

**Ivan R. Piletic, Physical Scientist, in EPA's National Exposure Research Laboratory**

Exposure Methods and Measurements Division

Mailing Address

[piletic.ivan@epa.gov](mailto:piletic.ivan@epa.gov)

**Area of Expertise:** Ivan's current research involves the computational study of the atmospheric chemistry of gas and particle phase compounds affecting air quality and climate change. Quantum chemistry and master equation models are being used to determine reaction kinetics, branching ratios and yields of important atmospheric reactions. A particular focus is being placed on investigating novel mechanisms affecting the concentrations of several criteria air pollutants: ozone, nitrogen oxides and particulate matter. The results of this work are being used to develop more accurate atmospheric models that are used by the states for regulatory purposes.

**Education:**

- Ph.D., Chemistry, Stanford University, Stanford, CA, 2006
- B.S., Chemistry and Mathematics, McMaster University, Hamilton, ON, Canada, 2000

**Professional Experience:**

- Physical Scientist, US EPA, Research Triangle Park, 2014-present
- Postdoctoral Physical Scientist, US EPA, Research Triangle Park, NC 2010-2014
- Postdoctoral Chemist, Duke University, Durham, NC 2006-2010
