

Brownfields 2016 Grant Fact Sheet

Naugatuck Valley Council of Governments, CT

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the Naugatuck Valley Council of Governments for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to conduct three Phase I and three Phase II environmental site assessments. Grant funds also will be used to support cleanup planning and community outreach activities. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination. The target communities are within the Cities of Waterbury and Ansonia.

Brownfields 2016 Grant Fact Sheet

Norwich, CT

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$199,000 for hazardous substances

\$185,000 for petroleum

EPA has selected the City of Norwich for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to conduct five Phase I and three Phase II environmental site assessments. Grant funds also will be used to support community engagement activities, including printing materials in multiple languages. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination.

Brownfields 2016 Grant Fact Sheet

Shelton, CT

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the City of Shelton for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former Chromium Process Facility on 113 Canal Street West. The site hosts a large manufacturing building that was used at one time for a major metal plating and finishing facility. The site's soil and groundwater are contaminated with chlorinated volatile organic compounds, polynuclear aromatic hydrocarbons, and heavy metals. Grant funds also will be used for community involvement activities.

Brownfields 2016 Grant Fact Sheet

Adams, MA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the Town of Adams for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to conduct one Phase I and two Phase II environmental site assessments, and develop two cleanup plans. Community-wide petroleum grant funds will be used to conduct one Phase I and three Phase II environmental site assessments, and develop three cleanup plans. Grant funds of both types also will be used to support community outreach activities.

Brownfields 2016 Grant Fact Sheet

Chicopee, MA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grants

\$600,000 for hazardous substances

EPA has selected the City of Chicopee for three brownfields cleanup grants. Hazardous substances grant funds will be used to clean up Building #28 North, Building #28 North Extension, and Building #28 South of the former Uniroyal Tire Complex at 154 Grove Street. The Uniroyal property was historically used as a lumber yard, tire and adhesives manufacturing site, machine shop, and printing facility. The three buildings are contaminated with PCBs, metal, and inorganic contaminants. Grant funds also will be used to conduct air monitoring during and following completion of cleanup activities.

Brownfields 2016 Grant Fact Sheet

Everett, MA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grant

\$200,000 for hazardous substances

EPA has selected the City of Everett for a brownfields assessment grant. Community-wide hazardous substances grant funds will be used to conduct up to six Phase I and about five Phase II environmental site assessments. Grant funds also will be used to support community outreach activities, including publishing outreach materials in Spanish, Portuguese, and other languages.

Brownfields 2016 Grant Fact Sheet

Gardner Redevelopment Authority, MA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grants

\$600,000 for hazardous substances

EPA has selected the Gardner Redevelopment Authority for three brownfields cleanup grants. Hazardous substances grant funds will be used to clean up Parcels #R12-1-5, #R12-1-5A, and #R17-21-4 of the former Garbose Metal Factory at 155 Mill Street. The Garbose property was formerly used for collecting and storing scrap metal, crushing automobiles, and dismantling electrical transformers. All three parcels are contaminated with PCBs, metals, and dioxins in soil and sediment. Grant funds also will be used to conduct community outreach and education activities.

Brownfields 2016 Grant Fact Sheet

Greylock Flume Inc., North Adams, MA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected Greylock Flume Inc. for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Greylock Flume on 506-508 State Road. The site was the source of power for a former textile mill, the Greylock Mill, and is contaminated with semi-volatile organic compounds, metals, and PCBs. Grant funds also will be used for community involvement activities.

Lee, MA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$100,000 for petroleum

EPA has selected the Town of Lee for two brownfields assessment grants. Community-wide hazardous substances and petroleum grant funds will be used to conduct three Phase I and four Phase II environmental site assessments. Grant funds also will be used to prepare three cleanup plans and support community outreach activities.

Brownfields 2016 Grant Fact Sheet

Merrimac, MA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grants

\$530,000 for hazardous substances

EPA has selected the Town of Merrimac for three brownfields cleanup grants. Hazardous substances grant funds will be used to clean up Parcels #3-1-7, #3-1-8, and #3-1-20 of the Coastal Metals property at 2 Littles Court. The Coastal Metals property has been abandoned since 2002 and was previously used as a carriage manufacturing factory, brass foundry, and metals plating facility. The three parcels are contaminated with chlorinated solvents, heavy metals, and cyanide in the soil and groundwater. Grant funds also will be used to conduct community involvement activities.

