

EPA Recommended Specifications Standards and Ecolabels

EPA's Interim Recommendations are based on specifications, environmental performance standards and ecolabels selected and utilized by federal agencies to assist in their procurement of environmentally preferable products and services. Currently, the interim recommendations include specifications, standards and ecolabels from the Department of Energy's (DOE's) FY16 Priority Products List and the General Services Administration's (GSA's) Key Sustainable Products. DOE and GSA Public Buildings Service have identified specifications, standards and ecolabels for products that meet federal statutory requirements, have verified sustainability attributes, are readily available in the market, and meet cost and performance needs.

DOE's FY15 Priority Products List and GSA's Key Sustainability Products can be viewed on [GSA's Green Procurement Compilation](#). Further information about the evaluation processes used by these Agencies to select these specifications, standards and ecolabels is available in the [DOE's background and evaluation process document](#) and the [GSA Public Buildings Service's background and evaluation process document](#).

In some cases DOE and GSA Public Buildings Service have identified different specifications, standards and ecolabels for a specific product category. After consultation with GSA Public Buildings Service and DOE, EPA chose to utilize specifications, standards and ecolabels identified by GSA in those instances because they are required for GSA Public Buildings Service procurement while DOE's Priority Products List is used on a voluntary basis for DOE procurement. The relevant statutory sustainable procurement requirements and federal ecolabels that apply to each product and service category are included in the chart alongside the EPA Interim Recommendations in order to clarify Executive Order direction for federal purchasers. EPA has also revised some recommendations to address government-wide considerations. For most product categories, EPA's Interim Recommendations do not include specifications. In instances where there was known potential for limited product availability related to a particular standard or ecolabel, specifications were included.

EPA's Interim Recommendations do not include a comprehensive list of all product and service categories with federal statutory sustainable procurement requirements or relevant federal ecolabels. To see the full list of all product and service categories and their associated federal green purchasing requirements, please go to GSA's Green Procurement Compilation.

* For this product category, EPA is piloting an assessment approach for standards and ecolabels using its Draft Guidelines. Once the pilot has concluded, EPA plans to update the interim recommendations for this product category accordingly.

** EPA is exploring whether updates to the interim recommendations for the Lumber/Wood purchasing category may be appropriate.

^ This standard requires additional instructions for access and download. Learn how to access these standards [here](#).

Standards

If you are a US federal government employee who would like access to one of the standards referenced in the EPP Guidelines, please follow the instructions below. The developers of these standards will make them available free of charge to federal government employees for reference and review purposes.

Access to NSF Standards:

Instructions: Please email EPP@epa.gov from your .gov email address and we will forward your request to the standards body. Please include your full name and where you work. The standard will then be emailed to you in PDF form.

Links to NSF Standards:

- [NSF 140 Sustainability Assessment for Carpet](#)
- [NSF 332 International Sustainability Assessment for Resilient Floor Coverings](#)
- [Business and Institutional Furniture Manufacturers Association \(BIFMA\) Level](#)

Access to UL Standards:

Instructions: If you do not already have a registered account [visit UL to create one](#). Anyone with a .gov email address will gain access to the standard free of charge. Once the account is created follow the instructions below:

- Click the desired standard above which will take you to the UL website.
- Click the red "Purchase Options" button. It will take you to a new page, select "Secure PDF" with no fee, then click the red "Add to Cart" button.
- On the next page click the red "Checkout" button.
 - If not already logged in, you will be asked for your log in information here. Log in and proceed to the next page and click the red "Checkout" button.
- On the next page you click the red "Go to Download PDF" button and follow the directions to download. You then should have full access to that standard.
