

## UNITED STATES ENVIRONMENTAL PROTECTION AGENCY REGION 7

11201 Renner Boulevard  
Lenexa, Kansas 66219

OFFICE OF THE  
REGIONAL ADMINISTRATOR

FEB 06 2013

The Honorable Dave Heineman  
Governor of Nebraska  
Office of the Governor  
P.O. Box 94848  
Lincoln, Nebraska 68509-4848

Dear Governor Heineman:

Thank you for your recommendations June 1, 2011 on air quality designations for the state of Nebraska for the 2010 revision to the primary National Ambient Air Quality Standard for sulfur dioxide (SO<sub>2</sub>). Reducing levels of sulfur dioxide pollution is an important part of the U. S. Environmental Protection Agency's commitment to a clean, healthy environment. Exposure to SO<sub>2</sub> can cause a range of adverse health effects, including narrowing of the airways which can cause difficulty breathing and increased asthma symptoms. This letter is to notify you of the EPA's preliminary intentions regarding your recommended designations.

On June 3, 2010, the EPA strengthened the health-based or "primary" standard for SO<sub>2</sub> by establishing a standard for 1-hour average SO<sub>2</sub> concentrations at a level of 75 parts per billion. The Clean Air Act requires the EPA to complete the initial designations process within two years of promulgating a new or revised standard. If the Administrator has insufficient information to make these designations, the EPA has the authority to extend the designation process by up to one year. On July 27, 2012, the EPA announced that it had insufficient information to complete the designations for the 1-hour SO<sub>2</sub> standard within two years and extended the designations deadline to June 3, 2013.

At this time the EPA is proceeding with designating as nonattainment most areas in locations where existing monitoring data from 2009-2011 indicate violations of the 1-hour SO<sub>2</sub> standard. The EPA intends to address the designations for all other areas in separate future actions. With input from a diverse group of stakeholders, EPA has developed a comprehensive implementation strategy for these future actions that focuses resources on identifying and addressing unhealthy levels of SO<sub>2</sub>. The strategy is available at: <http://www.epa.gov/airquality/sulfurdioxide/implement.html>. The EPA will continue to work closely with you and our other partners at the state, tribal and local levels to ensure health-protective, commonsense implementation of the 1-hour SO<sub>2</sub> standard.

The EPA's review of the most recent monitored air quality data from 2009-2011 shows no violations of the 2010 SO<sub>2</sub> standard in any areas in Nebraska. Consequently, the EPA is not yet prepared to propose designation action in Nebraska and is therefore currently deferring action to designate areas in Nebraska. The EPA expects to be able to proceed with designation action in Nebraska once additional data are gathered pursuant to our comprehensive implementation strategy. In a separate future action or actions the EPA will notify you of our intended designations for these areas, and seek public comment on these actions, no later than 120 days prior to promulgating any final designations.

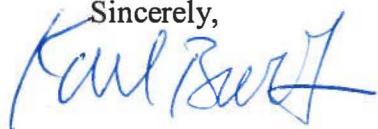

Printed on Recycled Paper

We look forward to a continued dialogue with you and your staff as we work together to implement the 2010 primary SO<sub>2</sub> standard. For additional information regarding initial designations on the SO<sub>2</sub> standard, please visit our website at [www.epa.gov/so2designations](http://www.epa.gov/so2designations).

If we can be of further assistance, please feel free to contact me at (913) 551-7006 or have your staff contact Sarah Hatch, State Governmental Liaison, at (913) 551-7199.

Sincerely,

Karl Brooks