Brownfields 2016 Grant Fact Sheet

Merrimack Valley Planning Commission, MA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Revolving Loan Fund Grant

\$620,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the Merrimack Valley Planning Commission for a brownfields revolving loan fund grant. The grant will be used to capitalize a revolving loan fund from which the Merrimack Valley Planning Commission will provide four loans and four subgrants to support cleanup activities for sites contaminated with hazardous substances and petroleum. Grant funds also will be used to market the RLF, support cleanup planning, and conduct community engagement activities. RLF activities will cover all 15 municipalities served by the Planning Commission, and the primary target areas will be the urban centers of Haverhill, Lawrence, and Methuen.

Brownfields 2016 Grant Fact Sheet

Berwick, ME

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grants

\$600,000 for hazardous substances

EPA has selected the Town of Berwick for three brownfields cleanup grants. Hazardous substances grant funds will be used to clean up three sites at the Prime Tanning Co. Inc. property at 20 and 34 Sullivan Street. The sites are on Lots 133, 146-1, 146-2, 146-3, and 146-7. The vacant property previously had been used for 100 years for leather tanning, woolen milling, and shoe and carriage manufacturing. The sites are contaminated with volatile organic compounds, polycyclic aromatic hydrocarbons, and metals in the soil and groundwater. Grant funds also will be used to conduct community involvement activities.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the Eastern Maine Development Corporation for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to inventory sites and conduct five Phase I and three Phase II environmental site assessments. Grant funds also will be used to support cleanup planning and community outreach activities. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination.

Brownfields 2016 Grant Fact Sheet

Gardiner, ME

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grant

\$200,000 for hazardous substances

EPA has selected the City of Gardiner for a brownfields assessment grant. Community-wide hazardous substances grant funds will be used to conduct four Phase I and four Phase II environmental site assessments. Grant funds also will be used to develop cleanup plans and conduct community outreach activities.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the City of Gardiner for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the TW Dick property at 24 and 59 Summer Street. The property dates back to the 1800s and was formerly used for foundries, machine shops, and steel fabricating activities. It is contaminated with arsenic, mercury, polycyclic aromatic hydrocarbons, and PCBs. Grant funds also will be used to conduct community outreach activities.

Brownfields 2016 Grant Fact Sheet

Marble Block Redevelopment Corporation, Biddeford, ME

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Marble Block Redevelopment Corporation for a brownfields cleanup grant.

Hazardous substances grant funds will be used to clean up the Marble Block site at 129 Main Street in Biddeford. The site has been used for various commercial uses since the late 1800s, including as a clothing store and pharmacy, and a department store. It has been vacant since 2008 and is contaminated with PCBs, metals, and inorganic contaminants. Grant funds also will be used to support community involvement activities.

\$200,000 for petroleum

EPA has selected the Upper Valley Lake Sunapee Regional Planning Commission for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to conduct nine Phase I and three Phase II environmental site assessments. Community-wide petroleum grant funds will be used to conduct seven Phase I and four Phase II environmental site assessments. Grant funds of both types also will be used to develop a Brownfields Advisory Committee, prioritize and select sites, and support community outreach activities. The Planning Commission plans to focus assessments on the Cities of Claremont and Lebanon.

Brownfields 2016 Grant Fact Sheet

Rhode Island Department of Environmental Management

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the Rhode Island Department of Environmental Management for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to conduct five Phase I and four Phase II environmental site assessments. Grant funds also will be used for community outreach activities. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination.

Brownfields 2016 Grant Fact Sheet

Rhode Island Infrastructure Bank

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Revolving Loan Fund Grant

\$820,000 for hazardous substances

EPA has selected the Rhode Island Infrastructure Bank for a brownfields revolving loan fund grant. The grant will be used to capitalize a revolving loan fund from which the Rhode Island Infrastructure Bank will provide 15 loans to support cleanup activities for sites contaminated with hazardous substances. Grant funds also will be used to manage the RLF and conduct community outreach activities. RLF activities will focus on Arctic Village in West Warwick, the Woonasquatucket/Valley Corridor in Providence, and the Pawtucket and Central Falls Transit Hubs.

