

Appendix A: Decision Review Times for Actions Completed During FY 2011

As required by FIFRA Section 33(k), the following table (an Excel file) provides the decision times for each decision (application) completed during FY 2011. Decisions with a two digit PRIA code are PRIA 1 decisions (received by EPA between March 23, 2004, and September 30, 2007), while those with a three digit PRIA code are PRIA 2 decisions (received on and after October 1, 2007). A negative number of days between the start of the PRIA decision time review period and the date a decision was completed occurs when decisions were completed before the PRIA start date formally began, which is 21 days after the latest of the date the fee was paid or the date the application was received or when an exemption or small business fee waiver was granted. If a decision number appears in the column titled “Primary decision”, the decision is a “secondary decision”, meaning it is dependent upon the primary decision in some manner. Primary and secondary decisions and negotiated due dates (due date extensions) are discussed in the section titled “[Progress in Meeting Decision Times](#)”.

Mandatory decision time frames depend on the year the application was received. Mandated time frames can be found in the fee schedules published in the *Federal Register* Notice on March 17, 2004, titled [Pesticides; Fees and Decision Times for Registration Applications](#) for PRIA 1 actions and for PRIA 2 decisions, in the Notice titled [Pesticides; Revised Fee Schedule for Registration Applications](#), published on October 30, 2007. As EPA improves its reporting capabilities, the agency may update this table, as necessary.
