facility and be above a significant level.

4 In any event, what we look at in the
5 modification is just the modification permit, or the
6 permit for the modification is what goes back through
7 the PSD, and not the whole plant that was there before.

8 MR. BYRUM: I think what you're talking about
9 is (B).

10 MR. DOUGHTY: This is Dennis Doughty. I was
11 thinking we might be able to add language that says
12 newly constructed or newly authorized to emit, which
13 would take an existing facility and shift it over; or in
14 the case of Stroud where they took an old incinerator,
15 rebuilt it, and used it for entirely different purpose,
16 it wouldn't be reconstructed or new construction, but it
17 would be reauthorized or newly authorized.

18 And I'm not sure you want to say permitted,
19 because there may be some grandfathered sources that
20 will be newly permitted but not newly authorized.

21 MR. FISHBACK: Let me try to summarize the
22 options here. And anybody that thinks I'm off track,
23 please correct me.

24 Option number 1 is the language that we've been
25 given from the definition of commercial incinerator.

We're concerned about, and properly so, about incinerators with larger emissions that don't happen to be commercial.

So option number 2 is to delete the word "commercial." Okay? That means all incinerators -- privately-owned, publicly-owned, privately-owned and taking fee for service -- would be subject to Tier III if they exceeded either 100 or 250; whatever we've decided.

But I think what we're talking about here, since we're talking about that list of 26, which has nothing whatsoever to do with PSD; it's just that list of 26 we're adding another one to it -- at 100 tons. That's option number 2.

So we delete the word "commercial," and maybe that's all that would have to be done for option number 2.

Option number 3 is to try to distinguish or differentiate between commercial incinerators and all other kinds. And then if somebody was to take advantage of the loophole, close that loophole by requiring them to go through a Tier III process for any modifications that would have subjected them to Tier III initially.

Are there any other options? Are those the three that we've been discussing, or is there a fourth

1 one?

2 MR. BYRUM: That's the three that I believe
3 we've been discussing.

4 Everyone seems to be indicating those are the
5 three.

6 THE CHAIRMAN: Isn't the latter -- isn't the
7 third one simpler?

8 MR. FISHBACK: To me, Bill, it illustrates the
9 problem that we have in trying to write rules for
10 specific sources. Once you've identified it, then
11 you've got to write a specific criteria for the specific
12 source.

13 So I have a problem with doing that in the
14 first place, but that's not the issue here. I don't
15 necessarily think it's simpler, because it involves more
16 language and more ifs, ands, ors, and buts. But it is
17 certainly an option.

18 THE CHAIRMAN: But once you get that language
19 in there, the process is simpler.

20 MR. FISHBACK: And some of the attorneys
21 present might spread some light on this. As soon as you
22 do that for a specific source, what kind of
23 inconsistency have you created for other sources to be
24 sued because they made a modification that would have
25 subjected them to Tier III but they're not required to

go through it?

That's my whole problem.

MS. YORK: Our permitting program in the Department has necessarily involved that type of option, and has placed one type here and one type there, historically. There's no way around it.

And we've never had a legal challenge to that. I think that the public and applicants understand that there are certain types of facilities that present sources of concern and that are more complex and have more implications for the environment and public health.

We have never had a problem with that whatsoever. In fact, as long as I've been with the Department, this is the first time I've ever even heard the issue raised.

MR. FISHBACK: And, of course, the challenge would come from a citizens group next to a refinery who did something that they felt should have been subject to Tier III and it wasn't because they weren't specifically brought into it by this rule.

MS. YORK: Any rule this Department has is subject to that type of action.

It's not necessarily limited to the fact that we put one category -- we treat one category this way and one category that way.

1 That's always a possibility, will always
2 continue to be a possibility. It has never occurred in
3 my experience with the Department.

4 It's a matter of fact that we treat some
5 facilities differently because of the major concern
6 associated with their activities.

7 MR. FISHBACK: No. I understand that.
8 Perception is 90 percent of reality in some cases.

9 MS. YORK: I think the court would have to take
10 a look at the complexity and the degree of concern as
11 well.

12 MR. BYRUM: Madine?

13 MS. BARTON: I didn't think I would ever say
14 this, Bill.

15 MR. FISHBACK: What are you going to do, agree
16 with me?

17 MS. BARTON: Well, I would have to go back with
18 what Kay said. Anything that falls under 100 tons or a
19 modified thereof should be put into Tier III.

20 And would that catch everybody, Kay?

21 MR. BRANECKY: Under? Over.

22 MS. BARTON: I mean, 100 tons or over. Would
23 that catch everybody? Biomedical? Hazardous? Anybody
24 that wanted to modify to do that, whether they are
25 public or private? Would that catch everyone, Kay?

MS. YORK: Uh-huh.

MS. BARTON: And that would be simple, right?

MR. FISHBACK: That's option number 2, delete the word commercial so it's all incinerators?

MS. BARTON: No. Not even mention incinerator. Anyone emitting 100 tons or over or modified thereof would be subject to Tier III.

MR. FISHBACK: Now you've brought a bunch of sources from 250 down to 100.

Yeah, that's clean and simple and a lot more stringent.

MS. BARTON: And I worked for 15 minutes thinking up that.

MR. FISHBACK: It's not a bad idea; it's just a matter of where you set that. I mean, philosophically -- I don't agree with you on the level, but philosophically that's wonderful, because it doesn't make any difference what kind of source it is, only what it emits and how much.

MS. BARTON: We're going back to your original premise, right?

MR. FISHBACK: That's right.

MS. BARTON: So I am in agreement. But is there a problem with the tonnage?

MR. FISHBACK: Yes. Because you're subjecting

1 a whole bunch of sources under PSD that would not have
2 done anything until 250. You're now subjecting them to
3 a Tier III rule at 100.

4 MS. BARTON: Well, in (A) here, it says 100
5 tons per year or more. And that's in the PSD. Isn't
6 that what we're referring to?

7 MR. FISHBACK: Yeah. Go on down to (B) --
8 right after Roman 26, go on down to (B).

9 MR. BRANECKY: If you're not on that list, then
10 you're subject to (B), and you don't kick in until 250.

11 MR. FISHBACK: That list is the 100 ton or
12 more, and then everything else is 250 or more.

13 So, yeah, your idea is wonderful for
14 simplification; it's just a matter that now you've got
15 Tier III requirements on sources that aren't even
16 subject to PSD. You've got the 175-ton guy who doesn't
17 have to do PSD but now he has to do Tier III.

18 THE CHAIRMAN: Just a minute. Dave and Bill
19 and any other industry, could you take a moment to
20 educate, maybe other than just me. Let's say that
21 you're giving a permit to private incinerator. What do
22 you need to include in the application to get that
23 permitted if you're an industry and it's part of your
24 process?

25 MR. BRANECKY: It got a new permit?

THE CHAIRMAN: Right. What is in your application to do that?

MR. FISHBACK: Equipment discretion. Emissions profiles.

THE CHAIRMAN: What you're going to burn?

Now, okay, you get a permit. Now, would you think that that permit would be the same if you were going to commercial? You've got an array of emissions that could come out of a commercial that would not have been considered in your original application.

MR. FISHBACK: It could be the same or different.

THE CHAIRMAN: But it could be different, a lot different.

MR. FISHBACK: Sure.

THE CHAIRMAN: And that --

MR. BYRUM: The permit is probably going to have special conditions that limits you to what you have. But I understand what Bill is saying. If you're running an incinerator to burn --

MR. FISHBACK: Wood waste.

MR. BYRUM: Well, wood waste, okay. I don't know of anybody that does that, but we will use that example because it's a fine example.

And you have another company that wants to buy

1 wood waste, but they don't want to build an incinerator;
2 they want to hire you to do it. So the only change is
3 that you're hiring and you're burning more wood waste.
4 And that could be specific for others.

5 What I think you are looking at is those that
6 would be burning wood waste today but tomorrow want to
7 include the hospital medical waste, and that would
8 require a permit change.

9 THE CHAIRMAN: That's my concern, and that's
10 why I like --

11 MR. BYRUM: But Bill says there's some narrow
12 things where maybe it would be an increase in emissions.

13 THE CHAIRMAN: Well, again, that's why I like
14 Ron Truelove's description of where we are on going from
15 private to commercial and going to a tier III if it
16 wasn't called for in the original application.

17 And that's seemingly -- although it might be
18 more complicated to get this wording in, once it's in,
19 it's pretty evident of where we're headed.

20 MS. BARTON: Say it again, that is.

21 MR. BRANECKY: If you had just the original
22 with the second that said modification to the existing
23 permit that would change it from private to
24 commercial -- change it to a commercial incinerator; is
25 that what you're saying?

THE CHAIRMAN: I think Ron described it a little bit different than that. He said that if this application in the forum that you're going to use it in that they're asking to use it in, other than what it was, and that would have been called for a Tier III, then it goes into a Tier III.

That's what he's saying. And that's all I'm saying, that it didn't get that review originally because it didn't need it for one reason or the other, but now it does.

MR. FISHBACK: And then we run into the complication of having to consider whether we're talking about the net increase would trigger this or the new total after the modification. Here sits an 80-ton incinerator that's private. He wants to become 120 commercial, so. . .

THE CHAIRMAN: That's right.

MR. FISHBACK: Is he 40 or is he 120?

MS. BARTON: One hundred twenty.

THE CHAIRMAN: That's right. That's right.

MR. FISHBACK: Well, that one was easy.

THE CHAIRMAN: I think that approach covers just about everything we've talked about, gets definitions out of the way, leave commercial in there, but does it?

1 MS. BARTON: Let's hear it. Let's hear what
2 you said. I'm getting real close to being sold here.

3 THE CHAIRMAN: Ron can repeat it. The staff
4 can repeat it. We've said it two or three times.

5 But, Ron, you had a good --

6 MR. FISHBACK: Can you push the rewind button
7 and just --

8 MR. TRUELOVE: I just tried to disclose intent.
9 I didn't try to draft specific language. You may want
10 to take a five-minute recess.

11 MS. YORK: I'm working on it.

12 MR. BRANECKY: Does item (C) on the handout
13 from the PSD definition of major source start us in the
14 right direction on that?

15 MS. SLAGELL: If we just take out "by itself,"
16 because right now it says it's 40. If we take out "by
17 itself."

18 MR. BYRUM: You don't want to leave, I don't
19 think, the word "physical change," because changing the
20 fuel may not be a physical change.

21 MR. FISHBACK: Yeah. That's usually written
22 physical change or the change in method of operation.

23 MS. SLAGELL: Just take out "by itself."

24 MR. FISHBACK: Well, now if you at (C) --
25 We're looking at (C) under existing OAC regulations.

That's just what I'm talking about. If the change would constitute a major source by itself, my example, the 40-ton increase would not.

MS. HINKLE: We're going to take that out.

MR. FISHBACK: Oh, you're going to wipe that one.

MS. SLAGELL: We're going to take "by itself" out.

THE CHAIRMAN: Tier classification didn't exist when this was written.

MR. FISHBACK: That's true.

MR. BYRUM: Since we've referred back to the handout on major stationary source, I would like to say -- I would like to conduct the discussion on that portion at this time and say that I'm going to limit it to the items under (A) there. Anything down through number 26 and see if we've got any discussion on those particular items before we go to (B), (C).

And it looks like a numbering problem.

MR. BRANECKY: I need to step back. What are we considering now as the proposal? I mean, what's -- are we still --

MR. FISHBACK: Of the three options that I mentioned earlier, we're considering number 3, which is to write a specific rule that includes either commercial

1 or all incinerators. I think we're talking commercial
2 only -- and then it -- no. I think it's all
3 incinerators. And then if it becomes commercial by
4 accepting waste for fee or it makes a change that would
5 have subjected it to Tier III, it goes through Tier III.

6 MR. BRANECKY: Does item 3 consider the list?

7 MR. BYRUM: That's the thing I was trying to
8 define. If we -- we can either discuss -- I don't think
9 item 3 considers the list above.

10 We can either discuss the below, or we can move
11 back, discuss major source and the list and dispose of
12 that.

13 MR. FISHBACK: You know what we really need is
14 an overhead projector and a grease pencil or we need a
15 flip chart. I think that's the only way we are going to
16 get there, because we are not all seeing the same thing
17 at the same time.

18 Could we procure such?

19 THE CHAIRMAN: What do you intend to do with
20 this?

21 MR. FISHBACK: Write on there what we're
22 inquiring so that everybody is looking at the same
23 thing.

24 MR. BYRUM: The answer to your question is,
25 yes, we can procure such. The other question: Do you

really want to?

MR. FISHBACK: It's pretty hard to do it --

(A discussion was held off the record.)

MR. BYRUM: We need to do some kind of action. We're in the middle of the public hearing and have about 50 discussions going on simultaneously. So we need to do this in an open forum.

MR. BRANECKY: I need somebody to throw out --

MR. BYRUM: Let me suggest something that might move us. We've got what appears to me -- Bill has enumerated three options on the commercial incinerator. I think the other thing that we've got to consider is: What do we do with the other 26 categories we've identified?

What the pleasure of the council may be on how to move forward on this. The suggestion has made that we possibly could go through portions of this, look at the particular scenarios, perhaps get some language drafted that can be either seen or passed around. And can that be done during a lunch break, so we can move forward?

I think that we have at least a couple of issues I see, and one of them may be to look at the handout that we passed out under major stationary source down through item number 26, the discussion point. And

1 then perhaps make a decision on which one of the three
2 positions we've enumerated on the commercial incinerator
3 we may want to investigate and go forward with that.

4 So I believe we have a couple of things we can
5 do before we go to lunch that will give us progress
6 during the break.

7 Does anyone have a problem or suggestion with
8 any of that? Perhaps we could then open it up, if you
9 want to move -- did you want to move through the items
10 (A) through item 26 and see if there's any discussion on
11 that, and then look at what the three options that were
12 suggested? Is that something we can do? Or is
13 everybody lost?

14 THE CHAIRMAN: That sounds all right.

15 MR. BYRUM: I am opening it up, then, under the
16 handout that you have under major stationary source on
17 the items that are listed in item (A) through item 26
18 for any discussion that may be pertinent.

19 Members of the council?

20 MR. FISHBACK: I think it's a good list. Let's
21 use it.

22 MS. SLAGELL: Yes.

23 MR. BYRUM: Any discussions from members of the
24 public?

25 MS. BARTON: I am in agreement with Bill.

MR. BYRUM: So we're dispensed with -- my understanding is that we will use the list that has been passed out down through item 26. So we have progress.

Looking at the three options that we have enumerated a little earlier. The one is the definition of commercial incinerator, which was passed, which states: Commercial incineration means any incinerator which burns waste material for a fee or for valuable consideration. The term incinerator includes but is not limited to municipal, biomedical, and hazardous waste incinerators. That's option 1.

Option 2 would be, and you all correct me if I'm wrong on these. Option 2 would be to delete the word commercial and set a tons limit.

Option number 3 would be to send -- generally stating it to send any changes -- if someone were to be permitted as a noncommercial incinerator and they made changes to their permit that would cause them to become a commercial incinerator, that would subject them to Tier III review.

And I think that's a synopsis of what was said.

MS. BARTON: I think we have it if we put 2 and 3 together and make it one deal.

MR. BYRUM: What you're saying is delete commercial, set a tons limit, and then send any changes

through?

MS. HINKLE: Yes.

MS. SLAGELL: Yes.

MS. BARTON: Yes. I think you have it if you combine 2 and 3.

MR. BRANECKY: Can I throw something out maybe, starting point?

Like Nadine said, if we leave 2 and then add another section of that, we could say a construction permit for a new major stationary source as listed below, and, which would include the list, or any new commercial incinerator that emits or has the potential to emit as defined in, whatever, 100 tons per year or more of any pollutant subject to regulations in the Tier III application.

Next sentence: If any existing noncommercial incinerator is to be converted to commercial use, it shall be subject to Tier III permitting process.

MR. FISHBACK: Regardless of its level of emissions?

MR. BRANECKY: Well, we could tie some level to it.

MS. BARTON: The level was already -- he already stated the level because of the changes to go into -- if they -- if they change it from where they are

1 right now to go into the definitions of the tonnage that
2 you just precededly (sic) described, it would
3 automatically throw it into Tier III, if it was or was
4 not a commercial incinerator.

5 He's captured all that was in there, if he says
6 it again.

7 MS. HINKLE: We were thinking about not having
8 commercial, just put incinerator.

9 MS. BARTON: That would capture --

10 MS. HINKLE: There's no switching from one to
11 the other. It's just purely 100 tons. It breaks that
12 barrier.

13 MR. FISHBACK: See, option 2 as we described it
14 before is if you delete the word commercial from that
15 definition and you apply it to any incinerator, then you
16 don't need any further discussion.

17 The question becomes at what level do you set
18 that threshold? Do you set it at 100 or do you set it
19 at 250? And I don't know that there are other options
20 that we would want to consider, because those are
21 established for many years in that other body of
22 regulation that we're not referring to.

23 So if you --

24 MS. HINKLE: We might have it.

25 MR. BRANECKY: To me, it's not like we're

1 arguing over whether it gets a permit or it doesn't get
2 a permit; it's just whether it has one more level of
3 review.

4 I think all generators 100 tons and go with
5 that.

6 MS. BARTON: It sounded good what you said.
7 Could I have him read it again. Could you read it one
8 more time.

9 MR. BRANECKY: Are we just going to drop
10 commercial then?

11 MS. BARTON: Drop the word commercial and read
12 the whole thing and see how it sounds.

13 MR. BRANECKY: Any construction permit for a
14 new major stationary source as listed below -- and we
15 could list incinerator in that list.

16 MR. FISHBACK: Yeah, because it's not a list
17 based on --

18 MR. BRANECKY: Requires a Tier III application,
19 and then has your list.

20 MS. BARTON: And then what was the other part
21 that you added to it? Didn't you add something else
22 about the modification?

23 MR. BRANECKY: Well, if we were going -- that's
24 if we were going to leave commercial in there and you
25 were trying to cover the noncommercial that went

1 commercial.

2 MR. FISHBACK: There's no switching if it's
3 "any incinerator."

4 MS. BARTON: It sounds good to me. Then you've
5 captured everybody, and it's simple. Am I right on
6 that?

7 MR. FISHBACK: I think the intent of Congress
8 when this unnamed regulation was passed in 1977 was to
9 identify these 26 source categories as being the ones
10 with the highest probability of having the greatest
11 impact on the public. And you can look at those and you
12 can see that you would probably agree with that,
13 particularly if you've ever been around coke oven
14 batteries.

I mean, I don't know that we have any coke oven
batteries in Oklahoma, but they sure do in Pennsylvania.
And that concept continued because one of the first
standards, max standards, was for coke oven batteries,
because they put in a lot of cyclic aromatics. It's a
very hazardous situation if it's not properly
controlled.

So what we're really doing by using this list
is saying, yeah, we agree with Congress that these are
worthy of greater scrutiny, and we're lumping in
incinerators with that; and this list, as somebody

1 already pointed out -- and it may have been Madine --
2 already includes municipal incinerators. So we're just
3 saying we're making it all incinerators.

4 MR. BRANECKY: So what you could do on the list
5 is item 14 just instead of municipal incinerators,
6 scratch all of that and leave incinerators.

7 MS. BARTON: That would capture everything.

8 MR. FISHBACK: This is not a list out of some
9 regulation, now; this is our list.

10 MS. BARTON: That sounds good. I would go for
11 that.

12 MS. HINKLE: At 250 tons?

13 MR. FISHBACK: No, no, no.

14 MR. BYRUM: All the language with the exception
15 of.

16 MR. FISHBACK: That 250 is not emissions;
17 that's feed rate. That's coming in the front end.
18 That's not going out the stack.

19 MS. SLAGELL: We're taking everything out,
20 except --

21 MR. BYRUM: The word incinerator.

22 MR. FISHBACK: No. We're just taking out the
23 word municipal, in 14, Roman 14.

24 MR. BYRUM: Can't you leave everything out
25 except incinerator?

MS. HINKLE: Just the word incinerator.

MR. BRANECKY: I would like to hear from the audience.

MR. BYRUM: Let me just say what's being proposed with the idea.

If you have your list. At item 14 they would be deleting the word "municipal," keeping the word incinerators, and deleting the remainder that's there as the proposal.

MR. BRANECKY: And the language for a Tier III would read: "a construction permit for a new major stationary source as listed below requires a Tier III application."

THE CHAIRMAN: I am then the only one that's concerned about the difference between a commercial incinerator and a private incinerator.

MR. FISHBACK: In this it makes no discussion.

THE CHAIRMAN: Not talking about tonnage; I'm talking about what goes through. And you're wiping that out.

MR. FISHBACK: Right.

THE CHAIRMAN: And so that's no concern of anybody's. Right, Madine?

MS. BARTON: No. Are we capturing the guide that wants to increase from --

1 THE CHAIRMAN: Tonnage has nothing to do with
2 this.

3 MR. FISHBACK: No, it does.

4 THE CHAIRMAN: I'm sorry. Tonnage is the only
5 thing that has to do with this. It's not what goes
6 through the incinerator. If everybody is happy with
7 that --

8 MS. BARTON: Well, this is what we gave up.
9 The Title V definitions is the stuff that's coming out
10 of there; isn't that correct?

11 MR. FISHBACK: Well, you just jot it back,
12 because the Title V threshold is 100. So if all
13 incinerators are 100, it's all Title V major sources go
14 through Tier III.

15 MS. BARTON: Well, is that good or bad?

16 THE CHAIRMAN: I'm simply saying in the initial
17 application that gave a permit for incinerators to be
18 used privately -- okay. All of a sudden it goes
19 commercial. What goes through that incinerator now that
20 didn't that was considered in the application. Not
21 speaking tonnage --

22 MR. BRANECKY: That would be a modification.

23 MR. FISHBACK: It would just go through Tier
24 II.

25 THE CHAIRMAN: That just goes through Tier II,

not Tier III.

Is that all right?

MR. FISHBACK: And let's keep in mind. Please correct me if I'm wrong. I think in discussing this that we believe that there's some secret allowable emission that can come out under Tier II that can't come out under Tier III. And that's not the case at all. The emissions limits that are established are going to be exactly the same.

The only thing Tier III does is give more public participation in the process. Correct?

MS. YORK: If it's an existing and what it wants to increase is the emissions to be over 100 tons per year, then it would fall under Tier II, because it's existing. And the people have more notice as to what's going on and what kind of increase there is.

And if it's an existing facility, it falls under Tier II with the opportunity for public comment, notice up front that they filed the application, and an opportunity for a public meeting.

If it's a new facility, it would go under Tier III -- if it's a new, big facility, it would go under Tier III.

That's consistent with the conceptual table that was developed a year ago.

1 MS. BARTON: I have a question, and it's
2 concerning a specific facility, the Stroud facility.
3 The Stroud facility is now shut down.

4 If a company comes in, are they -- is this
5 going to be considered an existing facility, or if it's
6 a new company that's going to be taking it over, is that
7 going to be considered a new permit, a new facility, and
8 fall under these rules? Or would they be exempt under
9 the other rules, or exempt under these rules?

10 MR. BYRUM: There's not an easy answer to that
11 one. It depends on how the facility is shut down, if
12 they maintain the permit.

13 And I don't know the answer to that; I really
14 don't know whether they maintained the permit or not.
15 But if they maintained the permit and it's a transfer of
16 permit --

17 MS. BARTON: Is the permit transferable?

18 MR. BYRUM: Yes.

19 MR. FISHBACK: Change in ownership almost never
20 subjects a facility to requirement for new permit,
21 change in ownership by itself.

22 MS. BARTON: So it would only fall under Tier
23 II; is that correct?

24 MR. BYRUM: That would be a Tier I.

25 MS. BARTON: We have to address that issue.

1203

folks.

DR. CANTER: But presumably the permit would stay the same in the sense of the requirements of the permit.

MS. YORK: They're talking about the transfer only.

MS. BARTON: But --

MR. BYRUM: If they are doing --

DR. CANTER: If they are going to make changes, that's a different ball game.

MR. BYRUM: Then they would have to be permitted and go through, probably, Tier II; I don't know. It depends on the amount of change.

What you're looking at is an existing facility.

(A discussion was held off the record.)

MR. BYRUM: We're going back on the record.

Welcome back. We are still discussing the three options. I think one of the discussions was to kind of combine 2 and 3. I guess I would throw it open for a discussion to the council again.

MR. FISHBACK: Yeah. Where we finally ended up, if I understand correctly, from the definition that's printed on your handout, you -- Well, we even went a step beyond that. We took the list of 26, go to Roman 14, strike everything in that but incinerator, and

1 we're done. That's where we are.

2 MR. BRANECKY: Right.

3 MR. FISHBACK: Are you happy with that, Nadine?

4 MS. BARTON: I am happy with that. Did that
5 also include a modification?

6 MS. HINKLE: I think we're going to get to
7 that.

8 MS. BARTON: That's our next step?

9 MR. FISHBACK: What we're talking about right
10 now is an initial level of emissions of 100 or more for
11 those 26 categories and 50 or more for anyone else.

12 MR. BRANECKY: What about industry? Any
13 comments from industry? What we're proposing is --

14 MR. FISHBACK: We're proposing to take this
15 list from this other regulation and change item Roman 14
16 to read incinerators, period.

17 MR. NICHOLSON: I think the problem with that
18 proposal is you're still going to have to take even
19 another issue now, and that's the increment issue.

20 MR. BRANECKY: That will be addressed.

21 MR. NICHOLSON: And then I guess in the
22 approach number 3, you just had to fix noncommercial to
23 commercial, in very simplified way, perhaps, but you're
24 trading types of fixes, I think.

25 MR. FISHBACK: Okay. That's the solution on

the table. Did we want --

MR. BYRUM: Other comments from industry? Comments from anyone else? Do you need to have it read to you one more time? Everybody looks blank.

MR. BYRUM: Can we --

DR. CANTER: I thought we were going to get this in writing after lunch.

MR. BYRUM: We can do that. I was just trying --

DR. CANTER: Get the whole thing in writing, and I mean the whole list of 26 and everything else, because I think -- I'm not sure -- it's hard to keep up as to what we've been talking about. To just have it read again -- I mean, I would prefer to see something in writing at this point.

MR. BYRUM: I don't think we're going to vote on it until we do that.

MR. FISHBACK: That's why I thought the overhead would be nice.

DR. CANTER: Why do we need more discussion, I guess?

MR. FISHBACK: We've only solved one piece of it, and that's the initial application piece.

MR. BRANECKY: Let me throw out some language. It's not complete, but it's a start. A construction

1 permit for a new major stationary source as defined
2 below -- or wherever -- requires a Tier III application.

3 And that definition would be this A list, this
4 list of 26; I guess (A) and (B).

5 MR. FISHBACK: Right.

6 MR. BRANECKY: (B) covers everything else
7 that's not on the list.

8 MR. FISHBACK: That's fine with me.

9 And now we need to decide what to do with
10 modification.

11 MR. BRANECKY: Which could be addressed with
12 (C) under that.

13 MS. SLAGELL: With changes.

14 MR. BRANECKY: With some changes. Striking
15 physical, I mean?

16 MS. SLAGELL: And also "by itself."

17 MR. BYRUM: Then my understanding is you would
18 like for the staff to take the language that you have
19 and --

20 MR. BRANECKY: I want to see it all in one --

21 MR. BYRUM: Right. And draft that down through
22 (B) at this time.

23 MS. HINKLE: Maybe (C).

24 MR. BYRUM: Maybe (C). Well, we're going to
25 get there. But I'm just making sure they've got what

we're talking about out there so we can get it prepared for you over the break.

MS. YORK: May I ask a simple question?

MR. BYRUM: Sure.

MS. YORK: Going back to number 14. There would be some modification in those lines?

MR. BRANECKY: Strike everything except incinerator.

THE CHAIRMAN: Incinerator is just one of the categories.

MS. YORK: Just incinerators period.

MR. FISHBACK: Which means all kinds.

MS. YORK: Okay.

MR. FISHBACK: Regardless of location, ownership, usage, fee for service; anything. All incinerators.

MS. YORK: All right.

MR. BYRUM: Okay. The staff will go that far, and we'll work on anything else that you have.

DR. CANTER: Can't you work the (C) in?

MR. BYRUM: We're waiting to get the language from you.

MR. BRANECKY: We could put (C) just as another sentence, what I just read, as any change that would occur to a source not otherwise qualifying as a

1 major source under (A).

2 THE CHAIRMAN: (A) and (B).

3 MR. BRANECKY: (A) and (B) of this definition.

4 MR. FISHBACK: We have to keep in mind that in
5 Tier II we've already defined a significant modification
6 of a major facility under certain conditions as
7 qualifying for Tier II.

8 We've already done that.

9 MS. COLEMAN: If you make the change you just
10 talked about, it will make any existing major PSD source
11 that goes through those modifications subject to Tier
12 III, which we had this discussion at the last council
13 meeting and determined that had should be in fact in
14 Tier II.

15 MR. FISHBACK: Not only should be, but is.

16 MS. COLEMAN: But that's what you voted on last
17 time.

18 MS. YORK: Is it the incinerator you're
19 concerned about with the modification, that if somebody
20 comes through and permits an incinerator for 80 tons and
21 then comes back and wants to increase that by 20 or 30
22 that it would be in Tier II. And you're thinking that
23 perhaps there should be a due process right that accrued
24 since it was not present when it was a new facility?

25 Is that what you're talking about?

MS. COLEMAN: Uh-huh.

MS. YORK: Then you could very easily use words to the effect that any incinerator that's asking for an increase in emissions, that if it were new would have been subject to Tier III permitting process. We have done that in our other programs as well.

MR. TRUELOVE: Ron Truelove again. If you took item (C) and you just said "any change that would occur at an incinerator not otherwise qualifying as a major source under (A) and (B) of this definition, if that change would constitute a major source by itself, or a -- would be a Tier III."

MR. FISHBACK: I think it should say if the net result of that change, not the change, because that gets into that increment question.

MR. TRUELOVE: What it's requiring, Bill, when the change itself being major, meaning the change has to be 100 tons. We were talking about this particular paragraph with respect to that other regulation you've been referring to is a change of 250 tons or a change of 100 tons if you're on the list.

And the source could exist -- if it's one on the list, could exist at 90 tons. You could experience a 90-ton increase and never trigger paragraph (C). You would have to experience 100-ton increase to trigger

paragraph (C).

MR. FISHBACK: I realize that. And that's not the intent of the Council, I don't think.

MR. TRUELOVE: I interpreted that to be.

MR. FISHBACK: And I thought your original statement was that if it would have been subject -- if you went from 90 to 110, then I thought your statement originally was if it would have qualified as Tier III originally, it should now. Rather than having to go from 90 to 100.

MR. TRUELOVE: That was my original statement. But if you invoke (C), that's not the intent of (C).

MR. FISHBACK: I realize it isn't. But remember, this is just a piece of paper we found on the street.

And that's what the council needs to decide. If you want net increases above thresholds to trigger Tier III, or do we want postconstruction emissions after the change to trigger Tier III?

And in my example, do you want something going from 90 to 110, or do you want something going from 90 -- does it have to go to 191 to trigger Tier III?

That's the question we have to answer.

MS. YORK: I think the answer to that is if it were a new facility, whatever emissions they are asking

12021

for now would determine where it fell. If they were a new facility and it was 91 tons, they would be a Tier II.

Whether or not they are permitted at 40 or 50 wouldn't make any difference. If they're wanting to increase to 90, they would be a Tier II. If they're wanting to increase to 101, they would fall under Tier III for the modification.

They may have been a Tier II, or they may have even been a minor source when they first were permitted. But with the emissions that they are asking for, permitted capacity for the emissions, if it falls under Tier II, they're a Tier II.

If it falls under 100 or more, there are a Tier III, as if they were a new facility.

MR. FISHBACK: This same discrepancy has existed in PSD since 1977 and has really never been addressed.

You can be a 99-ton source if you're on this list; and if you add 99 tons of emissions, you're going to trigger it because you've exceeded 100.

MS. SHEEDY: No.

MS. YORK: If you've added to. If you've added to, you don't trigger it.

But you're over 100. Is that what you're

1 saying?

2 MR. FISHBACK: Yeah, that's the point. You
3 can double the size of your facility without being
4 subject to PSD.

5 MS. YORK: And you're saying with incinerators
6 because of the high degree of public concern.

7 MR. FISHBACK: I'm not saying, but, yes.

8 MR. SYRUM: There are those who are.

9 MS. YORK: Because of the high degree of public
10 concern you think it's beneficial to give that due
11 process right anytime an incinerator would want to kick
12 in as if they were new, they would be a Tier II, even
13 though they are existing.

14 MR. FISHBACK: That's the question for the
15 council's consideration.

16 And you can construe all kinds of scenarios.
17 But you've got the case where someone goes from 99 to
18 101, and now they're Tier III, because it was the same
19 as if they were 101 five years ago when they were first
20 built.

21 Or do you want to require -- that's where the
22 wording came from in this other regulation --
23 significant increase. Do you want them to have a
24 significant increase above a certain level to be subject
25 to Tier III?

1 And this regulation provides for definitions of
2 what is significant. And it varies by pollutant.

3 MS. YORK: I think that probably the most fair
4 way to do it is to say if they had done this when they
5 were new, they would be a Tier III. If they want to do
6 it after they're built, they still would be subject to
7 Tier III. Because you give that due process right on
8 the basis of the emissions level, rather than whether
9 they take in waste for a fee or whether they process
0 their own.

1 MR. FISHBACK: And if the Council takes that
2 approach, we have to consider: Are we doing that only
3 for incinerators.

4 MS. YORK: Yeah, as I understand it, you are.

5 MS. BARTON: That's our major concern is the
6 incinerators.

7 MS. YORK: I don't think that's a problem at
8 all.

9 I'm not concerned about the legal ramifications
0 of singling that out. We single out other things and
1 say they are Tier III for modifications of other things
2 in Tier III in some of the other programs.

3 MR. FISHBACK: So you look at this list and the
4 99-ton sulfur recovery plant gets 99 tons with not
5 Tier III review. The 99-ton incinerators gets to add

1 two tons and goes through Tier III review.

2 Everybody understand that?

3 MS. YORK: I think that's a compromise. I
4 think if the environmental groups had what they want,
5 they would have everything that gets over 100 tons in
6 Tier III. A lot of industries would want, regardless of
7 what they increase, they would want it to stay in Tier
8 II. So I think it's a compromise, Bill.

9 MR. FISHBACK: I just want to make sure
10 everybody is clear on the implications of what we're
11 deciding. It's very useful to talk in terms of
12 examples.

13 That's okay with me.

14 MR. BYRUM: So my understanding is that you
15 would like for the staff to draft (C) to say "any change
16 that would occur at an incinerator" -- go from there
17 somewhere.

18 MS. YORK: Let's use language that has to do
19 that would have subjected it to Tier III permit
20 application requirements as if it were a new facility.

21 That's consistent with what some of the other
22 sections do. And I think that would be the most simple
23 way to approach it.

24 Dr. Canter, did you have an alternative to
25 that?

DR. CANTER: No.

MR. FISHBACK: We've got a bunch of bright --

DR. CANTER: But you have some wording in mind that you could put there.

MR. FISHBACK: We've got a bunch of bright people in this room. Can anybody think of another facility where a facility is built and has the potential to become public, particularly any of these other 26 source categories? Is there an example like that?

I can't think of one. I mean, you don't -- I don't think you do that with other source categories. Do you?

All the rest of these are all privately owned. They don't -- I mean, a refinery, for example, buys crude oil wherever it is the cheapest, but that doesn't make them a commercial refinery as opposed to a private refinery; that just means they're doing business.

THE CHAIRMAN: Just a quick look of these says they are all commercial anyway.

MR. FISHBACK: Yeah, they are not commercial anyway. Well, they are not commercial in the sense of the incinerator being commercial. They are private.

THE CHAIRMAN: But they are selling.

MR. FISHBACK: Operated for profit. But that's a different definition of commercial than we're talking

1 about.

2 MS. YORK: I think it just boils down to what
3 you started out saying in the first place. It doesn't
4 really matter whether it's private or commercial. What
5 matters is the amount of emissions that is going to be
6 put into the air.

7 MR. FISHBACK: I still have a problem singling
8 out one source category, but we'll go with it.

9 How, do you need somebody to stay around, or
10 are you going to appoint somebody on your staff to do
11 this?

12 MR. BYRUM: I may need to talk with Dennis on
13 how we procedurally -- I think we can close the hearing
14 and come back with a recommendation.

15 THE CHAIRMAN: After you come back with this
16 recommendation, where are we going from there on this
17 hearing?

18 MR. BYRUM: Hopefully what we will do is close
19 the hearing. During the interim, we will bring some
20 language back that you can look at; somebody can take
21 that language and make a motion. We can take the motion
22 and vote on it, and we can go on to the next hearing,
23 which will be the next set of rules.

24 THE CHAIRMAN: When you say close the hearing,
25 on this one rule? You want to close it before we go or

just go ahead --

MR. FISHBACK: It's adjourned for continuation.

THE CHAIRMAN: Yeah, it's just a continuation.

MR. FISHBACK: Just like it was a month ago.

You are not closing it.

MS. YORK: Yes, we are. We will need a definite recommendation from you when you have the wording.

MR. FISHBACK: We mean closing it now to go to lunch. We're just going to lunch.

THE CHAIRMAN: I need some direction. Do you want this body to close this hearing or not?

MS. YORK: Continue it for lunch. Take a lunch break and continue it.

MR. BYRUM: We can do either one.

THE CHAIRMAN: We will continue this hearing after lunch.

(A lunch recess was taken.)

THE CHAIRMAN: We will call this hearing back into session.

Larry.

MR. BYRUM: We are continuing what we were working on prior to lunch, and that is to come up with a definition that will allow us to look at stationary sources in the Tier III rules.

1 Before our lunch break we had discussed
2 adopting the major stationary source rule that's on page
3 21 of our current rules, 252:100, down through and
4 including item (B). During -- the council asked that
5 during the lunch break that the staff look at putting
6 together some additional language that we might consider
7 so we have something in writing before us.

8 The staff has accomplished that, thanks to
9 Mr. Doughty for spending his lunch doing that for us.

10 We have those here in front of you. If anyone
11 doesn't have a copy, we have several copies up here. We
12 passed those out a few minutes ago.

13 So I would open that to discussion by the
14 council, these possible solutions as listed here.

15 MR. BRANECKY: On solution 1 of our list. How
16 would the list be included in solution 1, as (A) and
17 (B)? It says as defined below, and I assume we're
18 including the list of 26 --

19 MR. BYRUM: Through (B).

20 MR. DOUGHTY: The list would have to follow
21 that with the word incinerator only included in the
22 list.

23 MR. BRANECKY: Sections (A) and (B), right?

24 MR. BYRUM: Right.

25 MR. BRANECKY: Like I said, they are both

offering the same solutions, just in different ways.

MR. BYRUM: I believe that's correct.

MR. FISHBACK: I like solution 2 better.

MR. BRANECKY: That's more straightforward and simple. With the addition of item (B) from the other list. That needs to be included.

I guess item (B) would be "any other source not on the list in (A) of this definition which emits or has potential to emit 250 tons per year or more of any pollutant."

MR. FISHBACK: Because that section (B) says emits or has potential to emit.

That's an actual or an allowable. I think it would be consistent with the other regulations that we've got on the books. For example, the basis for fee payment; it's actual or allowable. I would like to see it be actual or allowable here. And potential to emit I think has the same meaning as allowable.

In other words, I would like to give a facility their choice. And if you make this an "or," any change in actual or allowable, then whichever is the highest would -- you know, if the change in allowable were to bring it above 100 and the change in actual would not to bring it above 100, then it would still be Tier III.

If you use the word or -- actual "or"

1 allowable.

2 MR. BRANECKY: You're saying allowable instead
3 of potential?

4 MR. FISHBACK: I don't know that there's any
5 difference between those two. I don't think there's
6 much difference.

7 DR. CANTER: Doesn't (A) have which emits or
8 potential to emit. And (B) has the same wording. It
9 seems to me it ought to be the same wording in (C).

10 MR. FISHBACK: Yeah, probably so.

11 MR. BYRUM: So what you're saying is change the
12 wording in item (C) to reflect the same wording "or has
13 potential to emit."

14 DR. CANTER: Any change in emissions.

15 MR. BRANECKY: In actual emissions; is that
16 right?

17 MR. DOUGHTY: Yeah, that probably would get it.
18 I didn't know what the council was thinking when we were
19 talking about emissions, so I put either/or in there.

20 And if you go back to the definition, I think
21 you could probably just scratch both of those out and
22 come to the same place.

23 MR. BYRUM: Any change in emissions?

24 MR. FISHBACK: Any change in emissions or
25 potential to emit. Or any change in a permit condition.

And I -- I didn't think, and we're calling this last three lines definition (C) now?

I didn't think it was quite reflective of our concern. I modified it slightly.

It's not would cause an incinerator to be defined; it's "would have caused" an incinerator to be defined as a major stationary source when originally built -- or when initially built, or however you want to say that.

Or initially permitted, yeah. In other words, we're doing something -- a change down the road subjects it to the same Tier III review as would have had occurred initially or originally, or however you want to say that.

MR. BRANECKY: Read it to me.

MR. FISHBACK: Any change in emissions or potential to emit or any change in a permit condition that would have caused an incinerator to be defined as a major stationary source when originally built -- or permitted may be better, because we're really talking about the permit process and not the construction process.

I will read that one more time. Any change in emissions or potential to emit or any change in a permit condition that would have caused an incinerator to be

1 defined as a major stationary source when originally
2 permitted.

3 The only thing I would add to that is that you
4 need to --

5 (A discussion was held off the record between
6 Mr. Fishback and Ms. Slagell.)

7 MR. FISHBACK: "Would have caused" is past
8 perfect. If it would have been this large when it was
9 originally permitted. The fact that it becomes that
10 large sometime during its lifetime is just the fact.

11 Would have caused when originally permitted.

12 MR. BYRUM: Other discussion by the council?

13 MR. FISHBACK: The thought I was getting to
14 there is: I sure would like to include in here or
15 reference or somehow describe that that potential to
16 emit does take into consideration pollution control
17 equipment.

18 And we could just say that.

19 MS. SHEEDY: This is Joyce Sheedy. Do you just
20 want to limit it to pollution control equipment, or also
21 things like hours of operations, production rates,
22 limitation?

23 MR. FISHBACK: Any limitation that is federally
24 enforceable.

25 And we got away from referring to PSD.

1 MS. SHEEDY: Well, that other regulation.

2 MR. FISHBACK: Because you will guarantee that
3 you will have that discussion. The uncontrolled
4 emissions are 500; the controlled emissions are 80; what
5 is it?

MS. SHEEDY: Since we have more than one
definition of potential to emit, I think it is important
to know.

MR. BYRUM: Why don't you just insert that in
(C), what you mean?

MR. FISHBACK: Fine.

I mean, you always run into this problem of
cross-referencing definitions. It's always clearer if
you put it where you are going to use it, because
everything is repeated. But I think it's short enough
that it would be worthy to repeat it here.

MR. BYRUM: The rationale for that is you made
a specific requirement for one specific thing right here
and it all needs to be contained there.

MR. FISHBACK: Yeah.

MR. BRANECKY: Read that again.

MR. FISHBACK: Okay. We can either do it as
section (D) or as a second sentence on section (C).

MR. BRANECKY: Keep it in (C).

MR. FISHBACK: Keep it in (C)? All right.

The additional sentence would be "potential to
emit in this context means emissions after taking into
account any federally enforceable means of emission
limitation."

MR. BRANECKY: I guess we don't need to leave
that in (C) because we referenced potential to emit in
(A) and (B).

We need to make sure -- we separate it out to
make sure it applied to everything, all the references
to potential to emit.

MR. FISHBACK: All of them; that's true.
Because (A), (B), (C). So maybe that statement that I
just made needs to be back up before (A).

Does the staff have any problem with scattering
a definition in some place another than the definition
section?

I think it's really critical that we do this.

MS. SHEEDY: I think there are some problems.

MR. BYRUM: I think we have a problem with it,
but I think that you're carving out something special
here. I have a problem with it, but for clarity --

MR. FISHBACK: It certainly can't make it more
confusing.

THE CHAIRMAN: Why not read "any change in
emissions or potential to emit with controls in place"?

1 MR. FISHBACK: But it's not only controls.
2 There are other things that would limit the emissions.

3 THE CHAIRMAN: Okay.

4 MR. FISHBACK: That's my initial thought
5 because usually that is how you limit your emissions.
6 But as Joyce pointed out, you can do it with hours of
7 operation or --

8 MR. BYRUM: Even enforceable conditions.

9 Why don't you use enforceable permit conditions
0 rather than the federal. Because we may have --
1 limiting hours can be a state condition.

2 MR. FISHBACK: Well, and there was a major
3 decision by EPA in a lawsuit in the D.C. Circuit
4 recently about just this issue, that state only
5 limitations in permits particularly for synthetic minor
6 Title V sources were sufficient to make them minor. So
7 that's a done deal now.

8 A state permit is a -- doesn't have to be
9 federally enforceable -- has to be enforceable.

10 MR. BRANECKY: Do it again.

11 MR. FISHBACK: Where are we putting this,
12 first? Are we putting it above (A)?

13 DR. CANTER: No. (D).

14 MR. BRANECKY: (D) is fine.

15 Potential to emit.

1 MR. FISHBACK: Let's be specific about that.
2 How about we say potential to emit in -- and
3 what's the proper -- Kay, if you're talking about
4 Section 42, is it subsection or what?

5 Potential to emit in OAC -- well, maybe not put
6 that in there, because you're in the document.
7 Potential to emit in 252:002-15-42 means emissions
8 resulting from the application for consideration of all
9 enforceable limitations.

10 And we took out the word federal.

11 MR. BRANECKY: Enforceable permit limitations?

12 MR. FISHBACK: Fine.

13 So PTE in this Section 42 means emissions
14 resulting from the application of all enforceable
15 limitations.

16 MS. SLAGELL: Permit.

17 MR. FISHBACK: Permit limitations.

18 DR. CANTER: Is that understood? I would try
19 to put in for clarity here, whether I put it in after
20 pollution control equipment and/or any other operational
21 measures.

22 MR. FISHBACK: That was the intent to make it
23 all-inclusive.

24 DR. CANTER: Now we're putting in a definition
25 referring to another definition someplace. I thought

the whole idea was to make this specific.

MR. FISHBACK: Well, we can use that old tactic enforceable limitations including but not limited to and then list a few. That will work.

Potential to emit in this Section 42 means emissions resulting from the application of enforceable permit limitations, including but not limited to.

DR. CANTER: Then you could put the pollution control equipment.

MR. FISHBACK: Hours of operation. Feed stock. Whatever else we wanted to include in our not inclusive list.

And the main thing is pollution control equipment.

Who had -- did you have a 251 with you?

MS. SHEEDY: I've got the state definition.

MR. FISHBACK: Does it have the comparable language to the federal language?

MR. BYRUM: Yes, it's identical.

MS. COLEMAN: It says maximum capacity source to emit under its physical and operational design. The potential to emit means the maximum capacity of a source to emit a pollutant under its physical and operational design. Any physical or operational limitations on the capacity of the source to emit a pollutant, including

air pollution control equipment, and restriction on hours of operation or on the type or amount of material combusted, stored, or processed shall be treated as a part of its design if the limitation or the effect it would have on emissions is enforceable. Secondary emissions do not count in determining the potential to emit of a source.

MR. FISHBACK: And that's the same as the federal definition. I don't know that we want all of that in there. If we say enforceable permit limitations, including but not limited to. What do you want to pick from that list? Pollution control equipment? Hours of operation?

A VOICE: Other operations limitations?

MR. FISHBACK: Feed stock? I don't know.

MS. SHEEDY: Production.

MS. COLEMAN: Rather than creating a new definition of potential to emit, why not reference the definition afterwards, because that same definition is the definition rules of our air quality rules.

MR. FISHBACK: The only reason we wouldn't is because it's not right here. Same problem. Yeah.

Well, we can have it both ways. We can reference that and also include this statement. What's the citation on what you just read?

1 MS. COLEMAN: 252:100-1-3.

2 DR. CANTER: Can you read that again? Maybe
3 that's the easiest thing, just to use that definition.

4 MS. COLEMAN: The potential to emit means the
5 maximum capacity of a source to emit a pollutant under
6 its physical and operationa design. Any physical or
7 operational limitations on the capacity of the source to
8 emit a pollutant, including air pollution control
9 equipment, and restriction on hours of operation or on
10 the type or amount of material combusted, stored, or
11 processed shall be treated as a part of its design if
12 the limitation or the effect it would have on emissions
13 is enforceable. Secondary emissions do not count in
14 determining the potential to emit of a source.

15 DR. CANTER: To me that's satisfactory. So if
16 you don't need to even put in the definition here;
17 that's presumed.

18 Or you could say potential to emit as defined
19 in whatever that other section is.

20 MS. BARTON: I have one question.

21 DR. CANTER: That wording seems reasonable to
22 me, consistent here.

23 MS. BARTON: I just want something defined
24 about about the secondary source. What does that
25 pertain to?

1 MR. FISHBACK: Secondary emissions are usually
2 fugitive emissions. Or I think secondary may actually
3 be resulting from the construction process, like dust
4 off the road. It's not processed emission from the main
5 incinerator vent, for example.

6 So they are of much less significance. And I'm
7 not sure that secondary means temporary, but I think it
8 does.

9 MS. BARTON: Does it define it?

10 MS. COLEMAN: It is equally defined in the
11 state rules already, and this is a very precise
12 definition of secondary.

13 MR. FISHBACK: Okay. So now we have said
14 potential to emit in 252:002-15-42 means emissions
15 resulting from an application of all enforceable permit
16 limitations, as defined in 252:100-1-3.

17 MS. SHEEDY: That's okay.

18 MR. FISHBACK: And you give the applicant
19 credit for being able to flip to that reference and
20 check it out, which I don't think is too much of a
21 stretch.

22 MR. BYRUM: Other discussions from the council?
23 Discussion from the audience?

24 MR. NICHOLSON: Just an administrative change
25 to what is now (C), a change in emissions or potential

1 to emit. You have a comma after that "or any change in
2 any permit condition." Shouldn't there be a comma
3 there, "that would cause an incinerator to be permitted
4 as a stationary source"?

5 Otherwise it might seem to imply to all
6 permits.

7 MR. FISHBACK: It's three subject clauses;
8 that's correct.

9 MR. BYRUM: We will insert a comma.

10 MR. NICHOLSON: Okay. Thank you.

11 MR. FISHBACK: If we're at that point, we're
12 home free.

13 MS. BARTON: You will probably shoot me for
14 asking this question, but I just want to make sure that
15 if we go into nonattainment that these rules are still
16 going to be valid and applied and there won't be any
17 problem.

18 MR. FISHBACK: There's no -- because this did
19 not come from PSD, it came from this piece of paper that
20 we found on the street, there's no problem with it being
21 attainment or nonattainment. It applies equally
22 everywhere.

23 MR. BYRUM: Everybody gets washed.

24 Any questions from the audience?

25 DR. CANTER: Can I ask a question on that, to

1 be sure it's clear. If you're in a nonattainment area,
2 the definition of major source varies, depending upon
3 what pollutant you're talking about.

4 MR. FISHBACK: It does under Title 7; it
5 doesn't under PSD.

6 MR. BYRUM: What we've basically done is pull
7 this definition on this piece of paper and we haven't
8 tied it to whether it's attainment or nonattainment. It
9 just applies for this particular purpose.

10 MR. FISHBACK: And the Tier III eligibility of
11 a source, the way we're doing it is independent of
12 whether it's in an attainment or nonattainment area.
13 The PSD eligibility of source continues to be
14 independent of attainment or nonattainment. But the
15 Title 7 eligibility varies.

16 DR. CANTER: Okay.

17 MR. BYRUM: Other questions from the council?

18 From the public?

19 Mr. Chairman. I find no further questions.

20 THE CHAIRMAN: At this point we're to accept
21 these changes and recommend to DEQ Board for acceptance
22 and action.

23 MR. BYRUM: Yes. To capitalize, the council
24 has already voted accepting Tier I and Tier II. So the
25 vote we would be looking at is to accept the changes as

1 we've listed those for Tier III.

2 MS. YORK: Mr. Chairman, may I read the
3 recommendation for the council's information?

4 THE CHAIRMAN: Yeah. We had that already in
5 our packet. Is that the same?

6 MS. YORK: Yes, sir.

7 THE CHAIRMAN: Okay.

8 MS. YORK: On, I guess, November 13, 1995, the
9 members of this council by authority vested in them by
10 the Oklahoma Environment Quality Code, with the correct
11 cite, by roll call vote recommended to the Environmental
12 Quality Board that the rulemaking described in
13 Attachment A of this recommendation be adopted as
14 permanent. This will take effect July 1, 1996, after
15 legislative review.

16 What will be attached are the techs from 40,
17 41, and 42. You have already voted on 40 and 41. So
18 this recommendation would be to recommend 40, 41, and 42
19 as you have amended it.

20 This council has considered the proposed
21 rulemaking and comments about it and determined to the
22 best of its knowledge that all applicable Oklahoma
23 Administrative Act requirements have been followed.

24 This council authorizes the Department to
25 prepare this recommended rulemaking to the Board, making

1 any changes approved by the council, correcting
2 typographical, grammatical, and reference errors and
3 formatting them as required by the Office of
4 Administrative Rules.

5 This is to be done with the understanding that
6 such changes shall neither alter the sense of what this
7 council recommends nor invalidate this recommendation.

8 Respectfully it would be signed by your
9 chairman, and the votes would be recorded as given.

10 THE CHAIRMAN: Kay, was there any other
11 incidentals in this rule that we needed to -- our
12 attention needed to be called to?

13 MS. YORK: No, sir. The changes that you had
14 discussed at the earlier meeting on 40 and 41 are shown
15 on this one-page sheet. And I believe that -- I know
16 these changes represent what you voted on for rules
17 number 40 and 41.

18 The only thing hanging was rule 42, and I
19 believe that you have a measure before you that appears
20 to represent your best effort of that.

21 THE CHAIRMAN: Before we vote on this, is
22 there -- or have a motion made, is there any questions
23 from the council?

24 DR. CANTER: What we're talking about
25 recommending then is what is on this sheet as possible

solution 2, which would have stipulated the entirety -- again, what we've got here is a skeleton with some understanding as to what is going to be changed.

But I'm not -- I thought there was an understanding before lunch that paragraph (B), for example, was going to be included; it's not included here.

So I guess I want to be sure that item (A) in fact is what is on that page which includes the three lines. It includes the 26 items; it includes paragraph (B); it includes paragraph (C) as suggested word changing, and also paragraph (D), which is the potential to emit.

We don't have a complete version of what it is we are going to be voting on here, at all.

MR. BYRUM: I understand that. And I apologize.

DR. CANTER: No, I just --

MR. BYRUM: I would point out to you there is an item (D) on this page that we're looking at. And that, to my understanding, is not included.

What we're doing is striking that and inserting our own (D). So it would be inclusive of the language on the possible solution 2; those items (A) through (B) that are on this page, as on this page, with the

exception that on item 14 the strikeouts of municipal, leaving incinerators, and the rest of the words being stricken, through (B) would be as per -- on this particular page.

Then we would add the language of item (C) that's been drafted here, and the item (D) that's been drafted here.

That's my understanding. That's what the staff would put together.

MR. THOMAS: I'm confused on item (D).

MR. FISHBACK: I may have the closest version. We're clear on (A) and (B).

(C) any change in emissions or potential to emit, or any change in any permit condition, that would have caused an incinerator to be defined as a major stationary source when originally permitted.

(D) potential to emit in 252:002-15-42 means emissions resulting from the application of all enforceable permit limitations as defined in 252:100-1-3.

MR. BYRUM: That's what I would propose that the staff would type up and prepare as what you've --

MR. FISHBACK: And, unfortunately, I just thought of something that we haven't considered.

We all agreed that we wanted to make this

category of incinerator as broad as possible to include municipal and commercial and hazardous waste and biomedical and all the rest of these.

And I think -- anyone correct me if I'm misstating this -- but I think everybody's understanding in that regard, their mental picture of incinerator was a device in which you stick something into a flame, and that something is usually solid material, whether it's cardboard boxes at Wal-Mart or it's old needles at a hospital, or whatever it is; that's what we were thinking. That's what I was thinking.

There is another classification of incinerator which has not been discussed, and it's very common in the oil and gas industry at petroleum refineries and a lot of other places, and that's basically a hydrocarbon incinerator. Usually they are called a flare, but they can also be called an incinerator. And their feed stock is not a solid; it's not needles and boxes of stuff; it's combustible gasses.

And I think the concept we've been dealing with here is entirely different than that.

So I'm not sure that we want to make the incinerator category include all kinds of incinerators, because we're talking about more than a semantic argument here. That's the name. If you have a refinery

1 and you want to combust some gaseous waste, you go to
2 John Sink in Tulsa, and they sell you an incinerator.

3 And without definition here, that incinerator
4 would be subject to Tier III, and I don't think that's
5 our intention.

6 So I'm sorry. I thought of that late in the
7 game, but at least I thought of it.

8 MS. SHEEDY: This is Joyce Sheedy. So when
9 you're using incineration as a control device and not as
10 a method of disposing of something, as a thermal
11 oxidizer is an incinerator.

12 MR. FISHBACK: Yes.

13 MS. SHEEDY: But we don't permit it as an
14 incinerator. What is our definition of incinerator?

15 Would that rule this out?

16 MS. COLEMAN: Nancy Coleman, Tinker Air Force
17 Base. It can, because it includes gaseous combustible
18 waste.

19 MS. SHEEDY: And in some cases maybe gaseous
20 combustible wastes are going through what we call an
21 incinerator and not a control.

22 MR. FISHBACK: You don't want to get in the
23 position of forcing a facility to go through a Tier III
24 review to reduce emissions. And that's what we're
25 talking about. Is it a piece of control equipment, or

is it the primary process function of the facility?

At the Stroud incinerator and at the other ones that I believe are mental image reflected, we're talking about the primary industrial process is incineration, not control of waste gas.

MR. BRANECKY: Isn't the definition it has to be 100 tons as a result of that piece of equipment? Does that piece of equipment cause emissions of 100 tons or more?

MR. FISHBACK: Usually not, because, of course -- of criteria pollutant subject to regulation, usually not, because its purpose is to destroy it.

MR. BRANECKY: So if it doesn't add to any emissions, it wouldn't be --

MR. FISHBACK: But it can in the case of sour gas incineration, where your emissions are SO₂.

DR. CANTER: Wouldn't that be covered in petroleum refineries?

MR. FISHBACK: If it occurred in a petroleum refinery, yes, it would. But there is a lot of cases where that occurs outside of a petroleum refinery.

MS. SHEEDY: Can you just exempt control devices?

MR. FISHBACK: That's what I would propose, yes. We stick with the same general -- and we're

1 talking about them as now. Incinerators except where
2 used as control equipment.

3 MS. BARTON: I don't know about that. It
4 sounds like you're exempting incinerators. If you're
5 worried about refineries, why don't you just single out
6 refineries? If it's for a control process for
7 refineries --

8 MR. FISHBACK: It can be a number of different
9 places.

10 MS. BARTON: Or something.

11 MR. BYRNE: A lot of what we're talking about
12 here is semantics. We call them thermal oxidizers; we
13 call them flares.

14 MS. COLEMAN: If you go with that exemption, I
15 would prefer that you clearly specify utilized as "air
16 pollution control equipment."

17 MS. BARTON: I think that's better.

18 MS. SHEEDY: That's true.

19 MR. FISHBACK: Because basically anything you
20 want to get rid of that you stick in it -- you could
21 argue that a municipal waste incinerator is a pollution
22 control device if you eliminated pollution to a landfill.

23 MS. SLAGELL: You could.

24 MR. FISHBACK: Absolutely.

25 MS. SLAGELL: You could.

MR. FISHBACK: Roman 14 says now incinerators, except where used as air pollution control devices.

Is that what you meant, Nancy?

MS. BARTON: That can't be interpret to let incinerators off the hook?

MR. FISHBACK: Not if the primary -- I mean, you can't say that the installation of a municipal waste incinerator is an air pollution control device, because it creates air pollution.

Now ironically enough, you can have a waste gas incinerator on the end of a municipal incinerator as a control device, to burn off the waste gas that's produced by the primary process function, which is incineration.

So you could have both kinds of incinerators at one location. And that wouldn't be a problem with this definition. The primary process incinerator would be subject to Tier III, and its pollution control device would be part of that Tier III review when it was originally built. And if it was built separately, it would not be.

So that should be fine.

MR. FISHBACK: What else haven't we thought of? This is scary?

MR. BYRUM: The point is you can always come

1 back. We can always come back.

2 MR. FISHBACK: You can, but the process is so
3 lengthy that it's pretty --

4 MR. BYRUM: I understand that.

5 MS. BARTON: We're doing away with 500 permits
6 a year if we lived in Texas.

7 THE CHAIRMAN: That is added to Roman numeral
8 14 in (A).

9 MR. FISHBACK: Roman numeral 14 in (A) now
10 reads: Incinerators except where used as an air
11 pollution control device.

12 (A discussion was held off the record.)

13 MR. FISHBACK: And just to be completely
14 forthright about this: You know, we talked about
15 earlier this morning the idea that somebody would build
16 an incinerator and say: Well, it's not commercial, so I
17 don't have to go through Tier III and, gosh, the day
18 after it was built somebody came to me with this
19 goldmine worth of waste stream and suddenly I'm
20 commercial. That circumvention issue.

21 And, believe me whenever you write a rule,
22 there's always somebody that will figure out how to get
23 around it. and usually the guy that is the most
24 familiar with it will figure out how to get around it.

25 So the thought just occurred to me that you

could have a waste incinerator like we are thinking of, and if somebody wanted to pipe some waste gas to it and also combust it, they might try to classify it as an incinerator used for air pollution control and get around the regulation.

But what I'm counting on here is that the circumvention rules that are already on the books would -- something like that would be blatantly obvious.

But you see what I mean.

MS. BARTON: Joyce, what are you saying over there?

MS. SHEEDY: I don't think you could do it, because we would be looking at it as an incinerator, not just a control device, because it's incinerating other things.

MR. FISHBACK: And I would -- now that I brought up the problem, I would be willing to offer a solution. You could say where used exclusively as an air control device, to get rid of that problem.

See, there's always another permeation.

So I wouldn't have any problem -- wouldn't have any problem doing that. Because, believe me, that argument -- I've done it, you know.

MS. BARTON: Let's put the word exclusive before that. That would just shut them off right there.

MR. FISHBACK: Yeah.

MR. NICHOLSON: I agree.

MR. FISHBACK: Anybody have a problem with that?

MS. SHEEDY: Is that going to be -- okay.

Okay. What about some kind of incinerator where you might be -- not an incinerator but pollution control device where you might be recovering heat from it. Does that mean it's not a pollution control device anymore?

MS. BARTON: No.

A VOICE: Heat recovery. And it's -- not the same thing; I don't think so.

MS. SHEEDY: So obviously don't mix that.

MAYOR TARON: Ready for a motion, Mr. Chairman.

THE CHAIRMAN: Having revised the item 14 under (A), everything else remains as previously read. I'll entertain a motion and that motion is in the form that Kay gave.

MAYOR TARON: Has been presented. Yes. I so move.

THE CHAIRMAN: Do I hear a second?

MR. FISHBACK: I'll second it.

THE CHAIRMAN: The motion has been made and seconded. Please note that Bill Fishback is reading the

1 motion.

2 MR. FISHBACK: My only question is: Where does
3 what we've decided on go in this?

4 MR. BYRUM: It's attached.

5 MR. FISHBACK: It's an attachment.
6 Okay.

7 THE CHAIRMAN: I think we can let the staff
8 handle those details, probably, Bill.

9 MR. FISHBACK: Okay.

10 THE CHAIRMAN: I've got a motion and a second.
11 Any other discussion or questions? If not --

12 MR. BRANECKY: I would like to offer a
13 suggestion that maybe next time -- It's difficult for us
14 to understand fully when we have it peacemeal. And
15 maybe somehow through or computer wizardry we can have a
16 computer here that can draft it as we go and spit out a
17 printed copy where we can look at exactly what we're
18 voting on.

19 I want to be sure what I'm voting on.

20 MR. FISHBACK: I agree, and I know that Larry
21 has expressed that concern.

22 I don't have any problem with -- we can bring
23 that to the council in 15 or 20 minutes if you want to
24 do it.

25 DR. CANTER: My point is not to suggest any

1 kind of subterfuge. It's just a fact that we sit hear
2 and we talk and talk and talk and in everybody's best
3 intention, something gets left out. That's why -- are
4 you saying that we can have this in complete form in 15
5 minutes?

6 MR. FISHBACK: Dennis, you've got this on
7 WordPerfect?

8 MR. DOUGHTY: It's on WordPerfect.

9 MR. FISHBACK: If you want to adjourn for 15 or
10 20 minutes, we'll go fix it.

11 THE CHAIRMAN: No. We've got a motion; we've
12 got a second. Everybody understands.

13 I've asked if there are any more comments, and,
14 Dave, your comment is fine. Maybe we can discuss that
15 after this.

16 If there are no further comments, Myrna will
17 you call the roll.

18 THE SECRETARY: Mr. Branecky.

19 MR. BRANECKY: Ayes.

20 THE SECRETARY: Dr. Canter?

21 DR. CANTER: Aye.

22 THE SECRETARY: Mr. Fishback?

23 MR. FISHBACK: Aye.

24 THE SECRETARY: Ms. Hinkle?

25 MS. HINKLE: Aye.

I, GAYLA CHRONIC, CSR, RPR, having been duly appointed as Official Court Reporter herein, do hereby certify that the foregoing pages number from 2 to 123, inclusive, constitute a full, true, and accurate transcript of all the proceedings had in the above matter, all done to the best of my skill and ability.

DATED the 8th day of December, 1995.

BEFORE THE OKLAHOMA AIR QUALITY CONTROL COUNCIL

COPY

HEARING BEFORE THE OKLAHOMA AIR QUALITY CONTROL COUNCIL
HELD ON NOVEMBER 13, 1995
AT OKLAHOMA CITY, OKLAHOMA

COUNCIL MEMBERS PRESENT:
Mr. Bill Breisch, Chairman
Mr. David Branecky
Ms. Meribeth Slagell
Dr. Canter
Mayor Pierre Taron
Mr. Bill Fishback
Ms. Kathryn Hinkle

Also Present:
Mr. Larry Byrum, Protocol Officer
Ms. Myrna Bruce, Secretary of Council

By: Gayla Chronic, CSR, RPR

REPORTING SERVICES

ATTACHMENT D

Oklahoma City, OK
November 13, 1995
9:30 o'clock a.m.

.....

MAYOR TARON: Mr. Chairman, if there isn't any problem with this, at our next meeting we have all voted for the motion; the majority side can always make a motion to reconsider, if it's necessary. You're not dead yet, if there's a problem.

THE CHAIRMAN: Well, we might not be dead from one standpoint, but we could be dead from another if we don't get this to DEQ.

Now, that takes care of this particular rule.

Larry, you are still continuing as protocol officer on these other hearings. Can you advise us whether we need to take these up now, or as it was originally advertised, continue them until the December meeting?

MR. BYRUM: I think that's probably at the pleasure of the council. We did have a discussion of these other items at the meeting in Tulsa.

It would be beneficial, I think, possibly to let Kay go briefly through these and get whatever comments we could to move us down the road for the December meeting.

122-

And we can take those particular comments that we might hear -- and I know there were several that were generated in the Tulsa meeting that I have notes of. If those could be heard in the public forum here today, perhaps the staff could take some action on those and have a clearer picture, at least of what you would be voting on.

I'm not sure we would have all the comments, but it would give us the opportunity to have something in your packet that's closer to what we might want to vote on.

That's again, the option of the council.

THE CHAIRMAN: Do you have these in your packet, 252:100-7-8-11-6?

And we did hear from Kay at our last meeting on the 17th of October. What's your pleasure? Do you want her to review these again today?

I'm not sure after you reviewed these with us, Kay, if we even got to the point of asking any questions of them last October.

MS. YORK: No. And since it's been advertised, I would feel more comfortable with the Administrative Procedures Act requirements that we go ahead and give people who are here an opportunity to ask questions or make comments, as well as council members, of course.

1 THE CHAIRMAN: Larry, will you continue as
2 protocol officer.

3 MR. BYRUM: Ladies and gentlemen: My name is
4 Larry Byrum. I am the Director of the Air Quality
5 Division. As such, I will act as protocol officer for
6 this hearing.

7 This hearing is convened by the Air Quality
8 Council in compliance with the Oklahoma Administrative
9 Procedures Act, Title 40 of the Code of Federal
10 Regulations, Part 51, as well as the authority of Title
11 63 of the Oklahoma Statutes, Sections 1, 1801, et seq.

12 This hearing was advertised in the Oklahoma
13 Register for the purpose of receiving comments
14 pertaining to the proposed revisions of OAC 252:100-7,
15 permits; OAC 252:100-8, operating permits, Part 70; OAC
16 252:100-11, alternative emissions permits; and OAC
17 252:100-6, which is a new section.

18 If you wish to make a statement concerning
19 these rules, please complete the form at the
20 registration table, and I will call upon you at the
21 appropriate time.

22 I would call upon Ms. Kay York to give the
23 staff position on these proposed changes.

24 MS. YORK: As discussed in the previous part of
25 this meeting, these rule changes are made necessary by

the adoption of the Board of uniform permitting rules that apply across the board to the different tiers and the applications filed under them.

Those uniform rules appear in your handout. They begin with -- and I'm not sure that they're colored in what you're looking at. Some of you are looking at what you got today; some of you are looking at what you had in the last session with the -- where we did the briefing in the morning on these rules.

It's chapter 002, subchapter 15. Begins with the table of contents that looks like this; goes through part 1, 3, 5, 7, and 9. These are the uniform rules. All of the changes that have been made -- All of the changes that have been made in the air quality rules have been made in response to avoiding duplication and clarifying and eliminating conflicts with these uniform rules.

Tier I, II, and III processes are described in part 3. The tier classifications which you have just been through for air quality appear in part 5. Those are on a different time schedule. The Board will be looking at part 5, recommendations from each council, and will be reviewing those and considering them for adoption at its November 28th meeting.

Part 7 review procedures and permitting time

lines is existing law, with some updates and clarifications.

Part 9 is consolidated permitting.

Consolidated permitting in this instance says that if an applicant applies for, for example, hazardous waste permit and an air quality permit at the same point in time, then the Department can choose -- it is the discretion of the Department -- to have the public meeting and public comment run concurrently; and if it's a Tier III to have to administrative hearing on both.

Are there any questions about the role of the uniform rules, parts 1, 3, 7, and 9? Okay.

After a team put together these uniform rules, based on the statute; and the statute for the most part is self-explanatory, so you will find a lot of references in here as to what section of the statute controls.

After the team did that, then each division went through their rules and made the changes that they felt were needed to be able to put this uniform permitting program into effect.

In air quality, that meant taking a look at subchapter 7, which dealt with minor source, construction permits, and minor source and major source -- no, minor source operating permits; major

1229

source construction permits, relocation permits -- and there's something else, and I can't remember what it is.

We looked at subchapter 2. We reorganized everything that had to do with those specific types of permits that were not common to everything else, and we left them in subchapter 7 with amendment.

Subchapter 8 as to Title V operating permit. We made sure that we eliminated all duplications. The ones that requirements of subchapter 8 that were also subject to other permits, we've removed and put someplace else, which I will talk about in a minute.

Subchapter 9 was created to contain cross-references. It was created to contain the provisions that apply to all permits, regardless whether it's a major source, a minor source, a PSD, an incinerator, or relocation.

And subchapter 11 was amended to clarify the role of the council in alternative emissions reductions authorizations and how it fits into the permitting scheme.

I would like to begin with subchapter 11, if I may.

I very quickly will go over this section by section, so that you have a basic understanding of what it is we have done and what we're recommending.

1 Rule 11-4, the name has been changed so that it
2 is not called a permit anymore, but it is called a plan.
3 The idea is that it's a permitted facility that comes in
4 and asks for this. Therefore, they don't need another
5 permit, but they need approval of a plan.

6 Subsection (B) makes clarifications as to what
7 needs to be in the application form, for the
8 authorization.

9 Subchapter (C) -- subsection (C); I'm sorry.
10 Again clarifies that where there is more than one
11 facility involved, additional information is given.

12 Section 11-5. Again takes it from a permit
13 petition to an application for alternative emissions
14 reduction approval. And it makes clear that anything
15 that is approved in this area requires a corresponding
16 revision in the SIP plan.

17 Rule 11-6. Instead of issuance of permit; it
18 is termed authorization procedures. All of the
19 procedures that existed are taken out, are marked
20 through; and in their place on the very last page it
21 makes clear that it requires a SIP approval and that
22 that SIP approval consideration has to be approved by
23 this Council through a hearing on a change to the SIP.

24 It also makes clear that the notice of that
25 hearing before this council needs to be given in a

1 newspaper local to the site with 30 days' notice.

2 Now, I understand that there has been in the
3 history of the council one alternative reduction,
4 emissions reduction, approved that also went through a
5 SIP plan. I have no details about that, but that's
6 what I understand.

7 Whether or not this process or this type of
8 approval comes about ever again, I don't know. But what
9 it does is clarify that rather than the public meeting
0 and the administrative hearing on the Tier III
1 application, that this process is different. This
2 process involves review by the Department and that a
3 hearing on this proposed SIP revision before this
4 council.

5 Are there any questions?

6 DR. CANTER: Can I ask a question. On the very
7 last page.

8 MS. YORK: Yes, sir.

9 DR. CANTER: Item 1, hearing.

0 MS. YORK: Yes, sir.

1 DR. CANTER: The first word after that is
2 permits. I'm assuming that ought to be authorization.
3 You stressed it's not a permit.

4 MS. YORK: Dennis?

5 MR. DOUGHTY: Yeah.

1 MS. YORK: What did you want to do on that?

2 MR. DOUGHTY: I think it's a matter of
3 semantics. If you want to change it to authorization, I
4 don't have any preference one way or the other.

5 MS. YORK: Then it will be authorizations
6 approved pursuant to this subchapter.

7 MAYOR TARON: Authorizations issued pursuant to
8 this subchapter?

9 MS. YORK: Approved pursuant.

10 MR. BYRUM: Other questions from Kay from
11 council?

12 MR. BYRUM: Questions from key from the
13 audience?

14 MS. COLEMAN: Nancy Coleman.

15 Kay, I believe this is a typographical error on
16 page 1(B) and 9(D)

17 MS. YORK: What line is it?

18 MS. COLEMAN: Line 50. It should end a
19 complete sentence, and I think the semicolon and the and
20 needs to be stricken.

21 MS. YORK: Thank you.

22 MR. BYRUM: Other comments or questions for Kay
23 by the audience?

24 MS. BARTON: I would like some clarification.
25 Nadine Barton. Some clarifications on 252:100-1-15,

1221

general provisions.

Must conform to the following requirements. 1. and emission to reduction is defined and it gives the list of numbers. Must be shown as a result of the control strategies proposed in the application.

Number 2, major sources located in nonattainment areas. In addition to the requirements in 1 of this subsection and the limitations provided in -- that was the number. Must commit to install reasonably available control technology as defined by applicable rules or such other control measures which demonstrate and achieve equivalent reductions.

Then, number 3. The DEQ may require a net emissions reduction below the level required for compliance with any applicable regulation or standard and a corresponding revision to the state implementation plan.

What does that mean, that last part? That the DEQ may require net emissions below the level required for compliance?

MS. YORK: Since number 4 is new language.

MS. BARTON: Yes.

MS. YORK: I believe that number 4 should make clear that an approval for the reduction must be accompanied by a revision to the SIP.

1 Is that your understanding, Dennis?

2 MR. DOUGHTY: Kay, the way that was intended to
3 work is if you have -- if you want to qualify under one
4 of these plans or these permits as they were originally,
5 what you had to do was to make a reduction equal to or
6 more than what it took for you to meet the emissions
7 standards.

8 In other words, if you have a piece of
9 equipment that's not meeting an applicable standard, in
10 order for you to not have to put on \$10,000 worth of
11 equipment on this thing, which probably couldn't be
12 required anyway, they would allow you sort of a public
13 effect, where you would reduce emissions in one part of
14 the facility that you weren't required to.

15 So even the one that was issued, they required
16 a 1.5 to 1 emissions reduction.

17 So in order to qualify, you had to reduce core
18 emissions 1 1/2 times what they would have been if you
19 had been in compliance.

20 Is that clear?

21 Okay. The other thing is that this is the
22 effect of a bubble. And it does not meet EPA
23 requirements for a bubble. So in order for us to make
24 the federal enforceable, to keep them from coming in and
25 enforcing the older rule, the old standard, we have to

submit it as a SIP provision.

MR. BYRUM: Case by case.

MR. DOUGHTY: Case by case, yes.

MS. BARTON: I don't see anywhere where it says that, that this has to be approved on a case-by-case approval for this type of emissions reductions. Is that understood? Is it core?

MR. BYRUM: The core restriction --

MR. DOUGHTY: It's a fact of life if it's a part of our SIP, each individual determination under this rule if it's not submitted as a SIP revision, it becomes federally enforceable. We may tie the state up.

The state might be unable to enforce the old standard. But the EPA could still enforce it, if this permit or application was not submitted as a SIP revision.

Actually what you do, you submit your rule as a SIP revision, and then everything that's enforced under that one is federally enforced.

In this case these people are asking to be excepted by the rule by offsetting their emission. So they are still subject to the old rule unless we take a case-by-case scenario and submit it.

MR. BYRUM: I think that's what line 4 that's totally underlined is trying to say.

1 MS. YORK: Madine.

2 MS. BARTON: Yes.

3 MS. YORK: I understand your confusion on this,
4 because it's not written correctly. If you will allow
5 me to go back and work with that for a while and bring
6 it to the next meeting, I think I can take care of the
7 confusion.

8 DR. CANTER: Kay, on page 2, line 42, I think
9 the word permit should be authorizations.

10 MS. YORK: Thank you, sir.

11 MS. BARTON: I'm looking at this, just looking
12 down here under the limitation that we were just looking
13 at.

14 Particulate matter equal to or greater than 10
15 microns in diameter may be treated for other
16 particulates equal or greater than 10 microns.

17 Can we do that? We trade greater than?

18 MR. BYRUM: The idea there is that PM-10 you
19 can trade for anything. TSP you cannot trade for.

20 MS. BARTON: That's allowed for in EPA -- at
21 the federal level too.

22 MR. BYRUM: EPA does not regulate TSP today.

23 MS. BARTON: Do we want to do that?

24 MR. BYRUM: Yeah. I think --

25 MS. BARTON: Are we going to benefit? Is air

1288

quality going to benefit with particulate matter?

MR. BYRUM: I think so. I think anytime you want to try to regulate pollutant that is nonregulated pollutant and one that has a greater health risk for one that has a lesser health risk, I think we gain.

MR. DOUGHTY: Larry, if I may.

This is Dennis Doughty. I think the way this was intended -- although it's not real clear from the techs here, I think the way it was originally intended was that if you were -- if you were having a problem meeting an emissions level for TSP, you could control particulate matter in the 10 micron range, and I think that was the way it was intended to -- in other words, it's going to be stringent on the person making this application.

So if they have a process weight problem with TSP, they could control an equivalent or greater amount of TMP which would be a greater benefit; although, it's not it particularly clear from the way it is written.

But in any case, it's going to cost them more in terms of emissions limitations that they would have had under the old standard, whatever that happened to be.

MR. BYRUM: Additional questions for Kay?

MR. DOUGHTY: I believe this is old language

1 that was up for a change, anyway.

2 MS. YORK: Then it's my understanding that I
3 will make the corrections that Dr. Canter and Nancy
4 Coleman so pointed out. And to make it clear: On rule
5 11-5, I will take the subsections of (A) and clarify and
6 rewrite, reform it, so that it does make sense.

7 DR. CANTER: And, Dennis, were you also
8 suggesting that the line 51 on page 2 be written in some
9 fashion? Is that what you were saying?

10 MR. DOUGHTY: I'm saying that I believe this
11 was intended to say if you are -- if you should be
12 controlling TSP that you may control emissions of -- you
13 may control particulate matter of less than 10 microns
14 in lieu of TSP.

15 I think that's what that was intended today.

16 DR. CANTER: Somehow that doesn't come across.

17 MR. DOUGHTY: It's a little difficult.

18 DR. CANTER: It's a difference between capital
19 (A) on line 48 and (B) on 51. Maybe some rewording
20 there.

21 MS. YORK: All right.

22 DR. CANTER: I don't think --

23 MS. YORK: See if we can clarify that.

24 DR. CANTER: I don't think the idea of Pm-10
25 creating in terms of PM-10 requires TSP. If you're

1 saying that you would allow -- let me see if I'm saying
2 that right.

3 You don't want to reduce TSP and let more
4 emissions of PM-10 out, because those are the ones that
5 are a health concern anyway.

6 MR. DOUGHTY: It's the other way around.

7 Normally, in the rest of the subchapters, if
8 there's a problem with understanding what the technical
9 requirements are -- that is not the purpose of this
0 hearing or this rulemaking; that we are concerned with
1 the process requirements only.

2 However, Dr. Canter, I think in a sense we're
3 clarifying the fact that this is a process that always
4 goes through the process, that the technical aspect of
5 that are important, and should probably be clarified.
6 So we will look at (A) and (B) of that rule.

7 MS. YORK: Okay. If I could have you look now
8 at subchapter 6.

9 MR. BRANECKY: Which is on pink.

10 MS. YORK: Subchapter 6 is a new subchapter
11 that is proposed for purposes of cross-reference within
12 the air quality rules and outside them.