Brownfields 2016 Grant Fact Sheet

Atlantic City, NJ

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the City of Atlantic City for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to inventory and prioritize brownfields, and conduct 12 Phase I and 12 Phase II environmental site assessments. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination.

Cleanup Grants

\$363,658 for hazardous substances

EPA has selected the City of Atlantic City for two brownfields cleanup grants. Hazardous substances grant funds will be used to clean up the Bungalow Park site at 709 Mediterranean Avenue, and the Delta Basin Homes site at North Maryland, Wabash, and Adriatic Avenues. The Bungalow Park site is vacant, undeveloped land and is contaminated with historic fill. The Delta Basin Homes site was formerly developed with a vehicle inspection station and automobile repair garages, and is contaminated with historic fill. Grant funds at both sites also will be used for community outreach and involvement activities.

Brownfields 2016 Grant Fact Sheet

Rome, NY

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for petroleum

EPA has selected the City of Rome for a brownfields cleanup grant. Petroleum grant funds will be used to clean up the former Rome-Turney Radiator Company site at 109 Canal Street. The 1.4-acre site was operated by the Rome-Turney Radiator Company from 1905 until the mid-1990s as a manufacturing plant for radiators. In June 1988, the site experienced a petroleum release from fuel storage tanks, contaminating the property's soil and groundwater. Grant funds also will be used for community outreach activities.

Brownfields 2016 Grant Fact Sheet

Earth Conservancy, Hanover Township and Nanticoke, PA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Earth Conservancy for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Espy Run on Espy Street in Hanover Township and the City of Nanticoke. The 2.4-mile-long stream runs through an area that has been used for anthracite mining. The stream has been impacted by historic mining activity and acid mine drainage. Grant funds also will be used for community outreach and engagement activities.

Brownfields 2016 Grant Fact Sheet

Johnstown, PA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the City of Johnstown for two brownfields assessment grants. Community-wide hazardous substances and petroleum grant funds will be used to conduct 15 Phase I and 10 Phase II environmental site assessments. Grant funds also will be used to perform community involvement and outreach activities, and develop site cleanup plans.

Brownfields 2016 Grant Fact Sheet

Philadelphia Authority for Industrial Development, PA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Philadelphia Authority for Industrial Development for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the 1201 South 35th Street site. The site was formerly the location of an iron foundry, animal feed supplement manufacturer, and propane distributor. It is contaminated with arsenic, benzo(a)pyrene, and metals.

Revolving Loan Fund Grant

\$820,000 for hazardous substances

EPA has selected the Philadelphia Authority for Industrial Development for a brownfields revolving loan fund grant. The grant will be used to capitalize a revolving loan fund from which the Philadelphia Authority for Industrial Development will provide two loans and two subgrants to support cleanup activities for sites contaminated with hazardous substances. Grant funds also will be used to conduct community engagement activities. Activities will focus on the Lower Schuylkill area.

Brownfields 2016 Grant Fact Sheet

Business Development Corporation of the Northern Panhandle, Brooke and Hancock Counties, WV, and Jefferson County, OH

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grant

\$395,000 for hazardous substances

\$205,000 for petroleum

EPA has selected the Business Development Corporation of the Northern Panhandle for a brownfields assessment coalition grant. Community-wide hazardous substances grant funds will be used to conduct 10 Phase I and seven Phase II environmental site assessments, and prepare five cleanup plans. Community-wide petroleum grant funds will be used to conduct seven Phase I and four Phase II environmental site assessments, and prepare three cleanup plans. Grant funds of both types also will be used to inventory and prioritize brownfields, and conduct community outreach activities.

Assessment activities will be conducted in Brooke and Hancock Counties, West Virginia, and Jefferson County, Ohio. Coalition partners are the Jefferson County Port Authority and Brooke-Hancock-Jefferson Metropolitan Planning Commission.

