

State Clean Energy-Environment Technical Forum

**Thursday, May 22, 2008
2:00 – 3:30 PM ET**

**Toll free: (866)299-3188
Passcode: 587 856 1975#**

Gathering and Using State-Level Energy Data

| | | |
|--|--|--------|
| Welcome | <p>Julia Miller, Clean Energy-Environment State Partnerships State & Local Branch, Climate Protection Partnerships Division, US EPA</p> <p>Catherine Morris, The Keystone Center</p> | 5 min |
| Overview of EIA state-level data collection | Barbara Fichman, Energy Profiles Program Manager, Energy Information Administration | 15 min |
| Ohio | Greg Payne, Energy Office, OH Department of Development | 15 min |
| New Jersey | Bharat Patel, Director, Office of Planning, NJ Board of Public Utilities | 15 min |
| Facilitated Discussion | <ol style="list-style-type: none"> 1. What type of energy data do states need to evaluate clean energy programs and policies and develop state energy plans? 2. What energy and emissions data are collected and reported at the state level by EIA? 3. Where are the gaps in the current data available from EIA? 4. How has increased confidentiality affected the availability of data for states? 5. What are states doing to supplement information collected by EIA? 6. How does the availability and accuracy of data affect your energy analysis and planning? | 35 min |
| Summary of Key Points/Technical Needs | | 5 min |