13 As required for subchapters, we have purposed
14 definitions. We then on 63 do a cross-reference to
15 uniform permitting process.

1 That language is standard language that is
2 found in every set of rules that the Board is going to
3 be looking at, in January, the cross-references in
4 tiered application requirements and the other permitting
5 processes. Here again, on your sheet we had to renumber
6 this -- the renumbering is not done, but under part 3,
7 which is rule 100-6-30, the 30 is not correct; it should
8 change to 31.

9 Part 3, which includes rules 30, 31, and 32,
10 then says that the Department has the right to have dual
11 permitting construction and operation. That is taken
12 from subchapter 7. There is no change there to what is
13 existing law. It is merely a cross-reference and a
14 clarification.

15 Rule 32 cross references the other
16 authorizations relocation permits. Modifications of
17 permits and modifications of sources becomes, as you can
18 see by the highlighted line on the bottom of the page,
19 line 57, and then it comes from subchapter 7.

20 And the top of page 3 is a cross-reference to
21 the other types of authorization and where the rules
22 regarding them can be found in the air quality.

23 MR. BRANECKY: Do we on item 6, we track
24 asbestos and Tier 1 in subchapter 15.

25 MR. FISHBACK: Correct.

1205

MS. YORK: That's correct.

But this is a cross-reference to where they can find the rules to relate that to that. This is not tied into this particular thing. It's just a listing of the other things and actions.

Any questions about part 3?

Any comments?

DR. CANTER: Okay.

MS. YORK: Yes, sir.

DR. CANTER: On, I guess it would be line 46 on page 2. This may be answered in some other place, but is there someplace of defining what constitutes a modification? Because I -- it seems to me that's a major issue. You have a permit. What constitutes a modification to the operation?

MS. YORK: Would you make a note of that question and as we go through subchapter 7 and subchapter 8, let's look for that. I believe it's there.

DR. CANTER: Okay.

MS. YORK: But let's look for it as we're going through those.

Any comments?

MR. BYRUM: Kay, do you intend to modify -- perhaps put a see "such and such" there, on that

1 modification?

2 MS. YORK: Okay. I will make a note of that.

3 Thank you.

4 Part 5. Application and application
5 processing. Here again, rule 6-15 is cross referencing,
6 except for three things. Number one, it says that all
7 applications have to be signed by the applicant,
8 regardless of what kind it is.

9 Number two, it says if it is for a construction
10 permit that implies that the applicant is going to be
11 responsible for following the permit terms. That's why
12 there's a minor and major source.

13 And (F) applies to all applicants, regardless
14 of whether it's a major or minor source. It says if you
15 find out anything was incorrect, you have a duty to
16 correct it.

17 Any comments about part 5?

18 Any questions?

19 Okay. Going on into subchapter 7 then.

20 MR. BRANECKY: Is there anything about grain
21 permit? I'm sorry.

22 MS. YORK: That's in subchapter 8.

23 Subchapter 7. 7-1 says that this subchapter
24 sets out the requirements for minor and major source
25 construction permits, part 70 source construction

permits, and for minor sources also the relocation of the operating permits.

That is what the chapter has always covered; that is no change. We've merely spelled it out, whereas it was not that clear in previous language.

7-2(A) was moved to rule 6, and that will be 6-31 and 6-32.

(B) is just the requirement for a permit that's always been there.

(C). Here's where it talks about operating permit modifications, Dr. Canter.

DR. CANTER: Yes.

MS. YORK: (C)(2). It talks about transfer of permit, which is also set up by the statutes. The statute is cross referenced.

And the exceptions are as they existed in previous law, except I believe that after the word -- and these lines are not numbered -- after the word "in effect" in subparagraph (C), there should be a period. At the time of issuance when it was decided by you, I think, in your previous discussion, it did not make sense.

Okay. Part 3 talks about the construction permit requirements for minor and major sources. It takes out the source group requirements. Those are

defined elsewhere. And for group 1 and group 2 under minor sources, that is no longer used; that was obsolete language.

Modeling and sampling points have both been moved into the next section where it talks about the percent of what construction permit applications have to have.

First of all, for all applications, BACT and modeling, and your sampling point, and for Part 70 applications, it cross references the provisions in subchapter 8 that also talk about what kind of information is required.

The reason we've had to do is that, even though subchapter 8 is the operating permit requirements, the feds don't differentiate between construction and operation. So everything that is in subchapter 8 applies to the construction as well. That's why we've had to cross reference.

The review procedure that is in the uniform rules. The Time lines is in the uniform rules. The public review depends on what tier it falls in, and that is in the uniform rules.

Construction permit conditions and provisions gives the Department the right to establish -- at first it said limitations. We have changed it to conditions

1287

and limitations, because conditions is a word that we're applying uniformly.

Cancellation of authority. That's not changed at all.

Rule 7-17 on relocation permit for minor sources. I believe, if I remember correctly, that in your discussion last time there was some word change here.

I will have that available for you in December. I believe there was some word change in subsection (A). Subsection (B) is no change. It's just a clarification and a consolidation.

Rule 7-18 operating permit for minor sources. There is a new provision there I want to point out to you, in (A)(1). It extends the 60-day operating period to 180 days without a permit, and I understand that is consistent with existing federal law.

MR. FISHBACK: Kay, excuse me.

MS. YORK: Yes, sir.

MR. FISHBACK: I made a note when we last covered section 17. Since this reference to relocation permits for minor sources, how we were handling relocation permits for major sources.

And the note I made to myself is, "See page 15 for the definition of temporary sources under (E)," and

1 what I don't recall is if with agreed that it was
2 covered someplace else adequately, or if we were going
3 to insert a section here for relocation permits for
4 major sources.

5 MS. SHEEDY: We have -- we have not been
6 relocating major sources at this point. Subchapter --
7 Title V has got something on temporary sources, which
8 may or may not be relocation; it's kind of vague.

9 If you've looked at 9, and I'm sure you have,
10 but we had not relocated major sources because of the
11 problems with PSD that might come into play and get
12 missed if you had a major existing PSD source and you
13 brought compressor engines into it.

14 We just have not gone through relocation on
15 that for that reason.

16 So I don't know if it's covered anywhere else,
17 other than in subchapter 8 under temporary permits,
18 which is a little unclear exactly what those are.

19 MS. YORK: My understanding of the discussion
20 was that in the past, major source relocation permits
21 were not available for the reasons in which she has just
22 given, and the staff did not intend to make that
23 recommendation at this time, for the reasons that --

24 MR. FISHBACK: Although some major sources
25 would qualify as temporary and therefore could be

relocated.

MS. SHEEDY: If they fit under temporary -- I find I don't totally understand what EPA was wanting under temporary, Bill.

MR. FISHBACK: You would almost never be relocating a major stationary source. I mean, that happens, but it's so rare that it's not worthy talking about. But there are temporary sources that qualify as major that will need to be relocated.

MS. SHEEDY: I'm looking at that section in subchapter 8. It almost appears that you -- you might read it that when you get your permit, you would have listed all the temporary sites you're going to have it located at, which is my source of confusion.

MR. FISHBACK: Well, if you knew them in advance, you could. But a lot of times you won't.

I think we discussed this at the last council meeting, too; drilling rigs is a good example of a major source.

MS. SHEEDY: If it meant you had to list all of your sites at the time you got your permit, then it would be practically useless.

MR. FISHBACK: That's right.

I guess my question is: Are we saying that major temporary sources are covered someplace else?

PRIDE REPORTING SERVICES

1 They must be. Is that how we left it?

2 MS. YORK: Temporary sources are in subchapter
3 8 for Title V.

4 MR. FISHBACK: Okay. So it was not our
5 intention to put it in here?

6 MS. YORK: No, sir.

7 MR. FISHBACK: Okay.

8 MS. COLEMAN: May I ask a question,
9 Joyce?

10 MS. SHEEDY: Uh-huh.

11 MS. COLEMAN: If you have, for example, a rock
12 cruncher that's subject to triple load that's crushing
13 concrete as a temporary project, it could qualify as a
14 covered source pursuant to part 70, and you have been
15 allowing those to relocate.

16 MS. SHEEDY: Yes, I think -- wait.

17 MS. COLEMAN: Or an asphalt batch plant that's
18 subject to NSPS, it is covered under subchapter 8.

19 MS. SHEEDY: The only ones we have allowed to
20 relocate has been the compressor engines of the main
21 portable sources.

22 So asphalt plants are quite often a major
23 source, as a matter of fact. And rock crushers may well
24 be too. And they do relocate.

25 MS. YORK: So we need to look at 7-17.

PRIDE REPORTING SERVICES

1239

MS. SHEEDY: What I'm talking about is we have not located major.

MR. FISHBACK: I think it's covered by the -- if the major source is also temporary and temporary is defined in subchapter H, as Kay said. Temporary means that it involves at least one location during the term of the permits. So the term of the permit is five years and you have one relocation, you're temporary.

And that would -- I think it's covered, because the only issue on relocation is whether or not you can do it without burdening everybody with repetitive permit applications.

MS. SHEEDY: When you're talking about relocating something, then it's entirely like an asphalt plant. Often a rock crushing plant will move, not always, but usually. That's why we made the difference between that and the compressor station, because you may have some compressors sitting and you may bring in another. And the PSD thing is tricky.

Whereas, an asphalt plant, it's still PSD. If it wasn't PSD, then it's probably not going to be helped by moving it.

MR. FISHBACK: The issue there is whether there's multiple emissions points at a single source or just one emission point.

1 Drilling rigs are a lot like asphalt plants.
2 Drilling rigs move in their entirety. When they leave,
3 there's nothing left. And I think they would be covered
4 under temporary sources.

5 MS. YORK: We'll look into that, Bill.

6 Rule 7-18 goes into the operating permit
7 requirements. There is one new item on that.

8 It's on the second page, the last page. It
9 puts their term at 10 years. That's a new requirement.

10 MR. BYRUM: The genesis of that was the public
11 hearings on the air quality permit. We had numerous
12 public hearings -- We had numerous public hearings and
13 we had numerous comments that were going to subject
14 major sources to having a new permit every five years;
15 that minor sources should be looked at at some
16 frequency.

17 Staff put in 10 years.

18 MR. FISHBACK: Some frequency other than never.

19 MR. BYRUM: Other than never.

20 MR. FISHBACK: Okay.

21 MR. BYRUM: It wasn't clear from the public
22 comment what frequency they wanted. We just felt the
23 work load was such that perhaps a ten-year cycle would
24 be appropriate.

25 MS. BARTON: You may want to review that after

you got settled someplace and have more staff.

DR. CANTER: On that point, where it says it is renewable. I'm assuming renewable suggests some consideration. Is it not just automatic renewable; otherwise, it's a waste of time.

MR. BYRUM: Right. It's not automatic renewable; it would be reviewed. But if there's -- specifically if you look at something that didn't change --

DR. CANTER: The wording "is renewable" seems a little bit too short there or something.

MS. BARTON: I think we were all taking into consideration the fact of a reorganization and lack of people to look at this, right now.

So we may want to revisit that after we are better organized and have better staff to address everything. Ten years is a long time.

MR. FISHBACK: It had been 15 for everything up in Texas until Title V came along.

MS. BARTON: Now what are they doing?

MR. FISHBACK: Five. I don't know about minor source.

MS. YORK: Okay. So to recap subchapter 7, there are some rule numbers that need to be corrected.

On page 2, subparagraph (C). Of paragraph 3 at

1 the top of the page, the wording is to be corrected.

2 "At the time of issuance" is to be taken out.

3 On the next-to-the-last page, rule 7-17, we're
4 going to be looking into relocation permits for major
5 sources and see if anything different needs to be done
6 in that area.

7 Are there any other comments, suggestions
8 questions?

9 MS. YORK: Yes, sir.

10 DR. CANTER: Just one. On page 1?

11 MS. YORK: Yes, sir.

12 DR. CANTER: It's the paragraph that's near the
13 bottom or the line near the bottom of the page where it
14 says net increase emissions.

15 MS. YORK: Yes, sir.

16 DR. CANTER: It seems to me the end of that
17 sentence, and maybe it's defined later in subchapter 8,
18 but that -- it just says a net increase in emissions,
19 and it doesn't say is that a modification or not. Is it
20 one pound per year?

21 So maybe -- and maybe this needs to be tied
22 into something subsequent. Again, it's the issue about
23 the modification.

24 MS. YORK: Yes, sir. I'm with you. I'm not
25 quite sure I understand. The original language read

172

exactly: "The director determines appropriate." How it reads: "The DEQ determines appropriate," which is a change we're making throughout.

I'm not sure that I understand what that means.

Scott, did you have any clarification on that? Joyce, do you?

MS. SHEEDY: I would assume our exemption, wherever that is now, where at the moment it's if you're greater than a pound an hour of criteria pollutants then you need a permit.

I believe we change that five ton a year.

MS. YORK: Four tons a year?

MR. BYRUM: Five.

MS. YORK: Five tons a year?

MS. SHEEDY: It also goes than if you're air toxics, if you're greater than the de minimus for the air toxics.

MS. YORK: But that's not being down through this particular rule then.

MS. SHEEDY: No. It's somewhere else in 7. I don't recollect.

MS. YORK: So you're proposing that rulemaking to come later?

MS. SHEEDY: We already have one version of it.

MS. YORK: So perhaps the cross reference to

1 that here would be sufficient.

2 DR. CANTER: Yes. I like the idea of a number.
3 Makes sense to me.

4 MS. YORK: Okay.

5 MR. FISHBACK: The net increase as the DEQ
6 determines appropriate is, right now, the one pound an
7 hour.

8 MS. SHEEDY: Yeah, but we plan to make some
9 changes.

10 MS. YORK: So if we cross reference that
11 section, then as you all change that section --

12 DR. CANTER: Actually, it's on the top of the
13 next page.

14 MS. SHEEDY: Is it?

15 DR. CANTER: Under exceptions.

16 MR. FISHBACK: Yeah, it is.

17 DR. CANTER: Just written in the reverse
18 manner. Written as a exception.

19 MS. YORK: Let's work on this then and see if
20 we can clarify that language.

21 Nancy?

22 MS. COLEMAN: On page of the part 3 under
23 15(A)(2), permit requirement. It is different to exceed
24 a work practices standard, or are you saying the
25 language could be intended to say that if a source

subject to a NESHAP wants to put on more stringent controls than the NESHAP allows, they can exceed the requirements of the NESHAP?

And I don't think that's the intent. I think the "exceeds" is meant to apply to ambient air quality standards or emissions limitations. But work practice and other operational requirements of NSPS and NESHAP, you're going to comply with those.

MS. YORK: Okay, here again --

MS. COLEMAN: It's kind of written in reverse order.

MS. YORK: Here again, this is old language. And if there is a fix for this, what appears to be an inconsistency, Joyce, we could propose it for this.

Do you understand what she is commenting on?

MS. SHEEDY: I think Nancy is saying, when we're talking about work practices, those exceeds the work practices is a violation; it doesn't make sense.

So we need to clarify that you can -- you must at least meet the work practices, but you could probably do better than the work practices without being penalized for it.

MS. YORK: Okay. We will work on that.

Anything else? Any other comments or questions?

1 MR. FISHBACK: Just on chapter 7?

2 MS. YORK: Yes, sir.

3 MR. FISHBACK: Okay.

4 MS. YORK: Then let's move on to chapter 8.
5 I'm going to do a real quick overview of the entire
6 subchapter and then we will come back section by
7 section.

8 All of rule 4 is new, but it's not new
9 requirements or new words; it was taken from two other
10 rules in subsection 8 and put here.

11 The reason is that in all our other subchapters
12 we have the permit requirement up front. We wanted to
13 do the same thing there, rather than where Title V put
14 it, which is close to the back.

15 There also was a discussion in your last
16 meeting about if the application deadlines are staggered
17 according to the rule change that you all made two
18 meetings ago, then what does that mean about the
19 Department having to get in and review it and do the
20 administrative completeness review and when does the
21 clock begin? And we have tried to make clear here that
22 the clock begins -- here and in another section that I
23 will point out, the clock begins when the Department
24 begins its administrative completeness review.

25 It can have an application filed that is not

12/18

due until two years from now and that permit shield will go into effect, but the Department does not actually begin its administrative review until it comes to it with regard to the time line.

We changed from a three-year to a five-year time line, and it's necessary to have those kinds of safeguards.

8-5 are words that you have already approved. There's no change therefrom the rules as you had approved them two meetings ago. The changes start taking place with regard to this rulemaking on paragraph 8, application completeness, which appears on the third page of this document.

Here's the review procedure that now appears in the uniform rules and has been taken out of here. The next part, application content for renewal of an existing permit. That won't, of course, occur for five years or more, I guess. So that is talking about after it's issued what do they have to do to renew it.

Duty to supplement and correct application is marked through. Remember, that we moved that word for word into subchapter 6 and had it apply to all applications, instead of just Title V.

The rest of the rule stays the same, except the very last part of it, number of application copies.

That language is removed because it appears in the uniform rules. It states as three, so that is no change for the air program.

8-6, permit content. There is no change, until page 14. We have used a uniform set of words that we're using across the programs, and that is that instead of coverage under a general permit, we're using the words individual authorizations under a general permit.

If you will remember, those are classified as Tier 1s. The general permit itself is classified as a Tier II.

The only other substantive changes acid rain. Who was it -- Dave, was it you that asked for acid rain?

That appears at the bottom of page 17 and then page 18. We have clarified acid rain provisions, and we have improved the language where we adopt the acid rain provisions from the federal regs as the rules here.

Okay. Rule 8-7. Rule 8-7, a lot of it came out because it is in the uniform rules. Most of the words that you see marked through are related to that. A lot of cross referencing.

On page 23 where it talks about EPA and notification and timetable for issuance, that has been moved to be rule 8, part of 8. Here again the federal rules has this EPA review spread from the beginning to

1 the end of these federal regulations, and we put them
2 together, figured them out, which is no small chore, and
3 put them in one rule by themselves. And we will get to
4 that in a minute.

5 The biggest change i in that rule is that on
6 page -- which I cannot read. It would be 28 -- 27,
7 beginning on page 26. The public process of review and
8 notice requirements comes out, because it is covered by
9 the statutes and by the uniform rules.

0 Uniform -- I'm sorry judicial review. We
1 clarified that it did not apply to those under general
2 permits.

3 And then rule 8-8, which is the last one before
4 you is the section that we went through and tried to
5 figure out what the process was and procedure and timing
6 for EPA review, and for the filing of good objections on
7 a Tier III permit.

8 We feel like we have pretty well followed
9 through on what their requirements were, except on --
0 for two instances. Number 1, they used proposed permit
1 when they talk about what we're going to review.

2 Our statutes used proposed permit to only apply
3 to Tier III applications, and I've already undergone the
4 public review and public comment, and they have been
5 amended to be subject to the administrative hearing

1 opportunity.

2 So we have changed the words in here. EPA has
3 indicated they will have no trouble with that.

4 We have also said that if an objection is filed
5 on a Tier III application on which an administrative
6 hearing is pending, that the hearing will be postponed
7 until the objection has been taken care of.

8 All right. Let's go back. Rule 8-4,
9 requirement for a permit. Cross references. Any
10 comments?

11 Any questions?

12 From the public? Nadine.

13 MS. BARTON: On 8-4 on the one, two, third page
14 over under 8 of 52. 252:100. Go down to --

15 MS. YORK: Where? Rule 8-4.

16 Rule 8-4 is only half a page long.

17 Any comments about 8-4?

18 MS. BARTON: Okay.

19 MS. YORK: 8-5? Council has already approved
20 all of the changes, up to the application acceptability.
21 I said I would point this out to you. This is on the
22 third page, subparagraph 4, application acceptability
23 for purposes of counting days. That says the 60-day
24 application administrative review as set forth in the
25 administrative rules will not begin until the Department

295

begins its review.

This has nothing to do with the permit shield or the time filed.

Okay, Nadine.

DR. CANTER: Can I ask a general question on this? I'm all through here, and maybe just for clarification. Reference made to 60 days. Those are calendar days, correct?

MS. YORK: Right.

DR. CANTER: Those are not work days.

MS. YORK: Those rules exist and can be found in part 7 of the uniform rules that we looked at a while ago.

MS. BARTON: It's after application of completeness? It's on the next page.

MS. YORK: Yes, ma'am.

MS. BARTON: Down where -- mine is just almost unreadable. I can't -- what the number is. But it's confidential information.

MS. YORK: Yes, ma'am.

MS. BARTON: Confidential information. If a source submits information to the DEQ, the source shall also submit a copy of such information directly to the administrator if the DEQ requests the source to do so.

I just -- what is the definition of

1 confidential information?

2 MS. YORK: That is existing law, and I believe
3 it -- Dennis or Scott or Joyce may be able to answer
4 that better than I.

5 MS. SHEEDY: I think Dennis.

6 MS. YORK: Dennis, on the Title V confidential
7 information that may make a claim to when they submit to
8 us. What kind of material does that include?

9 MR. DOUGHTY: Actually it's under the Clean Air
10 Act and Trade Secret Information. If it's a trade
11 secret thing that they have to keep confidential, they
12 can claim that.

13 Also the statutes specify that they cannot keep
14 emissions data a trade secret.

15 So, if they're emitting something in the air,
16 they cannot claim that as a trade secret.

17 MS. YORK: It's authorized by state statute and
18 as I remember the statutes, it's fairly limited as to
19 confidential.

20 MR. DOUGHTY: Yes. It's just trade secret.
21 There's some procedural aspects about how they will
22 treat the material and how they will keep it
23 confidential and so on and so forth.

24 MS. YORK: Other comments? Questions?

25 Nancy.

MS. COLEMAN: On line 49 on page 4, we had discussed at the last meeting changing the word "provides" to "make available."

MS. YORK: Yes, ma'am. You're absolutely right. Can you give me a little more of a clue as to where that is. It's in my notes, but it's not on this page.

MR. BRANECKY: Line 49.

MS. COLEMAN: It's line 49.

MR. BYRUM: Standard application form required information.

MR. FISHBACK: Section 9(D).

MR. BYRUM: And it is the one, two, three, four, fifth line down.

MS. YORK: Makes available. I got it.

Thank you.

Any more comments on 8-5?

8-6, permit content. 8-6 changes go to the changing and the description of what an individual authorization to operate under a general permit is called.

And it also includes the clarifications and the acid rain. And that's all.

MS. BARTON: Under general permits, we have a definition under air for air permits. Because we had a

1 problem on Thursday, there was no definition. General
2 permits did not exist when they were making rules for
3 things that did not exist. Is that the same case with
4 air, or not the same case with air?

5 MS. YORK: The Title V as you see here does
6 authorize general permits in certain situations. The
7 Department, of course, does not have the Title V. So
8 they have never dealt with this at this point.

9 But they will be working with EPA and deciding
10 what types of authorizations can be done through general
11 permit. The general permit is basically where of a lot
12 of the same things --

13 MS. BARTON: Right.

14 MS. YORK: -- that are not big emitters, and
15 they will do a set of rules that apply just to those.
16 And there will be public participation involved.

17 MS. BARTON: So we don't have a problem here in
18 addressing general permits, even though we don't have
19 anything to go by.

20 Do we have to come back and do this?

21 MS. YORK: It's in the rule now. There is no
22 change. But council and Board has already adopted the
23 Title V program which does authorize general permits.

24 Is there anything that needs to be added to
25 that?

1247

MR. FISHBACK: The authorization exists to issue a general permit. There had been none issued because there had been no Title V permits of any kind. In certain cases source categories have developed general permits that will probably be adopted.

But I don't think the reference to a general permit here is a problem. The specific context of the general permit is still not resolved for most source categories, but some have come along. Some have been worked on for a lot of months in anticipation of being available when Title V is authorized.

MS. YORK: Thank you.

Any other comments?

Okay. Rule 8-7, permit issuance, renewal, reopenings, and revisions.

Of all of the rules in subchapter 8, this one aligns itself most closely with the uniform procedure that's set out in the statutes and explains in more detail any rules.

The things that were struck from this on page 2, agency priorities. In lieu of that, there were the changes that changed it from a three- 3 to five-year program and the time line for application under those.

MR. BRANECKY: On page 21.

MS. YORK: Yes, sir.

1 MR. BRANECKY: On line 50, section (B).

2 MS. YORK: Yes, sir.

3 MR. BRANECKY: The agency, DEQ. Agency is not
4 crossed out.

5 MS. YORK: Thank you. Department of Libraries
6 would return this to us just over that.

7 MR. FISHBACK: Invite them to the next
8 rulemaking thing.

9 MS. YORK: No. You don't want them. We get
10 along just fine, thank you.

11 MR. FISHBACK: Arms's length.

12 MR. BYRUM: At least three arms' length.

13 MS. YORK: Dr. Canter, did have any kind of
14 questions?

15 DR. CANTER: No.

16 MS. YORK: Any comments? Questions?

17 Okay. That brings us to rule 8-8. It is our
18 understanding that the EPA is not planning on reviewing
19 everything in the category. They hold this option open,
20 and Mr. Coleman is visiting with them about the
21 permitting process that we go through and the fact that
22 this adds another step.

23 I don't anticipate any change to what we have
24 put down here. If there is a change, it will come in
25 some type of an agreement with the EPA, and it requires

a rule change, of course. It will be brought to you with recommendations.

This is required part of the Title V program, and I would imagine that we would be leaving it pretty much the same.

Are there any questions or anything that you want clarified? The basic -- the basic idea is that when the application is filed that notice will be given the adjacent state that maybe affected by it.

But when a draft permit is -- an application -- a copy of the application will be sent to EPA if they want them; they request them.

After we review, have public comments, public meeting, and review those comments and have approved a draft permit, that draft permit -- no, am I wrong?

After we review the application, we prepare a draft permit and that is sent to EPA for their review and comment. And also sent to neighboring states for their comments.

The Department then reviews all of those comments; and if the Department feels like the changes that are suggested or requested by the EPA or adjacent states can be made and can be justified, they will do that with notice to the commenting folks.

If it can't be, then they have a way of giving

1 nonacceptance and explaining why.

2 MR. BRANECKY: They are only sent to adjacent
3 states within 50 miles.

4 MS. YORK: Or may be affected.

5 MR. BRANECKY: Adversely affected.

6 MS. YORK: I will look up the words for you.

7 Well, I said I would. I will find them.

8 They are the words that are in your statutes.

9 If EPA feels an objection, or if a citizens
10 group or a member of the public files an objection with
11 EPA, they can stay the issuance of the permit until that
12 objection is worked out, and that basically is the Title
13 V process.

14 MS. BARTON: I just have a point of
15 clarification. Under that section where it -- on page
16 32 up at the top where it says public petition to the
17 administrator. For clarification, is that administrator
18 of the EPA?

19 MS. YORK: Yes, ma'am. It's defined. It is a
20 defined term in the rules.

21 MR. BYRUM: Other questions for Kay by the
22 council?

23 MR. FISHBACK: Yes. I think this is just a
24 clerical omission. Can we look for a moment at
25 subchapter 15, that tier rules in section 41, which is

1249

Tier II.

MR. BYRUM: Did you have a page?

MR. FISHBACK: It's page 10 in the yellow, but it's also the single handout sheet today.

I was comparing the sheet handed out today to the one identified at the last meeting. And under subsection 41 there, item 7, it says a construction permit form an existing major facility.

And I believe we agreed a construction permit for a major modification to a major facility, because without that, it's in conflict with the tier definition.

MS. YORK: Look at number -- Look at number 3 under 41. Does that help?

MR. FISHBACK: Now, that's consistent. Number 3 is as we modified it at the meeting on October 17th. But we also modified number 7 at the same time.

MS. YORK: To lead a construction permit in the modification if.

MR. FISHBACK: A construction permit from a major modification to an existing major facility.

Do you have that same note?

MS. COLEMAN: Uh-huh.

MR. FISHBACK: Okay.

MR. BYRUM: A construction permit for a major modification to a major facility.

1 MR. FISHBACK: I didn't know if that was just
2 clerical or if there was some further consideration
3 given and it was decided it wasn't necessary.

4 But I think it is necessary, because if you're
5 talking about Tier II being any construction permit at
6 any facility, then you've included things that are
7 already defined as being in Tier II.

8 MS. YORK: I missed that. I remember it
9 totally, and I did not have that in my notes. I
10 remember that.

11 Would you reread it to me.

12 MR. FISHBACK: A construction permit for a
13 major modification to an existing major facility..

14 MS. YORK: We also would have a construction
15 permit for an existing facility as well, right?

16 MR. FISHBACK: Well, the original construction
17 permit for a major facility would be Tier III.

18 MS. YORK: NOT for existing, remember?

19 MR. FISHBACK: For a new one.

20 THE CHAIRMAN: Just a modification.

21 MR. BYRUM: A major facility is either going to
22 be new or existing. So you're not going to have a total
23 construction permit for an existing major facility; it
24 will be a modification.

25 MR. FISHBACK: I think that was the reason we

1 did it that way.

2 I will read it that way. A construction --

3 MS. YORK: Number 4-17.

4 MR. FISHBACK: A construction permit for a
5 major modification to an existing major facility.

6 And Larry's comment is the reason why we did
7 it. You cannot have a construction permit for a major
8 construction; you can only have a construction permit
9 to modify a construction facility.

10 MS. YORK: Joyce, is that acceptable?

11 MS. SHEEDY: I think so.

12 MS. YORK: What that would take, Mr. Chairman,
13 would be a motion and second to that effect to amend the
14 Tier II rule and to include that, that version in the
15 recommendation that they voted on earlier. And it would
16 need to be done by roll call vote.

17 THE CHAIRMAN: That's -- and that is the
18 modification of what we --

19 MS. YORK: I remember it; my notes did not
20 reflect it, and I am the one who typed it up.

21 MR. FISHBACK: We agreed to it.

22 THE CHAIRMAN: I've got that in my notes.

23 MR. BRANECKY: So we need to revote if we voted
24 on it in October?

25 THE CHAIRMAN: We didn't vote that, but that

1 was included in what we voted today.

2 MS. YORK: It probably was what you voted on
3 then.

4 THE CHAIRMAN: We voted Tier I and II.

5 MS. YORK: I am the one that's going to be
6 putting these together, and let me read number 7 and let
7 me see this it reflects what your want.

8 A construction permit for a major modification
9 to an existing major facility.

10 THE CHAIRMAN: That's right.

11 MS. YORK: I remember the discussion.

12 DR. CANTER: That doesn't need a vote.

13 MS. YORK: You don't need a vote, because his
14 was an error that needs to be corrected.

15 MR. FISHBACK: It's a clerical omission.

16 THE CHAIRMAN: Because we voted on that change.

17 MR. FISHBACK: In October.

18 MS. YORK: Yes. Got it.

19 Thank you, Bill.

20 I also notice that the emissions reduction --
21 alternative emissions reduction is not listed as a
22 Tier I, at least that I could see.

23 Does it come under modification or amendment
24 there, Joyce. Is it covered someplace else?

25 MS. SHEEDY: Generally I think the ones that we

1251

done an alternative emission, it's maybe resulted -- it may have resulted in a modification to an existing permit if it was a permitted facility.

MS. YORK: So it would be covered under this, even though not by specific.

MS. COLEMAN: And it's grandfathered. It won't be covered.

MS. SHEEDY: We won't have grandfathered -- yes, well, never mind.

It may be covered under the grandfathered.

MS. YORK: Well, it's in a permit; it's a plan authorization as a SIP revision.

MR. BYRUM: I think it's probably sufficiently handled when it says it will be handled by a SIP revision.

MS. COLEMAN: This does bring up a point that Tinker Air Force Base raised in their original written comments, in that there are alternative emission limits under two other air quality subchapters, 23 and subchapter 25, that were not included as authorizations anywhere.

And they also are grandfathered facilities. If they are handled as a hearing before the council rather than the permit, is there the effect of a plan and they are not included in the tier rules either.

1 MS. SHEEDY: And they don't require a SIP
2 change, as this one does.

3 MS. YORK: That would be up to you. Obviously
4 we have them, and obviously we have done at least one in
5 the past. They come before this body.

6 So whether or not it's listed as a Tier 1 is
7 not going to change the process at all, because the
8 Department is still going to review the application
9 that's been filed by the applicant.

10 THE CHAIRMAN: Now, all of these rules -- this
11 hearing will be continued, and how long are we open for
12 comments on them?

13 MS. YORK: The comment period can be extended,
14 Mr. Chairman, through the next meeting.

15 MR. FISHBACK: Okay,

16 MS. YORK: Which is December 19th.

17 THE CHAIRMAN: 19th. And at that time the
18 council will again be graced with the responsibility of
19 either making a recommendation on 6, 7, and -- and 11 or
20 continuing the rulemaking hearing to a date that is on
21 or before January the 3rd.

22 THE CHAIRMAN: I imagine we will take action
23 on -- I think we will handle it in December.

24 (A discussion was held off the record.)

25 THE CHAIRMAN: I've been advised to limit the

comment period to some number of days before our next meeting, or the continuation of this hearing.

I think that's wise.

Larry, what would you suggest?

MR. BYRUM: We're meeting the 19th. I would suggest that we have comments probably in by the -- I don't have a calendar. Does anyone know what day the 19th of December.

MS. YORK: In the rulemaking, I would cut it off the Friday before your meeting.

MR. BYRUM: Which is what? The 15th?

MR. BYRUM: That doesn't give us many days to get the comments analyzed for them.

MS. YORK: Of course, we will have the comments that have been made today.

THE CHAIRMAN: Let's cut it off at least the 11th.

MR. BYRUM: That's fine. That will give you all the ability to have a little better product to look at.

MAYOR TARON: When are we going to do this?

THE CHAIRMAN: This is our next meeting, which is a continuation of this public hearing.

MR. BYRUM: Just a continuation of the hearing on the rules that we just recently brought forward,

1 which was, let me find it here, which would be 252-1,
2 7, 8, and 11, and 6, which is what we've just been going
3 through since noon, basically.

4 MR. FISHBACK: And our recommendations to the
5 DEQ Board for the --

6 MR. BYRUM: Tier clarification.

7 MR. FISHBACK: Tier clarification. Is a done
8 deal, even though this meeting is continued.

9 MR. BYRUM: The meeting is not going to be
10 continued, just the hearing.

11 THE CHAIRMAN: Those are going forward. We
12 made the motion.

13 MR. FISHBACK: Okay.

14 MS. YORK: On behalf of Mark Coleman, I would
15 like to thank you all, and you all, too, for
16 participating in and resolving what was a very difficult
17 set of issues, and quite a challenge to undertake.

18 This is new to air quality, and, as opposed to
19 some of the other programs that are in the Department
20 that are used to this type of approach to permitting, I
21 just want to congratulate you and say from the bottom of
22 my heart, thank you very much for all of the true
23 debating and the way in which you all resolved the
24 issue.

25 THE CHAIRMAN: That was made a matter of

1253

record, I see.

If we can close this hearing, we will so do,
now, Larry.

MR. BYRUM: Okay.

Take that back. We are going to continue this
hearing until our regular meeting on December 19th. But
with that, we can close the comments today.

BOARD BRIEFING PAPER
TITLE 252: DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 002. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY
SUBCHAPTER 15, PARTS 1, 3, 7 & 9.
"UNIFORM PERMITTING PROCEDURES"
PERMANENT RULEMAKING

EXECUTIVE SUMMARY: The Oklahoma Uniform Environmental Permitting Act ("Act"), 27A O.S.Supp. 1995, § 2-14-101 et seq. as last amended in S.B. 247 (1995) establishes the basic permitting processes common to all DEQ permitting programs. These proposed rules implement those uniform procedures in Subchapter 15 of the Department's Rules of Procedures, OAC 252:002 as follows:

Part 1. States the purpose, scope and applicability of Subchapter 15. Contains definitions.

Part 3. Supplements the tiered process requirements of the Act.

Part 7. Amends existing (renumbered) rules to update permitting review procedures and time lines.

Part 9. Specifies types of permissive consolidations available to applicants (e.g., the timing of certain reviews and public participation opportunities for applications pending at the same time for the same site).

This proposed rulemaking follows the previous adoption of Rule 252:002-15-28 ("Permit Decision-making Authority) on September 26, 1995, and Part 5 ("Tier Classifications") on November 28, 1995.

STATUTORY AUTHORITY: 27A O.S.Supp. 1993, § 2-1-101 and 27A O.S.Supp. 1995, § 2-14-201.

COMPARISON WITH FEDERAL REQUIREMENTS. Some DEQ permit applications subject to federal permitting procedures are also subject to additional state requirements. However, no economic impact/environmental benefit statement is required since the state requirements are authorized by state statute.

PUBLIC PARTICIPATION. Notice was published on September 15, 1995, of a public comment period beginning September 15, 1995, and a rulemaking hearing on October 11, 1995. These notices were mailed to each program's mailing lists by September 18, 1995.

COMMENTS: A rulemaking hearing was held October 11, 1995 and was attended by five (5) persons. Written comments were also received. See attached "Responses to Comments".

SUMMARY OF MAJOR AMENDMENTS IN RESPONSE TO COMMENTS RECEIVED: See attached Summary of Comments & Responses.

CORRECTIONS AND AMENDMENTS PROPOSED BY STAFF: None

**RESPONSES TO COMMENTS
PROPOSED UNIFORM PERMITTING RULES
OAC 252:002-15, Parts 1, 3, 7 & 9.**

Rule: OAC 252:002-15-1. "Purpose and scope"

Comment: Subchapter 15 is not clear about what laws apply to applications filed before Permitting Act goes into effect.

Response: The DEQ has amended Rule 15-1 to add a new subsection (c). Beginning on the effective date of 252:002-15, applicants who file applications prior to July 1, 1996, may choose to follow the new process or the law as it existed on their filing date.

Rule: OAC 252:002-15-26. "Permitting process summary" [Table 15A]

Comment: Shouldn't the "No" in Table 15A, Tier II column, under "proposed permit" be a "Yes"? Why review or receive public comments on a Tier II application if the proposed permit is not an outgrowth of public comments?

Response: "No" is correct. The Tier II process does not include the step of preparing a proposed permit. A proposed permit is for use in a possible administrative permit hearing under Tier III and is an outgrowth of public comments on the draft permit.

Rule: None

Comment: What distinguishes a "draft" permit from a "proposed" permit?

Response: After receiving comments on a draft permit and making a final review, the DEQ may change it to correct mistakes and respond to comments. In Tier II, the finalized draft permit is issued as a "final" permit. In Tier III, the finalized draft permit is called a "proposed permit" and is made available for administrative hearing requests.

Rule: OAC 252:002-15-28. "Permit decision-making authority"

Comment: This rule, which was adopted by the Board as a permanent and emergency rule on September 26, 1995, should not go into effect until July 1, 1996. Without the protection of the tiered process requirements which will apply after July 1, 1996, doesn't this create a window of opportunity for the DEQ to issue permits without the Board's approval.

Response: No window of opportunity has been created. Until July 1, 1996, applicants continue to be subject to the permitting processes now required by statute and rules. This designation/delegation rule is NOT intended to circumvent any existing law. The

delegation is of signature power only. The rule does not change any existing permitting requirements or procedures. The purpose of the rule is to shorten current issuance time by allowing the Executive Director to delegate the signing of all but the most complex permits to program administrators and supervisors. The DEQ believes it is in the best interest of the public and the regulated community to put this rule into effect as soon as possible to increase the speed and efficiency by which permits are issued. Any delegation from the Executive Director between now and July 1, 1996, will be done through formal assignment.

Rule: OAC 252:002-15-29(b). "Published notice..."

Comment: The rule allows the DEQ to have a notice republished or a correction notice published if there is a mistake in the original publication. Whose mistake? Who will determine which action is taken? Is this a legal notice? Would notice of correction be in the "Legal Notices"? This should be spelled out in the rules since many normal corrections are lost in other parts of the paper.

Response: This rule merely codifies current procedures. It doesn't matter whose mistake it was. When one has occurred, the DEQ will determine then (as it does now) whether an error can be corrected or if a new notice should be published. To keep the corrections from being "lost", the DEQ has added "legal" in rule 29 to clarify that all correcting notices are to be legal notices.

Rule: OAC 252:002-15-29(b). "Published notice..."

Comment: Ten days is not a realistic turn-around time for getting a proof of publication from some newspapers. We suggest 30 days. [Note: A comment was also received from the Oklahoma Press Association stating that "Ten days may be too short for...some small, understaffed newspapers...." and recommending 20 days.]

Response: Ten (10) days has been changed to 20.

Rule: None

Comment: Environmental groups will not be informed via published notice of permit application filings and actions.

Response: The notice provisions of the Act have been mandated by the Legislature. In addition to published notices, interested persons may review the Oklahoma Energy/Environment Report which regularly publishes information about permit applications filed with the DEQ. Also, making telephone inquiries to the Customer Service Division or specific program of the DEQ is another way to find out what applications have been filed and the status of each.

Rule: OAC 252:002-15-70. "Common review procedures and time

lines"

Comment: Subsection (f), "Failure to respond", gives applicants a maximum of 180 days to respond to identified deficiencies of their applications and then allows time extensions for good cause shown. That is too much time. The public never gets 180 days or extensions to their comment periods for their reviews.

Response: The 180 days applies to the time allowed an applicant to cure deficiencies the DEQ has identified in an application. The 180 days is not a public review period. The 180 days response time with a good cause exception is currently in the rule. The rule is now working well for the DEQ and diligent applicants. No different response time is recommended.

Rule: OAC 252:002-15-70. "Common review procedures and time lines"

Comment: A reader of program rules confronted by a recommendation of when to submit a [water quality discharge] permit application may be confused by the uniform rules which establish other time lines for DEQ personnel to issue the permit. These timing issues could lead to misunderstanding about the time required to submit and receive a permit. A cross-reference in the program rules to the uniform rules that set out the time lines for the DEQ would prevent this possible confusion.

Response: A cross-reference has been added to OAC 252:605.

Rule: OAC 252:002-15-90. "Consolidation of permitting process"

Comment: 1. Applicants should have input on which application review times are coordinated and which meetings and/or hearings are consolidated. 2. The public should have input on consolidation. 3. Consolidating reviews and the meetings and/or hearings on complex applications and draft permits should be weighed carefully against the strain on resources and preparation/response time.

Response: The DEQ recognizes that such strains can burden the process rather than making it more efficient. Consolidation was never intended to be mandatory. To clarify that it is permissive only, DEQ has amended the rule to provide that consolidation will occur only after the DEQ has authorized it with applicant consent.

Rule: None

Comment: Permittees should be entitled to an administrative appeal of any adverse permit decision by the Department.

Response: Permittees are presently entitled to administrative review by the Department of any adverse permit decision. Permit decisions and conditions are based upon applicability of rules. A

permittee who alleges that any DEQ rule interferes with or impairs or threatens to interfere with or impair his/her legal rights may petition the DEQ, formally requesting a declaratory ruling on the applicability of the rule. (See 75 O.S. §304 and 252:002-7-1)

Rule: None

Comment: All permits should be subject to correction for good cause until such time as they are final under both state and federal law, whichever comes last. In this way, staff errors can be corrected without the necessity of further notice and hearing.

Response: The DEQ agrees that permit documents should be reviewed for errors. Accordingly, the DEQ has added new section 252:002-15-77 to clarify that the DEQ may ask an applicant at any time to review a permit document and to authorize corrections. However, the DEQ is not willing to go as far as saying that all corrections can be routinely made without notice or hearing. Hence, 77(b) calls for public notice to be published prior to "significant" corrections and gives options for public comments in writing, verbally and/or as evidence in an reconvened Tier III administrative permit hearing. A "significant" correction means any proposed change which significantly alters a facility's permitted size, capacity or other limits.

Rule: OAC 252:002-15-31(f)(2)(C) "Notice of draft permit/denial -
- Additional notice"

(C) Applicants for a solid waste landfill permit shall provide notice by certified mail, return receipt requested, to owners of mineral interests and to adjacent landowners whose property may be substantially affected by installation of a landfill site. See DuLaney v. OSDH, Okl., 868 P2d 676 (1993).

Comment: We believe DuLaney vs. OSDH determined property owners and mineral interest owners have a right to a hearing before a facility permit is issued. We believe it is the obligation of the Department of Environmental Quality to hold a hearing which affected property owners and mineral owners would attend, not hold one if one is requested. The DuLaney case should apply to all Tier III hazardous waste disposal permits and Tier III underground injection well permits and, instead of saying "Opportunity for Administrative Hearing" should say "Administrative Hearing". Would you please explain what "Opportunity for Administrative Hearing" means in this context and explain why or why not the Dulaney case should not apply to Tier III hazardous waste permits and Tier III underground injection well permits.

Response: The Oklahoma Supreme Court's decision in Dulaney granted due process rights to owners of mineral interests that underlie proposed solid waste landfills and to property owners adjacent to proposed landfills.

Although the Court's reasoning might appear to apply to many types of disposal sites, the actual holding of the case only addressed solid waste landfills. The Oklahoma Supreme Court, uniquely among the several states, created a property right where the Oklahoma statutes had not, at least not at the time the OSDH issued the solid waste permit. Current solid waste statutes do create a due process right, such as the Court in DuLaney recognized. Other state and federal courts say that legislation creates the property rights which are protected by due process.

As to whether a hearing must be held, or just an opportunity for one, the constitutional right to due process is an opportunity to appear before an impartial tribunal to state one's case. Notice of the opportunity is the critical point, as DuLaney itself makes clear.

BOARD BRIEFING PAPER
TITLE 252: DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 002. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY
SUBCHAPTER 15, PARTS 1, 3, 7 & 9.
"UNIFORM PERMITTING PROCEDURES"
PERMANENT RULEMAKING

EXECUTIVE SUMMARY: The Oklahoma Uniform Environmental Permitting Act ("Act"), 27A O.S.Supp. 1995, § 2-14-101 et seq. as last amended in S.B. 247 (1995) establishes the basic permitting processes common to all DEQ permitting programs. These proposed rules implement those uniform procedures in Subchapter 15 of the Department's Rules of Procedures, OAC 252:002 as follows:

Part 1. States the purpose, scope and applicability of Subchapter 15. Contains definitions.

Part 3. Supplements the tiered process requirements of the Act.

Part 7. Amends existing (renumbered) rules to update permitting review procedures and time lines.

Part 9. Specifies types of permissive consolidations available to applicants (e.g., the timing of certain reviews and public participation opportunities for applications pending at the same time for the same site).

This proposed rulemaking follows the previous adoption of Rule 252:002-15-28 ("Permit Decision-making Authority) on September 26, 1995, and Part 5 ("Tier Classifications") on November 28, 1995.

STATUTORY AUTHORITY: 27A O.S.Supp. 1993, § 2-1-101 and 27A O.S.Supp. 1995, § 2-14-201.

COMPARISON WITH FEDERAL REQUIREMENTS. Some DEQ permit applications subject to federal permitting procedures are also subject to additional state requirements. However, no economic impact/environmental benefit statement is required since the state requirements are authorized by state statute.

PUBLIC PARTICIPATION. Notice was published on September 15, 1995, of a public comment period beginning September 15, 1995, and a rulemaking hearing on October 11, 1995. These notices were mailed to each program's mailing lists by September 18, 1995.

COMMENTS: A rulemaking hearing was held October 11, 1995 and was attended by five (5) persons. Written comments were also received. See attached "Responses to Comments".

SUMMARY OF MAJOR AMENDMENTS IN RESPONSE TO COMMENTS RECEIVED: See attached Summary of Comments & Responses.

CORRECTIONS AND AMENDMENTS PROPOSED BY STAFF: None

**RESPONSES TO COMMENTS
PROPOSED UNIFORM PERMITTING RULES
OAC 252:002-15, Parts 1, 3, 7 & 9.**

Rule: OAC 252:002-15-1. "Purpose and scope"

Comment: Subchapter 15 is not clear about what laws apply to applications filed before Permitting Act goes into effect.

Response: The DEQ has amended Rule 15-1 to add a new subsection (c). Beginning on the effective date of 252:002-15, applicants who file applications prior to July 1, 1996, may choose to follow the new process or the law as it existed on their filing date.

Rule: OAC 252:002-15-26. "Permitting process summary" [Table 15A]

Comment: Shouldn't the "No" in Table 15A, Tier II column, under "proposed permit" be a "Yes"? Why review or receive public comments on a Tier II application if the proposed permit is not an outgrowth of public comments?

Response: "No" is correct. The Tier II process does not include the step of preparing a proposed permit. A proposed permit is for use in a possible administrative permit hearing under Tier III and is an outgrowth of public comments on the draft permit.

Rule: None

Comment: What distinguishes a "draft" permit from a "proposed" permit?

Response: After receiving comments on a draft permit and making a final review, the DEQ may change it to correct mistakes and respond to comments. In Tier II, the finalized draft permit is issued as a "final" permit. In Tier III, the finalized draft permit is called a "proposed permit" and is made available for administrative hearing requests.

Rule: OAC 252:002-15-28. "Permit decision-making authority"

Comment: This rule, which was adopted by the Board as a permanent and emergency rule on September 26, 1995, should not go into effect until July 1, 1996. Without the protection of the tiered process requirements which will apply after July 1, 1996, doesn't this create a window of opportunity for the DEQ to issue permits without the Board's approval.

Response: No window of opportunity has been created. Until July 1, 1996, applicants continue to be subject to the permitting processes now required by statute and rules. This designation/delegation

rule is NOT intended to circumvent any existing law. The delegation is of signature power only. The rule does not change any existing permitting requirements or procedures. The purpose of the rule is to shorten current issuance time by allowing the Executive Director to delegate the signing of all but the most complex permits to program administrators and supervisors. The DEQ believes it is in the best interest of the public and the regulated community to put this rule into effect as soon as possible to increase the speed and efficiency by which permits are issued. Any delegation from the Executive Director between now and July 1, 1996, will be done through formal assignment.

Rule: OAC 252:002-15-29(b). "Published notice..."

Comment: The rule allows the DEQ to have a notice republished or a correction notice published if there is a mistake in the original publication. Whose mistake? Who will determine which action is taken? Is this a legal notice? Would notice of correction be in the "Legal Notices"? This should be spelled out in the rules since many normal corrections are lost in other parts of the paper.

Response: This rule merely codifies current procedures. It doesn't matter whose mistake it was. When one has occurred, the DEQ will determine then (as it does now) whether an error can be corrected or if a new notice should be published. To keep the corrections from being "lost", the DEQ has added "legal" in rule 29 to clarify that all correcting notices are to be legal notices.

Rule: OAC 252:002-15-29(b). "Published notice..."

Comment: Ten days is not a realistic turn-around time for getting a proof of publication from some newspapers. We suggest 30 days. [Note: A comment was also received from the Oklahoma Press Association stating that "Ten days may be too short for...some small, understaffed newspapers...." and recommending 20 days.]

Response: Ten (10) days has been changed to 20.

Rule: None

Comment: Environmental groups will not be informed via published notice of permit application filings and actions.

Response: The notice provisions of the Act have been mandated by the Legislature. In addition to published notices, interested persons may review the Oklahoma Energy/Environment Report which regularly publishes information about permit applications filed with the DEQ. Also, making telephone inquiries to the Customer Service Division or specific program of the DEQ is another way to find out what applications have been filed and the status of each.

Rule: OAC 252:002-15-70. "Common review procedures and time lines"

Comment: Subsection (f), "Failure to respond", gives applicants a maximum of 180 days to respond to identified deficiencies of their applications and then allows time extensions for good cause shown. That is too much time. The public never gets 180 days or extensions to their comment periods for their reviews.

Response: The 180 days applies to the time allowed an applicant to cure deficiencies the DEQ has identified in an application. The 180 days is not a public review period. The 180 days response time with a good cause exception is currently in the rule. The rule is now working well for the DEQ and diligent applicants. No different response time is recommended.

Rule: OAC 252:002-15-70. "Common review procedures and time lines"

Comment: A reader of program rules confronted by a recommendation of when to submit a [water quality discharge] permit application may be confused by the uniform rules which establish other time lines for DEQ personnel to issue the permit. These timing issues could lead to misunderstanding about the time required to submit and receive a permit. A cross-reference in the program rules to the uniform rules that set out the time lines for the DEQ would prevent this possible confusion.

Response: A cross-reference has been added to OAC 252:605.

Rule: OAC 252:002-15-90. "Consolidation of permitting process"

Comment: 1. Applicants should have input on which application review times are coordinated and which meetings and/or hearings are consolidated. 2. The public should have input on consolidation. 3. Consolidating reviews and the meetings and/or hearings on complex applications and draft permits should be weighed carefully against the strain on resources and preparation/response time.

Response: The DEQ recognizes that such strains can burden the process rather than making it more efficient. Consolidation was never intended to be mandatory. To clarify that it is permissive only, DEQ has amended the rule to provide that consolidation will occur only after the DEQ has authorized it with applicant consent.

Rule: None

Comment: Permittees should be entitled to an administrative appeal of any adverse permit decision by the Department.

Response: Permittees are presently entitled to administrative

review by the Department of any adverse permit decision. Permit decisions and conditions are based upon applicability of rules. A permittee who alleges that any DEQ rule interferes with or impairs or threatens to interfere with or impair his/her legal rights may petition the DEQ, formally requesting a declaratory ruling on the applicability of the rule. (See 75 O.S. §304 and 252:002-7-1)

Rule: None

Comment: All permits should be subject to correction for good cause until such time as they are final under both state and federal law, whichever comes last. In this way, staff errors can be corrected without the necessity of further notice and hearing.

Response: The DEQ agrees that permit documents should be reviewed for errors. Accordingly, the DEQ has added new section 252:002-15-77 to clarify that the DEQ may ask an applicant at any time to review a permit document and to authorize corrections. However, the DEQ is not willing to go as far as saying that all corrections can be routinely made without notice or hearing. Hence, 77(b) calls for public notice to be published prior to "significant" corrections and gives options for public comments in writing, verbally and/or as evidence in an reconvened Tier III administrative permit hearing. A "significant" correction means any proposed change which significantly alters a facility's permitted size, capacity or other limits.

Rule: OAC 252:002-15-31(f) (2) (C) "Notice of draft permit/denial -- Additional notice"

(C) Applicants for a solid waste landfill permit shall provide notice by certified mail, return receipt requested, to owners of mineral interests and to adjacent landowners whose property may be substantially affected by installation of a landfill site. See DuLaney v. OSDH, Okl., 868 P2d 676 (1993).

Comment: We believe DuLaney vs. OSDH determined property owners and mineral interest owners have a right to a hearing before a facility permit is issued. We believe it is the obligation of the Department of Environmental Quality to hold a hearing which affected property owners and mineral owners would attend, not hold one if one is requested. The DuLaney case should apply to all Tier III hazardous waste disposal permits and Tier III underground injection well permits and, instead of saying "Opportunity for Administrative Hearing" should say "Administrative Hearing". Would you please explain what "Opportunity for Administrative Hearing" means in this context and explain why or why not the Dulaney case should not apply to Tier III hazardous waste permits and Tier III underground injection well permits.

Response: The Oklahoma Supreme Court's decision in Dulaney granted due process rights to owners of mineral interests that underlie

proposed solid waste landfills and to property owners adjacent to proposed landfills.

Although the Court's reasoning might appear to apply to many types of disposal sites, the actual holding of the case only addressed solid waste landfills. The Oklahoma Supreme Court, uniquely among the several states, created a property right where the Oklahoma statutes had not, at least not at the time the OSDH issued the solid waste permit. Current solid waste statutes do create a due process right, such as the Court in DuLaney recognized. Other state and federal courts say that legislation creates the property rights which are protected by due process.

As to whether a hearing must be held, or just an opportunity for one, the constitutional right to due process is an opportunity to appear before an impartial tribunal to state one's case. Notice of the opportunity is the critical point, as DuLaney itself makes clear.

EQB Jan. 28, 1997

**TITLE 252. OKLAHOMA DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY
SUBCHAPTER 15. ENVIRONMENTAL PERMIT PROCESSING TIMES**

EXECUTIVE SUMMARY:

The Department is proposing amendments to the air quality provisions of 252:2-15-40, 41 and 72 to make them consistent with 252:100, Air Pollution Control. The terms "minor source(s)" and major "facility(ies)" would be changed to "minor facility(ies)" and "Part 70 source(s)", respectively.

DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

None.

ENVIRONMENTAL BENEFIT STATEMENT:

Not required because these rules are not more stringent than corresponding federal rules.

SUMMARY OF COMMENTS AND RESPONSES:

US EPA Region VI, Permits Section (received 12/10/99 via email)

COMMENT: The proposed revision to 252:2-15-72(1)(A) is inconsistent with Section 165(c) of the CAA and 40 CFR 51.166(q)(2) of the Federal Regulations that require the reviewing authority to issue or deny a PSD permit within one year (365) days following receipt of a complete permit application.

RESPONSE: Staff agrees with the commenter and revised Section 252:2-15-72(1)(A) to specify that any PSD construction permit would be issued or denied within 365 days following receipt of a complete permit application.

MEMBERS OF THE COUNCIL:

MR. FISHBACK

MS. SLAGELL

MR. KILPATRICK

MS. MYERS

MR. BRANECKY

MR. BREISCH -- CHAIRMAN

MR. BYRUM -- PROTOCOL OFFICER

MS. MYRNA BRUCE -- SECRETARY

Dick's Transcription Service (405) 525-4111

PUBLIC HEARING:

MR. BYRUM: For the record, ladies and gentlemen, my name is Larry Byrum. I am director of Air Quality Division. As such, I will act as Protocol Officer for this hearing.

This hearing is convened by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act, Title 40 of the Code of Federal Regulations, Part 51, as well as the authority of Title 27 A of the Oklahoma statutes, Section 2-1-101 and following.

This hearing was advertised in the Oklahoma Register for purposes of receiving comments pertaining to the proposed revisions of the Uniform Permitting Procedures portions of OAC 252, 240, and 241.

At this time, I'd like to call Ms. Barbara Hoffman to present the Staff's position.

MS. HOFFMAN: Members of the Council, ladies and gentlemen, my name is Barbara Hoffman. Staff is proposing format and substantive changes to OAC 252:2-15-40, and 2-15-41, which are Tiers I and II for Air Quality authorizations.

Basically, the format has been changed to try to make it easier to understand. In addition, the most

substantive changes were made at the urging of EPA because of concerns about Title 5 permits not being subject to all the necessary public participation requirements.

For example, Temporary Permits are now a type of Title 5 authorization, so they were moved from Tier I to Tier II, as were acid rain permits. In addition, authorizations under a general permit have always been considered Tier I. But EPA pointed out that all Title 5 compliance schedules must have public review. Thus, while simple authorizations remain in Tier I, authorizations for which a schedule of compliance is required have been added to Tier II.

There's been another addition to Tier II, and that's 2-15-41 A. "When modifications are made to minor sources which cause them to become major facilities." Since major facilities need public participation that was moved to Tier II, or added to Tier II.

And then our final substantive change was in 2-15-40 C 5, which provides for alternative emissions reduction authorizations. And these are authorizations that are authorized under Sub Chapter 11 of our rules. And they've never been included in the uniform permitting tiers before. And since all authorizations are supposed to be classified under the tier format, they were added

1271

1 MS. HOFFMAN: Right.
2 MR. FISHBACK: Okay. If there's the
3 difficulty, looking just at one piece of it. Okay. All
4 right.
5 So, really there's no way to -- well, let's me ask
6 the question this way. Upon final rule passage, would
7 it be appropriate to look at the entire package?
8 Because I think we are all going to have questions like
9 I did in this case. Well, it looks like something's
10 missing. Well, it's really not missing, it's just not
11 being revised, so it's not in the package today.
12 MR. BYRUM: I think it's more reflective of
13 what we advertised for a hearing.
14 MR. FISHBACK: More reflective of?
15 MR. BYRUM: What we advertised for a hearing.
16 MR. FISHBACK: Okay.
17 MS. HOFFMAN: We can certainly get copies of
18 the procedural rules for each of the members of the
19 Council, if that's what you would like.
20 MR. FISHBACK: Maybe along the lines of what
21 was suggested earlier about references. It would be
22 sufficient for my purposes to just note on here, and I
23 guess, you have to anticipate the question, which may be
24 difficult.
25 (Laughter.)

Dick's Transcription Service (405) 525-4111

1 MR. FISHBACK: If you just note it on here,
2 this refers to Tier I and Tier II. Tier III is not
3 being revised, so it's not here.
4 MS. HOFFMAN: Okay.
5 MR. FISHBACK: That avoids the question. If
6 you are not revising something -- in fact, maybe a
7 complete listing of the rules, and then highlight or
8 bold face just the ones that are being proposed for
9 revision, so you can tell automatically that you
10 shouldn't find it here 'cause it's not on the agenda for
11 revision. 'Cause my perception is that there are holes
12 in this, but there aren't really.
13 MS. HOFFMAN: Okay.
14 MR. BYRUM: Other questions for Ms. Hoffman?
15 (No response.)
16 MR. BYRUM: Questions from the audience?
17 MS. BARTON: I just have a question for
18 Mr. Kilpatrick.
19 Do you want to share what your concern is?
20 MR. KILPATRICK: I don't know what my concern
21 is, except that when this was passed by the DEQ as an
22 emergency rule, some members of industry called me and
23 had some problems. And I don't know whether their
24 problem extended beyond the fact that DEQ passed it, or
25 whether they had some concerns with the words. And I

Dick's Transcription Service (405) 525-4111

11

1 haven't had a chance to call any of them back and talk
2 to them.
3 If there's no reason to pass it until next meeting,
4 I would just as soon defer and make those changes in
5 here, and make it agree with Sub Chapter 8 to pass it at
6 that time. I think it would still become permanent, and
7 that would just give me a chance to call and find out if
8 they had any other concerns that need to be addressed in
9 the rule.
10 MS. BARTON: I will just share with you, I was
11 at that meeting and raised that question, and it was the
12 procedure that they did it.
13 MR. KILPATRICK: Well, I understand that, but
14 I want to know if there is any further issues with,
15 actually, the wording of it.
16 MS. BARTON: I don't know, David.
17 Did you all address that?
18 MR. BRANECKY: (Shook head.)
19 MR. BYRUM: Other questions for Ms. Hoffman?
20 (No response.)
21 MR. BYRUM: Thank you, Barbara.
22 Anyone wishing to speak on this particular
23 regulation?
24 (No Response.)
25 MR. BYRUM: Mr. Chairman.

1 MR. BREISCH: It appears to me that we might
2 want to consider continuing this item until the next
3 regular meeting on December 16th. If so, do I hear a
4 motion?
5 MR. KILPATRICK: I would so move.
6 MR. BREISCH: A motion.
7 MS. SLAGELL: I second it.
8 MR. BREISCH: A second. Any further
9 discussion or questions?
10 (No response.)
11 MR. BREISCH: Myrna.
12 MS. BRUCE: Mr. Fishback?
13 MR. FISHBACK: Aye.
14 MS. BRUCE: Ms. Slagell?
15 MS. SLAGELL: Aye.
16 MS. BRUCE: Mr. Kilpatrick?
17 MR. KILPATRICK: Aye.
18 MS. BRUCE: Ms. Myers?
19 MS. MYERS: Yes.
20 MS. BRUCE: Mr. Branecky?
21 MR. BRANECKY: Yes.
22 MS. BRUCE: Mr. Breisch?
23 MR. BREISCH: Aye.
24 MR. BREISCH: That concludes the public
25 hearing portion of the meeting. (Conclusion.)

1 PROCEEDINGS

2 MR. DYKE: The next item our
3 hearing agenda is Item Number 7. Ladies
4 and gentlemen, my name is David Dyke. I'm
5 Interim Director of the Air Quality
6 Division. As such, I will act as Protocol
7 Officer for this hearing.

8 This hearing is convened by the Air
9 Quality Council in compliance with the
10 Oklahoma Administrative Procedure Act in
11 Title 40 of the Code of Federal
12 Regulations, Part 51, as well as the
13 Authority of Title 27A of the Oklahoma
14 Statutes, Section 2-2-201 and 2-5-101
15 through 2-5-118.

16 The hearing was advertised in the
17 Oklahoma Register for the purposes of
18 receiving comments pertaining to the
19 Proposed Revisions of OAC 252:100-2-15-40
20 and OAC 252:100-2-15-41, Uniform Permitting
21 Procedures.

22 If you wish to make a statement,
23 please complete the form at the
24 registration table, and you will be called
25 upon at the appropriate time.

1 At this time, I will call upon
2 Barbara Hoffman to give the staff's
3 position on the proposed changes.

4 Ms. Hoffman.

5 MS. HOFFMAN: Mr. Chairman,
6 Members of the Council, and ladies and
7 gentlemen, my name is Barbara Hoffman, I'm
8 an attorney with the AQD. Staff is
9 proposing format and substantive changes to
10 OAC 252:2-15-40 and 2-15-41, for Tiers I
11 and II, for Air Quality authorizations.
12 These proposed changes were heard by the
13 Council on October 21st, and the hearing
14 was continued until today. Basically the
15 format has been changed to try to make it
16 easier to understand. In addition,
17 substantive changes were made at the urging
18 of EPA because of the concerns of Title V
19 permits not being subject to all the
20 necessary public participation
21 requirements. For example, temporary
22 permits are now a type of Title V
23 authorization, so they were removed from
24 Tier I to Tier II, as were acid rain
25 permits.

Christy A. Myers
Certified Shorthand Reporter

127B

1. In addition, authorizations under a
2 general permit have all been considered
3 Tier I. But EPA pointed out, that all
4 Title V compliance schedules must have
5 public review. Thus, while simple
6 authorizations remain in Tier I,
7 authorizations for which a schedule of
8 compliance is required have been added to
9 Tier II.

10 There has been another addition to
11 Tier II, and that is 2-15-41 A. Quote,
12 when modifications are made to minor
13 sources which cause them to become major
14 facilities, close quote. Since major
15 facilities require public participation,
16 that language was added to Tier II.

17 Our final substantive change was in
18 2-15-40 C 5, which provides for alternative
19 emissions reduction authorizations. These
20 authorizations are allowed under Subchapter
21 11 of our rules, but they have never been
22 included in the Uniform Permitting Tiers.
23 Since all authorizations are suppose to be
24 classified under the Tier format, we have
25 added them to Tier I. They were added to

Christy A. Brown
Certified shorthand reporter

7

1 DR. CANTER: I was trying to keep
2 up with what you were saying. I may have
3 been reading the wrong place. You
4 mentioned something about minor source
5 permits and I lost track. And it was about
6 a page ago when you were talking. I think
7 I must have been on the wrong page because
8 what you were reading about minor source
9 permits was not what I was looking at. So
10 I must be in the wrong section. I'm sorry.

11 MS. HOFFMAN: I see what you're
12 saying. I did quote that wrong. If you'd
13 go to page 2.

14 DR. CANTER: Okay.

15 MS. HOFFMAN: At the bottom of
16 the page under (a), minor source permit
17 actions.

18 DR. CANTER: Yes.

19 MS. HOFFMAN: That's the new
20 language there. And it says, any minor
21 source seeking a permit for a facility
22 modification that when completed would turn
23 it into a major facility is required to
24 apply under Subsection B, of this Section.
25 And that's under the Tier II authorization.

Christy A. Brown
Certified shorthand reporter

1 Tier I because they called for reductions
2 in emissions and also because in order to
3 have this authorization, a SIP provision
4 will be required. All State Implementati
5 Plans, or SIP revisions, must go through
6 public hearing. So even though th
7 authorizations are in Tier I, they
8 receive a public hearing.

9 Finally, in response to a comment
10 made by Mr. Kilpatrick at the October 21a
11 hearing, several citations were changed to
12 make them conform to the proposed revisio
13 to Subchapter 8. Now, those can be chang
14 at any time, either by us or the Secreter
15 of State's Office before they publish the
16 rules. So those citations can be changed
17 back, which I think we'd probably do at
18 this point since the Subchapter 8 revisio
19 have not been adopted at this point.

20 Staff recommends that the Council
21 forward this rule to the Board with the
22 recommendation that it be adopted as a
23 permanent rule.

24 MR. DYKE: Questions from the
25 Council of Ms. Hoffman?

Christy A. Brown
Certified shorthand reporter

1 DR. CANTER: Okay. And when you
2 had said earlier didn't match.

3 MS. HOFFMAN: That's right. I'm
4 sorry.

5 DR. CANTER: Well, I was trying
6 to keep up and I couldn't get that one.

7 MR. DYKE: Additional questions
8 from the Council?

9 Questions from the public? I have a
10 notice here that Rick Barrett, of EPA,
11 wishes to make a comment.

12 MR. BARRETT: Good afternoon,
13 again. My name is Rick Barrett with the
14 Environmental Protection Agency, Region 6,
15 Dallas. And we would like to commend the
16 Oklahoma Department of Environmental
17 Quality for their efforts in forming these
18 regulations. However, these Tier Rule
19 changes as we've noted earlier are not
20 approvable by the EPA, if they're submitted
21 as a SIP provision. EPA proposed
22 provisions to monitor public commenting of
23 Part 51 and 70, and also, 71 were included
24 in that proposal of August '95. We
25 anticipate that to go final in the f

Christy A. Brown
Certified shorthand reporter

1 '98. At that time the str of Oklahoma as
2 well as all the states in the United States
3 will have to -- in Guam and Puerto Rico,
4 will have to change their SIP's to match
5 that rule. And under that rule there will
6 be some discretion afforded to the State on
7 what will be public noticed and what will
8 not. And the way this rule is written
9 right now, Chapter 2, Subchapters 15-40 and
10 41, especially, of course 40, which is for
11 minor sources predominately, the rule will
12 have to be changed to fit that. So it's
13 not approvable at this time, however, we do
14 have those proposals that we have to go
15 final with in the fall that will clarify
16 that for the State's discretion. So at
17 this time, of course, we can't recommend
18 that to be approved in the present form.

19 Secondly, it's been noted earlier
20 today that there were citation changes made
21 to Chapter 2, Subchapter 15, 40 and 41,
22 which were made in effect to match changes
23 that were made very recently to Subchapter
24 8, which we have not had time to review.
25 And we recommend deferring action on this

Christy A. Mann
Certified shorthand reporter

11

1 This rule is part of our state
2 implementation plan that was approved by
3 EPA. The regulation he's referring to has
4 always been in effect, since before this
5 SIP was approved with our current
6 regulation in it. Therefore, EPA, has in
7 the past read their regulation to say that
8 our rule was just fine. We still read
9 their rule that way, that our regulation is
10 just fine. Now, they're proposing to
11 change their rules to make it, from their
12 standpoint, clearer that they now require
13 public participation for some minor source
14 permitting. And that's fine, but that rule
15 hasn't been promulgated to this point and
16 we don't know that it will be.

17 MR. BARRETT: What she said is in
18 fact true regarding the promulgation which
19 we anticipate in the fall of '98. It may
20 also be true that we approved a SIP
21 revision in 1972 from the State of Oklahoma
22 that approved no public notice for minor
23 sources. However, that was in 1992. Clean
24 Air Acts have been amended twice since that
25 time. And if the Tier I Rule was approved

Christy A. Mann
Certified shorthand reporter

1 rule til the January 9 meeting when we
2 had to fully evaluate these citation
3 references. Thank you very much.

4 MR. BRELSCH: Well, Rick, what
5 are you saying? That there's not a
6 regulation or rule from EPA that says you
7 can't approve this rule if we pass it. Do
8 you say that there is going to be one?

9 MR. BARRETT: No. Here is what
10 I'm saying. At the current time, the Code
11 of Federal Regulations, Part 51, Subpart I
12 51.1-61, public availability of informatio
13 requires the state or local agency to
14 provide opportunity for a 30 day public
15 comment period for all new sources. That
16 is all new sources, minor and major, and
17 modifications of sources. That's in the
18 Code of Federal Regulations at the current
19 time.

20 MS. HOFFMAN: Could I comment on
21 that?

22 MR. DYKE: Yes.

23 MS. HOFFMAN: Our rules,
24 currently do not provide for public
25 participation in minor source permits.

Christy A. Mann
Certified shorthand reporter

1 today by the Council for the Environmental
2 Quality Board, was forwarded to the
3 legislature and was sent to us as a SIP
4 revision by the Governor, we would not
5 approve it.

6 DR. CANTER: I'm mixed up on
7 dates. You said 1972. Then you said 1992
8 and then you said it has been amended
9 twice. It hasn't been amended twice since
10 1992.

11 MR. BARRETT: No. 1972 was when
12 the SIP revision for Oklahoma was approved
13 regarding minor source permitting.

14 DR. CANTER: Okay.

15 MR. BARRETT: Since that time,
16 the Clean Air Act has been amended in 1977
17 and was again amended, as you know, in
18 1990. Now, what we're saying is, and we've
19 understood this for quite sometime, and
20 what the Part 70 Program precipitated is
21 public notice for minors to be addressed in
22 all the state permitting programs. So EPA
23 in its endeavor to clarify this, proposed
24 Part 51, Part 70 and Part 71 revisions in
25 August of '95, to clarify that once and for

Christy A. Mann
Certified shorthand reporter

1275

1 all and for the states to have certain
2 discretion on some things permitting actions
3 and not discretion on the others. The way
4 the current rule is in Oklahoma, there is
5 no public participation for minors period.
6 So we are hoping again, that this
7 clarification will be finalized in the fall
8 of next year.

9 DR. CANTER: I have two more
10 questions. One is, don't we have some
11 general things about our Tier Permitting
12 Program in this state that do address
13 public participation for Tier I? They may
14 not be here, but do we have something like
15 that?

16 MS. HOFFMAN: Yes. They require
17 a landowner notice but not public.

18 DR. CANTER: Not public, per se.
19 Okay. Second question is, have you two
20 talked about this before? I mean, I get
21 the sense that our staff thought this was
22 acceptable and all of the sudden now, there
23 is an issue raised about, you're
24 interpreting existing conditions one way,
25 and they're saying it's something else.

Christy B. Myers
Qualified Aboriginal Resource

1 rule.

2 MS. MYERS: And then when it
3 comes up in 1998 if it's promulgated then,
4 we've got to come back and address it
5 again.

6 MS. HOFFMAN: That's right.

7 MS. MYERS: It might not come out
8 until 1999.

9 MR. BREISCH: Yes, but what
10 happens between now and then to our SIP?

11 MR. KILPATRICK: The question is
12 what happens if the scenario that EPA has
13 put forward occurs and the SIP is not
14 approved, so what. Where are we then?

15 MS. HOFFMAN: We have -- plus
16 there's another concern here, and that's
17 the fact that we need to pass this rule for
18 the Title V provisions. In other words,
19 for our Title V Program to continue to be
20 approved, we have to have these changes
21 that we've made to Tier II.

22 As far as what happens if our SIP is
23 disapproved, then we have major problems.
24 I think that this is still an issue that
25 needs to be resolved between the DEQ and

Christy B. Myers
Qualified Aboriginal Resource

1 An it seems to me you can't say what will
2 happen in the fall of '98. We've got to
3 take into account here. We have to operate
4 on December 1997 conditions. And you're
5 saying there is a requirement, and you're
6 saying there is not a requirement.
7 you guys talked about it?

8 MS. HOFFMAN: There have been
9 letters that have gone back and forth
10 between EPA and AQD I believe, but there's
11 never been any real discussion of the
12 issue. Our Statutes -- our rules at this
13 point require that minor sources -- or the
14 provide that there is no public
15 participation for minor sources. So we
16 would have to change not just our Tier
17 Rules but other rules and statutes, as
18 well, to make this change that they are
19 requesting.

20 MS. MYERS: Well, I can't see
21 making the change based on something that
22 might happen in 1998. I mean, this is the
23 year we need to address today. What is the
24 staff's recommendation today on this issue?

25 MS. HOFFMAN: That we adopt this

Christy B. Myers
Qualified Aboriginal Resource

1 EPA, and it just hasn't been resolved yet
2 But it's something that the two agencies
3 are going to have to work on. Because this
4 is a position that EPA has really only
5 taken recently, in the last couple of
6 years, they have adopted this position.
7 Where before they never read their
8 regulations to mean that. So it could
9 change again.

10 MR. BREISCH: Again, I'm
11 confused that this scenario about fixing
12 Subchapter 8 -- Subchapter 7 to satisfy the
13 SIP requirements by EPA. If we do all of
14 that and we haven't satisfied them on V,
15 where do we stand? The SIP is still not
16 approvable.

17 MS. HOFFMAN: Well, we're
18 dealing with two separate things here.
19 We're dealing with the SIP and we're
20 dealing with Title V. Title V is not part
21 of the SIP.

22 MR. BREISCH: Okay.

23 MS. MYERS: What you're saying,
24 if I understand you correctly, this
25 still part of the Title V clean up t.

Christy B. Myers
Qualified Aboriginal Resource

1 need to get done. The SIP a separate
2 issue.
3 MS. HOFFMAN: Correct.
4 MS. MYERS: He's saying that they
5 might not approve our SIP, if we approve
6 this. But we still have to have this to
7 keep our Title V program operating?
8 MS. HOFFMAN: Yes.
9 MS. MYERS: I think we need to go
10 ahead and proceed.
11 MR. DYKE: Any additional
12 comments from the public? Anyone else
13 wishes to be heard? Yes, sir.
14 MR. DAVENPORT: My name is Pat
15 Davenport. Does the gentleman from EPA
16 have the authority to say you will not
17 approve this?
18 MR. BARRETT: That would be my
19 recommendation, let me say it that way.
20 MR. DAVENPORT: Then if we know
21 that they are not going to approve --
22 MR. BARRETT: I have to approve
23 it with upper management, of course.
24 MS. MYERS: But there are points
25 to negotiate, are there not?

Christy A. Myers
Certified Secretarial Executive

19

1 this time around they're not going to
2 accept it. But we're not actually changing
3 that part of the rule. We've tried to
4 reformat the rule so it's easier to read.
5 And the only changes we've made are to move
6 things to Tier II for Title V purposes. So
7 we're going to get punished for doing that,
8 apparently. But that's what we need to do
9 to keep our Title V approval.
10 MR. DYKE: Anybody else that is
11 willing to speak on this?
12 MR. DOUGHTY: David, let me make
13 just one comment. Dennis Doughty. I think
14 there is some real legal questions here.
15 In the past to my knowledge, EPA has never
16 purported to require any regulation of
17 minor sources with maybe some exception of
18 NSPS perhaps and nonattainment areas. So I
19 think the issue of requiring public comment
20 for minor sources that they normally don't
21 even require SIP for, is one issue that is
22 going to have to be resolved. And then --
23 and I think they're going to have to
24 legally justify this change in stands on
25 the way the rule has been interpreted. And

Christy A. Myers
Certified Secretarial Executive

1 MR. BARRETT: I'm sorry, I'm
2 sorry. I'm sorry.
3 MR. DAVENPORT: I was just
4 wondering, if we know that you aren't going
5 to approve it, why are we passing something
6 that we know isn't going to be approvable.
7 He asked this question just a moment ago
8 and never got a response. It seems like
9 we're chasing ourselves around in a circles
10 here.
11 MS. MYERS: I think we're talking
12 about two different issues. This is Title
13 V, he's talking about the SIP, State
14 Implementation Plan. That's separate from
15 the Title V issues. This is Title V, to
16 keep our program operating under the
17 jurisdiction of Oklahoma. Is that correct?
18 MS. HOFFMAN: That is correct.
19 MR. BARRETT: Yes.
20 MS. MYERS: I got concurrence
21 from both parties.
22 MS. HOFFMAN: We're not really
23 changing the rule with respect to minor
24 sources. That rule is not really changing
25 here, okay. It's just now they're saying,

Christy A. Myers
Certified Secretarial Executive

20

1 as I've heard Council Members themselves
2 say, you know, we can't pass something
3 today based on what may happen tomorrow.
4 We've got to look at the situation as it
5 exists today, and there is no guarantee
6 that this change in the interpretation on
7 EPA's part is actually going to bare fruit.
8 MR. DYKE: Anybody else?
9 Discussion of Council?
10 MS. MYERS: I make a motion that
11 we approve the changes and approve it.
12 MR. FISHSACK: I second it.
13 MR. BREISCH: We have a motion
14 and a second to approve this change, this
15 rule. And I guess your motion is to
16 recommend it for approval of the DEQ.
17 MS. HOFFMAN: That would be
18 staff's recommendation, yes.
19 MR. BREISCH: Is that your
20 motion?
21 MR. BARRETT: Can I make another
22 comment before you have a vote here? I
23 would ask that the Council at least
24 postpone this until the January 9th
25 meeting, so that we could discuss this

Christy A. Myers
Certified Secretarial Executive

1277

1 further.
2 MR. FISHBACK: What would you
3 bring to us at that time?
4 MR. BARRETT: Irrespective of
5 the Tier I scenario with minor source
6 permitting, okay. The citation changes
7 that were made to 2-15-40 and 41, that
8 reference Subchapter 8 for the Part 70
9 program, we have not had time to review
10 those citation changes either -- if just
11 for that reason alone. We would ask the
12 Council to defer this until January 9th so
13 we would at least have time to look at that
14 at EPA in Dallas.
15 MS. NYERS: Let me ask our legal
16 staff, how much referencing does this need?
17 Is this depending on Subchapter 8?
18 MS. HOFFMAN: What we refer to
19 were sections in Subchapter 8. These are
20 not sections that have changed
21 substantively. It's just a number change,
22 it's just a numbering change, okay. And
23 that's all it is. So, the sections that
24 were referred to are the same ones that
25 were referred to at our October 21st

Christy A. Brown
Certified shorthand Reporter

23

1 asking that. I don't want that to happen.
2 I'm asking are you and EPA going to get
3 together between now and then and discuss
4 this or are we just wasting time?
5 MR. DOUGHTY: Well, I don't know
6 if I can answer that. I mean, we can talk
7 to EPA, but based on past dealings, I'm not
8 sure how convincing I can be to get them to
9 change their stance. We'll certainly talk
10 to them if it's the Council's desire to
11 postpone this. That's not a problem. But,
12 I wish I could tell you what kind of a, you
13 know, change of heart somebody might have
14 at the next Council meeting. The best I
15 think we can guarantee, is we will talk
16 with them.
17 MR. BREISCH: Well, it seems to
18 me to comply with what EPA is saying we
19 would have to hear ramifications on other
20 rules. And so all of the sudden we think
21 we've cleared this up and then we're in
22 another quick change to comply with the
23 other rules. I'd hate to see that happen
24 at your special meeting.
25 MR. KILPATRICK: Even though I

Christy A. Brown
Certified shorthand Reporter

1 ing. It's just that those sections
2 numbers might have changed in the revision
3 that Joyce made to Subchapter 8. This
4 has not changed at all from what you saw
5 October 21st.