Cleanup Grants

\$158,500 for hazardous substances

EPA has selected the Business Development Corporation of the Northern Panhandle for two brownfields cleanup grants. Hazardous substances grant funds will be used to clean up the former Jimmy Carey Stadium property at Orchard Street and Virginia Avenue in Weirton, West Virginia, and the Lodge at the Williams property at 1000 Williams Drive in Weirton. The 8.7-acre Jimmy Carey Stadium property formerly housed school buildings, a football stadium, and school bus parking. It is contaminated with polycyclic aromatic hydrocarbons, metals, and inorganic contaminants. Grant funds also will be used to conduct community involvement activities and redevelopment planning. The Lodge at the Williams was formerly a residence and location for business accommodations, and is contaminated with metals and inorganic contaminants. Grant funds also will be used to conduct community involvement activities.

Brownfields 2016 Grant Fact Sheet

Thomas, WV

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the City of Thomas for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Thomas West Riverfront site located at 1 Riverfront Drive. The site operated from 1884 to 1965 as a railroad bed, coal coking and mining site, and dumping ground for coal mining refuse. It now sits unused as abandoned mine land, and is contaminated with heavy metals and polycyclic aromatic hydrocarbons. Grant funds also will be used to support community involvement activities and reuse planning.

Brownfields 2016 Grant Fact Sheet

Wayne County Economic Development Authority Inc., WV

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Wayne County Economic Development Authority Inc. for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former Kenova Grade School site at 1400 Poplar Street in Kenova. The one-acre property was used as a school from 1910 to 2012, and has been closed since then. It is contaminated with inorganic contaminants and lighting ballasts. Grant funds also will be used to support community involvement activities, and conduct redevelopment planning.

Brownfields 2016 Grant Fact Sheet

Kentucky Department for Environmental Protection

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the Kentucky Department for Environmental Protection for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to conduct 16 Phase I and eight Phase II environmental site assessments. Grant funds also will be used to support community outreach activities. Community-wide petroleum funds will be used to conduct the same tasks at sites with potential petroleum contamination.

Brownfields 2016 Grant Fact Sheet

Kentucky River Area Development District, Southeastern Kentucky

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the Kentucky River Area Development District for two brownfields assessment grants. Community-wide hazardous substances and petroleum grant funds will be used to conduct 17 Phase I and nine Phase II environmental site assessments, and prepare up to eight cleanup plans. Grant funds also will be used to inventory sites, including mine-scarred land, and conduct community outreach activities.

Greenwood, MS

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the City of Greenwood for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to inventory and prioritize sites, and conduct eight Phase I and three Phase II environmental site assessments. Grant funds also will be used to prepare five or six cleanup plans, and support community outreach activities. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination.

Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grants

\$400,000 for hazardous substances

EPA has selected the Town of Robbins for two brownfields cleanup grants. Hazardous substances grant funds will be used to clean up the Northern Parcel of the former Robbins Mill at 200 South Kennedy Street, and the Southern Parcel of the former Robbins Mill at 100 South Kennedy Street. The Robbins Mill property originally was developed and used as a woolen textile mill. Both parcels are contaminated with polycyclic aromatic hydrocarbons and metals. Grant funds at both sites also will be used to conduct community outreach activities.

Brownfields 2016 Grant Fact Sheet

Pickens, SC

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$127,000 for hazardous substances

EPA has selected the City of Pickens for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former Rail Depot Property on 124 Railroad Street. Originally developed as a passenger train depot with railway yard and shipping warehouses as early as 1889, the 1.9-acre site expanded in the 1930s and 1960s, when it operated as a box car assembly operation until approximately 1982. The facility then provided repair services for the box cars until 1995, when it was used for railroad locomotive repair and refurbishing. The site is currently contaminated with inorganic contaminants and metals. Grant funds also will be used to support community outreach activities.

Brownfields 2016 Grant Fact Sheet

South Carolina Department of Health and Environmental Control

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Revolving Loan Fund Grant

\$820,000 for hazardous substances

EPA has selected the South Carolina Department of Health and Environmental Control for a brownfields revolving loan fund grant. The grant will be used to capitalize a revolving loan fund from which the South Carolina Department of Health and Environmental Control will provide loans to support cleanup activities for sites contaminated with hazardous substances. Grant funds also will be used to conduct community involvement and marketing activities. RLF activities will focus on the Cities of Chester and Greenwood, and Anderson County.

