

EPA REVIEWS CLEANUP

Valmont TCE Superfund Site

The U.S. Environmental Protection Agency (EPA) is conducting a Five-Year Review of the Valmont TCE Superfund Site located in West Hazleton. EPA inspects sites regularly to ensure that cleanups conducted remain fully protective of public health and the environment. EPA is currently optimizing the groundwater remediation approach and continues to inspect residential vapor mitigation systems to ensure they are working properly. The results of this Five-Year Review will be available in August 2016.

To access results of the review (starting August 2016):
