

# 2016 U.S. Stakeholder Meeting on HFCs and the Montreal Protocol

The Environmental Protection Agency and the Department of State will co-host a meeting for stakeholders concerning hydrofluorocarbons (HFCs) and the *Montreal Protocol on Substances that Deplete the Ozone Layer*.

The U.S. Government is hosting this meeting to provide an opportunity to discuss working together to adopt an amendment to the Montreal Protocol in 2016 to reduce the production and consumption of HFCs. The meeting will foster dialogue and allow stakeholders to express their views and hear U.S. Government perspectives building on the significant progress made at the Montreal Protocol's November 2015 Meeting of the Parties. We look forward to a productive discussion.

## HOSTED BY:

Environmental Protection Agency  
Department of State