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the City of Chattanooga for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former Glover Tract located on the 500 block of East 38th Street. The site has been a wooded floodplain of South Chattanooga Creek since 1893. Dumping of coal tar residue into the creek and historic overflow have resulted in the site being contaminated with polycyclic aromatic hydrocarbons. Grant funds also will be used to develop a health and safety plan and a community involvement plan.

Brownfields 2016 Grant Fact Sheet

Knoxville, TN

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grants

\$350,000 for hazardous substances

EPA has selected the City of Knoxville for two brownfields cleanup grants. Hazardous substances grant funds will be used to clean up the former McClung Warehouses property on West Jackson Avenue. The five-acre site formerly housed warehouses, a blacksmith shed, and railroad freight storage. It is contaminated with toxic metals, chemicals, and inorganic contaminants. Hazardous substances grant funds also will be used to clean up the former Sanitary Laundry and Dry Cleaning property at 625 North Broadway. The site operated as a laundry and dry cleaning facility for nearly 70 years, and is now vacant. It is contaminated with dry cleaning compounds, solvents, and metals. Grant funds at both sites also will be used to conduct community outreach activities.

Brownfields 2016 Grant Fact Sheet

Chicago, IL

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the City of Chicago for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to inventory sites and conduct six Phase I and six Phase II environmental site assessments. Grant funds also will be used to prepare three cleanup plans. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination. Assessments will focus on the Pilsen and Little Village neighborhoods.

Brownfields 2016 Grant Fact Sheet

River Hills Economic Development District and Regional Planning Commission, Southern Indiana

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grant

\$375,000 for hazardous substances

\$175,000 for petroleum

EPA has selected River Hills Economic Development District and Regional Planning Commission for a brownfields assessment coalition grant. Community-wide hazardous substances grant funds will be used to conduct 15 Phase I and 11 Phase II environmental site assessments. Community-wide petroleum grant funds will be used to conduct seven Phase I and five Phase II environmental site assessments. Grant funds of both types also will be used to inventory sites, and support cleanup planning and community outreach activities. Coalition partners are the south-central Indiana counties of Clark, Floyd, Harrison, Scott, and Washington.

Brownfields 2016 Grant Fact Sheet

Detroit/Wayne County Port Authority, MI

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Revolving Loan Fund Grant

\$620,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the Detroit/Wayne County Port Authority for a brownfields revolving loan fund coalition grant. The grant will be used to capitalize a revolving loan fund from which the Detroit/Wayne County Port Authority will provide loans and subgrants to support cleanup activities for three to six sites contaminated with hazardous substances and petroleum. Grant funds also will be used to market the RLF, conduct community involvement activities, and oversee site cleanups. The Port Authority's coalition partner is the Detroit Brownfield Redevelopment Authority. Target areas will be sites associated with shipping and transportation in Detroit and throughout Wayne County.

Kalamazoo County Brownfield Redevelopment Authority, MI

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the Kalamazoo County Brownfield Redevelopment Authority for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to conduct eight Phase I and eight Phase II environmental site assessments. Grant funds also will be used to inventory and prioritize brownfield sites, with a focus on the target Northside Neighborhood, and Pitcher Street and King Highway corridors; support cleanup planning for three sites; and conduct community outreach activities, including conducting four meetings with stakeholders. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination.

Brownfields 2016 Grant Fact Sheet

Oakland County, MI

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grant

\$400,000 for hazardous substances

\$200,000 for petroleum

EPA has selected Oakland County for a brownfields assessment coalition grant. Community-wide hazardous substances grant funds will be used to perform 36 Phase I and 16 Phase II environmental site assessments. Community-wide petroleum grant funds will be used to perform 16 Phase I and eight Phase II environmental site assessments. Grant funds of both types also will be used to conduct community involvement activities, and maintain and update the county's site inventory. Assessment activities will focus on the 8 Mile Boulevard and Woodward Avenue corridors. Coalition partners are the Cities of Farmington Hills, Ferndale, Hazel Park, Madison Heights, Pontiac, and Southfield.