6 MR. KILPATRICK: I apologize
7 asking for the change. I didn't mean to
8 cause so much trouble to change the number
9 to reference the new format instead of the
10 old format. I do have a question for
11 Barbara.

12 What do you think, is it useful at
13 all to defer the -- until the 9th for
14 anything other than these number changes,
15 which I think is totally ridiculous. But
16 to consider the other issues, is there any
17 value in waiting until the 9th to do that?

18 MS. HOFFMAN: I think I'll refer
19 to Dennis on that.

20 MR. DOUGHTY: I'm not sure I know
21 what you're asking. If you're asking, are
22 we going to decide that we want to put
23 minor sources to public review, I don't
24 know if I can answer that.

25 MR. KILPATRICK: No, I'm not

Christy A. Brown
Certified shorthand Reporter

1 recommended it, by seconding the motion,
2 since EPA has asked that we defer it to the
3 9th, I would be in favor of at least giving
4 them that benefit to wait that additional
5 time. I don't see why it puts us at risk
6 at all to wait until the 9th to approve
7 this. It's still going to go the DEQ at
8 the same meeting. And since they have
9 requested that, I would be in favor of
10 going that route, put it off until then and
11 we just see what happens.

12 MR. FISHBACK: Do we have the
13 same problems with emergency versus
14 permanent rules that we were talking about
15 on Subchapter 17? Is that the same --

16 MS. HOFFMAN: This is a permanent
17 rule only.

18 MR. FISHBACK: Only.

19 MR. HOFFMAN: The emergency rule
20 was passed almost a year ago. And so
21 unless this permanent rule goes to the
22 Board in January, the emergency rule will
23 die in July, so we'll go back to the way
24 it was before.

25 MR. FISHBACK: Okay. So in this

Christy A. Brown
Certified shorthand Reporter

1 case then, the January 9th meeting, there
2 is no fall back
3 MS. HOFFMAN: Right.
4 MR. FISHBACK: If it's deferred
5 and it's not passed, it's gone.
6 MS. HOFFMAN: Right.
7 MR. DOUGHTY: Let me make one
8 more comment. There's really no
9 requirement that we submit this change as a
10 SIP revision anyway. We don't have to do
11 that. We don't have to get their approval.
12 Matter of fact, I think we have at least
13 one rule that says that -- it's never been
14 submitted as a SIP revision anyway, and
15 it's only enforceable in Oklahoma. And
16 although I haven't studied it, Barbara
17 knows the details on it. If this is not a
18 substantive change, it's not going to
19 matter anyway. What EPA, if they're
20 convinced they're right legally, their
21 option is to call our SIP and say that it's
22 not adequate and then we would have to make
23 these changes anyway.
24 MS. MYERS: Is there any conflict
25 on going ahead and approving this today

Charles A. Myers
Certified shorthand Reporter

1 with the references that it has to
2 Subchapter 8. Is there any conflict or
3 problem that will be generated by us doing
4 that?
5 MR. DOUGHTY: Barbara.
6 MS. HOFFMAN: I think not. I
7 think that since you've already been
8 looking at the other Subchapters, including
9 Subchapter 8 on January 9th, that if you
10 approve Subchapter 8, then all of these
11 rules including this one, will go the Board
12 at the same time and those references will
13 be perfectly all right. Now, if you
14 decided not to adopt Subchapter 8 revisior
15 on January 9th, I can simply, I believe,
16 just go back in and put the references bac
17 to the way they were, okay, to conform to
18 the existing rules. Now, I think I can do
19 that before the Board meeting and it won't
20 be any problem.
21 DR. CANTER: It sounds to me, t
22 issues that are in debate here are issues
23 that are beyond -- that may not just be
24 limited to Oklahoma and they are beyond
25 these proposed changes. And I for one,

Charles A. Myers
Certified shorthand Reporter

27

1 would be in favor of going on with this
2 action today, because it sounds like to me
3 these are broader issues. We'll cross that
4 bridge when we get there.
5 MS. MYERS: I'll leave my motion
6 standing.
7 MR. BREISCH: Who seconded that
8 motion?
9 MR. KILPATRICK:-- I seconded that
10 motion.
11 MR. BREISCH: Does it stand?
12 MR. KILPATRICK: If you'll allow
13 me to withdraw it, I'll withdraw it. I'm
14 going to vote, no. I don't care which --
15 MR. BREISCH: You can withdraw
16 it.
17 MR. KILPATRICK: I'd like to
18 withdraw it then.
19 MR. BREISCH: Do I have another
20 second?
21 MR. BRANECKY: I'll second it.
22 MR. BREISCH: Then, we have a
23 motion and a second.
24 MR. FISHBACK: Can you restate
25 the motion?

Charles A. Myers
Certified shorthand Reporter

1 MR. BREISCH: That we adopt this
2 rule and recommend it to the DEQ for
3 approval on their January 22nd meeting.
4 MR. FISHBACK: As it stands with
5 no changes?
6 MR. BREISCH: Right. That's what
7 the motion is. I've got a motion and a
8 second. Any other questions from the
9 Council?
10 Myrna, call the roll.
11 MS. BRUCE: Mr. Kilpatrick.
12 MR. KILPATRICK: No.
13 MS. BRUCE: Ms. Slagell.
14 MS. SLAGELL: Aye.
15 MS. BRUCE: Mr. Fishback.
16 MR. FISHBACK: Aye.
17 MS. BRUCE: Dr. Canter.
18 DR. CANTER: Aye.
19 MS. BRUCE: Ms. Myers.
20 MS. MYERS: Aye.
21 MS. BRUCE: Mr. Branecky.
22 MR. BRANECKY: Aye.
23 MS. BRUCE: Mr. Breisch.
24 MR. BREISCH: Aye.

Mr. David R. Dyke
Acting Director
Air Quality Division
Oklahoma Department of
Environmental Quality
4545 N. Lincoln Boulevard, Suite 250
Oklahoma City, OK 73105-3483

RE: Comments on Draft Permitting Regulations Revisions: Chapter
100 - Subchapters 5, 7, 8; and Chapter 2 - Subchapters 40, 41.

Dear Mr. Dyke:

Thank you for the opportunity to review and provide the following comments on the proposed changes to the Oklahoma permitting regulations. The proposed rule changes are to the Oklahoma Air Quality annual operating fees, permitting regulations, and tier classifications, as proposed on December 1, 1997. Listed below is a comment from the Air Permits Section:

The following specific comment addresses the integration of Oklahoma Administrative Code (OAC) 252:100 subchapters 7 & 8, new source review (NSR) and Part 70 permitting programs; and 252:2 subchapter 15, tier classifications:

Tier I as proposed does not meet the federal permitting requirements. Tier I does not meet 40 CFR Part 51, Subpart I, §51.161 Public availability of information, which requires the State or local agency to provide opportunity for a 30 day public comment period for all new sources and modifications of sources of air pollutants.

However, 40 CFR Parts 51, 70, and 71 are expected to be amended in the Fall of 1998. Further, the revisions to 40 CFR Parts 51, 70, and 71 will clarify the scope of State discretion in affording public process for minor NSR actions. This proposed revision will require the State to revise their minor NSR program and Part 70 program to address minor NSR public notice.

In keeping with the cooperative partnership shared by the Oklahoma Department of Environmental Quality and Region 6, I really

appreciate the effort made by your staff to work with Region 6. If you have any questions regarding these issues, please contact me at (214) 665-7250 or Richard A. Barrett of my staff at (214) 665-7227.

Sincerely yours,

Jole C. Luehrs
Jole C. Luehrs
Chief
Air Permits Section

**CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY
SUBCHAPTER 2. UNIFORM PERMITTING PROCEDURES**

EXECUTIVE SUMMARY: Both substantive and formatting amendments are proposed and designed to aid the Department of Environmental Quality (DEQ) in gaining EPA final approval of its Title V program. The substantive changes have been requested by the U.S. Environmental Protection Agency (EPA) after their review of the DEQ air quality permitting program for Title V. For example, some substantive changes move some Title V permits from Tier I to Tier II: i.e., acid rain permits that stand alone, temporary permits, and general permit authorizations required to have compliance schedules under 252:100-8. Second, a reorganization of the rules' format is also proposed due to general comments received from the EPA and others. Under the new proposed format, Tier I and II classifications are clarified and reorganized by facility size and type of permit for simplification purposes.

STATUTORY AUTHORITY: Environmental Quality Board, 27A O.S. Supp. 1993, §§ 2-2-101, 2-5-106, and 2-14-201.

DIFFERENCES FROM ANALOGOUS FEDERAL RULES: The Title V-based provisions are consistent with analogous federal Title V requirements. No incorporation by reference is possible since the federal requirements are in the form of state guidance rather than regulations.

ENVIRONMENTAL BENEFIT STATEMENT: These amendments are not more stringent than federal requirements. Therefore, no environmental benefit/ economic impact statement is required.

SUMMARY OF COMMENTS AND RESPONSES:

Comments made at the Public Hearing on October 21, 1997:

Comment: Gary Kilpatrick noted that the citations were based on the current rules and asked that the citations from the proposed new format be used instead.

Response: Staff concurred.

Comment: Bill Fishback asked where the requirements for the various tiers were spelled out and why Tier III was not addressed.

Response: The requirements for the various tiers are included in 252:2-15-26 through 32. Tier III was not included in the proposed revision because no revisions are proposed to Tier III.

Comment: Bill Fishback asked that the Tier Rules in their entirety be included in the Council packets for the continued hearing.

Response: Staff concurred.

Comments made at the Public Hearing on December 16, 1997:

Comment: Rick Barrett of EPA Region 6 indicated that 252:2-15-40 would be unacceptable as a State Implementation Plan (SIP) revision because minor source permits are not subject to public participation requirements.

Response: Permits for minor sources of air emissions have never been subject to public participation requirements in Oklahoma, and the revisions proposed for 252:2-15-40 do not change that. The proposed changes move certain authorizations from Tier I to Tier II, thus making more permits subject to public participation requirements. These changes are required for EPA final approval of the State's Title V permitting program and will be submitted for that purpose, not as a SIP revision.

RULE IMPACT STATEMENT: Attached.

Page 4

1 proposed revision to 252:2-15-72(1)(A) was
2 inconsistent with Section 165(c) of the
3 Clean Air Act and 40 CFR 51.166(q)(2) of
4 the Federal Regulations that require the
5 reviewing authority to issue or deny a PSD
6 permit within one year or 365 days
7 following receipt of the complete permit
8 application. Staff agrees with the
9 commenter and recommends a change to page
10 three of the proposed rule. Section 252:2-
11 15-72(1)(A), which specifies the time
12 allowed for issuance of a PSD construction
13 permit would be changed from 540 days to
14 365 days.
15 MR. BRANECKY: Why was it set at
16 540?
17 MS. BRADLEY: Before there was a
18 mixing of PSD and Part 70 Sources, you'll
19 notice in some of the struck-out language.
20 And I think because Part 70 was in there,
21 it was an oversight that maybe we shouldn't
22 mix those two time lines together.
23 MR. BRANECKY: Okay.
24 MS. BRADLEY: Although for Part
25 70 sources we now have a time line of 365

Page 3

1 **PROCEEDINGS**
2 MR. DYKE: The next item on the
3 agenda is Item Number 6G, OAC 252:2-15,
4 Environmental Permit Processing Times.
5 I'll call on Cheryl Bradley.
6 MS. BRADLEY: Good afternoon, Mr.
7 Chairman, Members of the Council, ladies
8 and gentlemen. Staff is proposing
9 modification to OAC 252:2-15, Environmental
10 Permit Processing Times. Sections 40, 41
11 and 72 would be amended to make them
12 consistent with Chapter 100, Air Pollution
13 Control Regulations by changing references
14 to minor source or sources, and major
15 facility or facilities, and changing those
16 to minor facilities and or minor facility
17 and Part 70 Source or Sources,
18 respectively.
19 Notice for today's hearing was
20 published in the Oklahoma Register on
21 November 15, 1999. This is the first time
22 the Council will consider this amendment.
23 Last Friday, staff received a
24 comment from the Air Permits Section of EPA
25 Region 6. The commenter stated that the

Page 5

1 days under the regulations. We could have
2 allowed up to 540 days for issuance of the
3 Part 70 construction permit.
4 Staff suggests that the Council
5 recommend permanent adoption of proposed
6 amendments, including the change in the
7 number of days allowed to issue a PSD
8 Construction permit.
9 MR. DYKE: Additional questions
10 of Ms. Bradley from the Council?
11 MR. TREEMAN: I've got one. You
12 said complete permit. Is that
13 administratively complete or a complete
14 permit under EPA's comments?
15 MS. BRADLEY: I'll defer to
16 Barbara, since she is much more --
17 MR. TREEMAN: Technically
18 complete or administratively complete.
19 MS. BRADLEY: No. It wasn't an
20 issue in the comment. Dawson, would you
21 like to comment on what you do in practice?
22 MR. LASITER: We have always
23 considered that a complete permit, which
24 would be technically completed, as well,
25 something that we could evaluate to take to

Page 6

1 public review.
 2 MR. TREEMAN: Thank you.
 3 MS. HOFFMAN: If I can make a
 4 suggestion. Since both the PSD -- if we
 5 make that change, then both PSD sources and
 6 the Part 70 sources construction permits
 7 would both be 365 days. So I would suggest
 8 that we just go ahead and combine them and
 9 say PSD and Part 70 sources, dash, 365
 10 days. That would be A and B would be minor
 11 facilities, 180 days. Do you see what I'm
 12 saying?
 13 MR. DYKE: Additional questions
 14 from the Council?
 15 MR. WILSON: You know, David, in
 16 the past there has been a lot of discussion
 17 and concern about how the word source and
 18 facilities are used in these regulations.
 19 Is this step to make Chapter 2 consistent?
 20 Is that what we're trying to do here?
 21 MS. BRADLEY: Yes, it is. With
 22 the revisions Barbara and Joyce -- she
 23 worked so diligently on, we conformed the
 24 descriptors in Subchapter 7 and 8. And
 25 this is to make Chapter 2 consistent with

Page 7

1 those.
 2 MR. WILSON: With those?
 3 MS. BRADLEY: Yes.
 4 MR. WILSON: You could have a
 5 minor source within a major facility, could
 6 you not? And anything we're doing here by
 7 changing this wording does not effect that?
 8 MS. BRADLEY: No. Because it
 9 would ultimately be the determination of
 10 whether the facility was subject to Part 70
 11 regulations and thereby subject to the
 12 requirements of Subchapter 8 would be
 13 clearly listed. It would be a major source
 14 or a listed source of some type, and
 15 subject to Part 70 permit. Because we do
 16 have minor sources that are subject to Part
 17 70 permitting.
 18 MR. WILSON: Right. And you can
 19 have Tier I permitting processes for minor
 20 sources within a major source facility.
 21 Okay. I see heads nodding.
 22 MS. BRADLEY: I don't work -- I
 23 must admit, I don't work with the Tier
 24 Process on a regular basis.
 25 MR. WILSON: Thank you.

Page 8

1 MR. DYKE: Is there anyone
 2 wishing to comment on this rule from the
 3 public? Additional questions from the
 4 Council?
 5 MR. BREISCH: I'll entertain a
 6 motion that the changes as noted for 252:2-
 7 15-72, combined A and B.
 8 MR. BRANECKY: So moved, and
 9 changing 540 days in A, to 365. So moved.
 10 MR. FALLON: Second.
 11 MR. BREISCH: I've got a motion
 12 and a second. Any other questions or
 13 comments? Myrna, call the roll.
 14 MS. BRUCE: Mr. Wilson.
 15 MR. WILSON: Yes.
 16 MS. BRUCE: Mr. Branecky.
 17 MR. BRANECKY: Yes.
 18 MS. BRUCE: Mr. Treeman.
 19 MR. TREEMAN: Yes.
 20 MS. BRUCE: Mr. Fallon.
 21 MR. FALLON: Yes.
 22 MS. BRUCE: Dr. Grosz.
 23 DR. GROSZ: Yes.
 24 MS. BRUCE: Mr. Breisch.
 25 MR. BREISCH: Yes.

CHRISTY A. MYERS, C.S.R.
Certificate No. 00310

**TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY**

EXECUTIVE SUMMARY:

The rules in this Chapter were substantially rewritten and reorganized through the DEQ's re-right/de-wrong rules simplification process and can be found in proposed Chapter 4. This chapter is being revoked, subject to the adoption of proposed Chapter 4.

DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

Since this is a revocation, there are no analogous federal rules.

ECONOMIC IMPACT/ENVIRONMENTAL BENEFIT STATEMENT:

Since this is a revocation, there are no analogous federal rules; therefore, there is no need for an EIEB Statement.

SUMMARY OF COMMENTS AND RESPONSES:

None.

**TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 4. RULES OF PRACTICE AND PROCEDURE**

EXECUTIVE SUMMARY:

The proposed new Chapter 4 is a comprehensive rewrite of Chapter 1 (Procedures of the Environmental Quality Board), Chapter 2 (Procedures of the DEQ) and Chapter 3 (Procedures of the Environmental Quality Councils) existing rules. As part of the re-right/de-wrong process, the format has changed significantly. New subchapters were created. Many rules were simplified and/or broken into several shorter rules for clarity. Statutory citations were updated, and statutory language was deleted.

Duplicative and redundant rules were eliminated. The rulemaking process rules were rewritten in chronological order. The permitting process rules were substantially rewritten to simplify and clarify them. Three separate subchapters dealing with administrative proceedings were combined into one subchapter that addresses all individual proceedings.

The proposed new Chapter 4 rules address general provisions, Board and council meetings and public forums, rulemaking, the environmental permit process, administrative proceedings, complaint processing, environmental education grants and local project funding.

This chapter also includes rules recommended by the Air Quality Council on June 14, 2000, which address hearings before that council. Rule numbers were changed to be consistent with the new proposed Chapter 4. See proposed Subchapter 4, Part 5.

DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

There are analogous federal rules for permitting. 40 CFR Part 124 contains federal rules entitled "Procedures for Decisionmaking". Subpart A, "General Program Requirements", contains EPA procedures for issuing RCRA, UIC, PSD and NPDES permits. In those programs for which DEQ has received delegation or authorization from EPA, the DEQ is required by federal law to follow some EPA procedures in addition to those required under state law. In those cases, the EPA procedures have been incorporated by reference by the specific program area either by rule or by program approval.¹ In the current Chapter 2 and the proposed Chapter 4 rules, additional notice requirements are acknowledged for NPDES, RCRA, and UIC permits.²

ECONOMIC IMPACT/ENVIRONMENTAL BENEFIT STATEMENT:

The Environmental Quality Act, 27A O.S. § 1-1-106(A), requires state environmental agencies to determine the economic impact and the environmental benefit of any proposed state rule that is more

¹ 252:205-3-2(a) RCRA; 252:652-1-3(b) UIC; 605-1-5(b) NPDES; SIP Approval, 48 Federal Register 166 (1983) PSD.

² current: 252:2-15-31(f)(2)(A) Applicants for a NPDES, RCRA or UIC permit are subject to applicable additional notice provisions of federal requirements promulgated as rules of the Board. proposed: 252:4-7-13(f)(1) Applicants for a NPDES, RCRA or UIC permit are subject to additional notice provisions of federal requirements adopted by reference as DEQ rules.

stringent than a corresponding federal rule unless the stringency is specifically authorized by state law. This determination is to be made before submitting the state rule to public comment and review.

While EPA and DEQ rules on permitting procedures vary in some respects, it is difficult to say which is more stringent. To the extent the DEQ rules might be deemed more stringent in some ways, the DEQ believes that the highly prescriptive Oklahoma Uniform Environmental Permitting Act, 27A O.S. § 2-14-101 through 401, specifically authorizes the Board to promulgate permitting rules that may be more stringent than corresponding federal rules.

The Oklahoma Uniform Environmental Permitting Act, 27A O.S. § 2-14-101 through 401, mandates uniform permitting provisions for notices and public participation that apply consistently and uniformly to applications for permits issued by the DEQ. It takes into consideration federal rules governing delegated programs and provides that applications subject to the Uniform Environmental Permitting Act "continue to be subject to additional or more comprehensive notice and public participation opportunities in rules of the Board promulgated pursuant to federal requirements for individual state permitting programs". (§ 2-14-104) Further, the Board was given authority to promulgate rules, including a consistent application process, opportunities for public participation, uniformity of notices, procedural application requirements, and the designation of applications as Tier I, II and III (§ 2-14-201[A]). The law mandates that the Board, in determining the Tier classification, consider the federal classification, if any, for a proposed activity, operation or type of site or facility. (§ 2-14-201[B]) The uniform permitting act provides that the rules for each tier shall contain specific uniform requirements for each type of notice required by the law. However, notice and public participation requirements shall not exceed those set forth for each tier unless required otherwise by applicable federal rule adopted by the Board or a holding of the Oklahoma Supreme Court (§ 2-14-201[C]).

While an EIEB Statement is not required, the DEQ notes that, because these rules are procedural and because of the simplification and clarification nature of the rule changes, there is unlikely to be any measurable economic impact or environmental benefit associated with them.

SUMMARY OF COMMENTS AND RESPONSES:

See attached.

Comments from David Branecy

Comment 1: The definition of "Application" in 4-1-2 is contained in quotes and appears to be italicized. I am not sure of the reason for this. In addition the word "DEQ" is contained within brackets. Again I don't understand. Finally, there are three (3) periods (...) between the word "[DEQ]" and "any" in the third line of the definition. Does this mean that some wording was left out?

Response 1: The Administrative Rules on Rulemaking (OAC 655:10-5-12) control the way this definition is formatted. Italics are required because the term "application" is defined by statute. The word "DEQ" is in brackets because we use DEQ in the rules, but not in the statutory language and three dots (...) follow because the quotation is incomplete. Repetitive language was excluded; only the relevant portion was quoted.

27A O.S. § 2-14-103(1) in its entirety, reads as follows:

"Application" means a document or set of documents, filed with the Department of Environmental Quality for the purpose of receiving a permit or the modification, amendment or renewal thereof from the Department. "Application" includes any subsequent additions, revisions or modifications submitted to the Department which supplement, correct or amend a pending application."

Our proposed rule quotes applicable provisions of the law, as follows:

"Application" means "a document or set of documents, filed with the [DEQ], for the purpose of receiving a permit or the modification, amendment or renewal thereof from the [DEQ]... any subsequent additions, revisions or modifications submitted to the [DEQ] which supplement, correct or amend a pending application." [27A O.S. § 2-14-103(1)]

Comment 2: The definitions of both "Off-site" and "On-site" in 4-1-2 contain the abbreviation "UIC". I suggest that in the first occurrence the abbreviation be spelled out to remove any possible confusion as to its meaning.

Response 2: We agree. We will recommend this change.

Comment 3: Section 4-1-3(c) lists the various divisions of the DEQ. However, in other parts of the rule there are references to "DEQ program area", "DEQ regulatory program" and "the program" of the DEQ. While the word "program" is defined as a "regulatory section or division of the DEQ", would it not be simpler and more consistent to just use the word Division throughout? If this is done then the definition of program area can be deleted. References to "program area" are located in 4-9-2(a), 4-9-5(a)(1), 4-9-5(a)(6) and 4-15-2(a)(2).

Response 3: We agree. We will recommend using "Division" in the locations noted.

Comment 4: Why do the address and operating hours of the DEQ listed in 4-1-4(a) have to be codified in regulation?

Response 4: The Administrative Procedures Act, 75 O.S. § 302, and the Administrative Rules on Rulemaking, OAC 655:10-5-7, require all state agencies to adopt organizational and procedural rules. Specifically, 75 O.S. § 302(A)(1) requires each agency to "[p]romulgate as a rule a description of the organization of the agency, stating the general course and method of the operations of the agency and the methods whereby the public may obtain information or make submissions or requests".

Comment 5: Section 4-1-5(a) Availability states, "Records of the Board, Council, and DEQ, not otherwise confidential...". Since there is more than one Council and you are talking about them as a whole, I feel it would be clearer if the text read, "Records of the Board, Advisory Councils, and DEQ...". This also applies to wording found in 4-1-5(e).

Response 5: We agree. We will recommend this change.

Comment 6: Section 4-1-5(c)(2) Commercial Reproduction states "... by a commercial copying service at his own expense". I would suggest to be more correct the text read "...by a commercial copying service at his/her own expense". This same suggestion applies to wording in 4-1-5(c)(3), 4-9-39(b) and 4-9-41(a).

Response 6: We agree. We will recommend this change throughout this chapter.

Comment 7: Section 4-1-6(c) Search Fees lists the fees to be charged by the DEQ. Since (3), (4) and (5) all charge \$5.00 for 30 minutes of labor I suggest it would be simpler if the Section read as follows:

- (1) 0 - 15 minutes, no charge;
- (2) 16 - 30 minutes, \$5.00;
- (3) every subsequent 30 minute increment or portion thereof, \$5.00.

Response 7: The DEQ agrees and will recommend the suggested change.

Comment 8: Section 4-9-5(a) Conditions for not seeking administrative and civil penalties states in part "Except in the case of habitual noncompliance or as otherwise provided in this section, in evaluating an enforcement action for a regulated entity's actual or apparent failure to comply...". I do not understand the need to further describe a failure to comply. I suggest that the words "actual or apparent" be stricken so that the language reads "Except in the case of habitual noncompliance or as

otherwise provided in this section, in evaluating an enforcement action for a regulated entity's failure to comply...".

Response 8: We agree, and will recommend this change.

Comment 9: Section 4-9-5(d) Applicability states that the section will apply only to those enforcement cases arising from violations discovered or brought to the attention of the DEQ after June 2, 1997. What is the significance of this date?

Response 9: June 2, 1997, was the effective date of the "self-reporting" rule which is the precursor to Section 4-9-5. A similar policy statement preceded the rule.

Comment 10: Sections 4-9-34(c) Reference to administrative law judge and 4-9-52 Individual proceedings seem to indicate that the Executive Director or the Air Quality Advisory Council can act as an Administrative Law Judge in individual proceedings. For example 4-9-52 states, "The Council or its designee may perform Administrative Law Judge functions described in Part 3 of this Subchapter". Is this the intent of these sections?

Response 10: Thank you for pointing out this issue. The proposed language seems to conflict with 27A O.S. §2-3-103(2) which provides *inter alia* that ALJs must be attorneys currently licensed to practice law in Oklahoma and shall not be an owner, stockholder, employee or officer of, nor have any other business relationship with, any corporation, partnership, or other business or entity that is subject to regulation by the DEQ.

We propose that Section 4-9-34(c) be deleted. Although the APA permits the agency head personally to hear a case rather than to appoint an ALJ, this will rarely (if ever) be employed.

We would also recommend that Section 4-9-34(a) be amended to include a statutory reference, as follows:

252:4-9-34. Administrative Law Judges and Clerks

(a) Administrative Law Judge. The Executive Director may designate an Administrative Law Judge for any administrative hearing, unless precluded by law in accordance with 27A O.S. 2-3-103. Administrative Law Judges shall not have had prior involvement in the matter other than as an Administrative Law Judge, unless the parties waive this requirement.

However, the Air Quality Advisory Council's membership is mandated by 27A O.S. §2-2-201(H), and members may have a business relationship with an entity that is regulated by the DEQ. Further, 27A O.S. §2-5-107(7) gives the Air Quality Council the authority to conduct individual proceedings itself as well as to appoint an ALJ to do so. Therefore, Section 4-9-52 is correct. When the Council hears an individual proceeding itself, it needs to be able to effectively govern the conduct of the individual proceeding in the same manner as would an ALJ.

Comment 11: Section 4-11-3 Investigation states, "After receipt of a complaint, the DEQ may assign an investigator...". This seems to indicate that it is optional for the DEQ to assign an investigator. If no one is assigned to the complaint how will it be resolved? I would suggest the word "may" be changed to "shall".

Response 11: Not all complaints received by the DEQ will be investigated by DEQ personnel. Approximately ten percent of all complaints received are clearly outside our jurisdiction and are referred to other agencies. There may be an investigator already assigned to the same situation under another complaint or other circumstances which would preclude DEQ from assigning an investigator, e.g., complainant withdrawing complaint, etc.

Comment 12: Section 4-13-11 Final written report states, "Applicants who are awarded environmental education grants under this subchapter shall submit a final written report, outlining accomplishments of the grant objectives and expenditures on or before December 15 following the award." I am assuming that the awards are granted early in the year. If not, and an award is granted December 1, this may not give enough time for the applicant to respond. I suggest that the wording be changed to "Applicants who are awarded environmental education grants under this subchapter shall submit a final written report, outlining accomplishments of the grant objectives and expenditures within 6 months following the award."

Response 12: You are correct in that grant recipients are usually notified of their award in January/February. The final report is due in December of the following school year.

Comment 13: Section 4-13-12 Shared strategies makes reference to an Environmental Quality Education Committee, yet nothing is said of the make-up and purpose of the committee. I suggest that this committee be further described in the rule so that the applicants know with whom they are dealing.

Response 13: Currently there are eleven members on the committee, five from state agencies (including the Office of the Secretary of the Environment). Of the remaining six, one is a member of the Environmental Quality Board; one represents Keep Oklahoma Beautiful; two are teachers; one represents industry and one represents the general public.

Comment 14: I feel Subchapter 13 Environmental Education Grants should contain a section that states the following, "The applicant shall be notified in writing by the DEQ of either rejection or acceptance of a grant". This would provide the applicant with written confirmation of the decision of the DEQ and eliminate any unnecessary confusion.

Response 14: Since the beginning of the program, we have sent all applicants a letter notifying them of acceptance or rejection.

SUBCHAPTER 3. AIR QUALITY STANDARDS AND INCREMENTS

252:100-3-4. Significant deterioration increments

(b) The allowable increments are as follows:

Pollutant	Maximum allowable increase (micrograms per cubic meter)
Class I Areas	
Particulate matter:	
PM-10, Annual geometric annual arithmetic mean	<u>54</u>
PM-10, Twenty-four twenty-four hour maximum	<u>108</u>
Sulfur dioxide:	
Annual arithmetic mean	2
Twenty-four hour maximum	5
Three-hour maximum	25
Nitrogen dioxide:	
(effective May 11, 1991) Annual arithmetic mean	2.5
Class II Areas	
Particulate matter:	
PM-10, Annual geometric annual arithmetic mean	<u>1917</u>
PM-10, Twenty-four twenty-four hour maximum	<u>3730</u>
Sulfur dioxide:	
Annual arithmetic mean	20
Twenty-four hour maximum	91
Three-hour maximum	512
Nitrogen dioxide:	
(effective May 11, 1991) Annual arithmetic mean	25
Class III Areas	
Particulate matter:	
PM-10, Annual geometric annual arithmetic mean	<u>3734</u>
PM-10, Twenty-four twenty-four hour maximum	<u>7560</u>
Sulfur dioxide:	
Annual arithmetic mean	40
Twenty-four hour maximum	182
Three-hour maximum	700
Nitrogen dioxide:	
(effective May 11, 1991) Annual arithmetic mean	50

**TITLE 243. OKLAHOMA ENERGY RESOURCES BOARD
CHAPTER 10. REFUND PROCEDURES**

INTENDED RULEMAKING ACTION: Notice of proposed PERMANENT rulemaking.

Proposed rules: Chapter 10: Refund Procedures [NEW]
Summary: The Oklahoma Energy Resources Board ("OERB") is adopting its Chapter 10: Refund Procedures Rules (the "Rules"). OERB is authorized to administer the Oklahoma Energy Resources Revolving Fund established by Section 288.7 of the Oklahoma Energy Education and Marketing Act (52 O.S., Sections 288.1 through 288.12) (the "Act"), which Fund is funded by assessments authorized by Section 288.8A of the Act. Refunds of such assessments are to be administered by OERB. This Chapter is intended to provide affected parties a means to request the refund and set forth guidelines to be followed by OERB in reviewing requests for refunds.

AUTHORITY: The Rules are authorized by Title 52 Oklahoma Statutes, Section 288.5.7; Oklahoma Energy Resources Board

COMMENT PERIOD: Written comments will be accepted March 15, 1995, through April 15, 1995. Written comments should be sent to Mike Terry, Director, Oklahoma Energy Resources Board, 2601 N.W. Expressway, Suite 107W, Oklahoma City, Oklahoma 73112.

PUBLIC HEARING: A public hearing will be held on April 18, 1995, at 10:00 a.m. in the offices of OERB, 2601 N.W. Expressway, Suite 107W, Oklahoma City, Oklahoma. All interested persons are invited to attend and present their comments.

COPIES OF PROPOSED RULES: Copies of the Rules may be obtained by contacting Mike Terry, Director, at the Oklahoma Energy Resources Board, 2601 N.W. Expressway, Suite 107W, Oklahoma City, Oklahoma 73112, (405) 842-9500.

RULE IMPACT STATEMENT: A rule impact statement will be issued and will be available at the offices of OERB upon approval of OERB.

CONTACT PERSON: Mike Terry, Director, (405) 842-9500.

[Okla. Reg. 95-256; filed February 23, 1995]

**TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 100. AIR POLLUTION CONTROL**

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT and EMERGENCY rulemaking.

Proposed Rules: OAC 252:100-3-4, Air Quality Standards and Increments, Significant Deterioration Increments [AMENDED].

Summary: The intent of changes to Subchapter 3 is to reduce the maximum allowable increases (increments) for particulate matter under the requirements for Prevention of Significant Deterioration of air quality. The revised increments are based upon particles with an aerodynamic diameter of less than or equal to 10 micrometers (PM-10) which replace the original increments for PM which were based upon total suspended particulates (TSP).

AUTHORITY: Environmental Quality Board; 27A O.S. Supp. 1993, §§ 2-5-106.

COMMENT PERIOD: Written comments will be accepted prior to and during the regularly scheduled meeting of the Oklahoma Air Quality Council. The meeting will be held Tuesday, April 18, 1995, in the Lincoln Boulevard Plaza office complex, Burgundy Room, 4545 N. Lincoln Blvd., Oklahoma City, Oklahoma. Briefing is scheduled for 9:30 AM; meeting and hearing, for 1:00 PM. Oral comments will be accepted during the hearing; written comments on the proposed change may be mailed to Air Quality Division, 4545 N. Lincoln Blvd., Suite 250, Oklahoma City, OK 73105-3483. Mr. Scott Thomas.
PUBLIC HEARINGS: Tuesday, April 18, 1995, in the Burgundy Room, Lincoln Plaza office complex, 4545 N. Lincoln Blvd., Oklahoma City, Oklahoma.

COPIES OF PROPOSED RULES: Copies of the proposed rules may be obtained from the Department of Environmental Quality, Air Quality Program, 4545 North Lincoln, Suite 250, Oklahoma City, Oklahoma.

RULE IMPACT STATEMENT: A rule impact statement will be prepared prior to the final action by the Environmental Quality Board. The rule impact statement may be obtained from the Air Quality Division at the above address.

CONTACT PERSON: Mr. Scott Thomas (405) 271-5220.

**TITLE DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 100. AIR POLLUTION CONTROL**

**TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 100. AIR POLLUTION CONTROL**

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT and EMERGENCY rulemaking.
PROPOSED RULES: OAC 252:100-3-4 Air Quality Standards and Increments, Significant Deterioration Increments (AMENDED).
SUMMARY: These changes to Subchapter 3 would revise the Air Quality Prevention of Significant Deterioration (PSD) increments for particulate matter for Class I, II, and III areas. The revised increments are expressed in terms of particles with an aerodynamic diameter of less than or equal to 10 micrometers (PM-10) and replace the equivalent, original increments for PM which were based on total suspended particulates (TSP).
AUTHORITY: Environmental Quality Board; 27A O. S. Supp. 1993, §§ 2-5-106; et seq.
COMMENT PERIOD: Interested persons may informally discuss the proposed rules with the Air Quality Division or may, before September 26, 1995, submit written comments to the Department of Environmental Quality, c/o Robert Kellogg, 1000 N.E. 10th Street, Oklahoma City, OK 73117-1212. Comments will be accepted during the Environmental Quality Board meeting scheduled for 9:30 a.m., Tuesday, September 26, 1995, in Elk City, Oklahoma. The location of the meeting may be changed.
PUBLIC HEARINGS: Tuesday, September 26, at 9:30 a.m. in Elk City, Oklahoma.
COPIES OF PROPOSED RULES: Copies of the proposed rules may be obtained from the Department of Environmental Quality, Air Quality Program, 4545 North Lincoln, Suite 250, Oklahoma City, OK.
RULE IMPACT STATEMENT: A rule impact statement will be prepared prior to the final action by the Environmental Quality Board. The rule impact statement may be obtained from the Air Quality Division at the above address.
CONTACT PERSON: Mr. Randy Ward (405) 271-5220.
ADDITIONAL INFORMATION: These rules were recommended by the Air Quality Council pursuant to the public hearing on April 18, 1995.

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT and EMERGENCY rulemaking.
PROPOSED RULES: OAC 252:100-8, Operating Permits (part 70) (AMENDED).
SUMMARY: The proposed revisions to Subchapter 8 establish a schedule for the phased submittal of the Part 70 Operating Permit Applications based on the affected facility's Standard Industrial Classification Code. This will allow some facilities a period of up to 36 months after approval of Oklahoma's interim program to submit their permit applications. Previously, all Title V permit applications were required within 12 months of approval.
AUTHORITY: Environmental Quality Board; 27A O. S. Supp. 1993, §§ 2-5-106; et seq.
COMMENT PERIOD: Interested persons may informally discuss the proposed rules with the Air Quality Division or may, before September 26, 1995, submit written comments to the Department of Environmental Quality, c/o Robert Kellogg, 1000 N. E. 10th Street, Oklahoma City, OK 73117-1212. Comments will be accepted during the Environmental Quality Board meeting scheduled for 9:30 a.m., Tuesday, September 26, 1995, in Elk City, Oklahoma. The location of the meeting may be changed.
PUBLIC HEARINGS: Tuesday, September 26, at 9:30 a.m. in Elk City, Oklahoma.
COPIES OF PROPOSED RULES: Copies of the proposed rules may be obtained from the Department of Environmental Quality, Air Quality Program, 4545 North Lincoln, Suite 250, Oklahoma City, OK.
RULE IMPACT STATEMENT: A rule impact statement will be prepared prior to the final action by the Environmental Quality Board. The rule impact statement may be obtained from the Air Quality Division at the above address.
CONTACT PERSON: Mr. Scott Thomas (405) 271-5220.
ADDITIONAL INFORMATION: These rules were recommended by the Air Quality Council pursuant to the public hearings on June 20, 1995, and August 15, 1995.

[Okla. Reg. 95-1195; filed August 25, 1995]

1995

TITLE 252 DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 100. AIR POLLUTION CONTROL

SUBCHAPTER 3. AIR QUALITY STANDARDS AND INCREMENTS

RULEMAKING ACTION: PERMANENT FINAL ADOPTION.

RULES: OAC 252:100-3-4 Significant deterioration increments [AMENDED]

AUTHORITY: Environmental Quality Board; 27A O.S. Supp. 1993, §§ 2-2-101, 2-5-101 et seq.

DATES:

Comment period: September 15, 1995 to September 26, 1995.
Public hearing: September 26, 1995.
Adoption: September 26, 1995
Submitted to Governor: October 6, 1995.
Submitted to House: October 6, 1995.
Submitted Senate: October 6, 1995.
Gubernatorial approval: November 4, 1995.
Legislative approval: Failure of the Legislature to disapprove the rules resulted in approval on March 27, 1996.
Final adoption: March 27, 1996.
Effective: July 1, 1996.

SUPERSEDED EMERGENCY ACTIONS:

Superseded rules: 252:100-3-4 Significant deterioration increments [AMENDED].
Gubernatorial approval: November 4, 1995.
Register publication: 13 Ok Reg 859.
Docket number: 96-134.

INCORPORATIONS BY REFERENCE: None.

ANALYSIS: This revision to Subchapter 3 changes Air Quality Prevention of Significant Deterioration (PSD) increments for particulate matter for Class I, II, and III areas. The revised increments will be based upon particles with an aerodynamic diameter of less than or equal to 10 micrometers (PM₁₀) instead of total suspended particulates (TSP). The Air Quality Council recommended the permanent adoption of this revision at their meeting on April 18, 1995.

SUMMARY OF DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

There are no differences since this rule adopts the new increments as revised by EPA. The Air Quality Council began receiving comments on this new rule on March 15, 1995.

CONTACT PERSON: Mr. Randall Ward, DEQ Air Quality Division, Suite 250, Lincoln Plaza Office Complex, 4545 N. Lincoln Blvd. Oklahoma City, Oklahoma 73105. (405) 271-5220

PURSUANT TO THE ACTIONS DESCRIBED HEREIN, THE FOLLOWING RULES ARE CONSIDERED FINALLY ADOPTED AS SET FORTH IN 75 O.S., SECTION 308.1(A), WITH AN EFFECTIVE DATE OF JULY 1, 1996.

252:100-3-4. Significant deterioration increments

(a) Significant deterioration, as used in the phrase Prevention of Significant Deterioration (PSD), means an increase in ambient air pollution above a baseline plus a specific increment allowed for one of three classes of areas. See OAC 252:100-7, Part 5.

(b) The allowable increments are as follows:

Pollutant	Maximum allowable increase (micrograms per cubic meter)
Class I Areas	
Particulate matter:	
PM-10, annual arithmetic mean	4
PM-10, twenty-four hour maximum	8
Sulfur dioxide:	
Annual arithmetic mean	2
Twenty-four hour maximum	5
Three-hour maximum	25
Nitrogen dioxide:	
(effective May 11, 1991)	
Annual arithmetic mean	2.5
Class II Areas	
Particulate matter:	
PM-10, annual arithmetic mean	17
PM-10, twenty-four hour maximum	30
Sulfur dioxide:	
Annual arithmetic mean	20
Twenty-four hour maximum	91
Three-hour maximum	512
Nitrogen dioxide:	
(effective May 11, 1991)	
Annual arithmetic mean	25
Class III Areas	
Particulate matter:	
PM-10, annual arithmetic mean	34
PM-10, twenty-four hour maximum	60
Sulfur dioxide:	
Annual arithmetic mean	40
Twenty-four hour maximum	182
Three-hour maximum	700
Nitrogen dioxide:	
(effective May 11, 1991)	
Annual arithmetic mean	50

PUBLIC MEETING

Notice of Public Meeting was forwarded to the Secretary of State's Office giving the time, date, and place of the meeting. Agendas were posted at the entrance door of the meeting room at the Lincoln Plaza location, and the entrance to the Air Quality Division offices.

Call to Order - Ms. Tillman called the meeting to order and roll was taken: Mr. Branecky - aye; Dr. Canter - aye; Mr. Fishback - aye; Ms. Hinkle - aye; Mr. Kilpatrick - aye; Ms. Slagell - aye; Mayor Taron - aye; Ms. Tillman - aye; Mr. Breisch - absent.

Approval of Minutes - Ms. Tillman entertained a motion to approve the Minutes of the February 22, 1995 Meeting/Hearing. Motion was made to approve the Minutes as presented by Mayor Taron with a second by Ms. Hinkle. Roll call as follows: Mr. Branecky - aye; Dr. Canter - aye; Mr. Fishback - aye; Ms. Hinkle - aye; Mr. Kilpatrick - aye; Ms. Slagell - aye; Mayor Taron - aye; ; Ms. Tillman - aye.

PUBLIC HEARING

OAC 252:100-3-4 AIR QUALITY STANDARDS AND INCREMENTS

As protocol officer, Larry Byrum convened the hearing on OAC 252:100-3 Air Quality Standards and Increments. The hearing was advertised in the Oklahoma Register for the purpose of receiving comments.

Mr. Randall Ward, Supervisor of the Analysis and Planning Unit, presented staff position stating that on August 8, 1994 the Air Quality Division received a letter from Jole C. Luehrs, Chief of the New Source Review Section, Region VI of the Environmental Protection Agency (EPA) which advised that the EPA Prevention of Significant Deterioration (PSD) increments for particulate matter (TSP) had been revised. The new increments were based upon particles with an aerodynamic diameter less than 10 microns (PM10). The new increments are designed to be equivalent to the statutory TSP increments and did not increase the stringency of the standards. The EPA requires states with approved PSD State Implementation Plans (SIPs) to adopt the new increments or face sanctions and federal implementation of that portion of the State's PSD permitting plan. Through consultation and correspondence with the EPA, staff developed a schedule for revision of affected regulations. Staff proposed to revise the language in the rule as indicated in OAC 252:100-3-4.

Mr. Ward pointed out that the packet also included a letter from EPA Region VI approving proposed rule language and addressing other needed changes in regulations. He added that through negotiations with Region VI, action was postponed on those issues until changes are made to OAC 252:100-7 Permits as part of the Title V permit plan revisions. Mr. Ward entered a copy of the EPA comments into the record.

Staff recommended that the Council take action to recommend this rule change to the Environmental Quality Board for adoption as an Emergency and Permanent rule due to the importance that the revised PSD SIP be approved by EPA and that no substantive comments had been received.

Mr. Kilpatrick inquired whether the proposed changes would be submitted to the DEQ Board in conjunction with the plan changes to Subchapter 7. Mr. Byrum advised that the entire package will go forward at the same time in order to alleviate any problems. Most likely these will go to the Board on the next meeting after the June meeting which is September 27.

Mr. Fishback asked if these standards were not intended to be retroactive and affect any sources that had submitted a permit under the old higher limits. Mr. Ward pointed out that there is a grandfathering provision in the *Federal Register* Notice and federal regulations.

With no further discussion, Mr. Kilpatrick moved that the Air

Quality Council approve adoption of the OAC 252:100-3 Air Quality Standards and Increments rule changes as an Emergency and Permanent Rule. The second was made by Mr. Fishback and roll call was as follows: Mr. Branecky - aye; Dr. Canter - aye; Mr. Fishback - aye; Ms. Hinkle - aye; Mr. Kilpatrick - aye; Ms. Slagell - aye; Mayor Taron - aye; Ms. Tillman - aye.

Ms. Tillman presented a letter drafted by a Council sub-committee consisting of Gary Kilpatrick, Bill Fishback, Meribeth Slagell and Mary Tillman. The letter was drafted to make Governor Keating aware of the Council's position with regards the hiring freeze. The letter respectfully requested that Governor Keating offer an exemption for the personnel to operate the Title V program because the funding is not state appropriated monies. The letter was endorsed by all members present and would be mailed to Mr. Breisch for his signature.

Adjournment - The next regular meeting will be Tuesday, June 20, 1995 at the Tulsa City-County Health Department, 4616 East 15th Street, Tulsa, Oklahoma. Meeting adjourned with a unanimous roll call vote.

 6/20/95

William B. Breisch, Chairman
Air Quality Council

Larry D. Byrum, Director
Air Quality Division

April 5, 1995

MEMORANDUM

TO: AIR QUALITY COUNCIL

FROM: Larry D. Byrum, Director 
AIR QUALITY DIVISION

SUBJECT: REVISIONS TO OAC 252:100-3
AIR QUALITY STANDARDS AND INCREMENTS

Please find enclosed the staff's suggested revisions to Oklahoma Air Pollution Rule OAC 252-100-3. These revisions are in response to an EPA letter dated August 2, 1994 (enclosed).

Also enclosed are copies of the Air Quality Division workplan to implement these revisions and EPA's response to our suggested revisions.

SUBCHAPTER 3. AIR QUALITY STANDARDS AND INCREMENTS

252:100-3-4. Significant deterioration increments.

(a) Significant deterioration, as used in the phrase Prevention of Significant Deterioration (PSD), means an increase in ambient air pollution above a baseline plus a specific increment allowed for one of three classes of areas. See OAC 252:100-7, Part 5.

(b) The allowable increments are as follows:

Pollutant	Maximum allowable increase (micrograms per cubic meter)
Class I Areas	
Particulate matter:	
PM-10, Annual geometric annual arithmetic mean	54
PM-10, Twenty-four twenty-four hour maximum	108
Sulfur dioxide:	
Annual arithmetic mean	2
Twenty-four hour maximum	5
Three-hour maximum	25
Nitrogen dioxide: (effective May 11, 1991)	
Annual arithmetic mean	2.5
Class II Areas	
Particulate matter:	
PM-10, Annual geometric annual arithmetic mean	1917
PM-10, Twenty-four twenty-four hour maximum	3730
Sulfur dioxide:	
Annual arithmetic mean	20
Twenty-four hour maximum	91
Three-hour maximum	512
Nitrogen dioxide: (effective May 11, 1991)	
Annual arithmetic mean	25
Class III Areas	
Particulate matter:	
PM-10, Annual geometric annual arithmetic mean	3734
PM-10, Twenty-four twenty-four hour maximum	7560
Sulfur dioxide:	
Annual arithmetic mean	40
Twenty-four hour maximum	182
Three-hour maximum	700
Nitrogen dioxide: (effective May 11, 1991)	
Annual arithmetic mean	50

RECOMMENDATION
TO THE
ENVIRONMENTAL QUALITY BOARD
FROM THE
AIR QUALITY COUNCIL

The members of this Council, acting pursuant to the authority vested in them by the Oklahoma Environmental Quality Code (27 O.S. Supp. 1993, Section 2-2-201, by roll call vote, make formal recommendation to the Environmental Quality Board the rule(s) specified below be adopted as (a) permanent rule(s) and by emergency and that the Board find that adoption of the rule(s) by emergency is warranted by the compelling extraordinary circumstance of the need to preclude possible federal implementation and/or sanction of a portion of the State's Prevention of Significant Deterioration permitting plan.

OAC 252:100-3
AIR QUALITY STANDARDS AND INCREMENTS

Prior to making this recommendation, this Council considered the rules and comments received thereon and determined, to the best of its knowledge, that all requirements of the Oklahoma Administrative Procedures Act applicable to this rulemaking have been followed.

With the understanding that such changes shall not invalidate this recommendation, this Council authorizes the Department staff to make any amendments approved by the Council, appropriate corrections of typographical errors, additions and deletions indicated by strikeout/underline, and formatting as required by the Office of Administrative Rules.

Respectfully,

Mary J. Tillman
Chair or Designee

Signed this 18th day of April, 1995.

Environmental Quality Board

N

Chapter 100, Air Pollution Control Rules
SUBCHAPTER 3. Air Quality Standards and Increments

EXECUTIVE SUMMARY:

The intent of changes to Subchapter 3 is to revise the Air Quality Prevention of Significant Deterioration (PSD) increments for particulate matter for Class I, II, and III areas. The revised increments are based upon particles with an aerodynamic diameter of less than or equal to 10 micrometers (PM_{10}) which replace the original increments for particulate matter which were based upon total suspended particulates (TSP). Adoption of this revision will result in the PSD increments and the National Ambient Air Quality Standards (NAAQS) for particulate matter being measured by the same indicator, PM_{10} .

DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

There are no differences since this rule adopts the new increments as revised by EPA.

ENVIRONMENTAL BENEFIT STATEMENT:

Not required because this rule is not more stringent than the corresponding federal rule.

SUMMARY OF COMMENTS AND RESPONSES:

Comment: A letter from EPA addressed concern that proposed revisions did not include changes to other related sections of our rules. This letter also included an approval of the proposed rule language.

Response: The staff has negotiated with EPA to postpone action on changes to the related sections of our rules until such time as changes are made to OAC 252:100-7 Permits, as part of our Title V permit plan revisions.

Comment: A member of the council questioned if these standards were intended to be retroactive and how they would affect sources that had submitted a permit under the old higher limits.

Response: These sources will not be affected and are covered by a grandfathering provision in the federal regulations.

RULE IMPACT STATEMENT

Amendments to the Air Pollution Control Rules
before the Environmental Quality Board September 26, 1995

1. **DESCRIPTION:** This action revises Subchapter 3 and changes the Air Quality Prevention of Significant Deterioration (PSD) increments for particulate matter for Class I, II, and III areas. The revised increments will be based upon particles with an aerodynamic diameter of less than or equal to 10 micrometers (PM₁₀) instead of total suspended particulates (TSP).
2. **CLASSES OF PERSONS AFFECTED:** Sources subject to PSD permitting.
3. **CLASSES OF PERSONS BENEFITTED:** The general public will enjoy improved air quality and better visibility due to continued regulation of PSD areas. Industry and the regulatory agency will benefit from streamlined regulations resulting as a result of simplification of this rule.
4. **ECONOMIC IMPACT:** The State of Oklahoma remains in compliance with EPA requirements. The revisions to the PSD Program must be adopted to avoid sanctions and federal implementation of this portion of the State's PSD permitting plan.
5. **COST:** Agency costs will be negligible since PM₁₀ equipment is already in place. Industry costs will also be negligible since the new increments are essentially equivalent to the old TSP standards.
6. **ARE THERE LESS COSTLY METHODS:** No, this rule revision is required by the Federal Clean Air Act Amendments of 1990.
7. This Rule Impact Statement was prepared on September 8, 1995.

SUBCHAPTER 3. AIR QUALITY STANDARDS AND INCREMENTS

252:100-3-4. Significant deterioration increments.

(a) Significant deterioration, as used in the phrase Prevention of Significant Deterioration (PSD), means an increase in ambient air pollution above a baseline plus a specific increment allowed for one of three classes of areas. See OAC 252:100-7, Part 5.

(b) The allowable increments are as follows:

Pollutant	Maximum allowable increase (micrograms per cubic meter)
Class I Areas	
Particulate matter:	
PM-10, Annual geometric annual arithmetic mean	54
PM-10, Twenty-four twenty-four hour maximum	108
Sulfur dioxide:	
Annual arithmetic mean	2
Twenty-four hour maximum	5
Three-hour maximum	25
Nitrogen dioxide: (effective May 11, 1991)	
Annual arithmetic mean	2.5

Class II Areas

Particulate matter:	
PM-10, Annual geometric annual arithmetic mean	1917
PM-10, Twenty-four twenty-four hour maximum	3730
Sulfur dioxide:	
Annual arithmetic mean	20
Twenty-four hour maximum	91
Three-hour maximum	512
Nitrogen dioxide: (effective May 11, 1991)	
Annual arithmetic mean	25

Class III Areas

Particulate matter:	
PM-10, Annual geometric annual arithmetic mean	3734
PM-10, Twenty-four twenty-four hour maximum	7560
Sulfur dioxide:	
Annual arithmetic mean	40
Twenty-four hour maximum	182
Three-hour maximum	700
Nitrogen dioxide: (effective May 11, 1991)	
Annual arithmetic mean	50

4
5 THE CHAIRMAN: We're going to bring the hearing
6 meeting to order.

7 And we'll begin with the roll call, if Myrna
8 would, please.

9 THE SECRETARY: Mr. Branecky?

10 MR. BRANECKY: Here.

11 THE SECRETARY: Dr. Canter?

12 DR. CANTER: Here.

13 THE SECRETARY: Mr. Fishback?

14 MR. FISHBACK: Here.

15 THE SECRETARY: Ms. Hinkle?

16 MS. HINKLE: Here.

17 THE SECRETARY: Mr. Kilpatrick?

18 MR. KILPATRICK: Here.

19 THE SECRETARY: Ms. Slagell?

20 MS. SLAGELL: Here.

21 THE SECRETARY: Mayor Taron?

22 MAYOR TARON: Here.

23 THE SECRETARY: Ms. Tillman?

24 MS. TILLMAN: Here.

25 Our first item on the agenda is the approval of

1 minutes. I'll ask for a motion.

2 DR. CANTER: I make a motion.

3 THE CHAIRMAN: Second?

4 DR. CANTER: Second.

5 THE CHAIRMAN: I believe you made the motion.

6 MS. HINKLE: Second.

7 (A discussion was held off the record.)

8 THE CHAIRMAN: Okay. We have a motion and a
9 second now.

10 Discussion?

11 (No response.)

12 Myrna, would you call for the vote.

13 THE SECRETARY: Mr. Branecky?

14 MR. BRANECKY: Aye.

15 THE SECRETARY: Dr. Canter?

16 DR. CANTER: Aye.

17 THE SECRETARY: Mr. Fishback?

18 MR. FISHBACK: Aye.

19 THE SECRETARY: Ms. Hinkle?

20 MS. HINKLE: Aye.

21 THE SECRETARY: Mr. Kilpatrick?

22 MR. KILPATRICK: Aye.

23 THE SECRETARY: Ms. Slagell?

24 MS. SLAGELL: Aye.

25 THE SECRETARY: Mayor Taron?

1 MAYOR TARON: Aye.

2 THE SECRETARY: Ms. Tillman?

3 MS. TILLMAN: Aye.

4 (A discussion was held off the record.)

5 MS. TILLMAN: For the public portion of this
6 meeting, Larry Byrum will act as hearing officer.

7 Larry?

8 MR. BYRUM: Ladies and gentlemen, my name is
9 Larry Byrum. I am the Director of the Air Quality
10 Division, and as such I will act as protocol officer for
11 the hearing. This hearing is convened by the Air
12 Quality Council in compliance with the Oklahoma
13 Administrative Procedures Act and Title 40 of the Code
14 of Federal Regulations, part 51, as well as the
15 authority of Title 63 of the Oklahoma Statutes, Sections
16 1, 1801, et seq.

17 This hearing was advertised in the Oklahoma
18 Register for purpose of receiving comments pertaining to
19 proposed revisions of 252:100-3-1, which is the air
20 quality standards and increments. If you wish to make a
21 statement, if you would please complete the form at the
22 registrations table at the back of the room, you will be
23 called upon at the appropriate time to make your
24 comments.

25 At this point I would like the call upon

1 Mr. Randall Ward to give the staff presentation of the
2 proposed rules.

3 Mr. Ward?

4 MR. WARD: Madam chairman, members of the
5 Council, ladies and gentlemen: My name is Randall Ward,
6 representing the staff of the air quality division of
7 the Oklahoma Department of Environmental Quality. I am
8 currently the supervisor of the analysis and planning
9 unit.

10 On August 8, 1994, the air quality division
11 received a letter from Jole Luehrs, Chief of the New
12 Source Review Section, Region 6, of the Environmental
13 Protection Agency. We were notified that the EPA PSD
14 increments for particulate matter ESP had been revised.

15 The new increments are based upon particles
16 with a aerodynamic diameter less than 10 microns, PM-10.
17 The new increments are designed to be equivalent to the
18 statutory TSD increments and do not increase the
19 stringency of the standard.

20 The EPA is requiring states with approved PSD
21 SIPs to adopt the new increments or face sanctions and
22 federal implementation of that portion of the state's
23 PSD permitting plan.

24 Through consultation and correspondence with
25 the EPA, the staff has developed a schedule for revision

1 of our affected regulations. The letter and our
2 schedule are part of the Council packets.

3 Staff is proposing to revise the language in
4 OAC 252:100-3, air quality standards and increments.
5 Revised language is in Section OAC 252:100-3-4,
6 significant deterioration increments and is indicated by
7 striking out and underlining.

8 Copies of the rule are in the Council packet
9 and available to the audience today. Also included in
10 the packet is a letter from Region 6 EPA approving our
11 proposed rule language and addressing other needed
12 changes in our regulations.

13 Through negotiation with Region 6 EPA, we have
14 postponed action on those issues until such time as we
15 make changes to OAC 252:100-7 permits, as part of our
16 Title 5 permit revisions.

17 I will now officially enter a copy of the EPA
18 comments into the record.

19 Because it is important that the SIP be
20 approved as soon as possible and we have received no
21 substantive comments to the rule, the staff recommends
22 that the Council takes action to recommend this rule to
23 the Environmental Quality Board for adoption as an
24 emergency and permanent rule.

25 I and the rest of the staff will now answer any

1 questions.

2 MR. KILPATRICK: Randall, my understanding --
3 correct me if I'm wrong -- this will actually be
4 submitted to DEQ in conjunction with the plan changes to
5 Section 7?

6 MR. WARD: I believe that's right.

7 MR. BYRUM: Basically what will occur is the
8 next board meeting, as you know, is in June. And we
9 will time these to where the whole package goes forward
10 at the same time so it won't be a problem with the
11 overlapping rules.

12 MR. KILPATRICK: Are you saying we will submit
13 it to the Board in June?

14 MR. BYRUM: No. But we will --

15 MR. KILPATRICK: Next meeting after the June
16 meeting.

17 MR. BYRUM: Most likely.

18 MR. FISHBACK: Is it true that these standards
19 are equivalent to the federal standards and no more
20 stringent than the federal standards? Is that correct?

21 MR. WARD: That is covered in the Federal
22 Register notice. They are meant to be. They use the
23 language "roughly equivalent." So they were designed to
24 be consistent to the SIP standards.

25 MR. BYRUM: Other questions of Council?

1 Questions from the audience for Mr. Ward?

2 MR. FISHBACK: One additional question.

3 MR. BYRUM: Yes.

4 MR. FISHBACK: We brought this out in our
5 discussions this morning. These standards were not
6 intended to be retroactive and affect any sources that
7 had submitted a permit under the old higher limits. Is
8 that correct?

9 MR. WARD: Right. And we did find -- in the
10 Federal Register notice, there is a grandfathering
11 provision which covers that.

12 MR. FISHBACK: Very good. Thank you.

13 MR. BYRUM: Other questions for Mr. Ward?

14 (No response.)

15 MR. BYRUM: Thank you. I have no indications
16 that anyone else wishes to address this particular rule.
17 Is there anyone who wishes to address the rule? One
18 more time. Anyone who wishes to address this rule
19 before us?

20 (No response.)

21 Madam Chairman, I find no one else. So the
22 recommendation of the staff was that the Council approve
23 these rules and send them forward to the Environmental
24 Quality Board for their consideration.

25 MR. KILPATRICK: Madam Chairman, I would move

1 that the Air Quality Council approve the rules as
2 proposed by staff and for adoption as emergency and
3 permanent rules.

4 THE CHAIRMAN: I have a motion.

5 MR. FISHBACK: I will second that.

6 THE CHAIRMAN: Discussion?

7 Myrna, would you call the roll?

8 THE SECRETARY: Mr. Branecky?

9 MR. BRANECKY: Aye.

10 THE SECRETARY: Dr. Canter?

11 DR. CANTER: Aye.

12 THE SECRETARY: Mr. Fishback?

13 MR. FISHBACK: Aye.

14 THE SECRETARY: Ms. Hinkle?

15 MS. HINKLE: Aye.

16 THE SECRETARY: Mr. Kilpatrick?

17 MR. KILPATRICK: Aye.

18 THE SECRETARY: Ms. Slagell?

19 MS. SLAGELL: Aye.

20 THE SECRETARY: Mayor Taron?

21 MAYOR TARON: Aye.

22 THE SECRETARY: Ms. Tillman?

23 MS. TILLMAN: Aye.

24 THE CHAIRMAN: This will conclude the public
25 hearing section of this meeting.

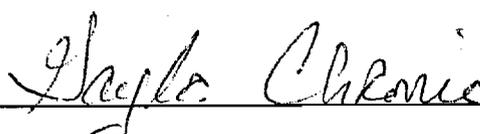

(The hearing was concluded.)

(5) Maximum arithmetic mean averaged over a calendar quarter

Oklahoma Register

Notices of Rulemaking Intent

Prior to adoption and gubernatorial/legislative review of a proposed PERMANENT rulemaking action, an agency must publish a Notice of Rulemaking Intent in the *Register*. In addition, an agency may publish a Notice of Rulemaking Intent in the *Register* prior to adoption of a proposed EMERGENCY or PREEMPTIVE rulemaking action.

A Notice of Rulemaking Intent announces a comment period, or a comment period and public hearing, and provides other information about the intended rulemaking action as required by law, including where copies of proposed rules may be obtained.

For additional information on Notices of Rulemaking Intent, see 75 O.S., Section 303.

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 100. AIR POLLUTION CONTROL

[OAR Docket #98-1216]

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking.

Proposed rules:

252:100. Air Pollution Control

Appendix E. Primary Ambient Air Quality Standards [AMENDED]

Appendix F. Secondary Ambient Air Quality Standards [AMENDED]

Subchapter 7. Permits for Minor Sources [AMENDED]

Subchapter 23. Control of Emissions from Cotton Gins [AMENDED]

Subchapter 24. Control of Emissions from Grain Elevators [AMENDED]

Appendix L. PM-10 Emission Factors for Permit by Rule for Grain Elevators [NEW]

Subchapter 25. Smoke. Visible Emissions and Particulates [AMENDED]

Subchapter 37. Control of Emissions of Organic Materials [AMENDED]

Subchapter 39. Emission of Organic Materials in Nonattainment Areas [AMENDED]

Summary:

The proposed revisions to Appendices E and F will mirror the revised federal national ambient air quality standards for particulate matter (PM) and ozone announced by EPA in the July 18, 1997, Federal Register. The EPA revised the primary (health-based) PM standards by adding a new annual PM-2.5 standard set at 15 micrograms per cubic meter (ug/m^3) and a new 24-hr PM-2.5 standard set at $65 \text{ ug}/\text{m}^3$. EPA is retaining the current annual PM-10 standard of $50 \text{ ug}/\text{m}^3$ and changing the form of the PM-10 24-hr standard. The secondary (welfare-based) standards are also being adjusted to make them identical to the primary standards. Also, the previous 1-hr primary ozone standard is being phased out and replaced with a new 8-hr "concentration-based" standard of 0.08 ppm. The 3-yr average of the 4th highest daily maximum 8-hr ozone concentrations is used to determine compliance with the standard. The EPA also replaced the previous secondary standards with a standard identical to the new primary standard. The proposed revisions to Subchapter 7 will delete the lower limit of 5 tons per year for

Permit by Rule (PBR) facilities. This will allow those facilities with less than 5 tons per year emissions, which are subject to new source performance standards (NSPS) and national emissions standards for hazardous air pollutants (NESHAP), to apply for a PBR instead of having to obtain an individual permit. Also, a new Part 9 is proposed that will outline the requirements necessary for a facility to qualify for PBR. Each Subchapter containing a PBR for specific facilities will be referenced under this new Part also. The proposed revisions to Subchapters 23 and 24 would simplify the language under the agency-wide re-write/de-wrong initiative. It is also proposed to add a new PBR section to both subchapters. The PBR will streamline the permitting process by creating a mechanism that will eliminate the necessity for some cotton gins and elevators to obtain an individual air quality permit. Also, a new Appendix L is proposed which contains PM-10 emission factors for PBR grain elevators. The proposed amendments to Subchapter 25 would fulfill an EPA requirement concerning Continuous Emission Monitoring (CEM). Specifically, the Department proposes to incorporate by reference the Federal opacity monitoring requirements for fossil fuel-fired steam generators and fluid bed catalytic cracking unit catalyst regenerators at petroleum refineries as specified in 40 CFR 51, Appendix P. Additionally, the Department proposes to exempt from Appendix P requirements those sources already subject to a new source performance standard and sources scheduled for retirement within 5 years after the amended rule takes effect. The amended rule would also provide criteria for approval of alternative monitoring requirements. Additional changes to the existing rule include changing the time allowed for visible emissions during short-term occurrences to exceed the opacity standard to one six-minute period in any consecutive 60 minutes, not to exceed three such periods in any consecutive 24 hours. A new subsection would contain methods for determining compliance with the opacity limits. Other proposed amendments to Subchapter 25 are designed to simplify and clarify the rule. The proposed changes to Subchapters 37 and 39 are primarily intended to clarify, simplify and correct the rule and to respond to requests to exclude acetone and methylated siloxanes from the definition of volatile organic compound (VOC). The proposed changes to Subchapters 37 and 39 include clarification of language, correction of typographical errors, deletion of redundant language, and reformatting. Two substantive changes are proposed for

Notices of Rulemaking Intent

Subchapter 37 and one for Subchapter 39. One of those substantive changes affects both Subchapter 37 and 39. The definition of volatile organic compounds (VOC) in 252:100-37-2 and 252:100-39-2 has been revised in response to the Air Quality Council's direction to the staff to review the petition from the Chemical Manufacturers Association dated October 25, 1995, to exclude acetone from the definition of Volatile Organic Compounds (VOC); the request from American Airlines, Boeing, and Nordam, dated January 19, 1998, that acetone be excluded from the definition of VOC; and a request that methylated siloxanes be excluded from the definition of VOC. The definition of volatile organic compounds (VOC) has been modified to be consistent with the Environmental Protection Agency definition. The second substantive change for Subchapter 37 deals with the first sentence in 252:100-37-36 regarding fuel-burning and refuse-burning equipment, which has been deleted to resolve the contradiction between the first and second sentences. The Department is requesting comments on these proposed changes.

AUTHORITY:

Environmental Quality Board, 27A O.S. Supp. 1997, §§ 2-2-101 and 2-5-101 *et seq.*

COMMENT PERIOD:

Wednesday, July 15, 1998, through Tuesday, August 18, 1998. To be thoroughly considered by staff prior to the hearing, written comments should be submitted to the contact person by Tuesday, August 11, 1998. Also scheduled before the Environmental Quality Board at their meeting on Tuesday, September 15, 1998 - 9:30 a.m. in Alva (Location to be determined. See contact person.)

PUBLIC HEARINGS:

Tuesday, August 18, 1998 - 9:30 a.m. briefing and 1:00 p.m. hearing, Department of Environmental Quality, Air Quality Division, 707 N. Robinson, Room 101, Oklahoma City, Oklahoma.

COPIES OF PROPOSED RULES:

Copies of the rules will be available July 15, 1998, for review at the Air Quality Division office at the address listed above or may be obtained from Myrna Bruce at 405-702-4177.

RULE IMPACT STATEMENT:

A copy of the rule impact statements may be obtained from the Air Quality Division.

CONTACT PERSON:

Please send written comments to Michelle Martinez (Appendices E, F, L and Subchapter 24), Jeanette Buttram (Subchapters 7 and 25), Becky Mainord (Subchapter 23), Joyce Sheedy, Ph.D. (Subchapters 37 and 39). Department of Environmental Quality, Air Quality Division, P.O. Box 1677, Oklahoma City, Oklahoma 73101-1677; (405) 702-4100.

ADDITIONAL INFORMATION:

Additional proposed revisions have been made to the version of Subchapter 25 that was the subject of a public hearing on June 16, 1998.

PERSONS WITH DISABILITIES:

Should you desire to attend but have a disability and need an accommodation, please notify the Air Quality Division three (3) days in advance at (405) 702-4100.

[OAR Docket #98-1216; filed 6-25-98]

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 100. AIR POLLUTION CONTROL

[OAR Docket #98-1217]

INTENDED RULEMAKING ACTION:

Notice of proposed EMERGENCY and PERMANENT rulemaking.

Proposed rules:

252:100, Air Pollution Control: Subchapter 47, Control of Emissions from Existing Municipal Solid Waste Landfills [NEW]

Summary:

A new Subchapter 47 is proposed to establish state standards to control emissions from municipal solid waste (MSW) landfills that commenced construction, modification, or reconstruction before May 30, 1991, and accepted waste after November 8, 1987. These proposed rules will be included in Oklahoma's State 111(d) Plan and will provide the enforceable mechanism for implementing the provisions of the Emission Guidelines (EG) for MSW landfills (40 CFR 60 Subpart Cc). Subchapter 47 incorporates by reference sections of the New Source Performance Standards for MSW landfills (40 CFR 60 Subpart WWW). The proposed rules would affect privately and publicly owned MSW landfills that are actively accepting or are capable of accepting municipal solid waste as well as those that are closed. Landfill gas collection and control systems will be required for landfills that have design capacities greater than or equal to 2.5 million megagrams and 2.5 million cubic meters and have estimated emissions of at least 50 megagrams per year of non-methane organic compounds. The Department is requesting comments on this proposed rule.

AUTHORITY:

Environmental Quality Board, 27A O.S. Supp. 1997, §§ 2-2-101 and 2-5-101 *et seq.*

COMMENT PERIOD:

Wednesday, July 15, 1998, through Tuesday, August 18, 1998. To be thoroughly considered by staff prior to the hearing, written comments should be submitted to the contact person by Tuesday, August 11, 1998. Also scheduled

Notices of Rulemaking Intent

Prior to adoption and gubernatorial/legislative review of a proposed PERMANENT rulemaking action, an agency must publish a Notice of Rulemaking Intent in the *Register*. In addition, an agency may publish a Notice of Rulemaking Intent in the *Register* prior to adoption of a proposed EMERGENCY or PREEMPTIVE rulemaking action.

A Notice of Rulemaking Intent announces a comment period, or a comment period and public hearing, and provides information about the intended rulemaking action as required by law, including where copies of proposed rules may be obtained. For additional information on Notices of Rulemaking Intent, see 75 O.S., Section 303.

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 100. AIR POLLUTION CONTROL

[OAR Docket #98-1259]

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking.

PROPOSED RULES:

252:100. Air Pollution Control

Subchapter 7. Permits for Minor Sources [AMENDED]

Subchapter 23. Control of Emissions from Cotton Gins [AMENDED]

Subchapter 24. Control of Emissions from Grain Elevators [AMENDED]

Subchapter 37. Control of Emissions of Organic Materials [AMENDED]

Subchapter 39. Emission of Organic Materials in Nonattainment Areas [AMENDED].

Appendix E. Primary Ambient Air Quality Standards [AMENDED]

Appendix F. Secondary Ambient Air Quality Standards [AMENDED]

Appendix L. PM-10 Emission Factors for Permit by Rule for Grain Elevators [NEW]

SUMMARY:

The proposed revisions to Appendices E and F will mirror the revised federal national ambient air quality standards for particulate matter (PM) and ozone announced by EPA in the July 18, 1997, Federal Register. The EPA revised the primary (health-based) PM standards by adding a new annual PM-2.5 standard set at 15 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$) and a new 24-hr PM-2.5 standard set at $65 \mu\text{g}/\text{m}^3$. EPA is retaining the current annual PM-10 standard of $50 \mu\text{g}/\text{m}^3$ and changing the form of the PM-10 24-hr standard. The secondary (welfare-based) standards are also being adjusted to make them identical to the primary standards. Also, the previous 1-hr primary ozone standard is being phased out and replaced with a new 8-hr "concentration-based" standard of 0.08 ppm. The 3-yr average of the 4th highest daily maximum 8-hr ozone concentrations is used to determine compliance with the standard. The EPA also replaced the previous secondary standards with a standard identical to the new primary standard. The proposed revisions to

Subchapter 7 will delete the lower limit of 5 tons per year Permit by Rule (PBR) facilities. This will allow the facilities with less than 5 tons per year emissions, which are subject to new source performance standards (NSPS) as national emissions standards for hazardous air pollutants (NESHAP), to apply for a PBR instead of having to obtain an individual permit. Also, a new Part 9 is proposed that will outline the requirements necessary for a facility to qualify for PBR. Each Subchapter containing a PBR for specific facilities will be referenced under this new Part also. The proposed revisions to Subchapters 23 and 24 would simplify the language under the agency-wide re-write/de-write initiative. It is also proposed to add a new PBR section to both subchapters. The PBR will streamline the permitting process by creating a mechanism that will eliminate the necessity for some cotton gins and elevators to obtain an individual air quality permit. Also, a new Appendix L is proposed which contains PM-10 emission factors for PBR grain elevators. The proposed amendments to Subchapter 25 would fulfill an EPA requirement concerning Continuous Emission Monitoring (CEM). Specifically, the Department proposes to incorporate by reference the Federal opacity monitoring requirements for fossil fuel-fired steam generators and fluid bed catalytic cracking unit catalyst regenerators at petroleum refineries as specified in 40 CFR 51, Appendix P. Additionally, the Department proposes to exempt from Appendix F requirements those sources already subject to a new source performance standard and sources scheduled for retirement within 5 years after the amended rule takes effect. The amended rule would also provide criteria for approval of alternative monitoring requirements. Additional changes to the existing rule include changing the time allowed for visible emissions during short-term occurrences to exceed the opacity standard to one six-minute period in any consecutive 60 minutes, not to exceed three such periods in any consecutive 24 hours. A new subsection would contain methods for determining compliance with the opacity limits. Other proposed amendments to Subchapter 25 are designed to simplify and clarify the rule. The proposed changes to Subchapters 37 and 39 are primarily intended to clarify, simplify and correct the rule and to respond to requests to exclude acetone and methylated siloxanes from the definition of volatile organic compound (VOC). The proposed changes to Subchapters 37 and 39 include clarification of language, correction of typographical errors, deletion of redundant language, and

Notices of Rulemaking Intent

reformatting. Two substantive changes are proposed for Subchapter 37 and one for Subchapter 39. One of those substantive changes affects both Subchapter 37 and 39. The definition of volatile organic compounds (VOC) in 252:100-37-2 and 252:100-39-2 has been revised in response to the Air Quality Council's direction to the staff to review the petition from the Chemical Manufacturers Association dated October 25, 1995, to exclude acetone from the definition of Volatile Organic Compounds (VOC); the request from American Airlines, Boeing, and Nordam, dated January 19, 1998, that acetone be excluded from the definition of VOC; and a request that methylated siloxanes be excluded from the definition of VOC. The definition of volatile organic compounds (VOC) has been modified to be consistent with the Environmental Protection Agency definition. The second substantive change for Subchapter 37 deals with the first sentence in 252:100-37-36 regarding fuel-burning and refuse-burning equipment, which has been deleted to resolve the contradiction between the first and second sentences. The Department is requesting comments on these proposed changes.

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 100. AIR POLLUTION CONTROL

[OAR Docket #98-1260]

INTENDED RULEMAKING ACTION:

Notice of proposed EMERGENCY and PERMANENT rulemaking.

PROPOSED RULES:

252:100. Air Pollution Control

Subchapter 47. Control of Emissions from Existing Municipal Solid Waste Landfills [NEW]

SUMMARY:

A new Subchapter 47 is proposed to establish state standards to control emissions from municipal solid waste (MSW) landfills that commenced construction, modification, or reconstruction before May 30, 1991, and accepted waste after November 8, 1987. These proposed rules will be included in Oklahoma's State 111(d) Plan and will provide the enforceable mechanism for implementing the provisions of the Emission Guidelines (EG) for MSW landfills (40 CFR 60 Subpart Cc). Subchapter 47 incorporates by reference sections of the New Source Performance Standards for MSW landfills (40 CFR 60 Subpart WWW). The proposed rules would affect privately and publicly owned MSW landfills that are actively accepting or are capable of accepting municipal solid waste as well as those that are closed. Landfill gas collection and control systems will be required for landfills that have design capacities greater than or equal to 2.5 million megagrams and 2.5 million cubic meters and have estimated emissions of at least 50 megagrams per year of non-methane organic compounds. The Department is requesting comments on this proposed rule.

(b) The owner or operator of an existing MSW landfill having a design capacity equal to or greater than 2.5 million cubic meters and 2.5 million megagrams, shall submit an initial NMOC emission rate report to the DEO within 90 days of the effective date of the State Plan. Subsequent NMOC emission rate reports shall be submitted annually thereafter, except as provided for in 40 CFR 60.757(b)(1)(ii) and (b)(3).

(c) The owner or operator of an existing MSW shall comply with the provisions specified in 40 CFR 60.757, except 60.757(a)(1) and (b)(1)(i), which is hereby incorporated by referenced as it appears on August 17, 1998.

252:100-47-13. Recordkeeping requirements

An owner or operator of an existing MSW landfill shall comply with all provisions specified in 40 CFR 60.758, which is hereby incorporated by reference as it exists on August 17, 1998.

252:100-47-14. Specifications for active collection systems

An owner or operator of an existing MSW landfill shall comply with all provisions specified in 40 CFR 60.759, which is hereby incorporated by reference as it exists on August 17, 1998.

ANALYSIS:

The proposed revisions to Appendices E and F will mirror the revised federal national ambient air quality standards for particulate matter (PM) and ozone announced by EPA in the July 18, 1997, Federal Register. The EPA revised the primary (health-based) PM standards by adding a new annual PM-2.5 standards set at 15 micrograms per cubic meter ug/m3 and a new 24-hr PM-2.5 standard set at 65 ug/m3. EPA is retaining the current annual PM-10 standard of 50 ug/m3 and changing the form of the PM-10 24-hr standard. The secondary (welfare-based) standards are also being adjusted to make them identical to the primary standards. Also, the previous 1-hr primary ozone standard is being phased out and replaced with a new 8-hr concentration based standard of 0.08 ppm. The 3-yr average of the 4th highest daily maximum 8-hr ozone concentrations is used to determine compliance with the standard. The EPA also replaced the previous secondary standards with a standard identical to the new primary standard.

[OAR Docket #99-1403; filed 10-29-99]

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY

[OAR Docket #99-1397]

RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking

PROPOSED RULES:

- Subchapter 15. Uniform Permitting Procedures
- Part 5. Tier Classifications [AMENDED]
- 252:2-15-40 [AMENDED]
- 252:2-15-41 [AMENDED]
- Part 7. Review Procedures and Permitting Time Lines
- 252:2-15-72 [AMENDED]

SUMMARY:

The Department is proposing amendments to the air quality provisions of 252:2-15, Environmental Permit Processing Times, to make them consistent with 252:100, Air Pollution Control. The terms "minor source(s)" and major "facility(ies)" would be changed to "minor facility(ies)" and "Part 70 source(s)", respectively.

The DEQ is requesting comments on the proposed rule changes.

