

EPA REVIEWS CLEANUP

Ordnance Works Disposal Areas

The U.S. Environmental Protection Agency (EPA) is conducting a Five-Year Review of the Ordnance Works Disposal Areas Superfund Site located in Morgantown, WV. EPA inspects sites regularly to ensure that cleanups conducted remain fully protective of public health and the environment. As EPA has determined the cleanup remedy is fully protective in the long-term, this site will be proposed for de-listing from the Superfund National Priorities List by close of this year. The finalized Five-Year Review Report will be available by September 2016.