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the City of Reading for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to inventory sites and conduct five Phase I and five Phase II environmental site assessments. Grant funds also will be used to prepare two cleanup plans and support community outreach activities. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination.

Brownfields 2016 Grant Fact Sheet

Toledo, OH

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Revolving Loan Fund Grant

\$410,000 for hazardous substances

\$410,000 for petroleum

EPA has selected the City of Toledo for a brownfields revolving loan fund grant. The grant will be used to capitalize a revolving loan fund from which the City of Toledo will provide loans and subgrants to support cleanup activities at a minimum of four sites contaminated with hazardous substances and petroleum. Grant funds also will be used for marketing the RLF and community involvement activities.

Brownfields 2016 Grant Fact Sheet

Zanesville, OH

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grant

\$400,000 for hazardous substances

\$150,000 for petroleum

EPA has selected the City of Zanesville for a brownfields assessment coalition grant. Community-wide hazardous substances grant funds will be used to perform 14 Phase I and 12 Phase II environmental site assessments, and prepare two cleanup plans. Community-wide petroleum grant funds will be used to perform five Phase I and four Phase II environmental site assessments, and prepare two cleanup plans. Grant funds of both types also will be used to update the current brownfields inventory and conduct community outreach activities. Coalition partners are Muskingum County and the Zanesville-Muskingum County Port Authority. Assessment activities will focus on the East Fultonham, Philo, Roseville, and Zanesville communities.

Brownfields 2016 Grant Fact Sheet

Racine Redevelopment Authority, WI

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Racine Redevelopment Authority for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the South Lot of the former Racine Steel Castings site at 1425 North Memorial Drive. The site operated as a steel foundry from the late 1800s to 2001, and was used as a storage and salvage operations site until 2013. It is contaminated with polycyclic aromatic hydrocarbons, PCBs, and metals. Grant funds also will be used to support community outreach activities.

Brownfields 2016 Grant Fact Sheet

Redevelopment Authority of the City of Milwaukee, WI

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grants

\$400,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the Redevelopment Authority of the City of Milwaukee for three brownfields cleanup grants. Hazardous substances grant funds will be used to clean up the 400 South Layton Boulevard site. Located along a riverbank, it is a former rice marsh that was contaminated by stream relocation, grading, and filling activities. It is contaminated with volatile organic compounds, phosphorus, and nitrogen. Hazardous substances grant funds also will be used to clean up the 4135 South 6th Street site. The site formerly housed a chemical laboratory, and has been vacant since 1984. It is contaminated with chlorinated volatile organic compounds, polycyclic aromatic hydrocarbons, and metals. Petroleum grant funds will be used to clean up the 27th and Townsend property at 3424 North 27th Street, and 2537 West Hopkins Street. The site was formerly used for two service stations and a parking lot, and is contaminated with petroleum. Grant funds for all three sites also will be used to conduct community involvement activities.

Brownfields 2016 Grant Fact Sheet

St. Ann Center for Intergenerational Care, Milwaukee, WI

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grants

\$400,000 for hazardous substances

EPA has selected the St. Ann Center for Intergenerational Care for two brownfields cleanup grants. Hazardous substances grant funds will be used to clean up the East and West Release Sites of the Bucyrus Campus at 2450 West North Avenue in Milwaukee. Dating back to the late 1800s, the three-acre East Release Site and 3.5-acre West Release Site were formerly developed with residences and commercial buildings. Both sites contain historic fill that is contaminated with polynuclear aromatic hydrocarbons. Grant funds at both sites also will be used to conduct community outreach activities.

In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grant

\$480,000 for hazardous substances

\$120,000 for petroleum

EPA has selected the Wisconsin Department of Natural Resources for a brownfields assessment coalition grant. Community-wide hazardous substances and petroleum grant funds will be used to perform 13 Phase I and 14 Phase II environmental site assessments throughout the State of Wisconsin. Grant funds also will be used to conduct four site investigations, and complete two cleanup plans. Coalition partners are the Bay-Lake, Capital Area, East Central, Mississippi River, North Central, Northwest, Southeastern Wisconsin, Southwestern Wisconsin, and West Central Wisconsin Regional Planning Commissions.