AUTHORITY:

Environmental Quality Board, 27A O.S.Supp. 1998, §§ 2-2-101 and 2-5-101, *et seq.*

REQUEST FOR COMMENTS:

The DEQ requests that business entities or any other members of the public affected by these rules provide the DEQ, within the comment period, in dollar amounts if possible, the increase in the level of direct costs such as fees, and the indirect costs such as reporting, recordkeeping, equipment, construction, labor, professional services, revenue loss, or other costs expected to be incurred by a particular entity due to compliance with the proposed rules.

COMMENT PERIOD:

Written comments will be accepted prior to and at the hearing on December 14, 1999. To be thoroughly considered by staff prior to the hearing, written comments should be submitted to the contact person by December 7, 1999. Oral comments may be made at the December 14, 1999 hearing and at the Environmental Quality Board hearing (date, time and location to be determined).

PUBLIC HEARINGS:

Tuesday, December 14, 1999 - 9:00 a.m. hearing, at the Department of Environmental Quality, Room 101, 70 North Robinson, Oklahoma City, Oklahoma.

Scheduled before the Environmental Quality Board (the date, time and location to be determined).

Contact Myrna Bruce at (405) 702-4177 for exact location.

COPIES OF PROPOSED RULES:

The proposed rules are available for review at the Air Quality Division office at 707 North Robinson, Suite 4100 Oklahoma City, Oklahoma, 73102, and on the DEQ website (www.deq.state.ok.us), Air Quality Division Current Events and Issues, or copies may be obtained from Myrna Bruce by calling (405) 702-4177.

RULE IMPACT STATEMENT:

Copies of the rule impact statement may be obtained from the Air Quality Division.

CONTACT PERSON:

Please send written comments to Cheryl Bradley, Department of Environmental Quality, Air Quality Division, P.O. Box 1677, Oklahoma City, Oklahoma 73101-1677; (405) 702-4100.

PERSONS WITH DISABILITIES:

Should you desire to attend but have a disability and need an accommodation, please notify the Air Quality Division three (3) days in advance at (405) 702-4100.

- Appendix F. Secondary Ambient Air Quality Standard [REVOKED]
- Appendix F. Secondary Ambient Air Quality Standard [NEW]

1365
1361

Notices of Rulemaking Intent

SUMMARY:

The proposed changes to Subchapter 5 are designed to allow the agency to bill annual operating fees on a flexible schedule. The changes should also allow the fees to be based on the most recent emission data possible. The proposed rule language also requires an owner or operator of a facility to report excess emissions on their annual emission inventory. Substantive changes include requiring inventories to be submitted one month earlier than presently required, allowing fee payers five years after payment is made to notify the DEQ that they overpaid and to receive credit for such overpayment, and reducing the period of time to six months in which either the DEQ or the facility owner or operator can challenge the methods used to calculate the facility's emissions for fee calculation purposes.

The proposed changes to Subchapter 9 include correction of typographical and grammatical errors and deletion of redundant language. Also, the rule was simplified and clarified according to the agency-wide re-right/de-wrong initiative. Substantive changes to the rule include establishing a time limit on excess emissions caused by properly reported malfunction, startup/shutdowns, and maintenance procedures. The burden of proving that excess emissions occurring more than eight hours or 1.5 percent of the process's operation time in a 3-month period are due to excusable malfunctions, startup/shutdowns or maintenance procedures rather than negligent, marginal, or improper operation is on the owner or operator of the process. Language was added to explain that compliance with this Subchapter will not exempt sources from complying with any applicable federal requirement, and additional demonstration requirements for malfunctions, maintenance, and startup/shutdowns were added under proposed section 252:100-9-3.2, Demonstration of cause.

The proposed changes to Subchapter 13 will simplify and clarify the Subchapter as a part of the agency-wide re-right/de-wrong initiative. Such changes include consolidating the general conditions and requirements for allowed open burning into a new section. A few substantive changes were made, such as adding definitions for "domestic refuse" and "land clearing operation," along with a section on disaster relief procedures. In some instances, the requirement to notify the DEQ or other appropriate official for authorization to burn was added. In addition, the open-pit incinerator requirements were moved to a new section. The rule is proposed to be amended to require owners or operators to register with their local DEQ office; however, if the owner or operator anticipates operating an open-pit incinerator in the same pit for more than 30 days in a 365-day period, they would be required to obtain a permit and pay the required permit fee. Also, the rule would only allow material from a land clearing operation to be burned in an open-pit incinerator.

The proposed amendments to Appendices E and would restore the primary and secondary ambient quality standards to what they were prior to July 18, 1997. The 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored. The PM-2.5 standard would be revoked along the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard.

The DEQ is requesting comments on all of these proposed rule changes.

AUTHORITY:

Environmental Quality Board, 27A O.S.Supp. 1998, §§ 2-2-101 and 2-5-101, *et seq.*

REQUEST FOR COMMENTS:

The DEQ requests that business entities or any other members of the public affected by these rules provide the DEQ, within the comment period, in dollar amounts if possible, the increase in the level of direct costs such as fees, and the indirect costs such as reporting, recordkeeping, equipment, construction, labor, professional services, revenue loss, or other costs expected to be incurred by a particular entity due to compliance with the proposed rules.

COMMENT PERIOD:

Written comments will be accepted prior to and at the hearing on December 14, 1999. To be thoroughly considered by staff prior to the hearing, written comments should be submitted to the contact person by December 14, 1999. Oral comments may be made at the December 14, 1999 hearing and at the Environmental Quality Board hearing (date, time and location to be determined).

PUBLIC HEARINGS:

Tuesday, December 14, 1999 - 9:00 a.m. hearing, at the Department of Environmental Quality, Room 101, 707 North Robinson, Oklahoma City, Oklahoma.

Scheduled before the Environmental Quality Board (the date, time and location to be determined).

Contact Myrna Bruce at (405) 702-4177 for exact location.

COPIES OF PROPOSED RULES:

The proposed rules are available for review at the Air Quality Division office at 707 North Robinson, Suite 4100, Oklahoma City, Oklahoma, 73102, and on the DEQ website (www.deq.state.ok.us), Air Quality Division Current Events and Issues, or copies may be obtained from Myrna Bruce by calling (405) 702-4177.

RULE IMPACT STATEMENT:

Copies of the rule impact statement may be obtained from the Air Quality Division.

CONTACT PERSON:

Please send written comments to Jeanette Buttrif (252:100-5, 252:100-9 and 252:100-13) and Michelle Martinez (Appendices E and F), Department of Environmental Quality, Air Quality Division, P.O. Box

Notices of Rulemaking Intent

1677, Oklahoma City, Oklahoma 73101-1677; (405) 702-4100.

ADDITIONAL INFORMATION:

Subchapters 5, 9, and 13 were brought to public hearing on October 19, 1999.

PERSONS WITH DISABILITIES:

Should you desire to attend but have a disability and need an accommodation, please notify the Air Quality Division three (3) days in advance at (405) 702-4100.

[OAR Docket #99-1398; filed 10-26-99]

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 615. INDUSTRIAL WASTEWATER SYSTEMS [REVOKED]

[OAR Docket #99-1399]

RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking

PROPOSED RULES:

Chapter 615. Industrial Wastewater Systems [REVOKED]

SUMMARY:

This rulemaking action revokes Chapter 615 of Title 252 of the Oklahoma Administrative Code, Industrial Wastewater Systems. The revocation of Chapter 615, Industrial Wastewater Systems is part of the agency's re-right/de-wrong process. This chapter is being replaced by a new chapter, OAC 252:616, Industrial Wastewater Systems.

AUTHORITY:

Environmental Quality Board; 27A O.S.Supp. 1998, §§ 2-2-101, 2-2-201, 2-6-402, and 2-6-501

COMMENT PERIOD:

Written comments may be submitted to the contact person listed below from November 15 through December 7, 1999. Oral and written comments will be accepted by the Water Quality Management Advisory Council at its December 7, 1999, meeting. Also scheduled before the Environmental Quality Board (the date, time and location to be determined).

PUBLIC HEARING:

Before the Water Quality Management Advisory Council at its December 7, 1999, meeting at 1:00 p.m. in the Multi-Purpose room of the Department of Environmental Quality, located at 707 N. Robinson, Oklahoma City, Oklahoma 73101.

Also scheduled before the Environmental Quality Board (the date, time and location to be determined).

COPIES OF PROPOSED RULES:

Copies of the proposed rules may be obtained from the contact person.

RULE IMPACT STATEMENT:

The rule impact statement is available from the contact person.

CONTACT PERSON:

Shellie Chard, Water Quality Division, Department of Environmental Quality, 707 N. Robinson, Oklahoma City, P.O. Box 1677, Oklahoma City, Oklahoma, 73101-1677 (phone: (405) 702-8100)

PERSONS WITH DISABILITIES:

Should you desire to attend but have a disability and need an accommodation, please notify the contact person three (3) days in advance.

[OAR Docket #99-1399; filed 10-26-99]

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 616. INDUSTRIAL WASTEWATER SYSTEMS [NEW]

[OAR Docket #99-1400]

RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking

PROPOSED RULES:

Chapter 616. Industrial Wastewater Systems [NEW]

SUMMARY:

This rulemaking action is part of the agency's re-right/de-wrong process. Changes were made to simplify and clarify requirements, remove unenforceable language and add requirements for land application associated with industrial wastewater systems from a separate chapter to provide a consolidated source for industrial wastewater system requirements. Due to the changes, Chapter 615 is being revoked and replaced with Chapter 616.

AUTHORITY:

Environmental Quality Board; 27A O.S.Supp. 1998, §§ 2-2-101, 2-2-201, 2-6-402, and 2-6-501.

REQUEST FOR COMMENTS:

The DEQ requests that business entities affected by this rule provide the DEQ, within the comment period, in dollar amounts if possible, the increase in the level of direct costs such as fees, and the indirect costs such as reporting, recordkeeping, equipment, construction, labor, professional services, revenue loss, or other costs expected to be incurred by a particular entity due to compliance with the proposed rule.

COMMENT PERIOD:

Written comments may be submitted to the contact person listed below from November 15 through December 7, 1999. Oral and written comments will be accepted by the Water Quality Management Advisory Council at its December 7, 1999, meeting. Also scheduled before the

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 100. AIR POLLUTION CONTROL

[OAR Docket #99-1639]

RULEMAKING ACTION:

Notice of proposed EMERGENCY and PERMANENT rulemaking

PROPOSED RULES:

Appendix E. Primary Ambient Air Quality Standards [REVOKED]

Appendix E. Primary Ambient Air Quality Standards [NEW]

Appendix F. Secondary Ambient Air Quality Standards [REVOKED]

Appendix F. Secondary Ambient Air Quality Standards [NEW]

SUMMARY:

The proposed amendments to Appendices E and F would restore the primary and secondary ambient air quality standards to what they were prior to July 18, 1997. The 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored. The PM-2.5 standard would be revoked along with the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard.

AUTHORITY:

Environmental Quality Board powers and duties, 27A O.S.Supp. 1999, Section 2-2-101; and Oklahoma Clean Air Act Section 2-5-101, *et. seq.*

REQUEST FOR COMMENTS:

The DEQ requests that business entities or any other members of the public affected by these rules provide the DEQ, within the comment period, in dollar amounts if possible, the increase in the level of direct costs such as fees, and the indirect costs such as reporting, recordkeeping, equipment, construction, labor, professional services,

revenue loss, or other costs expected to be incurred by a particular entity due to compliance with the proposed rules.

COMMENT PERIOD:

The comment period for the proposed amendments to Appendices E and F was November 15 through December 14, 1999.

PUBLIC HEARINGS:

Previously held before the Air Quality Council on December 14, 1999. However, additional oral comments may be made at the meeting of the Environmental Quality Board, Friday, February 25, 2000 - 9:30 a.m., at the Department of Environmental Quality, Room 101, 707 North Robinson, Oklahoma City, Oklahoma.

Contact Myrna Bruce at (405) 702-4177 for additional information.

RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking

PROPOSED RULE:

265:25-1-3. Incorporated National Codes and Standards [AMENDED]

1369
1365

Permanent Final Adoptions

~~the operation of a domestic household if the following conditions are met: domestic refuse may be burned on the property where the waste is generated.~~

~~(A) the material to be burned must not be the combined waste from a building designed to accommodate more than three such households;~~

~~(B) the burning must be conducted on the property on which the waste is generated; and,~~

~~(C) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated.~~

~~(8)(f) Hydrocarbon burning. Open burning of hydrocarbons is allowed for:~~

~~(1) The burning of hydrocarbons which are spilled or lost as a result of pipeline breaks or other accidents involving the transportation of such materials or which are generated as wastes as the result of oil exploration, development, refining, or processing operations if the following conditions are met: The disposal of spilled hydrocarbons or the waste products of oil exploration, development, refining or processing operations which cannot be feasibly recovered or otherwise disposed of in a legal manner. Notice must be given to the DEO prior to such burning.~~

~~(A) the material cannot be practicably recovered or otherwise lawfully disposed of in some other manner;~~

~~(B) the burning must not be conducted within a city or town or in such proximity thereto that the ambient air of such city or town may be affected by the air contaminants being emitted;~~

~~(C) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated above; and,~~

~~(D) the burning must be controlled so that a traffic hazard is not created as the result of the air contaminants being emitted.~~

~~(2) The disposal of waste hydrocarbons through a flare. The owner or operator shall be required to use a smokeless flare if a condition of air pollution is determined to exist by the DEO.~~

~~(9)(g) Open-pit incinerator. The burning of any combustible material in an open-pit incinerator which has been properly designed and which is properly operated for the control of smoke and particulate matter. Except for hazardous material, any combustible material or refuse that is allowed to be burned under this Subchapter may be burned in an open-pit incinerator that is properly designed and operated for the control of smoke and particulate matter. The owner or operator of the open-pit incinerator shall not accept any material owned by other persons and shall not transport any material to the property where the~~

~~open-pit incinerator is located in order to burn the material.~~

~~(10) The burning of hydrocarbons, which must be wasted, through the use of smokeless atmospheric flares if after investigation a condition of air pollution exists.~~

~~252:100-13-8. [RESERVED]~~

~~252:100-13-9. General conditions and requirements for allowed open burning~~

~~The open burning of refuse and other combustible material may be conducted as allowed in this Subchapter only if the following conditions and requirements are met:~~

~~(1) No public nuisance is or will be created.~~

~~(2) The burning is controlled so that a traffic hazard is not created as a result of the air contaminants being emitted.~~

~~(3) The burning is conducted so that the contaminants do not adversely affect the ambient air quality of a city or town.~~

~~(4) The initial burning shall begin only between three hours after sunrise and three hours before sunset and additional fuel shall not be intentionally added to the fire at times outside these limits. This requirement does not apply to the open burning allowed under 252:100-13-7(a), (b), (c), and (d)(1).~~

~~252:100-13-10. Disaster relief~~

~~Notwithstanding the prohibition in 252:100-13-5, the Executive Director of the DEO may allow the open burning of debris resulting from a disaster if the Director determines such burning is necessary to protect public health and safety. Such approval, if granted, shall be accompanied by appropriate guidelines for burning the debris.~~

~~252:100-13-11. Responsibility for consequences of open burning~~

~~Persons who conduct open burning in accordance with the provisions of this Subchapter are not exempt or excused from the consequences, damages, or injuries that may result from such conduct, nor are they exempt or excused from complying with all applicable laws, ordinances, rules, and orders.~~

~~[OAR Docket #00-854; filed 5-4-00]~~

INCORPORATIONS BY REFERENCE:

n/a

ANALYSIS:

The proposed amendments to Appendices E and F would restore the primary and secondary ambient air quality standards to what they were prior to June 1, 1999. These revisions will allow the state standards to remain consistent with recently reinstated federal standards. New federal air quality standards were overturned by federal court decision. The 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored. The PM-2.5 standard would be revoked along with the

revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard.

SUMMARY OF DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

None

[OAR Docket #00-859; filed 5-4-00]

Air Quality Council

BRIEFING AGENDA

Department of Environmental Quality
AIR QUALITY COUNCIL REGULAR MEETING
TUESDAY, AUGUST 18, 1998, 9:30 A.M.
4545 NORTH LINCOLN BOULEVARD
BURGUNDY ROOM
Oklahoma City, Oklahoma

1. **Call to Order** Chairman
2. **Division Director's Report** Dyke
Informational update of current events and AQD activities

PUBLIC HEARINGS

3. **OAC 252:100-47 Control of Emissions from Existing Municipal Solid Waste Landfills [NEW]** Bradley
Proposes to establish state standards to control emissions from certain existing municipal solid waste landfills that commenced construction, modification, or reconstruction before May 30, 1991 and accepted waste after November 8, 1987. The proposed rules to be included in Oklahoma's State 111(d) Plan provide the enforceable mechanism for implementing the federal emission guidelines (40 CFR 60 subpart Cc.)
Discussion by Council/Public
4. **State 111(d) Plan for Municipal Solid Waste Landfills** Bradley
The proposed State 111(d) Plan outlines Oklahoma's program to implement the emission guidelines for municipal solid waste landfills. Federal regulations (40 CFR 60 Subparts B and Cc) require that a public hearing be held to receive comments from the Council and public on the proposed plan.
Discussion by Council/Public; Council approval is not required.
5. **OAC 252:100 Air Pollution Control:** Martinez
Appendix E, Primary Ambient Air Quality Standards [AMENDED]
Appendix F, Secondary Ambient Air Quality Standards [AMENDED]
Proposed revisions to Appendices E and F will mirror the revised federal national ambient air quality standards for particulate matter and ozone announced by EPA in the July 18, 1997, *Federal Register*.
Discussion by Council/Public
6. **OAC 272:100-7 Permits [AMENDED]** Buttram
Proposed revisions will delete the lower limit of 5 tons per year for Permit by rule (PBR) facilities allowing those facilities with less than 5 tons per year emissions which are subject to new source performance standards and national emissions standards for hazardous air pollutants to apply for a PBR instead of having to obtain an individual permit. Also, a new Part 9 is proposed that will outline the requirements necessary for a facility to qualify for PBR. Each subchapter containing a PBR for specific facilities will be referenced under this new Part also.
Discussion by Council/Public

7. **OAC 252:100-25 Smoke, Visible Emissions and Particulates [AMENDED]** **Buttram**
The proposed amendments to Subchapter 25 are needed to fulfill an EPA requirement concerning Continuous Emission Monitoring (CEM). Specifically, the department proposes to incorporate by reference the Federal opacity monitoring requirements for fossil fuel-fired steam generators and fluid bed catalytic cracking unit catalyst regenerators at petroleum refineries as specified in 40 CFR 51, Appendix P. and would also provide criteria for approval of alternative monitoring requirements. Additional changes to the existing rule include changing the time allowed for visible emissions during short-term occurrences to exceed the opacity standard to one six-minute period in any consecutive 60 minutes, not to exceed three such periods in any consecutive 24 hours. A new subsection would contain methods for determining compliance with the opacity limits. Other proposed amendments to Subchapter 25 are designed to simplify and clarify the rule.
Discussion by Council/Public
8. **OAC 252:100-23 Control of Emissions from Cotton Gins [AMENDED]** **Mainord**
Proposal would simplify the language under the agency-wide re-write/de-wrong initiative and add a new PBR section.
Discussion by Council/Public
9. **OAC 252:100-24 Control of Emissions from Grain Elevators [AMENDED]** **Martinez**
Proposal would simplify the language under the agency-wide re-write/de-wrong initiative and add a new PBR section.
Discussion by Council/Public
10. **OAC 252:100-37 Control of Emissions of Organic Materials [AMENDED]** **Sheedy**
Proposal would simplify the language under the agency-wide re-write/de-wrong initiative and exclude acetone and methylated siloxanes from the definition of VOC. A substantive change deletes a sentence regarding fuel-burning and refuse-burning equipment resolving a contradiction.
Discussion by Council/Public
11. **OAC 252:100-39 Emissions of Organic Materials in Nonattainment Areas [AMENDED]** **Sheedy**
Proposal would simplify the language under the agency-wide re-write/de-wrong initiative and exclude acetone and methylated siloxanes from the definition of VOC.
Discussion by Council/Public

HEARING/MEETING AGENDA

PUBLIC HEARINGS

5. **OAC 252:100-47 Control of Emissions from Existing Municipal Solid Waste Landfills [NEW]** Bradley
Proposes to establish state standards to control emissions from certain existing municipal solid waste landfills that commenced construction, modification, or reconstruction before May 30, 1991 and accepted waste after November 8, 1987. The proposed rules to be included in Oklahoma's State 111(d) Plan provide the enforceable mechanism for implementing the federal emission guidelines (40 CFR 60 subpart Cc.)
Discussion by Council/Public; possible action by Council
6. **State 111(d) Plan for Municipal Solid Waste Landfills** Bradley
The proposed State 111(d) Plan outlines Oklahoma's program to implement the emission guidelines for municipal solid waste landfills. Federal regulations (40 CFR 60 Subparts B and Cc) require that a public hearing be held to receive comments from the Council and public on the proposed plan.
Discussion by Council/Public; Council approval is not required.
7. **OAC 252:100 Air Pollution Control:** Martinez
Appendix E, Primary Ambient Air Quality Standards [AMENDED]
Appendix F, Secondary Ambient Air Quality Standards [AMENDED]
Proposed revisions to Appendices E and F will mirror the revised federal national ambient air quality standards for particulate matter and ozone announced by EPA in the July 18, 1997, *Federal Register*.
Discussion by Council/Public; possible action by Council
8. **OAC 272:100-7 Permits [AMENDED]** Buttram
Proposed revisions will delete the lower limit of 5 tons per year for Permit by rule (PBR) facilities allowing those facilities with less than 5 tons per year emissions which are subject to new source performance standards and national emissions standards for hazardous air pollutants to apply for a PBR instead of having to obtain an individual permit. Also, a new Part 9 is proposed that will outline the requirements necessary for a facility to qualify for PBR. Each subchapter containing a PBR for specific facilities will be referenced under this new Part also.
Discussion by Council/Public; possible action by Council

9. **OAC 252:100-25 Smoke, Visible Emissions and Particulates [AMENDED]** **Buttram**
 The proposed amendments to Subchapter 25 are needed to fulfill an EPA requirement concerning Continuous Emission Monitoring (CEM). Specifically, the department proposes to incorporate by reference the Federal opacity monitoring requirements for fossil fuel-fired steam generators and fluid bed catalytic cracking unit catalyst regenerators at petroleum refineries as specified in 40 CFR 51, Appendix P. and would also provide criteria for approval of alternative monitoring requirements. Additional changes to the existing rule include changing the time allowed for visible emissions during short-term occurrences to exceed the opacity standard to one six-minute period in any consecutive 60 minutes, not to exceed three such periods in any consecutive 24 hours. A new subsection would contain methods for determining compliance with the opacity limits. Other proposed amendments to Subchapter 25 are designed to simplify and clarify the rule.
 Discussion by Council/Public; possible action by Council
10. **OAC 252:100-23 Control of Emissions from Cotton Gins [AMENDED]** **Mainord**
 Proposal would simplify the language under the agency-wide re-write/de-wrong initiative and add a new PBR section.
 Discussion by Council/Public; possible action by Council
11. **OAC 252:100-24 Control of Emissions from Grain Elevators [AMENDED]** **Martinez**
 Proposal would simplify the language under the agency-wide re-write/de-wrong initiative and add a new PBR section.
 Discussion by Council/Public; possible action by Council
12. **OAC 252:100-37 Control of Emissions of Organic Materials [AMENDED]** **Sheedy**
 Proposal would simplify the language under the agency-wide re-write/de-wrong initiative and exclude acetone and methylated siloxanes from the definition of VOC. A substantive change deletes a sentence regarding fuel-burning and refuse-burning equipment resolving a contradiction.
 Discussion by Council/Public; possible action by Council
13. **OAC 252:100-39 Emissions of Organic Materials in Nonattainment Areas [AMENDED]** **Sheedy**
 Proposal would simplify the language under the agency-wide re-write/de-wrong initiative and exclude acetone and methylated siloxanes from the definition of VOC.
 Discussion by Council/Public; possible action by Council

MEMORANDUM

TO: Air Quality Council

FROM: David R. Dyke, Interim Director
Air Quality Division

RE: Proposed modifications to 252:100, Appendix E, Primary Ambient Air Quality Standards, and Appendix F, Secondary Ambient Air Quality Standards

On July 17, 1997, the Environmental Protection Agency (EPA) announced new standards for particulate matter (PM) and ozone under the national ambient air quality standards (NAAQS). The Air Quality Division is proposing the following revisions to Appendices E and F to mirror the new federal NAAQS.

The EPA revised the primary (health-based) PM standards by adding a new annual PM-2.5 standard set at 15 micrograms per cubic meter (ug/m^3) and a new 24-hr PM-2.5 standard set at $65 \text{ ug}/\text{m}^3$. EPA is retaining the current annual PM-10 standards of $50 \text{ ug}/\text{m}^3$ and changing the form of the PM-10 24-hour standard. The secondary (welfare-based) standards are also being adjusted to make them identical to the primary standards. EPA believes that the PM-2.5 and the PM-10 standards, combined with the federal regional haze program, will provide protection against the major PM-related welfare effects, including visibility impairment, soiling and materials damage.

The previous 1-hour primary ozone standard is being phased out and replaced with a new 8-hour standard to protect against longer exposure periods. The new 8-hour standard is set at 0.08 ppm. The 3-year average of the annual 4th-highest daily maximum 8-hour ozone concentrations is used to determine compliance with the standard. EPA also replaced the previous secondary standards with a standard identical to the new primary standard. The 0.12 ppm 1-hour standards will not be revoked in a given area until that area has achieved 3 consecutive years of air quality data meeting the 1-hour standard. Oklahoma has demonstrated compliance with the 1-hour standard and EPA has revoked the 1-hour standard for Oklahoma. This is not the case for some metropolitan areas like Dallas, Los Angeles or Houston, where the 1-hour standard remains in effect.

The revised standards were adopted over a year ago. They were controversial when issued, but they have survived a great deal of public debate and legislative scrutiny. Congress didn't veto them and they are now in effect. In order for Oklahoma to maintain an approved State Implementation Plan (SIP), DEQ must incorporate the new revised

standards into our rules. If Oklahoma fails to do so then the State's approved air quality program could be jeopardized.

Enclosed are a copy of the draft revisions to Appendices E and F, the Rule Impact Statement, and EPA fact sheets on the revised standards for your review. The AQD plans to take Appendices E and F to public hearing on August 18, 1998. Staff will suggest the proposed revisions to Appendices E and F be recommended to the Board for permanent approval.

Enclosures: 4

APPENDIX E. PRIMARY AMBIENT AIR QUALITY STANDARDS [REVOKED]

Primary Standards	Annual	1 Hour Max.	3 Hour Max.	8 Hour Max.	24 Hour Max.	Calendar Quarter
Sulfur (Sulfur Dioxide)	(1) 80 ug/m ³				(2) 365 ug/m ³ (0.14 ppm)	
PM-10	(3) 50 ug/m ³				150 ug/m ³	
Carbon Monoxide		(2) 40 mg/m ³		(2) 10 mg/m ³		
Photo-chemical Oxidants		(5) 235 ug/m ³ (0.12 ppm)				
Non-methane Hydrocarbons			(2) (4) (6) 160 ug/m ³ (0.24 ppm)			
Nitrogen Oxides (Nitrogen Dioxide)	(1) 100 ug/m ³ (0.05 ppm)					
Lead					1.5 ug/m ³	(7)

- (1) Annual arithmetic mean.
- (2) Not to be exceeded more than once per year.
- (3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by Appendix K Part 50 CFR 40.
- (4) Measured between 6 a.m. and 9 a.m.
- (5) The standard is attained when the expected number of days per calendar year with maximum hourly average concentrations above 0.12 parts per million is equal to or less than 1, as determined by Appendix H for Part 50 of Chapter I, CFR 40.
- (6) Guide only value to EPA, to be used in planning, not a Federal standard.
- (7) Maximum arithmetic mean averaged over a calendar quarter.

APPENDIX E. PRIMARY AMBIENT AIR QUALITY STANDARDS [NEW]

	Sulfur Dioxide	PM-10	PM-2.5	Carbon Monoxide	Ozone	Nitrogen Dioxide	Lead	VOCs
1-hr. max				(2) 35 ppm				
3-hr. max								0.24 ppm (2)(8)(9)
8-hr. max				(2) 9 ppm	(6) 0.08 ppm			
24-hr. max	(1) 0.14 ppm	(4) 150 ug/m ³	(5) 65 ug/m ³					
Calendar Qtr.							(7) 1.5 ug/m ³	
Annual	(1) 0.03 ppm	(3) 50 ug/m ³	(5) 15 ug/m ³			(1) 0.053 ppm		

- (1) Annual arithmetic mean
- (2) Not to be exceeded more than once per year
- (3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix K
- (4) The form of the standard is based on the 99th percentile of the 24-hr PM10 concentration in a year (averaged over 3 years)
- (5) The form of the standard is based on the 98th percentile of the 24-hr PM2.5 concentration in a year (averaged over 3 years)
- (6) The standard is attained when the computed 3-year average of the annual 4th highest daily max 8-hr average does not exceed 0.08 ppm
- (7) The maximum arithmetic mean averaged over a calendar quarter
- (8) Measured between 6 am and 9 am
- (9) EPA guidance value, only to be used in planning, not a federal standard

DRAFT

APPENDIX F. SECONDARY AMBIENT AIR QUALITY STANDARDS [REVOKED]

Secondary Standards	Annual	1 Hour Max.	3 Hour Max.	8 Hour Max.	24 Hour Max.	Calendar Quarter
Sulfur Oxides (Sulfur Dioxide)			1300 ug/m ³ (0.5 ppm)			
PM-10	(3) 50 ug/m ³				150 ug/m ³	
Carbon Monoxide		(2) 40 mg/m ³ (35 ppm)		(2) 10 mg/m ³ (9 ppm)		
Photo-chemical Oxidants (Ozone)		(5) 235 ug/m ³ (0.12 ppm)				
Non-methane Hydrocarbons			(2) (4) (6) 160 ug/m ³ (0.24 ppm)			
Nitrogen Oxides (Nitrogen Dioxide)	(1) 100 ug/m ³ (0.05 ppm)					
Lead						(7) 1.5 ug/m ³

- (1) Annual arithmetic mean.
- (2) Not to be exceeded more than once per year.
- (3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by Appendix K Part 50 CFR 40.
- (4) Measured between 6 a.m. and 9 a.m.
- (5) The standard is attained when the expected number of days per calendar year with maximum hourly average concentrations above 0.12 parts per million is equal to or less than 1, as determined by Appendix H for Part 50 of Chapter I, CFR 40.
- (6) Guide only value to EPA, to be used in planning, not a Federal standard.
- (7) Maximum arithmetic mean averaged over a calendar quarter.

APPENDIX F. SECONDARY AMBIENT AIR QUALITY STANDARDS [NEW]

	Sulfur Dioxide	PM-10	PM-2.5	Carbon Monoxide	Ozone	Nitrogen Dioxide	Lead	VOCs
1-hr. max				(2) 35 ppm				
3-hr. max	(2) 0.5 ppm							0.24 ppm (2)(8)(9)
8-hr. max				(2) 9 ppm	(6) 0.08 ppm			
24-hr. max		(4) 150 ug/m ³	(5) 65 ug/m ³					
Calendar Qtr.							(7) 1.5 ug/m ³	
Annual		(3) 50 ug/m ³	(5) 15 ug/m ³			(1) 0.053 ppm		

- (1) Annual arithmetic mean
- (2) Not to be exceeded more than once per year
- (3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix K
- (4) The form of the standard is based on the 99th percentile of the 24-hr PM10 concentration in a year (averaged over 3 years)
- (5) The form of the standard is based on the 98th percentile of the 24-hr PM2.5 concentration in a year (averaged over 3 years)
- (6) The standard is attained when the computed 3-year average of the annual 4th highest daily max 8-hr average does not exceed 0.08 ppm
- (7) The maximum arithmetic mean averaged over a calendar quarter
- (8) Measured between 6 am and 9 am
- (9) EPA guidance value, only to be used in planning, not a federal standard

PUBLIC MEETING

Notice of Public Meeting for August 18, 1998 was forwarded to the Office of the Secretary of State giving the time, date, and place of the meeting. Agendas were posted at the entrance door of the meeting room and also at the DEQ Tower.

Call to Order - Mr. Breisch, Chairman, called the meeting to order and roll call was taken as follows: Ms. Myers – aye; Dr. Grosz – aye; Mr. Kilpatrick – aye; Mr. Wilson – aye; Mr. Branecky – aye; Ms. Slagell – aye. Dr. Canter did not attend.

Approval of Minutes - Mr. Breisch entertained a motion to approve the Minutes of the June 16, 1998 Public Meeting/Hearings. Motion was made by Mr. Kilpatrick to approve the Minutes as presented and second to the motion was made by Mr. Branecky. Roll call as follows: Ms. Myers – aye; Dr. Grosz – aye; Mr. Kilpatrick – aye; Mr. Wilson – aye; Mr. Branecky – aye; Ms. Slagell – aye; Mr. Breisch – aye.

PUBLIC HEARING

OAC 252:100-47 Control of Emissions from Existing Municipal Solid Waste Landfills [NEW]

As protocol officer, Mr. Dyke convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes, Sections 2-5-101 through 2-5-118. Mr. Dyke then called upon Ms. Cheryl Bradley to give staff recommendations on this rule. Ms. Bradley advised that the rule was first considered by the Council on June 16, 1998 at which time the hearing was continued because EPA was in the process of amending the federal standards that are the basis for the draft rule. These amendments became effective August 17, 1998. Ms. Bradley stated that staff had made the revisions consistent with the amended federal regulations and addressed all comments received.

After discussion, Chairman Breisch entertained a motion to recommend adoption of this rule as emergency and permanent to the Environmental Quality Board at its September 15, 1998 meeting. Dr. Grosz made that motion with second made by Mr. Branecky. Roll call as follows: Ms. Myers – aye; Dr. Grosz – aye; Mr. Kilpatrick – aye; Mr. Wilson – aye; Mr. Branecky – aye; Ms. Slagell – aye; Mr. Breisch – aye.

See attached transcript.

PUBLIC HEARING

State 111(d) Plan for Municipal Solid Waste Landfills

As protocol officer, Mr. Dyke convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes, Sections 2-5-101 through 2-5-118. Mr. Dyke then called upon Ms. Cheryl Bradley for staff position regarding this State Plan. Ms. Bradley pointed out the criteria for approval of a state plan and advised that Oklahoma's mechanism to implement this Plan is OAC252:100-47. Ms. Bradley related that although no Council action was necessary, the staff requests to hear comments from the Council members and the public regarding the State Plan.

PUBLIC HEARING

OAC 252:100 Air Pollution Control:

Appendix E, Primary Ambient Air Quality Standards [AMENDED]

Appendix F, Secondary Ambient Air Quality Standards [AMENDED]

As protocol officer, Mr. Dyke convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes, Sections 2-5-101 through 2-5-118. Mr. Dyke then called upon Ms. Michelle Martinez who stated that the revisions to these appendices would be identical to the revised federal National Ambient Air Quality Standards (NAAQS) for particulate matter and ozone

announced by EPA in the July 18, 1997 *Federal Register*. Ms. Martinez pointed out that according to the Secretary of State's Rules on Rulemaking, an appendix cannot be amended; therefore, staff recommended that Council vote to revoke the old appendices and pass the new appendices as permanent.

After discussion, Chairman Breisch entertained a motion to recommend this rule to the Environmental Quality Board as a permanent rule at its September 15, 1998 meeting. Mr. Kilpatrick moved that Council revoke the existing rule and replace them with the new rules as presented. Second to the motion was made by Mr. Branecky. Roll call as follows: Ms. Myers – aye; Dr. Grosz – aye; Mr. Kilpatrick – aye; Mr. Wilson – aye; Mr. Branecky – aye; Ms. Slagell – aye; Mr. Breisch – aye.

See attached transcript.

PUBLIC HEARING

OAC 252:100-7 Permits [AMENDED]

As protocol officer, Mr. Dyke convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes, Sections 2-5-101 through 2-5-118. Mr. Dyke then called upon Ms. Jeanette Buttram for staff position regarding this rule. Ms. Buttram pointed out revisions made to date and advised that staff was recommending that the comment period be left open until August 24 after which staff would revise the rule based upon comments received from Council and public; and would bring again to the Council's October 20 meeting.

Following discussion and comments, Chairman Breisch entertained a motion to continue this rule to the Council's October 20, 1998 meeting. Ms. Myers made that motion with second made by Ms. Slagell. Roll call as follows: Ms. Myers – aye; Dr. Grosz – aye; Mr. Kilpatrick – aye; Mr. Wilson – aye; Mr. Branecky – aye; Ms. Slagell – aye; Mr. Breisch – aye.

See attached transcript.

PUBLIC HEARING

OAC 252:100-25 Smoke, Visible Emissions and Particulates [AMENDED]

As protocol officer, Mr. Dyke convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes, Sections 2-5-101 through 2-5-118. Mr. Dyke then called upon Ms. Jeanette Buttram to give staff's position on this rule. Ms. Buttram advised that the rule was presented to Council's June 16 meeting where changes to simplify and clarify the rule and to fulfill an EPA State Implementation Plan (SIP) requirement concerning Continuous Emission Monitoring (CEM) were proposed. Ms. Buttram advised that comments received have been addressed and incorporated into the current draft rule. Following discussion with new comments, staff

recommended that the hearing be continued on this rule to the October 20 meeting to allow time for further comments.

Mr. Breisch asked for a motion to continue the hearing. Mr. Wilson made the motion and Ms. Slagell made the second. Roll call was as follows: Mr. Wilson – aye; Mr. Branecky – aye; Ms. Slagell – aye; Mr. Kilpatrick – aye; Dr. Grosz – aye; Ms. Myers – aye; Mr. Breisch – aye.

See attached transcript.

PUBLIC HEARING

OAC 252:100-23 Control of Emissions from Cotton Gins [AMENDED]

As protocol officer, Mr. Dyke convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes, Sections 2-5-101 through 2-5-118. Mr. Dyke then called upon Ms. Becky Mainord who related that the draft rule included simplification of language according to the Agency's re-write/de-wrong initiative and the addition of a Permit by Rule section. She then pointed out the changes made and stated that it was staff's recommendation to continue the hearing until Council's next meeting.

Following discussion, Mr. Breisch entertained a motion to continue this rule. Dr. Grosz made that motion with second made by Mr. Wilson. Roll call as follows: Ms. Myers – aye; Dr. Grosz – aye; Mr. Kilpatrick – aye; Mr. Wilson – aye; Mr. Branecky – aye; Ms. Slagell – aye; Mr. Breisch – aye.

See attached transcript.

PUBLIC HEARING

OAC 252:100-24 Control of Emissions from Grain Elevators [AMENDED]

As protocol officer, Mr. Dyke convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes, Sections 2-5-101 through 2-5-118. Mr. Dyke then called upon Ms. Michelle Martinez who related that revisions were made to simplify the language according to the Agency's re-write/de-wrong initiative, the addition of a Permit By Rule section, and to add a new Appendix L which would include PM₁₀ emission factors for the Permit By Rule. Ms. Martinez pointed out that comments had been received and considered, and that staff's recommendation was to continue the hearing to the next meeting.

After discussion, Mr. Breisch entertained a motion to continue this rule to the Council's October 20, 1998 meeting. Ms. Myers made that motion with second made by Mr. Branecky. Roll call

as follows: Ms. Myers – aye; Dr. Grosz – aye; Mr. Kilpatrick – aye; Mr. Wilson – aye; Mr. Branecky – aye; Ms. Slagell – aye; Mr. Breisch – aye.

See attached transcript.

PUBLIC HEARING

OAC 252:100-37 Control of Emissions of Organic Materials (AMENDED)

As protocol officer, Mr. Dyke convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes, Sections 2-5-101 through 2-5-118. Mr. Dyke then called upon Dr. Joyce Sheedy who stated that the revisions are part of the Agency's re-write/de-wrong initiative and respond to industry requests to exempt acetone, perchloroethylene, and methylated siloxanes from being considered VOCs. She advised that staff held a workshop on July 7 requesting public input and comments. She said there are numerous changes to be made in language, format and with the three substantive changes, staff recommended that the rule be continued to the next meeting.

Mr. Breisch entertained a motion to continue this rule. Mr. Branecky made motion with second made by Mr. Kilpatrick. Roll call as follows: Ms. Myers – aye; Dr. Grosz – aye; Mr. Kilpatrick – aye; Mr. Wilson – aye; Mr. Branecky – aye; Ms. Slagell – aye; Mr. Breisch – aye.

See attached transcript.

PUBLIC HEARING

OAC 252:100-39 Control of Organic Materials in Nonattainment Areas [AMENDED]

As protocol officer, Mr. Dyke convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes, Sections 2-5-101 through 2-5-118. Mr. Dyke then called upon Dr. Joyce Sheedy who stated that there were numerous revisions as part of the Agency's re-write/de-wrong initiative and also five substantive changes to be considered; therefore, staff would recommend that the hearing be continued.

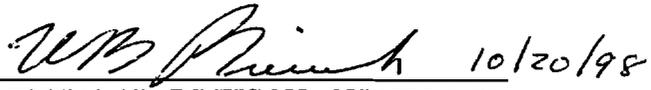

Mr. Breisch entertained a motion to continue this rule to the Council's October 20 meeting. Dr. Grosz made that motion with second made by Mr. Branecky. Roll call as follows: Ms. Myers – aye; Dr. Grosz – aye; Mr. Kilpatrick – aye; Mr. Wilson – aye; Mr. Branecky – aye; Ms. Slagell – aye; Mr. Breisch – aye.

See attached transcript.

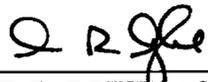

NEW BUSINESS – None

ADJOURNMENT With no further business, meeting was adjourned and next regularly scheduled meeting being October 20, 1998 at Tulsa City-County Health Department Auditorium, 5051 South 129th East, Tulsa, Oklahoma.

AIR QUALITY COUNCIL
RULEMAKING RECOMMENDATION TO THE ENVIRONMENTAL QUALITY BOARD

Identification of Proposed Rulemaking:

Chapter Number and Title – OAC 252:100

Subchapters or Sections Involved – [new, amended or revoked]

Appendix E, Primary Ambient Air Quality Standards [AMENDED]

Appendix F, Secondary Ambient Air Quality Standards [AMENDED]

On AUGUST 20, 1998 the members of this Council, by authority vested in them by the Oklahoma Environmental Quality Code (27 O.S.Supp. 1993, § 2-2-201), by roll call vote, recommended to the Environmental Quality Board that the rulemaking described above be adopted as:

X permanent [take effect after legislative review]

emergency [temporary, to take effect upon approval by the Governor because of time; and/or special reason: _____]

This Council has considered the proposed rulemaking and comments about it and determined, to the best of its knowledge, that all applicable requirements of the Oklahoma Administrative Procedures Act have been followed.

This Council authorizes the Department to prepare this recommended rulemaking for the Board, making any changes approved by the Council, correcting typographical, grammatical and reference errors, and formatting them as required by the Office of Administrative Rules. This is to be done with the understanding that such changes shall neither alter the sense of what this Council recommends nor invalidate this recommendation.

Respectfully,

Date signed: 8-20-98

 - A. Discussion by Council
 - B. Roll call vote

4. Resolution for Meribeth Slagell

5. Approval of Minutes of the October 19, 1999 Regular Meeting

6. Public Rulemaking Hearings

A. OAC 252:100 Appendices E and F [AMENDED]

Appendix E Primary Ambient Air Quality Standards [REVOKED]

Appendix E Primary Ambient Air Quality Standards [NEW]

Appendix F Secondary Ambient Air Quality Standards [REVOKED]

Appendix F Secondary Ambient Air Quality Standards [NEW]

Proposal would restore the primary and secondary ambient air quality standards for ozone and particulate matter to what they were prior to June 1, 1999. The 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored. The PM-2.5 standard would be revoked along with the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard.

1. Presentation – Michelle Martinez
2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for permanent adoption

B. OAC 252:100- 5 Registration, Emission Inventory and Annual Operating Fees [AMENDED]

Proposal is designed to allow the Agency to bill annual operating fees on a flexible schedule; to allow the fees to be based on the most recent emission data possible; to require an owner or operator of a facility to report excess emissions on their annual emission inventory; to require inventories to be submitted one month earlier than presently required; to allow fee payers five years after payment is made to notify the DEQ that they overpaid and to receive credit for such overpayment; and to reduce the period of time to six months in which either the DEQ or the facility owner or operator can challenge the data or methods used to calculate the facility's emissions.

1. Presentation – Jeanette Buttram
2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for permanent adoption

C. OAC 252:100-9 Excess Emission and Malfunction Reporting [AMENDED]

Proposal would simplify the language under the agency-wide re-right/de-wrong initiative, including correction of typographical and grammatical errors and deletion of redundant language. Substantive changes include establishing a time limit on excess emissions caused by properly reported malfunctions, startup/shutdowns, and maintenance procedures. The burden of proving that excess emissions occurring more than eight hours or 1.5 percent of the process's operation time in a 3-month period are due to excusable malfunctions, startup/shutdowns or maintenance procedures rather than negligent, marginal, or improper operation is on the owner or operator of the process. Language was added to explain that compliance with this Subchapter will not exempt sources from complying with any applicable federal requirement; and additional demonstration requirements for malfunctions, maintenance, and startup/shutdowns were added under proposed section 252:100-9-3.2, Demonstration of cause.

1. Presentation – Jeanette Buttram

2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for permanent adoption

D. OAC 252:100-13. Prohibition of Open Burning [AMENDED]

Proposal would simplify the language under the agency-wide re-right/de-wrong initiative, including consolidating the general conditions and requirements for allowed open burning into a new section. Substantive changes would add definitions for "domestic refuse" and "land clearing operation" along with a section on disaster relief procedures. In some instances, the requirement to notify the DEQ or other appropriate official for authorization to burn was added. In addition, the open-pit incinerator requirements were expanded and moved to a new section. Also the rule would only allow material from a land clearing operation to be burned in an open-pit incinerator.

1. Presentation – Jeanette Buttram
2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for permanent adoption

E. OAC 252:100- 23 Control of Emissions from Cotton Gins [AMENDED]

1. Presentation – Max Price
2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for emergency adoption

Proposal would amend OAC 252:100-23-3(a) to remove references to OAC 252:100-27, which will be revoked effective June 1, 2000, and replace them with new section OAC 252:100-19-12, to take effect June 1, 2000.

F. OAC 252:100-24 Control of Emissions from Grain Elevators [AMENDED]

1. Presentation – Max Price
2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for emergency adoption

Proposal would amend OAC 252:100-24-3(a)(1) and (2) to remove references to OAC 252:100-27, which will be revoked effective June 1, 2000, and replace them with new section OAC 252:100-19-12, to take effect June 1, 2000.

G. OAC 252:2-15 Environmental Permit Processing Times [AMENDED]

The proposal would change the terms used in 252:2-15-40, 41 and 72 to be consistent with those used in 252:100, Air Pollution Control. The terms "minor source(s)" and "major facility(ies)" would be changed to "minor facility(ies)" and "Part 70 source(s)", respectively.

1. Presentation – Cheryl Bradley
2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for permanent adoption

7. Division Director's Report – Eddie Terrill

8. New Business – Any matter not known about, or which could not have been reasonably foreseen, prior to the time of posting the agenda.

9. Adjournment – Next Regular Meeting

Date and Time: To Be Announced

Place: DEQ Multi-Purpose Room - OKC

* Council decided at its October 19 meeting to begin at 9:00 a.m. due to the number of agenda items.

Lunch Break, if necessary

Should you desire to attend but have a disability and need an accommodation, please notify our Department three days in advance at (405) 720-4100.

December 1, 1999

MEMORANDUM

TO: Air Quality Council
FROM: Eddie Terrill, Director
Air Quality Division
SUBJECT: NAAQS: Appendices E & F

On July 18, 1997, the EPA announced new national ambient air quality standards (NAAQS) for particulate matter (PM) and ozone. The EPA revised the primary PM standards by adding a new annual PM-2.5 standard set at 15 ug/m³ and a new 24-hr PM-2.5 standard set at 65 ug/m³. EPA retained the annual PM-10 standard of 50 ug/m³ and changed the form of the PM-10 24-hr standard. Also, EPA decided to phase out the previous 1-hr primary ozone standard and replace it with a new 8-hr standard of 0.08 ppm to protect against longer exposure periods. Oklahoma had demonstrated compliance with the 1-hr standard, so EPA revoked the 1-hr standard for the entire state. The secondary standards were also adjusted to make them identical to the new and revised primary standards.

The Environmental Quality Board approved adoption of new Appendices E and F containing the new standards on September 15, 1998. The new standards for ozone and PM became effective on June 1, 1999.

A recent court decision has called the new revised standards into question. In a response to challenges filed by industry and others, a 3-judge panel of the United States Court of Appeals for the District of Columbia issued a split decision on May 14, 1999. The Court held that the Clean Air Act, as applied in setting the new NAAQS for ozone and PM, is unconstitutional because it was an improper delegation of legislative authority to the EPA. Specifically, the Court's decision:

- Remanded but did not vacate the 8-hr ozone standard, holding that it "cannot be enforced."
- Remanded but did not vacate the PM-2.5 standards.
- Remanded and vacated the revised form of the PM-10 standards.

The Court of Appeals recently announced that it will not reconsider the panel's decision.

Appendices E and F will be brought to public hearing on December 14, 1999. Staff will propose that the ozone and particulate matter standards be restored to what they were prior to June 1, 1999. The 8-hr ozone standard would be revoked and the 1-hr standard restored. The PM-2.5 standard would be revoked along with the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard. Staff will suggest that the proposed Appendices E and F be recommended for permanent adoption by the Board.

Enclosures: 5

APPENDIX E. PRIMARY AMBIENT AIR QUALITY STANDARDS [REVOKED]

	Sulfur Dioxide	PM-10	PM-2.5	Carbon Monoxide	Ozone	Nitrogen Dioxide	Lead
1-hr. max				40 mg/m ³ (2) 35 ppm			
3-hr. max							
8-hr. max				10 mg/m ³ (2) 9 ppm	(6) 0.08 ppm		
24-hr. max	365 ug/m ³ (2) 0.14 ppm	(4) 150 ug/m ³	(5) 65 ug/m ³				
Calendar Qtr.							(7) 1.5 ug/m ³
Annual	80 ug/m ³ (1) 0.030 ppm	(3) 50 ug/m ³	(8) 15 ug/m ³			100 ug/m ³ (1) 0.053 ppm	

- (1) Annual arithmetic mean
- (2) Not to be exceeded more than once per year
- (3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix K
- (4) The form of the standard is based on the 99th percentile of the 24-hr PM10 concentration in a year (averaged over 3 years)
- (5) The form of the standard is based on the 98th percentile of the 24-hr PM2.5 concentration in a year (averaged over 3 years)
- (6) The standard is attained when the computed 3-year average of the annual 4th highest daily max 8-hr average does not exceed 0.08 ppm
- (7) The maximum arithmetic mean averaged over a calendar quarter
- (8) Based on the 3-yr average of annual arithmetic mean PM-2.5 concentrations

APPENDIX E. PRIMARY AMBIENT AIR QUALITY STANDARDS [NEW]

	Sulfur Dioxide	PM-10	Carbon Monoxide	Ozone	Nitrogen Dioxide	Lead
1-hr. max			40 mg/m ³ (2) 35 ppm	235 ug/m ³ (4) 0.12 ppm		
8-hr. max			10 mg/m ³ (2) 9 ppm			
24-hr. max	365 ug/m ³ (2) 0.14 ppm	150 ug/m ³				
Calendar Qtr.						(5) 1.5 ug/m ³
Annual	80 ug/m ³ (1) 0.030 ppm	(3) 50 ug/m ³			100 ug/m ³ (1) 0.053 ppm	

(1) Annual arithmetic mean

(2) Not to be exceeded more than once per year

(3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix K.

(4) The standard is attained when the expected number of days per calendar year with maximum hourly average concentrations above 0.12 ppm is equal to or less than 1, as determined by 40 CFR 50, Appendix H.

(5) Maximum arithmetic mean averaged over a calendar quarter

APPENDIX F. SECONDARY AMBIENT AIR QUALITY STANDARDS [REVOKED]

	Sulfur Dioxide	PM-10	PM-2.5	Carbon Monoxide	Ozone	Nitrogen Dioxide	Lead
1-hr. max				40 mg/m ³ (2) 35 ppm			
3-hr. max	1300 ug/m ³ (2) 0.5 ppm						
8-hr. max				10 mg/m ³ (2) 9 ppm	(6) 0.08 ppm		
24-hr. max		(4) 150 ug/m ³	(5) 65 ug/m ³				
Calendar Qtr.							(7) 1.5 ug/m ³
Annual		(3) 50 ug/m ³	(8) 15 ug/m ³			100 ug/m ³ (1) 0.053 ppm	

- (1) Annual arithmetic mean
- (2) Not to be exceeded more than once per year
- (3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix K
- (4) The form of the standard is based on the 99th percentile of the 24-hr PM10 concentration in a year (averaged over 3 years)
- (5) The form of the standard is based on the 98th percentile of the 24-hr PM2.5 concentration in a year (averaged over 3 years)
- (6) The standard is attained when the computed 3-year average of the annual 4th highest daily max 8-hr average does not exceed 0.08 ppm
- (7) The maximum arithmetic mean averaged over a calendar quarter
- (8) Based on the 3-yr average of annual arithmetic mean PM-2.5 concentrations

APPENDIX F. SECONDARY AMBIENT AIR QUALITY STANDARDS [NEW]

	Sulfur Dioxide	PM-10	Carbon Monoxide	Ozone	Nitrogen Dioxide	Lead
1-hr. max			40 mg/m ³ (2) 35 ppm	235 ug/m ³ (4) 0.12 ppm		
3-hr. max	1300 ug/m ³ (2) 0.5 ppm					
8-hr. max			10 mg/m ³ (2) 9 ppm			
24-hr. max		150 ug/m ³				
Calendar Qtr.						(5) 1.5 ug/m ³
Annual		(3) 50 ug/m ³			100 ug/m ³ (1) 0.053 ppm	

(1) Annual arithmetic mean

(2) Not to be exceeded more than once per year

(3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix K.

(4) The standard is attained when the expected number of days per calendar year with maximum hourly average concentrations above 0.12 ppm is equal to or less than 1, as determined by 40 CFR 50, Appendix H.

(5) Maximum arithmetic mean averaged over a calendar quarter

Notice of Public Meeting for December 14, 1999 was forwarded to the Office of the Secretary of State giving the time, date, and place of the meeting. Agendas were posted at the entrance doors.

Call to Order - Mr. Breisch, Chairman, called the meeting to order and roll call was taken as follows: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye. Dr. Canter, Ms. Myers, and Mr. Kilpatrick did not attend. Mr. Breisch and Mr. Terrill presented Meribeth Slagell a Resolution from the Council and Certificate of Appreciation from Mr. Coleman and thanked her for her years of dedicated service on the Council. Mr. Breisch introduced new Council member, Rick Treeman, who was appointed by the Governor to replace the position vacated by Mrs. Slagell.

Approval of Minutes - Mr. Breisch entertained a motion to approve the Minutes of the August 24, 1999 Public Meeting/Hearings. Motion was made by Mr. Fallon to approve the Minutes as presented and second was made by Dr. Grosz. Roll call as follows: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

CY 2000 Meeting Schedule - Staff suggested the following Year 2000 meeting dates:
Wednesday, February 16 at Tulsa
Wednesday, April 19 at Lawton
Wednesday, June 14 at Tulsa
Wednesday, August 16 at Ponca City
Wednesday, October 18 at Oklahoma City
Wednesday, December 14 at Oklahoma City

Motion to accept the schedule was made by Mr. Fallon with second by Mr. Branecky with following vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye

Protocol Statement — As protocol officer, Mr. Dyke convened the hearings by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes, Sections 2-5-101 through 2-5-118. Mr. Dyke entered the Agenda and the Oklahoma Register Notice into the record.

PUBLIC HEARING

OAC 252:100- Appendices E & F

Appendix E Primary Ambient Air Quality Standards [AMENDED]

Appendix F Secondary Ambient Air Quality Standards [AMENDED]

Ms. Michelle Martinez made the staff presentation stating that the proposed amendments to Appendices E and F would restore the primary and secondary ambient air quality standards for ozone to what they were prior to June 1, 1999. She advised that the 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored; and that the PM-2.5 standards would be revoked along with the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard.

Ms. Martinez entered into the record a fax received from EPA Region 6 dated December 10, 1999 which stated that updating these appendices was timely and appropriate. Ms. Martinez then asked that Council recommend proposed Appendices E and F to the Environmental Quality Board for permanent adoption.

Following discussion, Mr. Breisch asked for a motion to recommend the rule for adoption. Mr. Branecky made motion to recommend to the Board for permanent/emergency adoption. Second was made by Mr. Fallon. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-5

Registration, Emission Inventory and Annual Operating Fees [AMENDED]

Ms. Jeanette Buttram presented the staff presentation and advised that the proposed changes to Subchapter 5 were designed to allow the agency the ability to bill annual operating fees on a flexible schedule, and that these changes would also allow the fees to be based on the most recent emission data possible. Ms. Buttram pointed out that the proposed rule clarified that an owner or operator of a facility must report quantifiable excess emissions on their annual emission inventory. She stated that substantive changes included the requirement that all inventories be submitted prior to March 1, and the Agency would provide up to a 30-day extension upon request. Council made a recommendation that the language be changed to allow an additional 30-day extension for good cause shown. Also, the rule will allow fee payers five years after payment is made to notify the DEQ that they overpaid and receive

credit for such overpayment. Also, new language was proposed to reduce to six months after inventories are due or submitted, the period of time in which either the facility owner/operator or the DEQ, respectively, can challenge the methods used to calculate the facility's emissions for "fee calculation purposes."

Ms. Buttram advised that comments had been received from Central and Southwest Services and she entered them into the record. She stated that it was staff's recommendation that Council forward this rule to the Environmental Quality Board for adoption as a permanent rule.

Following comments from Council members and the audience, changes were made in the wording and Mr. Wilson made a motion to forward this rule, with changes, to the Environmental Quality Board for adoption. Second was made by Mr. Branecky. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-9

Excess Emission And Malfunction Reporting [AMENDED]

Ms. Jeanette Buttram was called upon to make the staff recommendation for this rule. She stated that the proposed changes to Subchapter 9 included correction of typographical and grammatical errors and deletion of redundant language; and that the rule was simplified and clarified according to the agency-wide re-right/de-wrong initiative.

Substantive changes include the addition of new definitions and the addition of a new subsection for certification of the information submitted.

Also, language was added under 100-9-3.3, Demonstration of cause, which states excess emissions caused by malfunction and maintenance, start-up/shutdown, can be exempt from compliance which air emission limitations established in permits, rules, orders of the DEQ if the owner/operator properly complies with the requirements in 252:100-9-3.1 and 252:100-9-3.2, respectively; and meets the demonstrations listed in those subsections. Then additional subsections added to 100-9-3.3 were discussed.

Ms. Buttram advised that comments had been received from EPA Region 6 and from Central and Southwest Services and entered them into the record. She stated that staff suggested that the rule be recommended for adoption by the Environmental Quality Board.

After much discussion with staff, Council, and audience members, Mr. Breisch called for a motion. Mr. Fallon made motion to continue this rule to the next regular meeting. Mr. Branecky made the second. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-13

Prohibition of Open Burning [AMENDED]

Ms. Jeanette Buttram was called upon to give the staff recommendation concerning this rule. She stated that the proposed changes to Subchapter 13 would simplify and clarify the Subchapter as a part of the agency-wide re-right/de-wrong initiative. She added that such changes included consolidating the general conditions and requirements for allowed open burning into a new section. She pointed out that a few substantive changes were made such as adding definitions for "domestic refuse" and "landclearing operation" and a section on disaster relief procedures; and that in some instances, the requirement to notify the DEQ or other appropriate official for authorization to burn was added. Ms. Buttram stated that new language was added under "land management and land clearing operations" requiring those who clear land in areas that are or have been designated nonattainment to burn their vegetation in open-pit incinerators. She stated that existing language on open-pit incinerators was expanded it would now prohibit accepting any material owned by other persons and from transporting any material to be burned to the property where the open-pit incinerator is located. She advised that it was staffs recommendation that Council forward this rule to the Environmental Quality Board for adoption as a permanent rule.

Ms. Buttram entered written comments from Central and Southwest Services into the record. Following questions and discussion by Council, changes were made in the wording after which Mr. Breisch entertained motion to accept the changes made and forward the rule to the Board for adoption as a permanent rule. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-23 Control of Emissions from Cotton Gins [AMENDED]

OAC 252:100-24 Control of Emissions from Grain Elevators [AMENDED]

Mr. Dyke called upon Mr. Max Price who advised Council that the proposed changes to 100-23-3 and 100-24-3, would substitute references to 252:100-19-12 for references to Subchapter 27. He added that these revisions were necessary because the substantive requirements of Subchapter 27 would be moved to 100-19-12 and Subchapter 27 would be revoked in June of 2000. He added that the references to Subchapter 27 would become meaningless unless they are replaced by references to 100-19-12. Mr. Price stated that it was staff's recommendation that Council refer these rules to the Environmental Quality Board for emergency adoption effective June 1, 2000.

Mr. Breisch stated that these two rules would be voted on separately and called for a motion on Subchapter 23. Mr. Wilson made the motion to forward to the Board as recommended

by staff. The second made by Mr. Branecky. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

Mr. Breisch then called for the same motion for Subchapter 24. Mr. Branecky made the motion and Dr. Grosz made the second. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:2-15

Environmental Permit Processing Times [AMENDED]

Mr. Dyke called upon Ms. Cheryl Bradley who stated that the proposed amendments to Sections 40, 41, and 72 would make them consistent with 252:100, Air Pollution Control; and that the references to "minor source(s)" and "major facility(ies)" would be changed to "minor facility(ies)" and "Part 70 source(s)", respectively. She added that changes were also made at the Council meeting to section 2-15-72(1)(A) such that the phrase "and part 70 sources" was added along with changing the number of days from 540 to 365. Ms. Bradley stated that comments had been received from EPA Region 6 and she entered them into the record. Following discussion Ms. Bradley advised that it was staff's recommendation that Council refer this rule to the Board for permanent adoption of the proposed amendments. Mr. Breisch called for a motion. Mr. Branecky made motion to accept the changes as stated and forward the rule to the Board for adoption. Mr. Fallon made the second. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

DIVISION DIRECTOR'S REPORT - Mr. Terrill advised that he and Mr. Dyke would be attending a meeting with Central States Air Resources Board (CenSARA) to discuss, among other things, the status of the Regional Planning Body activities. He stated that he would like to take a few minutes at the next regular meeting for an update on these activities.

NEW BUSINESS - None

ADJOURNMENT With no further business, meeting was adjourned with announcement that the next regularly scheduled meeting would be February 16, 2000 at 9:00 a.m. in the Auditorium at OSU-Tulsa (formerly UCAT).

AIR QUALITY COUNCIL
RULEMAKING RECOMMENDATION TO THE ENVIRONMENTAL QUALITY BOARD

Identification of Proposed Rulemaking:

Chapter Number and Title – OAC 252:100

Subchapters or Sections Involved – [new, amended or revoked]

Appendices E and F

On December 14, 1999 the members of this Council, by authority vested in them by the Oklahoma Environmental Quality Code (27 O.S.Supp. 1993, § 2-2-201), by roll call vote, recommended to the Environmental Quality Board that the rulemaking described above be adopted as:

X permanent [take effect after legislative review]

X emergency [temporary, to take effect upon approval by the Governor because of time; and/or special reason: _____]

This Council has considered the proposed rulemaking and comments about it and determined, to the best of its knowledge, that all applicable requirements of the Oklahoma Administrative Procedures Act have been followed.

This Council authorizes the Department to prepare this recommended rulemaking for the Board, making any changes approved by the Council, correcting typographical, grammatical and reference errors, and formatting them as required by the Office of Administrative Rules. This is to be done with the understanding that such changes shall neither alter the sense of what this Council recommends nor invalidate this recommendation.

Respectfully,

Chair or Designee

REGULAR MEETING AGENDA
DEPARTMENT OF ENVIRONMENTAL QUALITY
OKLAHOMA ENVIRONMENTAL QUALITY BOARD

DRAFT

A Public Meeting: 9:30 a.m., Tuesday, September 15, 1998
Northwestern Oklahoma State University
Student Center, Ranger Room
709 Oklahoma Boulevard
Alva, Oklahoma

1. Call to Order - Herschel Roberts
2. Roll Call - Lynda Finch
3. Approval of Minutes of the June 9, 1998 Regular Meeting

4. **OAC 252:200 and 205 Hazardous Waste Management Rules:**

This proposal primarily involves the revocation of current chapter 200 and its replacement with new chapter 205. This rewrite of the state hazardous waste management rules is part of the DEQ's effort to simplify and streamline its rules. The rewrite is not intended to change the requirements of the rules, but to make them clearer and more concise. Due to extensive reworking of the language and rearrangement of the text, the DEQ believes it is more understandable and straightforward to revoke Chapter 200 in its entirety and replace it with a new chapter, Chapter 205, than to amend Chapter 200.

Additionally, the federal Land Disposal Restrictions Phase IV rule, published May 26, 1998, would be added to the list of federal hazardous waste rules which the DEQ adopts by reference.

These changes were recommended by the Hazardous Waste Management Advisory Council at their meeting on August 11, 1998.

- A. Presentation – Mary Jo Reinhart, Hazardous Waste Council Vice-Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote for emergency adoption

5. **OAC 252:100 Air Pollution Control Rules:**

A new Subchapter 4, New Source Performance Standards, is proposed for the purpose of establishing state standards for certain new or modified facilities in accordance with the authority delegated by the EPA under section 111(c) of the federal Clean Air Act.

The addition of Subchapter 47, Control of Emissions from Existing Municipal Solid Waste Landfills, is proposed to establish state standards for certain defined "existing" municipal solid waste (MSW) landfills. These proposed rules will be included in Oklahoma's State 111(d) Plan and will provide the enforceable mechanism for implementing the provisions of the Emissions Guidelines for MSW landfills (40 CFR 60 Subpart Cc). Subchapter 47 incorporates by reference sections of the New Source Performance Standards for MSW landfills (40 CFR 60 Subpart WWW).

The proposed revisions to Appendices E and F mirror the revised federal ambient air quality standards for particulate matter and ozone announced in the July 18, 1997, Federal Register.

The Air Quality Advisory Council recommended the adoption of new Subchapter 4 at their meeting on June 16, 1998, and recommended the adoption of new Subchapter 47 and the revisions to Appendices E and F at their meeting on August 18, 1998.

- A. Presentation - David Branecky, Air Quality Council member
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote for ^{permanent adoption and} emergency adoption of 100-4*, permanent adoption and emergency adoption* of 100-47, and permanent adoption of amendments to Appendices E and F
6. Budget Request – Budget requests of the Department of Environmental Quality to the Governor require approval of the Board. The budget request of the DEQ for State Fiscal Year (SFY) 2000 (beginning July 1, 1999) must be submitted to the Office of State Finance by October 1, 1998. The DEQ seeks the approval of the Board for its SFY 2000 budget request.
- A. Presentation – Mark Coleman, Executive Director
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote
7. New Business (any matter not known about and which could not reasonably have been foreseen prior to the time of posting of agenda)
8. Executive Director's Report
9. Adjournment

Public Forum: The Board meets four times a year at different locations across the State to hear the views and concerns of all Oklahomans about environmental issues. This opportunity is informal, and we invite you to sign the register to speak.

Should you have a disability and need an accommodation, please notify the DEQ three days in advance at 702-7100. TDD number 232-0591.

* Specification of proposed adoption by emergency rulemaking, by permanent rulemaking, or by both, is based on the recommendations of the respective advisory councils. Adoption or amendment of rules as emergency rulemaking requires a finding by the Board that a compelling extraordinary circumstance warrants the seeking of emergency certification, so that the rules will take effect immediately upon the Governor's signature. Absent a finding and certification of emergency, rules adopted today would not become effective until May or June of 1999.

APPENDIX E. PRIMARY AMBIENT AIR QUALITY STANDARDS [REVOKED]

Primary Standards	Annual	1 Hour Max.	3 Hour Max.	8 Hour Max.	24 Hour Max.	Calendar Quarter
Sulfur (Sulfur Dioxide)	(1) 80 ug/m ³				(2) 365 ug/m ³ (0.14 ppm)	
PM-10	(3) 50 ug/m ³				150 ug/m ³	
Carbon Monoxide		(2) 40 mg/m ³		(2) 10 mg/m ³		
Photo-chemical Oxidants		(5) 235 ug/m ³ (0.12 ppm)				
Non-methane Hydrocarbons			(2) (4) (6) 160 ug/m ³ (0.24 ppm)			
Nitrogen Oxides (Nitrogen Dioxide)	(1) 100 ug/m ³ (0.05 ppm)					
Lead					1.5 ug/m ³	(7)

(1) Annual arithmetic mean.

(2) Not to be exceeded more than once per year.

(3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by Appendix K Part 50 CFR 40.

(4) Measured between 6 a.m. and 9 a.m.

(5) The standard is attained when the expected number of days per calendar year with maximum hourly average concentrations above 0.12 parts per million is equal to or less than 1, as determined by Appendix H for Part 50 of Chapter I, CFR 40.

(6) Guide only value to EPA, to be used in planning, not a Federal standard.

(7) Maximum arithmetic mean averaged over a calendar quarter.

APPENDIX E. PRIMARY AMBIENT AIR QUALITY STANDARDS [NEW]

	Sulfur Dioxide	PM-10	PM-2.5	Carbon Monoxide	Ozone	Nitrogen Dioxide	Lead
1-hr. max				40 mg/m ³ (2) 35 ppm			
3-hr. max							
8-hr. max				10 mg/m ³ (2) 9 ppm	(6) 0.08 ppm		
24-hr. max	(3) 65 ug/m ³ (2) 0.14 ppm	(4) 150 ug/m ³	(5) 55 ug/m ³				
Calendar Qtr.							(7) 1.5 ug/m ³
Annual	(1) 30 ug/m ³ (1) 0.030 ppm	(3) 50 ug/m ³	(8) 15 ug/m ³			100 ug/m ³ (1) 0.053 ppm	

- (1) Annual arithmetic mean
- (2) Not to be exceeded more than once per year
- (3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix K
- (4) The form of the standard is based on the 99th percentile of the 24-hr PM10 concentration in a year (averaged over 3 years)
- (5) The form of the standard is based on the 98th percentile of the 24-hr PM2.5 concentration in a year (averaged over 3 years)
- (6) The standard is attained when the computed 3-year average of the annual 4th highest daily max 8-hr average does not exceed 0.08 ppm
- (7) The maximum arithmetic mean averaged over a calendar quarter
- (8) Based on the 3-yr average of annual arithmetic mean PM-2.5 concentrations

APPENDIX F. SECONDARY AMBIENT AIR QUALITY STANDARDS [REVOKED]

Secondary Standards	Annual	1 Hour Max.	3 Hour Max.	8 Hour Max.	24 Hour Max.	Calendar Quarter
Sulfur Oxides (Sulfur Dioxide)			1300 ug/m ³ (0.5 ppm)			
PM-10	(3) 50 ug/m ³				150 ug/m ³	
Carbon Monoxide		(2) 40 mg/m ³ (35 ppm)		(2) 10 mg/m ³ (9 ppm)		
Photo-chemical Oxidants (Ozone)		(5) 235 ug/m ³ (0.12 ppm)				
Non-methane Hydrocarbons			(2) (4) (6) 160 ug/m ³ (0.24 ppm)			
Nitrogen Oxides (Nitrogen Dioxide)	(1) 100 ug/m ³ (0.05 ppm)					
Lead						(7) 1.5 ug/m ³

(1) Annual arithmetic mean.

(2) Not to be exceeded more than once per year.

(3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by Appendix K Part 50 CFR 40.

(4) Measured between 6 a.m. and 9 a.m.

(5) The standard is attained when the expected number of days per calendar year with maximum hourly average concentrations above 0.12 parts per million is equal to or less than 1, as determined by Appendix H for Part 50 of Chapter I, CFR 40.

(6) Guide only value to EPA, to be used in planning, not a Federal standard.

(7) Maximum arithmetic mean averaged over a calendar quarter.

APPENDIX F. SECONDARY AMBIENT AIR QUALITY STANDARDS [NEW]

	Sulfur Dioxide	PM-10	PM-2.5	Carbon Monoxide	Ozone	Nitrogen Dioxide	Lead
1-hr. max				40 mg/m ³ (2) 35 ppm			
3-hr. max	1300 ug/m ³ (1) 0.5 ppm						
8-hr. max				10 mg/m ³ (2) 9 ppm	0.08 ppm (6)		
24-hr. max		(4) 150 ug/m ³	(5) 65 ug/m ³				
Calendar Qtr.							(7) 1.5 ug/m ³
Annual		(3) 50 ug/m ³	(8) 15 ug/m ³			100 ug/m ³ (1) 0.053 ppm	

- (1) Annual arithmetic mean
- (2) Not to be exceeded more than once per year
- (3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix K
- (4) The form of the standard is based on the 99th percentile of the 24-hr PM10 concentration in a year (averaged over 3 years)
- (5) The form of the standard is based on the 98th percentile of the 24-hr PM2.5 concentration in a year (averaged over 3 years)
- (6) The standard is attained when the computed 3-year average of the annual 4th highest daily max 8-hr average does not exceed 0.08 ppm
- (7) The maximum arithmetic mean averaged over a calendar quarter
- (8) Based on the 3-yr average of annual arithmetic mean PM-2.5 concentrations

REGULAR MEETING AGENDA
DEPARTMENT OF ENVIRONMENTAL QUALITY
OKLAHOMA ENVIRONMENTAL QUALITY BOARD

A Public Meeting: 9:30 a.m., Friday, February 25, 2000
Department of Environmental Quality
707 North Robinson
Oklahoma City, Oklahoma 73102

NOTE: The business meeting of the Board will be preceded at 8:30 a.m. by a continental breakfast. No business will be conducted, but there will be opportunity for an informal interchange among attendees, particularly on matters of interest raised by individual Board members. Board members and DEQ staff will be present, and the public may attend.

1. Call to Order -- Lee Paden, Chair
2. Roll Call - Lynda Finch
3. Approval of Minutes of the November 16, 1999 Regular Meeting
4. **Election of Officers**
Election of Chair and Vice-Chair for 2000
5. **Rulemaking -- OAC 252:002 Procedures of the DEQ (Administrative Fees)**
The proposed rule relates to administrative fees. The Oklahoma Open Records Act allows an agency to charge a document copying fee, a fee for certified copies, and a reasonable fee for document searches when the search request is solely for a commercial purpose or clearly would cause an excessive disruption of the agency's essential functions. Fees must be promulgated as rules under the Administrative Procedures Act (1999 Okl.Op.Atty.Gen. 55, August 17, 1999). The proposed rule establishes a photocopy fee of \$0.25 per page, a certified copy fee of \$1.00 per document, and a document search fee of \$5.00 per one-half (1/2) hour (with the first 15 minutes free).
 - A. Presentation-- Jimmy Givens, DEQ General Counsel
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote on permanent adoption
6. **Rulemaking -- OAC 252:100 Air Pollution Control**
Four sets of changes are proposed:
 - Subchapter 5: The proposed amendments are designed to allow the agency to bill on a flexible schedule those owners and operators with sources that produce emissions. The changes also allow the fees to be based on the most recent emission data possible. The proposal clarifies that an owner or operator of a facility must report quantifiable excess emissions on the annual emission inventory, which must be submitted prior to March 1 unless an extension is granted. The proposal also establishes time frames for requests for credit based on overpayment and for challenges to the method used to calculate the facility's emissions for fee calculation purposes.
 - Subchapter 13: The proposed amendments simplify and clarify the rule as part of the agency-wide re-right/de-wrong initiative. Such changes include consolidating the general conditions and requirements for allowed open burning into a new section. Some substantive changes were made,

including adding a section on disaster relief procedures; requiring notification to the DEQ or other appropriate official for authorization to burn in some circumstances; requiring those who clear land in areas that are or have been designated nonattainment to burn their vegetation in open-pit incinerators; and prohibiting burning of off-site material in open-pit incinerators.

- Subchapters 23 and 24: The changes replace references to Subchapter 27 with references to 252:100-19-12. These changes are necessary because, based on Board action last November, the substantive requirements of Subchapter 27 will be moved to section 252:100-19-12 and Subchapter 27 will be revoked, effective June of 2000.
- Appendices E and F: The proposed amendments restore the primary and secondary ambient air quality standards to what they were prior to June 1, 1999. The 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored. The PM-2.5 standard would be revoked along with the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard.

- A. Presentation— David Branecky, Air Quality Council Member
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote(s) on permanent adoption of amendments to Subchapters 5 and 13, on emergency adoption* (only) of amendments to Subchapters 23 and 24, and on both permanent and emergency adoptions of amended Appendices E and F

7. Rulemaking— OAC 252:002 Procedures of the DEQ (Air Quality-Related)

The Department is proposing amendments to the air quality provisions of OAC 252:2-15, Environmental Permit Processing Times, to make them consistent with 252:100, Air Pollution Control. The terms "minor source(s)" and major "facility(ies)" would be changed to "minor facility(ies)" and "Part 70 source(s)", respectively.

- A. Presentation— David Branecky, Air Quality Council Member
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

8. Rulemaking— OAC 252:205 Hazardous Waste Management

Two sets of changes are proposed:

- Subchapter 3: The proposed amendment to OAC 252:205-3-1 updates the adoption by reference of federal hazardous waste regulations to July 1, 1999. Proposed revisions to 252:205-3-3 incorporate new or superseding amendments to 40 CFR contained in 64 FR 36465-36490, published July 6, 1999, which add hazardous waste lamps as a universal waste at the federal level. Corresponding changes are made in other sections.
- Subchapters 5 and 9: The proposed revisions to 252:205-5 move language from 252:205-5-5(b) to 252:205-5-3(b)(5). The amendment to 252:205-9-6 provides alternative waste characterization mechanisms for off-site hazardous waste facilities.

- A. Presentation— Jody Reinhart, Hazardous Waste Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote(s) on emergency* and permanent adoption of amendments to Subchapter 3, and on permanent adoption of amendments to Subchapters 5 and 9

9. Rulemaking -- OAC 252:220 Brownfields

The proposed language is the result of recent legislation. It states the criteria by which the DEQ will verify loan application eligibility of Brownfields sites for loans from the Wastewater Facility Construction Revolving Loan Account and other state funding sources.

- A. Presentation – Jody Reinhart, Hazardous Waste Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote(s) on emergency* and permanent adoption

10. Rulemaking -- OAC 252:615 and 616 Industrial Wastewater Systems

Chapter 615 has been reviewed as part of the "re-right/de-wrong" process of simplifying DEQ rules. Because so many changes were made, it is proposed that Chapter 615 be revoked and a new Chapter 616 created to replace it. Language has been simplified and clarified and rules deemed unenforceable have been removed.

- A. Presentation – Robert Johnston, Water Quality Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

11. Rulemaking -- OAC 252:630 and 631 Public Water Supply Operation

Chapter 630 has been reviewed as part of the "re-right/de-wrong" process of simplifying DEQ rules. Because so many changes were made, it is proposed that Chapter 630 be revoked and a new Chapter 631 created to replace it. Language has been simplified and clarified and unenforceable rules have been removed. The most recent federal requirements for maintaining primacy over the Safe Drinking Water Act program have been included.

- A. Presentation – Robert Johnston, Water Quality Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

12. Rulemaking -- OAC 252:641 On-Site Sewage Disposal Systems

The proposed rule amendments eliminate the document search fee, combination fee (soil percolation test and final inspection or existing system evaluation report) and residential plat review fees, and reduce the soil percolation/soil profile fee, final inspection fee, existing system evaluation fee and the certified installer final inspection fee.

- A. Presentation – Gary Collins, Director, DEQ Environmental Complaints and Local Services Division
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

13. **Rulemaking -- OAC 252:700 and 710 Waterworks/Wastewater Works Operator Certification**
Chapter 700 has been reviewed as part of the "re-right/de-wrong" process of simplifying DEQ rules. Because so many changes were made, it is proposed that Chapter 700 be revoked and a new chapter 710 created to replace it. New subchapters have been created; many rules have been simplified and/or broken into several shorter rules for clarity; and statutory citations have been updated. The rules for landfill operator certification are being revoked as inappropriate to these chapters.
- A. Presentation-- Rick Stebbens, Waterworks and Wastewater Works Council Chair
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote on permanent adoption
14. **Rulemaking -- OAC 252:002 Procedures of the DEQ (Operator Certification-Related)**
The DEQ proposes that Section 252:2-15-49 be revoked as part of the "re-right/de-wrong" rules simplification process. This revocation does not affect the operator certification program or the proposed rules in Chapter 710. The basic Tier I permitting process was designed for environmental permits where notice was given to landowners. The DEQ believes that personal licensure should not have been included in the Tier categories.
- A. Presentation-- Rick Stebbens, Waterworks and Wastewater Works Council Chair
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote on permanent adoption
15. New Business (any matter not known about and which could not reasonably have been foreseen prior to the time of posting of agenda)
16. Executive Director's Report
17. Adjournment

Public Forum: The Board meets four times a year at different locations across the State to hear the views and concerns of all Oklahomans about environmental issues. This opportunity is informal, and we invite you to sign the register to speak. The forum will also include a short presentation from the DEQ Water Quality Division about State Water Quality Standards implementation, the State "303(d)" (impaired waters) list, and related issues.

Should you have a disability and need an accommodation, please notify the DEQ three days in advance at 702-7100.

