SF6 LIFECYCLE MANAGEMENT

**The SF6 Industry's:  
Environmental Compliance & Lifecycle  
Management Solution provider  
[www.SF6Authority.com](http://www.SF6Authority.com)**

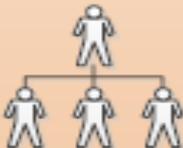

# EPA SF6 Mass Balance Approach

- (Decrease in SF6 inventory)
- + (Acquisitions of SF6)
- (Disbursements of SF6)
- (Net Increase in Total Nameplate Capacity of Equipment Operated) =

## SF6 Emissions

Virgin Gas

Virgin Gas Purchased By Multiple Location

1. Capital Expenditures
2. Maintenance

Virgin Gas Provided by OEM's

1. Bottles Provided with new installs
2. Multiple OEMS
3. Multiple Locations
4. Too much gas

Field Activities

Bottle Inventories

1. Multiple Locations
2. Paper logs
3. Annual Audits Required

Nameplate Capacity of Equipment

1. Multiple Locations
2. Active/In-Active Equipment

Transfers

1. Multiple Locations
2. Different Logging Methods

Recovered SF6

Reclaim Material

1. Sent to multiple vendors
2. Multiple shipments
3. Not all vendors provide reliable data

VIRGIN GAS Provider

Heel Reports

1. Multiple Vendors
2. Multiple Dropoff points
3. Not all virgin providers handle heels correctly

# Managing Virgin Gas (Purchases)

## SF6 DELIVERY CERTIFICATE

Date of shipment:

Gross Weight:

Lab Technician:

Sales Order Number:

Purchase Order:

Serial #	Cylinder ID	Cylinder TW	Cylinder Gross Weight	Gas Weight	Delivery Location	DOT Expiration	SF6 Purity (%)	
	0001							
	0002							
	0003							
	0004							
	0005							

# Managing Heels and Recovered SF6

## SF6 RETURN CERTIFICATE

Date of shipment:							
Gross Weight:							
Lab Technician:							
Return Order Number:							
Purchase Order:							

Serial #	Cylinder TW	Cylinder ID	Cylinder Gross Weight	Gas Weight	Gas Orgin	DOT Expiration	SF6 Purity (%)
254411	114.6	1158	185.2	70.6	Charlotte	4/12	94.2
331235	116.2	1172	166.1	49.9	Charlotte	6/13	88.75
1236310	115.4	2135	220.2	104.8	Charlotte	4/12	92.1
81235	116.3	1257	198.2	81.9	Hartwell	3/10	89.64

# Managing all Aspects of your Enterprise

## Virgin Gas

Virgin Gas Purchased By  
Multiple Locations

1. Capital Expenditures
2. Maintenance

Virgin Gas Provided by Multiple Vendors

1. Bottles Provided by Multiple Vendors
2. Multiple Vendors
3. Multiple Locations
4. Too much gas

## Field Activities

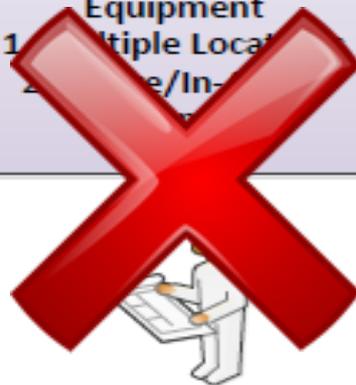

Boiler Rooms

1. Multiple Locations
2. Paperwork
3. Annual Audits Required

Nameplate Capacity of Equipment

1. Multiple Locations
2. Different In-Service Dates

Transfers

1. Multiple Locations
2. Different Logging Methods

## Recovered SF6

Reclaim Material

1. Some vendors do not provide reliable data
2. Multiple Vendors
3. Not all vendors provide reliable data

## VIRGIN GAS Provider

Heel Report

1. Multiple Vendors
2. Multiple Data Points
3. Not all providers handle correctly

# Cylinder Inventory Levels

- **Status Quo**
  - Have end of year inventories executed by each locations
- **Problems**
  - Lost or unaccounted cylinders can create phantom emissions
  - Labor intensive process
  - Unreliable data
  - No understanding of inventory till EOY

# Cylinder Inventory Solution

## Inventory

This page lists all the inventory available in your account. Use the options below to filter the results shown.

Location:  Category:

Status:  Additional Search:

Name	Type	Location	Current Gas Weight	Gas Capacity
11-99-1	 Bottle	Truck 7	30 lbs	30 lbs
11-99-2	 Bottle	Switchyard 7	50 lbs	60 lbs
34534	 Bottle	Switchyard 99	124 lbs	115 lbs
435634	 Bottle	Switchyard 7	17 lbs 3 oz	115 lbs
4554	 Bottle	Switchyard 99	64 lbs 11 oz	115 lbs

# Nameplate Capacities

- **Status Quo**
  - Adjust at end of year with new installs / retrofits
  - Rely on legacy software (SAP/Oracle ETC)
- **Problems**
  - Unlogged equipment can create in-accurate NPC
  - Substantial data collection required at end of year
  - No understanding of inventory till EOY

# Nameplate Solution

Leak Rate: 0.22%  
[Notify me when...](#)

System Manager: (None)

Material Status: Virgin

Notes:

Sub-systems: (None)

## Service History

<u>Event ID</u>	<u>Component</u>	<u>Location</u>	<u>Service Date</u>	<u>Company/Tech</u>	<u>Installed From</u>	<u>Extracted To</u>	<u>Net Gas Added</u>	<u>System Leak Rate</u>
927		Equipment locaiton 2	3/26/2014	In-House Karan Garg, Sf6 Test	3 lbs 5 oz of SF6 from 4554	2 lbs 3 oz of SF6 to 435634	1 lbs 2 oz	0.22%

# Upsides of Digital Tracking

- **Dynamic leak rates for breakers**
  - Problematic units more easily identified
  - Better decision making on equipment maintenance through clear service history
- **Purchases and disbursements for all vendors tracked in one portal**
- **Eliminate Phantom Emissions**
- **Can be used/accessed by all stakeholders**
- **1-click GHG reporting!**