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the City of Waterloo for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to conduct approximately 17 Phase I and nine Phase II environmental site assessments. Community-wide petroleum grant funds will be used to conduct approximately 15 Phase I and eight Phase II environmental site assessments. Grant funds of both types also will be used to support cleanup planning and community outreach activities.

Brownfields 2016 Grant Fact Sheet

Hardesty Renaissance Economic Development Corporation, Kansas City, MO

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Hardesty Renaissance Economic Development Corporation for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up Building 10 of the Hardesty Federal Complex on 605 Hardesty Avenue in Kansas City. The building was used as a United States Army Quartermaster Corps storage depot in the late 1940s and provided a variety of support functions for various federal agencies until it was closed in 2002. It has been vacant since then and is contaminated with metals and inorganic substances. Grant funds also will be used to support community outreach activities.

Brownfields 2016 Grant Fact Sheet

North Central Missouri Regional Water Commission, Sullivan County, MO

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$96,754 for hazardous substances

EPA has selected the North Central Missouri Regional Water Commission for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up seven parcels at the East Locust Creek Reservoir site in Sullivan County. The parcels were historically used for residential, agricultural, and commercial purposes, but are currently vacant. They are contaminated with metals, inorganic contaminants, and household hazardous waste. Grant funds also will be used to support community outreach activities and conduct health monitoring.

Brownfields 2016 Grant Fact Sheet

Colorado Department of Local Affairs, Las Animas, CO

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grants

\$206,400 for hazardous substances

EPA has selected the Colorado Department of Local Affairs for two brownfields cleanup grants.

Hazardous substances grant funds will be used to clean up Fort Lyon Buildings 7 and 508 at 30999 County Road 15 in Las Animas. The Fort Lyon site was formerly used as a U.S. Army Post, hospital, and veterans residential care facility, and is now a supportive residential community. Buildings 7 and 508 were formerly used for housing and are contaminated with inorganic contaminants. Hazardous substances grant funds also will be used to clean up Buildings 503, 504, and 507 (Officers' Row) at the same address. Buildings 503, 504, and 507 were formerly used for housing and are contaminated with inorganic contaminants. Grant funds at both sites also will be used to conduct community involvement activities.

Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Lakewood Housing Authority for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the 5800 West Alameda Avenue site in Lakewood. The site previously operated as retail and office space, and once housed a dry cleaner. Part of the site currently is vacant, and another part is occupied by a charter school. The site is contaminated with mold, metals, inorganic contaminants, and soil vapors.

In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grants

\$400,000 for hazardous substances

EPA has selected the Standing Rock Sioux Tribe for two brownfields cleanup grants. Hazardous substances grant funds will be used to clean up the Old Fort Yates Elementary School at 1801 Agency Avenue in Fort Yates. The building was used as a school from the 1970s until it closed a few years ago. It is contaminated with PCBs, mold, and inorganic contaminants. Hazardous substances grant funds also will be used to clean up the Old Sitting Bull College at 1341 92nd Street in Fort Yates. The three-acre site was the location of a community college from 1973 to 2009. The college building is contaminated with PCBs, mold, and inorganic contaminants. Grant funds for both sites also will be used to conduct community involvement activities.

Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for petroleum

EPA has selected the City of Mt. Shasta for a brownfields cleanup grant. Petroleum grant funds will be used to clean up the central area of the Old Mill within The Landing Commerce Park Mt. Shasta at 2329 South Mt. Shasta Boulevard. The eight-acre site was used for lumber mill operations from the 1900s until the late 1960s, and is contaminated with petroleum hydrocarbons. Grant funds also will be used to support community involvement and outreach activities.

Brownfields 2016 Grant Fact Sheet

Nevada City, CA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the City of Nevada City for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Providence Mine Mining Features Area located on Providence Mine Road. The mine was a productive gold mine for 68 years, but is now abandoned. It is contaminated with metals, including mercury, arsenic, and cadmium. Grant funds also will be used to support community outreach activities.

