<b>Optional:</b>	No, but certain provisions are optional

**Summary:** EPA is listing four petroleum refining process wastes as hazardous (K169-K172). The wastes will be subject to stringent management and treatment standards and emergency notification requirements. The rule excludes certain recycled secondary materials from the definition of solid waste. The materials include both oil-bearing residuals from petroleum refineries and oil from associated petrochemical facilities, when they are inserted into the refining process; and spent caustic from liquid treating operations when used as a feedstock to make certain chemical products. The rule clarifies an existing exclusion for recovered oil from certain petroleum industry sources. Finally, this rule applies the universal treatment standards to the petroleum refining wastes. On October 9, 1998, EPA changed the effective date of certain portions of this rule to be consistent with sections 801 and 808 of the Congressional Review Act.

**State Authorization:** This rule is placed in RCRA Cluster IX. The State modification deadline is July 1, 2000 (or July 1, 2001 if a State statutory change is necessary). The revisions to 40 CFR 261.32, Part 261 Appendix VII, 268.35 and 268.40 are promulgated pursuant to HSWA. These regulations become effective on the Federal effective date in all States. The revision to 40 CFR 266.100 is promulgated pursuant to HSWA, but it is optional for adoption. EPA will implement these requirements only in States that do not have interim or final authorization. Both interim and final authorization are available for the HSWA provisions. Interim authorization expires January 1, 2003. The revisions to 40 CFR Part 261.3, 261.4, and 261.6 are promulgated relative to non-HSWA authority. EPA will implement the non-HSWA requirements only in States that do not have interim or final authorization. In authorized States, the non-HSWA requirements will not be applicable until the States revise their programs to adopt equivalent requirements under State law. Only final authorization is available for the non-HSWA provisions. The non-HSWA revisions related to the exclusions from the definition of solid waste of certain oil-bearing hazardous secondary material from petroleum refining and certain recovered oils from associated petrochemicals are optional. The addition of 40 CFR 261.4(a)(19) is a clarifying change and