* Specification of proposed adoption by emergency rulemaking, by permanent rulemaking, or by both, is based on the recommendations of the respective advisory councils. Adoption or amendment of rules as emergency rulemaking requires a finding by the Board that a compelling extraordinary circumstance warrants the seeking of emergency certification, so that the rules will take effect immediately upon the Governor's signature. Absent a finding and certification of emergency, rules adopted today will not become effective until on or about June 1st.

APPENDIX E. PRIMARY AMBIENT AIR QUALITY STANDARDS [REVOKED]

	Sulfur Dioxide	PM-10	PM-2.5	Carbon Monoxide	Ozone	Nitrogen Dioxide	Lead
1-hr. max				40 mg/m ³ (2) 35 ppm			
3-hr. max							
8-hr. max				10 mg/m ³ (2) 9 ppm	(6) 0.08 ppm		
24-hr. max	365 ug/m ³ (2) 0.14 ppm	(4) 150 ug/m ³	(5) 65 ug/m ³				
Calendar Qtr.							(7) 1.5 ug/m ³
Annual	80 ug/m ³ (1) 0.030 ppm	(3) 50 ug/m ³	(8) 15 ug/m ³			100 ug/m ³ (1) 0.053 ppm	

- (1) Annual arithmetic mean
- (2) Not to be exceeded more than once per year
- (3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix K
- (4) The form of the standard is based on the 99th percentile of the 24-hr PM10 concentration in a year (averaged over 3 years)
- (5) The form of the standard is based on the 98th percentile of the 24-hr PM2.5 concentration in a year (averaged over 3 years)
- (6) The standard is attained when the computed 3-year average of the annual 4th highest daily max 8-hr average does not exceed 0.08 ppm
- (7) The maximum arithmetic mean averaged over a calendar quarter
- (8) Based on the 3-yr average of annual arithmetic mean PM-2.5 concentrations

APPENDIX E. PRIMARY AMBIENT AIR QUALITY STANDARDS [NEW]

	Sulfur Dioxide	PM-10	Carbon Monoxide	Ozone	Nitrogen Dioxide	Lead
1-hr. max			40 mg/m ³ (2) 35 ppm	235 ug/m ³ (4) 0.12 ppm		
8-hr. max			10 mg/m ³ (2) 9 ppm			
24-hr. max	365 ug/m ³ (2) 0.14 ppm	150 ug/m ³				
Calendar Qtr.						(5) 1.5 ug/m ³
Annual	80 ug/m ³ (1) 0.030 ppm	(3) 50 ug/m ³			100 ug/m ³ (1) 0.053 ppm	

(1) Annual arithmetic mean

(2) Not to be exceeded more than once per year

(3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix K.

(4) The standard is attained when the expected number of days per calendar year with maximum hourly average concentrations above 0.12 ppm is equal to or less than 1, as determined by 40 CFR 50, Appendix H.

(5) Maximum arithmetic mean averaged over a calendar quarter

APPENDIX F. SECONDARY AMBIENT AIR QUALITY STANDARDS [REVOKED]

	Sulfur Dioxide	PM-10	PM-2.5	Carbon Monoxide	Ozone	Nitrogen Dioxide	Lead
1-hr. max				40 mg/m ³ (2) 35 ppm			
3-hr. max	1300 ug/m ³ (2) 0.5 ppm						
8-hr. max				10 mg/m ³ (2) 9 ppm	(6) 0.08 ppm		
24-hr. max		(4) 150 ug/m ³	(5) 65 ug/m ³				
Calendar Qtr.							(7) 1.5 ug/m ³
Annual		(3) 50 ug/m ³	(8) 15 ug/m ³			100 ug/m ³ (1) 0.053 ppm	

- (1) Annual arithmetic mean
- (2) Not to be exceeded more than once per year
- (3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix K
- (4) The form of the standard is based on the 99th percentile of the 24-hr PM10 concentration in a year (averaged over 3 years)
- (5) The form of the standard is based on the 98th percentile of the 24-hr PM2.5 concentration in a year (averaged over 3 years)
- (6) The standard is attained when the computed 3-year average of the annual 4th highest daily max 8-hr average does not exceed 0.08 ppm
- (7) The maximum arithmetic mean averaged over a calendar quarter
- (8) Based on the 3-yr average of annual arithmetic mean PM-2.5 concentrations

APPENDIX F. SECONDARY AMBIENT AIR QUALITY STANDARDS [NEW]

	Sulfur Dioxide	PM-10	Carbon Monoxide	Ozone	Nitrogen Dioxide	Lead
1-hr. max			40 mg/m ³ (2) 35 ppm	235 ug/m ³ (4) 0.12 ppm		
3-hr. max	1300 ug/m ³ (2) 0.5 ppm					
8-hr. max			10 mg/m ³ (2) 9 ppm			
24-hr. max		150 ug/m ³				
Calendar Qtr.						(5) 1.5 ug/m ³
Annual		(3) 50 ug/m ³			100 ug/m ³ (1) 0.053 ppm	

- (1) Annual arithmetic mean
- (2) Not to be exceeded more than once per year
- (3) The standard is attained when the expected arithmetic mean concentration is equal to or less than the numerical standard as determined by 40 CFR 50, Appendix K.
- (4) The standard is attained when the expected number of days per calendar year with maximum hourly average concentrations above 0.12 ppm is equal to or less than 1, as determined by 40 CFR 50, Appendix H.
- (5) Maximum arithmetic mean averaged over a calendar quarter

Additional Comments

CHAPTER 100. AIR POLLUTION CONTROL
APPENDIX E PRIMARY AMBIENT AIR QUALITY STANDARDS
APPENDIX F SECONDARY AMBIENT AIR QUALITY STANDARDS

EXECUTIVE SUMMARY: The proposed revisions to Appendices E and F will mirror the revised federal national ambient air quality standards for particulate matter (PM) and ozone announced by EPA in the July 18, 1997, Federal Register. The EPA revised the primary (health-based) PM standards by adding a new annual PM-2.5 standards set at 15 micrograms per cubic meter ug/m³ and a new 24-hr PM-2.5 standard set at 65 ug/m³. EPA is retaining the current annual PM-10 standard of 50 ug/m³ and changing the form of the PM-10 24-hr standard. The secondary (welfare-based) standards are also being adjusted to make them identical to the primary standards. Also, the previous 1-hr primary ozone standard is being phased out and replaced with a new 8-hr concentration based standard of 0.08 ppm. The 3-yr average of the 4th highest daily maximum 8-hr ozone concentrations is used to determine compliance with the standard. The EPA also replaced the previous secondary standards with a standard identical to the new primary standard.

DIFFERENCES FROM ANALOGOUS FEDERAL RULES: None.

ENVIRONMENTAL BENEFIT STATEMENT: Not required because these rules are not more stringent than corresponding federal rules.

SUMMARY OF COMMENTS AND RESPONSES:

COMMENT: A Council member suggested removing VOC's from both Appendices E and F, since the value was only a guide and not a standard.

RESPONSE: Staff agreed and deleted the VOC's.

COMMENT: EPA commented that the primary PM-2.5 annual standard was incorrectly identified. They noted it was not necessary to take the 98th percentile for the three years (averaged) monitored data and that a separate footnote was needed to be provided for the annual PM-2.5 standard.

RESPONSE: Staff agreed and made the correction.

1 PROCEEDINGS

2 MR. DYER: The next item on the
3 Hearing Agenda, Item Number 7. Ladies and
4 gentlemen, this hearing is convened by the
5 Air Quality Council in compliance with the
6 Oklahoma Administrative Procedures Act,
7 Title 40 of the Code of Federal Regulations
8 Part 51, as well as the Authority of Title
9 27A.

10 This hearing was advertised in the
11 Oklahoma Register for the purpose of
12 receiving comments pertaining to the
13 proposed new rule, OAC 252:100, Appendix E,
14 Primary Ambient Air Quality Standards and
15 Appendix F, Secondary Ambient Air Quality
16 Standards. If you wish to make a
17 statement, please complete the form at the
18 registration table and you will be called
19 upon at the appropriate time.

20 At this time, I will call upon Ms.
21 Michelle Martinez to give the staff's
22 position on this proposed rule.

23 MS. MARTINEZ: Members of the
24 Council, ladies and gentlemen, the proposed
25 revisions to Appendices E and F will be
26 identified -- identical to the revised
27 federal national ambient air quality
28 standards or NAAQS for particulate matter
29 and ozone announced by EPA in the July 18,
30 1997 Federal Register.

1 The EPA revised the primary health
2 based PM standards by adding a new annual
3 PM-2.5 standard set at 15 micrograms per
4 cubic meter, and a new 24-hour PM-2.5
5 standard set at 65 micrograms per cubic
6 meter. EPA is retaining the current annual
7 PM-10 standard of 50 micrograms per cubic
8 meter and changing the form of the PM-10
9 24-hour standard.

10 The secondary welfare based
11 standards are also being adjusted to make
12 them identical to the primary standards.

13 The previous 1 hour primary ozone
14 standard is being phased out and replaced
15 with a new 8 hour standard to protect
16 against longer exposure periods. The new 8
17 hour standard is set at 0.08 parts per
18 million. The 3 year average of the annual
19 4th highest daily maximum 8 hour ozone
20 concentration is used to determine
21 compliance with the standard. EPA also
22 replaces the previous secondary ozone
23 standards with a standard identical to the
24 new primary standard.

25 If you will note at the top of the
26 Appendices you will see the words revoked
27 and new. The Secretary of State's Rules on
28 Rulemaking do not allow us to amend an
29 appendix. So, it must be first revoked and
30 then replaced with the new version.

1451

1 After receiving staff comments, we
2 have decided to leave in the micrograms per
3 cubic meter units along with the parts per
4 million units as they were in the original
5 Appendices. This decision was based on the
6 fact that modeling is done in micrograms
7 per cubic meter.

8 After receiving staff comments in
9 the briefing this morning, staff agrees
10 with the request to revoke VOC's on both
11 the Appendices E and F, since these are
12 only guidance values and not standards.

13 Staff will also be revoking the
14 number 8 and number 3 footnotes, which
15 apply only to the VOC's. Also, last
16 Friday, we received comments from the EPA,
17 which I would like to enter into the
18 record. These comments brought to our
19 attention that the primary PM-2.5 annual
20 standard was incorrectly identified. This
21 has been corrected by adding a footnote to
22 both -- to both Appendices E and F. And
23 the new footnote number 8 will read, based
24 on the 3 year average of the annual
25 arithmetic mean, PM-2.5 concentration.

26 This afternoon staff requests that the
27 Council to recommend to the DEQ Board the
28 proposed revisions to Appendices E and F,
29 as a permanent rule.

30 MR. DYKE: Any questions of Ms.

5

1 Martinez from the Council? Comments? Any
2 questions or comments from the audience?
3 Seeing no --

4 MR. KILPATRICK: I have a
5 question.

6 MS. MARTINEZ: Okay.

7 MR. KILPATRICK: Read that new
8 note 8 again. Does it include -- do you
9 have to include the 98th percentile?

10 MS. MARTINEZ: No, not on the
11 annual. That's only for the 24 hour PM-
12 2.5.

13 MR. KILPATRICK: Okay.

14 MS. MARTINEZ: I believe that's
15 where the mistake was made the first time.

16 MR. KILPATRICK: Okay.

17 MR. DYKE: Any additional
18 questions or comments of Ms. Martinez on
19 this matter? Seeing none --

20 MR. CHAIRMAN: Do you recommend
21 just a permanent rule be passed, no
22 emergency?

23 MS. MARTINEZ: Just as a
24 permanent rule only, not as emergency.

25 MR. CHAIRMAN: Okay. I'll
26 entertain a motion to recommend this to the
27 DEQ Board as a permanent rule.

28 MR. KILPATRICK: I'll move that
29 we revoke the existing Appendix E and
30 Appendix F, and replace them with the new

6

1 Appendix E and Appendix F as permanent
2 rules.

3 MR. BRANECKY: With the changes
4 as mentioned?

5 MR. KILPATRICK: With the changes
6 as mentioned.

7 MR. BRANECKY: I'll second that.

8 MR. CHAIRMAN: I've got a motion
9 and a second. Any further discussion or
10 questions? If not, Myrna, call the roll.

11 MS. BRUCE: Ms. Myers?

12 MS. MYERS: Aye.

13 MS. BRUCE: Dr. Gross?

14 DR. GROSS: Aye.

15 MS. BRUCE: Mr. Kilpatrick?

16 MR. KILPATRICK: Aye.

17 MS. BRUCE: Mr. Wilson?

18 MR. WILSON: Aye.

19 MS. BRUCE: Mr. Branecky?

20 MR. BRANECKY: Aye.

21 MS. BRUCE: Ms. Slagell?

22 MS. SLAGELL: Aye.

23 MS. BRUCE: Mr. Breisch?

24 MR. BREISCH: Aye.

CHAPTER 100. AIR POLLUTION CONTROL
APPENDIX E. PRIMARY AMBIENT AIR QUALITY STANDARDS
APPENDIX F. SECONDARY AMBIENT AIR QUALITY STANDARDS

EXECUTIVE SUMMARY: The proposed amendments to Appendices E and F would restore the primary and secondary ambient air quality standards to what they were prior to June 1, 1999. The 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored. The PM-2.5 standard would be revoked along with the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard.

DIFFERENCES FROM ANALOGOUS FEDERAL RULES: None.

ENVIRONMENTAL BENEFIT STATEMENT: Not required because these rules are not more stringent than corresponding federal rules.

SUMMARY OF COMMENTS AND RESPONSES:

COMMENT: Written comments were received from EPA Region 6 supporting the proposed amendments to Appendices E and F.

COMMENT: A comment was made by the Chairman of the Environmental Quality Board, Lee Paden, during the Council meeting in support of the proposed amendments to Appendices E and F.

COMMENT: Hillary Kitz, assistant to Mayor Susan Savage of Tulsa, also commented in support of the amendments.

RESPONSE: Staff Concurs.

1 a resolution to Mary Beth.
 2 Ms. Slagell was appointed to the
 3 Oklahoma Air Quality Council in June of
 4 1993 and Ms. Maribeth Slagell was a
 5 dedicated Member to the Air Quality
 6 Council. And Ms. Maribeth Slagell played
 7 an active part to the development of the
 8 rules and regulations that were passed by
 9 the Air Quality Council to promote clean
 10 air in Oklahoma. And during her tenure, as
 11 a Member of the Council, this Body has met
 12 with legislative charter -- met the
 13 legislative charter, to obtain and preserve
 14 the clean air in Oklahoma. Now, be it
 15 resolved, that the Members of the Oklahoma
 16 Air Quality Council recognize and thank Ms.
 17 Maribeth Slagell for her years of service
 18 toward making Oklahoma a better place.
 19 (Whereupon, there was applaud from the
 20 audience for Ms. Slagell.)
 21 MR. BREISCH: That being done,
 22 one more thing before we go to the next
 23 item. We do have a new Member of the
 24 Council, Mr. Rick Treeman. He is a
 25 graduate of Oklahoma State University and

PROCEEDINGS

1
 2 MR. BREISCH: We'll call our
 3 meeting to order. First of all, Myrna,
 4 will you call the roll?
 5 MS. BRUCE: Mr. Wilson.
 6 MR. WILSON: Here.
 7 MS. BRUCE: Mr. Branecky.
 8 MR. BRANECKY: Here.
 9 MS. BRUCE: Mr. Treeman.
 10 MR. TREEMAN: Here.
 11 MS. BRUCE: Mr. Fallon.
 12 MR. FALLON: Here.
 13 MS. BRUCE: Dr. Grosz.
 14 DR. GROSZ: Here.
 15 MS. BRUCE: Mr. Breisch.
 16 MR. BREISCH: Here.
 17 MS. BRUCE: For the record,
 18 absent are Mr. Kilpatrick, Dr. Canter, and
 19 Ms. Myers.
 20 MR. BREISCH: Well, there is
 21 times that everybody, I guess, gets fed up
 22 with our Council and just wants to leave
 23 us. I don't think this is necessarily the
 24 case and we'll miss this one very much.
 25 Maribeth, where are you? I'd like to read

1 has worked in the safety of the
 2 environmental field for almost 20 years,
 3 both as a field consultant and as an
 4 employee of Johnson Enterprise Inc. He
 5 currently serves as Safety and Loss
 6 Prevention and Environmental Manager for
 7 Johnson Enterprises Inc. He resides in
 8 Enid, Oklahoma. I believe his background
 9 and experience in the grain and feed
 10 industry should make him a valued member of
 11 the Council. And of course, not only is he
 12 recognized in that field but he has worked
 13 in other environmental issues. And we
 14 welcome you, Rick, and we look forward to
 15 you helping us here on the Council.
 16 MR. TREEMAN: Thank you.
 17 MR. BREISCH: Now we will go to
 18 the Minutes. I need a motion to approve
 19 the Minutes.
 20 MR. FALLON: So moved.
 21 DR. GROSZ: Second.
 22 MR. BREISCH: I've got a motion
 23 and second. Any corrections, comments?
 24 Myrna, call the roll.
 25 MS. BRUCE: Mr. Wilson.

1 MR. WILSON: Aye.
 2 MS. BRUCE: Mr. Branecky.
 3 MR. BRANECKY: Yes.
 4 MS. BRUCE: Mr. Treeman.
 5 MR. TREEMAN: Aye.
 6 MS. BRUCE: Mr. Fallon.
 7 MR. FALLON: Yes.
 8 MS. BRUCE: Dr. Grosz.
 9 DR. GROSZ: Yes.
 10 MS. BRUCE: Mr. Breisch.
 11 MR. BREISCH: Aye. At the last
 12 meeting we talked a little bit about next
 13 year's meeting schedule and that was to be
 14 brought up again because we want to change
 15 the day of the week.
 16 MR. TERRILL: Yes. What we did
 17 was, starting next year, we're going to
 18 move our meeting date from Tuesday to
 19 Wednesday. And so the dates we have
 20 proposed -- let me talk a little bit about
 21 the dates we've proposed. The consensus
 22 was that we wanted to have some of these
 23 meetings in places other than Oklahoma City
 24 and Tulsa. So what we proposed was to have
 25 a meeting on April the 19th in Lawton, and

1 twice, because they are one of the two big
 2 metropolitan areas in Oklahoma. They do
 3 have some very unique issues. And this
 4 would just be -- if we decide to do that,
 5 it would just be for next year alone and it
 6 would be through the rewrite/dewrong
 7 process. But I'm not objectionable at all
 8 if the Council would prefer to change one
 9 of the out of town meetings, either Lawton
 10 or Ponca City -- although I wouldn't
 11 recommend changing Lawton, because I think
 12 we need to go down there and have a meeting
 13 where we talk about their ozone situation.
 14 We can change one of the Oklahoma City
 15 meetings back to Tulsa or we can leave it
 16 as it is. The only other change that
 17 I do need to make, we've got a meeting
 18 scheduled on Wednesday, June 21st in Tulsa.
 19 We need to move that to the 14th, June the
 20 14th, because we've got an Environmental
 21 Quality Board meeting on the 20th, I
 22 believe it is, and we may want to take some
 23 of our rules to be passed to the Board
 24 meeting then. So we would like to move
 25 that back so we can do that. So it's just

1 then a meeting on August the 16th in Ponca
 2 City. But we're going through this
 3 rewrite/dewrong, which really is -- we're
 4 under the gun. We've got to get it done
 5 before December of 2000 -- yes, December of
 6 2000. So what I did, and this was just me
 7 doing it, so we may want to change one of
 8 these dates, but I've got us meeting the
 9 last two meetings in Oklahoma City as
 10 opposed to going back to Tulsa. So we only
 11 go to Tulsa one time next year. And the
 12 reason I've got us in Oklahoma City the
 13 last two times is because I figure that
 14 towards the end of the year, we're going to
 15 have a lot of rules that we're going to try
 16 to get through this rewrite/dewrong
 17 process, and we may need to make some
 18 changes here in the building to get these
 19 things through. So it's kind of the
 20 pleasure of the Council on what we want to
 21 do here. We may end up having to have some
 22 extra meetings anyway. So if we want to
 23 change one of those meetings from Oklahoma
 24 City back to Tulsa -- because I'm a little
 25 bit concerned that we're not going to Tulsa

1 kind of up to you all what we want to do,
 2 but this is kind of my first cut on when
 3 we're meeting next year.
 4 MR. BREISCH: The June meeting?
 5 MR. TERRILL: Yes. The June
 6 meeting would need to be moved from June
 7 21st to June the 14th. Yes, that's a
 8 Wednesday, as well. All these meeting
 9 dates are on Wednesday.
 10 MR. BREISCH: Eddie, I think
 11 we've got enough issues in Tulsa and
 12 interests in Tulsa to have a couple of
 13 meetings there. And I'm speaking for
 14 myself, being from the area, I think we
 15 ought to have at least two meetings.
 16 MR. TERRILL: We can change the
 17 October 18th meeting to Tulsa. That was
 18 the one that was Tulsa, originally, and
 19 that's not a problem. But the only thing
 20 that I wanted the Council to be aware of is
 21 that we may have to have some extra
 22 meetings in order to get this
 23 rewrite/dewrong thing done. I think we'll
 24 know by the April, and certainly the June
 25 meeting, if we're on schedule or not, and

1 whether or not we're going to have to
2 schedule these things. But that's fine, we
3 can move the October 18th meeting back to
4 Tulsa and that would be just fine with us.

5 MR. BREISCH: Well, I'm not
6 suggesting that necessarily. And although
7 I think it's important to meet in Ponca
8 City, I would opt to change -- either
9 change Ponca City with Tulsa -- maybe not
10 two consecutive meetings, but the next
11 meeting with the Oklahoma City meetings.

12 MR. FALLON: What about moving
13 the February meeting to Tulsa, since we're
14 having this one in Oklahoma City? Normally
15 they've been staggered.

16 MR. TERRILL: That's fine, too.

17 MR. BREISCH: Yes, that's all
18 right.

19 MR. TERRILL: It doesn't make any
20 difference to us. That would be fine.

21 MR. BREISCH: Keep Ponca City on
22 the agenda.

23 MR. FALLON: I certainly would be
24 in favor of it. First of all, I'm in favor
25 of Wednesdays, and I'm in favor of the

1 remote area meetings, Ponca City and
2 Lawton. I probably drive as far as anybody
3 and I certainly have no objection to going
4 to either Ponca City or Tulsa.

5 MR. TERRILL: One thing we do
6 want to -- we were asked to mention was
7 that for the year 2001, that Ada is already
8 on the docket for one of the out of town
9 meetings. They have requested one. They
10 have a real good environmental science
11 program there at the university and we're
12 going to try to do something in conjunction
13 with them in 2001. So we need to keep that
14 in mind, if we want to try to bump anybody,
15 we've already got one of those dates -- one
16 of the two dates for 2001 taken. So we can
17 move the 18th -- we can switch the 18th
18 meeting. Meet in Tulsa on the 16th and
19 that would give us the last two meetings
20 here in Oklahoma City. That would
21 accomplish the same thing.

22 MR. FALLON: It would accomplish
23 the same thing.

24 MR. TERRILL: That's a good
25 suggestion.

1 MR. FALLON: If we take the
2 February meeting in Tulsa -- and they
3 normally have been staggered anyway, that
4 keeps the rotation much the same and still
5 accomplishes your point of having the last
6 two here where the records are.

7 MR. TERRILL: That's a good
8 point. We can do that. What that would
9 mean is, we would meet February the 16th on
10 a Wednesday in Tulsa, April the 19th on a
11 Wednesday in Lawton, June the 14th on a
12 Wednesday in Tulsa, August 16th on a
13 Wednesday in Ponca City, and then October
14 18th and December 20th, both on Wednesday,
15 are here in Oklahoma City.

16 MR. FALLON: Do you have a
17 location in Tulsa as yet? You were
18 seeking a new one?

19 MR. TERRILL: We are trying to
20 work out a deal with the law school. Their
21 new court building -- or their new
22 courtroom is being redone and we would like
23 to do it there and maybe they could host
24 it. We don't have to have those exact
25 locations decided, but that's kind of what

1 we're looking at.

2 MR. FALLON: I have confidence
3 you'll cover it.

4 MR. DYKE: I suggest that we look
5 at that last meeting very closely. That's
6 pretty late in December. I just throw that
7 out because we had a little bit of a
8 problem getting a quorum.

9 MR. FALLON: The 13th would
10 probably be a better date.

11 MR. DYKE: It's available.

12 MR. FALLON: It's ahead of
13 Christmas by more than five days.

14 MR. TERRILL: So we would move
15 our December meeting to December 13th.
16 That would give us 28 days notice in the --
17 for our publication. We've done that in
18 the past. Barbara, do you see a problem
19 with that?

20 MS. HOFFMAN: No, we just don't
21 want to get --

22 MR. TERRILL: Much farther --
23 yes.

24 MS. HOFFMAN: -- too short of
25 time.

1 MR. BREISCH: How it will read
 2 is: Wednesday, February 16th, in Tulsa;
 3 Wednesday, April 19th in Lawton; Wednesday,
 4 June 14th, in Tulsa; Wednesday August 16th,
 5 in Ponca City; Wednesday, October 18th,
 6 Oklahoma City; Wednesday, December 13th,
 7 Oklahoma City. Is that right? I need a
 8 motion.

9 MR. FALLON: I so move.
 10 MR. BRANECKY: Second.
 11 MR. BREISCH: I've got a motion
 12 and a second. Any further discussion?
 13 Myrna, call the roll.

14 MS. BRUCE: Mr. Wilson.
 15 MR. WILSON: Aye.
 16 MS. BRUCE: Mr. Branecky.
 17 MR. BRANECKY: Yes.
 18 MS. BRUCE: Mr. Treeman.
 19 MR. TREEMAN: Yes.
 20 MS. BRUCE: Mr. Fallon.
 21 MR. FALLON: Yes.
 22 MS. BRUCE: Dr. Grosz.
 23 DR. GROSZ: Yes.
 24 MS. BRUCE: Mr. Breisch.
 25 MR. BREISCH: Yes. At this time,

1 called on at the appropriate time.
 2 We will begin by calling on Ms.
 3 Michelle Martinez to address the matter
 4 marked as Agenda Item Number 6A, OAC
 5 252:100, Appendices E and F. Michelle.
 6 MS. MARTINEZ: Members of the
 7 Council, ladies and gentlemen, on July
 8 18th, 1997, the EPA announced new National
 9 Ambient Air Quality Standards (NAAQS) for
 10 particulate matter and ozone. The EPA
 11 revised the primary PM standards by adding
 12 a new annual PM-2.5 standard set at 15
 13 micrograms per cubic meter and a new 24-
 14 hour PM-2.5 standard set at 65 micrograms
 15 per cubic meter. EPA retained the annual
 16 PM-10 standard of 50 micrograms per cubic
 17 meter and changed the form of the PM-10 24-
 18 hour standard.

19 Also, the EPA decided to phase out
 20 the previous 1-hour primary ozone standard
 21 and replace it with a new 8-hour standard
 22 of .08 parts per million, to protect
 23 against longer exposure periods.
 24 Oklahoma had demonstrated compliance
 25 with the 1-hour standard, so EPA revoked

1 we will go into the Public Rulemaking
 2 Hearings. Eddie Terrill will act as our
 3 Protocol Officer.
 4 MR. TERRILL: David is going to
 5 do that.
 6 MR. BREISCH: I'm sorry. David.
 7 MR. DYKE: Good morning. My name
 8 is David Dyke. I'm the Assistant Director
 9 of the Air Quality Division. And as such,
 10 I will act as Protocol Officer for today's
 11 hearings.

12 These hearings will be convened by
 13 the Air Quality Council in compliance with
 14 the Oklahoma Administrative Procedures Act,
 15 in Title 40 of the Code of Federal
 16 Regulations, Part 51, as well as the
 17 Authority of Title 27 of the Oklahoma
 18 Statutes, Section 2-2-201 through 2-5-118.

19 These hearings were advertised in
 20 the Oklahoma Register for the purpose of
 21 receiving comments pertaining to the
 22 proposed OAC Title 252, Chapter 100 Rules
 23 as listed on the Agenda. If you wish to
 24 make a statement, please complete the form
 25 at the registration table. You will be

1 the 1-hour standard for the entire state.
 2 The secondary standards were also adjusted
 3 to make them identical to the new and
 4 revised primary standards.
 5 The Environmental Quality Board
 6 approved adoption of new Appendices E and F
 7 containing the new revised standards on
 8 September 15, 1998. The new revised
 9 standards for ozone and PM became effective
 10 on June 1, 1999.

11 A recent court decision has called
 12 the new revised standards into question.
 13 In response to challenges filed by industry
 14 and others, a three judge panel of the
 15 United States Court of Appeals for the
 16 District of Columbia issued a split
 17 decision on May 14, 1999. The Court held
 18 that the Clean Air Act, as applied in
 19 setting the new NAAQS for ozone and PM, is
 20 unconstitutional because it was an improper
 21 delegation of legislative authority to the
 22 EPA. Specifically, the Court's decision
 23 remanded but did not vacate the 8-hour
 24 ozone standard, holding that it cannot be
 25 enforced; remanded but did not vacate the

1 PM-2.5 standards; remanded and vacated the
2 revised form of the PM-10 standards.

3 The Court of Appeals recently
4 announced that it will not reconsider the
5 panel's decision, and so the EPA has taken
6 the request for the rehearing to the
7 Supreme Court and are still waiting to
8 hear.

9 The proposed amendments to E and F
10 would restore the primary and secondary
11 ambient air quality standards to what they
12 were prior to June 1, 1999. The 8-hour
13 ozone standard of .08 parts per million
14 would be revoked, and the 1-hour standard
15 of .12 parts per million restored. The PM-
16 2.5 standard would be revoked along with
17 the revised form of the PM-10 standard and
18 replaced with the previous form of the PM-
19 10 standard.

20 Although the 8-hour ozone standard
21 and the PM-2.5 standard were remanded and
22 not vacated, the DEQ has determined that it
23 is best to revoke them along with the form
24 of the PM-10 standard because the federal
25 court decision rendered them unenforceable.

1 is that right? Is there any danger for us
2 having this on the books for six months
3 with Oklahoma City and Tulsa being above
4 this standard?

5 MS. MARTINEZ: So you are asking
6 why we're not doing an emergency?

7 MR. BRANECKY: Yes. Is there any
8 benefit to getting it done quickly? What
9 I'm saying, this could be -- until June,
10 we'll be held against this standard. Even
11 though the federal standard has been
12 remanded, this is an Oklahoma rule. So to
13 me, this is in effect. So it's going to be
14 in effect until June 1st. Is there any
15 danger for us, since Oklahoma City and
16 Tulsa are above that .08, of having that on
17 the books until June and not getting it on
18 sooner?

19 MS. MARTINEZ: If we tried to do
20 an emergency -- well, if we did an
21 emergency along with the permanent, it
22 really would only be in effect maybe a
23 month sooner.

24 MR. BRANECKY: Okay.

25 MS. MARTINEZ: So I don't think

1 The only comment received was from
2 the EPA by fax on December 10, 1999, which
3 I would like to enter into the record. The
4 comment stated, quote, "Your diligence in
5 keeping regulations current with regard to
6 the air quality standards is commendable.
7 Updating Appendices E and F is timely and
8 appropriate."

9 Even though this is the first time
10 these amendments have been brought to
11 public hearing, staff suggests that the
12 proposed Appendices E and F be recommended
13 for permanent adoption by the Board.

14 MR. DYKE: Questions from the
15 Council of Ms. Martinez.

16 MR. BRANECKY: I've got a
17 question. Is there any danger, if you ask
18 for a permanent -- be adopted as permanent,
19 it's not effective until June 1, 2000.

20 Since these are -- this is an Oklahoma
21 standard, we're not tied in any way to the
22 federal standards. Even though the federal
23 standards have been remanded, since we're
24 not referencing that federal standard in
25 this rule -- this is in effect in Oklahoma;

1 the time -- I think basically that was our
2 reasoning behind it, was the time was
3 basically going to be the same.

4 MR. BRANECKY: Okay.

5 MR. THOMAS: I'm Scott Thomas of
6 staff and also, these standards will be --
7 EPA has said they are unenforceable, so I
8 don't see any danger. It would be very
9 unlikely in that one month period of time
10 difference, with it being unenforceable.

11 MR. BRANECKY: I guess maybe this
12 is a legal question. If you can answer it
13 -- maybe it's Barbara's question. Since we
14 adopted this as .08 parts per million as
15 the Oklahoma standard, and we in no way
16 referenced the federal standard, they are
17 not tied to each other, are they?

18 MS. HOFFMAN: Right.

19 MR. BRANECKY: So we're standing
20 alone on the .08?

21 MS. HOFFMAN: Right.

22 MR. BRANECKY: So in Oklahoma,
23 the .08 is still in effect until next June?

24 MS. HOFFMAN: That's true.

25 MR. BRANECKY: So is there any

Page 22

1 risk that someone could try and force some
 2 type of action in Tulsa and Oklahoma City
 3 for being above .08 during that time
 4 period?
 5 MS. HOFFMAN: Well, I don't know
 6 what you mean by action. I think that the
 7 two main things that come out of the
 8 ambient air quality standard are permits
 9 issued and designations by EPA. Obviously,
 10 when we issue permits, we have to ensure
 11 that they are going to meet whatever
 12 standards are in effect, so that would
 13 continue to be the case that we would look
 14 at those standards until June 1st until,
 15 you know, if they are changed then.
 16 And with respect to the designation
 17 of the nonattainment area, EPA has
 18 indicated they are going to go ahead with
 19 that anyway. It doesn't matter. It's tied
 20 to their standard, not ours. And so since
 21 they promulgated the 8-hour standard for
 22 ozone, they feel compelled to go ahead and
 23 designate areas next July. But that's not
 24 even tied to our standard.
 25 MR. BREISCH: Barbara, what is

Page 23

1 the exact date difference between having an
 2 emergency versus not?
 3 MS. HOFFMAN: The emergency rule
 4 -- well, both emergency and permanent rules
 5 would go to the February, I believe, Board
 6 meeting. And after the February meeting
 7 then, because that's when Legislature is in
 8 session, the Legislature and -- or not the
 9 -- I'm sorry, forget that for a second.
 10 The Governor would have 45 days, I believe,
 11 to sign it. And I can't remember exactly
 12 what the February date is of the Board
 13 meeting -- I think it's the 25th, though.
 14 And so when we added the 45 days to
 15 February 25th, we came up with some date
 16 late in April. And so the difference
 17 between late April and June 1st, we just
 18 didn't see that there would be much
 19 benefit.
 20 MR. BREISCH: Well, if for any
 21 reason somebody wanted and requested the
 22 Governor to sign it before the 45 days, he
 23 could.
 24 MS. HOFFMAN: Yes. Our hospital
 25 and medical waste incinerator rule, he

Page 24

1 signed very quickly, just a week or two
 2 after the Board passed it. You never know.
 3 MR. BREISCH: Well, I agree with
 4 the fact that David asked that question,
 5 and I feel that we probably want to hurry
 6 it up as much as possible, even though it
 7 just saves a month or so. I don't see that
 8 it costs anybody any more to do that.
 9 MS. HOFFMAN: Okay.
 10 MR. BREISCH: That is if there is
 11 no legal reason.
 12 MS. HOFFMAN: No. There is no
 13 legal reason. It's just that, as you know,
 14 we have been trying to keep our emergency
 15 rules to a minimum because of feedback that
 16 we had gotten from the Governor's Office.
 17 But this is certainly a rule that would
 18 command that type of attention.
 19 MR. BREISCH: Well, I'm just one
 20 vote on the Council, but I would sure
 21 recommend that we speed it up as quick as
 22 we can. I'm very uncomfortable with it as
 23 it is.
 24 MR. DYKE: We have two other
 25 persons wishing to speak on this matter, if

Page 25

1 we would like to call them at this time.
 2 If there is not objection, we can call them
 3 at this time. Let's call Mr. Lee Paden.
 4 MR. PADEN: Thank you, Mr. Dyke.
 5 My name is Lee Paden. I'm the Chairman of
 6 the Oklahoma Environmental Quality Board
 7 and an attorney in Tulsa. If I could, Mr.
 8 Dyke and Mr. Chairman, before I talk about
 9 this, I would like to take one minute to
 10 thank the Council for the contribution that
 11 each member of the Council makes to
 12 preserving the environment in Oklahoma.
 13 I think one of the things that
 14 happens with people who agree to volunteer
 15 to serve on councils or boards in this
 16 state is that they are appointed and they
 17 are sort of like the general in the Beale
 18 Bailey comic. They never hear from the
 19 home office after they receive their
 20 appointment. One of the things that I have
 21 noticed in my five years as a member of the
 22 Environmental Quality Board and in my
 23 previous service on the Health Board were
 24 the countless hours -- and Rick, you are
 25 going to find that this is going to be the

1 case. You signed on for some work that you
 2 didn't realize you were going to be doing,
 3 because each of you spends a tremendous
 4 amount of time and effort that is
 5 unrecognized and uncompensated. And the
 6 members of the Board who reap the benefits
 7 of all the work that you guys do in
 8 preparing rules to submit to us, are
 9 eternally grateful for the efforts that you
 10 put in. So on behalf of the Environmental
 11 Quality Board, I wanted to take the
 12 opportunity to tell you that we appreciate
 13 the time that you spend, the efforts that
 14 you put in to preserve and to improve
 15 Oklahoma's environment.

16 Now, if I could, I would like to
 17 spend a minute or two talking about the
 18 rule that the -- the proposed change that's
 19 reported this morning. In my opinion, this
 20 is an extremely important item. I'm
 21 pleased to hear Mr. Branecky and Mr.
 22 Breisch encourage that this be placed into
 23 effect as quickly as possible.

24 We are operating now in really a
 25 situation where we don't have a rule. The

1 federal rule, be it our standard, it has
 2 been declared to be unenforceable. And
 3 consequently, if we try to enforce the
 4 standard that is in place in Oklahoma which
 5 is the 8-hour standard, we would be in real
 6 difficulty. We have a number of permits.
 7 Eddie, I think at one time I counted in the
 8 last two or three months that we had, on
 9 PSD permits, something like 30 that were
 10 pending in this state. Something in that
 11 neighborhood. That may be a little bit
 12 high. Either original permits or changes
 13 to existing permits, around 30. And each
 14 one of those is directly or indirectly
 15 impacted by what standards we have in
 16 place. So I would encourage you to follow
 17 the recommendation of the staff and
 18 favorably consider this.

19 One of the things I did want to
 20 mention is that one of the problems that
 21 we've had in trying to work with the 8-hour
 22 standard versus the 1-hour standard, is the
 23 voluntary programs that exist in Tulsa and
 24 Oklahoma City to try to help keep our air
 25 clean. We have had what I consider to be

1 very, very good success with volunteer
 2 efforts in Tulsa and also in Oklahoma City.
 3 I'm more familiar with the Tulsa programs
 4 because I've worked more closely with
 5 those. But we've done things like free bus
 6 rides. And you think, well, free bus ride,
 7 nobody will take advantage of that. It's
 8 amazing. When we have an ozone situation,
 9 we have an ozone alert call, the bus
 10 ridership will go up 20, 30 percent or
 11 above on days when that event happens to
 12 occur. I think it demonstrates the fact
 13 that people want the air to be clean.
 14 We've done other things. People have
 15 voluntarily agreed to fuel their cars at
 16 hours that are acceptable in the evening
 17 rather than during the day to help reduce
 18 the possibility of additional NOx
 19 emissions. We've done car-pooling.
 20 Lawnmowing has ceased on ozone alert days.
 21 We've had companies who have taken the
 22 initiative and encouraged their employees
 23 to do things like bringing their lunch or
 24 bringing group lunches on days when there
 25 is a possibility of an exceedance of the

1 ozone standards.
 2 And so we need to have a program
 3 that is compatible with the voluntary
 4 program. Unfortunately, when EPA put the
 5 8-hour standard into effect, they didn't do
 6 some of the things that I felt would help
 7 in preparing areas like Tulsa and Oklahoma
 8 City to adapt their volunteer programs to
 9 the new standard. And I would hope that as
 10 EPA continues to work with this problem,
 11 that they will look at issues like how we
 12 adapt voluntary programs to whatever
 13 standard they might adopt in the future.

14 So I would encourage the Council to
 15 adopt the changes that are presented here
 16 today. I would hope that we could do it as
 17 quickly as we can so that Oklahoma has a
 18 standard that we can enforce. I would be
 19 happy to answer questions.

20 MR. DYKE: Questions of Mr. Paden
 21 from the Council? Thank you.

22 MR. PADEN: Thank you, very much.

23 MR. DYKE: I would like to call
 24 on Ms. Hilary Kitz.

25 MS. KITZ: Good morning. Thank

Page 30

1 you for the opportunity to speak. Mayor
 2 Savage of Tulsa would have liked to come
 3 today to present these comments, but
 4 unfortunately she had to be in Washington.
 5 She's meeting with Secretary Promo
 6 (phonetic spelling) today and asked me to
 7 come and speak about the revocation of the
 8 8-hour standard on her behalf. These are
 9 her comments and I have copies of them,
 10 which I would be happy to leave for the
 11 record.

12 On behalf of the Tulsa community, I
 13 am pleased to respond to the proposed rule
 14 from EPA to reinstate the 1-hour/8-hour Air
 15 Quality Standard. As a Member of the
 16 National Committee convened by EPA to make
 17 recommendations concerning the
 18 implementation of a new Air Quality
 19 Standard, I am deeply aware of the
 20 controversy surrounding the selection of .8
 21 parts per million over 8-hours, as the
 22 basis for the ozone standard announced in
 23 August of 1997. Tulsa is proud of its
 24 comprehensive program to improve air
 25 quality. Since the passage of the Revised

Page 32

1 hour standard, in hopes that the hiatus to
 2 allow for a review of the best possible way
 3 to implement a more rigorous standard will
 4 be enforced. Tulsa appreciates the
 5 respiratory health research which underlies
 6 the idea of an 8-hour standard and agrees
 7 with the EPA that it is a better measure of
 8 air quality. An 8-hour average reduces the
 9 spikes in monitor readings which are
 10 difficult to prevent and to predict.
 11 However, there is general agreement in our
 12 community that a stricter standard should
 13 be phased in gradually.

14 One strategy suggested by Eddie
 15 Terrill, the Division Director for Air
 16 Quality of the Oklahoma Department of
 17 Environmental Quality, includes a Glide
 18 Path Program. Under that plan, an area
 19 begins at .095 parts per million over 8
 20 hours, and works to improve air quality as
 21 the standard becomes stricter, reaching .8
 22 parts per million in about 15 years. As
 23 the standard becomes more stringent,
 24 vehicles are built with more efficient
 25 pollution controls, MACT standards are

Page 31

1 Clean Air Act nearly ten years ago, Tulsans
 2 have participated every summer in the Ozone
 3 Alert Program. As Mr. Paden mentioned,
 4 citizens have ridden the city buses at no
 5 cost, car-pooled, and telecommuted to
 6 reduce the pollution produced by cars.
 7 Tulsa is also the site of the nation's
 8 first flexible attainment region agreement,
 9 a partnership with EPA, the state, and
 10 local business and environmental leaders,
 11 which encourages proactive local solutions
 12 to air quality problems in return for
 13 keeping the compliance designation.

14 In the summer of 1997, Tulsa had one
 15 exceedance of the old standard, and seven
 16 of the new 8-hour standard. In 1998, there
 17 were two exceedances of the old standard
 18 and nine of the new standard. This year,
 19 Tulsa exceeded the new standard 20 times
 20 and recorded none, none, no exceedances at
 21 all, of the old standard. Clearly we are
 22 having trouble meeting the 8-hour standard.

23 The committee is pleased that the
 24 EPA has chosen -- the community is pleased
 25 that the EPA has chosen to reinstate the 1-

Page 33

1 imposed on industry and citizens gradually
 2 change their behaviors. The standard is
 3 reduced until it reaches the .8 parts per
 4 million for optimum respiratory health.
 5 This removes the abrupt and drastic change
 6 which allows localities no time to plan or
 7 implement prevention strategies to guard
 8 against violations of a significantly more
 9 severe standard. The glide path
 10 acknowledges that effective plans to
 11 mitigate pollution require time for
 12 planning, implementation, and evaluation.

13 Asking citizens to change deeply
 14 ingrained driving habits is challenging
 15 when a suitable alternative is not yet
 16 present. However, having to explain that
 17 the standard Tulsa has reached has now been
 18 removed and replaced by a more severe one,
 19 has been extremely difficult and has made
 20 little sense to our citizens. The net
 21 effect of the new standard has been to
 22 discourage participation in a long standing
 23 voluntary program, because the rules have
 24 changed arbitrarily.

25 As always, Tulsa is ready to be a

1 test site for innovation and research for
 2 new ideas and solutions. Uniquely suited
 3 for initiatives like this, Tulsans
 4 recognize the need to work closely with
 5 local industry and ODEQ to learn more about
 6 the sources of our precursor pollutants,
 7 and to devise effective strategies to
 8 improve air quality. Thank you.
 9 THE REPORTER: Hilary, could you
 10 spell your last name, please?
 11 MS. KITZ: Yes. It's K-I-T-Z.
 12 THE REPORTER: Thank you.
 13 MS. KITZ: And it's Hilary with
 14 one "L".
 15 THE REPORTER: Thank you.
 16 MR. DYKE: Are there any
 17 questions from the Council of Ms. Kitz?
 18 Thank you. Are there any additional
 19 questions from the Council of the staff?
 20 Is there anyone from the public wishing to
 21 comment on this rule or anyone with any
 22 questions? Anything else from the Council?
 23 Mr. Chairman.
 24 MR. BREISCH: We have to have a
 25 motion. A couple of us -- at least myself

1 feels we ought to put the emergency clause
 2 on this, but that's up to you. So I will
 3 entertain a motion to put this just on a
 4 permanent adoption or both permanent and
 5 emergency.
 6 MR. FALLON: Mr. Chairman, does
 7 the lack of having advertised the emergency
 8 clause have an effect on us -- the
 9 acceptability?
 10 MS. HOFFMAN: No, it doesn't. An
 11 emergency rule can be adopted or voted on
 12 by the Council without notice in the
 13 Oklahoma Register.
 14 MR. FALLON: Thank you.
 15 MR. BRANECKY: I will move that
 16 we adopt the proposal from the staff with
 17 the addition of the emergency clause.
 18 MR. FALLON: I'll second that.
 19 MR. BREISCH: I have a motion and
 20 a second. Any further discussion or
 21 questions from the Council? Myrna, call
 22 the roll.
 23 MS. BRUCE: Mr. Wilson.
 24 MR. WILSON: Yes.
 25 MS. BRUCE: Mr. Branecky.

1 MR. BRANECKY: Aye.
 2 MS. BRUCE: Mr. Treeman.
 3 MR. TREEMAN: Yes.
 4 MS. BRUCE: Mr. Fallon.
 5 MR. FALLON: Yes.
 6 MS. BRUCE: Dr. Grosz.
 7 DR. GROSZ: Yes.
 8 MS. BRUCE: Mr. Breisch.
 9 MR. BREISCH: Yes.

CHAPTER 100: AIR POLLUTION CONTROL

SUBCHAPTER 13. ~~PROHIBITION OF OPEN BURNING~~

Section

- 252:100-13-1. Purpose [AMENDED]
- 252:100-13-2. Definitions [AMENDED]
- 252:100-13-3. Scope [REVOKED]
- 252:100-13-4. Effective date [REVOKED]
- 252:100-13-5. Open burning prohibited [AMENDED]
- 252:100-13-6. Salvage operations utilizing open burning prohibited [REVOKED]
- 252:100-13-7. ~~Permissible~~ Allowed open burning [AMENDED]
- 252:100-13-8. [RESERVED]
- 252:100-13-9. General conditions and requirements for allowed open burning [NEW]
- 252:100-13-10. Disaster relief [NEW]
- 252:100-13-11. Responsibility for consequences of open burning [NEW]

252:100-13-1. Purpose

~~This Subchapter is for the purpose of preventing, abating, and controlling air pollution resulting from air contaminants released in the open burning of refuse and other combustible materials. The purpose of this Subchapter is to control the open burning of refuse and other combustible materials.~~

252:100-13-2. Definitions

The following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Combustible materials" means any substance which will readily burn and shall include those substances which, although generally considered incombustible, are or may be included in the mass of the material burned or to be burned.

"Domestic refuse" means combustible materials or refuse that normally result from the function of life at a residence, such as kitchen garbage, untreated lumber, cardboard boxes, packaging, clothing, grass, leaves, and branch trimmings. It does not include such things as tires, non-wood construction debris, furniture, carpet, electrical wire, and appliances.

"Land clearing operation" means the uprooting, cutting, or clearing of vegetation in preparation for the construction of buildings, the development of residential, commercial, agricultural, or industrial properties, and for the construction and maintenance of right-of-ways. It does not include the clearing of vegetation such as trimmings, fallen limbs, branches, or leaves, or other wastes from routine property maintenance activities.

"Open burning" means the burning of combustible materials in such a manner that the products of combustion are emitted directly to the outside atmosphere.

"Open-pit incinerator" means a device consisting of a pit (into which the material to be combusted is placed) and nozzles, pipes, and other appurtenances designed and arranged in a manner to deliver additional air and/or auxiliary fuel to, or near, the zone of combustion so that theoretically complete combustion is accomplished or approached.

"Products of combustion" means all particulate and gaseous air contaminants emitted as a result of the burning of refuse and combustible materials.

"Refuse" means garbage, rubbish, domestic refuse, and all other wastes generated by a trade, business, industry, building operation, or household.

252:100-13-3. Scope [REVOKED]

~~This Subchapter shall apply to all operations involving open burning except those specifically exempted by 252:100-13-7.~~

252:100-13-4. Effective date [REVOKED]

~~The effective date of this Subchapter shall be January 1, 1971.~~

252:100-13-5. Open burning prohibited

~~No person shall cause, suffer, allow, or permit open burning of refuse and other combustible material except as may be allowed in compliance with OAC 252:100-13-7. The open burning of refuse and combustible materials is prohibited unless conducted in strict accordance with the conditions and requirements contained in 252:100-13-7 and 252:100-13-9. Under no circumstances shall the open burning of tires be allowed.~~

252:100-13-6. Salvage operations utilizing open burning prohibited [REVOKED]

~~No person shall cause, suffer, allow, or permit open burning of combustible material in connection with the salvage of motor vehicles, tires, oil and similar substances, containers, coated or painted wire and metals, and other materials.~~

252:100-13-7. ~~Permissible~~ Allowed open burning

~~The open burning of refuse and other combustible material may be conducted as specified in the paragraphs set forth below if no public nuisance is or will be created and if the burning is not prohibited by, and is conducted in compliance with, other applicable laws and the ordinances, rules, and orders of governmental entities having jurisdiction, including air pollution control ordinances, rules, and orders. The authority to conduct open burning under the provisions of this Section does not exempt or excuse a person from the consequences, damages, or injuries which may result from such conduct nor does it excuse or exempt any person from complying with all applicable laws, ordinances, rules, and orders of the governmental entities having jurisdiction, even though the open burning is conducted in compliance with this Section.~~

~~(1) Fires~~ (a) **Fire training.** Open burning is allowed for fires purposely set for the instruction and training of public and industrial fire-fighting personnel, when authorized by the appropriate governmental entity provided that authorization has been requested from the local fire chief at least ten working days prior to any burning or that written authorization has been received prior to such burning. The DEQ may require written verification of the authorization from the local fire chief or fire training officer..

~~(2)~~ (b) **Elimination of hazards.** Fires set for the elimination of a fire hazard which cannot be abated by any other means when authorized by the appropriate governmental entity. Provided prior authorization is obtained from the local fire chief, open burning is allowed for the elimination of:

(1) A fire hazard that cannot be abated by any other means.

(2) A dangerous or hazardous material when there is no other practical or lawful method of abatement or disposal if authorization is also received from the DEQ prior to such burning.

~~(3) Fires set for the removal of dangerous or hazardous material where there is no other practical or lawful method of disposal upon approval of the Director of Air Quality Division.~~

~~(4) Camp~~ (c) Recreational and ceremonial fires. Open burning is allowed for camp fires and other fires used solely for recreational purposes, for ceremonial occasions, or for outdoor non-commercial preparation of food.

(5) (d) Land management and land clearing operations. Open burning is allowed for the following land management and land clearing operations.

(1) Fires purposely set to forest, crop or range lands for a specific reason in the management of forests, crops or game, in accordance with practices recommended by the Oklahoma Department of Wildlife Conservation, the Oklahoma State Department of Agriculture, and the United States Forest Service.

~~(6) (2) The burning of trees, brush, grass, and other vegetable matter in the clearing of land, right-of-way maintenance operations, and agricultural crop burning if the following conditions are met: Fires purposely set for land clearing operations if conducted at least 500 feet upwind of any occupied residence other than those located on the property on which the burning is conducted, except that such burning must be conducted in open-pit incinerators in counties or areas that are or have been designated nonattainment.~~

~~(A) prevailing winds at the time of the burning must be away from any city or town, the ambient air of which may be affected by air contaminants from the burning;~~

~~(B) the location of the burning must not be adjacent (500 ft. upwind) to an occupied residence other than those located on the property on which the burning is conducted;~~

~~(C) care must be used to minimize the amount of dirt on the material being burned;~~

~~(D) oils, rubber, and other similar materials which produce unreasonable amounts of air contaminants may not be burned;~~

~~(E) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated above; and,~~

~~(F) the burning must be controlled so that a traffic hazard is not created as a result of the air contaminants being emitted.~~

(7) (e) Burning of domestic refuse. Where no collection and disposal service is reasonably available, the burning of refuse and other combustible materials generated in the operation of a domestic household if the following conditions are met: domestic refuse may be burned on the property where the waste is generated.

~~(A) the material to be burned must not be the combined waste from a building designed to accommodate more than three such households;~~

~~(B) the burning must be conducted on the property on which the waste is generated; and,~~

~~(C) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated.~~

(8) (f) Hydrocarbon burning. Open burning of hydrocarbons is allowed for:

(1) The burning of hydrocarbons which are spilled or lost as a result of pipeline breaks or other accidents involving the transportation of such materials or which are generated as

wastes as the result of oil exploration, development, refining, or processing operations if the following conditions are met: The disposal of spilled hydrocarbons or the waste products of oil exploration, development, refining or processing operations which cannot be feasibly recovered or otherwise disposed of in a legal manner. Notice must be given to the DEQ prior to such burning.

~~(A) the material cannot be practicably recovered or otherwise lawfully disposed of in some other manner;~~

~~(B) the burning must not be conducted within a city or town or in such proximity thereto that the ambient air of such city or town may be affected by the air contaminants being emitted;~~

~~(C) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated above; and,~~

~~(D) the burning must be controlled so that a traffic hazard is not created as the result of the air contaminants being emitted.~~

(2) The disposal of waste hydrocarbons through a flare. The owner or operator shall be required to use a smokeless flare if a condition of air pollution is determined to exist by the DEQ.

~~(9) (g) **Open-pit incinerator.** The burning of any combustible material in an open-pit incinerator which has been properly designed and which is properly operated for the control of smoke and particulate matter. Except for hazardous material, any combustible material or refuse that is allowed to be burned under this Subchapter may be burned in an open-pit incinerator that is properly designed and operated for the control of smoke and particulate matter. The owner or operator of the open-pit incinerator shall not accept any material owned by other persons and shall not transport any material to the property where the open-pit incinerator is located in order to burn the material.~~

~~(10) The burning of hydrocarbons, which must be wasted, through the use of smokeless atmospheric flares if after investigation a condition of air pollution exists.~~

252:100-13-8. [RESERVED]

252:100-13-9. General conditions and requirements for allowed open burning

The open burning of refuse and other combustible material may be conducted as allowed in this Subchapter only if the following conditions and requirements are met:

(1) No public nuisance is or will be created.

(2) The burning is controlled so that a traffic hazard is not created as a result of the air contaminates being emitted.

(3) The burning is conducted so that the contaminants do not adversely affect the ambient air quality of a city or town.

(4) The initial burning shall begin only between three hours after sunrise and three hours before sunset and additional fuel shall not be intentionally added to the fire at times outside these limits. This requirement does not apply to the open burning allowed under 252:100-13-7 (a), (b), (c), and (d) (1).

252:100-13-10. Disaster relief

Notwithstanding the prohibition in 252:100-13-5, the Executive Director of the DEQ may allow the open burning of debris resulting from a disaster if the Director determines such burning is necessary to protect public health and safety. Such approval, if granted, shall be accompanied by appropriate guidelines for burning the debris.

252:100-13-11. Responsibility for consequences of open burning

Persons who conduct open burning in accordance with the provisions of this Subchapter are not exempt or excused from the consequences, damages, or injuries that may result from such conduct, nor are they exempt or excused from complying with all applicable laws, ordinances, rules, and orders.

[OAR Docket #99-1302; filed 8-26-99]

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 100. AIR POLLUTION CONTROL

[OAR Docket #99-1303]

RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking

PROPOSED RULES:

Subchapter 5. Registration, Emission Inventory and
Annual Operating Fees [AMENDED]

Subchapter 9. Excess Emission and Malfunction
Reporting Requirements [AMENDED]

Subchapter 13. Prohibition of Open Burning
[AMENDED]

Subchapter 19. Particulate Matter Emissions from
Fuel-Burning Equipment [AMENDED]

Subchapter 21. Particulate Matter Emissions from
Wood-Waste Burning Equipment [REVOKED]

Subchapter 27. Particulate Matter Emissions from
Industrial and Other Processes and Operations
[REVOKED]

Appendix C. Particulate Matter Emission Limits for
Fuel-Burning Equipment [REVOKED]

Appendix C. Particulate Matter Emission Limits for
Fuel-Burning Equipment [NEW]

Appendix D. Particulate Matter Emission Limits for
Wood-Waste Burning Equipment [REVOKED]

Appendix D. Particulate Matter Emission Limits for
Wood-Waste Fuel-Burning Equipment [NEW]

SUMMARY:

The proposed changes to Subchapter 5 are designed to
allow the agency to bill annual operating fees on a flexible

schedule. The changes should also allow the fees to be
based on the most recent emission data possible. The
proposed rule language also requires an owner or operator
of a facility to report excess emissions on their annual
emission inventory. Substantive changes include requiring
inventories to be submitted one month earlier than
presently required, allowing fee payers five years after
payment is made to notify the DEQ that they overpaid and
to receive credit for such overpayment, and reducing the
period of time to six months in which either the DEQ or the
facility owner or operator can challenge the data or
methods used to calculate the facility's emissions.

The proposed changes to Subchapter 9 include
correction of typographical and grammatical errors and
deletion of redundant language. Also, the rule was
simplified and clarified according to the agency-wide
re-right/de-wrong initiative. Substantive changes to the rule
include narrowing the scope of the rule to minor facilities
only. A new condition was added to explain when excess
emissions from a process are due to a malfunction and when
they are due to negligent, marginal, or unsafe operation.
The new language establishes a rebuttable presumption
that the combined time of all excess emissions from a
process due to a malfunction does not exceed eight hours or
1.5 percent of the process's operation time, whichever is
greater, in a 3 month period. The burden of proving that
excess emissions occurring more often are due to a
malfunction rather than negligent, marginal, or unsafe
operation is on the owner or operator of the process.

The proposed changes to Subchapter 13 will simplify and
clarify the Subchapter as a part of the agency-wide
re-right/de-wrong initiative. Such changes include
consolidating the general conditions and requirements for
allowed open burning into a new section. A few substantive
changes were made such as adding definitions for "domestic
refuse" and "landclearing operation" and a section on
disaster relief procedures. In some instances, the
requirement to notify the DEQ or other appropriate official
for authorization to burn was added. In addition, the
open-pit incinerator requirements were moved to a new
section. The rule is proposed to be amended to require
owners or operators to register with their local DEQ office;
however, if the owner or operator anticipates operating an
open-pit incinerator in the same pit for more than 90 days in
a 365-day period, they would be required to obtain a permit
and pay the required permit fee. Also, hazardous materials
may not be burned in an open-pit incinerator unless prior
written approval has been obtained from both the local fire
chief and the DEQ.

Subchapters 19, 21 and 27 all deal with particulate matter
(PM) emissions. The proposed changes will merge the
requirements of Subchapter 21 and Subchapter 27 into
Subchapter 19. Subchapters 21 and 27 will then be revoked.

Notices of Rulemaking Intent

Subchapter 19 as proposed will be simplified and clarified according to the agency-wide re-right/de-wrong initiative. In addition, a Permit by Rule for particulate matter facilities is being proposed for Subchapter 19. It is also being proposed that both Appendix C and Appendix D be revoked in favor of two new tabular appendices.

The DEQ is requesting comments on all of these proposed rule changes.

AUTHORITY:

Environmental Quality Board, 27A O.S. Supp. 1998, §§ 2-2-101 and 2-5-101, *et seq.*

REQUEST FOR COMMENTS:

The DEQ requests that business entities affected by these rules provide the DEQ, within the comment period, in dollar amounts if possible, the increase in the level of direct costs such as fees, and the indirect costs such as reporting, recordkeeping, equipment, construction, labor, professional services, revenue loss, or other costs expected to be incurred by a particular entity due to compliance with the proposed rules.

COMMENT PERIOD:

Written comments will be accepted prior to and at the hearing on October 19, 1999. To be thoroughly considered by staff prior to the hearing, written comments should be submitted to the contact person by October 12, 1999. Oral comments may be made at the October 19, 1999, hearing and at the November 16, 1999, hearing.

PUBLIC HEARINGS:

Tuesday, October 19, 1999 - 9:00 a.m. hearing, at the Tulsa City-County Health Department, 5051 South 129th East (Northeast corner of 51st and 129th), Tulsa, Oklahoma.

Scheduled before the Environmental Quality Board on Tuesday, November 16, 1999, 9:30 a.m., McAlester, Oklahoma.

Contact Myrna Bruce at (405) 702-4177 for exact location.

COPIES OF PROPOSED RULES:

The proposed rules are available for review at the Air Quality Division office at 707 North Robinson, Suite 4100, Oklahoma City, Oklahoma, 73102, and on the DEQ website (www.deq.state.ok.us), Air Quality Division Current Events and Issues, or copies may be obtained from Myrna Bruce by calling (405) 702-4177.

RULE IMPACT STATEMENT:

Copies of the rule impact statement may be obtained from the Air Quality Division.

CONTACT PERSON:

Please send written comments to Jeanette Buttram (252:100-5, 252:100-9 and 252:100-13), Max Price (252:100-19, 252:100-21, 252:100-27 and Appendices C and D). Department of Environmental Quality, Air Quality

Division, P.O. Box 1677, Oklahoma City, Oklahoma 73101-1677; (405) 702-4100.

ADDITIONAL INFORMATION:

Subchapters 9, 19, 21, 27, and Appendices C and D were brought to public hearing on August 24, 1999.

PERSONS WITH DISABILITIES:

Should you desire to attend but have a disability and need an accommodation, please notify the Air Quality Division three (3) days in advance at (405) 702-4100.

[OAR Docket #99-1303; filed 8-26-99]

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 510. MUNICIPAL SOLID WASTE LANDFILLS [REVOKED]

[OAR Docket #99-1304]

RULEMAKING ACTION:

Notice of proposed PERMANENT Rulemaking
PROPOSED RULES:

Chapter 510. Municipal Solid Waste Landfills
[REVOKED]

SUMMARY:

Chapter 510 is being revoked subject to the adoption of Chapter 530 as part of the re-right/de-wrong process. Some rules which were in Chapter 510 were deleted. Others were amended and renumbered in Chapter 530. A conversion table is available from the DEQ upon request.

AUTHORITY:

Environmental Quality Board powers and duties, 27A O.S. § 2-2-101; and the Oklahoma Solid Waste Management Act, 27A O.S. § 2-10-101 *et seq.*

REQUEST FOR COMMENTS:

The DEQ requests that business entities affected by this rule provide the DEQ, within the comment period, in dollar amounts if possible, the increase in the level of direct costs such as fees, and the indirect costs such as reporting, recordkeeping, equipment, construction, labor, professional services, revenue loss, or other costs expected to be incurred by a particular entity due to compliance with the proposed rule.

COMMENT PERIOD:

Deliver or mail written comments to the contact person from September 15 through October 15, 1999.

PUBLIC HEARINGS:

Before the Solid Waste Management Advisory Council at 9:00 a.m. on October 21, 1999, at the Stillwater Public Library, 1107 S. Duck, Stillwater, Oklahoma, 74074. Before the Environmental Quality Board at 9:30 on November 16, 1999, in McAlester, Oklahoma, at a location to be announced.

Michelle

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 2. PROCEDURES OF THE DEPARTMENT OF ENVIRONMENTAL QUALITY

[OAR Docket #99-1397]

RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking

PROPOSED RULES:

Subchapter 15. Uniform Permitting Procedures

Part 5. Tier Classifications [AMENDED]

252:2-15-40 [AMENDED]

252:2-15-41 [AMENDED]

Part 7. Review Procedures and Permitting Time Lines

252:2-15-72 [AMENDED]

SUMMARY:

The Department is proposing amendments to the air quality provisions of 252:2-15, Environmental Permit Processing Times, to make them consistent with 252:100, Air Pollution Control. The terms "minor source(s)" and major "facility(ies)" would be changed to "minor facility(ies)" and "Part 70 source(s)", respectively.

The DEQ is requesting comments on the proposed rule changes.

AUTHORITY:

Environmental Quality Board, 27A O.S.Supp. 1998, §§ 2-2-101 and 2-5-101, *et seq.*

REQUEST FOR COMMENTS:

The DEQ requests that business entities or any other members of the public affected by these rules provide the DEQ, within the comment period, in dollar amounts if possible, the increase in the level of direct costs such as fees, and the indirect costs such as reporting, recordkeeping, equipment, construction, labor, professional services, revenue loss, or other costs expected to be incurred by a particular entity due to compliance with the proposed rules.

COMMENT PERIOD:

Written comments will be accepted prior to and at the hearing on December 14, 1999. To be thoroughly considered by staff prior to the hearing, written comments should be submitted to the contact person by December 7, 1999. Oral comments may be made at the December 14, 1999 hearing and at the Environmental Quality Board hearing (date, time and location to be determined).

PUBLIC HEARINGS:

Tuesday, December 14, 1999 - 9:00 a.m. hearing, at the Department of Environmental Quality, Room 101, 707 North Robinson, Oklahoma City, Oklahoma.

Scheduled before the Environmental Quality Board (date, time and location to be determined).

Contact Myrna Bruce at (405) 702-4177 for exact location.

COPIES OF PROPOSED RULES:

The proposed rules are available for review at the Air Quality Division office at 707 North Robinson, Suite 410, Oklahoma City, Oklahoma, 73102, and on the DEQ website (www.deq.state.ok.us), Air Quality Division Current Events and Issues, or copies may be obtained from Myrna Bruce by calling (405) 702-4177.

RULE IMPACT STATEMENT:

Copies of the rule impact statement may be obtained from the Air Quality Division.

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 100. AIR POLLUTION CONTROL

[OAR Docket #99-1398]

RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking

PROPOSED RULES:

Subchapter 5. Registration, Emission Inventory and Annual Operating Fees [AMENDED]

Subchapter 9. Excess Emission and Malfunction Reporting Requirements [AMENDED]

Subchapter 13. Prohibition of Open Burn [AMENDED]

Appendix E. Primary Ambient Air Quality Standards [REVOKED]

Appendix E. Primary Ambient Air Quality Standards [NEW]

Appendix F. Secondary Ambient Air Quality Standards [REVOKED]

Appendix F. Secondary Ambient Air Quality Standards [NEW]

Notices of Rulemaking Intent

SUMMARY:

The proposed changes to Subchapter 5 are designed to allow the agency to bill annual operating fees on a flexible schedule. The changes should also allow the fees to be based on the most recent emission data possible. The proposed rule language also requires an owner or operator of a facility to report excess emissions on their annual emission inventory. Substantive changes include requiring inventories to be submitted one month earlier than presently required, allowing fee payers five years after payment is made to notify the DEQ that they overpaid and to receive credit for such overpayment, and reducing the period of time to six months in which either the DEQ or the facility owner or operator can challenge the methods used to calculate the facility's emissions for fee calculation purposes.

The proposed changes to Subchapter 9 include correction of typographical and grammatical errors and deletion of redundant language. Also, the rule was simplified and clarified according to the agency-wide re-right/de-wrong initiative. Substantive changes to the rule include establishing a time limit on excess emissions caused by properly reported malfunction, startup/shutdowns, and maintenance procedures. The burden of proving that excess emissions occurring more than eight hours or 1.5 percent of the process's operation time in a 3-month period are due to excusable malfunctions, startup/shutdowns or maintenance procedures rather than negligent, marginal, or improper operation is on the owner or operator of the process. Language was added to explain that compliance with this Subchapter will not exempt sources from complying with any applicable federal requirement, and additional demonstration requirements for malfunctions, maintenance, and startup/shutdowns were added under proposed section 252:100-9-3.2, Demonstration of cause.

The proposed changes to Subchapter 13 will simplify and clarify the Subchapter as a part of the agency-wide re-right/de-wrong initiative. Such changes include consolidating the general conditions and requirements for allowed open burning into a new section. A few substantive changes were made, such as adding definitions for "domestic refuse" and "land clearing operation," along with a section on disaster relief procedures. In some instances, the requirement to notify the DEQ or other appropriate official for authorization to burn was added. In addition, the open-pit incinerator requirements were moved to a new section. The rule is proposed to be amended to require owners or operators to register with their local DEQ office; however, if the owner or operator anticipates operating an open-pit incinerator in the same pit for more than 30 days in a 365-day period, they would be required to obtain a permit and pay the required permit fee. Also, the rule would only allow material from a land clearing operation to be burned in an open-pit incinerator.

The proposed amendments to Appendices E and F would restore the primary and secondary ambient quality standards to what they were prior to July 18, 1997. The 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored. The PM-2.5 standard would be revoked along the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard.

The DEQ is requesting comments on all of these proposed rule changes.

[OAR Docket #99-1631; filed 12-27-99]

**TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 100. AIR POLLUTION CONTROL**

[OAR Docket #99-1638]

RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking

PROPOSED RULES:

Subchapter 5. Registration, Emission Inventory and Annual Operating Fees [AMENDED]

Subchapter 13. Prohibition of Open Burning [AMENDED]

SUMMARY:

The proposed changes to Subchapter 5 are designed to allow the agency to bill annual operating fees on a flexible schedule. The changes should also allow the fees to be based on the most recent emission data possible. The proposed rule language clarifies that an owner/operator of a facility must report quantifiable excess emissions on their annual emission inventory. Substantive changes include requiring all inventories to be submitted prior to March 1 and providing up to a 60-day extension upon request and good cause shown. It allows fee payers five years after payment is made to notify the DEQ that they overpaid and receive credit for such overpayment, and reduces to six months after inventories are due or submitted the period of time in which either the facility owner/operator or the DEQ, respectively, can challenge the method used to calculate the facility's emissions for fee calculation purposes.

The proposed changes to Subchapter 13 will simplify and clarify the Subchapter as a part of the agency-wide re-right/de-wrong initiative. Such changes include consolidating the general conditions and requirements for

allowed open burning into a new section. A few substantive changes were made, such as adding definitions for "domestic refuse" and "land clearing operation," along with a section on disaster relief procedures. In some instances, the requirement to notify the DEQ or other appropriate official for authorization to burn was added. New language was added under "land management and land clearing operations" requiring those who clear land in areas that are or have been designated nonattainment to burn their vegetation in open-pit incinerators. Existing language on open-pit incinerators was expanded and now prohibits accepting any material owned by other persons and from transporting any material to the property where the open-pit incinerator is located in order to burn the material.

AUTHORITY:

Environmental Quality Board powers and duties, 27A O.S.Supp. 1999, Section 2-2-101; and Oklahoma Clean Air Act Section 2-5-101, *et. seq.*

REQUEST FOR COMMENTS:

The DEQ requests that business entities or any other members of the public affected by these rules provide the DEQ, within the comment period, in dollar amounts if possible, the increase in the level of direct costs such as fees, and the indirect costs such as reporting, recordkeeping, equipment, construction, labor, professional services, revenue loss, or other costs expected to be incurred by a particular entity due to compliance with the proposed rules.

COMMENT PERIOD:

The comment period for the proposed amendments to Subchapters 5 and 13 were September 15 through October 19, 1999, and November 15 through December 14, 1999.

PUBLIC HEARINGS:

Previously held before the Air Quality Council on October 19 and December 14, 1999. However, additional oral comments may be made at the meeting of the Environmental Quality Board, Friday, February 25, 2000 - 9:30 a.m., at the Department of Environmental Quality, Room 101, 707 North Robinson, Oklahoma City, Oklahoma.

Contact Myrna Bruce at (405) 702-4177 for additional information.

COPIES OF PROPOSED RULES:

The proposed rules are available for review at the Air Quality Division office at 707 North Robinson, Suite 4100, Oklahoma City, Oklahoma, 73102, and on the DEQ website (www.deq.state.ok.us), Air Quality Division Current Events and Issues, or copies may be obtained from Myrna Bruce by calling (405) 702-4177.

RULE IMPACT STATEMENT:

Copies of the rule impact statement may be obtained from the Air Quality Division.

Notices of Rulemaking Intent

CONTACT PERSON:

Jeanette Buttram, Department of Environmental Quality, Air Quality Division, P.O. Box 1677, Oklahoma City, Oklahoma 73101-1677; (405) 702-4100.

ADDITIONAL INFORMATION:

On December 14, 1999, the Air Quality Council recommended the proposed amendments to Subchapters 5 and 13 be recommended for adoption by the Environmental Quality Board at their meeting on February 25, 2000.

PERSONS WITH DISABILITIES:

Should you desire to attend but have a disability and need an accommodation, please notify the Air Quality Division three (3) days in advance at (405) 702-4100.

[OAR Docket #99-1638; filed 12-30-99]

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 100. AIR POLLUTION CONTROL

[OAR Docket #99-1639]

RULEMAKING ACTION:

Notice of proposed EMERGENCY and PERMANENT rulemaking

PROPOSED RULES:

Appendix E. Primary Ambient Air Quality Standards [REVOKED]

Appendix E. Primary Ambient Air Quality Standards [NEW]

Appendix F. Secondary Ambient Air Quality Standards [REVOKED]

Appendix F. Secondary Ambient Air Quality Standards [NEW]

SUMMARY:

The proposed amendments to Appendices E and F would restore the primary and secondary ambient air quality standards to what they were prior to July 18, 1997. The 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored. The PM-2.5 standard would be revoked along with the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard.

AUTHORITY:

Environmental Quality Board powers and duties, 27A O.S.Supp. 1999, Section 2-2-101; and Oklahoma Clean Air Act Section 2-5-101, *et. seq.*

REQUEST FOR COMMENTS:

The DEQ requests that business entities or any other members of the public affected by these rules provide the DEQ, within the comment period, in dollar amounts if possible, the increase in the level of direct costs such as fees, and the indirect costs such as reporting, recordkeeping, equipment, construction, labor, professional services,

revenue loss, or other costs expected to be incurred by a particular entity due to compliance with the proposed rules.

COMMENT PERIOD:

The comment period for the proposed amendments to Appendices E and F was November 15 through December 14, 1999.

PUBLIC HEARINGS:

Previously held before the Air Quality Council on December 14, 1999. However, additional oral comments may be made at the meeting of the Environmental Quality Board, Friday, February 25, 2000 - 9:30 a.m., at the Department of Environmental Quality, Room 101, 707 North Robinson, Oklahoma City, Oklahoma.

Contact Myrna Bruce at (405) 702-4177 for additional information.

COPIES OF PROPOSED RULES:

The proposed rules are available for review at the Air Quality Division office at 707 North Robinson, Suite 4100, Oklahoma City, Oklahoma, 73102, and on the DEQ website (www.deq.state.ok.us), Air Quality Division Current Events and Issues, or copies may be obtained from Myrna Bruce by calling (405) 702-4177.

TITLE 265. STATE FIRE MARSHAL COMMISSION CHAPTER 25. ADOPTED NATIONAL CODES AND STANDARDS

[OAR Docket #99-1608]

RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking
PROPOSED RULE:

265:25-1-3. Incorporated National Codes and Standards [AMENDED]

- (C) Beginning January 1, 1999, annual operating fees shall be invoiced at \$17.12 per ton of regulated pollutant (for fee calculation).
- (2) **Part 70 Sources.**
- (A) From January 1, 1995, until January 1, 1999, the annual operating fee for Part 70 sources shall be \$15.19 per ton of regulated pollutant (for fee calculation).
- (B) Beginning January 1, 1999, the annual operating fee for Part 70 sources shall be \$17.12 per ton of regulated pollutant (for fee calculation).
- (C) The annual operating fee shall be adjusted automatically each year by the percentage, if any, by which the Consumer Price Index for the most recent calendar year ending before the beginning of such year differs from the Consumer Price Index for the calendar year 1994. The Consumer Price Index for any calendar year is the average of the Consumer Price Index for all-urban consumers published by the Department of Labor, as of the close of the twelve month period ending on August 31 of each calendar year.
- (c) **Payment.** For Part 70 sources fees shall be paid by check or money order made payable to the Oklahoma Air Quality Title V Revolving Fund. All other sources shall pay fees by check or money order made payable to the Oklahoma Air Quality Division.
- (1) Fees are due and payable upon receipt of on the invoice due date(s). Fees shall be considered delinquent 30 days from the date of billing, at which time simple interest shall accrue at the rate of one and one-half percent (1½%) per month on any amount unpaid after the invoice due date(s). Within five (5) years but not before a grace period of 120 days from the date of billing invoice due date, the DEQ may issue an administrative order to recover such fees and may assess a reasonable administrative fine in accordance with the provisions of the Oklahoma Clean Air Act, 27A O.S. Supp. 1993, §§ 2-5-101 *et seq.*, to an owner or operator of a facility who has failed to pay or has underpaid such fees. If no fee was billed because the owner or operator failed to submit the required annual emission inventory, the term "date of billing" shall mean the date on which the fee would have been billed had the emission inventory been submitted when due. When a fee overpayment has been made as a result of a DEQ invoice error, an owner or operator may seek a credit for such fee overpayment within five years from the date on which payment of the fee was received by the DEQ. When a fee overpayment has been made as a result of an owner or operator's error in preparing the emission inventory upon which the fee was based, the owner or operator may seek credit for such overpayment within one year from the date on which payment of the fee was received by the DEQ.
- (2) If an owner or operator has failed to submit the required annual emission inventory, the DEQ may issue

an administrative order to recover fees that would have been invoiced had the emission inventory been submitted when due. The DEQ may issue such order within five (5) years from the date of billing and may assess a reasonable administrative fine in accordance with the provisions of the Oklahoma Clean Air Act, 27A O.S. §§ 2-5-101 *et seq.*

(3) When a fee overpayment has been made as a result of an error, an owner or operator may seek a credit for such fee overpayment within five years from the date on which payment of the fee was received by the DEQ.

(d) **Basis for annual operating fees.**

(1) Operating fees shall be calculated on a source-specific basis and based on actual emissions of regulated pollutants (for fee calculation) as set forth in the facility emission inventory unless the owner or operator elects to pay fees on allowable emissions. Fees shall be based on emission inventories submitted in the previous calendar year (for example, fees invoiced during the calendar year 1998 shall be based upon inventory data covering the calendar year 1996).

(2) Regulated pollutants (for fee calculation) in excess of 4,000 tons per year per pollutant for a Part 70 source shall not be considered in the calculation of the annual fee.

252:100-5-3. **Confidentiality of proprietary information**

[Refer to 27A O.S. Supp. 1993, § 2-5-105.18.]

April 28, 2000

Effective:

June 12, 2000

SUPERSEDED EMERGENCY ACTIONS:

None

INCORPORATIONS BY REFERENCE:

None

ANALYSIS:

The changes to Subchapter 13 will simplify and clarify the Subchapter as part of the agency-wide re-right/de-wrong initiative. Such changes include consolidating the general conditions and requirements for allowed open burning into a new section. A few substantive changes were made, such as adding definitions for "domestic refuse" and "land clearing operation," along with a section on disaster relief procedures. In some instances, the requirement to notify the DEQ or other appropriate official for authorization to burn was added. New language was added under "land management and land clearing operations" requiring those who clear land in areas that are or have been designated nonattainment to burn their vegetation in open-pit incinerators. Existing language on open-pit incinerators was expanded and now prohibits accepting any material owned by other persons and from transporting any material to the property where the open-pit incinerator is located in order to burn the material.

The Air Quality Advisory Council recommended these amendments for adoption at their meeting on December 14, 1999.

SUMMARY OF DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

CONTACT PERSON:

Jeanette Buttram, Department of Environmental Quality, Air Quality Division, 707 N. Robinson, Suite 4100, Oklahoma City, Oklahoma 73101-1677. (405) 702-4100

PURSUANT TO THE ACTIONS DESCRIBED HEREIN, THE FOLLOWING RULES ARE CONSIDERED FINALLY ADOPTED AS SET FORTH IN 75 O.S., SECTION 308.1(A), WITH AN EFFECTIVE DATE OF JUNE 12, 2000.

SUBCHAPTER 13. PROHIBITION OF OPEN BURNING

252:100-13-1. Purpose

~~This Subchapter is for the purpose of preventing, abating, and controlling air pollution resulting from air contaminants released in the open burning of refuse and other combustible materials. The purpose of this Subchapter is to control the open burning of refuse and other combustible materials.~~

252:100-13-2. Definitions

The following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Combustible materials" means any substance which will readily burn and shall include those substances which, although generally considered incombustible, are or may be included in the mass of the material burned or to be burned.

