

-- Public Notice --

U.S. Environmental Protection Agency

Millsboro TCE Superfund Site

Millsboro, Sussex County, DE

--Soil & Groundwater Response Action Proposed--

The U.S. Environmental Protection Agency (EPA) has released an Engineering Evaluation/Cost Analysis (EE/CA) Report for a Removal Action to address contaminated soil and groundwater at the Millsboro TCE Superfund Site located in Millsboro, Sussex County, Delaware.

The EE/CA Report and finalization letter proposes a response action to clean up trichloroethylene (TCE) contaminated soil and groundwater that currently impact two shallow public supply wells used by the Town of Millsboro to produce public drinking water. The major components of the proposed remedy are in-situ chemical oxidation of the source area and direct groundwater circulation pump and treatment using granular activated carbon to treat extracted groundwater that will then be re-injected into the shallow aquifer.

If you would like to review the full proposed EE/CA and associated finalization letter, the documents can be viewed on EPA's website at:

<https://semspub.epa.gov/src/collections/03/AR/DEN000306645>

You're Invited!

EPA will hold a public meeting to discuss the proposed EE/CA

Wednesday, April 13, 2016

6:00 p.m. - 8:00 p.m.

Millsboro Town Hall

322 Wilson Highway

Millsboro, DE 19966

EPA Seeks Public Comment!

The Proposed EE/CA **public comment period** is from **April 4, 2016 until May 4, 2016**. Comments can be submitted by mail, e-mail, or in person at the upcoming public meeting. Comments sent via postal or email must be date-stamped **no later than midnight on May 4, 2016** and sent to:

U.S. Environmental Protection Agency