Brownfields 2016 Grant Fact Sheet

Richmond, CA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the City of Richmond for two brownfields assessment grants. Community-wide hazardous substances and petroleum grant funds will be used to conduct 30 Phase I and eight Phase II environmental site assessments. Grant funds also will be used to prepare eight cleanup plans and support community outreach activities.

Brownfields 2016 Grant Fact Sheet

Sonoma County Community Development Commission, CA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$196,000 for hazardous substances

\$196,000 for petroleum

EPA has selected the Sonoma County Community Development Commission for two brownfields assessment grants. Community-wide hazardous substances and petroleum grant funds will be used to inventory sites and conduct up to 18 Phase I and five Phase II environmental site assessments. Grant funds also will be used to support community involvement activities. The target area for assessments will be the Roseland neighborhood in Sonoma County.

Brownfields 2016 Grant Fact Sheet

Henderson, NV

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grant

\$275,000 for hazardous substances

\$275,000 for petroleum

EPA has selected the City of Henderson for a brownfields assessment coalition grant. Community-wide hazardous substances grant funds will be used to perform nine Phase I environmental site assessments, and prepare two cleanup plans. Community-wide petroleum grant funds will be used to perform six Phase I environmental site assessments, and prepare two cleanup plans. Grant funds of both types will be used to prepare a brownfields inventory report, perform four Phase II environmental site assessments, and conduct community involvement activities. Coalition partners are the Henderson Redevelopment Agency and Southern Nevada Health District. Assessment efforts will target sites along the Boulder Highway Corridor in Henderson.

Brownfields 2016 Grant Fact Sheet

Cook Inlet Housing Authority, Anchorage, AK

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for petroleum

EPA has selected the Cook Inlet Housing Authority for a brownfields cleanup grant. Petroleum grant funds will be used to clean up the Tesoro-Olson Site/Alpina Auto Repair Shop site at 3607 and 3609 Spenard Road in Anchorage. The site has been used as a gas station since 1964 and as an auto repair facility, car wash and detail shop, wood lot, and rental car business since the mid-1990s. It is contaminated with petroleum hydrocarbons.

Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grant

\$275,000 for hazardous substances

\$275,000 for petroleum

EPA has selected the Matanuska-Susitna Borough for a brownfields assessment coalition grant. Community-wide hazardous substances grant funds will be used to inventory and prioritize brownfield sites; conduct up to 12 Phase I, four Phase II, and two supplemental Phase II environmental site assessments; and prepare three cleanup plans. Grant funds also will be used to prepare area-wide plans for two focus areas and conduct community outreach activities. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination. Coalition partners are the Cities of Palmer and Wasilla.

Brownfields 2016 Grant Fact Sheet

Metro, Clackamas County, OR

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grant

\$300,000 for hazardous substances

\$300,000 for petroleum

EPA has selected Metro for a brownfields assessment coalition grant. Community-wide hazardous substances grant funds will be used to update an inventory of brownfield sites, conduct up to 10 Phase I and 10 Phase II environmental site assessments, and prepare one cleanup plan. Grant funds also will be used to conduct community outreach activities. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination. The target areas for this grant are communities along a nine-mile segment of McLoughlin Boulevard in northwestern Clackamas County. Coalition partners are Clackamas County and the City of Oregon City.

Brownfields 2016 Grant Fact Sheet

Tigard City Center Development Agency, OR

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grants

\$400,000 for hazardous substances

EPA has selected the Tigard City Center Development Agency for two brownfields cleanup grants. Hazardous substances grant funds will be used to clean up Property 1 of the Main Street/Fanno Creek (Saxony-Pacific) site at 12535 SW Main Street. Hazardous substances grant funds also will be used to clean up Property 2 of the Main Street/Fanno Creek (Saxony-Pacific) site at 12533 SW Main Street. Both properties are located at a site that was formerly the location of a sawmill, welding shop, and printing shop, and are contaminated with halogenated volatile organic compounds, metals, and PCBs. Grant funds at both properties also will be used to enforce institutional controls and conduct community engagement activities.