"Domestic refuse" means combustible materials or refuse that normally result from the function of life at a residence, such as kitchen garbage, untreated lumber, cardboard boxes, packaging, clothing, grass, leaves, and branch trimmings. It does not include such things as tires, non-wood construction debris, furniture, carpet, electrical wire, and appliances.

"Land clearing operation" means the uprooting, cutting, or clearing of vegetation in preparation for the construction of buildings, the development of residential, commercial, agricultural, or industrial properties, and for the construction and maintenance of right-of-ways. It does not include the clearing of vegetation such as trimmings, fallen limbs, branches, or leaves, or other wastes from routine property maintenance activities.

"Open burning" means the burning of combustible materials in such a manner that the products of combustion are emitted directly to the outside atmosphere.

"Open-pit incinerator" means a device consisting of a pit (into which the material to be combusted is placed) and nozzles, pipes, and other appurtenances designed and arranged in a manner to deliver additional air and/or auxiliary fuel to, or near, the zone of combustion so that theoretically complete combustion is accomplished or approached.

"Products of combustion" means all particulate and gaseous air contaminants emitted as a result of the burning of refuse and combustible materials.

"Refuse" means garbage, rubbish, domestic refuse and all other wastes generated by a trade, business, industry, building operation, or household.

252:100-13-3. Scope [REVOKED]

~~This Subchapter shall apply to all operations involving open burning except those specifically exempted by 252:100-13-7.~~

252:100-13-4. Effective date [REVOKED]

The effective date of this Subchapter shall be January 1, 1974.

252:100-13-5. Open burning prohibited

No person shall cause, suffer, allow, or permit open burning of refuse and other combustible material except as may be allowed in compliance with OAC 252:100-13-7. The open burning of refuse and combustible materials is prohibited unless conducted in strict accordance with the conditions and requirements contained in 252:100-13-7 and 252:100-13-9. Under no circumstances shall the open burning of tires be allowed.

252:100-13-6. Salvage operations utilizing open burning prohibited [REVOKED]

No person shall cause, suffer, allow, or permit open burning of combustible material in connection with the salvage of motor vehicles, tires, oil and similar substances, containers, coated or painted wire and metals, and other materials.

252:100-13-7. Permissible-Allowed open burning

The open burning of refuse and other combustible material may be conducted as specified in the paragraphs set forth below if no public nuisance is or will be created and if the burning is not prohibited by, and is conducted in compliance with, other applicable laws and the ordinances, rules, and orders of governmental entities having jurisdiction, including air pollution control ordinances, rules, and orders. The authority to conduct open burning under the provisions of this Section does not exempt or excuse a person from the consequences, damages, or injuries which may result from such conduct nor does it excuse or exempt any person from complying with all applicable laws, ordinances, rules, and orders of the governmental entities having jurisdiction, even though the open burning is conducted in compliance with this Section.

(1) Fires (a) Fire training. Open burning is allowed for fires purposely set for the instruction and training of public and industrial fire-fighting personnel, when authorized by the appropriate governmental entity provided that authorization has been requested from the local fire chief at least ten working days prior to any burning or that written authorization has been received prior to such burning. The DEO may require written verification of the authorization from the local fire chief or fire training officer.

(2)(b) Elimination of hazards. Fires set for the elimination of a fire hazard which cannot be abated by any other means when authorized by the appropriate governmental entity. Provided prior authorization is obtained from the local fire chief, open burning is allowed for the elimination of:

(1) A fire hazard that cannot be abated by any other means.

(2) A dangerous or hazardous material when there is no other practical or lawful method of abatement or disposal if authorization is also received from the DEO prior to such burning.

(3) Fires set for the removal of dangerous or hazardous material where there is no other practical or lawful method of disposal upon approval of the Director of Air Quality Division.

(4) Camp (c) Recreational and ceremonial fires. Open burning is allowed for camp fires and other fires used solely for recreational purposes, for ceremonial occasions, or for outdoor non-commercial preparation of food.

(5)(d) Land management and land clearing operations. Open burning is allowed for the following land management and land clearing operations.

(1) Fires purposely set to forest, crop or range lands for a specific reason in the management of forests, crops or game, in accordance with practices recommended by the Oklahoma Department of Wildlife Conservation, the Oklahoma State Department of Agriculture, and the United States Forest Service.

(6)(2) The burning of trees, brush, grass, and other vegetable matter in the clearing of land, right of way maintenance operations, and agricultural crop burning if the following conditions are met: Fires purposely set for land clearing operations if conducted at least 500 feet upwind of any occupied residence other than those located on the property on which the burning is conducted, except that such burning must be conducted in open-pit incinerators in counties or areas that are or have been designated nonattainment.

(A) prevailing winds at the time of the burning must be away from any city or town, the ambient air of which may be affected by air contaminants from the burning;

(B) the location of the burning must not be adjacent (500 ft. upwind) to an occupied residence other than those located on the property on which the burning is conducted;

(C) care must be used to minimize the amount of dirt on the material being burned;

(D) oils, rubber, and other similar materials which produce unreasonable amounts of air contaminants may not be burned;

(E) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated above; and,

(F) the burning must be controlled so that a traffic hazard is not created as a result of the air contaminants being emitted.

(7)(e) Burning of domestic refuse. Where no collection and disposal service is reasonably available, the burning of refuse and other combustible materials generated in

Permanent Final Adoptions

the operation of a domestic household if the following conditions are met: domestic refuse may be burned on the property where the waste is generated.

(A) the material to be burned must not be the combined waste be from a building designed to accommodate more than three such households;

(B) the burning must be conducted on the property on which the waste is generated; and,

(C) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated.

(8)(f) Hydrocarbon burning. Open burning of hydrocarbons is allowed for:

(1) The burning of hydrocarbons which are spilled or lost as a result of pipeline breaks or other accidents involving the transportation of such materials or which are generated as wastes as the result of oil exploration, development, refining, or processing operations if the following conditions are met: The disposal of spilled hydrocarbons or the waste products of oil exploration, development, refining or processing operations which cannot be feasibly recovered or otherwise disposed of in a legal manner. Notice must be given to the DEO prior to such burning.

(A) the material cannot be practicably recovered or otherwise lawfully disposed of in some other manner;

(B) the burning must not be conducted within a city or town or in such proximity thereto that the ambient air of such city or town may be affected by the air contaminants being emitted;

(C) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated above; and,

(D) the burning must be controlled so that a traffic hazard is not created as the result of the air contaminants being emitted.

(2) The disposal of waste hydrocarbons through a flare. The owner or operator shall be required to use a smokeless flare if a condition of air pollution is determined to exist by the DEO.

(9)(g) Open-pit incinerator. The burning of any combustible material in an open-pit incinerator which has been properly designed and which is properly operated for the control of smoke and particulate matter. Except for hazardous material, any combustible material or refuse that is allowed to be burned under this Subchapter may be burned in an open-pit incinerator that is properly designed and operated for the control of smoke and particulate matter. The owner or operator of the open-pit incinerator shall not accept any material owned by other persons and shall not transport any material to the property where the

open-pit incinerator is located in order to burn the material.

(10) The burning of hydrocarbons, which must be wasted, through the use of smokeless atmospheric flares if after investigation a condition of air pollution exists.

252:100-13-8. [RESERVED]

252:100-13-9. General conditions and requirements for allowed open burning

The open burning of refuse and other combustible material may be conducted as allowed in this Subchapter only if the following conditions and requirements are met:

(1) No public nuisance is or will be created.

(2) The burning is controlled so that a traffic hazard is not created as a result of the air contaminants being emitted.

(3) The burning is conducted so that the contaminants do not adversely affect the ambient air quality of a city or town.

(4) The initial burning shall begin only between three hours after sunrise and three hours before sunset and additional fuel shall not be intentionally added to the fire at times outside these limits. This requirement does not apply to the open burning allowed under 252:100-13-7(a), (b), (c), and (d)(1).

252:100-13-10. Disaster relief

Notwithstanding the prohibition in 252:100-13-5, the Executive Director of the DEO may allow the open burning of debris resulting from a disaster if the Director determines such burning is necessary to protect public health and safety. Such approval, if granted, shall be accompanied by appropriate guidelines for burning the debris.

252:100-13-11. Responsibility for consequences of open burning

Persons who conduct open burning in accordance with the provisions of this Subchapter are not exempt or excused from the consequences, damages, or injuries that may result from such conduct, nor are they exempt or excused from complying with all applicable laws, ordinances, rules, and orders.

[OAR Docket #00-854; filed 5-4-00]

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 100. AIR POLLUTION CONTROL

[OAR Docket #00-859]

RULEMAKING ACTION:
PERMANENT final adoption

Air Quality Council

AGENDA
AIR QUALITY COUNCIL
DEPARTMENT OF ENVIRONMENTAL QUALITY
HEARING/MEETING

* 9:00 A.M.

Tuesday, October 19, 1999
Tulsa City-County Auditorium
5051 South 129 Street East Avenue
Tulsa, Oklahoma

1. Call to Order – Bill Breisch
2. Roll Call – Myrna Bruce
3. CY 2000 Meeting Schedule
 - A. Discussion by Council
4. Approval of Minutes of the August 24, 1999 Regular Meeting
5. Public Rulemaking Hearings
 - A. **OAC 252:100-4 New Source Performance Standards**

Proposal would update the incorporations by reference of the federal NSPS from 7-1-97 to 7-1-99. Previously, incorporated NSPS subparts that have been amended by the USEPA since 7-1-97 are: AA, AAa, Da, Db, Eb, and WWW. A new Subpart Ec has been added to the NSPS. Subpart Ce was added to 252:100-4-5 as an exception.

 1. Presentation – Michelle Martinez
 2. Questions and discussion by Council / Public
 3. Possible action by Council
 4. Roll call vote(s) for emergency and permanent adoption
 - B. **OAC 252:100- 5 Registration, Emission Inventory and Annual Operating Fees**

Proposal is designed to allow the Agency to bill annual operating fees on a flexible schedule; to allow the fees to be based on the most recent emission data possible; requires an owner or operator of a facility to report excess emissions on their annual emission inventory; requires inventories to be submitted one month earlier than presently required allowing fee payers five years after payment is made to notify the DEQ that they overpaid and to receive credit for such overpayment; and reducing the period of time to six months in which either the DEQ or the facility owner or operator can challenge the data or methods used to calculate the facility's emissions.

 1. Presentation – Jeanette Buttram
 2. Questions and discussion by Council / Public
 3. Possible action by Council
 4. Roll call vote(s) for permanent adoption
 - C. **OAC 252:100-9 Excess Emission and Malfunction Reporting [AMENDED]**

Proposal would simplify the language under the agency-wide re-right/de-wrong initiative including correction of typographical and grammatical errors and deletion of redundant language. Substantive changes include narrowing the scope of the rule to minor facilities only. A new condition was added to explain when excess emissions from a process are due to a malfunction and when they are due to negligent, marginal, or unsafe operation. The new language establishes a rebuttable presumption that the combined time of all excess emissions from a process due to a malfunction does not exceed eight hours or 1.5% of the process's operation time, whichever is greater, in a 3-month period. The burden of proving that excess emissions occurring more often are due to a malfunction rather than negligent, marginal, or unsafe operation is on the owner or operator of the process.

 1. Presentation – Jeanette Buttram
 2. Questions and discussion by Council / Public
 3. Possible action by Council
 4. Roll call vote(s) for permanent adoption
 - D. **OAC 252:100-13. Prohibition of Open Burning**

Proposal would simplify the language under the agency-wide re-right/de-wrong initiative including consolidating the general conditions and requirements for allowed open burning into a new section. Substantive changes would add certain definitions and notification requirements.

 1. Presentation – Jeanette Buttram
 2. Questions and discussion by Council / Public
 3. Possible action by Council
 4. Roll call vote(s) for permanent adoption

- E. COMBINED**
OAC 252:100-19 Particulate Matter Emissions from Fuel-burning Equipment [AMENDED]
OAC 252:100-21 Particulate Matter Emissions from Wood-Waste Burning Equipment [REVOKED]
OAC 252:100-27 Particulate Matter Emissions from Industrial and Other Processes and Operation [REVOKED]
Appendix C Particulate Matter Emissions Limits for Fuel Burning Equipment [REVOKED]
Appendix D Particulate Matter Emission Limits for Wood-Waste Burning Equipment [REVOKED]
Appendix C Particulate Matter Emissions Limits for Fuel Burning Equipment [NEW]
Appendix D Particulate Matter Emission Limits for Wood-Waste Burning Equipment [NEW]
 Proposal would merge requirements into SC 19 and revoke SC 21 and SC 27. SC 19, as proposed, would simplify the language under the agency-wide re-right/de-wrong initiative. Also a Permit by Rule for particulate matter facilities is being proposed for SC 19. The graphics in Appendices C and D would be replaced by two new tabular appendices.
1. Presentation – Max Price
 2. Questions and discussion by Council / Public
 3. Possible action by Council
 4. Roll call vote(s) for permanent adoption
- F. OAC 252:100-35 Control of Emission of Carbon Monoxide [AMENDED]**
 Proposal would simplify and clarify the language under the agency-wide re-right/de-wrong initiative; and narrow the scope to specific sources that are the primary emitters of carbon monoxide. Other changes include addition of definitions "existing source" and "new source" and the replacement of "foundry cupola" with "gray iron cupola". Also, Section 35-3 would be revoked because performance testing requirements are already provided for in SC 8 and SC 43.
1. Presentation – Michelle Martinez
 2. Questions and discussion by Council / Public
 3. Possible action by Council
 4. Roll call vote(s) for emergency and permanent adoption
- H. OAC 252:100-41 Sections 15 and 16, Control of Emission of Hazardous and Toxic Air Contaminants [AMENDED]**
 Proposal would simplify and clarify the language under the agency-wide re-right/de-wrong initiative. The proposed changes to section 15 would incorporate by reference the MACT standards for hazardous air pollutants in 40 CFR 63 promulgated by EPA from 7-1-98 through 7-1-99. The proposed changes to section 16 would update to 7-1-99 the NESHAP found in 40 CFR 61.
1. Presentation – Cheryl Bradley
 2. Questions and discussion by Council / Public
 3. Possible action by Council
 4. Roll call vote(s) for emergency and permanent adoption
- I. OAC 252:100-47 Control of Emission from Existing Municipal Solid Waste Landfills [AMENDED]**
 Proposal would amend to update the incorporation by reference of 40 CFR 60.751 through 60.759 to 7-1-99.
1. Presentation – Cheryl Bradley
 2. Questions and discussion by Council / Public
 3. Possible action by Council
 4. Roll call vote(s) for emergency and permanent adoption
6. Division Director's Report – Eddie Terrill
 7. New Business – Any matter not known about, or which could not have been reasonably foreseen, prior to the time of posting the agenda.
 8. Adjournment – Next Regular Meeting

Tuesday, December 14, 1999 DEQ Multi-Purpose Room

* Council decided at its August 24 meeting to begin early due to the number of agenda items

Lunch Break, if necessary

October 1, 1999

MEMORANDUM

TO: Air Quality Council

FROM: Eddie Terrill, Division Director ^{CT}
Air Quality Division

SUBJECT: Modifications to Subchapter 13

Enclosed is a copy of the proposed draft modifications to Subchapter 13, Prohibition of Open Burning. The rule will be brought to public hearing on October 19, 1999. Many of the proposed changes to the rule are intended to simplify and clarify the rule as part of the agency wide re-right/de-wrong initiative and include consolidating the general conditions and requirements for allowed open burning into a new section. A few substantive changes were made, such as adding definitions for "domestic refuse" and "land clearing operation" and a new section on disaster relief procedures. In some instances, the requirement to notify the DEQ or other appropriate official for authorization to burn was added. Information regarding open-pit incinerators was moved into a new section and amended. Owners or operators with an open-pit incinerator would be required to register with the local DEQ office and, if they locate an open-pit incinerator in the same pit for a period exceeding 90 days in a 365-day period, they would be required to obtain a permit from the Division.

Staff will recommend the rule be considered again at the next Air Quality Council meeting on December 14, 1999.

Enclosures: 1

SUBCHAPTER 13. ~~PROHIBITION OF~~ OPEN BURNING

Section

- 252:100-13-11. Responsibility for consequences of open burning

SUBCHAPTER 13. ~~PROHIBITION OF OPEN BURNING~~

252:100-13-1. Purpose

~~This Subchapter is for the purpose of preventing, abating, and controlling air pollution resulting from air contaminants released in the open burning of refuse and other combustible materials. The purpose of this Subchapter is to control the open burning of refuse and other combustible materials.~~

252:100-13-2. Definitions

The following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"**Combustible materials**" means any substance which will readily burn and shall include those substances which, although generally considered incombustible, are or may be included in the mass of the material burned or to be burned.

"Domestic refuse" means combustible materials or refuse that normally result from the function of life at a residence, such as kitchen garbage, untreated lumber, cardboard boxes, packaging, clothing, grass, leaves, and branch trimmings. It does not include such things as tires, non-wood construction debris, furniture, carpet, electrical wire, and appliances.

"Land clearing operation" means the uprooting, cutting, or clearing of vegetation in preparation for the construction of buildings, the development of residential, commercial, agricultural, or industrial properties, and for the construction and maintenance of right-of-ways. It does not include the clearing of vegetation such as trimmings, fallen limbs, branches, or leaves, or other wastes from routine property maintenance activities.

"Open burning" means the burning of combustible materials in such a manner that the products of combustion are emitted directly to the outside atmosphere.

"Open-pit incinerator" means a device consisting of a pit (into which the material to be combusted is placed) and nozzles, pipes, and other appurtenances designed and arranged in a manner to deliver additional air and/or auxiliary fuel to, or near, the zone of combustion so that theoretically complete combustion is accomplished or approached.

"Products of combustion" means all particulate and gaseous air contaminants emitted as a result of the burning of refuse and combustible materials.

"Refuse" means garbage, rubbish, and all other wastes generated by a trade, business, industry, building operation, or household.

252:100-13-3. Scope [REVOKED]

~~This Subchapter shall apply to all operations involving open burning except those specifically exempted by 252:100-13-7.~~

252:100-13-4. Effective date [REVOKED]

~~The effective date of this Subchapter shall be January 1, 1971.~~

252:100-13-5. Open burning prohibited

~~No person shall cause, suffer, allow, or permit open burning of refuse and other combustible material except as may be allowed in compliance with OAC 252:100-13-7. The open burning of refuse and combustible materials is prohibited unless conducted in strict accordance with the conditions and requirements contained in 252:100-13-7, 252:100-13-8 and 252:100-13-9. Under no circumstances shall the open burning of tires be allowed.~~

252:100-13-6. Salvage operations utilizing open burning prohibited [REVOKED]

~~No person shall cause, suffer, allow, or permit open burning of combustible material in connection with the salvage of motor vehicles, tires, oil and similar substances, containers, coated or painted wire and metals, and other materials.~~

252:100-13-7. ~~Permissible~~Allowed open burning

~~The open burning of refuse and other combustible material may be conducted as specified in the paragraphs set forth below if no public nuisance is or will be created and if the burning is not prohibited by, and is conducted in compliance with, other applicable laws and the ordinances, rules, and orders of governmental entities having jurisdiction, including air pollution control ordinances, rules, and orders. The authority to conduct open burning under the provisions of this Section does not exempt or excuse a person from the consequences, damages, or injuries which may result from such conduct nor does it excuse or exempt any person from complying with all applicable laws, ordinances, rules, and orders of the governmental entities having jurisdiction, even though the open burning is conducted in compliance with this Section.~~

~~(1)(a) **Fire training.** Fires Open burning is allowed for fires purposely set for the instruction and training of public and industrial fire-fighting personnel, when authorized by the appropriate governmental entity provided that authorization from the local fire chief has been issued prior to any burning. The DEQ may require written verification of the authorization from the local fire chief or fire training officer.~~

~~(2)(b) **Elimination of hazards.** Fires set for the elimination of a fire hazard which cannot be abated by any other means when authorized by the appropriate governmental entity. Provided prior authorization is obtained from the local fire chief, open burning is allowed for the elimination of:~~

~~(1) A fire hazard that cannot be abated by any other means.~~

~~(2) A dangerous or hazardous material when there is no other practical or lawful method of abatement or disposal if authorization is also received from the DEQ prior to such burning.~~

~~(3) Fires set for the removal of dangerous or hazardous material where there is no other practical or lawful method of disposal upon approval of the Director of Air Quality Division.~~

~~(4)(c) **Recreational and ceremonial fires.** Open burning is allowed for ~~Camp~~camp fires and other fires used solely for recreational purposes, ~~for~~ceremonial occasions, or ~~for~~outdoor non-commercial~~

preparation of food.

(5)(d) Land management and land clearing operations. Open burning is allowed for the following land management and land clearing operations.

(1) Fires purposely set to forest, crop or range lands for a specific reason in the management of forests, crops or game, in accordance with practices recommended by the Oklahoma Department of Wildlife Conservation, the Oklahoma State Department of Agriculture, and the United States Forest Service.

~~(6)(2) The burning of trees, brush, grass, and other vegetable matter in the clearing of land, right of way maintenance operations, and agricultural crop burning if the following conditions are met.~~ Fires purposely set for land clearing operations if conducted at least 500 feet upwind of any occupied residence other than those located on the property on which the burning is conducted.

~~(A) prevailing winds at the time of the burning must be away from any city or town, the ambient air of which may be affected by air contaminants from the burning;~~

~~(B) the location of the burning must not be adjacent (500 ft. upwind) to an occupied residence other than those located on the property on which the burning is conducted;~~

~~(C) care must be used to minimize the amount of dirt on the material being burned;~~

~~(D) oils, rubber, and other similar materials which produce unreasonable amounts of air contaminants may not be burned;~~

~~(E) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated above; and,~~

~~(F) the burning must be controlled so that a traffic hazard is not created as a result of the air contaminants being emitted.~~

(7)(e) Burning of domestic refuse. Where no collection and disposal service is reasonably available, the burning of refuse and other combustible materials generated in the operation of a domestic household if the following conditions are met: domestic refuse may be burned on the property where the waste is generated.

~~(A) the material to be burned must not be the combined waste from a building designed to accommodate more than three such households;~~

~~(B) the burning must be conducted on the property on which the waste is generated; and,~~

~~(C) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated.~~

(8)(f) Hydrocarbon burning. Open burning of hydrocarbons is allowed for:

(1) The burning of hydrocarbons which are spilled or lost as a result of pipeline breaks or other accidents involving the transportation of such materials or which are generated as wastes as the result of oil exploration, development, refining, or processing operations if the following conditions are met: The

disposal of spilled hydrocarbons or the waste products of oil exploration, development, refining or processing operations which cannot be feasibly recovered or otherwise disposed of in a legal manner. Authorization must be obtained from the DEQ prior to such burning.

~~(A) the material cannot be practicably recovered or otherwise lawfully disposed of in some other manner;~~

~~(B) the burning must not be conducted within a city or town or in such proximity thereto that the ambient air of such city or town may be affected by the air contaminants being emitted;~~

~~(C) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated above; and,~~

~~(D) the burning must be controlled so that a traffic hazard is not created as the result of the air contaminants being emitted.~~

(2) The disposal of waste hydrocarbons through a flare. The owner or operator shall be required to use a smokeless flare if a condition of air pollution is determined to exist by the DEQ.

~~(9) The burning of any combustible material in an open pit incinerator which has been properly designed and which is properly operated for the control of smoke and particulate matter.~~

~~(10) The burning of hydrocarbons, which must be wasted, through the use of smokeless atmospheric flares if after investigation a condition of air pollution exists.~~

252:100-13-8. Open-pit incinerators

(a) Open burning of combustible material in an open-pit incinerator, without an AOD permit, is allowed if the incinerator is registered and properly designed and operated for the control of smoke and particulate matter.

(b) Hazardous materials may not be burned in an open-pit incinerator unless there is no other practical or lawful method of abatement or disposal and such burning has been approved in writing by both the local fire chief and the DEQ.

(c) Before an open-pit incinerator may begin operation, the owner or operator must register the open-pit incinerator with the local DEQ office. An open-pit incinerator shall not be located in the same pit for a period exceeding 90 days in a 365 day period unless the owner or operator has obtained a permit from the Division.

252:100-13-9. General conditions and requirements for allowed open burning

The open burning of refuse and other combustible material may be conducted as allowed in this Subchapter only if the following conditions and requirements are met:

(1) No public nuisance is or will be created.

(2) The burning is controlled so that a traffic hazard is not created as a result of the air contaminants being emitted.

(3) The burning is conducted so that the contaminants do not adversely affect the ambient air quality of a city or town.

(4) The initial burning shall begin only between three hours after sunrise and three hours before sunset and additional

fuel shall not be intentionally added to the fire at times outside these limits. This requirement does not apply to the open burning allowed under 252:100-13-7(a), (b), (c), and (d) (1).

252:100-13-10. Disaster relief

Notwithstanding the prohibition in 252:100-13-5, the Executive Director of the DEQ may allow the open burning of debris resulting from a disaster if the Director determines such burning is necessary to protect public health and safety. Such approval, if granted, shall be accompanied by appropriate guidelines for burning the debris.

252:100-13-11. Responsibility for consequences of open burning

Persons who conduct open burning in accordance with the provisions of this Subchapter are not exempt or excused from the consequences, damages, or injuries that may result from such conduct, nor are they exempt or excused from complying with all applicable laws, ordinances, rules, and orders.

Notice of Public Meeting for October 19, 1999 was forwarded to the Office of the Secretary of State giving the time, date, and place of the meeting. Agendas were posted at the entrance doors at the Tulsa City-County Health Department.

Call to Order - Mr. Breisch, Chairman, called the meeting to order and roll call was taken as follows: Mr. Wilson - aye; Mr. Fallon - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Kilpatrick - aye; Mr. Breisch - aye. Dr. Canter, and Dr. Grosz did not attend. Mr. Breisch announced that Ms. Slagell had offered her resignation to the Governor.

CY 2000 Meeting Schedule - Council was presented with dates emulating the past years of the third Tuesday in February, April, June, August, October, and December. There was discussion to change the day of week to Wednesday of these months which would accommodate both staff and Council. Council voted to continue this item to the December 14 meeting. Roll call as follows: Mr. Wilson - aye; Mr. Fallon - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Kilpatrick - aye; Mr. Breisch - aye.

Approval of Minutes - Mr. Breisch entertained a motion to approve the Minutes of the August 24, 1999 Public Meeting/Hearings. Motion was made by Mr. Branecky to approve the Minutes as presented and second was made by Mr. Kilpatrick. Roll call as follows: Mr. Wilson - aye; Mr. Fallon - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Kilpatrick - aye; Mr. Breisch - aye.

Protocol Statement - As protocol officer, Mr. Dyke convened the hearings by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes, Sections 2-5-101 through 2-5-118. Mr. Dyke entered the Agenda and the Oklahoma Register Notice into the record.

PUBLIC HEARING

OAC 252:100-4

New Source Performance Standards [AMENDED]

Ms. Michelle Martinez made staff presentation advising Council that the proposed amendments to Subchapter 4 would update the incorporations by reference of the federal NSPS from July 1, 1997 to July 1, 1999. She pointed out that previously incorporated NSPS subparts that had been amended by the EPA since July 1, 1997 were: AA, AAa, Da, Db, Eb, and WWW. She advised that a new Subpart Ec had been added to the NSPS and that Subpart Ce was added to 252:100-4-5. She advised that this was the first time for the proposal to be considered, but staff's recommendation would be to request that the rule be sent to the Environmental Quality Board for permanent and emergency adoption. She pointed out that since the amendments update the incorporation by reference of new federal rules, adoption as an emergency would allow the amended rule to take effect earlier than June 1, 2000 and make state rules consistent with federal rules.

Mr. Breisch entertained motion to forward this rule to the Environmental Quality Board for both emergency and permanent adoption. Motion was made by Mr. Kilpatrick and second to the motion was by Ms. Myers. Roll call as follows: Mr. Wilson - aye; Mr. Fallon - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Kilpatrick - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-5

Registration, Emission Inventory and Annual Operating Fees [AMENDED]

Ms. Jeanette Buttram made the staff presentation advising that the proposed changes to Subchapter 5 were designed to allow the agency to bill annual operating fees on a flexible schedule, and that the changes should also allow the fees to be based on the most recent emission data possible. Ms. Buttram advised that the proposed rule language would also require an owner or operator of a facility to report excess emissions on their annual emission inventory. Ms. Buttram pointed out that substantive changes included the requirement that inventories were to be submitted one month earlier than presently required which would allow fee payers five years after payment is made to notify the DEQ that they overpaid and to receive credit for such overpayment. That change would also reduce the period of time to six months in which either the DEQ or the facility owner or operator could challenge the data or methods used to calculate the facility's emissions.

Ms. Buttram advised that comments had been received from Fort James and EPA which were included in this proposal and that comments from Weyerhaeuser received the day before would be considered in the next draft of the rule; therefore, staff recommended that the rule be continued to the December meeting.

Comments and questions were discussed from Council members and the audience. Comments were heard from Stephen Landers of Ft. James; Mike Wood, Weyerhaeuser; Howard Ground, Central and Southwest; Bill Fishback; Mid-Continent Oil and Gas; Tom Bauckham, Reliant Energy; Gary Collins, Terra. Following discussion, Mr. Breisch entertained motion to continue

the rule to Council's December 14 meeting per staff recommendation. Motion to continue was made by Ms. Myers with the second made by Mr. Wilson. Roll call as follows: Mr. Wilson - aye; Mr. Fallon - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Kilpatrick - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-9

Excess Emission And Malfunction Reporting [AMENDED]

Ms. Jeanette Buttram gave the staff presentation advising that the proposed changes to Subchapter 9 included correction of typographical and grammatical errors and deletion of redundant language and was simplified and clarified according to the agency-wide re-right/de-wrong initiative. Ms. Buttram pointed out substantive changes to the rule which included narrowing the scope of the rule to minor facilities only. She advised that a new condition was added to explain when excess emissions from a process are due to a malfunction and when they are due to negligent, marginal, or unsafe operation advising that the new language would establish a rebuttable presumption that the combined time of all excess emissions from a process due to a malfunction does not exceed eight hours or 1.5 % of the process's operation time, whichever is greater, in a three-month period. Ms. Buttram added that the burden of proving that excess emissions occurring more often are due to a malfunction rather than negligent, marginal, or unsafe operation is on the owner or operator of the process.

Ms. Buttram entered into the record comments received from Mid-Continent Oil and Gas Association and from EPA. She further advised that the EPA comments indicated that further changes might need to be made to the rule due to their recent review of Oklahoma's SIP. Ms. Buttram advised that due to these comments, staff recommendation would be to continue this rule to the December meeting to allow staff more time to review the EPA guidance document. Mr. Tom Diggs, EPA, was asked to explain that document in detail and accepted comments regarding same. Additional comments were made by Bill Fishback.

Mr. Breisch entertained motion to continue this rule to the December meeting. Motion was made by Mr. Branecky with the second by Mr. Fallon. Roll call as follows: Mr. Wilson - aye; Mr. Fallon - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Kilpatrick - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-13

Prohibition of Open Burning [AMENDED]

Mr. Dyke again called upon Ms. Jeanette Buttram who advised that the proposed changes to Subchapter 13 would simplify and clarify the Subchapter as a part of the agency-wide re-right/de-wrong initiative. She pointed out that such changes include consolidating the general conditions and requirements for allowed open burning into a new section; and that a few substantive changes were made such as adding definitions for "domestic refuse" and "land clearing operation" and a section on disaster relief procedures. Ms. Buttram continued stating

that in some instances, the requirement to notify the DEQ or other appropriate official for authorization to burn was added and that the open-pit incinerator requirements were moved to a new section. She pointed out the proposal would require owners or operators to register with their local DEQ office; however, if the owner or operator anticipates operating an open-pit incinerator in the same pit for more than 90 days in a 365-day period, they would be required to obtain a permit and pay the required permit fee adding that hazardous materials may not be burned in an open-pit incinerator unless prior written approval has been obtained from both the local fire chief and the DEQ.

Ms. Buttram entered written comments from EPA and a letter from the City of Hobart into the record.

Following questions and discussion by Council, Mr. Breisch entertained motion to continue this rule to the December meeting. Motion was made by Ms. Myers with the second by Mr. Fallon. Roll call as follows: Mr. Wilson - aye; Mr. Fallon - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Kilpatrick - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARINGS (COMBINED HEARINGS ON SC 19, SC 21, and SC 27)

OAC 252:100-19 Particulate Matter Emissions from Fuel-burning Equipment [AMENDED]

OAC 252:100-21 Particulate Matter Emissions from Wood-Waste Burning Equipment [REVOKED]

OAC 252:100-27 Matter Emissions from Industrial and Other Processes and Operation [REVOKED]

APPENDIX C Particulate Matter Emissions Limits for Fuel Burning Equipment [REVOKED]

APPENDIX D Particulate Matter Emission Limits for Wood-Waste Burning Equipment [REVOKED]

APPENDIX C Particulate Matter Emissions Limits for Fuel Burning Equipment [NEW]

APPENDIX D Particulate Matter Emission Limits for Wood-Waste Burning Equipment [NEW]

Mr. Dyke called upon Mr. Max Price to make the staff presentation regarding these combined rules. Mr. Price advised that Subchapters 19, 21, and 27 all deal with particulate matter (PM) emissions and that the proposed changes merged the requirements of Subchapter 21 and Subchapter 27 into Subchapter 19; then Subchapters 21 and 27 would be revoked. Mr. Price pointed out that Subchapter 19 as proposed would be simplified and clarified according to the agency-wide re-right/de-wrong initiative. He advised that a permit by rule for particulate matter facilities is being proposed for Subchapter 19. Mr. Price also advised that the proposal included that Appendix C and Appendix D would be revoked in favor of two new tabular appendices.

Mr. Mike Wood, Weyerhaeuser, commented regarding the definition of "wood fuel". After much discussion, motion was made to by Mr. Wilson to amend Subchapter 19 to include the wording "for any wood derived fuel as approved by the Division"; to revoke subchapters 21 and 27; to revoke both Appendix C and Appendix D in favor of tabular appendices; and to send the rules to the Environmental Quality Board in one package for adoption as a permanent rule. Mr. Kilpatrick seconded that motion. Roll call as follows: Mr. Wilson - aye; Mr. Fallon - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Kilpatrick - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-35

Control Of Emission Of Carbon Monoxide [AMENDED]

Mr. Dyke called upon Ms. Michelle Martinez to make staff presentation. Ms. Martinez stated that the proposed changes to Subchapter 35 would simplify and clarify the Subchapter as a part of the agency-wide re-right/de-wrong initiative; and that the scope of the Subchapter would be narrowed to specific sources that are the primary contributors of carbon monoxide emissions. Ms. Martinez added that other changes included the addition of the definitions "existing source" and "new source" and the replacement of "foundry cupola" with "gray iron cupola". She further advised that Section 35-3, Performance Testing, would be revoked because performance testing requirements are already provided for in Subchapters 8 and 43.

Ms. Martinez advised that staff's recommendation was to send the rule to the Environmental Quality Board for adoption as permanent and emergency. Mr. Breisch entertained motion which was made by Mr. Fallon. The second was made by Ms. Myers. Roll call as follows: Mr. Wilson - aye; Mr. Fallon - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Kilpatrick - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-41 Sections 15 and 16

Control Of Emission Of Hazardous and Toxic Air Contaminants [AMENDED]

Mr. Dyke called upon Ms. Cheryl Bradley who advised that changes are being proposed for section 15 would incorporate by reference the Maximum Achievable Control Technology (MACT) standards for hazardous air pollutants in 40 CFR 63 that have been promulgated by the EPA from July 1, 1998, through July 1, 1999. These are subparts HH, SS, TT, UU, WW, YY, CCC, DDD, EEE, GGG, HHH, III, LLL, MMM, NNN, PPP, TTT, and XXX. Ms. Bradley continued that the DEQ is also proposing to update to July 1, 1999 the incorporation by reference in 252:100-41-16 of the National Emission Standards for Hazardous Air Pollutants (NESHAP) found in 40 CFR 61. She added that other minor revisions are proposed to Section 15 and 16 to clarify, simplify and correct these sections as required by statute.

Ms. Bradley advised that staff's recommendation would be to send to the rule to the Environmental Quality Board for adoption as permanent and emergency rule. She advised that since the amendments update the incorporation by reference of new federal rules, adoption as an emergency rule would allow the amended rules to take effect earlier and minimize the lag time in making the state program consistent with the federal program. Mr. Breisch entertained motion which was made by Mr. Kilpatrick. The second was made by Mr. Wilson. Roll call as follows: Mr. Wilson - aye; Mr. Fallon - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Kilpatrick - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-47

Control of Emissions from Existing Municipal Solid Waste Landfills [AMENDED]

Mr. Dyke again called upon Ms. Cheryl Bradley who advised that the modifications to Subchapter 47 would update the incorporation by reference of 40 CFR 60.751 through 60.759 to July 1, 1999. She advised that one comment had been received from the EPA in support of the proposed amendments. She continued that it would be staff's recommendation to send the rule to the Environmental Quality Board for permanent and emergency adoption as adoption as an emergency rule would allow the amended rule to take effect earlier than June 1, 2000 and thereby minimize confusion for regulated landfills. Mr. Breisch entertained motion which was made by Mr. Fallon. The second was made by Ms. Myers. Roll call as follows: Mr. Wilson - aye; Mr. Fallon - aye; Ms. Myers - aye; Mr. Branecky - aye; Mr. Kilpatrick - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes

DIVISION DIRECTOR'S REPORT

Mr. Dyke announced that the Council representative for agriculture, Meribeth Slagell, had turned in her letter of resignation from the Council. Also, Scott Thomas stated that due to a recent remand of the revised ozone, PM-2.5 and PM-10, staff plans on bringing this matter to public hearing at the December Council.

NEW BUSINESS - It was decided that the next meeting would again begin at 9:00 a.m. due to the number of agenda items and would follow the same format.

ADJOURNMENT With no further business, meeting was adjourned with announcement that the next regularly scheduled meeting would be December 14, 1999 in the Multipurpose Room of the DEQ in Oklahoma City beginning at 9:00 a.m.

NOTE: The sign-in sheet is attached as an official part of these Minutes.

AGENDA
AIR QUALITY COUNCIL
DEPARTMENT OF ENVIRONMENTAL QUALITY
HEARING/MEETING
*** 9:00 A.M.**
Tuesday, December 14, 1999
DEQ Multi-Purpose Room, First Floor
707 North Robinson
Oklahoma City Oklahoma

1. Call to Order – Bill Breisch
2. Roll Call – Myrna Bruce
3. CY 2000 Meeting Schedule
 - A. Discussion by Council
 - B. Roll call vote
4. Resolution for Meribeth Slagell
5. Approval of Minutes of the October 19, 1999 Regular Meeting
6. Public Rulemaking Hearings

A. OAC 252:100 Appendices E and F [AMENDED]

Appendix E Primary Ambient Air Quality Standards [REVOKED]

Appendix E Primary Ambient Air Quality Standards [NEW]

Appendix F Secondary Ambient Air Quality Standards [REVOKED]

Appendix F Secondary Ambient Air Quality Standards [NEW]

Proposal would restore the primary and secondary ambient air quality standards for ozone and particulate matter to what they were prior to June 1, 1999. The 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored. The PM-2.5 standard would be revoked along with the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard.

1. Presentation – Michelle Martinez
2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for permanent adoption

B. OAC 252:100- 5 Registration, Emission Inventory and Annual Operating Fees [AMENDED]

Proposal is designed to allow the Agency to bill annual operating fees on a flexible schedule; to allow the fees to be based on the most recent emission data possible; to require an owner or operator of a facility to report excess emissions on their annual emission inventory; to require inventories to be submitted one month earlier than presently required; to allow fee payers five years after payment is made to notify the DEQ that they overpaid and to receive credit for such overpayment; and to reduce the period of time to six months in which either the DEQ or the facility owner or operator can challenge the data or methods used to calculate the facility's emissions.

1. Presentation – Jeanette Buttram
2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for permanent adoption

C. OAC 252:100-9 Excess Emission and Malfunction Reporting [AMENDED]

Proposal would simplify the language under the agency-wide re-right/de-wrong initiative, including correction of typographical and grammatical errors and deletion of redundant language. Substantive changes include establishing a time limit on excess emissions caused by properly reported malfunctions, startup/shutdowns, and maintenance procedures. The burden of proving that excess emissions occurring more than eight hours or 1.5 percent of the process's operation time in a 3-month period are due to excusable malfunctions, startup/shutdowns or maintenance procedures rather than negligent, marginal, or improper operation is on the owner or operator of the process. Language was added to explain that compliance with this Subchapter will not exempt sources from complying with any applicable federal requirement; and additional demonstration requirements for malfunctions, maintenance, and startup/shutdowns were added under proposed section 252:100-9-3.2, Demonstration of cause.

1. Presentation – Jeanette Buttram

2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for permanent adoption

D. OAC 252:100-13. Prohibition of Open Burning [AMENDED]

Proposal would simplify the language under the agency-wide re-right/de-wrong initiative, including consolidating the general conditions and requirements for allowed open burning into a new section. Substantive changes would add definitions for "domestic refuse" and "land clearing operation" along with a section on disaster relief procedures. In some instances, the requirement to notify the DEQ or other appropriate official for authorization to burn was added. In addition, the open-pit incinerator requirements were expanded and moved to a new section. Also the rule would only allow material from a land clearing operation to be burned in an open-pit incinerator.

1. Presentation – Jeanette Buttram
2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for permanent adoption

E. OAC 252:100- 23 Control of Emissions from Cotton Gins [AMENDED]

1. Presentation – Max Price
2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for emergency adoption

Proposal would amend OAC 252:100-23-3(a) to remove references to OAC 252:100-27, which will be revoked effective June 1, 2000, and replace them with new section OAC 252:100-19-12, to take effect June 1, 2000.

F. OAC 252:100-24 Control of Emissions from Grain Elevators [AMENDED]

1. Presentation – Max Price
2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for emergency adoption

Proposal would amend OAC 252:100-24-3(a)(1) and (2) to remove references to OAC 252:100-27, which will be revoked effective June 1, 2000, and replace them with new section OAC 252:100-19-12, to take effect June 1, 2000.

G. OAC 252:2-15 Environmental Permit Processing Times [AMENDED]

The proposal would change the terms used in 252:2-15-40, 41 and 72 to be consistent with those used in 252:100, Air Pollution Control. The terms "minor source(s)" and "major facility(ies)" would be changed to "minor facility(ies)" and "Part 70 source(s)", respectively.

1. Presentation – Cheryl Bradley
2. Questions and discussion by Council / Public
3. Possible action by Council
4. Roll call vote(s) for permanent adoption

7. Division Director's Report – Eddie Terrill

8. New Business – Any matter not known about, or which could not have been reasonably foreseen, prior to the time of posting the agenda.

9. Adjournment – Next Regular Meeting

Date and Time: To Be Announced
Place: DEQ Multi-Purpose Room - OKC

* Council decided at its October 19 meeting to begin at 9:00 a.m. due to the number of agenda items.

Lunch Break, if necessary

Should you desire to attend but have a disability and need an accommodation, please notify our Department three days in advance at (405) 720-4100.

November 30, 1999

MEMORANDUM

TO: Air Quality Council

FROM: Eddie Terrill, Director ^{C.A.}
Air Quality Division

SUBJECT: Modifications to Subchapter 13

Enclosed is a copy of the proposed draft modifications to Subchapter 13, Prohibition of Open Burning. The rule was presented at the October 19, 1999, Council meeting and will be brought to public hearing again on December 14, 1999. Changes to the rule since the last council meeting include a new condition for land management and land clearing operations that will require the use of open-pit incinerators in counties or areas that are or have been designated nonattainment. We will also recommend that the proposed section for open-pit incinerators not be included in the final rule. Instead, the existing language on open-pit incinerators was clarified and expanded.

Staff will suggest that the proposed rule as amended be recommended for adoption by the Board as a permanent rule.

Enclosures: 1

SUBCHAPTER 13. ~~PROHIBITION OF~~ OPEN BURNING

Section

- 252:100-13-1. Purpose
- 252:100-13-2. Definitions
- 252:100-13-3. Scope [REVOKED]

- 252:100-13-11. Responsibility for consequences of open burning

SUBCHAPTER 13. ~~PROHIBITION OF OPEN BURNING~~

252:100-13-1. Purpose

~~This Subchapter is for the purpose of preventing, abating, and controlling air pollution resulting from air contaminants released in the open burning of refuse and other combustible materials. The purpose of this Subchapter is to control the open burning of refuse and other combustible materials.~~

252:100-13-2. Definitions

The following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Combustible materials" means any substance which will readily burn and shall include those substances which, although generally considered incombustible, are or may be included in the mass of the material burned or to be burned.

"Domestic refuse" means combustible materials or refuse that normally result from the function of life at a residence, such as kitchen garbage, untreated lumber, cardboard boxes, packaging, clothing, grass, leaves, and branch trimmings. It does not include such things as tires, non-wood construction debris, furniture, carpet, electrical wire, and appliances.

"Land clearing operation" means the uprooting, cutting, or clearing of vegetation in preparation for the construction of buildings, the development of residential, commercial, agricultural, or industrial properties, and for the construction and maintenance of right-of-ways. It does not include the clearing of vegetation such as trimmings, fallen limbs, branches, or leaves, or other wastes from routine property maintenance activities.

"Open burning" means the burning of combustible materials in such a manner that the products of combustion are emitted directly to the outside atmosphere.

"Open-pit incinerator" means a device consisting of a pit (into which the material to be combusted is placed) and nozzles, pipes, and other appurtenances designed and arranged in a manner to deliver additional air and/or auxiliary fuel to, or near, the zone of combustion so that theoretically complete combustion is accomplished or approached.

"Products of combustion" means all particulate and gaseous air contaminants emitted as a result of the burning of refuse and combustible materials.

"Refuse" means garbage, rubbish, domestic refuse and all other wastes generated by a trade, business, industry, building operation, or household.

252:100-13-3. Scope [REVOKED]

~~This Subchapter shall apply to all operations involving open burning except those specifically exempted by 252:100-13-7.~~

252:100-13-4. Effective date [REVOKED]

~~The effective date of this Subchapter shall be January 1, 1971.~~

252:100-13-5. Open burning prohibited

~~No person shall cause, suffer, allow, or permit open burning of refuse and other combustible material except as may be allowed in compliance with OAC 252:100-13-7.~~ The open burning of refuse and combustible materials is prohibited unless conducted in strict accordance with the conditions and requirements contained in 252:100-13-7, 252:100-13-8 and 252:100-13-9. Under no circumstances shall the open burning of tires be allowed.

[Agency Note: Staff will propose reference to 252:100-13-8 not be included in the final rule recommended to the Environmental Quality Board if section 100-13-8 is not included in the final rule]

252:100-13-6. Salvage operations utilizing open burning prohibited [REVOKED]

~~No person shall cause, suffer, allow, or permit open burning of combustible material in connection with the salvage of motor vehicles, tires, oil and similar substances, containers, coated or painted wire and metals, and other materials.~~

252:100-13-7. ~~Permissible~~ Allowed open burning

~~The open burning of refuse and other combustible material, may be conducted as specified in the paragraphs set forth below if no public nuisance is or will be created and if the burning is not prohibited by, and is conducted in compliance with, other applicable laws and the ordinances, rules, and orders of governmental entities having jurisdiction, including air~~

~~pollution control ordinances, rules, and orders. The authority to conduct open burning under the provisions of this Section does not exempt or excuse a person from the consequences, damages, or injuries which may result from such conduct nor does it excuse or exempt any person from complying with all applicable laws, ordinances, rules, and orders of the governmental entities having jurisdiction, even though the open burning is conducted in compliance with this Section.~~

~~(1)(a) Fire training. Fires Open burning is allowed for fires purposely set for the instruction and training of public and industrial fire-fighting personnel, when authorized by the appropriate governmental entity provided that authorization from the local fire chief has been issued prior to any burning. The DEQ may require written verification of the authorization from the local fire chief or fire training officer.~~

~~(2)(b) Elimination of hazards. Fires set for the elimination of a fire hazard which cannot be abated by any other means when authorized by the appropriate governmental entity. Provided prior authorization is obtained from the local fire chief, open burning is allowed for the elimination of:~~

~~(1) A fire hazard that cannot be abated by any other means.~~

~~(2) A dangerous or hazardous material when there is no other practical or lawful method of abatement or disposal if authorization is also received from the DEQ prior to such burning.~~

~~(3) Fires set for the removal of dangerous or hazardous material where there is no other practical or lawful method of disposal upon approval of the Director of Air Quality Division.~~

~~(4)(c) Recreational and ceremonial fires. Open burning is allowed for Campcamp fires and other fires used solely for recreational purposes, ~~for~~ ceremonial occasions, or ~~for~~ outdoor non-commercial preparation of food.~~

~~(5)(d) Land management and land clearing operations. Open burning is allowed for the following land management and land clearing operations.~~

~~(1) Fires purposely set to forest, crop or range lands for a specific reason in the management of forests, crops or game, in accordance with practices recommended by the Oklahoma Department of Wildlife Conservation, the Oklahoma State Department of Agriculture, and the United States Forest Service.~~

~~(6)(2) The burning of trees, brush, grass, and other vegetable matter in the clearing of land, right of way maintenance operations, and agricultural crop burning if the following conditions are met: Fires purposely set for land clearing operations if conducted at least 500 feet upwind of any occupied residence other than those located on the property on which the burning is conducted, except that such burning must be conducted in open-pit incinerators in counties or areas that are or have been designated nonattainment.~~

- ~~(A) prevailing winds at the time of the burning must be away from any city or town, the ambient air of which may be affected by air contaminants from the burning;~~
- ~~(B) the location of the burning must not be adjacent (500 ft. upwind) to an occupied residence other than those located on the property on which the burning is conducted;~~
- ~~(C) care must be used to minimize the amount of dirt on the material being burned;~~
- ~~(D) oils, rubber, and other similar materials which produce unreasonable amounts of air contaminants may not be burned;~~
- ~~(E) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated above; and,~~
- ~~(F) the burning must be controlled so that a traffic hazard is not created as a result of the air contaminants being emitted.~~

~~(7)(e) Burning of domestic refuse. Where no collection and disposal service is reasonably available, the burning of refuse and other combustible materials generated in the operation of a domestic household if the following conditions are met: domestic refuse may be burned on the property where the waste is generated.~~

- ~~(A) the material to be burned must not be the combined waste be from a building designed to accommodate more than three such households;~~
- ~~(B) the burning must be conducted on the property on which the waste is generated; and,~~
- ~~(C) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated.~~

~~(8)(f) Hydrocarbon burning. Open burning of hydrocarbons is allowed for:~~

~~(1) The burning of hydrocarbons which are spilled or lost as a result of pipeline breaks or other accidents involving the transportation of such materials or which are generated as wastes as the result of oil exploration, development, refining, or processing operations if the following conditions are met. The disposal of spilled hydrocarbons or the waste products of oil exploration, development, refining or processing operations which cannot be feasibly recovered or otherwise disposed of in a legal manner. Notice must be given to the DEQ prior to such burning.~~

~~(A) the material cannot be practicably recovered or otherwise lawfully disposed of in some other manner;~~

~~(B) the burning must not be conducted within a city or town or in such proximity thereto that the ambient air of such city or town may be affected by the air contaminants being emitted;~~

~~(C) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated above; and,~~

~~(D) the burning must be controlled so that a traffic hazard is not created as the result of the air contaminants being emitted.~~

(2) The disposal of waste hydrocarbons through a flare. The owner or operator shall be required to use a smokeless flare if a condition of air pollution is determined to exist by the DEQ.

~~(9)(g) Open-pit incinerator. The burning of any combustible material in an open pit incinerator which has been properly designed and which is properly operated for the control of smoke and particulate matter. Except for hazardous material, any combustible material or refuse that is allowed to be burned under this Subchapter may be burned in an open-pit incinerator that is properly designed and operated for the control of smoke and particulate matter. The owner or operator of the open-pit incinerator shall not accept any material owned by other persons and shall not transport any material to the property where the open-pit incinerator is located in order to burn the material.~~

~~(10) The burning of hydrocarbons, which must be wasted, through the use of smokeless atmospheric flares if after investigation a condition of air pollution exists.~~

252:100-13-8. Open-pit incinerators

(a) Vegetation generated during a land clearing operation may be burned in an open-pit incinerator, without an AOD permit, if the incinerator is registered and properly designed and operated for the control of smoke and particulate matter.

(b) Before an open-pit incinerator may begin operation, the owner or operator must register the open-pit incinerator with the local DEQ office.

(c) An open-pit incinerator shall not be located in the same pit for a period exceeding 30 days in a 365 day period unless the owner or operator has obtained a permit from the Division.

[Agency Note: Staff will propose this new section not be included in the final rule recommended to the Environmental Quality Board]

252:100-13-9. General conditions and requirements for allowed open burning

The open burning of refuse and other combustible material may be conducted as allowed in this Subchapter only if the following conditions and requirements are met:

- (1) No public nuisance is or will be created.
- (2) The burning is controlled so that a traffic hazard is not created as a result of the air contaminants being emitted.
- (3) The burning is conducted so that the contaminants do not adversely affect the ambient air quality of a city or town.
- (4) The initial burning shall begin only between three hours after sunrise and three hours before sunset and additional fuel shall not be intentionally added to the fire at times outside these limits. This requirement does not apply to the open burning allowed under 252:100-13-7(a), (b), (c), and (d) (1).

252:100-13-10. Disaster relief

Notwithstanding the prohibition in 252:100-13-5, the Executive Director of the DEQ may allow the open burning of debris resulting from a disaster if the Director determines such burning is necessary to protect public health and safety. Such approval, if granted, shall be accompanied by appropriate guidelines for burning the debris.

252:100-13-11. Responsibility for consequences of open burning

Persons who conduct open burning in accordance with the provisions of this Subchapter are not exempt or excused from the consequences, damages, or injuries that may result from such conduct, nor are they exempt or excused from complying with all applicable laws, ordinances, rules, and orders.

MINUTES
AIR QUALITY COUNCIL
DECEMBER 14, 1999
Department of Environmental Quality
MultiPurpose Room - 707 North Robinson, OKC

Council Members Present

William B. Breisch, Chairman
Joel Wilson
David Branecky
Rick Treeman
Leo Fallon
Fred Grosz

Staff Present

Gary Kilpatrick

Guests Present

**see attached list

Notice of Public Meeting for December 14, 1999 was forwarded to the Office of the Secretary of State giving the time, date, and place of the meeting. Agendas were posted at the entrance doors.

Call to Order - Mr. Breisch, Chairman, called the meeting to order and roll call was taken as follows: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye. Dr. Canter, Ms. Myers, and Mr. Kilpatrick did not attend. Mr. Breisch and Mr. Terrill presented Meribeth Slagell a Resolution from the Council and Certificate of Appreciation from Mr. Coleman and thanked her for her years of dedicated service on the Council. Mr. Breisch introduced new Council member, Rick Treeman, who was appointed by the Governor to replace the position vacated by Mrs. Slagell.

Approval of Minutes - Mr. Breisch entertained a motion to approve the Minutes of the August 24, 1999 Public Meeting/Hearings. Motion was made by Mr. Fallon to approve the Minutes as presented and second was made by Dr. Grosz. Roll call as follows: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

CY 2000 Meeting Schedule - Staff suggested the following Year 2000 meeting dates:

Wednesday, February 16 at Tulsa
Wednesday, April 19 at Lawton
Wednesday, June 14 at Tulsa
Wednesday, August 16 at Ponca City
Wednesday, October 18 at Oklahoma City
Wednesday, December 14 at Oklahoma City

Motion to accept the schedule was made by Mr. Fallon with second by Mr. Branecky with following vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye

Protocol Statement — As protocol officer, Mr. Dyke convened the hearings by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51, and Title 27A, Oklahoma Statutes, Sections 2-5-101 through 2-5-118. Mr. Dyke entered the Agenda and the Oklahoma Register Notice into the record.

PUBLIC HEARING

OAC 252:100- Appendices E & F

Appendix E Primary Ambient Air Quality Standards [AMENDED]

Appendix F Secondary Ambient Air Quality Standards [AMENDED]

Ms. Michelle Martinez made the staff presentation stating that the proposed amendments to Appendices E and F would restore the primary and secondary ambient air quality standards for ozone to what they were prior to June 1, 1999. She advised that the 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored; and that the PM-2.5 standards would be revoked along with the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard.

Ms. Martinez entered into the record a fax received from EPA Region 6 dated December 10, 1999 which stated that updating these appendices was timely and appropriate. Ms. Martinez then asked that Council recommend proposed Appendices E and F to the Environmental Quality Board for permanent adoption.

Following discussion, Mr. Breisch asked for a motion to recommend the rule for adoption. Mr. Branecky made motion to recommend to the Board for permanent/emergency adoption. Second was made by Mr. Fallon. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-5

Registration, Emission Inventory and Annual Operating Fees [AMENDED]

Ms. Jeanette Buttram presented the staff presentation and advised that the proposed changes to Subchapter 5 were designed to allow the agency the ability to bill annual operating fees on a flexible schedule, and that these changes would also allow the fees to be based on the most recent emission data possible. Ms. Buttram pointed out that the proposed rule clarified that an owner or operator of a facility must report quantifiable excess emissions on their annual emission inventory. She stated that substantive changes included the requirement that all inventories be submitted prior to March 1, and the Agency would provide up to a 30-day extension upon request. Council made a recommendation that the language be changed to allow an additional 30-day extension for good cause shown. Also, the rule will allow fee payers five years after payment is made to notify the DEQ that they overpaid and receive

credit for such overpayment. Also, new language was proposed to reduce to six months after inventories are due or submitted, the period of time in which either the facility owner/operator or the DEQ, respectively, can challenge the methods used to calculate the facility's emissions for "fee calculation purposes."

Ms. Buttram advised that comments had been received from Central and Southwest Services and she entered them into the record. She stated that it was staff's recommendation that Council forward this rule to the Environmental Quality Board for adoption as a permanent rule.

Following comments from Council members and the audience, changes were made in the wording and Mr. Wilson made a motion to forward this rule, with changes, to the Environmental Quality Board for adoption. Second was made by Mr. Branecky. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-9

Excess Emission And Malfunction Reporting [AMENDED]

Ms. Jeanette Buttram was called upon to make the staff recommendation for this rule. She stated that the proposed changes to Subchapter 9 included correction of typographical and grammatical errors and deletion of redundant language; and that the rule was simplified and clarified according to the agency-wide re-right/de-wrong initiative.

Substantive changes include the addition of new definitions and the addition of a new subsection for certification of the information submitted.

Also, language was added under 100-9-3.3, Demonstration of cause, which states excess emissions caused by malfunction and maintenance, start-up/shutdown, can be exempt from compliance which air emission limitations established in permits, rules, orders of the DEQ if the owner/operator properly complies with the requirements in 252:100-9-3.1 and 252:100-9-3.2, respectively; and meets the demonstrations listed in those subsections. Then additional subsections added to 100-9-3.3 were discussed.

Ms. Buttram advised that comments had been received from EPA Region 6 and from Central and Southwest Services and entered them into the record. She stated that staff suggested that the rule be recommended for adoption by the Environmental Quality Board.

After much discussion with staff, Council, and audience members, Mr. Breisch called for a motion. Mr. Fallon made motion to continue this rule to the next regular meeting. Mr. Branecky made the second. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-13

Prohibition of Open Burning [AMENDED]

Ms. Jeanette Buttram was called upon to give the staff recommendation concerning this rule. She stated that the proposed changes to Subchapter 13 would simplify and clarify the Subchapter as a part of the agency-wide re-right/de-wrong initiative. She added that such changes included consolidating the general conditions and requirements for allowed open burning into a new section. She pointed out that a few substantive changes were made such as adding definitions for "domestic refuse" and "landclearing operation" and a section on disaster relief procedures; and that in some instances, the requirement to notify the DEQ or other appropriate official for authorization to burn was added. Ms. Buttram stated that new language was added under "land management and land clearing operations" requiring those who clear land in areas that are or have been designated nonattainment to burn their vegetation in open-pit incinerators. She stated that existing language on open-pit incinerators was expanded it would now prohibit accepting any material owned by other persons and from transporting any material to be burned to the property where the open-pit incinerator is located. She advised that it was staffs recommendation that Council forward this rule to the Environmental Quality Board for adoption as a permanent rule.

Ms. Buttram entered written comments from Central and Southwest Services into the record. Following questions and discussion by Council, changes were made in the wording after which Mr. Breisch entertained motion to accept the changes made and forward the rule to the Board for adoption as a permanent rule. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:100-23 Control of Emissions from Cotton Gins [AMENDED]

OAC 252:100-24 Control of Emissions from Grain Elevators [AMENDED]

Mr. Dyke called upon Mr. Max Price who advised Council that the proposed changes to 100-23-3 and 100-24-3, would substitute references to 252:100-19-12 for references to Subchapter 27. He added that these revisions were necessary because the substantive requirements of Subchapter 27 would be moved to 100-19-12 and Subchapter 27 would be revoked in June of 2000. He added that the references to Subchapter 27 would become meaningless unless they are replaced by references to 100-19-12. Mr. Price stated that it was staff's recommendation that Council refer these rules to the Environmental Quality Board for emergency adoption effective June 1, 2000.

Mr. Breisch stated that these two rules would be voted on separately and called for a motion on Subchapter 23. Mr. Wilson made the motion to forward to the Board as recommended

by staff. The second made by Mr. Branecky. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

Mr. Breisch then called for the same motion for Subchapter 24. Mr. Branecky made the motion and Dr. Grosz made the second. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

A copy of the hearing transcript is attached and made an official part of these minutes.

PUBLIC HEARING

OAC 252:2-15

Environmental Permit Processing Times [AMENDED]

Mr. Dyke called upon Ms. Cheryl Bradley who stated that the proposed amendments to Sections 40, 41, and 72 would make them consistent with 252:100, Air Pollution Control; and that the references to "minor source(s)" and "major facility(ies)" would be changed to "minor facility(ies)" and Part 70 source(s)", respectively. She added that changes were also made at the Council meeting to section 2-15-72(1)(A) such that the phrase "and part 70 sources" was added along with changing the number of days from 540 to 365. Ms. Bradley stated that comments had been received from EPA Region 6 and she entered them into the record. Following discussion Ms. Bradley advised that it was staff's recommendation that Council refer this rule to the Board for permanent adoption of the proposed amendments. Mr. Breisch called for a motion. Mr. Branecky made motion to accept the changes as stated and forward the rule to the Board for adoption. Mr. Fallon made the second. The roll call vote: Mr. Wilson - aye; Mr. Branecky - aye; Mr. Treeman - aye; Mr. Fallon - aye; Dr. Grosz - aye; Mr. Breisch - aye.

DIVISION DIRECTOR'S REPORT - Mr. Terrill advised that he and Mr. Dyke would be attending a meeting with Central States Air Resources Board (CenSARA) to discuss, among other things, the status of the Regional Planning Body activities. He stated that he would like to take a few minutes at the next regular meeting for an update on these activities.

NEW BUSINESS - None

ADJOURNMENT With no further business, meeting was adjourned with announcement that the next regularly scheduled meeting would be February 16, 2000 at 9:00 a.m. in the Auditorium at OSU-Tulsa (formerly UCAT).

NOTE: The sign-in sheet is attached as an official part of these Minutes.

AIR QUALITY COUNCIL
RULEMAKING RECOMMENDATION TO THE ENVIRONMENTAL QUALITY BOARD

Identification of Proposed Rulemaking:

Chapter Number and Title – OAC 252:100-13

Subchapters or Sections Involved – [new, amended or revoked]

OAC 252:100-13. Prohibition of Open Burning

On December 14, 1999 the members of this Council, by authority vested in them by the Oklahoma Environmental Quality Code (27 O.S.Supp. 1993, § 2-2-201), by roll call vote, recommended to the Environmental Quality Board that the rulemaking described above be adopted as:

X permanent [take effect after legislative review]

emergency [temporary, to take effect upon approval by the Governor because of time; and/or special reason: _____]

This Council has considered the proposed rulemaking and comments about it and determined, to the best of its knowledge, that all applicable requirements of the Oklahoma Administrative Procedures Act have been followed.

This Council authorizes the Department to prepare this recommended rulemaking for the Board, making any changes approved by the Council, correcting typographical, grammatical and reference errors, and formatting them as required by the Office of Administrative Rules. This is to be done with the understanding that such changes shall neither alter the sense of what this Council recommends nor invalidate this recommendation.

Respectfully,

Chair or Designee

Date signed: December 13, 1999

VOTING TO APPROVE:

Joel Wilson
David Branecky
Rick Treeman
Leo Fallon
Fred Grosz
Bill Breisch

Environmental Quality Board

REGULAR MEETING AGENDA
DEPARTMENT OF ENVIRONMENTAL QUALITY
OKLAHOMA ENVIRONMENTAL QUALITY BOARD

A Public Meeting: 9:30 a.m., Friday, February 25, 2000
Department of Environmental Quality
707 North Robinson
Oklahoma City, Oklahoma 73102

NOTE: The business meeting of the Board will be preceded at 8:30 a.m. by a continental breakfast. No business will be conducted, but there will be opportunity for an informal interchange among attendees, particularly on matters of interest raised by individual Board members. Board members and DEQ staff will be present, and the public may attend.

1. Call to Order – Lee Paden, Chair
2. Roll Call - Lynda Finch
3. Approval of Minutes of the November 16, 1999 Regular Meeting
4. **Election of Officers**
Election of Chair and Vice-Chair for 2000
5. **Rulemaking – OAC 252:002 Procedures of the DEQ (Administrative Fees)**
The proposed rule relates to administrative fees. The Oklahoma Open Records Act allows an agency to charge a document copying fee, a fee for certified copies, and a reasonable fee for document searches when the search request is solely for a commercial purpose or clearly would cause an excessive disruption of the agency's essential functions. Fees must be promulgated as rules under the Administrative Procedures Act (1999 Okl.Op.Atty.Gen. 55, August 17, 1999). The proposed rule establishes a photocopy fee of \$0.25 per page, a certified copy fee of \$1.00 per document, and a document search fee of \$5.00 per one-half (1/2) hour (with the first 15 minutes free).
 - A. Presentation – Jimmy Givens, DEQ General Counsel
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote on permanent adoption
6. **Rulemaking – OAC 252:100 Air Pollution Control**
Four sets of changes are proposed:
 - Subchapter 5: The proposed amendments are designed to allow the agency to bill on a flexible schedule those owners and operators with sources that produce emissions. The changes also allow the fees to be based on the most recent emission data possible. The proposal clarifies that an owner or operator of a facility must report quantifiable excess emissions on the annual emission inventory, which must be submitted prior to March 1 unless an extension is granted. The proposal also establishes time frames for requests for credit based on overpayment and for challenges to the method used to calculate the facility's emissions for fee calculation purposes.
 - Subchapter 13: The proposed amendments simplify and clarify the rule as part of the agency-wide re-right/de-wrong initiative. Such changes include consolidating the general conditions and requirements for allowed open burning into a new section. Some substantive changes were made,

including adding a section on disaster relief procedures; requiring notification to the DEQ or other appropriate official for authorization to burn in some circumstances; requiring those who clear land in areas that are or have been designated nonattainment to burn their vegetation in open-pit incinerators; and prohibiting burning of off-site material in open-pit incinerators.

- Subchapters 23 and 24: The changes replace references to Subchapter 27 with references to 252:100-19-12. These changes are necessary because, based on Board action last November, the substantive requirements of Subchapter 27 will be moved to section 252:100-19-12 and Subchapter 27 will be revoked, effective June of 2000.
- Appendices E and F: The proposed amendments restore the primary and secondary ambient air quality standards to what they were prior to June 1, 1999. The 8-hour ozone standard of 0.08 ppm would be revoked and the 1-hour standard of 0.12 ppm restored. The PM-2.5 standard would be revoked along with the revised form of the PM-10 standard and replaced with the previous form of the PM-10 standard.
 - A. Presentation— David Branecky, Air Quality Council Member
 - B. Questions and discussion by the Board
 - C. Questions, comments and discussion by the public
 - D. Discussion by the Board
 - E. Roll call vote(s) on permanent adoption of amendments to Subchapters 5 and 13, on emergency adoption* (only) of amendments to Subchapters 23 and 24, and on both permanent and emergency adoptions of amended Appendices E and F

7. Rulemaking— OAC 252:002 Procedures of the DEQ (Air Quality-Related)

The Department is proposing amendments to the air quality provisions of OAC 252:2-15, Environmental Permit Processing Times, to make them consistent with 252:100, Air Pollution Control. The terms "minor source(s)" and major "facility(ies)" would be changed to "minor facility(ies)" and "Part 70 source(s)", respectively.

- A. Presentation— David Branecky, Air Quality Council Member
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

8. Rulemaking— OAC 252:205 Hazardous Waste Management

Two sets of changes are proposed:

- Subchapter 3: The proposed amendment to OAC 252:205-3-1 updates the adoption by reference of federal hazardous waste regulations to July 1, 1999. Proposed revisions to 252:205-3-3 incorporate new or superseding amendments to 40 CFR contained in 64 FR 36465-36490, published July 6, 1999, which add hazardous waste lamps as a universal waste at the federal level. Corresponding changes are made in other sections.
- Subchapters 5 and 9: The proposed revisions to 252:205-5 move language from 252:205-5-5(b) to 252:205-5-3(b)(5). The amendment to 252:205-9-6 provides alternative waste characterization mechanisms for off-site hazardous waste facilities.

- A. Presentation— Jody Reinhart, Hazardous Waste Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote(s) on emergency* and permanent adoption of amendments to Subchapter 3, and on permanent adoption of amendments to Subchapters 5 and 9

9. Rulemaking – OAC 252:220 Brownfields

The proposed language is the result of recent legislation. It states the criteria by which the DEQ will verify loan application eligibility of Brownfields sites for loans from the Wastewater Facility Construction Revolving Loan Account and other state funding sources.

- A. Presentation – Jody Reinhart, Hazardous Waste Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote(s) on emergency* and permanent adoption

10. Rulemaking – OAC 252:615 and 616 Industrial Wastewater Systems

Chapter 615 has been reviewed as part of the "re-right/de-wrong" process of simplifying DEQ rules. Because so many changes were made, it is proposed that Chapter 615 be revoked and a new Chapter 616 created to replace it. Language has been simplified and clarified and rules deemed unenforceable have been removed.

- A. Presentation – Robert Johnston, Water Quality Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

11. Rulemaking – OAC 252:630 and 631 Public Water Supply Operation

Chapter 630 has been reviewed as part of the "re-right/de-wrong" process of simplifying DEQ rules. Because so many changes were made, it is proposed that Chapter 630 be revoked and a new Chapter 631 created to replace it. Language has been simplified and clarified and unenforceable rules have been removed. The most recent federal requirements for maintaining primacy over the Safe Drinking Water Act program have been included.

- A. Presentation – Robert Johnston, Water Quality Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

12. Rulemaking – OAC 252:641 On-Site Sewage Disposal Systems

The proposed rule amendments eliminate the document search fee, combination fee (soil percolation test and final inspection or existing system evaluation report) and residential plat review fees, and reduce the soil percolation/soil profile fee, final inspection fee, existing system evaluation fee and the certified installer final inspection fee.

- A. Presentation – Gary Collins, Director, DEQ Environmental Complaints and Local Services Division
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

13. **Rulemaking-- OAC 252:700 and 710 Waterworks/Wastewater Works Operator Certification**
Chapter 700 has been reviewed as part of the "re-right/de-wrong" process of simplifying DEQ rules. Because so many changes were made, it is proposed that Chapter 700 be revoked and a new chapter 710 created to replace it. New subchapters have been created; many rules have been simplified and/or broken into several shorter rules for clarity; and statutory citations have been updated. The rules for landfill operator certification are being revoked as inappropriate to these chapters.

- A. Presentation-- Rick Stebbens, Waterworks and Wastewater Works Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

14. **Rulemaking-- OAC 252:002 Procedures of the DEQ (Operator Certification-Related)**

The DEQ proposes that Section 252:2-15-49 be revoked as part of the "re-right/de-wrong" rules simplification process. This revocation does not affect the operator certification program or the proposed rules in Chapter 710. The basic Tier I permitting process was designed for environmental permits where notice was given to landowners. The DEQ believes that personal licensure should not have been included in the Tier categories.

- A. Presentation-- Rick Stebbens, Waterworks and Wastewater Works Council Chair
- B. Questions and discussion by the Board
- C. Questions, comments and discussion by the public
- D. Discussion by the Board
- E. Roll call vote on permanent adoption

15. **New Business (any matter not known about and which could not reasonably have been foreseen prior to the time of posting of agenda)**

16. **Executive Director's Report**

17. **Adjournment**

Public Forum: The Board meets four times a year at different locations across the State to hear the views and concerns of all Oklahomans about environmental issues. This opportunity is informal, and we invite you to sign the register to speak. The forum will also include a short presentation from the DEQ Water Quality Division about State Water Quality Standards implementation, the State "303(d)" (impaired waters) list, and related issues.

Should you have a disability and need an accommodation, please notify the DEQ three days in advance at 702-7100.

* Specification of proposed adoption by emergency rulemaking, by permanent rulemaking, or by both, is based on the recommendations of the respective advisory councils. Adoption or amendment of rules as emergency rulemaking requires a finding by the Board that a compelling extraordinary circumstance warrants the seeking of emergency certification, so that the rules will take effect immediately upon the Governor's signature. Absent a finding and certification of emergency, rules adopted today will not become effective until on or about June 1st.

SUBCHAPTER 13. ~~PROHIBITION OF OPEN BURNING~~

252:100-13-1. Purpose

~~This Subchapter is for the purpose of preventing, abating, and controlling air pollution resulting from air contaminants released in the open burning of refuse and other combustible materials. The purpose of this Subchapter is to control the open burning of refuse and other combustible materials.~~

252:100-13-2. Definitions

The following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"**Combustible materials**" means any substance which will readily burn and shall include those substances which, although generally considered incombustible, are or may be included in the mass of the material burned or to be burned.

"**Domestic refuse**" means combustible materials or refuse that normally result from the function of life at a residence, such as kitchen garbage, untreated lumber, cardboard boxes, packaging, clothing, grass, leaves, and branch trimmings. It does not include such things as tires, non-wood construction debris, furniture, carpet, electrical wire, and appliances.

"**Land clearing operation**" means the uprooting, cutting, or clearing of vegetation in preparation for the construction of buildings, the development of residential, commercial, agricultural, or industrial properties, and for the construction and maintenance of right-of-ways. It does not include the clearing of vegetation such as trimmings, fallen limbs, branches, or leaves, or other wastes from routine property maintenance activities.

"**Open burning**" means the burning of combustible materials in such a manner that the products of combustion are emitted directly to the outside atmosphere.

"**Open-pit incinerator**" means a device consisting of a pit (into which the material to be combusted is placed) and nozzles, pipes, and other appurtenances designed and arranged in a manner to deliver additional air and/or auxiliary fuel to, or near, the zone of combustion so that theoretically complete combustion is accomplished or approached.

"**Products of combustion**" means all particulate and gaseous air contaminants emitted as a result of the burning of refuse and combustible materials.

"**Refuse**" means garbage, rubbish, domestic refuse and all other wastes generated by a trade, business, industry, building operation, or household.

252:100-13-3. Scope [REVOKED]

~~This Subchapter shall apply to all operations involving open burning except those specifically exempted by 252:100-13-7.~~

252:100-13-4. Effective date [REVOKED]

~~The effective date of this Subchapter shall be January 1, 1971.~~

252:100-13-5. Open burning prohibited

~~No person shall cause, suffer, allow, or permit open burning of~~

~~refuse and other combustible material except as may be allowed in compliance with OAC 252:100-13-7. The open burning of refuse and combustible materials is prohibited unless conducted in strict accordance with the conditions and requirements contained in 252:100-13-7 and 252:100-13-9. Under no circumstances shall the open burning of tires be allowed.~~

252:100-13-6. Salvage operations utilizing open burning prohibited [REVOKED]

~~No person shall cause, suffer, allow, or permit open burning of combustible material in connection with the salvage of motor vehicles, tires, oil and similar substances, containers, coated or painted wire and metals, and other materials.~~

252:100-13-7. ~~Permissible~~ Allowed open burning

~~The open burning of refuse and other combustible material may be conducted as specified in the paragraphs set forth below if no public nuisance is or will be created and if the burning is not prohibited by, and is conducted in compliance with, other applicable laws and the ordinances, rules, and orders of governmental entities having jurisdiction, including air pollution control ordinances, rules, and orders. The authority to conduct open burning under the provisions of this Section does not exempt or excuse a person from the consequences, damages, or injuries which may result from such conduct nor does it excuse or exempt any person from complying with all applicable laws, ordinances, rules, and orders of the governmental entities having jurisdiction, even though the open burning is conducted in compliance with this Section.~~

~~(1) Fires (a) **Fire training.** Open burning is allowed for fires purposely set for the instruction and training of public and industrial fire-fighting personnel, when authorized by the appropriate governmental entity provided that authorization has been requested from the local fire chief at least ten working days prior to any burning or that written authorization has been received prior to such burning. The DEQ may require written verification of the authorization from the local fire chief or fire training officer.~~

~~(2) (b) **Elimination of hazards.** Fires set for the elimination of a fire hazard which cannot be abated by any other means when authorized by the appropriate governmental entity. Provided prior authorization is obtained from the local fire chief, open burning is allowed for the elimination of:~~

~~(1) A fire hazard that cannot be abated by any other means.~~

~~(2) A dangerous or hazardous material when there is no other practical or lawful method of abatement or disposal if authorization is also received from the DEQ prior to such burning.~~

~~(3) Fires set for the removal of dangerous or hazardous material where there is no other practical or lawful method of disposal upon approval of the Director of Air Quality Division.~~

~~(4) Camp (c) **Recreational and ceremonial fires.** Open burning is allowed for camp fires and other fires used solely for recreational purposes, for ceremonial occasions, or for outdoor non-commercial preparation of food.~~

~~(5)~~ (d) Land management and land clearing operations. Open burning is allowed for the following land management and land clearing operations.

(1) Fires purposely set to forest, crop or range lands for a specific reason in the management of forests, crops or game, in accordance with practices recommended by the Oklahoma Department of Wildlife Conservation, the Oklahoma State Department of Agriculture, and the United States Forest Service.

~~(6)~~ (2) The burning of trees, brush, grass, and other vegetable matter in the clearing of land, right of way maintenance operations, and agricultural crop burning if the following conditions are met: Fires purposely set for land clearing operations if conducted at least 500 feet upwind of any occupied residence other than those located on the property on which the burning is conducted, except that such burning must be conducted in open-pit incinerators in counties or areas that are or have been designated nonattainment.

~~(A) prevailing winds at the time of the burning must be away from any city or town, the ambient air of which may be affected by air contaminants from the burning;~~

~~(B) the location of the burning must not be adjacent (500 ft. upwind) to an occupied residence other than those located on the property on which the burning is conducted;~~

~~(C) care must be used to minimize the amount of dirt on the material being burned;~~

~~(D) oils, rubber, and other similar materials which produce unreasonable amounts of air contaminants may not be burned;~~

~~(E) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated above; and,~~

~~(F) the burning must be controlled so that a traffic hazard is not created as a result of the air contaminants being emitted.~~

~~(7)~~ (e) Burning of domestic refuse. Where no collection and disposal service is reasonably available, the burning of refuse and other combustible materials generated in the operation of a domestic household if the following conditions are met: domestic refuse may be burned on the property where the waste is generated.

~~(A) the material to be burned must not be the combined waste be from a building designed to accommodate more than three such households;~~

~~(B) the burning must be conducted on the property on which the waste is generated; and,~~

~~(C) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated.~~

~~(8)~~ (f) Hydrocarbon burning. Open burning of hydrocarbons is allowed for:

(1) The burning of hydrocarbons which are spilled or lost as a result of pipeline breaks or other accidents involving the transportation of such materials or which are generated as wastes as the result of oil exploration, development, refining,

er processing operations if the following conditions are met: The disposal of spilled hydrocarbons or the waste products of oil exploration, development, refining or processing operations which cannot be feasibly recovered or otherwise disposed of in a legal manner. Notice must be given to the DEQ prior to such burning.

~~(A) the material cannot be practicably recovered or otherwise lawfully disposed of in some other manner;~~

~~(B) the burning must not be conducted within a city or town or in such proximity thereto that the ambient air of such city or town may be affected by the air contaminants being emitted;~~

~~(C) the initial burning may begin only between three hours after sunrise and three hours before sunset and additional fuel may not be intentionally added to the fire at times outside the limits stated above; and,~~

~~(D) the burning must be controlled so that a traffic hazard is not created as the result of the air contaminants being emitted.~~

(2) The disposal of waste hydrocarbons through a flare. The owner or operator shall be required to use a smokeless flare if a condition of air pollution is determined to exist by the DEQ.

~~(9) (g) Open-pit incinerator. The burning of any combustible material in an open pit incinerator which has been properly designed and which is properly operated for the control of smoke and particulate matter. Except for hazardous material, any combustible material or refuse that is allowed to be burned under this Subchapter may be burned in an open-pit incinerator that is properly designed and operated for the control of smoke and particulate matter. The owner or operator of the open-pit incinerator shall not accept any material owned by other persons and shall not transport any material to the property where the open-pit incinerator is located in order to burn the material.~~

~~(10) The burning of hydrocarbons, which must be wasted, through the use of smokeless atmospheric flares if after investigation a condition of air pollution exists.~~

252:100-13-9. General conditions and requirements for allowed open burning

The open burning of refuse and other combustible material may be conducted as allowed in this Subchapter only if the following conditions and requirements are met:

(1) No public nuisance is or will be created.

(2) The burning is controlled so that a traffic hazard is not created as a result of the air contaminants being emitted.

