

EPA REVIEWS CLEANUP

Butz Landfill Superfund site

The U.S. Environmental Protection Agency (EPA) is conducting a Five-Year Review of the Butz Landfill Superfund Site located in Jackson Township, Monroe County. EPA inspects sites regularly to ensure that cleanups conducted remain fully protective of public health and the environment. Our last review of the site determined that more testing and additional land use controls were needed to make a long-term protectiveness determination. Since then, additional testing has been conducted and progress has been made on the land use controls. The site is protective of public health and the environment in the short-term and will be protective in the long-term once remaining land use controls are put into place. Test results and protectiveness determination will be available September 2016.