(3) The burning is conducted so that the contaminants do not adversely affect the ambient air quality of a city or town.

(4) The initial burning shall begin only between three hours after sunrise and three hours before sunset and additional fuel shall not be intentionally added to the fire at times outside these limits. This requirement does not apply to the open burning allowed under 252:100-13-7(a), (b), (c), and (d)(1).

252:100-13-10. Disaster relief

Notwithstanding the prohibition in 252:100-13-5, the Executive Director of the DEQ may allow the open burning of debris resulting

from a disaster if the Director determines such burning is necessary to protect public health and safety. Such approval, if granted, shall be accompanied by appropriate guidelines for burning the debris.

252:100-13-11. Responsibility for consequences of open burning

Persons who conduct open burning in accordance with the provisions of this Subchapter are not exempt or excused from the consequences, damages, or injuries that may result from such conduct, nor are they exempt or excused from complying with all applicable laws, ordinances, rules, and orders.

Additional Comments

CHAPTER 100. AIR POLLUTION CONTROL
SUBCHAPTER 13. PROHIBITION OF OPEN BURNING

EXECUTIVE SUMMARY: The proposed amendments to Subchapter 13 will simplify and clarify the rule as part of the agency-wide re-right/de-wrong initiative. Such changes include consolidating the general conditions and requirements for allowed open burning into a new section. A few substantive changes were made, such as adding definitions for "domestic refuse" and "land clearing operation," along with a section on disaster relief procedures. In some instances, the requirement to notify the DEQ or other appropriate official for authorization to burn was added. New language was added under "land management and land clearing operations" requiring those who clear land in areas that are or have been designated nonattainment to burn their vegetation in open-pit incinerators. Existing language on open-pit incinerators was expanded and now prohibits accepting any material owned by other persons and from transporting any material to the property where the open-pit incinerator is located in order to burn the material.

DIFFERENCES FROM ANALOGOUS FEDERAL RULES: None.

ENVIRONMENTAL BENEFIT STATEMENT: Not required because no one federal rule corresponds to these rules.

SUMMARY OF COMMENTS AND RESPONSES:

Comment: What is the definition of hazardous materials and shouldn't it be in the rule?

Response: Staff doesn't believe it is necessary to define "hazardous materials" in this rule since authorization must be received from the DEQ prior to such burning of dangerous or hazardous material. Therefore, it can be determined or answered during that time. Staff believes that this flexibility is necessary since the universe of hazardous materials is still growing.

Comment: "Authorization" must be obtained from DEQ prior to such burning. What authorization specifically are we talking about? An ODEQ permit or letter or some form?

Response: "Authorization" means approval by the DEQ. In emergency situations, approval may be verbal. In non-emergency situations, approval may be in writing.

Comment: 252:100-13-7(a) Fire training. We suggest that the phrase "provided that authorization from the local fire chief has been issued prior to any burning" be changed to read "provided that authorization has been requested from the local fire chief."

Response: After discussion during the Council meeting, Council agreed to reword the proposed language to read "provided that

authorization has been requested from the local fire chief at least ten working days prior to any burning or that written authorization has been received prior to such burning."

Comment: The addition of definitions for "Domestic Refuse" and "Land Clearing Operations" strengthens the SIP by clarifying what is included in these situations.

Comment: 252:100-13-8 Open-pit incinerators. The addition of this subsection addresses an area not adequately addressed in the approved SIP and could be seen as strengthening the SIP. However, we question the time limit (90 days) for burning in the same pit. In order for an open pit incinerator (trench burner) to operate with minimum emissions, the pit or trench must have vertical walls that act to deflect the forced air back and forth to the bottom of the pit for a more complete burn of the material with minimum emissions. A trench burner pit that is in use for more than a day or two (depending on the soil type) will lose the integrity of its vertical walls due to normal wear, and pits must be dredged out to maintain optimum depth as ash builds up. Frequently, new pits at the same site must be dug to compensate for this degradation if there is a large land clearing project. If the pit were lined with something to maintain the integrity of the shape, we may be able to consider the 90 day time frame. We recommended you consult with your field investigators with regard to the practicality of this rule change as you have proposed it. The rule does not prohibit bringing in material from off the site to be burned. This circumstance may encourage burning material that might not otherwise be burned. We find this practice to be a weakening of the SIP.

Response: Staff has removed the proposed section, 100-13-8, from the rule and has added language for open-pit incinerators that are properly designed and operated for the control of smoke and particulate matter. Also, language was added which prohibits the owner or operator of the open-pit incinerator from accepting any material owned by other persons and the transport of any material to the property where the open-pit incinerator is located in order to burn the material.

Comment: The addition of section 252:100-13-10, Disaster relief, strengthens the SIP by addressing an area of activity that raises questions whenever a disaster occurs.

Page 4

1 will show two changes not currently in the
2 draft rule that I will be proposing today.
3 And also, copies are on the table.
4 A proposed change not currently in
5 the draft rule is proposed for the
6 definition for refuse. Staff recommends
7 changing the definition to...means garbage,
8 rubbish, "domestic refuse", and all other
9 waste. So adding the word "domestic
10 refuse" to the definition.
11 Section 252:100-13-7, Allowed Open
12 Burning, page 3. Original language
13 addressing the responsibility for
14 consequences of open burning was moved from
15 this section to a new section, 252:100-13-
16 11, page 6. Throughout this section, the
17 requirement to notify the DEQ or other
18 appropriate official for authorization to
19 burn was added.
20 Section 252:100-13-8, Open-Pit
21 Incinerators, page 5. Information
22 describing open-pit incinerators was moved
23 into this new section and amended to
24 require owners or operators to register
25 with their local DEQ office. The proposed

Page 3

1 PROCEEDINGS
2 MR. DYKE: The next item on the
3 agenda, Item Number 5D, OAC 252:100-13,
4 Prohibition of Open Burning. I'll call on
5 Ms. Jeanette Buttram.
6 Just a moment.
7 (Whereupon, a short recess was taken
8 after which the following took place)
9 MR. DYKE: If we could, let's go
10 back on the record on Agenda Item 5D, OAC
11 252:100-13. Ms. Buttram.
12 MS. BUTTRAM: Members of the
13 Council, ladies and gentlemen, the
14 following revisions to Subchapter 13,
15 Prohibition of Open Burning, are being
16 proposed for the first time to the Council.
17 Many of the proposed revisions to
18 this subchapter simplify and clarify the
19 rule. However, a few substantive changes
20 were made also.
21 Section 252:100-13-2, Definitions,
22 page 2. Definitions are proposed for
23 "domestic refuse" and "land clearing
24 operation". Also, earlier today I left a
25 sheet of paper by your Council packet which

Page 5

1 rule would also require owners or operators
2 to obtain a permit if they locate an open-
3 pit incinerator in the same pit for a
4 period exceeding 90 days in a 365 day
5 period.
6 Recently comment were received from
7 EPA questioning the time limit of 90 days
8 for burning in the same pit. We have
9 discussed this time period among staff and
10 decided on the 90 days. However, we
11 recognize there are different opinions
12 regarding what is appropriate. Therefore,
13 we are asking for input from the Council
14 and the public on this and will incorporate
15 whatever time period Council decides is
16 best.
17 Also, EPA mentioned the rule does
18 not prohibit bringing in material from off
19 the site to be burned and find the
20 potential for this practice to be a
21 weakening of the SIP. Staff agrees and
22 suggests the following change not currently
23 in the draft rule. Again, this is on the
24 extra sheet of paper and will show the
25 draft proposal that I am about to make.

5413

Page 6

1 Page 5, Section 100-13-8, the proposed
2 subsection (c) should be changed to a new
3 (d) and a new proposed subsection (c)
4 should be added which states, material
5 generated off site shall not be burned in
6 an open-pit incinerator.
7 Section 252:100-13-9, General
8 Conditions and Requirements For Allowed
9 Open Burning, page 5. The general
10 conditions and requirements for allowed
11 open burning found throughout the rule were
12 consolidated into this new section.
13 Section 252:100-13-10, Disaster
14 Relief, page 6. This new section was added
15 to address disaster relief.
16 Recently a letter from the City of
17 Hobart was received by our Enforcement Unit
18 requesting approval for burning of
19 dilapidated houses. The City Manager
20 requested the letter be considered in our
21 rewrite/dewrong process of Subchapter 13.
22 Allowing the requested burning would be a
23 relaxation of our rule. Staff believes the
24 proposed changes to the rule will help
25 clarify allowed open burning.

Page 7

1 The written comments from EPA and
2 the letter from the City of Hobart will be
3 entered into the record.
4 Staff suggests the proposed rule as
5 amended be recommended for adoption by the
6 Board as a permanent rule.
7 MR. DYKE: Questions from the
8 Council?
9 MS. MYERS: Jeanette, on 13-8(d)
10 the open-pit incinerators are not to be
11 located in the same pit for a period of 90
12 days. Are those continuous consecutive
13 days or are those 90 total? days.
14 MS. BUTTRAM: It should be 90
15 consecutive days.
16 MS. MYERS: Under 13-7(c),
17 ceremonial fires. Is that a person that's
18 non-commercial for preparation of food and
19 the (inaudible) and (inaudible) ranges and
20 that kind of thing where they cook-out and
21 whatever as part of their activity, is that
22 not allowed?
23 MS. BUTTRAM: No, it's allowed.
24 MS. MYERS: Okay. It says for
25 non-commercial -- if they're doing it for

Page 8

1 money, that would be commercial.
2 MS. BUTTRAM: The beginning --
3 well, if you are including that in the non-
4 commercial preparation of food, it is
5 allowed. But if it is outside of that, it
6 needs to be --
7 MS. MYERS: You're saying they
8 need to have a permit for a group of people
9 that are paying for (inaudible). That's my
10 question.
11 MS. BUTTRAM: I'm saying if it
12 falls under non-commercial preparation of
13 food, then it would be allowed open
14 burning.
15 MS. HOFFMAN: This is Barbara
16 Hoffman. The campfires are allowed. So if
17 they are cooking food over campfires,
18 that's okay. But again, if it's a
19 situation where they have some sort of open
20 burning deal going on for the commercial
21 preparation of food, then that would be
22 prohibited.
23 MS. MYERS: Okay.
24 MR. DYKE: I think what you are
25 describing is allowed. I think what

Page 9

1 wouldn't be acceptable would be if they put
2 a sign out on the road and had someone
3 coming in every day.
4 MR. FALLON: Could you clarify
5 252:100-13-2(C), bringing material on-site
6 cannot be burned in an open-pit
7 incinerator.
8 MS. BUTTRAM: 13-2?
9 MR. FALLON: Yes. Under new
10 performance.
11 MS. BUTTRAM: 13-8?
12 MR. FALLON: Dash 8, I'm sorry.
13 MS. BUTTRAM: Your question
14 again, please?
15 MR. FALLON: According to the
16 letter we received from the city manager or
17 mayor of Hobart, they are going to clean-up
18 an older area -- I'm gathering that's what
19 he's saying. And if you were to take down
20 six dilapidated structures on the same
21 block, would that be considered -- if you
22 brought more than one open-pit incinerator,
23 would that be considered on site?
24 MS. BUTTRAM: I'm not really sure
25 that would even fit under being allowed

1 under an open-pit incinerator. So if you
2 dig your pit and you have a block area and
3 then you bring in all the homes that you
4 are trying to tear down from that one block
5 to that open-pit incinerator, then that's
6 bringing material off-site. So that would
7 not be an allowed open-pit incinerator
8 burn.

9 MR. FALLON: Thank you.

10 MR. WILSON: What you are
11 suggesting is that if someone wanting to
12 tear down a house and constructed an open-
13 pit incinerator, they need to do it on the
14 location that the house is sitting; is that
15 correct?

16 MS. BUTTRAM: That's correct.

17 MR. WILSON: So if there is a
18 house next-door that also needs to be torn
19 down, then the pit would have to be dug on
20 that property, as well?

21 MS. BUTTRAM: Well, actually, I
22 think you have to look at the whole rule,
23 too. I'm not sure that -- my
24 interpretation of the rule is that that
25 type of activity isn't an allowed open burn

1 burning. Fire training, elimination of
2 hazards, recreational and ceremonial fires,
3 land management and land clearing
4 operations. Those have definitions that
5 describe what that falls under. Removal of
6 a house does not fall under that. Burning
7 of domestic refuse, hydrocarbon burning,
8 and then a new section of open-pit
9 incinerators. So what the rule states it
10 shows what is allowed, and so if you have
11 an activity that is outside what is
12 allowed, then it would not fall under one
13 of those in that section. We're not making
14 any changes to the rule that -- the rule
15 never allowed it and we're not making any
16 changes that disallow it, because it was
17 never allowed.

18 MR. FALLON: The letter from
19 Hobart indicates it is his belief that your
20 change would allow it. He is believing in
21 error; is that correct?

22 MS. BUTTRAM: That is correct.
23 Apparently, our enforcement unit receives a
24 lot of letters requesting open burning,
25 that they were under the impression that it

1 anyway. And so you have to look at each
2 individual case to determine whether or not
3 it would be allowed for an open-pit
4 incinerator burn. But in the scenario you
5 just alluded to, that's correct. You
6 wouldn't be able to use one open-pit
7 incinerator for five or six different
8 homes.

9 MR. KILPATRICK: I would like to
10 clarify, is this Hobart thing allowed or
11 not allowed?

12 MS. BUTTRAM: It is not allowed.

13 MR. KILPATRICK: What
14 specifically wouldn't be allowed?

15 MS. BUTTRAM: Excuse me?

16 MR. KILPATRICK: Why is it not
17 allowed? You are saying it has nothing to
18 do with whether it's on-site or off-site,
19 you are saying it's not allowed. Point me
20 to the right provision that says it's not
21 allowed.

22 MS. BUTTRAM: Okay. The rule
23 states items that are allowed under open
24 burning. 13-7 goes through a list of
25 things that would be allowed under open

1 was allowed in the past. It was never
2 allowed before or now.

3 MR. FALLON: Okay. Thank you.

4 MR. DYKE: Additional questions
5 for Ms. Buttram at this time? Is there
6 anyone wishing to speak on this rule?
7 Hearing no one, additional comments from
8 the Council?

9 MR. BREISCH: What's the
10 recommendation to the Board?

11 MS. BUTTRAM: A permanent rule.

12 MR. BREISCH: No emergency? I'll
13 entertain a motion --

14 MS. BUTTRAM: Before you make a
15 motion, I would like to bring up in my
16 presentation that I had mentioned the 90
17 days for an open-pit incinerator. So I am
18 assuming then that would be an okay time
19 frame?

20 MS. MYERS: That's an awful lot
21 of open burning.

22 MS. BUTTRAM: Excuse me?

23 MS. MYERS: I said that's an
24 awful lot of open burning.

25 MS. HOFFMAN: EPA has recommended

5415

1 3 days. So that's why Jeanette is asking -

2 -

3 MS. MYERS: What is the purpose
4 of establishing a 90 day period? That is
5 an awful long time for open burning.

6 MS. BUTTRAM: It depends on who
7 you talk to. I've talked to staff and
8 received 30 days and then I went with 30
9 days, and I was told no, that's not enough
10 time. Then I went with 60 days, was told
11 that's not enough time, then we went to 90
12 days. So we received a variety of time
13 limits, and then we thought 90 days would
14 be a good day to go with. I think 3 days
15 is not enough time, actually, but that's
16 why we went with 90 days thinking that
17 would be a good time limit to try to start
18 with. We do have -- staff has developed an
19 open-pit incinerator air curtain design and
20 operating instructions that was developed
21 because of the recent tornado. Describes
22 how an open-pit incinerator should be
23 designed and the operating instructions
24 that go with it and information like that,
25 but it doesn't have a time frame.

1 MR. KILPATRICK: So you recommend
2 90 days on the basis of the amount of time
3 you thought was needed to cover the
4 majority of projects -- the length of time
5 the majority of the project would take?

6 MS. BUTTRAM: Right.

7 MR. KILPATRICK: EPA seems to be
8 coming from the other -- when looking at
9 the customer, they are looking at the
10 potential aspects of whether or not the
11 open-pit would still be functional at the
12 end of the 90 days.

13 MS. BUTTRAM: Right.

14 MR. KILPATRICK: Did you get any
15 comments from staff on their experience
16 with pits that have been used for up to 90
17 days?

18 MS. BUTTRAM: I did not get any
19 information on ones that were used up to 90
20 days, but I did receive information again
21 that said it could vary.

22 MS. MYERS: Wouldn't we want to
23 put in something that said if you have an
24 open-pit incinerator that there would be a
25 time limit set by DEQ as appropriate for

1 the project at hand rather than giving a
2 blanket 90 days.

3 MS. BUTTRAM: That could work,
4 too. That's why I said we --

5 MS. MYERS: I know on something
6 like that you're not going to have a
7 catastrophic event like the May 3 tornado.

8 MS. BUTTRAM: That's right.

9 MS. MYERS: 90 days is an awful
10 long time for a pit to be burning and
11 sometimes those facilities get a lot of
12 emissions. We had a facility across the
13 road from us, they started doing open
14 burning, of a bunch of trash and debris and
15 we had all kinds of problems because of the
16 cloud -- black smoke.

17 MS. BUTTRAM: Was that an open-
18 pit incinerator or just some type of land-

19 -

20 MS. MYERS: It was open burning.

21 MS. BUTTRAM: Open burning.

22 MS. HOFFMAN: Can I make a
23 comment? One of the reasons that we came
24 up with a time limit, a specific time
25 limit, was so that we could encourage

1 people that knew they wanted to burn longer
2 than that to come in and actually get a
3 permit from us. We don't want unpermitted
4 burning of this type to go on. The air
5 curtain incinerator isn't going to be
6 viable after a certain point in time. So
7 we would like to have a specific time limit
8 so that everybody will be able to look at
9 the rule and know, okay, I should go in and
10 get a permit because I want to burn longer
11 than 90 days or whatever day we end up
12 putting in there. We thought that 90 days
13 would be the maximum amount of time that
14 someone could actually operate one of these
15 open-pit incinerators without the sides
16 caving in and making it useless. But we've
17 heard since then that it's very possible,
18 like you said, there are some that are
19 going to deteriorate a lot sooner than
20 that. So I don't know, I don't know if
21 there is a midpoint here but I'm hoping we
22 can find something that we'll all agree on
23 would be a good amount of time to allow
24 these people to operate, and yet still give
25 us sort of definite time period in the rule

Page 18

1 so that people will know whether they need
2 to just register with us or whether they
3 need to actually come in and get a permit.
4 MR. KILPATRICK: I would like to
5 make another comment. I think we proposed
6 adding 90 consecutive days. I don't think
7 we dropped anything else. If I read that
8 right, I don't think that would work.
9 Because then it would say you are allowed
10 to burn as long as it's not in there 90
11 consecutive days. They can burn 89 and
12 stop one day and now they've got an open
13 pit they can run another 89 days.
14 MS. BUTTRAM: And you are
15 correct. I was incorrect earlier by saying
16 it should have been consecutive. And that
17 was part of the argument that we had
18 earlier when we were discussing on whether
19 or not it should be 90 days. The reason we
20 did not put consecutive was for that exact
21 reason. And that's why we want it to be 90
22 days in a 365 day period.
23 MS. MYERS: I think 90 days is an
24 awful long time unless there is some
25 specific reason for it.

Page 19

1 MR. BREISCH: Well, I've seen
2 this operation take place in large
3 landfills, but they are not consecutive
4 days. They set the operation up and they
5 might burn for a week and shut it down for
6 a week, and come back and burn some other
7 debris, trees, et cetera. So I don't think
8 the 90 day length in that one location is
9 too bad. 90 consecutive days, I haven't
10 seen it happen.
11 MS. HOFFMAN: It's really not the
12 consecutive-ness of it that counts, it's
13 how many days you are actually in that pit
14 burning.
15 MR. BREISCH: That's right. Or
16 do you mean in that location? Are you
17 talking about a specific location for 90
18 days?
19 MS. HOFFMAN: A specific pit.
20 MR. BREISCH: I don't think
21 that's too long.
22 MR. DYKE: If they operate more
23 than 90 days, they are required to get a
24 permit and this only applies to open-pit
25 incinerators. We're not talking about all

Page 20

1 types of open burning, we're talking about
2 this particular open-pit incinerator.
3 MR. BREISCH: David, I need to be
4 more specific on my comment. I'm talking
5 about a location of 90 days. Because the
6 pit can deteriorate, a lot of things can
7 happen. I think at the end of a 90 day
8 period, regardless of how many days during
9 that 90 days it burned, I think either a
10 permit has to be issued or it has to be
11 relocated.
12 MS. BUTTRAM: That is the way the
13 rule is written. They can be at the same
14 location, but they cannot use the same pit
15 for more than 90 days. And if they have to
16 stay at the same location, and they know
17 they are going to have to burn longer than
18 90 days, then they should have to come in
19 and get a permit.
20 MR. KILPATRICK: Now you've got
21 me confused. If you stay at the location
22 for more than 90 days, you have to get a
23 permit?
24 MS. BUTTRAM: No, if you are
25 going to use your open-pit incinerator.

Page 21

1 MR. KILPATRICK: If you have to
2 use a central pit for more than 90 days is
3 what you are saying, you have to have a
4 permit?
5 MS. BUTTRAM: You should come in
6 and get a permit, yes.
7 MR. BREISCH: Is that understood
8 by the Council?
9 MR. WILSON: I have one last
10 clarification on this issue with the
11 burning of dilapidated houses. Jeanette,
12 you suggest the regulations explicitly
13 disallow that in open-pit incinerators?
14 MS. BUTTRAM: That has been my
15 own question with homes being burned in an
16 open-pit incinerator. #1
17 MR. WILSON: I don't see anything
18 in the regulations that prohibit you from
19 burning a dilapidated house and putting it
20 into an open-pit incinerator.
21 MS. BUTTRAM: Well, for one
22 thing, if you have to move any hazardous
23 material, anything like that, and you would
24 have to remove the roof -- there is a lot
25 of things that you cannot burn in an open-

5417

1 pit incinerator as far as with the
2 hazardous materials. I don't see how it
3 would be feasible to dig an open-pit
4 incinerator in one lot to burn a house.

5 MR. WILSON: I don't either. But
6 you are prohibiting that multiple houses
7 being taken to one location to be
8 incinerated?

9 MS. BUTTRAM: Right. We're
10 saying material generated off-site shall
11 not be burned in an open-pit incinerator.
12 We're trying to prevent an open-pit
13 incinerator from being developed, dug in
14 one site, and then someone going off to
15 various other sites and bringing in all
16 their material to be burned in that open-
17 pit incinerator.

18 MR. WILSON: But you do allow
19 them to put pits in multiple places?

20 MS. BUTTRAM: Could you be more
21 specific, please?

22 MR. WILSON: Your regulation
23 would allow a pit to be dug and used as an
24 open-pit incinerator at each location where
25 the waste is generated.

1 rule is to prohibit open burning. It
2 prohibits open burning, because we don't
3 think that's an acceptable practice in this
4 state. And we offer several very limited
5 exceptions to that. And we do not favor
6 open-pit incinerators. That's not
7 something we want to encourage at all. We
8 don't want people to be out there open
9 burning. We want them to --if they've got
10 houses to demolish, we think they would be
11 better off demolishing those houses and
12 taking them to construction demolition
13 dumps. There are lots of ways to dispose
14 of waste without burning it. And we really
15 don't want to encourage people to just burn
16 whatever they have. So that's why we have
17 very limited exceptions here. And we're
18 trying to limit the open-pit incinerator
19 exception even more by requiring that it
20 only be limited to the material that's on
21 the site. We don't want somebody to get
22 into a commercial operation of running an
23 open-pit incinerator.

24 MR. WILSON: You want to make it
25 tough on municipality to burn multiple

1 MS. BUTTRAM: Right.

2 MR. WILSON: As opposed to one
3 pit for burning all the waste?

4 MS. BUTTRAM: Well, if the waste
5 is brought in from off-site, then that's
6 correct, you cannot burn in that open-pit
7 incinerator. One pit for one location.

8 MR. FALLON: This is not a change
9 from what it has been in the past.

10 MS. BUTTRAM: No, the open-pit
11 incinerator part isn't changed. It was in
12 the old rule on page 5. It used to be in
13 the middle, right above where it says 100-
14 13-8, Open-Pit Incinerators, the new
15 section. Above that used to be a number 9
16 that's been struck out, and so we took that
17 information and made a new section and
18 broadened the requirements of an open-pit
19 incinerator.

20 MR. WILSON: Environmentally,
21 what is the difference between burning 10
22 houses in 10 pits as opposed to 10 houses
23 in one pit?

24 MS. BUTTRAM: I don't see any.

25 MS. HOFFMAN: The purpose of this

1 houses?

2 MS. HOFFMAN: Well, if you want
3 to say it that way, that's fine. But I'm
4 not trying to make things tough on
5 municipalities, I just think we have a rule
6 that does not allow them to do that to
7 begin with, and we haven't changed that
8 substantive part.

9 MR. WILSON: I don't see in the
10 rule that we can prohibit them from
11 building an open-pit and operating it
12 according to the open-pit incinerator rules
13 for the burning of a dilapidated house.

14 MS. HOFFMAN: Well, I'm not sure
15 where I see in the rule that it allows the
16 burning of dilapidated houses. As Jeanette
17 pointed out, we allow open burning for fire
18 training, elimination of hazards,
19 recreational and ceremonial fires, land
20 management, land clearing operations --
21 which is, by the way, most of them are used
22 for is for that exception right there,
23 burning of domestic refuse, hydrocarbon
24 burning. Those are the exceptions.

25 MR. WILSON: In your definition,

Page 26

1 combustible material means any substance
2 which will readily burn and shall include
3 substances which although generally
4 considered incombustible are or may be
5 included in the mass of material burned or
6 to be burned. And then over here in 13-8,
7 you have open burning of combustible
8 material in an open-pit incinerator without
9 a permit being allowed, and then under
10 these circumstances, it seems to me like
11 any combustible material that would meet
12 that definition of combustible materials is
13 allowed to be burned in an open-pit
14 incinerator.
15 MS. HOFFMAN: Okay. Probably
16 what we need to do then is under 13-5 where
17 it says open burning prohibited, what we
18 probably need to do is to make it clear.
19 We probably need to delete 13-8 -- we
20 probably need to put open-pit incinerators
21 back in 13-7. Because the point of the
22 matter is we have no intention of expanding
23 this rule to allow anything to be burned in
24 an open-pit incinerator.
25 MR. WILSON: And as it's written,

Page 27

1 I think it does. The proposed action of
2 the Council is to revisit this in December;
3 is that correct? There are houses out
4 there that need to be burned.
5 MR. KILPATRICK: Is there any
6 reason why we have to pass it today?
7 MS. BUTTRAM: I was just thinking
8 of the Council.
9 MR. KILPATRICK: I think he's
10 right. We need to adjust this wording.
11 MR. DYKE: For clarification, we
12 had originally proposed to carry this over
13 and then we felt that in light of the
14 agenda and things we were already carrying
15 over that we would pursue it today. If the
16 Council wishes, we can sure do that.
17 MS. MYERS: I think with some of
18 the comments that have been made and
19 questions asked, it will be better to carry
20 it over.
21 MR. FALLON: In my original
22 question, which I asked you is the official
23 attitude toward burning dilapidated
24 structures, does it seem under this
25 proposal as it has been in the past, don't

Page 2

1 do it.
2 MS. BUTTRAM: That's true.
3 MR. FALLON: But I think what
4 Joel points out is that if you take the
5 definition of a combustible material on one
6 hand, you are theoretically -- well, not
7 encouraging, not condoning, but somebody
8 could make a pretty good argument for it.
9 I think that's what it needs to be.
10 MS. BUTTRAM: So work on the
11 open-pit incinerator section.
12 MR. DYKE: Additional comments
13 and questions from the Council? Anyone
14 else? Identify yourself. *Sobel*
15 MR. SODA: I'm Ron Soda? I had a
16 question for Jeanette if I could just ask
17 her?
18 MR. DYKE: Go ahead.
19 MR. *Sobel* SODA: Back in the rule we
20 talked about hazardous materials -- it
21 doesn't appear to be defined in the rule.
22 Could Jeanette direct me to somewhere else
23 it would be?
24 MS. BUTTRAM: Well, I don't have
25 Subchapter 1 with me, but it may be in

Page 29

1 there.
2 MR. *Sobel* SODA: Also, off-site and on-
3 site is lacking a definition in these
4 rules, as well.
5 MS. BUTTRAM: A definition for
6 off-site and on-site?
7 MR. SODA: On-site and off-site
8 for the sake of clarity. If we're going to
9 exclude something, we need to be clear on
10 what's excluded.
11 MS. BUTTRAM: I'll consider that
12 in the next draft.
13 MR. *Sobel* SODA: One other
14 clarification I would like to see is under
15 authorization under Paragraph for
16 hydrocarbon burning. Authorization must be
17 obtained from ODEQ prior to such burning.
18 What authorization specifically are we
19 talking about? Is this an ODEQ permit or
20 letter or some form?
21 MS. BUTTRAM: Right, I see.
22 MR. DYKE: I know in the past
23 it's been by -- I have authorized it by
24 telephone if the conditions were such.
25 MR. *Sobel* SODA: That's great. it's **5419**

1 just a matter of clarification.

2 MR. BREISCH: I'll entertain a
3 motion on this item and ask whether we need
4 to continue it or whatever your desire is.

5 MS. MYERS: I'll make a motion.

6 MR. FALLON: Second.

7 MR. BREISCH: I've got a motion
8 and a second to continue this item to the
9 next regular Council meeting. Any other
10 questions? Myrna, call the roll.

11 MS. BRUCE: Mr. Wilson.

12 MR. WILSON: Yes.

13 MS. BRUCE: Mr. Fallon.

14 MR. FALLON: Yes.

15 MS. BRUCE: Ms. Myers.

16 MS. MYERS: Aye.

17 MS. BRUCE: Mr. Branecky.

18 MR. BRANECKY: Aye.

19 MS. BRUCE: Mr. Kilpatrick.

20 MR. KILPATRICK: Yes.

21 MS. BRUCE: Mr. Breisch.

22 MR. BREISCH: Yes.

TRANSCRIPT OF PROCEEDINGS
OF THE PUBLIC HEARING ON THE OAC 252:100-13
PROHIBITION OF OPEN BURNING
HELD ON DECEMBER 14, 1999
AT 9:00 A.M.
AT 707 NORTH ROBINSON AVENUE
IN OKLAHOMA CITY, OKLAHOMA

* * * * *

Page 4

1 and expanded. The new language allows only
2 those materials that may be burned under
3 Subchapter 13, with the exception of
4 hazardous material, to be burned in an
5 open-pit incinerator. Also, the owner or
6 operator of the open-pit incinerator would
7 be prohibited from accepting any material
8 owned by other persons and from
9 transporting any material to the property
10 where the open-pit incinerator is located
11 in order to burn the material. If these
12 limitations are approved, staff sees no
13 reason to require registration or
14 permitting of open-pit incinerators as was
15 proposed in Section 8.
16 Section 252:100-13-8, Open-Pit
17 Incinerators, page 7. Staff is proposing
18 that this new section presented to the
19 Council at the October Council meeting, not
20 be included in the final rule recommended
21 to the Environmental Quality Board, since
22 its subject will be covered in 252:100-13-
23 7(g). If the Council agrees and deletes
24 this section, the reference to this section
25 in 100-13-5 should also be deleted.

Page 3

1 **PROCEEDINGS**
2 **MR. DYKE:** The next item on the
3 agenda, Item 6D, OAC 252:100-13,
4 Prohibition of Open Burning. Once again,
5 I'll call on Ms. Jeanette Buttram.
6 **MS. BUTTRAM:** Mr. Chairman,
7 Members of the Council, ladies and
8 gentlemen, revisions to Subchapter 13,
9 Prohibition of Open Burning, were drafted
10 as part of the rewrite/dewrong process and
11 presented to the Council in October.
12 Additional changes to the draft rule since
13 that time include the following:
14 Section 252:100-13-7(d)(2), Land
15 Management and Land Clearing Operations,
16 page 5. New language was added to require
17 those who clear land in areas that are or
18 have been designated nonattainment to burn
19 their vegetation in open-pit incinerators.
20 This should help to reduce pollution in
21 counties that have the worst air quality.
22 Section 252:100-13-7(g), Open-Pit
23 Incinerators, page 6. Existing language
24 for open-pit incinerators was returned to
25 Section 7, placed in a new subsection (g),

Page 5

1 Comments were received yesterday
2 from Central and South West Services and
3 will be entered into the record and also, a
4 representative is here today to address the
5 Council.
6 Staff suggests that the proposed
7 rule as amended be recommended for adoption
8 by the Board as a permanent rule.
9 **MR. DYKE:** Questions of Ms.
10 Buttram from the Council?
11 **MR. BRANECKY:** Jeanette, on page
12 5, number two, you talk about being
13 conducted in open-pit incinerators in
14 counties or areas that are or have been
15 designated nonattainment. Does it need to
16 be -- is that nonattainment for anything,
17 lead or anything? Or is it any specific
18 pollutant for nonattainment.
19 **MS. BUTTRAM:** Any specific -- any
20 of them. That's the way it's written in
21 the rule.
22 **MR. TERRILL:** I can address that
23 because I'm the one that suggested putting
24 that in there that way. What we were
25 really driving at there is, most of the

Page 6

1 complaints that we get relative to open
 2 burning in the situations such as land
 3 clearing and what have you are related to
 4 metropolitan areas. And it's not a -- not
 5 everyone does it, but a significant portion
 6 of the developers that develop in the
 7 metropolitan areas already use air curtain
 8 structures anyway. So this was a way to
 9 get at that so we can limit that. Give
 10 that as an option, but limit it in some way
 11 so if you are out in the panhandle or some
 12 like-place where it really doesn't make
 13 that much difference, we can handle it on a
 14 complaint basis at that point, then they
 15 can go ahead and burn without using the
 16 open-pit incinerator. But realistically we
 17 were probably looking only at ozone or
 18 possibly CO, but really ozone formation is
 19 what we were really looking at for
 20 nonattainment.
 21 MR. BRANECKY: Is there any
 22 advantage to being specific as opposed to
 23 open-ended for anything -- any of the
 24 pollutants?
 25 MS. HOFFMAN: Well, we don't

Page 7

1 really expect to go nonattainment for lead
 2 or SO2. We do have a couple of instances -
 3 - we do have former ozone nonattainment, we
 4 do have former CO nonattainment, and those
 5 are really the -- I think the pollutants of
 6 concern when you're burning. So we feel
 7 like when we talk about former
 8 nonattainment areas, then we are catching
 9 those. And when we talk about ones in the
 10 future, we really think that -- we don't
 11 see that we're anywhere close to having a
 12 CO problem anywhere else. And really, I
 13 think ozone is -- maybe particulate matter,
 14 and again that's related to burning. So we
 15 think that those are the likely
 16 possibilities and we don't -- and rather
 17 than make the rule longer than it needs to
 18 be by mentioning specific pollutants and
 19 specific circumstances, we thought that
 20 this would cover the situation and not be
 too restrictive.
 21 MR. BRANECKY: Okay.
 22 MR. WILSON: Jeanette, I guess my
 23 mind is on lunch right now. But I think

Page 8

1 barbecue. And these people are preparing
 2 their barbecue in smokers, things that are
 3 designed to burn wood or hickory, pecan.
 4 Are these things going to be prohibited by
 5 this rule?
 6 MS. BUTTRAM: I don't see that
 7 they were prohibited before, so no, I don't
 8 see anything that we've entered into the
 9 rule that would do that.
 10 MR. WILSON: That's ceremonial
 11 here? I don't see anything in the rule
 12 that would allow them to continue doing
 13 that myself. But I didn't think that it
 14 was the intent to regulate those sources.
 15 MS. BUTTRAM: So you are saying
 16 there is something in the rule that does?
 17 MR. WILSON: Yes. I think that's
 18 going on there meets the definition of open
 19 burning, and I don't see where that's
 20 allowed.
 21 MR. BRANECKY: Are you saying
 22 these facilities have a pile of wood out
 23 back that's open, not in a smoker. A
 24 smoker is not open burning.
 25 MS. BUTTRAM: Yes, that's

Page 9

1 contained.
 2 MR. WILSON: That's contained?
 3 MR. TERRILL: That's how we
 4 interpret it, too, because I don't think
 5 that was ever a thought. That never even
 6 came up in our thought pattern that that
 7 would be prohibited. Obviously, if we got
 8 a complaint against -- it was a commercial
 9 operation and we got a complaint, we might
 10 investigate it, but that wouldn't be
 11 prohibited under this.
 12 MR. WILSON: So something that's
 13 containerized -- contained, even though the
 14 emissions are emitted into the atmosphere,
 15 would be exempted from this rule?
 16 MR. BREISCH: Well, it could give
 17 visible emissions.
 18 MS. BUTTRAM: If we're talking
 19 about -- are you talking about in the
 20 barbecue situation?
 21 MR. BREISCH: Right.
 22 MS. BUTTRAM: Well, there is
 23 nothing in the rule that prohibits it and
 24 we haven't written anything in the rule to

5423

1 problem.

2 MR. TERRILL: We like to think

3 that we implement these rules with some

4 common sense approach, even if it doesn't

5 specifically think of everything. And if

6 we didn't, I suspect you would have someone

7 here complaining that we were not

8 (inaudible). We have no intention -- I

9 mean, it's fairly straightforward is what

10 we're driving at. I don't think we can

11 ever think of all the possibilities. So if

12 it doesn't make sense to you, we ought to

13 regulate them. I guess we're not. That's

14 just the way we would operate. So I

15 guess ?

16 MR. DYKE: Additional questions?

17 MR. WILSON: Thanks.

18 MR. DYKE: Additional questions

19 from the Council? Mr. Ground, did you wish

20 to speak on this rule?

21 MR. GROUND: I'm Howard Ground,

22 representing Public Service Company of

23 Oklahoma. And at Public Service Company,

24 we do conduct industrial firefighter

25 training, periodically. At some of our

1 facilities, it's every year. And I only

2 get up and mention this because I've dealt

3 with this very routinely.

4 And my comment is on 100-13-7(a).

5 And it gets down to the main area where it

6 says, provided the authorization from the

7 local fire chief has been issued prior to

8 any burning. Then it says, the DEQ may

9 require written verification or

10 authorization from the local fire chief or

11 fire training officer. My experience in

12 the State of Oklahoma is it's almost

13 impossible to get written verification from

14 a fire chief that we can conduct

15 firefighter training, except from the City

16 of Tulsa. Every other facility we have, we

17 make notification and we never receive

18 anything back. And if we're required by

19 the DEQ to have some form of verification

20 or authorization, then I'm just afraid

21 we're going to be in violation, if you ever

22 come out and look for any kind of

23 authorization to conduct our open burning -

24 - or our firefighter training. It's a lot

25 to question, but it's also -- I would

1 rather you make this that we make

2 notification, that we can prove that we've

3 made notification, and not require that we

4 have written proof of the authorization.

5 MR. BRANECKY: Do you think there

6 needs to be some time frame in there that

7 you are suggesting that would allow the

8 fire chief to respond? If we take your

9 suggestion, you could notify one day and

10 burn the next, not giving them a chance to

11 respond back.

12 MR. GROUND: Yeah. And we have

13 internal policies trying to give them

14 enough time, and we also have internal

15 policies that we require the facility to

16 call them that day and say, we sent you a

17 notice, did you receive it? And they

18 usually say, oh, well, it's probably on my

19 desk somewhere, but go ahead with your

20 burn. But I would rather see some type of

21 a pre-notice -- pre-notification given so

22 many days before to make sure that they

23 have adequate time to look at it. These

24 are things we do plan.

25 MR. FALLON: Theoretically, under

1 this, you could drop a letter in the

2 mailbox requesting, and then burn before

3 the letter arrived. And I realize that's

4 a technical point, but could still happen.

5 MR. GROUND: Right.

6 MR. BRANECKY: Would something

7 like that be acceptable? Three days?

8 MR. TERRILL: Correct me if I'm

9 wrong here, but I think our whole purpose

10 was to ensure that the fire chief or fire

11 marshall or whatever got notified. Because

12 we get a lot of complaints from them saying

13 you guys apparently gave them authority to

14 burn and you didn't -- nobody told us

15 anything about it and we made a run and

16 they didn't know. So our purpose here is

17 to make sure that that fire chief or fire

18 marshall, or whoever the responsible person

19 is in these localities is notified well in

20 advance. And whether or not they choose to

21 respond or not, that's up to them. But

22 that's all we're driving at, is to make

23 sure that there is some notification made

24 so that we can't be accused of not letting

25 them know.

Page 14

1 MR. FALLON: But there should be
2 a time period, three to five days.
3 MR. BRANECKY: These schools are
4 well planned well in advance, so that
5 shouldn't be a problem, should it?
6 MR. GROUND: No. We would be --
7 yes, that would be very easy to work with.
8 If we just have a notification requirement
9 and not something requiring that we have
10 the authorization -- written authorization.
11 MR. BREISCH: Will you still get
12 authorization?
13 MR. GROUND: We do, but they
14 won't write us -- the City of Tulsa is the
15 only one who will actually write us a
16 permit. The other areas, a lot of them are
17 rural and they are volunteer fire
18 departments, anyway. A lot of them, they
19 depend on the local DEQ office, wherever
20 that is, and they'll tell us, did you
21 notify them and we'll say, yes. And a lot
22 of it, we want to make sure they do know
23 about it in case they see something that
24 they know that they are not supposed to
25 respond. We actually invite them out to

Page 15

1 take fire training with us, if they want to
2 be involved with that.
3 MR. TERRILL: But he's right,
4 they don't -- it's very seldom that they'll
5 get a reply back. They just note it and go
6 on and never do reply back.
7 MR. BRANECKY: How about if we
8 say, provided that authorization has been
9 requested from the local fire chief at
10 least 10 working days prior to the
11 conducting of the training? I think 10
12 would be a reasonable amount, 10 working
13 days.
14 MR. GROUND: I think so.
15 MR. FALLON: I think there should
16 be some specified time, whatever it is.
17 MR. GROUND: That's all I have.
18 MR. DYKE: Thank you. Barbara,
19 did you get that? Is there any additional
20 questions from the Council? Is there
21 anyone else wishing to speak on this rule?
22 I'll turn it over to you.
23 MR. BREISCH: Is there any --
24 MR. TREEMAN: I was going to add
25 one thing possibly to that, has provided

Page 16

1 authorization been requested within 10 days
2 or given shorter term. And the reason I
3 say that is our company is running the same
4 type of thing. And a lot of times the
5 training is done by the guy that's doing
6 our fire extinguisher maintenance. I might
7 not have a 10 day notice before he's there.
8 We notify and then get the authorization
9 and we can go ahead and proceed if 10 days
10 hasn't elapsed.
11 MR. BRANECKY: If you get
12 authorization?
13 MR. TREEMAN: If you get
14 authorization.
15 MR. BREISCH: Yes. That negates
16 any waiting period.
17 MR. DYKE: Did you get that,
18 Barbara?
19 MS. HOFFMAN: No.
20 MR. BRANECKY: Provided that
21 authorization has been requested from the
22 local fire chief at least 10 working days
23 prior to conducting the training or --
24 MR. TREEMAN: Well, authorization
25 has been requested or received, I guess you

Page 17

1 could say, within 10 days.
2 MR. BRANECKY: What we're trying
3 to say is if he gets authorization before
4 the 10 days --
5 MR. GROUND: I can do it eight
6 days after notification.
7 MR. FALLON: Just add a comma,
8 and sooner if authorized in writing.
9 MR. BREISCH: You might not need,
10 "in writing".
11 MS. HOFFMAN: David, would you
12 repeat what you wanted, again?
13 MR. BRANECKY: Provided that
14 authorization has been requested from the
15 local fire chief at least 10 working days
16 prior to conducting the training -- help me
17 Rick, I can't remember.
18 MR. TERRILL: Or written
19 authorization that's received prior to
20 burning -- authorization is received prior
21 to burning.
22 MS. BRADLEY: The absence of that
23 -- if authorization has been received, or
24 in absence of that authorization requested
25 within 10 days or something like that.

5425

1 MR. BREISCH: I think what Eddie
 2 added to it was --
 3 MR. TERRILL: Let's not make this
 4 any more complicated.
 5 MR. DYKE: Okay, let's try it.
 6 MS. HOFFMAN: Okay, how does this
 7 sound? Provided that authorization has
 8 been requested from the local fire chief at
 9 least 10 working days prior to any burning
 10 or that written authorization has been
 11 received prior to such burning.
 12 MR. DYKE: Is that okay?
 13 MR. FALLON: That's good.
 14 MR. BREISCH: With that change,
 15 are we ready to make a motion on this?
 16 I'll entertain a motion.
 17 DR. GROSZ: I'll move that we
 18 accept this change.
 19 MR. FALLON: Second.
 20 MR. BREISCH: I've got a motion
 21 and a second to recommend this to the Board
 22 for permanent adoption. Myrna, call the
 23 roll.
 24 MS. BRUCE: Mr. Wilson.
 25 MR. WILSON: Aye.

1 MS. BRUCE: Mr. Branecky.
 2 MR. BRANECKY: Yes.
 3 MS. BRUCE: Mr. Treeman.
 4 MR. TREEMAN: Yes.
 5 MS. BRUCE: Mr. Fallon.
 6 MR. FALLON: Yes.
 7 MS. BRUCE: Dr. Grosz.
 8 DR. GROSZ: Yes.
 9 MS. BRUCE: Mr. Breisch.
 10 MR. BREISCH: Yes.

CHAPTER 100. AIR POLLUTION CONTROL

SUBCHAPTER 17. INCINERATORS

Section

- 252:100-17-1. Purpose [AMENDED]
- 252:100-17-1.1 Reference to 40 CFR [NEW]
- 252:100-17-1.2 Terminology related to 40 CFR [NEW]
- 252:100-17-2. Applicability [AMENDED]
- 252:100-17-2.1 Exemptions [NEW]
- 252:100-17-2.2 Definitions [NEW]
- 252:100-17-3. Opacity [AMENDED]
- 252:100-17-4. Particulate Matter [AMENDED]
- 252:100-17-5. Incinerator design requirements [AMENDED]
- 252:100-17-5.1 Alternative incinerator design requirements [NEW]
- 252:100-17-6. Allowable emission of particulates [REVOKED]
- 252:100-17-7. Test methods [NEW]

PART 1. GENERAL PROVISIONS

252:100-17-1. Purpose

The purpose of this Subchapter is to ~~deem it unlawful to burn refuse in any incinerator except in a multiple-chambered incinerator or in equipment determined by the Director to be equally effective for the purpose of air pollution control~~ specify design and operating requirements and emission limitations for incinerators and municipal waste combustors (MWC).

252:100-17-1.1. Reference to 40 CFR

When a provision of Title 40 of the Code of Federal Regulations (40 CFR) is incorporated by reference, all citations contained therein are also incorporated by reference.

252:100-17-1.2. Terminology related to 40 CFR

When these terms are used in rules incorporated by reference, the following definitions shall apply.

- (1) "EPA Administrator" is synonymous with "Executive Director".
- (2) "Affected facility" is synonymous with "large MWC unit"
- (3) "State" is synonymous with "Department of Environmental Quality" or "DEQ".
- (4) "State plan" is a program that the State is responsible for developing and implementing to achieve compliance with the emission guidelines in Subpart Cb of 40 CFR Part 60.

PART 3. INCINERATOR

252:100-17-2. Effective date; applicability-Applicability

This Subchapter shall become operative one year from and after July 21, 1970. It will apply to any and all incinerators utilized within the State of Oklahoma. This Part applies to incinerators not subject to New Source Performance Standards (NSPS) or any other Parts in this Subchapter.

252:100-17-2.1. Exemptions

Thermal oxidizers, flares and any other air pollution control devices are exempt from the requirements of this Part.

252:200-17-2.2. Definitions

The following words and terms when used in this Subchapter shall have the following meaning unless the context clearly indicates otherwise:

"Capacity" means amount of specified wastes a unit is designed to burn. Capacity may be expressed as pounds per hour or tons per day.

"Primary combustion chamber: means the initial incinerator chamber where waste is charged, ignited and burned.

"Secondary burner" means a supplemental burner in the secondary chamber for the purpose of maintaining a minimum temperature and to insure the complete combustion of volatile gases and smoke.

252:100-17-3. Prohibition on density of emissions-Opacity

(a) **Prohibition.** No person shall cause, suffer, allow, or permit the discharge of smoke from an incinerator of a density darker than number one (1) on the Ringelmann Chart or a visible emission of such an equivalent opacity as to obscure a certified visible emission evaluator's view to a degree greater than number one (1) on the Ringelmann Chart.

(b) **Exemptions.** Subsection 252:100-17-3(a) shall not apply to:

- (1) visible emissions consisting of uncombined water droplets; or,
- (2) smoke, the density of which is not darker than number three (3) of the Ringelmann Chart for a period aggregating no more than five (5) minutes in any sixty (60) consecutive minutes or more than twenty (20) minutes in any twenty-four (24) hour period.-See 252:100-25-3.

252:100-17-4. Prohibition on pounds per hour of emissions-Particulate matter

No person shall cause or allow to be emitted into the open air from any incinerator equipment, fly ash or other particulate matter in quantities greater than shown in 252:100-17-6. Solid fuels charged will be considered as part of the refuse weight, but No. 1 and No. 2 fuel oil and gaseous fuels and combustion air will not be so considered.-Fly ash or other particulate matter shall not exceed quantities greater than the allowable emission rate. The allowable emissions for incinerators with capacities of 100 lb/hr or greater are set forth in Appendix A of this Chapter. The allowable emissions for incinerators with capacities less than 100 lb/hr are set forth in Appendix B of this Chapter. Solid fuels charged will be considered part of the refuse weight. No.1 and No. 2 fuel oils (distillate

oils), liquefied petroleum gases, gaseous fuels and combustion air will not be considered as part of the refuse weight.

252:100-17-5. Incinerator design requirements

~~Hereafter no person shall operate an incinerator unless~~ An incinerator subject to this Part must have:

- ~~(1) It is provided with an auxiliary burner for the purpose of maintaining~~ A primary burner that maintains a temperature of at least 800°F in the primary combustion chamber.
- ~~(2) It has~~ A secondary burner for use that shall be used when necessary to eliminate smoke.
- ~~(3) It is a type of incinerator design that can be demonstrated to the Director to be effective in accordance with the provisions of this Subchapter. The burden of proof shall rest upon the owner of the proposed incinerator.~~
- ~~(4) It complies with generally recognized good practices and all applicable provisions of this Subchapter.~~
- ~~(5) Full and proper use is made of all components and appurtenances thereof.~~

252:100-17-5.1. Alternative incinerator design requirements

The Director may approve an incinerator design that does not meet the design requirements in 252:100-17-5 if the owner of the proposed incinerator demonstrates to the DEQ that the incinerator can comply with all other applicable requirements.

252:100-17-6. Allowable emission of particulates [REVOKED]

- ~~(a) Allowable emissions for incinerators with capacities in excess of 100 lb/hr are set forth in Appendix A of this Chapter.~~
- ~~(b) Allowable emissions for incinerators with capacities less than 100 lbs/hr are set forth in Appendix B of this Chapter.~~

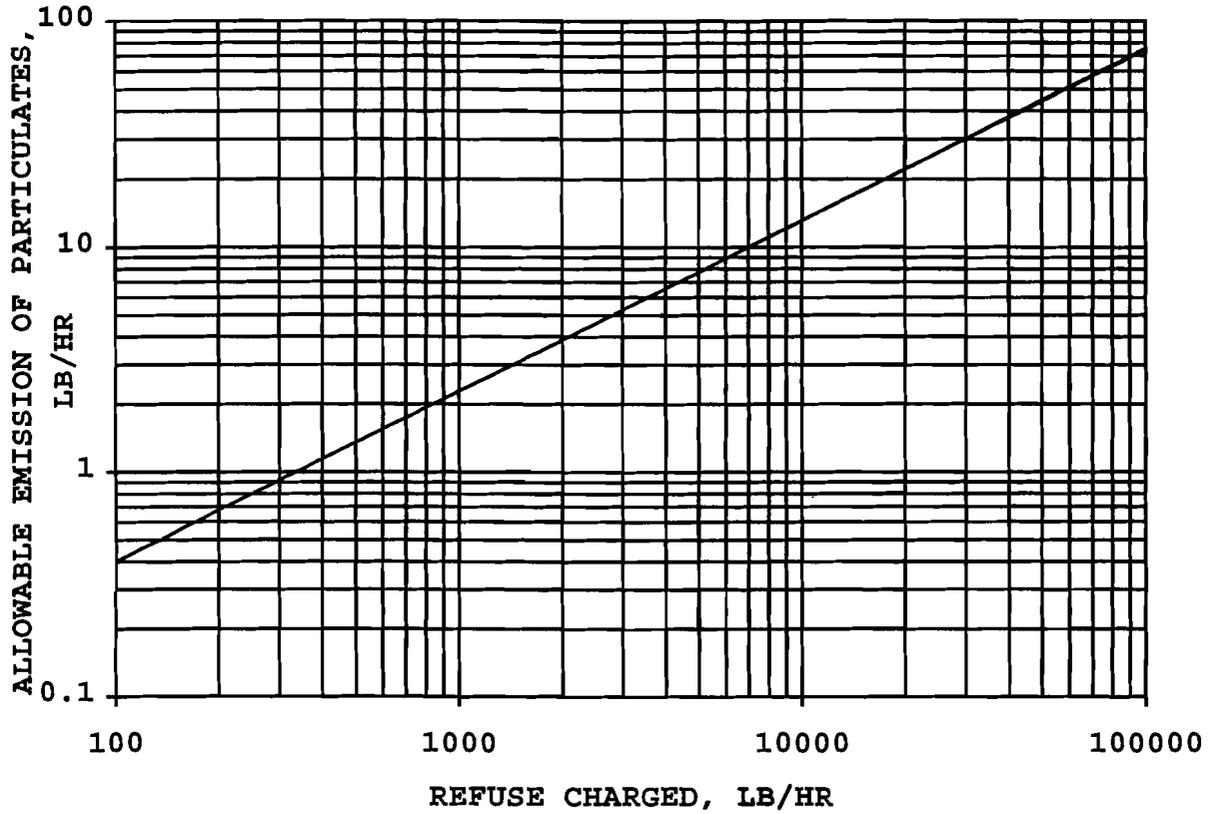

AGENCY NOTE: The provisions of 252:100-17-6 have been incorporated into 252:100-17-4 to clarify and simplify language.

252:100-17-7. Test methods

(a) Opacity. Opacity shall be measured utilizing Method 9 – Visual Determination of the Opacity of Emissions from Stationary Sources found in the Code of Federal Regulations at 40 CFR Part 60, Appendix A. This method is hereby incorporated by reference as it exists on July 1, 1997.

(b) Particulate matter. Particulate matter shall be measured utilizing the appropriate DEQ-approved Method 5 found in the Code of Federal Regulations at 40 CFR Part 60, Appendix A. This method is hereby incorporated by reference as it exists on July 1, 1997.

APPENDIX A. [NEW]
ALLOWABLE EMISSIONS FOR INCINERATORS WITH CAPACITIES IN EXCESS
OF 100 LB/HR

Allowable emission rate may be calculated using the following formula:

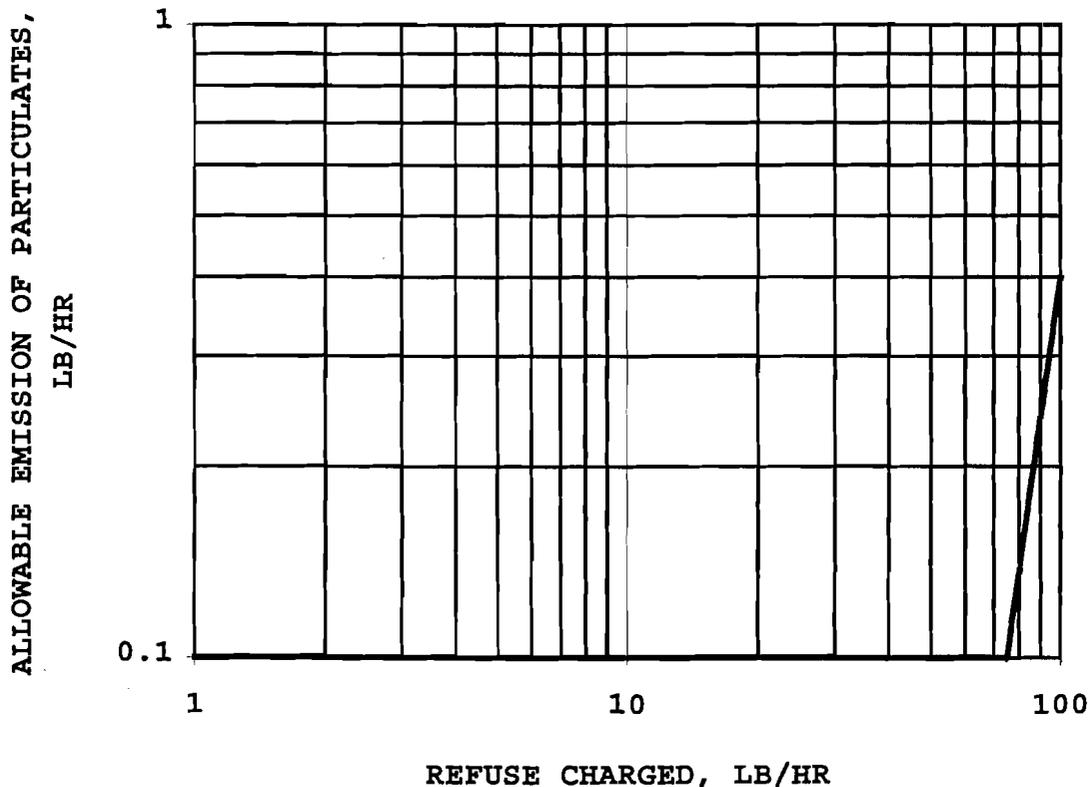

$$Y = 0.01221X^{0.7577}$$

Where:

X = refuse charged, lb/hr on an as-loaded basis.

Y = allowable particulate matter emission rate, lb/hr.

APPENDIX B. [NEW]
 ALLOWABLE EMISSIONS FOR INCINERATORS WITH CAPACITIES LESS THAN
 100 LB/HR

Allowable emission rate may be calculated using the following formulae:

Incinerators with capacities greater than 75, but less than or equal to 100 lb/hr

$$Y = 9.213 \times 10^{-11} X^{4.818}$$

Incinerators with capacities of 75 lb/hr or less

$$Y = 0.1$$

Where:

X = refuse charged, lb/hr on an as-loaded basis.

Y = allowable particulate matter emission rate, lb/hr.

**TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 100. AIR POLLUTION CONTROL**

[OAR Docket #96-1175]

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking
Proposed Rules:

- Subchapter 17. Incinerators [AMENDED]
- Part 3. Municipal Waste Combustors [NEW]
- Subchapter 15. Motor Vehicle Pollution Control Devices [REVOKED]

Summary:

Subchapter 17 is amended by adding a new Part 3 to include municipal waste combustors. This amendment is necessary to meet Federal requirements under Section 111(d) of the Federal Clean Air Act applicable to existing sources. This change would adopt standards published in final EPA guidelines published in the Federal Register at 60 FR, page 65382, Tuesday, December 19, 1995. These federal standards, to be codified at 40 CFR 60, Subpart Cb, would apply to municipal waste combustors that have a plant capacity of >35 Megagrams/day (approximately 39 tons/day). In addition, the existing portions of Subchapter 17 are to be revised and redesignated as Part 1. Proposed revisions include deletion of references to Ringleman standards and substitution of relative opacity. The agency also solicits comments concerning other revisions needed to update and clarify the rule. It is also proposed that Subchapter 15 be revoked in its entirety because it is presently unenforceable by the Department.

AUTHORITY:

Environmental Quality Board, 27A O.S. Supp. 1993, §§ 2-2-101, 2-5-1-1 *et seq.*

COMMENT PERIOD:

Deliver or mail written comments on or before close of business Monday, December 9, 1996, to contact person.

PUBLIC HEARINGS:

Tuesday, December 17, 1996 - 9:30 a.m. briefing and 1:00 p.m. hearing, Department of Environmental Quality, Air Quality Division, 4545 N. Lincoln Blvd., Brown Room, Oklahoma City, Oklahoma; Environmental Quality Board

meeting (date and location to be determined. See contact person.)

COPIES OF PROPOSED RULES:

Copies of the rules will be available November 15, 1996, for review at the Air Quality Division office at the address listed below or may be obtained from the contact person.

RULE IMPACT STATEMENT:

A rule impact statement has been prepared. The rule impact statement may be obtained from the Air Quality Division at the address below.

CONTACT PERSON:

Joyce D. Sheedy, Ph.D., Department of Environmental Quality, Air Quality Division, 4545 N. Lincoln Blvd., Suite 250, Oklahoma City, Oklahoma 73105-3483, (405)290-8247

ADDITIONAL INFORMATION:

The proposed rulemaking activities for Subchapters 15 and 17 represent a continuation of a hearing held on October 15, 1996, in Tulsa, Oklahoma.

PERSONS WITH DISABILITIES:

Should you desire to attend but have a disability and need an accommodation, please notify the Air Quality Division three (3) days in advance of the meeting at (405)290-8247.

[OAR Docket #96-1175; filed 10-23-96]

**TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 400. RADIATION MANAGEMENT**

[OAR Docket #96-1197A]

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT/EMERGENCY Rulemaking

Proposed rules:

- Subchapter 9. Standards for Protection Against Radiation [AMENDED]
- Subchapter 21. Decommissioning and Remediation [NEW]

Summary:

These rules implement the Oklahoma Radiation Management Act, 27A:2-9-101 *et seq.* in part. The proposed amendments reorganize and upgrade Subchapter 9's existing safety requirements for radiation source handling, for exposure limits and the monitoring and reporting thereof, and for the limits for radiation releases into water and air. The Subchapter 9 amendments revoke many existing state standards and replace them by incorporating by reference the most recent federal standards of Part 20, Title 10 of the Code of Federal Regulations (10 C.F.R. 20). A few existing state standards are being retained, clarified and simplified in Subchapter 9. In addition, two existing Subchapter 9 rules are proposed to be amended and moved to a new Subchapter 21 dealing with decommissioning and remediation. The new Subchapter 21

[OAR Docket #96-1382; filed 12-20-96]

**TITLE 252. DEPARTMENT OF
ENVIRONMENTAL QUALITY
CHAPTER 100. AIR POLLUTION CONTROL**

[OAR Docket #96-1421]

INTENDED RULEMAKING ACTION:

Notice of proposed EMERGENCY and PERMANENT rulemaking

Proposed rules:

Subchapter 17

Part 1. General Purpose [AMENDED]

Part 3. Incinerators [AMENDED]

Part 7. Municipal Waste Combustors [NEW]

Subchapter 15. Motor Vehicle Pollution Control Devices [REVOKED]

Summary:

The proposed amendments to Subchapter 17 include the designations of Part 1, General Purpose, and Part 3, Incinerators. Also, the deletion of references to the Ringleman standards, the substitution of relative opacity, along with incorporation of the permit continuum, language simplification and clarification are included. The proposed addition of a new Part 7 was originally considered necessary to meet Federal requirements set forth by EPA in 40 CFR Part 60 which sets the air pollution emission standards for Municipal Waste Combustors that have a plant capacity of >35 Megagrams/day (approximately 39 tons/day). There are at least two facilities in the state that will be affected by this rulemaking. Since the initial proposal of the amendments to Subchapter 17, a Federal court has vacated the Federal Municipal Waste Combustor rules. It is the intent of the Agency to postpone adoption of at least those portions of the rule affected by the litigation. Comments are requested on the propriety and the extent of such an action. It is also proposed that Subchapter 15 be revoked in its entirety in concert with an effort to eliminate unnecessary or unenforceable rules. The substance of the motor vehicle anti-tampering provisions are currently addressed by federal law and Department of Public Safety inspection provisions.

**TITLE 310. OKLAHOMA STATE
DEPARTMENT OF HEALTH
CHAPTER 4. CERTIFICATE OF NEED
HEARINGS**

[OAR Docket #96-1406]

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking

Proposed rules:

310:4 [AMENDED]

Summary:

This rule sets out procedures for filing applications and making final decisions on certificate of need proposals for long term care, psychiatric, and chemical dependency treatment facilities. The amendments provide for consideration of written materials instead of oral presentations prior to a decision by the Commissioner on any type of project. Requirements relating to application filing fees and time deadlines are modified. The amendments specify conditions under which the review must be extended to persons with controlling interests, and they set the criterion for history of noncompliance. Application forms are described, and the amendments correct errors of spelling, grammar, format and

construction in the rule text. The proposed changes are prompted by recent amendments to the Long Term Care Certificate of Need Act (63 O.S. Supp. 1996, Section 1-850 et seq.). The changes are intended to make the certificate of need review process conform to statutory provisions and to make the process less complex for all participants.

AUTHORITY:

[OAR Docket #97-1271; filed 10-24-97]

**TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 100. AIR POLLUTION CONTROL**

[OAR Docket #97-1272]

INTENDED RULEMAKING ACTION:

Notice of proposed EMERGENCY and PERMANENT rulemaking

PROPOSED RULES:

- 252:100. Air Pollution Control
- Subchapter 5. Registration of Air Contaminant Sources [AMENDED]
- Subchapter 8. Operating Permits (Part 70) [AMENDED]
- Subchapter 17. Incinerators [AMENDED]

SUMMARY:

In Subchapter 5 at 252:100-5-2.2(b)(2), it is proposed to review the annual operating fees for Part 70 sources. The proposed amendments to Subchapter 8 are necessary to incorporate a new permit classification system; move the requirements for construction permits for Part 70 sources and major facilities from Subchapter 7 to Subchapter 8; move the requirement to pay annual operating fees from Subchapter 8 to Subchapter 5; and meet the federal requirements for final approval of the Oklahoma Operating Permits Program under Title V of the federal Clean Air Act and 40 CFR Part 70. The proposed amendments include: introduction of general permits for construction of Part 70

sources and major facilities not subject to Part 70 general permits for operating major sources not subject Part 70; addition of the requirements for construction permits for Part 70 sources and construction and operating permits for major facilities not subject to Part 70; revision of the permit application fees; deletion of annual operating fees (which will be moved to Subchapter 5); and amendments to meet the requirements for final approval of the Title V program including the incorporation by reference of federal rules governing case-by-case MACT determinations (40 CFR §§63.40, 63.41, 63.43 and 63.44). The following changes were set forth by EPA in the interim approval of the Oklahoma program published in the Federal Register at 62 FR 4220, Monday, February 5, 1996: (1) Revise Subchapter 8 to Include Transition Schedule; (2) Revise Subchapter 8 definition of "Major Source"; (3) Revise Subchapter 8 Insignificant Activities Provision; (4) Revise Subchapter 8 Permit Content Language; (5) Revise Subchapter 8 Judicial Review Provision; (6) Revise Subchapter 8 Administrative Amendment Provision; and (7) Submission of a SIP Revision for Subchapter 7. It is proposed to amend Subchapter 17 by adding a new Part 5 and a new Appendix K to address Municipal Waste Combustors (MWC). This amendment is necessary to meet federal requirements for State plans under Section 111(d) of the federal Clean Air Act applicable to existing sources. This change would adopt standards published on December 19, 1995, in the Federal register at 40 CFR 60, Subpart Cb and amended on August 25, 1997. These standards apply to MWC units with the capacity to combust more than 250 tons per day of municipal solid waste. In addition, the existing portions of Subchapter 17 are revised and redesignated as Part 1, General Provisions, and Part 3, Incinerators. Proposed revisions include deletion of references to Ringelmann standards and substitution of relative opacity. Revisions were also made to Appendices A and B for reasons of simplification. The Division is requesting comments on these issues.

COMMENT PERIOD:

Monday, November 17, 1997, through Tuesday, December 16, 1997. To be thoroughly considered by staff prior to the hearing, written comments should be submitted to the contact person by Wednesday, December 10, 1997. Also scheduled before the Environmental Quality Board at their meeting on Tuesday, January 27, 1998 - 9:30 a.m. [Location to be determined. See contact person.]

PUBLIC HEARINGS:

Before the Air Quality Council on Tuesday, December 16, 1997, 9:30 a.m. briefing and 1:00 p.m. hearing, at the Department of Environmental Quality, Air Quality Division, 4545 N. Lincoln Blvd., Burgundy Room, Oklahoma City, Oklahoma.

5447

Notices of Rulemaking Intent

COPIES OF PROPOSED RULES:

Copies of the rules will be available November 17, 1997, for review at the Air Quality Division office at the address listed below or may be obtained from the contact person.

RULE IMPACT STATEMENT:

The rule impact statements may be obtained from the Air Quality Division at the address below.

CONTACT PERSON:

Joyce D. Sheedy, Ph.D., Department of Environmental Quality, Air Quality Division, 4545 N. Lincoln Blvd., Suite 250, Oklahoma City, Oklahoma 73105-3483; (405) 290-8247.

ADDITIONAL INFORMATION:

The proposed rulemaking activities for Subchapters 5 and 8 represent a continuation of hearings held on October 21, 1997, in Tulsa, Oklahoma.

PERSONS WITH DISABILITIES:

Should you desire to attend but have a disability and need an accommodation, please notify the Air Quality Division three (3) days in advance at (405) 290-8247.

[OAR Docket #97-1272; filed 10-24-97]

TITLE 317. OKLAHOMA HEALTH CARE AUTHORITY CHAPTER 2. GRIEVANCE PROCESS AND PROCEDURES

[OAR Docket #97-1278]

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking
Proposed rules:

OAC 317:2-1-2.1 through 317:2-1-2.2 [AMENDED]
(Reference APA WF # 97-13)

SUMMARY:

Grievance Procedures and Process rules are revised to more accurately reflect the intent of the agency's grievance rules. The agency adopted rules on 2-19-97 which provide a wage and salary adjustment to long term care facilities. However, current rules do not specify the process for a facility to appeal an agency decision to recoup monies paid when the monies have not been used for the purpose intended, as allowed by agency rules. Revisions are needed to include the appeal process in the rules. Other revisions are needed to revise the process for non-payment or denial of provider claims. Current rules allow complaints regarding non-payment or denial of claims to be heard by the agency's Reimbursement Appeals Committee. This committee assures that payments are made equitably and within federal and state guidelines. Revised rules delete the requirement for a formal Level I proceeding hearing for complaints regarding claims payments to providers. Federal law does not require the formal hearing. Further

revisions are needed to allow for a process to reschedule a hearing on the basis of good cause. When an individual has duly exercised their rights and a hearing set, current rules do not address situations when the person does not appear for the hearing but later shows the absence was clearly beyond the person's control. Revised rules will allow the Administrative Law Judge to reschedule the hearing when good cause does exist.

AUTHORITY:

Oklahoma Health Care Authority Board; The Oklahoma Health Care Authority Act, Section 5003 through 5016 of Title 63 of Oklahoma Statutes

COMMENT PERIOD:

Written and oral comments will be accepted through December 8, 1997 during regular business hours by contacting Joanne Terlizzi, Oklahoma Health Care Authority, 4545 N. Lincoln Blvd., Suite 124, Oklahoma City, Oklahoma, 73105, Telephone 405-530-3272.

PUBLIC HEARING:

No public hearing is scheduled at this time but will be scheduled if a written request is submitted to the contact person listed above by 1) at least twenty-five persons, 2) a political subdivision, 3) an agency, or 4) an association having not less than twenty-five members.

COPIES OF PROPOSED RULES:

Copies of proposed rules may be obtained for review by contacting the above listed contact person.

RULE IMPACT STATEMENT:

Copies of the Rule Impact Statement may be obtained for review by contacting the above listed person.

CONTACT PERSON:

For information regarding processing of proposed rulemaking contact Joanne Terlizzi at 405-530-3272.

TITLE 317. OKLAHOMA HEALTH CARE AUTHORITY CHAPTER 25. SOONERCARE

[OAR Docket #97-1279]

INTENDED RULEMAKING ACTION:

Notice of proposed PERMANENT rulemaking
Proposed rules:

Chapter 25. ~~Managed-Care~~ *SoonerCare*
Subchapter 1. ~~Health Plan Competitive Bid~~
~~Requirements~~

OAC 317:25-1-1 through 317:25-1-2 [AMENDED]

Subchapter 3. Health Maintenance Organizations

OAC 317:25-3-2.1 [REVOKED]

OAC 317:25-3-3 [AMENDED]

Subchapter 5. *SoonerCare Plus*

Part 1. General Provisions

minimis" facilities from the requirements of Subchapter 7; revising minor permit application fees; and introducing two new types of construction and operating permits, permit by rule and general permit.

The changes in Subchapter 8 incorporate a new permit classification system, move the requirement to pay annual operating fees from Subchapter 8 to Subchapter 5, move the requirements for construction permits for Title V sources from Subchapter 7 to Subchapter 8, make corrections to meet the federal requirements for final approval of the Oklahoma Operating Permit Program under Title V of the Federal Clean Air Act and 40 CFR Part 70, adopt by reference the federal rules governing case-by-case MACT determinations found in 40 CFR §§63.41, 63.43 and 63.44 as they exist on July 1, 1997, and update the adoption of 40 CFR 72 by adopting the provisions published in the Federal Register on October 24, 1997.

The Air Quality Advisory Council recommended these amendments for adoption at their meeting on January 9, 1998.

SUMMARY OF DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

None.

CONTACT PERSON:

For Subchapters 5 and 7: Jeanette Buttram, Department of Environmental Quality, Air Quality Division, 707 N. Robinson, 4th floor, Oklahoma City, Oklahoma 73102. (405) 702-4100.

For Subchapter 8: Joyce D. Sheedy, Ph.D., Department of Environmental Quality, Air Quality Division, 707 N. Robinson, 4th floor, Oklahoma City, Oklahoma 73102. (405) 702-4100.

DUE TO THE EXCESSIVE LENGTH OF THESE RULES (AS DEFINED IN OAC 655:10-7-12), THE FULL TEXT OF THESE RULES WILL NOT BE PUBLISHED. THE RULES ARE AVAILABLE FOR PUBLIC INSPECTION AT DEPARTMENT OF ENVIRONMENTAL QUALITY, 707 N. ROBINSON, FOURTH FLOOR, OKLAHOMA CITY, OKLAHOMA 73102 AND AT THE OFFICE OF ADMINISTRATIVE RULES, SECRETARY OF STATE, WILL ROGERS BUILDING, 2ND FLOOR NORTH, OKLAHOMA CITY, OKLAHOMA 73105. THE FOLLOWING SUMMARY HAS BEEN PREPARED PURSUANT TO 75 O.S., § 255(B):

Subchapters 5, 7, and 8 of the Air Pollution Control rules have been simplified and clarified. To assist in this effort, certain rules were moved from one subchapter to another. For example, requirements to file emission inventory reports were moved from Subchapter 7 to Subchapter 5. The annual operating fees, which are calculated based on the emission inventory reports, were moved from Subchapters 7 and 8 to Subchapter 5. The construction permit requirements and application fee rules for Part 70 sources have been moved from Subchapter 7 to Subchapter 8.

Other revisions to Subchapter 5 involve changing the fees for non-Part 70 sources from a stepped schedule to a flat rate of \$10.00 per ton.

Subchapter 7 was also amended to incorporate the Department's permit continuum. The continuum provides for 1) *de minimis* facilities, which emit less than five tons per year of any regulated pollutant and which are not required to obtain a permit; 2) permit-by-rule facilities, which emit less than 40 tons per year of any regulated pollutant and which belong to an industry group for which a rule has been promulgated; 3) general permit facilities, which emit 40 tons per year or more of any regulated pollutant and which belong to an industry group for which a general permit has been issued; and 4) individual permit facilities, which are not eligible for any of the

previous permit categories and must, therefore, apply for individual permits. In addition, the permit application fees were revised to reflect the new permit categories. The purpose of revising the fees was not to increase them, but to reapportion them according to the new permit categories.

The construction permit rules now in Subchapter 8 contain one new requirement: Federal regulations (40 CFR §§ 63.41, 63.43 and 63.44) concerning case-by-case determinations of maximum achievable control technology ("MACT") standards were incorporated by reference. In promulgating these rules, the State has adopted a program to implement section 112(g) of the Federal Clean Air Act with respect to construction or reconstruction of major sources of hazardous air pollutants. The permit fee rules in Subchapter 8 establish a new fee of \$900.00 for authorizations under general permits. Other new additions to the Part 70 permit rules include definitions for "insignificant activities" and "trivial activities" and additional rules for general permits. The latter rules explain how authorizations are obtained, revised, and renewed. Subchapter 8 rules were also revised to make changes required by the U. S. Environmental Protection Agency in order for Oklahoma to obtain final approval of its Part 70 operating permit program.

The full text of the rule may be obtained from Department of Environmental Quality, Air Quality Division, 707 N. Robinson, 4th Floor, Oklahoma City, Oklahoma 73102.

- September 16, 1996, through October 8, 1996
- January 16, 1997, through February 12, 1997
- November 17, 1997, through December 16, 1997
- January 27, 1998
- March 20, 1998

Permanent Final Adoptions

Public hearing:

October 15, 1996, February 19, 1997 and December 16, 1997

Adoption:

March 20, 1998

Submitted to Governor:

March 26, 1998

Submitted to House:

March 26, 1998

Submitted to Senate:

March 26, 1998

Gubernatorial approval:

May 8, 1998

Legislative approval:

Failure of the Legislature to disapprove the rules resulted in approval on May 21, 1998.

Final adoption:

May 21, 1998

Effective:

June 25, 1998

INCORPORATIONS BY REFERENCE:

Incorporated standards:

40 CFR 60.51b, Definitions

40 CFR 60.53(b) and (c), Standards for municipal waste combustor operating practices

40 CFR 60.55b, Standards for municipal waste combustors fugitive ash emissions

40 CFR 60.58b, Compliance and performance testing

40 CFR 60.59b, Reporting and recordkeeping requirements, except for 60.59b(a), b(5) and d(11)

Incorporating rules:

252:100-17-14.1

252:100-17-20

252:100-17-21

252:100-17-22

252:100-17-25

252:100-17-26

Availability:

The standards are available to the public for examination at the Department of Environmental Quality office at 4545 N. Lincoln, Suite 250, Oklahoma City, Oklahoma.

ANALYSIS:

It is proposed to amend Subchapter 17 by adding a new Part 5 and a new Appendix K to address Municipal Waste Combustors (MWC). This amendment is necessary to meet federal requirements for State plans under Section 111(d) of the Federal Clean Air Act applicable to existing sources. This change would adopt standards published on December 19, 1995, in the Federal Register and amended on August 25, 1997. These standards would apply to MWC units with the capacity to combust more than 250 tons per day of municipal solid waste and for which construction commenced on the unit on or before September 20, 1994. In addition, the existing portions of Subchapter 17 are revised and redesignated as Part 1, General Provisions, and Part 3, Incinerators. Proposed revisions include deletion of references to Ringelmann standards and substitution of relative opacity. Revisions were also made to Appendices A and B for reasons of simplification.

Air Quality Advisory Council recommended these amendments for adoption at their meeting on December 16, 1997.

SUMMARY¹ OF DIFFERENCES FROM ANALOGOUS FEDERAL RULES:

None

CONTACT PERSON:

Michelle Martinez, Department of Environmental Quality, Air Quality Division, 707 N. Robinson, Fourth Floor, Oklahoma City, Oklahoma 73102. (405) 702-4100

EDITOR'S NOTE: ¹ The agency's proposed rules identified this Section as being "[AMENDED AND RENUMBERED TO 252:100-17-4]." However, because a Section cannot be "renumbered" to a Section that already exists, 252:100-17-6 is now identified as being "[REVOKED]" and the agency has added an Agency Note to explain that the provisions of the revoked Section have been incorporated into 252:100-17-4. See Agency Note following Section 252:100-17-6 below.

PURSUANT TO THE ACTIONS DESCRIBED HEREIN, THE FOLLOWING RULES ARE CONSIDERED FINALLY ADOPTED AS SET FORTH IN 75 O.S., SECTION 308.1(A), WITH AN EFFECTIVE DATE OF JUNE 25, 1998.

SUBCHAPTER 17. INCINERATORS

PART 1. GENERAL PROVISIONS

252:100-17-1. Purpose

The purpose of this Subchapter is to deem it unlawful to burn refuse in any incinerator except in a multiple-chambered incinerator or in equipment determined by the Director to be equally effective for the purpose of air pollution control. specify design and operating requirements and emission limitations for incinerators and municipal waste combustors (MWC).

252:100-17-1.1. Reference to 40 CFR

When a provision of Title 40 of the Code of Federal Regulations (40 CFR) is incorporated by reference, all citations contained therein are also incorporated by reference.

252:100-17-1.2. Terminology related to 40 CFR

When these terms are used in rules incorporated by reference, the following definitions shall apply:

- (1) "EPA Administrator" is synonymous with "Executive Director".
- (2) "Affected facility" is synonymous with "large MWC unit".
- (3) "State" is synonymous with "Department of Environmental Quality" or "DEQ".
- (4) "State plan" is a program that the State is responsible for developing and implementing to achieve compliance with the emission guidelines in Subpart Cb of 40 CFR Part 60.

PART 3. INCINERATORS

252:100-17-2. Effective date; applicability

This subchapter shall become operative one year from

and after July 21, 1970. It will apply to any and all incinerators utilized within the State of Oklahoma. This Part became effective on July 21, 1971 and applies to incinerators not subject to New Source Performance Standards (NSPS) or any other Parts in this Subchapter.

252:100-17-2.1. Exemptions

Thermal oxidizers, flares and any other air pollution control devices are exempt from the requirements of this Part.

252:100-17-2.2. Definitions

The following words and terms when used in this Subchapter shall have the following meaning unless the context clearly indicates otherwise:

"Capacity" means amount of specified wastes a unit is designed to burn. Capacity may be expressed as pounds per hour or tons per day.

"Primary combustion chamber" means the initial incinerator chamber where waste is charged, ignited and burned.

"Secondary burner" means a supplemental burner in the secondary chamber for the purpose of maintaining a minimum temperature and to insure the complete combustion of volatile gases and smoke.

252:100-17-3. Prohibition on density of emissions
Opacity

~~(a) Prohibition. No person shall cause, suffer, allow, or permit the discharge of smoke from an incinerator of a density darker than number one (1) on the Ringelmann Chart or a visible emission of such an equivalent opacity as to obscure a certified visible emission evaluator's view to a degree greater than number one (1) on the Ringelmann Chart.~~

~~(b) Exemptions. Subsection 252:100-17-3(a) shall not apply to:~~

- ~~(1) visible emissions consisting of uncombined water droplets; or,~~
- ~~(2) smoke, the density of which is not darker than number three (3) of the Ringelmann Chart for a period aggregating no more than five (5) minutes in any sixty (60) consecutive minutes or more than twenty (20) minutes in any twenty-four (24) hour period. See 252:100-25-3.~~

252:100-17-4. Prohibition on pounds per hour of emissions-Particulate matter

~~No person shall cause or allow to be emitted into the open air from any incinerator equipment, fly ash or other particulate matter in quantities greater than shown in 252:100-17-6. Solid fuels charged will be considered as part of the refuse weight, but No. 1 and No. 2 fuel oil and gaseous fuels and combustion air will not be so considered. Fly ash or other particulate matter shall not exceed quantities greater than the allowable emission rate. The allowable~~

emissions for incinerators with capacities of 100 lb/hr or greater are set forth in Appendix A of this Chapter. The allowable emissions for incinerators with capacities less than 100 lb/hr are set forth in Appendix B of this Chapter. Solid fuels charged will be considered part of the refuse weight. No. 1 and No. 2 fuel oils (distillate oils), liquified petroleum gases, gaseous fuels and combustion air will not be considered as part of the refuse weight.

252:100-17-5. Incinerator design requirements

~~Hereafter no person shall operate an incinerator unless an incinerator under this Part must have:~~

- ~~(1) It is provided with an auxiliary burner for the purpose of maintaining a primary burner that maintains a temperature of at least 800° F in the primary combustion chamber.~~
- ~~(2) It has a secondary burner for use that shall be used when necessary to eliminate smoke.~~
- ~~(3) It is a type of incinerator design a design that can be demonstrated to the Director DEQ to be effective in accordance with the provisions of this Subchapter. The burden of proof shall rest upon the owner of the proposed incinerator.~~
- ~~(4) It complies with generally recognized good practices and all applicable provisions of this Subchapter.~~
- ~~(5) Full and proper use is made of all components and appurtenances thereof.~~

252:100-17-6. Allowable emission of particulates
[REVOKED]

~~(a) Allowable emissions for incinerators with capacities in excess of 100 lb/hr are set forth in Appendix A of this Chapter.~~

~~(b) Allowable emissions for incinerators with capacities less than 100 lbs/hr are set forth in Appendix B of this Chapter.~~

AGENCY NOTE: The provisions of 252:100-17-6 have been incorporated into 252:100-17-4 to clarify and simplify language.

252:100-17-7. Test methods

(a) Opacity. Opacity shall be measured utilizing Method 9 - Visual Determination of the Opacity of Emissions from Stationary Sources found in the Code of Federal Regulations at 40 CFR Part 60, Appendix A. This method is hereby incorporated by reference as it exists on July 1, 1997.

(b) Particulate matter. Particulate matter shall be measured utilizing the appropriate DEQ-approved Method 5 found in the Code of Federal Regulations at 40 CFR Part 60, Appendix A. This method is hereby incorporated by reference as it exists on July 1, 1997.

Permanent Final Adoptions

PART 5. MUNICIPAL WASTE COMBUSTORS

252:100-17-14. Effective date; applicability

This Part is effective as of March 23, 1997 and applies to large MWC units.

252:100-17-14.1. Definitions

The definitions in 40 CFR 60.51b are hereby incorporated by reference as they exist on October 24, 1997.

252:100-17-15. Exemptions

(a) Any MWC unit that is capable of combusting more than 250 tons per day of MSW and is subject to a federally enforceable permit limiting the maximum amount of MSW that may be combusted in the unit to less than or equal to 11 tons per day is not subject to this Part if the owner/operator:

- (1) Notifies the DEO of an exemption claim.
- (2) Provides the DEO with a copy of the federally enforceable permit that limits the firing of MSW to less than or equal to 11 tons per day.
- (3) Keeps records of the amount of MSW fired per day.

(b) A qualifying small power production facility, (as defined in section 3(17)(C) of the Federal Power Act (16 U.S.C. § 796(17)(C)), that produces electric energy from homogeneous waste is not subject to this Part if the owner/operator:

- (1) Notifies the DEO of an exemption claim.
- (2) Provides the DEO data documenting that the facility qualifies for this exemption.

(c) A qualifying cogeneration facility, (as defined in section 3(18)(B) of the Federal Power Act (16 U.S.C. § 796(18)(B)), that burns homogeneous waste to produce electric energy, steam, or other useful energy used for industrial, commercial, heating, or cooling purposes, is not subject to this Part if the owner/operator:

- (1) Notifies the DEO of an exemption claim.
- (2) Provides the DEO data documenting that the facility qualifies for this exemption.

(d) Any unit combusting a single-item waste stream of tires is not subject to this Part if the owner/operator:

- (1) Notifies the DEO of an exemption claim.
- (2) Provides the DEO with data documenting that the unit qualifies for this exemption.

(e) Any unit required to have a hazardous waste permit is not subject to this Part.

(f) Any materials recovery facility (including primary or secondary smelters) that combusts waste for the primary purpose of recovering metals is not subject to this Part.

(g) Any cofired combustor that meets the capacity specifications in paragraph (a) of this section is not subject to this Part if the owner/operator:

- (1) Notifies the DEO of an exemption claim.
- (2) Provides the DEO with a copy of the federally enforceable permit.
- (3) Keeps separate records, on a calendar quarter

basis, of the weight of MSW and the weight of all other fuels combusted at the cofired combustor.

(h) Air curtain incinerators that meet the capacity specifications in 252:100-17-23 of this Subchapter and combust a 100 percent yard waste fuel stream are not subject to this Part, except:

- (1) The opacity limit under section 252:100-17-23 of this Subchapter.
- (2) The testing procedures under section 252:100-17-25 of this Subchapter.
- (3) The reporting and recordkeeping provisions under section 252:100-17-26 of this Subchapter.

(i) Pyrolysis/combustion units that are an integrated part of a plastics/rubber recycling unit are not subject to this Part if the owner/operator of the unit maintains records of:

- (1) The weight of plastics, rubber, and/or rubber tires processed on a calendar quarter basis.
- (2) The weight of chemical plant feedstocks and petroleum refinery feedstocks produced and marketed on a calendar quarter basis.
- (3) The name and address of the purchaser of the feedstocks.

(j) The combustion of gasoline, diesel fuel, jet fuel, fuel oils, residual oil, refinery gas, petroleum coke, liquefied petroleum gas, propane, or butane produced by chemical plants or petroleum refineries that use feedstocks produced by plastics/rubber recycling units are not subject to this Part.

(k) Cement kilns firing MSW are not subject to this Part.

252:100-17-16. Standards for particulate matter and opacity

(a) Particulate matter. The concentration of particulate matter contained in the gases discharged to the atmosphere from a MWC unit shall not exceed 27 milligrams per dry standard cubic meter, corrected to 7 percent oxygen.

(b) Opacity. Opacity of gases discharged to the atmosphere from a MWC unit shall not exceed 10 percent (6-minute average).

252:100-17-17. Standards for municipal waste combustor metals

(a) Cadmium. The concentration of cadmium contained in the gases discharged to the atmosphere from a MWC unit shall not exceed 0.040 milligrams per dry standard cubic meter, corrected to 7 percent oxygen.

(b) Lead.

(1) By December 19, 2000, the concentration of lead contained in the gases discharged to the atmosphere from a MWC unit shall not exceed 0.49 milligrams per dry standard cubic meter, corrected to 7 percent oxygen.

(2) By August 26, 2002, or three years after EPA approval of the State plan, whichever is first, the concentration of lead contained in the gases discharged to the atmosphere from a MWC unit shall not exceed 0.44 milligrams per dry standard cubic meter, corrected to 7 percent oxygen.

(c) Mercury. The concentration of mercury contained in

the gases discharged to the atmosphere from a MWC unit shall not exceed 0.080 milligrams per dry standard cubic meter or 15 percent of the potential mercury emission concentration (85-percent reduction by weight), corrected to 7 percent oxygen, whichever is less stringent.

252:100-17-18. Standards for municipal waste combustor acid gases expressed as sulfur dioxide and hydrogen chloride

(a) Sulfur dioxide.

(1) By December 19, 2000, the concentration of sulfur dioxide contained in the gases discharged to the atmosphere from a MWC unit shall not exceed 31 parts per million by volume (ppmv) or 25 percent of the potential sulfur dioxide emission concentration (75 percent reduction by weight or volume), corrected to 7 percent oxygen (dry basis), whichever is less stringent. Compliance with this emission limit is based on a 24-hour daily geometric mean.

(2) By August 26, 2002, or three years after EPA approval of the State plan, which ever is first, the concentration of sulfur dioxide contained in the gases discharged to the atmosphere from a MWC unit shall not exceed 29 ppmv or 25 percent of the potential sulfur dioxide emission concentration (75 percent reduction by weight or volume), corrected to 7 percent oxygen (dry basis), whichever is less stringent. Compliance with this emission limit is based on a 24-hour daily geometric mean.

(b) Hydrogen chloride.

(1) By December 19, 2000, the concentration of hydrogen chloride contained in the gases discharged to the atmosphere from a MWC unit shall not exceed 31 parts per million by volume (ppmv) or 5 percent of the potential hydrogen chloride emission concentration (95 percent reduction by weight or volume), corrected to 7 percent oxygen (dry basis), whichever is less stringent.

(2) By August 26, 2002, or three years after EPA approval of the State plan, which ever is first, the concentration of hydrogen chloride contained in the gases discharged to the atmosphere from a MWC unit shall not exceed 29 ppmv or 5 percent of the potential hydrogen chloride emission concentration (95 percent reduction by weight or volume), corrected to 7 percent oxygen (dry basis), whichever is less stringent.

252:100-17-19. Standards for municipal waste combustor organics expressed as total mass dioxins/furans

(a) The concentration of organics, expressed as total mass dioxins/furans, contained in the gases discharged to the atmosphere from a MWC unit shall not exceed:

(1) With electrostatic precipitator: 60 nanograms per dry standard cubic meter (total mass), corrected to 7 percent oxygen.

(2) Without electrostatic precipitator: 30 nanograms

per dry standard cubic meter (total mass), corrected to 7 percent oxygen.

(b) Large MWC units that achieve a dioxin/furan emission level less than or equal to 15 nanograms per dry standard cubic meter total mass, corrected to 7 percent oxygen, may elect the alternative performance testing schedule for dioxins/furans as specified in 40 CFR 60.58b(g)(5)(iii).

252:100-17-20. Standards for nitrogen oxides

(a) Nitrogen oxides emission limits. The concentration of nitrogen oxides contained in the gases discharged into the atmosphere from a MWC unit shall not exceed the following:

NITROGEN OXIDES LIMITS

Municipal Waste Combustor Technology	Nitrogen oxides emission limit (ppm by volume)^a
Mass burn waterwall	205
Mass burn rotary waterwall	250
Refuse-derived fuel combustor	250
Fluidized bed combustor (by December 19, 2000)	240
Fluidized bed combustor (by August 26, 2002, or three years after EPA approval of the State plan, which ever is first)	180

^a Corrected to 7 percent oxygen, dry basis, 24 hr daily arithmetic average

(b) Nitrogen oxides emissions averaging. The owner or operator of a MWC plant may elect to implement a nitrogen oxides emissions averaging plan for the MWC units that are located at that plant.

(1) The following units cannot be included in the emissions averaging plan:

(A) MWC units subject to Subpart Ea or Eb of 40 CFR Part 60.

(B) Mass burn refractory MWC units and other MWC technologies not listed in paragraph (b)(3) of this section may not be included in the emissions averaging plan.

(2) Prior to implementing the nitrogen oxides emissions averaging plan, the units to be included must be identified in the initial performance test report specified in 40 CFR 60.59b(f) or in the annual report specified in 40 CFR 60.59b(g), as applicable. The units which are included in the averaging plan may be redesignated each calendar year. Partial year redesignation is allowable with DEO approval.

(3) To implement the emissions averaging plan, the average daily (24-hour) nitrogen oxides emission

Permanent Final Amendments

concentration level discharged from the units included in the emissions averaging plan shall be no greater than the levels specified in this section. Emission limits for the nitrogen oxides concentration level for each type of unit are as follows:

NITROGEN OXIDES LIMITS FOR EXISTING DESIGNATED FACILITIES INCLUDED IN AN EMISSIONS AVERAGING PLAN AT A MUNICIPAL WASTE COMBUSTOR PLANT^a

<u>Municipal waste combustor technology</u>	<u>Nitrogen oxides emission limit (ppm by volume)^b</u>
Mass burn waterwall	185
Mass burn rotary waterwall	220
Refuse-derived fuel combustor	230
Fluidized bed combustor	165

^a Mass burn refractory municipal waste combustors and other MWC technologies not listed above may not be included in an emissions averaging plan.

^b Corrected to 7 percent oxygen, dry basis, 24 hr daily arithmetic average.

(4) Under the emissions averaging plan, the average daily nitrogen oxides emissions specified in paragraph (b)(3) of this section shall be calculated using the equation in Appendix K of this Chapter. MWC units that are off-line shall not be included in calculating the average daily nitrogen oxides emission level.

(5) For any day a unit included in the emissions averaging plan is off-line, the owner or operator of the MWC plant must demonstrate compliance according to either paragraph (b)(5)(A) or both paragraphs (b)(5)(B) and (b)(5)(C) of this section.

(A) Compliance with the applicable limits specified in (b)(3) of this Part shall be demonstrated using the averaging procedure specified in paragraph (b)(4) of this section. The averaging procedure will include the MWC units in the plan that are on-line.

(B) For each of the units included in the emissions averaging plan, the nitrogen oxides emissions shall be calculated on a daily average basis. The nitrogen oxides emissions level shall be equal to or less than the maximum daily nitrogen oxides emission levels achieved by that unit on any of the days during which the emissions averaging plan was achieved with all units on-line during the most recent calendar quarter. The requirements of this paragraph do not apply during the first quarter of operation under the emissions averaging plan.

(C) The average nitrogen oxides emissions (kilograms per day) calculated according to paragraph (b)(5)(C)(ii) of this section shall not exceed the average nitrogen oxides emissions (kilograms per day) calculated according to paragraph (b)(5)(C)(i) of this section.

(i) The average nitrogen oxides emissions shall be calculated for all days during which the emissions averaging plan was implemented and achieved and during which all MWC units were on-line. The average nitrogen oxides emissions (kilograms per day) shall be calculated, on a calendar year basis, according to paragraphs (b)(5)(C)(i)(I) through (b)(5)(C)(i)(III) of this section.

(I) The daily amount of nitrogen oxides emitted (kilograms per day) shall be calculated for each MWC unit included in the emissions averaging plan. The calculation shall be based on the hourly nitrogen oxides data required under 40 CFR 60.58b(h) and specified under 40 CFR 60.58b(h)(5). The flue gas flow rate is determined using the hourly average steam or feedwater flow rate and Table 19-1 of EPA Reference Method 19, which is hereby incorporated by reference as it exists on July 1, 1997.

(II) The daily total nitrogen oxides emissions shall be calculated as the sum of the daily nitrogen oxides emissions from each unit calculated under paragraph (b)(5)(C)(i)(I) of this section.

(III) On a calendar year basis, the average nitrogen oxides emissions (kilograms per day), shall be calculated as the sum of all daily total nitrogen oxides emissions calculated under paragraph (b)(5)(C)(i)(II) of this section divided by the number of calendar days for which a daily total was calculated.

(ii) The average nitrogen oxides emissions shall be calculated for all days during which one or more of the MWC units under the emissions averaging plan was off-line. The average nitrogen oxides emissions (kilograms per day) shall be calculated according to paragraphs (b)(5)(C)(ii)(I) through (b)(5)(C)(ii)(III) of this section on a calendar year basis.

(I) For each MWC unit included in the emissions averaging plan, the daily amount of nitrogen oxides emitted (kilograms per day) shall be calculated based on the hourly nitrogen oxides data required under 40 CFR 60.58b(h) and specified under 40 CFR 60.58b(h)(5), the flue gas flow rate

determined using Table 19-1 of the EPA Reference Method 19, which is hereby incorporated by reference as it exists on July 1, 1997, and the hourly average steam or feedwater flow rate.

(II) The daily total nitrogen oxides emissions shall be calculated as the sum of the daily nitrogen oxides emissions from each MWC unit as calculated under paragraph (b)(5)(C)(ii)(I) of this section.

(III) The average nitrogen oxides emissions (kilograms per day) on a calendar year basis

shall be calculated as the sum of all daily total nitrogen oxides emissions calculated under paragraph (b)(5)(C)(ii)(II) of this section divided by the number of calendar days for which a daily total was calculated.

252:100-17-21. Standards for municipal waste combustor operating practices

(a) The concentration of carbon monoxide contained in the gases discharged to the atmosphere from a MWC unit shall not exceed the following limits for each type of affected equipment:

MUNICIPAL WASTE COMBUSTOR OPERATING LIMITS

Municipal waste combustor technology	Carbon monoxide emissions level (ppm by volume) ^a	Averaging Time ^b (hours)
Mass burn waterwall	100	4
Mass burn refractory	100	4
Mass burn rotary refractory	100	24
Mass burn rotary waterwall	250	24
Modular starved air	50	4
Modular excess air	50	4
Refuse-derived fuel stoker	200	24
Bubbling fluidized bed	100	4
Circulating fluidized bed	100	4
Pulverized coal/refuse-derived fuel mixed fuel-fired combustor	150	4
Spreader stoker coal/refuse-derived fuel mixed fuel-fired combustor	200	24

^a Measured at the combustor outlet in conjunction with a measurement of oxygen concentration, corrected to 7 percent oxygen, dry basis. Calculated as an arithmetic average.

^b Averaging times are 4-hour or 24-hour block averages.

(b) An owner or operator of a MWC shall comply with all provisions specified in 40 CFR 60.53b(b) and (c), which is hereby incorporated by reference as it exists on October 24, 1997.

252:100-17-22. Standards for municipal waste combustor fugitive ash emissions

An owner or operator of a MWC shall comply with all provisions specified in 40 CFR 60.55b, which is hereby incorporated by reference as it exists on October 24, 1997.

252:100-17-23. Standards for air curtain incinerators

An owner or operator of an air curtain incinerator with the capacity to burn greater than 250 tons per day of MSW

and for which construction commenced on or before September 20, 1994, and that combusts a fuel feed stream of 100 percent yard waste, shall not cause to be discharged into the atmosphere from that incinerator any gases that exhibit greater than 10 percent opacity (6-minute average). An opacity level of up to 35 percent (6-minute average) is permitted during startup periods within the first 30 minutes of unit operation.

252:100-17-24. Standards for municipal waste combustor operator training and certification

(a) Each chief facility operator and shift supervisor shall obtain and maintain a current provisional operator certification from either the American Society of

Permanent Final Adoptions

Mechanical Engineers (ASME) [ORO-1-1994 Standard for the Qualification and Certification of Resource Recovery Facility Operators] or a State certification program no later than the date 6 months after the startup of a MWC unit or 12 months after the date of State plan approval, whichever is later.

(b) Each chief facility operator and shift supervisor shall have completed full certification or submitted an application, that has been accepted by the appropriate certification program, for a full certification exam with either the ASME [ORO-1-1994 Standard for the Qualification and Certification of Resource Recovery Facility Operators] or a State certification program no later than the date 6 months after the startup of a MWC unit or 12 months after the date of State plan approval, whichever is later.

(c)

(1) No owner or operator of a MWC unit shall allow the unit to be operated at any time unless one of the following persons is on duty:

(i) A fully certified chief facility operator.

(ii) A provisionally certified chief facility operator who has met the qualification requirements specified in ASME [ORO-1-1994 section 2.2.2] and has made an application for a full certification exam following the ASME [ORO-1-1994 section 4.3.1] application process, according to the schedule specified in paragraph (b) of this section.

(iii) A fully certified shift supervisor.

(iv) A provisionally certified shift supervisor who has met the qualification requirements specified in ASME [ORO-1-1994 section 2.2.2] and has made an application for a full certification exam following the ASME [ORO-1-1994 section 4.3.1] application process, according to the schedule specified in paragraph (b) of this section.

(2) The requirement specified in paragraph (c) of this section shall take effect no later than the date 6 months after the startup of a MWC unit or 12 months after the date of State plan approval, whichever is later.

(3) If one of the persons listed in paragraph (c) of this section must leave the unit during their operating shift, a provisionally certified control room operator who is on-site at the MWC may fulfill the requirement in paragraph (c) of this section.

(d) All chief facility operators, shift supervisors, and control room operators at MWC units must complete the EPA or State MWC operator training course no later than the date 6 months after the date of startup of the MWC or by 12 months after the date of State plan approval, whichever is later.

(e) The requirement specified in paragraph (d) of this section does not apply to chief facility operators, shift supervisors, and control room operators who have obtained

full certification from the American Society of Mechanical Engineers on or before the date of State plan approval.

(f) The owner or operator may request that the DEO waive the requirement specified in paragraph (d) of this section for chief facility operators, shift supervisors, and control room operators who have obtained provisional certification from the American Society of Mechanical Engineers on or before the date of State plan approval.

(g) The owner or operator of a MWC unit shall develop and update on an annual basis, a site-specific operating manual. The operating manual shall, at a minimum, address the elements of MWC unit operation specified in paragraphs (g)(1) through (g)(11) of this section.

(1) A summary of the applicable standards under this Part.

(2) A description of basic combustion theory applicable to a MWC unit.

(3) Procedures for receiving, handling, and feeding MSW.

(4) MWC unit start-up, shutdown, and malfunction procedures.

(5) Procedures for maintaining proper combustion air supply levels.

(6) Procedures for operating the MWC unit within the standards established under this Part.

(7) Procedures for responding to periodic upset or off-specification conditions.

(8) Procedures for minimizing particulate matter carryover.

(9) Procedures for handling ash.

(10) Procedures for monitoring MWC unit emissions.

(11) Reporting and recordkeeping procedures.

(h) The owner or operator of a MWC unit shall establish a training program to review the operating manual according to the schedule specified in paragraphs (h)(1) and (h)(2) of this section. The training shall be provided to each person who has responsibilities affecting the operation of the unit including, but not limited to, chief facility operators, shift supervisors, control room operators, ash handlers, maintenance personnel, and crane/load handlers.

(1) Each person specified in paragraph (h) of this section shall undergo initial training no later than the date specified in paragraph (h)(1)(A), (h)(1)(B), or (h)(1)(C), whichever is later.

(A) The date 6 months after the date of startup of the unit.

(B) The date prior to the day the person assumes responsibilities affecting MWC unit operation.

(C) Twelve months after date of State plan approval.

(2) Annually, following the initial review required by paragraph (h)(1) of this section, each person specified in paragraph (h) of this section shall review the operating manual updates, any operational lessons learned/experiences of the past year, and provide for review of any section which an employee requests.

(i) The operating manual required by paragraph (h) of this section shall be kept in a readily accessible location for all persons required to undergo training under paragraph (h) of this section no later than 6 months after start-up or 12 months after the date of State plan approval. The operating manual and records of training shall be available for inspection by the DEO upon request.

252:100-17-25. Compliance and performance testing

An owner or operator of a MWC shall comply with all provisions specified in 40 CFR 60.58b, which is hereby incorporated by reference as it exists on October 24, 1997.

252:100-17-26. Reporting and recordkeeping requirements

Except for the provisions of subsection 60.59b(a), b(5), and d(11), 40 CFR 60.59b is hereby incorporated by reference as it exists on October 24, 1997.

252:100-17-27. Compliance schedules

(a) All MWC units must close or be in compliance with all requirements contained in this Part within 3 years following approval of the State plan. However, all MWC units for which construction, modification, or reconstruction is commenced after June 26, 1987 shall comply with the emission limit for mercury specified in 252:100-17-17(c) and the emission limit for dioxin/furans specified in 252:100-17-19 within 1 year following issuance of a revised construction or operating permit, if a permit modification is required, or within 1 year following approval of the State plan, whichever is later.

(b) All MWC units choosing to comply with all requirements contained in this Part in more than 1 year but less than 3 years following the date of issuance of a revised construction or operation permit if a permit modification is required, or more than 1 year but less than 3 years following approval of the State plan if a permit modification is not required, shall enter into a consent order that includes measurable and enforceable incremental steps of progress toward compliance. These steps are specified below:

- (1) Date for submittal of the final control plan to the DEO.
- (2) Date for obtaining services of an architectural and engineering firm regarding the air pollution control device(s).
- (3) Date for initiation of installation of the air pollution control device(s).
- (4) Date for completion of installation of the air pollution control device(s).
- (5) Date for final compliance.

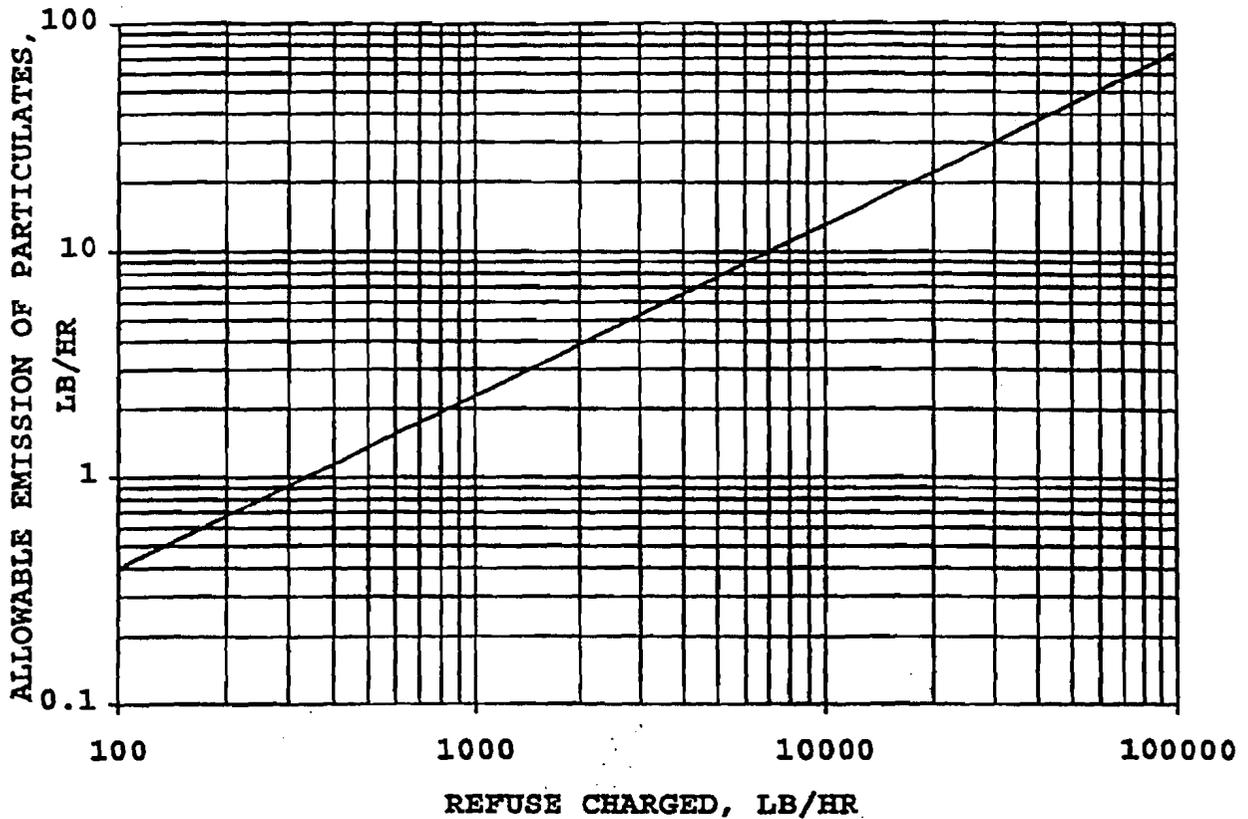

(c) All MWC units with a compliance schedule of more than 1 year after approval of the State plan in accordance with paragraph (b) of this section, shall provide performance test results for dioxin/furan emissions for each unit. However, where the MWC owner/operator can demonstrate that multiple units have the same design, operate with the

same fuel, have the same operating parameters, and are expected to have similar emission levels, the results of dioxin/furan test from one unit may be provided as representative of all such units. The performance test results shall have been conducted during or after 1990. The performance test shall be conducted according to the procedures in 252:100-17-25.

(d) All MWC units intending to close in more than 1 year but less than 3 years after State plan approval shall enter into a consent order to close. The closure order must include the date of plant closure.

Permanent Final Adoptions

APPENDIX A. ALLOWABLE EMISSIONS FOR INCINERATORS WITH CAPACITIES IN EXCESS OF 100 LB/HR [REVOKED]
APPENDIX A. ALLOWABLE EMISSIONS FOR INCINERATORS WITH CAPACITIES OF 100 LB/HR OR GREATER [REENACTED]

Allowable emission rate may be calculated using the following formula:

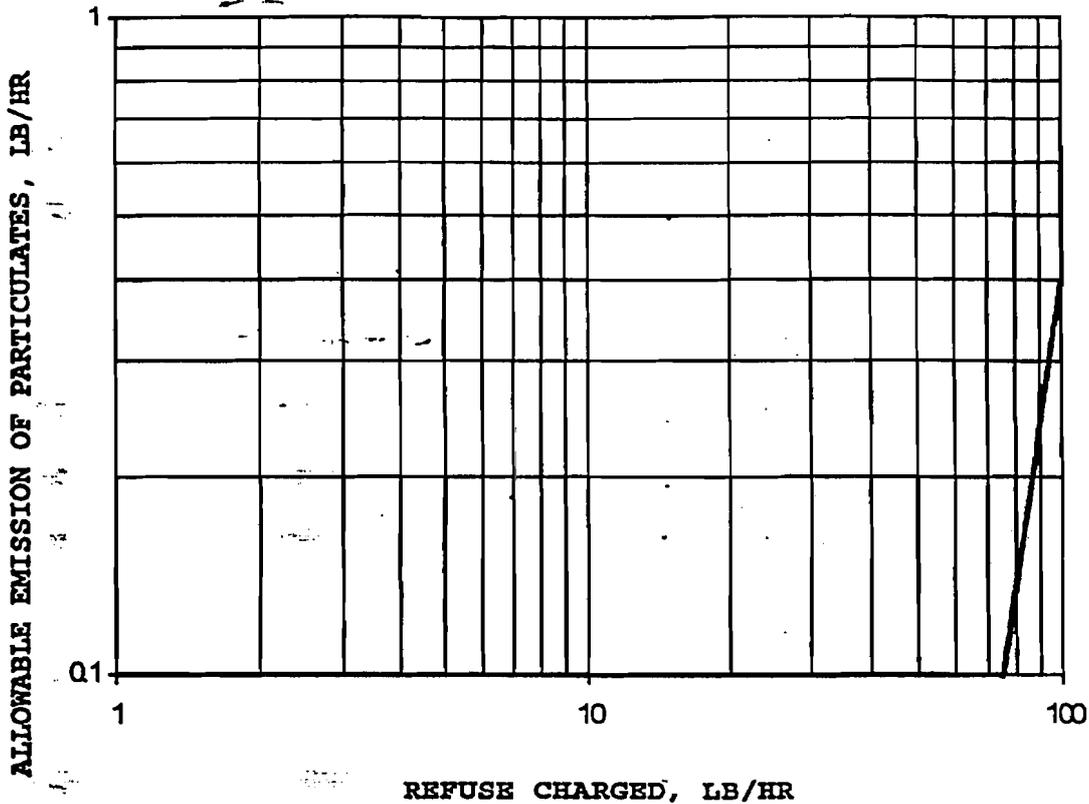

$$Y = 0.01221X^{0.7577}$$

Where:

X = refuse charged, lb/hr on an as-loaded basis.

Y = allowable particulate matter emission rate, lb/hr.

APPENDIX B. ALLOWABLE EMISSIONS FOR INCINERATORS WITH CAPACITIES LESS THAN 100 LBS/HR [REVOKED]
 APPENDIX B. ALLOWABLE EMISSIONS FOR INCINERATORS WITH CAPACITIES LESS THAN 100 LBS/HR [REENACTED]

Allowable emission rate may be calculated using the following formulae:

Incinerators with capacities greater than 75, but less than or equal to 100 lb/hr

$$Y = 9.213 \times 10^{-11} X^{4.818}$$

Incinerators with capacities of 75 lb/hr or less

$$Y = 0.1$$

Where,

X = refuse charged, lb/hr on an as-loaded basis.

Y = allowable particulate matter emission rate, lb/hr.

APPENDIX K. AVERAGE DAILY NITROGEN OXIDES EMISSIONS [NEW]

$$NOX_{24-hr} = \frac{\sum_{i=1}^h [(NOX_i) (S_i)]}{\sum_{i=1}^h (S_i)}$$

where:

NOX_{24-hr} = 24-hour daily average nitrogen oxides emission concentration level for the emissions averaging plan (parts per million by volume corrected to 7 percent oxygen).

NOX_i = 24-hour daily average nitrogen oxides emission concentration level for unit i (parts per million by volume, corrected to 7 percent oxygen), calculated according to the procedures in 40 CFR 60.58b(h).

S_i = maximum demonstrated municipal waste combustor unit load for affected facility i (pounds per hour steam or feedwater flow as determined in the most recent dioxin/furan performance test).

h = total number of units being included in the daily emissions average.

[OAR Docket #98-1047; filed 5-22-98]

Notices of Rulemaking Intent

COMMENT PERIOD:

Deliver or mail written comments to the contact person from March 15, 2000, through April 18, 2000. Oral or written comments will be accepted by the Water Quality Management Advisory Council at its April 18, 2000, meeting.

PUBLIC HEARINGS:

Before the Water Quality Management Advisory Council on April 18, 2000, in the multi-purpose Room (1st floor), DEQ Building, 707 N. Robinson, Oklahoma City, Oklahoma 73101. Before the Environmental Quality Board on June 20, 2000, at University Center at Tulsa, 700 N. Greenwood Avenue, Tulsa, Oklahoma.

COPY OF PROPOSED RULE:

The proposed rule may be obtained from the contact person.

RULE IMPACT STATEMENT:

The rule impact statement for the proposed rule may be requested from the contact person.

CONTACT PERSONS:

Contact David Freede at david.freede@deqmail.state.ok.us (e-mail) or (405) 702-6222 (phone). The DEQ is located at 707 N. Robinson, Oklahoma City, Oklahoma 73102. The mailing address is P.O. Box 1677, Oklahoma City, Oklahoma 73101-1677.

ADDITIONAL INFORMATION:

Persons with disabilities who desire to attend the rulemaking hearing and need an accommodation should notify the contact person three days in advance of the hearing, TDD Relay Number 1-800-522-8506.

[OAR Docket #00-343; filed 2-24-00]

TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY CHAPTER 100. AIR POLLUTION CONTROL

[OAR Docket #00-340]

RULEMAKING ACTION:

Notice of proposed PERMANENT and EMERGENCY rulemaking

PROPOSED RULES:

Subchapter 7. Permits for Minor Facilities [AMENDED]

Subchapter 17. Incinerators [AMENDED]

SUMMARY:

The proposed changes to Subchapter 7 consist of the addition of sections 60.3, 60.4, and 60.5. Proposed section 60.3 references the permit by rule for VOC storage and loading facilities which is located in 100-37-41 and 42, and proposed section 60.4 references the permit by rule for particulate matter facilities, which is located in 100-19-13. The addition of these two sections to Subchapter 7 is not a

substantive change. Section 60.5 is the proposed permit by rule for natural gas compression facilities. This section contains eligibility requirements, standards, testing and monitoring requirements, and recordkeeping requirements for natural gas compression facilities that qualify for permit by rule. The Department is proposing amendments to 252:100-17, Part 3, Incinerators. Section 2 of the Part would be amended to remove references to an effective date, and Section 5(3) would be deleted. A new Section 5.1, Alternative incinerator design requirements, would be added to clarify that the Division Director may approve incinerator designs that do not meet the requirements specified in 252:100-17-5.

AUTHORITY:

Environmental Quality Board powers and duties, 27A O.S. Supp. 1999, §§ 2-2-101; and Oklahoma Clean Air Act, §§ 2-5-101, et seq.

REQUEST FOR COMMENTS:

The DEQ requests that business entities or any other members of the public affected by these rules provide the DEQ, within the comment period, in dollar amounts if possible, the increase in the level of direct costs such as fees, and the indirect costs such as reporting, recordkeeping, equipment, construction, labor, professional services, revenue loss, or other costs expected to be incurred by a particular entity due to compliance with the proposed rules.

COMMENT PERIOD:

Written comments will be accepted prior to and at the hearing on April 19, 2000. To be thoroughly considered by staff prior to the hearing, written comments should be submitted to the contact person by April 12, 2000. Oral comments may be made at the April 19, 2000 hearing and at the Environmental Quality Board hearing on June 20, 2000, in Tulsa, Oklahoma.

PUBLIC HEARINGS:

Wednesday, April 19, 2000 - 9:00 a.m. hearing, 4500 W. Lee Blvd, Room 301, Lawton Great Plains Technology Center, Lawton, OK.

Scheduled before the Environmental Quality Board at 9:30 a.m. on June 20, 2000 at the University Center at Tulsa, 700 N. Greenwood Ave., Tulsa, OK 74106.

COPIES OF PROPOSED RULES:

The proposed rules are available for review at the Air Quality Division office at 707 North Robinson, Suite 4100, Oklahoma City, Oklahoma, 73102, and on the DEQ website (www.deq.state.ok.us), Air Quality Division Current Events and Issues, or copies may be obtained from Myrna Bruce by calling (405) 702-4177.

RULE IMPACT STATEMENT:

Copies of the rule impact statement may be obtained from the Air Quality Division.

CONTACT PERSON:

Please send written comments to Joyce Sheedy (Subchapter 7), Cheryl Bradley (Subchapter 17). Department of Environmental Quality, Air Quality

the level required for compliance with any applicable regulations or standards.

(e)(b) **Limitation.** The following limitations shall apply to all alternative ~~emission~~ emissions reduction authorizations plans:

- (1) Net emissions reduction trade-offs will not be authorized across established pollutant categories; e.g., sulfur emissions may not be traded for hydrocarbon emissions.
- (2) Net emissions reduction trade-offs of particulate matter will be authorized only ~~on the following basis:~~
 - (A) ~~emissions of particulate matter equal to or greater than 10u (microns) in diameter may be traded for other particulates equal to or greater than 10u (microns) in diameter, or~~
 - (B) ~~emissions of particulate matter less than 10u (microns) in diameter may be reduced in return for a corresponding increase for particulates of equal or greater size. If the trade-off results in a net reduction in particulate matter of equal or smaller average aerodynamic diameter.~~

252:100-11-6. Authorization procedures

(a) **Determination.** Within 30 days after receipt of all information required to accomplish the analysis required in 252:100-11-5, the DEQ will make a determination whether the permit plan should be ~~approved~~ authorized, ~~approved~~ authorized with conditions or ~~disapproved~~ not authorized.

(b) **Petition for recommendation to revise SIP ~~revision~~, public notice and Council hearing.**

(1) Upon a determination to ~~approve~~ authorize but prior to ~~approval~~ authorization, the applicant shall file a petition with the DEQ for a ~~corresponding revision to the State Implementation Plan (SIP) which requests a SIP hearing before the Air Quality Council and includes the following:~~

- (A) ~~name and address of the interested party;~~
- (B) ~~the reason for the party's interest or concern in the issuance of the permit; such reason shall be one or more of the following:~~
 - (i) ~~the level of control technology to be used is inadequate for the facility/source type or its location;~~
 - (ii) ~~the inadequacy of the ambient air modeling technique or its application;~~
 - (iii) ~~the inadequacy of the ambient air monitoring conducted by the petitioner;~~
 - (iv) ~~the invalidity of net emissions reduction trade-offs proposed by the petitioner; or,~~
 - (v) ~~any other specifically identified defect in the petition which would render the proposed control plan inaccurate or invalid; and,~~
- (C) ~~The names and addresses of any persons known by the interested party having either relevant information concerning the substance of the hearing request or having similar interests as those~~

~~represented by the requesting interested party, seeking a hearing and recommendation by the Air Quality Council for a corresponding revision to the SIP.~~

(2) At least 30 days prior to a hearing before the Air Quality Council on the petition, the applicant shall notify the public by prominent advertisement in a newspaper of general circulation in the county in which the source is located:

- (A) that a SIP petition has been filed;
- (B) that the application, petition and the DEQ analysis thereof are available, for 30 calendar days in at least one location in the county where the source is located for public review; and
- (C) of the time, date and place of the hearing before the Air Quality Council and of a 30-day opportunity to submit written comments to the DEQ and/or the opportunity to comment at the hearing.

(3) ~~Sufficiency of notification.~~ The public notice, as specified, will be sufficient to notify all sub-state entities and their representatives of the proposed ~~permit recommendation for SIP revision.~~

(4) At such a hearing before the Air Quality Council, the ~~interested party requesting the public hearing applicant~~ shall bear the burden of proof.

(c) **Major source.** In the case of a major source, as defined by the Federal Clean Air Act, that might impact the air quality of a neighboring State, the comment period for that State is extended to a 60 day period as required by Section 126 of the Federal Clean Air Act, 42 U.S.C. Section 7426.

(d) **Public notice.** ~~Upon approval of the SIP revision, the DEQ shall issue the authorization. Following receipt of the Air Quality Council's recommended revision of the SIP, the DEQ shall issue the plan authorization and the applicant shall publish public notice of that fact in a newspaper of general circulation in the county in which the source is located.~~

None

CONTACT PERSON:

Cheryl Bradley, Department of Environmental Quality, Air Quality Division, 707 North Robinson, P.O. Box 1677, Oklahoma City, Oklahoma 73101-1677, (405) 702-4100

PURSUANT TO THE ACTIONS DESCRIBED HEREIN, THE FOLLOWING RULES ARE CONSIDERED FINALLY ADOPTED AS SET FORTH IN 75 O.S., SECTION 308.1(A), WITH AN EFFECTIVE DATE OF JUNE 1, 2001:

SUBCHAPTER 17. INCINERATORS

PART 3. INCINERATORS

~~252:100-17-2. Effective date; applicability~~ Applicability

~~This Part became effective on July 21, 1971 and applies to incinerators not subject to New Source Performance Standards (NSPS) or any other Parts in this Subchapter.~~

252:100-17-5. Incinerator design requirements

An incinerator ~~under subject to~~ this Part must have:

- (1) A primary burner that maintains a temperature of at least 800° F in the primary combustion chamber.
- (2) A secondary burner that shall be used when necessary to eliminate smoke.
- ~~(3) A design that can be demonstrated to the DEQ to be effective in accordance with the provisions of this Subchapter. The burden of proof shall rest upon the owner of the proposed incinerator.~~

252:100-17-5.1. Alternative incinerator design requirements

The Director may approve an incinerator design that does not meet the design requirements in 252:100-17-5 if the owner of the proposed incinerator demonstrates to the DEQ that the incinerator can comply with all other applicable requirements.

Should you desire to attend but have a disability and need an accommodation, please notify our Department three days in advance at (405) 290-8247.

MEMORANDUM

DATE: October 1, 1996

TO: Air Quality Council

FROM: Larry Byrum, Director *LB*
AIR QUALITY DIVISION

RE: Proposed new Part 3, Municipal Waste Combustors
to Subchapter 17.

Enclosed is the draft of the proposed, new, Part 3, Municipal Waste Combustors, to Subchapter 17, Incinerators, that will be brought to public hearing on October 15, 1996.

The proposed amendment to Subchapter 17 is necessary to meet the federal requirements set forth by the Environmental Protection Agency (EPA) in 40 C.F.R. Part 60, Subpart Cb, Emission Guidelines (EG) for Municipal Waste Combustors (MWC). The EG apply to existing MWC with an aggregate plant combustion capacities of 35 megagrams per day (approximately 39 tons) or greater of municipal solid waste (MSW) and that commenced construction on or before September 20, 1994.

The proposed Subchapter 17, Part 3, MWC, rules were developed under the requirements of the EG and through a cooperative effort between representatives of the public, industry and state and federal government. The proposed Part 3, drafted by Air Quality Division and MWC Workgroup, sets forth rules for MWC which meet all applicable requirements, without being more or less stringent than federal standards.

Enclosed is a copy of 40 C.F.R. 60, Subparts Cb & Eb for your review.

Enclosures: 1

**SUBCHAPTER 17. INCINERATORS
PART 1. GENERAL PROVISIONS**

252:100-17-1. Purpose

The purpose of this Subchapter is to deem it unlawful to burn refuse in any incinerator except in a multiple-chambered incinerator or in equipment determined by the Director to be equally effective for the purpose of air pollution control; and to set forth operating requirements and emission limitations for Municipal Waste Combustors.

252:100-17-2. Effective date; applicability

This Subchapter shall become operative one year from and after July 21, 1970. It will apply to any and all incinerators utilized within the State of Oklahoma.

252:100-17-3. Prohibition on density of emissions

(a) **Prohibition.** No person shall cause, suffer, allow, or permit the discharge of smoke from an incinerator of a density darker than number one (1) on the Ringelmann Chart or a visible emission of such an equivalent opacity as to obscure a certified visible emission evaluator's view to a degree greater than number one (1) on the Ringelmann Chart.

(b) **Exemptions.** Subsection 252:100-17-3(a) shall not apply to:
(1) visible emissions consisting of uncombined water droplets; or,
(2) smoke, the density of which is not darker than number three (3) of the Ringelmann Chart for a period aggregating no more than five (5) minutes in any sixty (60) consecutive minutes or more than twenty (20) minutes in any twenty-four (24) hour period.

252:100-17-4. Prohibition on pounds per hour of emissions

No person shall cause or allow to be emitted into the open air from any incinerator equipment, fly ash or other particulate matter in quantities greater than shown in 252:100-17-6. Solid fuels charged will be considered as part of the refuse weight, but No. 1 and No. 2 fuel oil and gaseous fuels and combustion air will not be so considered.

252:100-17-5. Incinerator design requirements

Hereafter no person shall operate an incinerator unless:

(1) It is provided with an auxiliary burner for the purpose of maintaining a temperature of at least 800°F in the primary combustion chamber.

(2) It has a secondary burner for use when necessary to eliminate smoke.

(3) It is a type of incinerator design that can be demonstrated to the Director to be effective in accordance with the provisions of this Subchapter. The burden of proof shall rest upon the owner of the proposed incinerator.

(4) It complies with generally recognized good practices and all

applicable provisions of this Subchapter.

(5) Full and proper use is made of all components and appurtenances thereof.

252:100-17-6. Allowable emission of particulates

(a) Allowable emissions for incinerators with capacities in excess of 100 lb/hr are set forth in Appendix A of this Chapter.

(b) Allowable emissions for incinerators with capacities less than 100 lbs/hr are set forth in Appendix B of this Chapter.

PART 3. MUNICIPAL WASTE COMBUSTORS [NEW]

252:100-17-15. Applicability [NEW]

(a) Part 3 of this subchapter applies to each municipal waste combustor unit for which construction commenced on or before September 20, 1994, which is located at a municipal waste combustor plant with an aggregate plant combustion capacity greater than 35 megagrams of municipal solid waste per day.

(b) Any waste combustion unit located at a medical, industrial or other type of waste combustor plant that meets the capacity specifications in paragraph (a) of this section and is subject to a federally enforceable permit is not subject to this part. The federally enforceable permit must limit the maximum amount of municipal solid waste combusted at the plant to less than or equal to 10 megagrams per day. To obtain this exemption the owner or operator must:

(1) notify the Department of Environmental Quality (DEQ) of an exemption claim;

(2) provide the DEQ with a copy of the federally enforceable permit that limits the firing of municipal solid waste to less than 10 megagrams per day, and;

(3) keep records of the amount of municipal solid waste fired on a daily basis.

(c) Physical or operational changes made to an existing municipal waste combustor unit primarily for complying with this rule are not considered a modification or reconstruction. Therefore, they do not result in the unit becoming subject to Eb of 40 C.F.R. part 60 [or a State rule implementing subpart Eb of 40 C.F.R. Part 60].

(d) A qualifying small power production facility, (as defined in section 3(17)(C) of the Federal Power Act (16 U.S.C. 796(17)(C)), that produces electric energy from homogeneous waste is not subject to this part if the owner/operator of the facility:

(1) notifies the DEQ of an exemption claim, and

(2) provides the DEQ data documenting that the facility qualifies for this exemption.

(e) A qualifying cogeneration facility, (as defined in section 3(18)(B) of the Federal Power Act (16 U.S.C. 796(18)(B)), that burns homogeneous waste to produce electric energy, steam, or other useful energy used for industrial, commercial, heating, or cooling purposes, is not subject to this part if the owner or operator of the facility:

(1) notifies the DEQ of an exemption claim, and

- (2) provides the DEQ data documenting that the facility qualifies for this exemption.
- (f) Any unit combusting a single-item waste stream of tires is not subject to this part if the owner or operator of the unit:
- (1) notifies the DEQ of an exemption claim, and
 - (2) provides the DEQ with data, documenting that the unit qualifies for this exemption.
- (g) Any unit required to have a permit under section 3005 of the Solid Waste Disposal Act is not subject to this part.
- (h) Any materials recovery facility (including primary or secondary smelters) that combusts waste for the primary purpose of recovering metals is not subject to this part.
- (i) Any cofired combustor located at a plant that meets the capacity specifications in paragraph (a) of this section is not subject to this part if the owner or operator:
- (1) notifies the DEQ of an exemption claim;
 - (2) provides the DEQ with a copy of the federally enforceable permit, and;
 - (3) keeps separate records, on a calendar quarter basis, of the weight of municipal solid waste and the weight of all other fuels combusted at the cofired combustor.
- (j) Air curtain incinerators that meet the capacity specifications in paragraph (a) of this section and combust a 100 percent yard waste fuel stream are exempt from all provisions of this part, except:
- (1) the opacity limit under Section 17 of this Subchapter;
 - (2) the testing procedures under Section 26 or this Subchapter, and;
 - (3) the reporting and recordkeeping provisions under Section 27 of this Subchapter.
- (k) Air curtain incinerators that meet the capacity specifications in paragraph (a) of this section and combust municipal solid waste, other than yard waste, are subject to all provisions of this part.
- (l) Pyrolysis/combustion units that are an integrated part of a plastics/rubber recycling unit are not subject to this part if the owner or operator of the unit maintains records of:
- (1) the weight of plastics, rubber, and/or rubber tires processed on a calendar quarter basis;
 - (2) the weight of chemical plant feedstocks and petroleum refinery feedstocks produced and marketed on a calendar quarter basis, and;
 - (3) the name and address of the purchaser of the feedstocks.
- The combustion of gasoline, diesel fuel, jet fuel, fuel oils, residual oil, refinery gas, petroleum coke, liquefied petroleum gas, propane, or butane produced by chemical plants or petroleum refineries that use feedstocks produced by plastics/rubber recycling units are not subject to this part.
- (m) Part 3 shall become effective [date to be inserted later].

252:100-17-16. Definitions [NEW]

Terms used but not defined in this part have the meaning given to them in the Oklahoma Clean Air Act and OAC 252:100-1-3 of this

title and subpart A and Eb of 40 C.F.R. part 60.

"Administrator" for the purpose of this rule will mean the 'Executive Director' of the Department of Environmental Quality (DEQ).

"Affected facility" means each municipal waste combustor unit located within a municipal waste combustor plant with an aggregate municipal waste combustor plant capacity greater than 35 megagrams per day of municipal solid waste for which construction commenced on or before September 20, 1994.

"Air Curtain Incinerator" means an incinerator that operates by forcefully projecting air across an open chamber or pit in which burning occurs. Incinerators of this type can be constructed above or below ground and with or without refractory walls and floors.

"Cofired combustor" means a unit combusting municipal solid waste with non-municipal solid waste fuel (e.g., coal, industrial process waste) and subject to a federally enforceable permit which limits the unit to combusting a fuel feed stream that contains 30 percent or less (by weight of total fuel feed stream), of municipal solid waste as measured on a calendar quarter basis.

"Homogeneous waste" means wastes that consist of a single substance such as automotive tires or used oil, but does not include refuse-derived fuel.

"Large municipal waste combustor plant" means a municipal waste combustor plant with a municipal waste combustor aggregate capacity for affected facilities that is greater than 225 megagrams per day of municipal solid waste.

"Municipal waste combustor plant" means one or more municipal waste combustor units at the same location for which construction was commenced on or before September 20, 1994.

"Municipal waste combustor plant capacity" means the aggregate municipal waste combustor unit capacity of all municipal waste combustor units at a municipal waste combustor plant for which construction commenced on or before September 20, 1994.

"Pyrolysis/combustion unit" means a unit that produces gases, liquids or solids through the heating of municipal solid waste. The gases, liquids or solids produced are combusted and emissions are vented to the atmosphere.

"Small municipal waste combustor plant" means a municipal waste combustor plant with a municipal waste combustor capacity for affected facilities that is greater than 35 megagrams per day, but equal to or less than 225 megagrams per day of municipal solid waste.

252:100-17-17. Standards for particulate matter and opacity [NEW]
(a) Emission limits for particulate matter. No owner or operator of an affected facility located within a large or small municipal waste combustor plant shall cause to be discharged into the atmosphere from that affected facility, any gases that contain particulate matter in excess of:

(1) Large MWC plants: 27 milligrams per dry standard cubic meter, corrected to 7 percent oxygen;

(2) Small MWC plants: 70 milligrams per dry standard cubic meter, corrected to 7 percent oxygen.

(b) Emission limits for opacity. No owner or operator of an affected facility located within a large or small municipal waste combustor plant shall cause to be discharged into the atmosphere from that affected facility, any gases that exhibit greater than 10 percent opacity (6-minute average).

252:100-17-18. Standards for municipal waste combustor metals [NEW]

(a) Emission limits for cadmium. No owner or operator of an affected facility located within a large or small municipal waste combustor plant shall cause to be discharged into the atmosphere from that affected facility, any gases that contain cadmium in excess of:

(1) Large MWC plants: 0.040 milligrams per dry standard cubic meter, corrected to 7 percent oxygen;

(2) Small MWC plants: 0.10 milligrams per dry standard cubic meter, corrected to 7 percent oxygen.

(b) Emission limits for lead. No owner or operator of an affected facility located within a large or small municipal waste combustor plant shall cause to be discharged into the atmosphere from that affected facility, any gases that contain lead in excess of:

(1) Large MWC plants: 0.49 milligrams per dry standard cubic meter, corrected to 7 percent oxygen;

(2) Small MWC plants: 1.6 milligrams per dry standard cubic meter, corrected to 7 percent oxygen.

(c) Emission limits for mercury. No owner or operator of an affected facility located within a large or small municipal waste combustor plant shall cause to be discharged into the atmosphere from that affected facility, any gases that contain mercury in excess of 0.080 milligrams per dry standard cubic meter or 15 percent of the potential mercury emission concentration (an 85-percent reduction by weight), corrected to 7 percent oxygen, whichever is less stringent.

252:100-17-19. Standards for municipal waste combustor acid gases expressed as sulfur dioxide and hydrogen chloride [NEW]

(a) Emission limits for sulfur dioxide. No owner or operator of an affected facility located within a large or small municipal waste combustor plant shall cause to be discharged to the atmosphere from that affected facility, any gases that contain sulfur dioxide in excess of:

(1) Large MWC plants: 31 parts per million by volume or 25 percent of the potential sulfur dioxide emission concentration (75 percent reduction by weight or volume), corrected to 7 percent oxygen (dry basis), whichever is less stringent. Compliance with this emission limit is based on a 24-hour daily geometric mean.

(2) Small MWC plants: 80 parts per million by volume or 50 percent of the potential sulfur dioxide emission concentration (50 percent reduction by weight or volume), corrected to 7 percent oxygen (dry basis), whichever is less stringent.

Compliance with this emission limit is based on a 24-hour geometric mean.

(b) Emission limits for hydrogen chloride. No owner or operator of an affected facility located within a large or small municipal waste combustor plant shall cause to be discharged into the atmosphere from that affected facility, any gases that contain hydrogen chloride in excess of:

(1) Large MWC plants: 31 parts per million by volume or 5 percent of the potential hydrogen chloride emission concentration (95 percent reduction by weight or volume), corrected to 7 percent oxygen (dry basis), whichever is less stringent;

(2) Small MWC plants: 250 parts per million by volume or 50 percent of the potential hydrogen chloride emission concentration (50 percent reduction by weight or volume), corrected to 7 percent oxygen (dry basis), whichever is less stringent.

252:100-17-20. Standards for municipal waste combustor organics expressed as total mass dioxins/furans [NEW]

(a) No owner or operator of an affected facility located within a large municipal waste combustor plant shall cause to be discharged into the atmosphere from that affected facility, any gases that contain dioxins/furans in excess of the limits specified in either paragraph (a) (1) or (a) (2) of this section, as applicable.

(1) The emission limit for affected facilities that employ an electrostatic precipitator-based emission control system is 60 nanograms per dry standard cubic meter (total mass), corrected to 7 percent oxygen.

(2) The emission limit for affected facilities that do not employ an electrostatic precipitator-based emission control system is 30 nanograms per dry standard cubic meter (total mass), corrected to 7 percent oxygen.

(b) No owner or operator of an affected facility located within a small municipal waste combustor plant shall cause to be discharged into the atmosphere from that affected facility any gases that contain dioxins/furans in excess of 125 nanograms per dry standard cubic meter (total mass), corrected to 7 percent oxygen.

252:100-17-21. Standards for nitrogen oxides [NEW]

(a) No owner or operator of affected facilities located within a large municipal waste combustor plant shall cause to be discharged into the atmosphere from those affected facilities, any gases that contain nitrogen oxides in excess of the limits specified in this paragraph. Emission limits for the nitrogen oxides concentration level for each type of affected facility are as follows:

Nitrogen Oxides Guidelines

<u>Municipal Waste Combustor Technology</u>	<u>Nitrogen oxides emission limit (ppm by volume)*</u>
<u>Mass burn waterwall</u>	<u>200</u>

<u>Mass burn rotary waterwall</u>	<u>250</u>
<u>Refuse-derived fuel combustor</u>	<u>250</u>
<u>Fluidized bed combustor</u>	<u>240</u>
<u>Mass burn refractory combustor</u>	<u>no limit</u>
<u>Other^b</u>	<u>200</u>

^a Corrected to 7 percent oxygen, dry basis.

^b Excludes mass burn refractory municipal waste combustors.

(b) Nitrogen oxides emissions averaging is allowed as specified in paragraphs (b)(1) through (b)(5) of this section.

(1) An owner or operator of a large municipal waste combustor plant may elect to implement a nitrogen oxides emissions averaging plan for the affected facilities that are located at that plant and that are subject to this part, except as specified in paragraphs (b)(1)(A) and (b)(1)(B) of this section.

(A) Municipal waste combustor units subject to subpart Ea or Eb of 40 C.F.R. part 60 cannot be included in the emissions averaging plan.

(B) Mass burn refractory municipal waste combustor units cannot be included in the emissions averaging plan.

(2) Prior to implementing the nitrogen oxides emissions averaging plan, the affected facilities to be included must be identified in the initial performance test report specified in 40 C.F.R. 60.59b(f) or in the annual report specified in 40 C.F.R. 60.59b(g), as applicable. The affected facilities which comprise the averaging plan may be redesignated each calendar year. Partial year redesignation is allowable with state approval.

(3) To implement the emissions averaging plan, the average daily (24-hour) nitrogen oxides emission concentration level discharged from the affected facilities to be included in the averaging plan must be no greater than the levels specified in this part. Emission limits for the nitrogen oxides concentration level for each type of affected facility are as follows:

Nitrogen Oxides Limits

<u>Municipal waste combustor technology</u>	<u>Nitrogen oxides emission limit (ppm by volume)^a</u>
<u>Mass burn waterwall</u>	<u>180</u>
<u>Mass burn rotary waterwall</u>	<u>220</u>
<u>Refuse-derived fuel combustor</u>	<u>230</u>
<u>Fluidized bed combustor</u>	<u>220</u>
<u>Other^b</u>	<u>180</u>

^a Corrected to 7 percent oxygen, dry basis.

^b Excludes mass burn refractory municipal waste combustors. Mass burn refractory municipal waste combustors may not be included in an emissions averaging plan.

(4) Under the emissions averaging plan, the average daily nitrogen oxides emissions specified in paragraph (b) (3) of this section shall be calculated using the following equation. Affected facilities that are off-line shall not be included in calculating the average daily nitrogen oxides emission level.

$$\text{NOx}_{24\text{-hr}} = \frac{\sum_{i=1}^h (\text{NOx}_i) (S_i)}{\sum_{i=1}^h (S_i)}$$

where:

NOx_{24-hr} = 24-hour daily average nitrogen oxides emission concentration level for the emissions averaging plan (parts per million by volume corrected to 7 percent oxygen).

NOx_{i-hr} = 24-hour daily average nitrogen oxides emission concentration level for affected facility i (parts per million by volume, corrected to 7 percent oxygen), calculated according to the procedures in 40 C.F.R. 60.58b(h).

S_i = maximum demonstrated municipal waste combustor unit load for affected facility i (pounds per hour steam or feedwater flow as determined in the most recent dioxin/furan performance test).

h = total number of affected facilities being included in the daily emissions average.

(5) For any day an affected facility included in the emissions averaging plan is off-line, the owner or operator of the municipal waste combustor plant must demonstrate compliance according to either paragraph (b) (5) (A) or both paragraphs (b) (5) (B) and (b) (5) (C) of this section.

(A) Compliance with the applicable limits specified in (b) (3) of this part shall be demonstrated using the averaging procedure specified in paragraph (b) (4) of this section. The averaging procedure will include the affected facilities in the plan that are on-line.

(B) For each of the affected facilities included in the emissions averaging plan, the nitrogen oxides emissions shall be calculated on a daily basis. The nitrogen oxides emissions level shall be equal to or less than the maximum daily nitrogen oxides emission levels achieved by that affected facility on any of the days during which the emissions averaging plan was achieved with all affected facilities on-line during the most recent calendar quarter. The requirements of this paragraph do not apply during the first quarter of operation under the emissions averaging plan.

(C) The average nitrogen oxides emissions (kilograms per

day) calculated according to paragraph (b) (5) (C) (ii) of this section shall not exceed the average nitrogen oxides emissions (kilograms per day) calculated according to paragraph (b) (5) (C) (i) of this section.

(i) The average nitrogen oxides emissions shall be calculated for all days during which the emissions averaging plan was implemented and achieved and during which all affected facilities were on-line. The average nitrogen oxides emissions (kilograms per day) shall be calculated, on a calendar year basis, according to paragraphs (b) (5) (C) (i) (I) through (b) (5) (C) (i) (III) of this section.

(I) The daily amount of nitrogen oxides emitted (kilograms per day) shall be calculated for each affected facility included in the emissions averaging plan. The calculation shall be based on the hourly nitrogen oxides data required under 40 C.F.R. 60.58b(a) through (m) and specified under 40 C.F.R. 60.58b(h) (5), the flue gas flow rate is determined using table 19-1 of EPA Reference Method 19 [or a State approved method], and the hourly average steam or feedwater flow rate.

(II) The daily total nitrogen oxides emissions shall be calculated as the sum of the daily nitrogen oxides emissions from each affected facility calculated under paragraph (b) (5) (C) (i) (I) of this section.

(III) On a calendar year basis, the average nitrogen oxides emissions (kilograms per day), shall be calculated as the sum of all daily total nitrogen oxides emissions calculated under paragraph (b) (5) (C) (i) (II) of this section divided by the number of calendar days for which a daily total was calculated.

(ii) The average nitrogen oxides emissions shall be calculated for all days during which one or more of the affected facilities under the emissions averaging plan was off-line. The average nitrogen oxides emissions (kilograms per day) shall be calculated according to paragraphs (b) (5) (C) (ii) (I) through (b) (5) (C) (ii) (III) of this section on a calendar year basis.

(I) The daily amount of nitrogen oxides emitted (kilograms per day), for each affected facility included in the emissions averaging plan, shall be calculated based on the hourly nitrogen oxides data required under 40 C.F.R. 60.58b(a) through (m) and specified under 40 C.F.R. 60.58b(h) (5), the flue gas flow rate is determined using table 19-1 of EPA Reference Method 19 [or a state approved method], and the hourly average steam or feedwater flow rate.

(II) The daily total nitrogen oxides emissions shall be calculated as the sum of the daily nitrogen oxides emissions from each affected facility as calculated

under paragraph (b) (5) (C) (ii) (I) of this section. (III) The average nitrogen oxides emissions (kilograms per day) on a calendar year basis shall be calculated as the sum of all daily total nitrogen oxides emissions calculated under paragraph (b) (5) (C) (ii) (II) of this section divided by the number of calendar days for which a daily total was calculated.

252:100-17-22. Standards for municipal-waste combustor operating practices [NEW]

(a) No owner or operator of an affected facility located within a small or large municipal waste combustor plant shall cause to be discharged into the atmosphere from that affected facility any gases that contain carbon monoxide in excess of the emission limits specified in this part. Carbon monoxide emission limits for each type of affected facility are as follows:

Municipal Waste Combustor Operating Guidelines

<u>Municipal waste combustor technology</u>	<u>Carbon monoxide emissions level (ppm by volume)*</u>	<u>Averaging Time</u>
<u>Mass burn waterwall</u>	<u>100</u>	<u>4 hour</u>
<u>Mass burn refractory</u>	<u>100</u>	<u>4 hour</u>
<u>Mass burn rotary refractory</u>	<u>100</u>	<u>24 hour</u>
<u>Mass burn rotary waterwall</u>	<u>250</u>	<u>24 hour</u>
<u>Modular starved air</u>	<u>50</u>	<u>4 hour</u>
<u>Modular excess air</u>	<u>50</u>	<u>4 hour</u>
<u>Refuse-derived fuel stoker</u>	<u>200</u>	<u>24 hour</u>
<u>Bubbling fluidized bed</u>	<u>100</u>	<u>4 hour</u>
<u>Circulating fluidized bed</u>	<u>100</u>	<u>4 hour</u>
<u>Pulverized coal/refuse-derived fuel mixed fuel-fired combustor</u>	<u>150</u>	<u>4 hour</u>
<u>Spreader stoker coal/refuse-derived fuel mixed fuel-fired combustor</u>	<u>200</u>	<u>24 hour</u>

*Measured at the combustor outlet in conjunction with a measurement of oxygen concentration, corrected to 7 percent oxygen, dry basis. Calculated as an arithmetic average.

(b) An owner or operator of an existing municipal waste combustor shall comply with all provisions specified in 40 C.F.R. 60.53b(b) and (c).

252:100-17-23. Standards for municipal waste combustor operator training and certification [NEW]

(a) Each chief facility operator and shift supervisor of each affected facility, shall obtain and maintain a current provisional operator certification from either the American Society of Mechanical Engineers [ORO-1-1994 (incorporated by reference -- see 40 C.F.R. 60.17 of subpart A of 40 C.F.R. part 60)] or a State certification program by the appropriate date specified in

paragraph (a)(1) or (a)(2) of this section.

(1) For affected facilities located within small municipal waste combustor plants, no later than the date 6 months after the startup of an affected facility or 18 months after [date of State plan approval], whichever is later.

(2) For affected facilities located within large municipal waste combustor plants, no later than the date 6 months after the startup of an affected facility or 12 months after [date of State plan approval], whichever is later.

(b) Each chief facility operator and shift supervisor of each affected facility, shall have completed full certification or scheduled a full certification exam with either the American society of Mechanical Engineers [ORO-II1994 (incorporated by reference -- see § 60.17 of subpart A of 40 C.F.R. part 60)] or a State certification program by the appropriate date specified in paragraph (b)(1) or (b)(2) of this section.

(1) For affected facilities located within small municipal waste combustor plants, no later than the date 6 months after the startup of an affected facility or 18 months after [date of state plan approval], whichever is later.

(2) For affected facilities located within large municipal waste combustor plants, no later than the date 6 months after the startup of an affected facility or 12 months after [date of State plan approval], whichever is later.

(c) No owner or operator of an affected facility shall allow the facility to be operated at any time unless one of the following persons is on duty at the affected facility: A fully certified chief facility operator, a provisionally certified chief facility operator who is scheduled to take the full certification exam according to the schedule specified in paragraph (b) of this section, a fully certified shift supervisor, or a provisionally certified shift supervisor who is scheduled to take the full certification exam according to the schedule specified in paragraph (b) of this section.

(1) The requirement specified in paragraph (c) of this section shall take effect by the appropriate date specified in paragraph (c)(1)(A) or (c)(1)(B) of this section.

(A) For affected facilities located within small municipal waste combustor plants, no later than the date 6 months after the startup of an affected facility or 18 months after [date of State plan approval], whichever is later.

(B) For affected facilities located within large municipal waste combustor plants, no later than the date 6 months after the startup of an affected facility or 12 months after [date of State plan approval], whichever is later.

(2) If one of the persons listed in paragraph (c) of this section must leave the affected facility during their operating shift, a provisionally certified control room operator who is on-site at the affected facility may fulfill the requirement in paragraph (c) of this section.

(d) All chief facility operators, shift supervisors, and control room operators at affected facilities located within a small or

large municipal waste combustor plant must complete the EPA or State municipal waste combustor operator training course no later than the date 6 months after the date of startup of the affected facility or by 12 months after [date of State Plan approvals], whichever is later.

(e) The requirement specified in paragraph (d) of this section does not apply to chief facility operators, shift supervisors, and control room operators who have obtained full certification from the American Society of Mechanical Engineers on or before [date of State plan approval].

(f) The owner or operator may request that the Department of Environmental Quality waive the requirement specified in paragraph (d) of this section for chief facility operators, shift supervisors, and control room operators who have obtained provisional certification from the American Society of Mechanical Engineers on or before [date of State plan approval].

(g) The owner or operator of an affected facility located within a small or large municipal waste combustor plant shall develop and update on an annual basis, a site-specific operating manual. The operating manual shall, at a minimum, address the elements of municipal waste combustor unit operation specified in paragraphs (g) (1) through (g) (11) of this section.

- (1) A summary of the applicable standards under this part;
- (2) A description of basic combustion theory applicable to a municipal waste combustor unit;
- (3) Procedures for receiving, handling, and feeding municipal solid waste;
- (4) Municipal waste combustor unit start-up, shutdown, and malfunction procedures;
- (5) Procedures for maintaining proper combustion air supply levels;
- (6) Procedures for operating the municipal waste combustor unit within the standards established under this part;
- (7) Procedures for responding to periodic upset or off-specification conditions;
- (8) Procedures for minimizing particulate matter carryover;
- (9) Procedures for handling ash;
- (10) Procedures for monitoring municipal waste combustor unit emissions; and
- (11) Reporting and recordkeeping procedures.

(h) The owner or operator of an affected facility located within a small or large municipal waste combustor plant shall establish a training program to review the operating manual according to the schedule specified in paragraphs (h) (1) and (h) (2) of this section. The training shall be provided to each person who has responsibilities affecting the operation of an affected facility including, but not limited to, chief facility operators, shift supervisors, control room operators, ash handlers, maintenance personnel, and crane/load handlers.

(1) Each person specified in paragraph (h) of this section shall undergo initial training no later than the date specified in paragraph (h) (1) (A), (h) (1) (B), or (h) (1) (C) whichever is

later.

(A) The date 6 months after the date of startup of the affected facility.

(B) The date prior to the day the person assumes responsibilities affecting municipal waste combustor unit operation; or

(C) Twelve months after [date of State plan approval].

(2) Annually, following the initial review required by paragraph (h)(1) of this section.

(A) The operating manual required by paragraph (h) of this section shall be kept in a readily accessible location for all persons required to undergo training under paragraph (h) of this section no later than 6 months after start-up or 12 months after [date of State plan approval]. The operating manual and records of training shall be available for inspection by the Department of Environmental Quality upon request.

252:100-17-24. Standards for municipal waste combustor fugitive ash emissions [NEW]

An owner or operator of an existing municipal waste combustor shall comply with all provisions specified in 40 C.F.R. 60.55b.

252:100-17-25. Standards for air curtain incinerators [NEW]

An owner or operator of an air curtain incinerator located at a plant which meets the plant capacity specified in paragraph (a) of 252:100-17-15 and that combusts a fuel feed stream of 100 percent yard waste, shall not cause to be discharged into the atmosphere from that incinerator, any gases that exhibit greater than 10 percent opacity (6 minute average). An opacity level of up to 35 percent (6 minute average) is permitted during startup periods within the first 30 minutes of unit operation.

252:100-17-26. Compliance and performance testing [NEW]

(a) An owner or operator of an existing municipal waste combustor shall comply with all provisions specified in 40 C.F.R. 60.58b, except for the provisions specified in 40 C.F.R. 60.58b(g)(5)(iii).

(b) Performance testing and monitoring may be accomplished by using methods other than those specified in 40 C.F.R. 60.58b provided they have prior approval from the Executive Director.

252:100-17-27. Reporting and recordkeeping requirements [NEW]

An owner or operator of an existing municipal waste combustor shall comply with all provisions specified in 40 C.F.R. 60.59b, except the provisions for siting requirements as specified in 40 C.F.R. 60.59b(a), b(5), and d(11).

252:100-17-28. Compliance schedules (under development) [NEW]

(a) All affected facilities must comply with all requirements of this part (except the performance test) or close within 3 years following the date of issuance of a revised construction or

operating permit, if a permit modification is required, or by [date 3 years after approval of the state plan] if a permit modification is not required.

(b) All affected facilities for which construction, modification, or reconstruction commenced after June 26, 1987, that are located within a large municipal waste combustor plant shall comply with the emission limit for mercury and the emission limit for dioxans/furans specified in 252:100-17-20. Compliance shall be obtained within 1 year following issuance of a revised construction or operating permit, if a permit modification is required, or by [date 1 year following approval of state plan], whichever is later.

(c) All affected facilities located within large municipal waste combustor plants that comply with all the requirements of this part (except the performance test) or close in more than 1 year but less than 3 years following the date of issuance of a revised construction or operation permit, if a permit modification is required, or after [date 1 year after approval of the State plan] and before [date 3 years after approval of the State plan], shall comply with the requirements in paragraphs (c)(1) through (c)(2) of this section.

(1) If the affected facility will close, the owner or operator of the affected facility shall submit a closure agreement that includes the date of plant closure.

(2) If the affected facility will continue to operate, the owner or operator of the affected facility shall comply with the compliance schedule in paragraphs (c)(2)(A) through (c)(2)(D).

(A) The owner or operator of the affected facility shall submit a final control plan for the affected facility to the DEQ by [state to provide date].

(B) The owner or operator of the affected facility shall award all contracts for emission control systems or process modifications as necessary to comply with the requirements of this part, by [State to provide date].

(C) The owner or operator of the affected facility shall initiate on-site construction or installation of emission control equipment or process change, as necessary to comply with the requirements of this part, by [State to provide date].

(D) The owner or operator of the affected facility shall ensure the completion of on-site construction or installation of emission control equipment or process change, as necessary to comply with the requirements of this part, by [State to provide date].

[The State has the option of including the following additional increments of Progress in the rule with enforceable dates or in the State plan as unenforceable increments of progress.

Date for obtaining services of an architectural and engineering firm regarding the air Pollution control device(s);

Date for obtaining design drawings of the air pollution control

device(s);

Date for submittal of permit modifications, if necessary;

Date for obtaining the major components of the air pollution control device(s);

Date for initiation of site preparation for installation of the air pollution control devices);

Date for initial startup of the air pollution control device(s); and

Date for initial performance test(s) of the air pollution control device(s).

(d) All affected facilities located within large municipal waste combustor plants that comply with all the requirements of this part (except the performance test) in more than 1 year but less than 3 years following the date of issuance of a revised construction or operation permit, if a permit modification is required, or after [date 1 year after approval of the State plan] and before [date 3 years after approval of the State plan], shall submit performance test results for dioxin/furan emissions that have been conducted during or after 1990 by [State to provide date]. The performance test shall be conducted in accordance with the provisions specified in 252:100-17-26 (compliance and performance testing).

PUBLIC MEETING

Notice of Public Meeting for October 15, 1996 was forwarded to the Secretary of State's Office giving the time, date, and place of the meeting. Agendas were posted at the entrance door of the meeting room.

Call to Order - Mr. Breisch, Chairman, called the meeting to order and roll call was taken: Dr. Canter - aye; Mr. Branecky - aye; Mr. Fishback - aye; Mr. Albright - aye; Mr. Breisch - aye. Absent were: Mr. Glass, Ms. Hinkle and Ms. Slagell.

Approval of Minutes - Mr. Breisch entertained a motion to approve the Minutes of the August 13, 1996 Public Meeting/Hearing. Motion was made by Mr. Branecky to approve the Minutes and second to the motion was made by Dr. Canter. Roll call as follows: Dr. Canter - aye; Mr. Branecky - aye; Mr. Fishback - aye; Mr. Albright - aye; Mr. Breisch - aye.

PUBLIC HEARING

OAC 252:100-7 CONSTRUCTION PERMITS FOR MAJOR AND MINOR SOURCES:
OPERATING AND RELOCATION PERMITS FOR MINOR SOURCES [AMENDED]
OAC 252:100-8 OPERATING PERMITS (PART 70) [AMENDED]

As protocol officer, Larry Byrum convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51.

Mr. Byrum called upon Dr. Joyce Sheedy to give staff position on the proposed changes to subchapters 7 and 8. Dr. Sheedy advised the Council that the rule changes brought forward were a continuation from the June 11, 1996 and August 13, 1996 hearings and summarized the changes and comments received since last hearing.

After further discussion, staff suggested that Council recommend to the Environmental Quality Board portions of subchapters 7 and 8 regarding changes allowing for reduction of fees assessed to Title V and minor sources of total suspended particulates in accordance with federal guidance. Mr. Fishback made motion to adopt staff's recommendation based on proposed changes to OAC:272:100-7-4, OAC 252:100-7-18, and OAC 252:100-8-2; and that these go forward to the DEQ Board as emergency and permanent rules. Second was made by Mr. Albright. Roll call as follows: Dr. Canter - aye; Mr. Branecky - aye; Mr. Fishback - aye; Mr. Albright - aye; Mr. Breisch - aye.

PUBLIC HEARING

OAC 252:100-17 INCINERATORS, PART 3, MUNICIPAL WASTE COMBUSTORS
[NEW]

As protocol officer, Larry Byrum convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51.

Ms. Ann Alltizer, AQD staff, gave slide presentation and Scott Thomas then gave staff position on the proposed rule. After discussion Mr. Breisch entertained motion to continue this hearing to the next regularly scheduled meeting. Mr. Albright made the motion with second by Mr. Branecky. Roll call was taken as follows: Dr. Canter - aye; Mr. Branecky - aye; Mr. Fishback - aye; Mr. Albright - aye; Mr. Breisch - aye.

PUBLIC HEARING

OAC 252:100-15 MOTOR VEHICLE POLLUTION CONTROL DEVICES [REVOKED]

As protocol officer, Larry Byrum convened the hearing by the Air Quality Council in compliance with the Oklahoma Administrative Procedures Act and Title 40 CFR Part 51.

Mr. Scott Thomas gave staff recommendations stating that revocation of this rule is recommended as it is unenforceable and it satisfies efforts being made by the Agency to streamline its rules.

NEW BUSINESS - Ms. Nadine Barton requested a breakdown of the Title V fee structure for the next meeting.

ADJOURNMENT: Mr. Breisch adjourned the meeting and announced that the next regularly scheduled meeting would be held on December 17, 1996, at the Lincoln Plaza Office Complex Brown Room 4545 North Lincoln Boulevard, Oklahoma City, Oklahoma.

NOTE: The hearing records along with the sign-in sheets are attached as an official part of these Minutes.

Governor

State of Oklahoma
DEPARTMENT OF ENVIRONMENTAL QUALITY

NOTICE

DECEMBER 17, 1996
AIR QUALITY COUNCIL
MEETING CANCELLED
AND
HEARINGS POSTPONED

To Whom It May Concern:

The Air Quality Council meeting scheduled for December 17, 1996 has been cancelled. In addition, the hearings that were continued to December 17, 1996 on proposed amendments to *OAC 252:100-17 INCINERATORS, PART 3 MUNICIPAL WASTE COMBUSTORS* and on the proposed repeal of *OAC 252:100-15 MOTOR VEHICLE POLLUTION CONTROL DEVICES*, have been postponed until the next Air Quality Council meeting.

The next meeting of the Air Quality Council is scheduled to be held on **FEBRUARY 19, 1997** in the Burgundy Room, 4545 N. Lincoln Boulevard, Oklahoma City. Tentative agenda items will include the resumption of the hearings noted above, as well as election of officers for 1997. The official agenda will be issued in late January, 1997. Please accept our apologies for any inconvenience caused by this cancellation/postponement.

Sincerely,

A handwritten signature in cursive script that reads "Larry D. Byrum".
